

Reforming the Energy Vision (REV)

- distributed energy resources (DER)
as a primary tool
- outcome-based ratemaking

Why REV now?

- Cost pressures
- DER advances
- Climate change
- Fuel diversity
- Information technology

Benefits of REV

- Load shaping/ system efficiency
- Distribution infrastructure
- Reliability/resilience
- Emission reductions

Low-income customers

- impact on customer bills
- resilience
- disruptive trends
- energy efficiency programs
- net metering
- non-participating customers
- EJ communities
- time-of-use rates
