

Overall Energy & Fuels Markets Summary

- Crude oil, propane, and natural gas (Henry Hub) weekly average spot prices compared to the previous week (see page 1):
 - Natural gas (Henry Hub) decreased.
- Regional fuels inventories (see pages 2 and 3) varied compared to the previous week:
 - Ultra-low sulfur diesel (ULSD) and total gasoline inventories increased while propane inventories decreased.
 - ULSD, total gasoline, propane, and natural gas inventories are within the 5-year range.
- Market influencers include:
 - Global factors include the ongoing Russian invasion of Ukraine, warm winter in Europe and the eastern U.S., and global economics/recession concerns.
 - Weather forecast for NY indicating potential for normal to “leaning below” normal temperatures for late-February (see page 6). The warmer winter temperatures this winter season have decreased demand on heating fuels.
- NY retail prices (see pages 4 and 5) for gasoline, diesel, heating oil, propane, and kerosene remain elevated compared to last year:
 - NY retail prices for heating oil and kerosene decreased compared to the prior week.
 - NY transportation gasoline and diesel fuel retail prices slightly increased compared to the prior week.
