Xeal's charging management platform (CMP) is the first back office designed specifically to maximize ROI for owners of residential multi-unit dwellings and workplaces. Drivers reserve scheduled charging sessions that have the lowest possible kWh cost. The platform's scheduling engine maximizes charging sessions per day for each charger, reducing the need for expensive electrical system upgrades. CMP automatically collects charging session fees and keeps track of any service issues. Best of all, the platform operates with almost no effort from on-site staff. Earn positive ROI with your very first charger.

Basic Network Details

Intended Installation Setting	• Workplace • Multi-unit dwelling (MUD)
Compatible charging equipment suppliers	• EVoCharge • ClipperCreek
Network Connection Type	• Cellular - CDMA • Cellular - GSM • Wifi
Network services offered	• Control of charge rates (kW) • Equipment status monitoring • Payment processing and rate setting ($) • Driver reservations • Equipment usage reports
Forms of payment accepted	• Credit card • Network RFID tag • Mobile phone app
Does the charging network provide an OpenADR 2.0 Virtual End Node (VEN) for utility demand response integration?	Yes
Does the charging network allow equipment owners to set pricing for their stations?	Yes
Does the charging network provide data to equipment owners on station electricity dispensed and number of charging events?	Yes
Can the charging network provide access to charging station data to NYSERDA directly, with the equipment owner/network customer's permission?	Yes
