

# TWO SIMPLE STEPS TO FIND THE MOST ENERGY EFFICIENT APPLIANCES

1.

## Look for the ENERGY STAR® logo

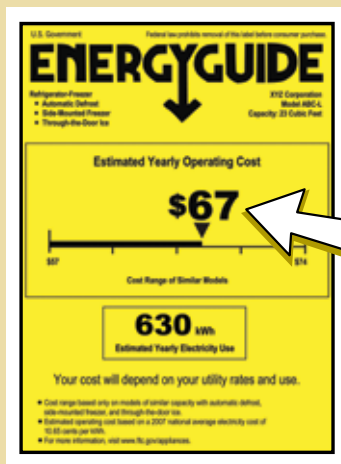

The ENERGY STAR logo is a sure sign of a high performance appliance.

ENERGY STAR certified appliances meet rigorous government standards for energy efficiency, and are in the top 25% of energy efficient models.

2.

## Compare operating costs with the EnergyGuide label

Most ENERGY STAR products have an EnergyGuide label, which helps you compare the operating costs of appliances.

This number tells you how much it costs to operate the appliance for a year based on its energy use (on average). The lower the number, the more energy efficient the product is.
