NYSERDA RES Evaluation Team

RE: Tier 1 Bid for Dolgeville Hydro, GEN36499, Application 244-01

To Whom It May Concern;

The above-referenced facility is complete and operational, having re-entered Commercial Operation in November 2020 following a 4.5 year reconstruction and refurbishment. Dolgeville Hydro has qualified as a “Return to Service” resource and been granted Eligibility to bid into the 2024 Tier 1 RFP. The facility has no capital needs related to its fulfillment of a Tier 1 contract.

It is the understanding of EONY that the facility is not required to address questions or upload documents related to Project Viability, Project Development, Financing and Creditworthiness, Carbon Emissions and Embodied Carbon, Climate Resiliency, Community Engagement, or Incremental Economic Benefits.

This letter has been uploaded into a “Required Document” field related to one of the above categories, in order to complete the online RESRFP24-1 Application.

As we have progressed with the Application, it has not always been clear which questions and documents were applicable and which were not. We have supplied some data where it seemed relevant. If you feel there is information missing or incorrect, or that a required document has been omitted, please inform us immediately and we will make every effort to address the error.

Thank you,
