NYSERDA

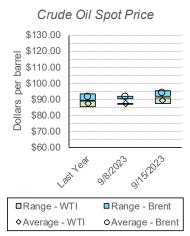

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (WTI and Brent) natural gas (Henry Hub) and propane (Mt Belvieu) all slightly increased.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Ultra-low sulfur diesel (ULSD) inventories slightly decreased.
 - Total gasoline, natural gas and propane inventories increased compared to prior week.
- Market influencers include:
 - Global factors include the ongoing Russian invasion of Ukraine including the associated geopolitical uncertainties, continued economics concerns, late summer/fall refinery maintenance schedules, and continued crude oil production cuts by Saudi Arabia and Russia.
- National Oceanic and Atmospheric Administration (NOAA) forecast for New York/Northeast temperatures likely above average for the next 1-2 weeks with below average precipitation (Page 6).
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation regular gasoline and diesel slightly increased compared to the prior week.
 - Heating oil and kerosene increased while propane slightly decreased compared to the prior week.
