

The CPF25 family of charging stations is designed for select fleet and multi-unit dwelling applications. For fleets, CPF25 stations are ideally suited for depot charging. For multi-unit dwellings, CPF25 stations are ideal for personal charging in assigned parking spots. The CPF25 offers one or two standard J1772 Level 2 charging ports, each supplying up to 7.7 kW (208/240VAC @32A). Bollard and wall mount configurations are available for easy installation anywhere. The CPF25 is the first ENERGY STAR® certified EV charger and also has intelligent energy management capabilities that can lower both installation and energy costs.

Basic Equipment Details

Type of Mount	Pedestal or wall-mount available
Number of Ports	Dual
Intended Installation Setting	<ul style="list-style-type: none"> • Workplace • Multi-Unit Dwelling
Networking Capability	Networked
Indicate whether the equipment uses an open standard protocol as a basic framework for purposes of network interoperability and for communication with the network services provider, and specify the protocol (such as OCPP)	Yes, OCPP version 1.6
