

The HCS-40N/HCS-50N Level 2 EV chargers are ClipperCreek HCS-40/HCS-50 chargers with the addition of components that measure the energy and connect the charger to the OpConnect EV Charging management software platform so that the chargers can provide data collection, access control and accept payments through the OpConnect mobile application. The charger is available with a cellular modem, or in a Bluetooth version, which communicates with the drivers mobile device to access charging and process payments if necessary.

Basic Equipment Details

Type of Mount	Both pedestal or wall-mounted available
