

## Overall Energy & Fuels Markets Summary

- Market influencers include:
  - Global factors such as the Russian-Ukraine war, OPEC+ production increases, market volatility associated with U.S. tariff policy, and associated geopolitical uncertainties.
  - Domestic factors associated with seasonal demand change from summer to fall and U.S. economic policy.
- Summary of spot prices for the following market benchmarks (see page 2).
  - Brent crude spot prices generally increased, remaining under \$70 per barrel. WTI generally increased, remaining under \$65 per barrel.
  - Natural gas (Henry Hub) and propane (Mt. Belvieu) spot prices remained relatively consistent.
- Regional fuels inventories (see pages 2 through 4) compared to the previous week:
  - Natural gas inventories increased while propane and total gasoline decreased.
  - Ultra-low sulfur diesel (ULSD) remained relatively unchanged.
- NY retail prices (see pages 5 and 6) for heating and transportation fuels:
  - NY Transportation retail prices for regular gasoline increased while diesel prices were comparable with the prior week, with only +/- 1% change.
  - Heating fuel prices (heating oil, propane, kerosene) remained similar since the prior survey, with only +/- 1% change.
- NY weather forecast and seasonal conditions summary (see pages 7 and 8):
  - The National Oceanic and Atmospheric Administration (NOAA) forecasts indicate leaning above normal temperatures for most of the state for the 6-10 day outlook and likely above to leaning above 8-14 day period.
  - The NOAA forecasts for precipitation indicate leaning below to likely below for the 6-10 day and leaning below to near normal for the 8-14 day period.
