| Bid Facility Name:                                   | Cody Road Wind Farm   |
| Proposer:  | Green Power Energy, LLC   |
| Technology:  | Wind  |
| Proposed Nameplate Capacity (Megawatts):             | 12.6 MWs  |
| Location (Town/City and County):                     | Fenner, NY in Madison County  |
| NYISO Interconnection Queue Number (if applicable):  | Queue #1156   |
| Interconnecting Utility:                             | National Grid   |
| NYS PSC Article 10/ORES Case Number (if applicable): | CASE 15-T-0384  |
| Located in Agricultural District?                    | Yes   |
| Bid Facility Website (if applicable):                | <a href="https://www.greenpowerenergyny.com/">https://www.greenpowerenergyny.com/</a> |

General Description of Project (250 words or more):

**The Cody Road Wind Farm will be located at 3649 Cody Road in Fenner, New York. It will consist of 3 Enercon E-115-EP3-E3-4.2MW wind turbines on 67 meter tall towers. They will be connected via a buried feeder line that runs from the northern most turbine south along the service road to the substation located on the property. This substation will be a 3 breaker ring bus design and connect to National Grid's Shippey Road - Fenner 115 kVa line #3. It will operate at approximately 28% capacity over its lifetime.**
