

Clean Energy Action Plan

For Businesses and Residents

NEW YORK
STATE OF
OPPORTUNITY.

NYSERDA

The \$250 million investment is estimated to reduce energy consumption equivalent to the amount of gas needed to heat more than 90,000 homes.

The Clean Energy Action Plan provides relief for businesses and residents affected by a natural gas constraint. As part of this plan, the State will offer new clean energy incentives and investments to:

- Lower energy costs for consumers.
- Promote economic development in affected areas.
- Deliver additional resources for new construction projects, energy efficiency awareness, and community support.

The Clean Energy Action Plan includes the following incentives and programs offered by the New York State Energy Research and Development Authority (NYSERDA):

New Construction: \$28 million in incentives and services are available to new customers, including low- to moderate-income residential developments and waitlisted natural gas customers, to access alternative heating and cooling systems and energy efficiency services.

Energy Efficiency: \$25 million in investments to implement energy efficiency measures for existing customers to reduce overall peak demand constraints.

Additional Incentives for residential and commercial customers in the constrained areas to install clean heating and cooling systems.

Community Outreach: A consumer awareness campaign is available to help communities, businesses, and individuals access the available programs and incentives to help them heat their homes with clean resources and reduce energy waste.

NYSERDA has increased its support for the Sustainable Westchester Clean Heating Campaign, **HeatSmart Westchester**. This community-level initiative is designed to facilitate adoption of fossil-free heating and cooling solutions, such as ground source and air source heat pumps, as well as high-efficiency building envelope measures.

Additionally, **Con Edison** deployed \$165 million toward heat pumps and increasing gas efficiency in the Westchester area to support residential, multifamily, and commercial and industrial customers. The **New York Power Authority (NYPA)** is offering an additional \$32 million in low-cost financing services to its Westchester customers.

“NYSERDA is committed to ensuring that all New Yorkers have access to affordable, safe, clean, and reliable energy sources, and that we can support energy upgrades in a way that drives economic growth.”

President and CEO, NYSERDA
