Connecting Networks

PUSH Green provided on site information sessions for employees to learn about the benefits of weatherization and energy efficiency. Through PUSH Green's efforts and initiatives many of our employees have taken the first step towards making their home more energy efficient and will be able to reduce their energy costs.

We believe PUSH Green is truly dedicated to their mission of making WNY cleaner, greener and healthier for everyone.

The Commitment is Simple:

SPEAK – write a public endorsement of PUSH Green for placement in a local publication

REFER – Have a large constituent base? Send a simple mailing to your constituents with assistance from us, informing your base about PUSH Green energy efficiency services

HOST – Host an event at your home or business and allow a PUSH Green Advocate to share information on our services

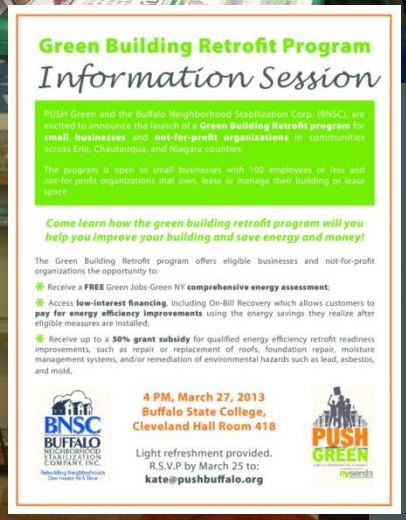
Take Action

Push Green program helps residents save on energy costs

I'd like to share information about an important program that is currently in the Kenmore area — PUSH Green.

The list of eligible measures is huge — ranging from duct sealing and pipe insulation to installation of new doors, light fixtures, and



Green Building Retrofit Program

Information Session

PUSH Green and the Buffalo Neighborhood Stabilization Corp. (BNSC), are excited to announce the launch of a **Green Building Retrofit program** for **small businesses** and **not-for-profit organizations** in communities across Erie, Chautauqua, and Niagara counties.

The program is open to small businesses with 100 employees or less and not-for-profit organizations that own, lease or manage their building or lease space.

Come learn how the green building retrofit program will you help you improve your building and save energy and money!

The Green Building Retrofit program offers eligible businesses and not-for-profit organizations the opportunity to:

- Receive a **FREE** Green Jobs-Green NY **comprehensive energy assessment**;
- Access **low-interest financing**, including On-Bill Recovery which allows customers to **pay for energy efficiency improvements** using the energy savings they realize after eligible measures are installed;
- Receive up to a **50% grant subsidy** for qualified energy efficiency retrofit readiness improvements, such as repair or replacement of roofs, foundation repair, moisture management systems, and/or remediation of environmental hazards such as lead, asbestos, and mold.
