Renewable Heat NY
Regional Recycling Centers

Contractors may recycle wood or pellet stoves at recycling centers not listed below; however, the receipt must have sufficient detail for the Program to determine that the wood or pellet stove has been properly decommissioned and recycled.

Units eligible for recycling are existing, installed, working, wood or pellet stoves or fireplace inserts (with an enclosed metal firebox). Photographs of the existing unit, as installed in the home may be requested by the Program.

The receipt must contain the following information 1) date of recycling 2) name of the recycling facility, 3) address of the recycling facility, 4) phone number of the recycling facility,
and 5) a description of the recycled material. Contractors are encouraged to request that "wood stove" or "pellet stove" be included in the recycled item description.

A single receipt for the recycling of multiple items will be accepted provided that each stove is appropriately itemized. Upon submission for Program review, **contractors must include each customer name and project ID number next to the recycled stove** to indicate ownership for the purpose of processing the rebate.
