

New York School Bus Incentive Program (NYSBIP) Site Host Agreement

NYSBIP is a program that provides incentives to help school districts and third-party contractors purchase electric school buses (ESBs) and associated charging infrastructure. NYSEDA will provide incentives for charging infrastructure in the form of Charging Vouchers upon completion of the installation of eligible charging infrastructure and the approval of required documentation. To participate in the program, NYSBIP Charging Infrastructure Purchasers must obtain authorization from the property owner, or an authorized agent of the property owner, giving the Purchaser permission to install charging infrastructure on the site. To authorize installation, the property owner (or an authorized agent of the property owner) and the Purchaser shall complete this form. If the Purchaser is the property owner, its completion of this form serves as attestation that the Purchaser is the property owner and has the right to install the charging infrastructure on its property.

Purchaser

Table with 2 columns and 4 rows: Organization Name, Site Name, Installation Site Address, Number of Charging Ports to Be Installed.

Property Owner or Authorized Agent of Property Owner

By signing this form, I give the Purchaser listed above the authority to install charging infrastructure at the property address listed above. I acknowledge and agree that NYSEDA shall have no liability to the property owner relating to the installation and operation of the charging infrastructure, and that all such liability and responsibility shall be between the property owner and the Purchaser.

Table with 2 columns and 5 rows: Listed owner on record with the County Assessor, Assessor's Parcel Number, Property Owner or Authorized Agent of Property Owner - Print Name, Property Owner or Authorized Agent of Property Owner - Signature, Date.
