

BUILDING OWNER ATTESTATION FORM

Affordable Multifamily Program Upstate

To qualify to receive additional incentives for the extreme heat climate hazard, all of the following requirements must be met:

1. The project is installing the electrification or deep retrofit package through AMP Up applicable to the building(s) listed below.
2. Every building in the project must have an existing heating type that is either electric resistance or delivered fuels (oil, propane, kerosene).
3. The project contains Heat Vulnerable Populations as defined below.

Projects should refer to the Eligible Measures List on the AMP Up Program Page for the full list and eligibility requirements for Resilience Enhancements.

Heat-Vulnerable Populations: A project is considered to contain Heat-Vulnerable Populations if there is at least one Heat-Vulnerable Resident in 50% or more of its units. In the AMP Up program, a Heat-Vulnerable Resident is defined as a resident meeting one or more of the following conditions: resident is above the age of 60, below the age of 6, and/or is permanently disabled.

BUILDING OWNER ATTESTATION

By signing this document, I attest that my building(s) contains Heat-Vulnerable Populations. I understand that NYSERDA may request additional supportive information related to this attestation (supportive documentation may include one or more of the following: NYS Home Energy Assistance Program [HEAP] enrollment, identification that includes birth date, documentation of medical condition exacerbated by extreme heat, or other written statement of eligibility). I understand the incentive level is subject to NYSERDA review and approval.
