

Greenspot is a smart mobility solutions company. Our company marries EVSE and car sharing to provide alternatives to car ownership as well as EV adoption. The Greenspot network provides parking spots for car sharing and for the public to use for their personal EVs. Our network works with all EVSE manufacturers that are OCPP compliant. Greenspot’s mobility solutions also provide for last mile, municipal fleet, and vanpool solutions, thereby increasing utilization of the shared EVs and decreasing traffic, congestion, and parking requirements. Greenspot desires to implement a percentage of our network in environmental justice communities.

Basic Network Details

| | |
|---|---|
| Intended Installation Setting | <ul style="list-style-type: none"> • Public • Workplace • Multi-unit dwelling (MUD) |
| Compatible charging equipment suppliers | <ul style="list-style-type: none"> • BTCPower • EVBox • SemaConnect |
| Network Connection Type | <ul style="list-style-type: none"> • Cellular - CDMA • Cellular - GSM • WiFi • Lan/Hard-wired Internet |
| Network services offered | <ul style="list-style-type: none"> • Control of charge rates (kW) • Equipment status monitoring • Payment processing and rate setting (\$) • Driver reservations • Equipment usage reports |
| Forms of payment accepted | <ul style="list-style-type: none"> • Credit card • Network RFID tag • Mobile phone app |
