Plan

Clean Energy Fund:  
**Budget Accounting and Benefits Chapter**

**Submitted by:**  
**The New York State Energy Research and Development Authority**

Revised September 17, 2021

## Budget Accounting and Benefits

This Budget Accounting and Benefits chapter is intended to provide a current and comprehensive compilation of budgets and benefits for all Market Development and Innovation & Research portfolio initiatives contained within the Clean Energy Fund (CEF) Investment Plan as of September 17, 2021. These are compared to the minimum projected benefits identified in the CEF Order and presented in Table 1 for the combined four portfolios of the CEF which also includes NY-Sun and NYGB. All dollars and benefits are reflected in the year in which they are anticipated to be expended.

**Table 1. CEF Minimum Projected Benefits 2016 - 2025 (in millions)**

		Cumulative Annual	Lifetime
Energy Efficiency	MWh	10.6	*
	MMBtu	13.4	*
	MW	*	*
Renwable Energy	MWh	*	88
	MW	*	*
CO2e Emissions Reductions (tons)		*	133
Customer Bill Savings		*	\$39,131
Leveraged Funds		*	\$29,356

\* Denotes metric to be tracked and reported

Table 2 summarizes the progressive budget schedule by portfolio, admin, and evaluation funding. Two adjustments have been made to the CEF program authorization as of September 17, 2021. The first is to increase the authorization by \$9,604,661 to reinstate the original program authorization amounts per the CEF Order, as there was not a shortfall of uncommitted funds as was previously determined. The second change is to revise the Market Development, Innovation and Research, CEF Administration, and CEF Evaluation budgets to account for a reduction in RGGI funding contributions of \$68,315,532. Table 3 details the budget schedule by all initiatives contained within this Investment Plan.

On July 24, 2020 the Statewide Low- and Moderate-Income Portfolio Implementation Plan (Case 18-M-0084, Case 14-M-0094) was jointly filed by NYSERDA and the Utilities. LMI funding administered by NYSERDA starting in 2020 is now governed by this "Joint Plan" and as such, is no longer managed under the traditional NYSERDA "LMI Chapter". For continuity and transparency, NYSERDA will continue to report the details of Joint Plan programming within the Budget Accounting and Benefits Chapter under the "LMI Chapter" heading.

<sup>1</sup>The CEF Order authorized funding for the combined program costs and New York State Cost Recovery Fee (CRF) costs. NYSERDA has revised the presentation in this summary to report CRF separate from program costs, but still subject to the original authorization (as modified by NYSERDA's Uncommitted Funds filing dated April 29, 2016) on a combined basis. This approach improves the transparency of reporting and also recognizes the differences in the timing of commitment/expenditures of program costs vs. CRF costs. The initial budget for CRF assumed the assessment would average 2.2% of funding over the term of the CEF. This was revised on September 13, 2019 to reflect an average of 1.5% of funding over the term of the CEF, representing data gathered during the first 3 years of the CEF. A 1% rate is being reflected for future forecasts starting in 2021 based on current and anticipated costs. Values for historical years throughout the BAB Chapter are updated annually during annual IPPR filing to reflect recorded progress at that time.

Tables 4 through 12 present the associated benefits of the investments outlined in Table 3. Benefits are rounded to three significant figures therefore totals may not sum. Table 4 includes estimated indirect savings from market effects expected to accrue over the longer term as a result of NYSEERDA's investment and follow on market activity. Indirect impact across NYSEERDA initiatives may not be additive due to multiple initiatives operating within market sectors, therefore, indirect savings shown in Table 4 reflect a 50% discount as a basis for conservative estimation at this time. The indirect savings will be quantified and reported based on periodic Market Evaluation studies. Customer Bill Savings are calculated as direct energy bill savings realized by customers participating in NYSEERDA's programs. For Tables 7 through 10, emissions reductions, energy metrics, and bill savings are measured on a 'lifetime' basis to account for the repeating benefits that are realized year-after-year from the implementation of clean energy activity. The carbon benefits are estimated using standard factors to convert electricity, natural gas, and petroleum savings into carbon (1,103 lbs/MWh, 117 lbs/MMBtu, 162 lbs/MMBtu respectively). Estimated bill savings are based on avoided retail rates and include electric, natural gas and petroleum bill savings. With the May 7, 2021 filing, the time horizon for all tables was expanded from 2016-2025 to 2016-2030 to properly encompass the acquired view of benefits across all CEF initiatives.

**Table 4. Energy Efficiency Benefits Summary (MWh, MMBtu)**
