

Weekly Energy and Fuels Markets Report

April 11, 2025

NYSERDA

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Brent average spot price increased while WTI decreased.
 - Propane (Mt. Belvieu) decreased while natural gas (Henry Hub) increased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Natural gas and propane inventories increased while ultra-low sulfur diesel (ULSD) and total gasoline decreased.
- Market influencers include:
 - Global factors such as continued conflicts in the Middle East, petroleum supply and demand concerns, OPEC+ planned increase in production, direct and indirect impact to energy markets and supply chains resulting from U.S. imposed tariffs and any subsequent tariff response from other countries, and associated geopolitical uncertainties.
 - Domestic factors such as lower heating demand due to the transition to spring and general economic conditions in the U.S. are influencing prices and inventories.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate leaning to likely below normal temperatures for the 6-10 day and leaning below for the 8-14 day period. The NOAA forecasts for precipitation indicate near normal to leaning above average for the 6-10 day and leaning above for the 8-14 day period. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation regular gasoline and diesel both increased.
 - Heating fuels (heating oil, propane, and kerosene) prices all decreased compared to the prior week.
