

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (WTI and Brent) slightly decreased.
 - Propane (Mt Belvieu) remained similar to last week.
 - Natural gas (Henry Hub) slightly increased.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Ultra-low sulfur diesel (ULSD) and propane inventories increased.
 - Total gasoline inventories slightly decreased.
- Market influencers include:
 - Global factors include the ongoing Russian invasion of Ukraine, continued global economics concerns, and seasonal transition to summer specification gasoline.
- National Oceanic and Atmospheric Administration (NOAA) forecast for New York/Northeast to temperatures leaning below average for the next 1-2 weeks with near normal precipitation (Page 6). New York State Department of Environmental Conservation (NYSDEC) reports a low fire risk across NY with a moderate fire risk in western NY.
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation gasoline and diesel were comparable to the prior week with little change.
 - NY heating fuels (heating oil and kerosene) slightly decreased while propane increased compared to the prior week.
