

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (Brent and WTI) and propane (Mt. Belvieu) average spot prices decreased while natural gas (Henry Hub) increased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Propane inventories decreased 27% compared to the prior week.
 - Natural gas and ultra-low sulfur diesel (ULSD) inventories slightly increased while total gasoline decreased.
- Market influencers include:
 - Global factors such as the Russian-Ukraine war, Middle East conflict, OPEC+ planned increase in production, market volatility associated with U.S. tariff policy, and associated geopolitical uncertainties.
 - Domestic factors associated with seasonal summer temperatures and U.S. economic policy.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate likely to leaning below normal temperatures for the 6-10 and 8-14 day periods. The NOAA forecasts for precipitation indicate leaning below, near normal, and leaning above for the 6-10 day and leaning below to near normal for the 8-14 day period. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY Transportation fuels retail prices were generally comparable with the prior week, with only +/- 1% change.
 - Propane prices decreased while heating oil and kerosene remained similar since the prior survey, with only +/- 1% change.
