

## Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
  - Propane (Mt Belvieu), Crude oil (WTI and Brent), and Natural gas (Henry Hub) all slightly decreased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
  - Propane and total gasoline inventories decreased. Total gasoline inventories are currently below 10-year low inventory volumes for the region.
  - Ultra-low sulfur diesel (ULSD) inventories increased.
  - Natural gas regional inventories continue to increase and are nearing 10-year high inventory volumes.
- Market influencers include:
  - Global factors include the ongoing Russian invasion of Ukraine, continued economics concerns (example: recession), and fuels supply/demand dynamics (example: summer driving demand) continue to influence markets.
- National Oceanic and Atmospheric Administration (NOAA) forecast for New York/Northeast temperatures to be near normal for the next 1-2 weeks with near normal to above average precipitation (Page 6).
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
  - NY transportation gasoline prices slightly increased and diesel prices slightly decreased compared to the prior week.
