

July 14, 2023

# **Overall Energy & Fuels Markets Summary** Summary of average spot prices for the following fuels (see page 1). • Crude oil (WTI and Brent) increased compared to the prior week. Natural gas (Henry Hub) and Propane (Mt Belvieu) remain similar to the prior week. • Ultra-low sulfur diesel (ULSD) inventories increased 12% while propane and natural gas (Henry Hub) also slightly increased compared to the prior week. Natural gas remains near 10-year high inventory volumes. • Total gasoline inventories slightly decreased compared to the prior week. Global factors include the ongoing Russian invasion of Ukraine including the associated geopolitical uncertainties, continued economics concerns, and supply outlook for the second half of the year. NY transportation gasoline prices and diesel prices slightly decreased compared to the prior week.
