

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (Brent and WTI), natural gas (Henry Hub), and Propane (Mt. Belvieu) average spot prices all decreased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Total gasoline and natural gas inventories increased compared to the prior week.
 - Ultra-low sulfur diesel (ULSD) and propane inventories slightly decreased compared to the prior week.
- Market influencers include:
 - Global factors such as the continued conflicts in the Middle East, Russia-Ukraine war, and associated geopolitical uncertainties.
 - Domestic factors such as the seasonal demand change from summer to fall for transportation fuels as well as incoming cooler temperatures in the northeast are influencing prices and inventories.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate likely above average temperatures for the 6-10 day and 8-14 day periods. The NOAA forecasts for precipitation indicate leaning below average for the 6-10 day and 8-14 day periods. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation regular gasoline and diesel both slightly decreased compared to the prior week.
 - Heating fuels (heating oil, propane, and kerosene) prices all increased compared to the prior week
