

PowerFlex is a hardware and software solution provider focused on the optimization of large-quantity EVSE deployments. PowerFlex has deployed their patented system at CalTech, JPL, DHL and many other high-profile, high-utilization customer sites. Their NEC-compliant Automatic Load Management System (ALMS) is the most proven solution on the market to enable the maximum utilization of EV charging stations and results in significant cost savings for their customers.

Basic Network Details

Intended Installation Setting	<ul style="list-style-type: none"> • Public • Workplace • Multi-unit dwelling (MUD)
Compatible charging equipment suppliers	Clipper Creek
Network Connection Type	<ul style="list-style-type: none"> • Cellular - CDMA • Cellular - GSM • Lan/Hard Wired Internet • Zigbee
Network services offered	<ul style="list-style-type: none"> • Control of charge rates (kw) • Equipment status monitoring • Payment processing and rate setting (\$) • Equipment usage reports
Forms of payment accepted	<ul style="list-style-type: none"> • Credit card • Mobile phone app • Kiosk
Does the charging network provide an OpenADR 2.0 Virtual End Node (VEN) for utility demand response integration?	Yes
Does the charging network allow equipment owners to set pricing for their stations?	Yes
Does the charging network provide data to equipment owners on station electricity dispensed and number of charging events?	Yes
Can the charging network provide access to charging station data to NYSERDA directly, with the equipment owner/network customer’s permission?	Yes
