## RFP 4737 Teaming Facilitation List

The entities listed below have indicated an interest in a potential teaming arrangement for NYSERDA's Integrated Energy Data Resource (IEDR) Program Manager RFP. The objective of this RFP is to select the IEDR Program Manager responsible for organizing and administering IEDR implementation to accomplish the policy goals and program outcomes described in the Commission Order. Proposers may be a single company or a team of companies but must, in their response, clearly identify the key employees, subcontractors, or relevant affiliates of all entities who are proposed to fulfill the requirements of this RFP, and their roles. For more information, please visit the IEDR webpage - <a href="https://www.nyserda.ny.gov/All-Programs/Programs/Clean-Energy-Standard/Important-Orders-Reports-and-Filings/Integrated-Energy-Data-Resource">https://www.nyserda.ny.gov/All-Programs/Programs/Clean-Energy-Standard/Important-Orders-Reports-and-Filings/Integrated-Energy-Data-Resource</a>

Brezler,	David	David.brezler@gmail.com	917-	Please feel free to reach out regarding teaming for this RFP. Brezler, LLC is comfortable filling the following
LLC	Brezler		805-	roles:
			9245	Program Management
				Project Management
				Data Analytics
				Data Visualization
				Procurement Support
				Staff Augmentation

Climate Action	Jim Yienger	mr_jjy@climatetools.com	518- 560-	Climate Action Associates (CAA) is open to negotiating an exclusive subcontractor arrangement with a qualified IEDR Prime.
Associates	riengei		9830	qualified IEDIX Fillifie.
resociates				CAA is a Capital Region niche technology and climate change consultancy that works with clients to produce quality open data. Our mission is to support New York's Community Leadership and Climate Protection Act (CLCPA). CAA proposed, developed, and continues to support NYSERDA's Utility Energy Registry (Case 17-M-0315), a national geospatial data protocol for utilities to support local climate action planning and Community Choice Aggregation market studies. Utilities implement the UER protocol and publish data to the platform with admin APIs every six months. The UER protocol incorporates a relational model to the US Census to ensure data integrates seamlessly with existing demographic data. CAA organized the UER as a voluntary pilot with utilities, and later supported NYSERDA and Commission staff through its rule making and adoption.  CAA also developed the 2015 New York Regional and Community GHG Inventory Guidance (https://climatesmart.ny.gov/fileadmin/csc/documents/GHG_Inventories/ghgguide.pdf) by coordinating a nine-month interagency working group of NYSDOT, NYSDOS, NYSDEC, and NYSERDA staff supporting the Regional Sustainability Plan initiative. This New York-specific protocol describes sourcing over 30 relational data sets held by state and regional agencies that can be used to automate granular GHG emissions tracking. The UER was an outcome of that process.
				CAA is obsessed with energy data and process efficiency, and its UER White Paper calls out the potential for systems like IEDR to improve data flowing to the UER. In this contract CAA proposes to support developing IEDR so that it can integrate with, and ultimately improve and serve data to the UER. CAA also proposes to facilitate and support IEDR's public policy, planning, and land use sector committees to help stakeholders develop at least 10-20 IEDR public-interest use cases. It is CAA's ultimate goal- working through UER, IDER, regional GHG protocols, or through other related initiatives- to fully automate GHG inventory tracking in New York as a public benefit.
