

## Attachment B. Public Release of Bid Facility Information

Bid Facility Name:	Cody Road Wind Farm
Proposer:	Green Power Energy, LLC
Technology:	Wind
Proposed Nameplate Capacity (Megawatts):	12.6
Location (Town/City and County):	Fenner/Madison
NYISO Interconnection Queue Number (if applicable):	Queue# 1156
Interconnecting Utility:	National Grid/Niagara Mohawk
NYS PSC Article 10/ORES Case Number (if applicable):	N/A
Located in Agricultural District?	No
Bid Facility Website (if applicable):	<a href="https://www.greenpowerenergyny.com">https://www.greenpowerenergyny.com</a>

General Description of Project (250 words or more):
---

Green Power Energy, LLC is proposing to construct the Cody Road Wind Farm which will be located at 3649 Cody Road in Fenner, New York. The Project will consist of 3 Enercon E-115-EP3-E3 4.2MW wind turbines. These turbines will be on 67 meter tall towers with a total tip height of 115.7 meters high. They will be connected via a buried feeder line that runs from the northern most turbine south along the service road to a collector station which in turn will connect to a substation. The three (3) turbines, feeder line, collector station and substation will all be located on the same parcel of land. The substation will be a 3 breaker ring bus design and connect to National Grid's Shippey Road - Fenner 115 kVa line #3. The Cody Road Wind Farm will operate at approximately 28% of capacity over its lifetime. The project went through extensive public outreach efforts and worked closely with the Town of Fenner's Board and Planning Board to insure that all residents were aware of the project and how they would be affected. It has already obtained the required Special Use permit to construct the facility and has out in the access road and cleared the turbine locations. It is in the NYISO interconnection process under Queue # 1156 and expects to be on-line in July of 2027. Anyone who has any questions is encouraged to call David Senehi of Green Power Energy, LLC at 315-655-9095.
