NYSERDA-Approved FlexTech Consultant

NEW YORK STATE OF OPPORTUNITY. | NYSERDA

Energy can be a significant part of the cost to run your business, but these costs can be managed if you work with a FlexTech Consultant to identify opportunities to reduce energy use.

REDUCE
operating costs

IMPROVE
energy efficiency

MAXIMIZE
profitability

Gain Confidence

Consultants provide objective, site-specific, and targeted studies and will work with you to determine the best approach based on your needs, so you can feel confident in the decisions you're making.

Eligible study areas can include:

- Energy master planning
- Energy studies such as ASHRAE Level II or comparable analyses
- Targeted system or equipment upgrade evaluations
- Clean heating and cooling systems
- Energy efficiency retrocommissioning
- Strategic energy management assistance
- Distributed energy resources including combined heat and power (CHP) and energy storage feasibility studies

By working with a FlexTech Consultant, you can reduce your upfront capital commitment, and receive objective recommendations from experienced consultants.

Through the FlexTech Program you can learn:

- If a clean energy project is right for you
- How to reduce your energy bills
- The payback on potential energy-related building upgrades
- How to develop a capital plan that includes clean energy components
