

SKY is a web-based EVSE management solution built on open standards (OCPP Protocol). It allows site hosts to manage their charge stations from the web browser of any computer. SKY enables convenient and innovative features such as real-time EVSE status, charging data logging, and the ability to charge users a fee for charging their vehicles.

Basic Network Details

Intended Installation Setting	<ul style="list-style-type: none"> • Public • Workplace • Multi-unit dwelling (MUD)
Compatible charging equipment suppliers	<ul style="list-style-type: none"> • EV-Box • BTC Power • PowerCharge
Network Connection Type	<ul style="list-style-type: none"> • Cellular - CDMA • Cellular - GSM • Wifi • LAN/hard-wired Internet
Network services offered	<ul style="list-style-type: none"> • Control of charge rates (kW) • Equipment status monitoring • Payment processing and rate setting (\$) • Equipment usage reports
Forms of payment accepted	<ul style="list-style-type: none"> • Credit card • Network RFID tag • Mobile phone app • 24/7/365 Call Center to initiate a charge
Does the charging network provide an OpenADR 2.0 Virtual End Node (VEN) for utility demand response integration?	Yes
Does the charging network allow equipment owners to set pricing for their stations?	Yes
Does the charging network provide data to equipment owners on station electricity dispensed and number of charging events?	Yes
Can the charging network provide access to charging station data to NYSERDA directly, with the equipment owner/network customer’s permission?	Yes
