Distillate Stocks—Current and historic heating fuel inventory data is presented in the graphs below.

Propane Stocks—Current and historic heating fuel inventory data is presented in the graphs below.

Retail Btu Price Equivalents—The New York State heating fuel prices Btu graph equates the retail price for New York State wide average residential ultra-low sulfur heating oil, kerosene, propane, and natural gas on a dollar per million Btu (MMBtu) basis.

Note: Natural gas prices are from the U.S. EIA and provided on a monthly basis and delayed by 3 months. The monthly average price of natural gas is higher during the summer months due to low delivery volumes and fixed delivery charges and does not necessarily indicate a higher underlying supply price. Higher average natural gas prices in the summer months are not indicative of higher future prices during the winter months.

Spot Btu Price Equivalents—The Btu spot market graph equates the spot market price, in table below, for NY Harbor ultra-low sulfur diesel fuel and 0.3% sulfur high pour #6 residual fuel, Mont Belieu propane, and the New York City gate natural gas price on a dollar per million Btu (MMBtu) basis.
