

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (Brent and WTI), Propane (Mt. Belvieu), and Natural gas (Henry Hub) average spot prices all increased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Natural gas and Ultra-low sulfur diesel (ULSD) increased while total gasoline and propane inventories decreased compared to the prior week.
- Market influencers include:
 - Global factors such as, continued conflicts in the Middle East, petroleum oversupply concerns, Russia-Ukraine war, and associated geopolitical uncertainties.
 - Domestic factors such as the transition and preparation for the upcoming heating season as well as the recent interest rate drop are influencing prices and inventories.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate leaning below average temperatures for the 6-10 day and leaning to likely above for the 8-14 day period. The NOAA forecasts for precipitation indicate leaning below average to near normal for the 6-10 day and leaning below for the 8-14 day periods. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation regular gasoline and diesel both decreased compared to the prior week.
 - Heating oil and propane prices increased while kerosene slightly decreased compared to the prior week.
