

RESIDENTIAL AND SMALL COMMERCIAL Customer Benefit Contribution

Residential and small commercial customers who interconnect solar PV at their site on or after January 1, 2022 will be subject to a new Customer Benefit Contribution (CBC) billing item. The CBC is calculated based on a project's DC system size and will not apply to customers who interconnected solar PV systems before January 1, 2022, to front-of-the-meter projects such as community solar, or commercial accounts with a demand charge on their electric bill. The final 2022 CBC rates for each utility can be found in the following tables.¹

UTILITY-CALCULATED 2022 CBC RATES FOR NET METERED PV PROJECTS²
