

Excerpt from NYSERDA Standard Performance Agreement

ARTICLE 7: RPS ATTRIBUTES

§7.1. Orders issued by the Public Service Commission provide that the RPS Program will support and promote an increase, to 30%, of the percentage of the energy consumed in New York State that comes from renewable sources. When assessing and reporting on progress towards that goal, or on the composition of the energy generated and/or consumed in NYS, NYSERDA and the NYS Department of Public Service will include all electrical energy created by any project receiving funds through the NYS RPS Customer-Sited Tier Program, regardless of the percentage of the project capacity included on the Bid Application Form, for the life of such projects, and the environmental attributes associated with such energy, whether metered or projected, as a part of any report, evaluation, or review of the RPS Program, whenever any such report, evaluation, or review may be conducted or issued, as renewable energy consumed in NYS. No party, including but not limited to owners, lessees/lessors, operators, and/or associated contractors shall agree to or enter any transaction that would or may be intended to result in the exportation or transmittal of any electrical energy created by any project receiving funds through the NYS RPS Customer-Sited Tier Program to any party or system outside of New York State."
