

Overall Energy & Fuels Markets Summary

- Market influencers include:
 - Global factors such as the Russian-Ukraine war, U.S./Venezuela conflict, Iran civil unrest, world petroleum inventories, U.S. trade policies, and associated geopolitical uncertainties.
 - Domestic factors associated with heating season developments and U.S. economic policy.
- Summary of spot prices for the following market benchmarks (see page 2).
 - Brent crude spot prices generally increased, moving above the \$65 per barrel threshold. WTI remained relatively consistent, staying below the \$60 per barrel mark.
 - Natural gas (Henry Hub) spot prices generally decreased, dropping below the \$3 per mmbtu threshold. Propane (Mt. Belvieu) spot prices remained relatively consistent.
- Regional fuels inventories (see pages 2 through 4) compared to the previous week:
 - Natural gas, propane, and ultra-low sulfur diesel (ULSD) decreased while total gasoline increased compared to the prior week.
- NY retail prices (see pages 5 and 6) for heating and transportation fuels:
 - NY Transportation fuels retail prices were comparable with the prior week, with only +/- 1% change.
 - Propane prices increased, heating oil decreased, and kerosene remained relatively unchanged since the prior survey.
- NY weather forecast and seasonal conditions summary (see pages 7 and 8):
 - The National Oceanic and Atmospheric Administration (NOAA) forecasts indicate likely below normal temperatures for the 6-10 day and leaning below to likely below for the 8-14 day period.
 - The NOAA forecasts for precipitation indicate leaning above for the 6-10 and 8-14 day periods.
