

Attachment B. Public Release of Bid Facility Information

Bid Facility Name:	
Proposer:	
Technology:	
Proposed Nameplate Capacity (Megawatts):	
Location (Town/City and County):	
NYISO Interconnection Queue Number (if applicable):	
Interconnecting Utility:	
NYS PSC Article 10/ORES Case Number (if applicable):	
Located in Agricultural District?	
Bid Facility Website (if applicable):	

General Description of Project (250 words or more):

Garnet Energy Center (Garnet) is owned 100% by Garnet Energy Center, LLC, an indirect, wholly owned subsidiary of NextEra Energy Resources, LLC. Garnet Energy Center will be a solar photovoltaic facility with a maximum generating capability of 200 megawatts (MW) on land leased on private property, mainly classified as agricultural and has been used as such in the past. The project was granted a Certificate of Environmental Compatibility and Public Need pursuant to Article 10 of the Public Service Law on October 28, 2022.

The Garnet Energy Center will be located in the Town of Conquest, Cayuga County, New York. The interconnection site will utilize the existing transmission lines that traverse the parcels which Garnet has under control. The Town regulates development through its Dwelling and Structure Law (Local Law 2 of the Year 2000, last amended in 2018). The project will comply with the substantive requirements of the Dwelling and Structure law as documented in Garnet’s Article 10 Certificate. Garnet will also comply with the numerous conditions included in the project’s Article 10 Certificate that govern construction and operation of the facility.

Existing land uses within and surrounding the project site consist predominantly of agricultural fields with scattered patches of trees. There are very few residential uses within the immediate vicinity of the project site. A review of historical aerial mapping indicates that there have been no changes to these land uses in the recent past.
