The initial term of this Agreement shall expire thirty years from the Date of Full Support Payment as defined in Section 13. If (i) the Transmission Facilities are in commercial operation and (ii) there are continuing commitments by Participants to support the full costs of the Transmission Facilities, a Participant at that time shall be entitled not less than two years prior to the expiration of the initial term to elect to continue participation for an additional period not to exceed 20 years upon the terms and conditions of this Agreement. Such additional period is to be determined by the Advisory Committee no later than two years and three months prior to the end of the initial term. The Advisory Committee in determining this additional period shall take into account the then remaining term of the Phase I Support Agreements.

If all regulatory approvals authorizing New England Hydro to charge the Participants in accordance with the Support Charge described in Section 12 hereof are not received by June 1, 1986, New England Hydro may thereafter elect to terminate this Agreement by notice in writing to the signatories.

#### Section 4. Participating Shares

A. Allocation. Each Participant shall have and be charged with a percentage interest in all of the rights and obligations hereunder determined in accordance with this Section 4 (which interest is herein referred to as its "Participating Share").

The Participating Share of each Participant shall be computed both initially and as changed from time to time in accordance with the terms hereof, by New England Hydro as hereinafter provided. Such computations shall be made as of the first day of any month in which there is a change in the number of Participants or any change in the interest of any Participant as herein provided. The initial computation of Participating Shares shall be made on the basis that each signatory to this Agreement as shown in Attachment A is a Participant. After such initial computation and before the Effective Date, each Participant shall be entitled to transfer any or all of its Participating Share to one or more other Participants. On or before September 1, 1988, any Participant listed in Attachment A who has transferred, or intends to transfer, any or all of its Participating Share to one or more other Participants listed in Attachment A must provide documentation to New England Hydro covering the transfer. The initial computation is to be recomputed on and as of the

Effective Date on the basis that each signatory to this Agreement which has provided timely documentation of its participation or transfer is a Participant. Any such transfers of Participating Shares will be taken into account after such recomputation. Any such transfer of Participating Shares hereunder shall have no effect on the interests, rights, or obligations of participants in Phase I. Subsequent computations are to be made thereafter as of the first day of each month in which an interest is modified or terminated pursuant to any provision hereof. All computations shall be final unless there is a manifest error.

B. The Participating Shares on and as of the initial computation will be calculated as follows:

(i) up to 5% to VELCO, if then a Participant;

(ii) up to 5% to Participants that serve “kilowatthour loads” in New Hampshire (New Hampshire Participants), if then Participants, (Apportioned on the basis of their relative “kilowatthour loads” in New Hampshire); and

(iii) the balance (after deducting the percentages, if any, under paragraphs B(1) and B(2) above, respectively) apportioned among all Participants, including VELCO (if then a Participant) and the New Hampshire Participants (if then Participants) on the basis of an initial share allocation determined by the subscription process as described in Attachment E.

C. The term “kilowatthour load,” as used herein, shall mean the sum of a Participant’s 1980 kilowatthour sales as shown on Attachment A hereto.

D. The precise percentages under B(1) and B(2) shall be specified by VELCO and the New Hampshire Participants, on or before the date of signing this Agreement.

#### Section 5. Relationship among Participants

The rights and obligations of the Participants hereunder are several, in accordance with their respective Participating Shares, and not joint. The rights and obligations of New England Hydro hereunder are also several and not joint with those of the Participants, the Equity Sponsors, or any one thereof. There is no intention to create by this Agreement, or by any grant, lease, license, or activity related hereto, an association, joint venture, trust, or partnership or to impose on New England Hydro or any Participant trust or partnership rights or obligations; and any such implied intention is expressly negated. Except as expressly provided in this Agreement, no Participant shall have by virtue of this Agreement or of any such grant, lease, license, or activity the right or power to bind any other Participant without its express written consent.

#### Section 6. Project Control and Advisory Committee

Each Participant may designate in writing, initially on or before June 1, 1986, and from time to time thereafter, a representative and an alternate representative to serve on the Advisory Committee. If a representative is unable to attend, an alternate may attend in his or her place. The Advisory Committee shall have the power and responsibilities set forth in this Agreement and shall adopt its own by-laws, provided that (i) voting shall be by Participating Shares at the time of the vote, (ii) a vote of two-thirds or more of Participating Shares is required to accept a New England Hydro proposal or to take other affirmative action and a vote of more than one-third is

required to reject a New England Hydro proposal, and (iii) one or more Participants having Participating Shares of at least 10% in the aggregate may by reasonable written notice to all Participants call a meeting of the Advisory Committee. The Advisory Committee will advise New England Hydro on all major matters of concern to the Participants regarding the Transmission Facilities and Phase II.

New England Hydro shall make prompt proposals for decisions on the following, and the Advisory Committee shall accept or reject these proposals for decisions on the following:

- (i) Commencement of construction of the Transmission Facilities;
- (ii) The original design concept for the Transmission Facilities;
- (iii) Overall project budget estimate for design, engineering and construction of the Transmission Facilities;
- (iv) Major changes to the original design concept of the Transmission Facilities that, based on reasonable engineering estimates, will increase or decrease the cost by more than 10% of the overall budget approved in (iii) above or might have a significant detrimental effect on reliability or availability; any changes whether changes to the original design concept or otherwise that will result in an increase in the cost to more than 100% above the initial overall project budget approved in (iii), which will require an affirmative vote of at least 80% to accept the changes, or an affirmative vote of a percentage less than 80% in the event that only one Participant (subsidiaries of Northeast Utilities shall be treated as a single Participant for this sole purpose) having more than 20% casts a negative vote;
- (v) General terms of major contracts in excess of \$25 million;
- (vi) Capital additions to the Transmission Facilities in excess of \$5 million;
- (vii) Major changes in operation and maintenance of the Transmission Facilities that will increase operation and maintenance costs by more than 10% of previous year's actual operation and maintenance costs or might have a significant detrimental effect on reliability or availability;
- (viii) Delay, restriction, suspension, termination or cancellation of planning or construction, or shut down of Transmission Facilities, for a period of six months or longer or permanently under Section 16;
- (ix) The term of any New England Hydro debt financing or any other financial arrangements (other than any construction financing) with a principal amount in excess of \$25 million, provided that such term must be between 5 and 30 years; the Advisory Committee may reject the proposed term only if it is less than 10 years and is unreasonable or impracticable; New England Hydro shall consult with the Advisory Committee on the other principal terms of such financings and any construction financing and shall use reasonable efforts to accommodate their reasonable requests;
- (x) The target date for commercial operation of the Transmission Facilities for purposes of Section 13B which shall be determined at least 90 days before the Effective Date; and

(xi) Such other matters as are specified elsewhere in this Agreement.

If New England Hydro makes a proposal for a decision from the Advisory Committee and the Advisory Committee fails, however, to accept or reject such proposal within thirty days, the Advisory Committee shall be deemed by New England Hydro to have approved New England Hydro's proposal and New England Hydro may immediately proceed to implement its proposal.

Each Participant shall be responsible for all of its expenses related to membership on the Advisory Committee.

This Section shall be effective on June 1, 1986, notwithstanding that the Effective Date has not yet occurred.

#### Section 7. Design and Construction of the Transmission Facilities

Except for those areas of responsibility assigned to the Advisory Committee as specified in Section 6, New England Hydro shall be responsible for the design, engineering, procurement, installation, and all other aspects of the construction of the Transmission Facilities, and any modifications or additions made to the Transmission Facilities at any time before or after completion of the Transmission Facilities, all in accordance with good utility practice for the benefit of all Participants, the objective being to achieve an appropriate balance among minimization of construction cost, minimization of operation and maintenance cost, licensing and environmental considerations, and safety and reliability of service. In carrying out these activities, New England Hydro may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, design engineering firm, a construction engineering firm, consultants, and such other firms as it considers desirable. To the extent services are performed by an affiliate of New England Hydro, such affiliate will charge on the same basis that it would charge its costs to other affiliates pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) under the Public Utility Holding Company Act of 1935 (the 1935 Act).

In order for the Advisory Committee to meet its responsibilities as specified in Section 6, New England Hydro will provide all necessary information reasonably requested by the Advisory Committee. During the course of the work, New England Hydro shall furnish quarterly reports to all Participants with respect to the progress of the work and an annual report to all Participants of actual and estimated construction expenditures for the Transmission Facilities.

New England Hydro intends, consistent with good utility practice, to construct the Transmission Facilities on a schedule that permits the commercial operation of Phase II by September 1, 1990. However, New England Hydro does not represent that construction will be completed by such date or any other date.

#### Section 8. Operation and Maintenance of the Transmission Facilities

Except for those areas of responsibility assigned to the Advisory Committee as specified in Section 6, New England Hydro shall be responsible for the operation and maintenance of the Transmission Facilities in accordance with good utility practice for the benefit of all Participants, the objective being to operate the Transmission Facilities as efficiently, economically, safely, and reliably as feasible. New England Hydro shall use its best efforts to coordinate the operation and maintenance of the Transmission Facilities with the operation and maintenance of the Phase I facilities and other Phase II facilities. In carrying out these activities, New England Hydro

may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, consultants, and such other firms as it considers desirable. In furtherance of its responsibility, New England Hydro may from time to time designate a company, which need not be a Participant, to operate and maintain the Transmission Facilities. To the extent services are performed by an affiliate of New England Hydro, such affiliate will charge its costs on the same basis that it would charge to other affiliates pursuant to the rules and regulations of the SEC under the 1935 Act.

In order for the Advisory Committee to meet its responsibilities as specified in Section 6, New England Hydro will provide all necessary information reasonably requested by the Advisory Committee.

After the Transmission Facilities are placed in commercial operation, New England Hydro shall furnish quarterly reports to all Participants with respect to the operation and maintenance of the Transmission Facilities and an annual report to all Participants of estimated operation and maintenance expenses.

#### Section 9. New England Hydro Relationship to Participants

In carrying out its responsibilities hereunder, New England Hydro agrees that it shall use its best efforts to act for the collective benefit of all Participants and New England Hydro, to include in its contracts with independent contractors the customary provisions for assuring professional and workmanlike performance, including warranties, insurance coverage and other protections consistent with good utility practice, and to enforce its rights under such contracts against the other contracting parties to the extent reasonable, reserving the discretion to settle claims on a reasonable basis. All costs of construction, including damages caused by the risks of negligence (other than gross negligence) and other risks of construction in excess of the recoveries obtained from offending parties or insurers, shall be included as part of investment in the Transmission Facilities (as defined in Section 12 below) and all costs of operating the Transmission Facilities, including damages caused by risks of negligence (other than gross negligence) or other risks of operation in excess of any recoveries obtained from offending parties or insurers, shall be included in New England Hydro's operating costs (as defined in Section 12 below).

#### Section 10. Payment for Preliminary Costs

New England Hydro agrees to pay those New England utilities that initially paid for costs related to the Transmission Facilities incurred under the Preliminary Quebec Interconnection Support Agreement - Phase II (the Preliminary Agreement) that are determined by New England Hydro to be capitalizable costs of the Transmission Facilities, in accordance with the Uniform System (as defined hereinafter in Section 12). It is understood that it is the intention of New England Hydro and the Participants for all costs related to and allocated to the Transmission Facilities incurred under the Preliminary Agreement, to be capitalized to the extent permitted in accordance with good utility practice. Within ninety days after the Effective Date, New England Hydro agrees to make the repayment with interest calculated from the original date of payment using the monthly average rate on one month commercial paper as published in the Federal Reserve Bulletin for each month during such time period.

## Section 11. Transmission and Other Services

In accordance with good utility practice, New England Hydro will make the Transmission Facilities available for the Participants for transmission services as part of Phase II. New England Hydro hereby grants to each Participant an exclusive right to use its Participating Share of the Transmission Facilities in accordance with the Use Agreement.

New England Hydro agrees that it will serve as an agent or in other similar capacity for any Participant that so requests for the buying or selling of power to be transmitted over the Transmission Facilities as an entitlement transaction with Hydro-Quebec pursuant to the terms of the Use Agreement or otherwise, provided, however, that a formal written contract with terms and conditions, including compensation for services, satisfactory to New England Hydro is executed and delivered prior to performance of such services.

## Section 12. Support Charge

Commencing in the month of the Date of Full Support Payment (as defined in Section 13) and in each month thereafter, each Participant shall pay in accordance with Section 13 its Participating Share of a monthly Support Charge in an amount determined in accordance with this Section 12, plus a credit enhancement charge calculated in accordance with Attachment F. The Support Charge shall be equal to New England Hydro's total cost of service related to the Transmission Facilities for such month.

The "total cost of service related to the Transmission Facilities" for any month commencing with the month in which the Date of Full Support Payment occurs shall be the sum of (a) New England Hydro's operating expenses for such month with respect to the Transmission Facilities, plus (b) an amount equal to one-twelfth of the composite percentage for such month times the average net rate base for the Transmission Facilities, less (c) investment earnings of the Debt Service Fund, as defined in Section 18, realized by New England Hydro, less (d) any other income received by New England Hydro resulting from costs or rate base supported by the Participants other than income received pursuant to (a), (b), or (c) above or Credit Enhancement Charges and other income allocated to Equity Sponsors elsewhere under this Agreement. If a Support Charge payment under Section 13 is to be calculated from a date other than the first day of a month, an appropriate proration of the amount determined in (b) above shall be made for such payment only.

"Uniform System" shall mean the appropriate Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC) for Public Utilities and Licensees, as from time to time in effect.

New England Hydro's "operating expenses" shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto, in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that unless the FERC, upon application by New England Hydro, authorizes a shorter depreciation and/or amortization period, for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the

purpose of calculating such depreciation and/or amortization, will not exceed the amount of cost of removal) over the greater of: (i) ten years from the Date of Full Support Payment or (ii) the term of New England Hydro's permanent debt financings or other permanent financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value. In addition, each Participant will pay to New England Hydro, and New England Hydro will pay to New England Power Company, for the benefit of its customers, such Participant's Participating Share of a monthly charge of \$49,000 to compensate New England Power for the lost capacity on its Massachusetts right-of-way, provided however that no such charge shall be paid during such time as construction or operation is suspended on account of a defect in title for such rights-of-way. The allowance for state and Federal income taxes included in operating expenses shall reflect the normalization of timing differences and the flow through of permanent differences between book income and tax income. New England Hydro, as the tax owner of the Transmission Facilities, will be entitled to the benefits and subject to the burdens of such ownership for tax purposes. The allowance for state and Federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.

The "investment in the Transmission Facilities" shall be the aggregate amount incurred at any time either before or after commercial operation of the Transmission Facilities which relates to the Transmission Facilities and is properly chargeable to New England Hydro's utility plant accounts in accordance with the Uniform System. The investment in the Transmission Facilities shall also include operating expenses incurred prior to the month in which the Date of Full Support Payment occurs and an allowance for funds used during the period prior to the Date of Full Support Payment (AFDC) accrued on the investment in the Transmission Facilities. The AFDC rate shall be calculated pursuant to the last FERC approved AFDC formula including in construction work in progress all investment in the Transmission Facilities prior to the Date of Full Support Payment and using 14 percent as the return on equity for such calculation.

"Composite percentage" shall be computed as of the last day of each month (the "computation date"). "Composite percentage" as of a computation date shall be the sum of (i) Return on Equity then in effect multiplied by the percentage which equity investment as of such date is of the total capital as of such date; plus (ii) the average monthly effective interest rate per annum of each principal amount of indebtedness outstanding on such date for money borrowed, whether long term or short term, multiplied by the percentage which each such principal amount is of total capital as of such date. The effective interest rate shall take into account premiums, discounts, fees, and other costs that are related to the indebtedness.

"Return on Equity" shall be the return on equity on file with the FERC and in effect under The Federal Power Act.

"Equity investment" as of any date shall consist of the sum of (i) all amounts theretofore paid to New England Hydro for all

capital stock theretofore issued, plus all capital contributions, less the sum of any amounts paid by New England Hydro in the form of stock retirements, repurchases or redemptions or return of capital including liquidating dividends; plus (ii) any credit balance in the capital surplus account not included in (i) and any credit balance in the earned surplus (retained earnings) account on the books of New England Hydro as of such date.

“Total capital” as of any date shall be the equity investment plus the total of all indebtedness then outstanding for money borrowed.

From the Date of Full Support Payment until the first to occur of June 30 or December 31 thereafter, the “average net rate base” for the Transmission Facilities shall be the average of the net rate base determined as of the Date of Full Support Payment and the first to occur of June 30 or December 31 thereafter. Thereafter, for subsequent months of January through June, average net rate base shall be the average of the net rate base as of the preceding December 31 and the following June 30. For other months, average net rate base shall be the average of the net rate base as of the preceding June 30 and the following December 31. The “net rate base” shall consist of (i) the investment in the Transmission Facilities, less (ii) the amount of any accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities, less (or plus) (iii) the amount of any reserve for deferred income taxes received (or paid) by New England Hydro, such deferred income taxes to include deferred income taxes due to accelerated depreciation, construction tax benefits, and any other book/tax timing differences related to the Transmission Facilities, less (iv) the amount of any unamortized investment tax credits (ITC), plus (v) such allowances related to the Transmission Facilities for materials and supplies, prepaid items and cash working capital as may from time to time be determined by New England Hydro, as reasonably necessary and in accordance with accepted utility accounting practice, plus (vi) the amounts held in the Debt Service Fund, as described in Section 18. New England Hydro shall normalize ITC over the depreciation and/or amortization period relating to the Transmission Facilities. Any allowance for cash working capital shall be limited to that not sufficiently recovered through the use of estimated billing for the current month.

### Section 13. Payments

A. Commencing on or about the Date of Full Support Payment and for each month thereafter, New England Hydro will render to each Participant an invoice for its Participating Share of the Support Charge and the Credit Enhancement Charge, if any, for such month calculated on an estimated basis for the current month and subject to corrective adjustment in subsequent months. Unless New England Hydro is prevented by circumstances beyond its reasonable control, New England Hydro shall use its best efforts to render final bills within two years after the end of the calendar year in which the estimated bill was rendered. New England Hydro will also render to each Participant an invoice or notice for its Participating Share of any amounts due under this Agreement (other than monthly Support Charge and the Credit Enhancement Charge) including but not limited to payments to be made under Sections 15, 16, 17, and 20D.

Each Participant shall promptly pay to New England Hydro the amount shown on any invoice submitted under this Section. New England Hydro will date and mail monthly invoices for the Support Charge and Credit Enhancement Charge, if any, on or about the 25th day of the month for the coming month and this invoice shall be due and payable by the 15th day of the coming month and if not paid within that time period shall bear interest compounded monthly from the first day of the month in which payment is due to the date when payment is made at an annual rate equal to two percent (2%) over the current interest rate on prime commercial loans from time to time in effect (the Base Rate) at the principal office of The First National Bank of Boston.

Any invoice or notice for payments due under this Agreement (other than a monthly Support Charge and Credit Enhancement Charge invoice), that is not paid when due under this Agreement shall bear interest compounded monthly from the mailing date of the invoice to the date when payment is made at an annual rate equal to two percent (2%) over the Base Rate at the principal office of The First National Bank of Boston.

B. The "Date of Full Support Payment" shall be the later of (i) the target date for commercial operation of the Transmission Facilities as determined by the Advisory Committee, or (ii) the date on which the Transmission Facilities are ready for commercial operation, but in no event later than one year after the date specified in subpart (i) above unless an extension is agreed to in writing by all Lenders. However, if all of Phase II commences commercial operation prior to the target date specified in subpart (i) above, the "Date of Full Support Payment" shall be the date on which Phase II is in commercial operation.

#### Section 14. Character of Payment Obligations

The obligations of each Participant to make payments hereunder, and to perform and observe all other agreements on its part contained herein, are absolute and unconditional and shall not be affected by any circumstance, including, without limitation, (i) any insolvency, composition, bankruptcy, reorganization, arrangement, liquidation or similar proceedings relating to New England Hydro, the Participant, any other Participant, any Equity Sponsor, or any affiliate thereof, (ii) any failure of the Transmission Facilities to operate for any reason, including but not limited to the failure of Hydro-Quebec to sell electric power to the Participants, (iii) any damage to or destruction of the Transmission Facilities, including but not limited to any defect in the title, quality, condition, design, operation, or fitness for use of, or any loss of use of, all or any part of the Transmission Facilities, (iv) any interruption or prohibition of the use or possession by New England Hydro of, or any ouster or dispossession by paramount title or otherwise of New England Hydro from, all or any part of the Transmission Facilities, or any interference with such use or possession by any governmental agency or authority or other person or otherwise, (v) any inability to use the Transmission Facilities because a necessary license or other necessary public authorization cannot be obtained or is revoked, or because the utilization of such a license or authorization is made subject to specified conditions which are not met, (vi) any invalidity or unenforceability or disaffirmance by New England Hydro or any Participant of any provision of this Agreement or any failure, omission, delay, or inability of New England Hydro to perform any of its obligations contained herein, (vii) any amendment, extension, or other change of, or any assignment or encumbrance of any

rights or obligations under, this Agreement, or any waiver or other action or inaction, or any exercise or nonexercise of any right or remedy, under or in respect to this Agreement, (viii) any inability of the Participant or any other Participant to obtain regulatory approvals for financing its Participating Share of any obligations under this Agreement or for meeting any other obligations under this Agreement, or (ix) any inability to start, complete, or use the Transmission Facilities due to any other circumstance, happening, or event whatsoever, whether foreseeable or unforeseeable and whether similar or dissimilar to the foregoing, it being the intention of the parties hereto that all amounts payable by each Participant in respect of this Agreement shall begin to be payable and shall continue to be payable in all events in the manner and at the time herein provided; provided, however, that nothing in this Section 14 shall (a) prevent a Participant from transferring its interests and obligations hereunder to another Participant prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Participant with respect to this Agreement incurred or relating to the period of time after said transferring Participant's Participating Share has been reduced to zero. In that connection, each Participant hereby waives, to the extent permitted by applicable law, any and all rights which it may now have or which may at any time hereafter be conferred upon it (other than those expressly conferred in this Agreement), by statute or otherwise, to terminate, cancel, or surrender any of its obligations under this Agreement, and agrees that if, for any reason whatsoever, this Agreement shall be terminated in whole or in part by operation of law or otherwise, each Participant will nonetheless promptly pay to New England Hydro amounts as required by Section 16 of this Agreement.

Notwithstanding the character of the above payment obligations, when the net proceeds from a total taking of the Transmission Facilities in an eminent domain proceeding or from insurance in the event of complete destruction of the Transmission Facilities have been received by New England Hydro in an amount equal to or greater than the amounts then due hereunder from the Participants, then no payment shall be required.

#### Section 15. Default

A. If any of the following events (Events of Default) shall occur and be continuing:

(i) a Participant shall fail to pay when due any amount which it has agreed to pay under any provision of this Agreement, and such failure shall continue for more than 10 days after written notice thereof has been given to such Participant by New England Hydro; or

(ii) a Participant shall fail to supply in accordance with the terms hereof any documentation required by New England Hydro in connection with financing with Lenders by New England Hydro (for VELCO and MMWEC, this includes documentation for their respective contracting electric systems), and such failure shall continue for more than 30 days after written notice of such failure has been given to such Participant by New England Hydro; or

(iii) a Participant shall admit in writing its inability to pay its debts, or shall make a general assignment for the benefit of its creditors; or any proceeding shall be instituted against a Participant (and is not dismissed within sixty days), or by a Participant,

seeking to adjudicate it a bankrupt or insolvent, or seeking reorganization, arrangement, adjustment, or composition of it or its debt under any law relating to bankruptcy, insolvency or reorganization or relief of debtors or seeking appointment of a receiver, trustee, or other similar official for it or for any substantial part of its property; or if a Participant shall take any action to authorize any of the actions set forth in this subsection (iii); or

(iv) prior to the retirement of the last amount of New England Hydro's debt and prior to the reduction of New England Hydro's equity investment to an amount less than or equal to 10% of its highest previous amount, a Participant shall fail to make a payment of principal under any bank loan or other obligation for borrowed money (including financing leases or other similar arrangements) exceeding the lesser of \$1 million or 5% of such Participant's total capitalization, which failure is not excused or cured within the earlier of 30 days or the acceleration of the maturity thereof; or

(v) a Participant shall fail to perform any other obligation under this Agreement in accordance with the terms hereof, and such failure shall continue for more than 30 days after written notice thereof has been given to such Participant by New England Hydro; or

(vi) a Participant shall experience an event of default under any of the other Basic Agreements or under any of the basic agreements for Phase I listed in the first paragraph of Section 1; then, and in any such event, in addition to any other rights or remedies that it may have against such Participant by reason thereof, New England Hydro shall, by written notice to such Participant, terminate all rights of such Participant under this Agreement as of the date of such Event of Default. New England Hydro may with the approval of the Advisory Committee waive any Event of Default hereunder or grant extensions of time to cure any Event of Default.

B. Immediately upon termination of the rights of a Participant pursuant to A above:

(i) if such terminated Participant was then a Credit Enhanced Participant, then New England Hydro shall allocate the Participating Share of the terminated Participant to the Equity Sponsors or their appointees in proportion to the Equity Sponsors' then respective equity percentages;

(ii) if such terminated Participant was not then a Credit Enhanced Participant, then New England Hydro will offer the Participating Share of the terminated Participant as of the date of the termination to the Equity Sponsors or their appointees and upon acceptance of the offer will allocate the Participating Share in accordance with the acceptance (if the offer is oversubscribed by Equity Sponsors, the allocation will be made in proportion to such Equity Sponsors' then respective equity percentages); provided that, if such Participating Share is not so completely allocated, then New England Hydro will offer such unallocated Participating Share to Participants whose most junior long-term debt securities are then rated at least one grade above investment grade or, if not so rated, who have obtained the consent of all New England Hydro's Equity Sponsors (if the

offer is oversubscribed, the allocation will be made in proportion to respective participating shares); and provided further that such Equity Sponsors or their appointees or Participants receiving such an allocation accept an equal support or participating share under the Phase II New England Power AC Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, and the Phase II New Hampshire Transmission Facilities Support Agreement; and

(iii) the Equity Sponsors have been allocated B (i) or (ii) above have been allocated B (ii) above or New allocation is made, or their appointees that Participating Shares under or any Participants that Participating Shares under England Hydro, if no such shall be entitled to receive in accordance with the Use Agreement from the escrow agent as liquidated damages the allocated share of all Phase II amounts retained under the Use Agreement on or after the date of such termination for the account of such terminated Participant.

C. The terminated Participant shall immediately pay either (i) if an allocation is made under Section 15B, to the Equity Sponsors or their appointees or any Participants that have received such allocation or (ii) otherwise, to New England Hydro, in addition to any other amounts due under any provisions of this Agreement, an amount equal to its Participating Share of the investment in the Transmission Facilities (including any cost of removal and disposal) less any depreciation and amortization relating to the Transmission Facilities to the date of such payment. New England Hydro will credit any such amounts it receives from the terminated Participant for the benefit of the Equity Sponsors.

D. New England Hydro or any Equity Sponsor or any Participant shall be free to invoke such remedies at law or in equity as may be deemed appropriate against any Participant that defaults under this Agreement.

#### Section 16. Delay, Suspension, Termination, Cancellation, or Shutdown

If at any time New England Hydro determines that continued planning, construction, or operation of the Transmission Facilities is not advisable for any reason New England Hydro deems appropriate, it may, after written notice to all Participants, delay, restrict, or suspend planning, construction, or operation, or shut the Transmission Facilities down for a period of less than six months. In accordance with Section 6, the Advisory Committee has responsibility for accepting or rejecting a proposal submitted by New England Hydro recommending a delay, restriction, suspension, termination, or cancellation of planning or construction, or shut down of the Transmission Facilities for a period of six months or longer or permanently. In any case in which New England Hydro determines that safety considerations require an immediate shutdown, it shall proceed without consultation with the Advisory Committee or written notice to the Participants.

If the Advisory Committee has determined that (i) planning or construction of the Transmission Facilities is to be terminated or cancelled, or (ii) the Transmission Facilities are to be permanently shutdown, then New England Hydro shall give each Participant not less than ninety days advance written notice of any such event. Each Participant shall pay to New England Hydro within such notice period an amount, as specified in such notice and calculated as of the date of the event so notified, equal to the greater of:

- (a) its Participating Share of the investment in the Transmission Facilities (less any depreciation and amortization to the date of payment) together with all costs relating to or resulting from such termination, cancellation or permanent shutdown, including any premiums and penalties incurred because of the early retirement of any indebtedness and further including without limitation any costs of total or partial demolition and disposal of the Transmission Facilities net of any actual salvage value received by New England Hydro including the proceeds from any sale and net of the actual proceeds received by New England Hydro from any condemnation proceeding or insurance for destruction; or
- (b) its Participating Share of the then total capital of New England Hydro plus any premiums and penalties incurred because of the early retirement of any financing plus without limitation any costs of total or partial demolition and disposal of the Transmission Facilities net of any actual salvage value received by New England Hydro including the proceeds from any sale and net of the actual proceeds received by New England Hydro from any condemnation proceeding or insurance for destruction.

If New England Hydro and the Advisory Committee agree on the decision to terminate, cancel or permanently shutdown the Transmission Facilities under this Section 16, New England Hydro shall have and retain, upon termination of this

Agreement, the right to sell the Transmission Facilities at fair market value to any NEES affiliate of New England Hydro. Any amounts received from such sale shall be considered salvage value under (a) or (b) above. If New England Hydro's recommendation to terminate, cancel or permanently shutdown is not adopted by the Advisory Committee, New England Hydro shall be paid an amount determined in accordance with this Section 16 and if directed by the Advisory Committee shall transfer its rights, assets, and obligations related to the Transmission Facilities to the Participants or any group or designee thereof. New England Hydro's lease of the right-of-way shall be assigned in connection with such transfer.

If New England Hydro is paid such amount and transfers its rights, assets, and obligations related to the Transmission Facilities to the Participants or any group or designee thereof, New England Hydro shall refund any costs of total or partial demolition and disposal of the Transmission Facilities to such Participants or group or designee thereof.

#### Section 17. Termination by New England Hydro

If at any time New England Hydro elects and so notifies in writing all Participants that, as a result of a default under Section 15, the Participating Share of a terminated Participant cannot be allocated to Equity Sponsors or their appointees or other Participants pursuant to Section 15B and the aggregate of the Participating Shares of all nonterminated Participants is less than 100%, each such other Participant's participation hereunder shall terminate on a date (effective date of termination) not less than 90 days after the date of New England Hydro's written notice, and each such other Participant on or before the effective date of termination shall pay to New England Hydro an amount calculated in accordance with the second paragraph of Section 16.

Upon termination of this Agreement pursuant to this Section 17, New England Hydro shall offer each Participant which

(i) was not a terminated Participant immediately prior to termination of the Agreement pursuant to this Section 17 and (ii) has paid all amounts due under the first paragraph of this Section 17, an opportunity to participate in a new support agreement, provided that all participants in such new support agreement agree to pay 100% of the costs of service of New England Hydro. The new support agreement will have a term equal to the remaining term of this Agreement. Other provisions of the new support agreement will be substantially similar to those in this Agreement. The investment in the Transmission Facilities under the new support agreement shall be reduced by any amount received as termination payments hereunder which would be properly applied to utility plant accounts in accordance with the Uniform System less any costs of termination or premiums or penalties incurred because of the early retirement of any financing of New England Hydro. Any participant in the new support agreement shall also be a supporter of the AC facilities of New England Power and Boston Edison Company and the transmission facilities of New Hampshire Hydro.

No termination of this Agreement shall relieve any party of any obligation arising prior to making the payment to New England Hydro required by the first paragraph of this Section 17. In addition, notwithstanding the termination of this Agreement for other purposes, this Agreement shall continue in effect to the extent necessary to provide for paying all “windup costs” and final billings, billing adjustments and payments.

#### Section 18. Debt Service Fund

New England Hydro may establish and maintain at its option a Debt Service Fund with funds which may be borrowed from unaffiliated third parties. The Debt Service Fund may be assigned in connection with a financing by New England Hydro with the Lenders in order to provide assurance to such Lenders that New England Hydro will pay its debt service obligations in a timely manner.

The Debt Service Fund shall not exceed the lesser of (i) the amount required to pay six months of interest on indebtedness plus five percent of the largest principal amount of debt outstanding at any time plus any accrued earnings from investment of the amounts in the Debt Service Fund not yet credited to Support Charges as provided in Section 12 or (ii) the total amount of debt service remaining to be paid.

#### Section 19. Cash Deficiency Commitment

A. “Cash Deficiency” attributed to a Participant means with respect to any Due Date, the amount by which that Participant’s Participating Share of the aggregation of the principal of, premium, if any, and interest on any of the funds borrowed by New England Hydro from Lenders to finance the Transmission Facilities or the construction thereof and payable on such Due Date (whether at maturity, pursuant to mandatory prepayment, by acceleration or otherwise) exceeds the amount of cash from such Participant’s payments made under any other section of this Agreement and available to New England Hydro for repayment to Lenders of such borrowed funds.

B. If New England Hydro has a Cash Deficiency attributed to a Participant on any Due Date, that Participant agrees that it

shall absolutely and unconditionally guarantee to pay its Cash Deficiency on demand of Lenders, to be paid directly on demand to Lenders, in cash, provided, however, that no Cash Deficiency attributed to a Participant shall include any unpaid obligations hereunder of other Participants.

For purposes of this Section 19, "Due Date" shall mean the date any payments are due and payable under the terms of any indebtedness of New England Hydro with Lenders.

C. Payments by Participants under this section shall be considered by New England Hydro to be prepayments of amounts due or to become due to New England Hydro pursuant to any other section hereof.

#### Section 20. Miscellaneous

A. Insurance. New England Hydro will at all times during the term of this Agreement keep the Transmission Facilities insured against such risks as electric utility companies, similarly situated, constructing and operating like properties, usually insure against. Any uninsured loss, damage, or liability related to the Transmission Facilities or arising out of New England Hydro's performance hereunder and any expenses in connection with any such loss, damage, or liability shall be deemed to be an expense reimbursable by the Participants in accordance with Section 12. New England Hydro will assist any Participant, at the Participant's expense, in obtaining any other insurance coverage related to the Transmission Facilities that such Participant requires. Upon request, New England Hydro will supply certificates of insurance coverage.

B. Limitation of Liability. For and in consideration of the fact that New England Hydro is undertaking to design, engineer, procure, install, construct, operate, and maintain the Transmission Facilities for and on behalf of Participants without any compensation or charge other than the payments provided under this Agreement, no Participant shall be entitled to recover from New England Hydro or any affiliate or any shareholder, director, officer, employee, or agent of New England Hydro or any affiliate, any damages resulting from error or delay, whether or not due to negligence, in the design, engineering, procurement, installation or construction of the Transmission Facilities, or for any damage to the Transmission Facilities, any curtailment of power, or any other damages of any kind, including but not limited to consequential damages, arising out of or in connection with the performance of this Agreement by New England Hydro. Notwithstanding the above limitation, if New England Hydro is found by a court of competent jurisdiction to have intentionally violated this Agreement in a material manner or to have acted hereunder in a grossly negligent manner and if such court finding is final and no longer subject to appeal, then the Participants shall be entitled to recover from New England Hydro direct damages (but not consequential or any other damages) resulting from such material intentional violation or gross negligence, unless New England Hydro's actions or omissions have been expressly approved in advance by the Advisory Committee. New England Hydro will use its best efforts to enforce all contracts related to the construction and operation of the Transmission Facilities for the benefit of New England Hydro and the Participants.

C. Audit. New England Hydro will arrange for an annual audit to be performed by an independent public accounting firm of recognized standing selected by New England Hydro. The costs of the annual audit will be included in the operating expenses under Section 12. The books and records of New England Hydro (including metering records) shall be open to reasonable inspection and audit by any Participant. The costs of any such additional audit, including the costs of New England Hydro in connection with such audit, shall be borne by the Participant or Participants requesting such audit. New England Hydro will promptly make any reasonable corrections necessitated as a result of the annual audit or an additional audit.

D. Cost Reimbursement. In the event New England Hydro reasonably incurs any costs not provided for elsewhere herein in connection with or as a result of planning, organizing, documenting, construction, suspensions, rescheduling, cancellation, operation, maintenance, shutdown, demolition, disposition, or termination of the Transmission Facilities, or otherwise arising in connection with this Agreement, each Participant shall promptly reimburse to New England Hydro, within 15 days of the mailing date of the invoice, its Participating Share of such costs. However, New England Hydro will endeavor to finance any additional costs, to the extent such additional costs are properly capitalizable, over the shorter of the then remaining useful life of the Transmission Facilities, the remaining term of the Agreement, or the remaining term of its permanent financing.

E. Uncontrollable Force. No delay or failure in the performance of any obligation by New England Hydro shall be deemed to exist if it is the result of an “uncontrollable force”. The term “uncontrollable force” shall be deemed to mean any cause beyond the reasonable control of New England Hydro, which New England Hydro could not reasonably have been expected to avoid by exercise of due diligence and foresight, including, without limiting the generality of the foregoing, storm, flood, lightning, earthquake, fire, explosion, failure of facilities not due to lack of proper care or maintenance, civil disturbance, labor disturbance, sabotage, war, national emergency, or restraint by court or public authority. In such event, New England Hydro shall use reasonable diligence to notify the Participants of such event.

F. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of, and may be performed by, the successors and assigns of the parties and shall also be binding, insofar as permitted by law, on any receiver or trustee in bankruptcy, receivership, or reorganization of any party. Except (i) for a reallocation resulting from a default as provided in Section 15, (ii) for a sale, merger, or consolidation which is approved by New England Hydro and results in the transfer of substantially all of a Participant’s assets to, and the assumption of all of the Participant’s obligations hereunder by, an electric utility which is a member of NEPOOL, and (iii) for an assignment by New England Hydro to a NEES affiliate of New England Hydro which expressly assumes New England Hydro’s rights and obligations hereunder and acquires the Transmission Facilities, and (iv) for a transfer of any or all of a Participant’s Participating Share prior to the Effective Date as provided in Section 4A hereof, no assignment of this Agreement shall operate to relieve the assignor of its obligations under this Agreement without the written consent of the parties hereto. In addition to New England Hydro’s right to assign to an affiliate, New England Hydro may assign, without the consent of the Participants, its right,

title, and interest in this Agreement, in whole or in part, and any security interests contained herein or granted hereunder, to one or more banks, investment banking firms, insurance companies, other financial institutions, or others as collateral security for New England Hydro's obligations in connection with financing the Transmission Facilities. Written notice to all parties will be given prior to any assignment hereunder.

G. Right of Setoff. No Participant shall be entitled to set off against the payments required to be made by it hereunder (1) any amounts owed to it by New England Hydro, any affiliate of New England Hydro, any Equity Sponsor, or any other Participant or (2) the amount of any claim by it against New England Hydro, any affiliate of New England Hydro, any Equity Sponsor, or any other Participant. However, the foregoing shall not affect in any other way any Participant's rights and remedies with respect to any such amounts owed to it by New England Hydro, any affiliate of New England Hydro, any Equity Sponsor, or any other Participant or any such claim by it against New England Hydro or any other Participant.

H. Amendments. New England Hydro shall have the right to amend the provisions of Section 12 hereof from time to time by serving an appropriate statement of such amendment upon the Participants and filing the same with the Federal Energy Regulatory Commission (or such other regulatory agency as may have jurisdiction) in accordance with the provisions of applicable laws and any rules and regulations thereunder, and the amendment shall thereupon become effective on the date specified therein, subject to any suspension order duly issued by such agency. The Participants have the right to intervene in any regulatory proceeding brought by New England Hydro to consider such amendment of the provisions of Section 12.

Any amendments changing the Participating Shares of the Participants, the rights of the Participants or a Participant as specified in Section 11, or the several nature of the obligations and rights of the Participants hereunder as specified in Section 5, shall require consent by all parties. All other amendments to this Agreement shall be by mutual agreement of New England Hydro and Participants owning Participating Shares aggregating at least 66 2/3%, evidenced by a written amendment signed by New England Hydro and such Participants; and New England Hydro and all Participants shall be bound by any such amendment.

I. Notices. Except as the parties may otherwise agree, any notice, request, bill, or other communication, relating to this Agreement, or the rights, obligations or performance of the parties hereunder, shall be in writing and shall be effective upon delivery. Any such communication shall be considered as duly delivered when delivered in person or mailed by registered or certified mail, postage prepaid, to the respective post office address of the other parties shown following the signatures of such other parties hereto, or such other address as may be designated by written notice given as provided in this paragraph I.

J. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of The Commonwealth of Massachusetts.

K. Other.

- (1) No action, regardless of form, arising out of this Agreement may be brought by any party hereto more than three years after the cause of action has arisen.
- (2) In the event that any clause or provision of this Agreement, or any part thereof, shall be declared invalid or unenforceable by any court having jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of the remaining portions of this Agreement.
- (3) All provisions of this Agreement providing for limitation of, or protection against, liability shall apply to the full extent permitted by law, and regardless of fault, and shall survive either termination pursuant to this Agreement or cancellation.
- (4) Each party shall, upon request of another party, execute and deliver any document reasonably required to implement any provision hereof.
- (5) Any number of counterparts of this Agreement may be executed and each shall have the same force and effect as the original.
- (6) This Agreement, with the other Basic Agreements, Preliminary Quebec Interconnection Support Agreement - Phase II, the agreements with Hydro-Quebec regarding Phase II, and the basic agreements covering Phase I shall constitute the entire understanding among the parties and shall supersede any and all previous understandings pertaining to the subject matter of this Agreement.
- (7) This Agreement is the act and obligation of the parties hereto in their corporate or governmental capacity, and any claim hereunder against any shareholder, director, officer, employee, or agent of any party, as such, is expressly waived.

Section 21. Refund of Gain on Sale or Other Disposition of Transmission Facilities

In the event that any of the Transmission Facilities are sold or otherwise disposed of during the term of this Agreement, if the Net Proceeds (defined as the amount received from such sale or disposition less all costs relating to or resulting from such sale or disposition, including without limitation any income taxes relating to or resulting from such sale or disposition, any premiums and penalties incurred because of the early retirement of any indebtedness associated with the sold or disposed of Transmission Facilities, and any costs of total or partial demolition of the sold or otherwise disposed of Transmission Facilities) from such sale or disposition exceed the greater of (i) the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) or (ii) the then total capital of New England Hydro (as defined in Section 12), New England Hydro shall (a) refund to the then current Participants, in proportion to their then current Participating Shares, any such excess, and (b) credit to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition). The total capital of New England Hydro, for the purposes of this section, may exceed the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) due to (1) any reserve for deferred income taxes paid by New England Hydro or (2) for

other reasons related to the investment in the Transmission Facilities. If the Net Proceeds do not exceed the greater of (i) or (ii) above, the Net Proceeds will be credited to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities in lieu of payment to the Participants. The Participants agree to flow through any such refunds to their customers and shall seek any necessary regulatory approvals to reflect in their rates any such refunds and the effect of any such credits to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities; except that to the extent that a Participant's customers' rates have not reflected all or a portion of that Participant's share of the costs of the Transmission Facilities, then that Participant agrees that a complete flow-through of such refunds may not be appropriate and that particular Participant shall seek any necessary regulatory approvals for the appropriate disposition of an appropriate portion of such refunded amounts or credits.

IN WITNESS WHEREOF, the signatories have caused this Agreement to be executed by their duly authorized officers or agents.

- (a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.
- (b) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.
- (c) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, Concord shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.
- (d) Includes New Hampshire retail 1980 kilowatthour load of 4,939,218,744.
- (e) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.
- (f) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

Description of the Transmission Facilities

The Transmission Facilities will include the following:

- (1) the continuation of a single circuit  $\pm$  450 kV DC line on an existing right-of-way from the New Hampshire state line at Tyngsboro to Sandy Pond Substation in Ayer, a distance of 12.1 miles;
- (2) the converter terminal (1800 MW) and the site thereof to be located in the vicinity of the Sandy Pond substation;
- (3) electric power equipment and associated structures in the switchyard at the converter terminal location;
- (4) communication equipment located in Massachusetts; and
- (5) such other facilities in Massachusetts as approved by the Advisory Committee.

Forms of the following documentation:

1. Opinion of Counsel
2. Certificate
3. Incumbency and Signature Certificate
4. Directors' Vote

[Please note - governmental entities may make appropriate modifications to these documents to reflect that they are not corporations.]

[Form of Opinion of Counsel for Each Utility Participant]

New England Hydro-Transmission  
Electric Company, Inc.;  
New England Hydro Transmission  
Corporation; or  
New England Power Company

Gentlemen:

This opinion is furnished in connection with the execution and delivery by \_\_\_\_\_ (the Company) of the following Agreements:

\_\_\_\_\_.

We have acted as counsel to the Company, one of the Utility Participants, in connection with the execution and delivery of the Basic Agreements. We participated in reviewing and/or drafting the Agreements.

As general [special] counsel to the Company, we are generally familiar with its affairs. [If special counsel is giving the opinion, describe relationship to the Company.] We have reviewed the proceedings taken by the Company in connection with its authorization, execution, and delivery of the Agreements and any documentation supplied by the Company thereunder. We have also examined executed counterparts of the Agreements, have made such other investigation, and have examined such other records and documents, and have made such examination of law and satisfied ourselves as to such other matters as we have deemed relevant and necessary in order to enable us to express the opinions set forth below.

Based upon and subject to the foregoing and to the further qualifications in this opinion, we are of the opinion that:

1. The Company is a corporation duly organized, validly existing and in good standing under the laws of [the jurisdiction of its incorporation], has the corporate power to own its assets and to transact the business in which it is engaged, and is duly qualified as a foreign corporation in, and is in good standing under the laws of, each jurisdiction in which the conduct of its business or the ownership of its assets requires such qualification.

2. The Company has (and in the case of the Agreements at the time of execution and delivery thereof, had) full corporate power, and legal right to execute, deliver and perform the Agreements, and the Company has taken all necessary corporate action to authorize the execution, delivery, and performance by it of the Agreements.

3. The execution, delivery, and performance by the Company of the Agreements do not (a) contravene the Company's [charter documents] or by-laws, (b) violate any applicable law, rule, regulation, order, writ, judgment, injunction, decree, or award known to us by which the Company is bound, (c) violate any indenture, instrument, or agreement known to us by which the Company is bound, or (d) result in or require the creation or the imposition of any lien pursuant to the provisions of any indenture, instrument, or agreement known to us by which the Company is bound.

4. No authorization, approval, consent, or other action by, and no notice to or filing with, any federal, state, or other governmental authority or regulatory body which has not been obtained or given and is not in full force and effect is required for the valid and lawful execution, delivery, and performance by the Company of the Agreements. [In this connection, to the extent it may be required by law, the approval of the Massachusetts Department of Public Utilities [Connecticut PUC, or other] has been given for the Agreements and the Company's performance thereunder by order(s) dated \_\_\_\_\_, which remains in full force and effect.]

5. The Agreements have each been duly executed and delivered by the Company and constitute the legal, valid, and binding obligations of the Company enforceable against it in accordance with their respective terms.

6. No action, suit, proceeding, or investigation at law or in equity or by or before any governmental instrumentality or other agency now pending or threatened against or affecting the Company or its property or rights which, if adversely determined, would materially impair the ability of the Company to perform its obligations under the Agreements is known to us.

Our opinion that the Agreements are enforceable, each in accordance with the terms thereof, is qualified to the extent that the enforcement of the rights and remedies created thereby is subject to bankruptcy, insolvency, reorganization, and similar laws of general application affecting the rights and remedies of creditors and secured parties, and to the further extent that the availability of the remedies of specific enforcement, injunctive relief, or any other equitable remedy is subject to the discretion of the court before which any proceeding therefor may be brought.

Very truly yours,

#### CERTIFICATE

I, (insert name), the Clerk (or Secretary or other principal recording officer) of (insert name of Utility Participant), a (insert state of organization) (the "Company") do hereby certify that:

(1) Attached hereto as Exhibit A is a true and correct copy of a vote duly adopted at a meeting of the Board of Directors of the Company, duly called and held on \_\_\_\_\_, \_\_\_\_\_, and that such vote and the authority vested thereby have not been amended or revoked and are still in full force and effect.

(2) Attached hereto as Exhibit B is a true and correct copy of the Articles of Organization (or other charter documents) of the Company, as amended and in effect as of the date of this Certificate.

(3) Attached hereto as Exhibit C is a true and correct copy of the By-Laws of the Company, as amended and in effect as of the date of this Certificate.

(4) The persons (or person) listed on Exhibit D have been duly elected to the offices set forth adjacent to their respective names since the first day of June, 1985, and the signatures adjacent to their respective names are the genuine signatures of said officers.

IN WITNESS WHEREOF, I have placed my hand and the seal of the Company this \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_.

FORM OF DIRECTORS' VOTE APPROVING AGREEMENTS

VOTED:

That in connection with this Company's participation in the Phase II expansion of the proposed interconnection between the New England Power Pool companies and Hydro-Quebec, the execution and delivery on behalf of this Company by \_\_\_\_\_, President, of the following agreements: (being collectively referred to in this vote as "Agreements") copies of which Agreements have been presented at this meeting, are hereby authorized, approved, ratified, and confirmed, and that the officers of this Company are further authorized severally to take any and all such further actions including the execution and delivery of such further documents, as such officers or any of them may deem necessary or appropriate in connection with the actions and documents authorized by this vote.

ATTACHMENT E

Subscription Process for Determining  
Initial Participating Shares

After allocation of up to 10% of the Participating Shares pursuant to Section 4(B)(1) and (2), the remaining shares shall be allocated to Participants as follows:

- a. Each Participant shall be entitled to a pro rata share of the remainder based on its 1980 Kwh load as a percentage of all Participants' 1980 Kwh loads.
- b. Upon execution of this Agreement, each Participant may subscribe for more or less than its share under (a) above.

- c. If there are no undersubscriptions or oversubscriptions under (b) above or if the sum of the shares under (a) or (b) above for all Participants equals 100% of such remaining shares, then each Participant shall have a share as determined under (a) or (b) above. (For the purposes of this section, oversubscription shall mean, with respect to any Participant, a subscription under (b) above of more than its share under (a) above. For the same purposes, undersubscription shall mean, with respect to any Participant, a subscription under (b) above of less than its share under (a) above. The amount of such oversubscription shall be equal to (b) minus (a) and the amount of such undersubscription shall be equal to (a) minus (b).)
- d. If there are undersubscriptions but no oversubscriptions or if there are oversubscriptions but no undersubscriptions, then each Participant shall have a share as determined under (a) above.
- e. If the net result of subtracting the aggregate amount of all undersubscriptions from the aggregate amount of all oversubscriptions is greater than zero, the aggregate amount of all oversubscriptions must be reduced to the aggregate amount of all undersubscriptions. This amount shall be referred to as the total permitted amount of oversubscriptions. Each oversubscriber shall initially be allocated a share of the total permitted amount of oversubscriptions (pro rata by the 1980 kwh loads of the oversubscribers); provided that no oversubscriber shall be allocated more than its requested amount under (b) above. Any remaining unallocated portion of the total permitted amount of oversubscriptions shall be allocated to all oversubscribers that have not yet reached their requested amount under (b) above pro rata by the differences between their requested amounts under (b) above and their amounts allocated thus far under this section (d).
- f. If the net result of subtracting the aggregate amount of all oversubscriptions from the aggregate amount of all undersubscriptions is greater than zero, the aggregate amount of all undersubscriptions must be reduced to the aggregate amount of all oversubscriptions. This amount shall be referred to as the total permitted amount of undersubscriptions. The total permitted amount of undersubscriptions shall be allocated to the undersubscribers pro rata by the amounts of their undersubscriptions.

## ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New England Hydro's ability to finance the project. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An "investment grade" Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An "investment grade" Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.4%) or less and which has outstanding junior long-term debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.) "Qualified debt ratings" are defined as a minimum rating of Baa3 by Moody's Investors Service, BBB- by Standard & Poor's Corporation and D&P 10 by Duff & Phelps, Inc.

Any "substitute credit enhancement" shall mean, with respect to any New England Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of "AA" or better in form and substance satisfactory to New England Hydro or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New England Hydro, or (iii) a guarantee from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II Massachusetts Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant's share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported under

such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant's Participating Share of the maximum amount of obligations under such New England Hydro debt financing plus, if not already provided in connection with any other debt financing of New England Hydro or New Hampshire Hydro, that Participant's Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant's Participating Share of the debt obligations of Boston Edison Company and New England Power Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively, of the amounts included therein for covering such debt obligations.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing is required to be paid by the Participants. If a Participant is a Credit Enhanced Participant by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant will be paid by all Participants with each Participant paying its Participating Share thereof; provided, however, that if a Participant is a Credit Enhanced Participant due to lack of debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant shall be paid by such Participant.

The Credit Enhancement Charge (E) attributed to a Credit Enhanced Participant is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

F = the Credit Enhancement Charge for each New England Hydro debt financing that is credit enhanced for the Participant.

i = a number from 1 to n representing each of New England Hydro debt financings.

n = total number of such financings.

G = the Participant's Participating Share (in percent)

H = the maximum outstanding amount of New England Hydro debt during the month which was credit enhanced for such Participant

I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

<u>Participant's Debt Rating*</u>	<u>I(%)</u>
Below B3 or not rated	7.57
B3	5.32

B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing.

J = an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New England Hydro's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes.

ATTACHMENT G  
FORM OF  
EQUITY FUNDING AGREEMENT  
FOR

NEW ENGLAND HYDRO-TRANSMISSION ELECTRIC COMPANY, INC.

This AGREEMENT dated as of June 1, 1985, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro) and the New England entities listed in Attachment A hereto. New England Power Company is signing this Agreement only with respect to the commitments made to it by the Equity Sponsors under Section 10 hereof. Those New England entities that have executed this Agreement and that meet the further conditions for participation and qualification hereunder are hereinafter referred to as Equity Sponsors or individually as an Equity Sponsor. The Equity Sponsors are sometimes referred to collectively herein, but their rights and obligations hereunder are several and not joint as described in Section 6 hereof.

In consideration of the premises, the concurrent execution of the other Basic Agreements hereinafter referred to, the mutual covenants hereinafter and therein set forth, and other good and valuable consideration, receipt whereof is hereby acknowledged, it is hereby agreed as follows:

Section 1. Basic Understandings and Purpose

New England utilities are currently participating in the arrangements for the Phase I interconnection planned by the New England Power Pool (NEPOOL) with Hydro-Quebec, which is to consist of a  $\pm$  450 kV HVDC transmission line from a terminal at the DES Cantons Substation on the Hydro-Quebec system near Sherbrooke, Quebec to a terminal having an approximate rating of 690 MW at a substation at the Comerford Generating Station on the Connecticut River (hereinafter referred to as Phase I). The basic arrangements covering the portion of Phase I in the United States are set forth in the New England Power Pool Agreement, as amended (the NEPOOL Agreement) and three contracts among the participants in Phase I as follows:

(1) Vermont Transmission Line Support Agreement, dated as of December 1, 1981, as amended, with Vermont Electric Transmission Company, Inc.

(2) Phase I Terminal Facilities Support Agreement, dated as of December 1, 1981, as amended, with New England Electric Transmission Corporation, and

(3) Agreement With Respect To Use Of Quebec Interconnection, dated as of December 1, 1981, as amended, including the restatement thereof in connection with Phase II (this Agreement as restated to cover Phase II is hereinafter referred to as the Use Agreement).

These Phase I interconnection facilities are currently under construction with completion scheduled during 1986.

With the completion of arrangements for Phase I and the related contracts with Hydro-Quebec, the members of NEPOOL have conducted studies of the benefits of an expanded interconnection for NEPOOL with Hydro-Quebec (Phase II) and have negotiated with Hydro-Quebec a firm energy arrangement to utilize the expanded interconnection facilities.

The portion of Phase II in the United States will consist of an extension of the Phase I DC transmission line from the proposed terminus of Phase I at the Comerford Station through New Hampshire to a site in Massachusetts with additional terminal facilities installed at that site to increase the total transfer capacity between Hydro Quebec and NEPOOL from the 690 MW of Phase I to approximately 2000 MW. Reinforcements to the existing AC transmission system of New England Power and to certain AC facilities of Boston Edison Company will also be required. The United States portion of the Phase II facilities will be designated as pool-planned facilities in the same manner as the United States portion of the Phase I facilities was so designated.

Each Equity Sponsor acknowledges that it has been represented on the Executive and Planning Committees of NEPOOL that had responsibility for evaluating the feasibility of Phase II and, through this representation, actively participated in the decision of NEPOOL to go forward with Phase II. Furthermore, each Equity Sponsor represents that it made its own independent investigations

and inquiries as it deemed appropriate and did not rely upon representations (other than those contained in this Agreement) of New England Hydro or its affiliates in deciding to enter into this Agreement.

The share of benefits among the New England utilities associated with Phase II is set forth in the Use Agreement. The Use Agreement also permits each New England utility to make its own entitlement transactions with Hydro Quebec and to use the interconnection for such transactions.

The provisions of the Phase II Massachusetts Transmission Facilities Support Agreement (Massachusetts HVDC Support Agreement) cover the Phase II Massachusetts HVDC transmission line and terminal facilities in Massachusetts. New England Hydro will build, own, operate, and maintain those Massachusetts HVDC transmission facilities.

The portion of the Phase II HVDC transmission line to be constructed in New Hampshire is covered under the Phase II New Hampshire Transmission Facilities Support Agreement (New Hampshire HVDC Support Agreement). New England Hydro—Transmission Corporation (New Hampshire Hydro, an affiliate of New England Hydro) will build, own, operate, and maintain those New Hampshire HVDC transmission facilities.

All improvements and reinforcements to the AC transmission system in Massachusetts necessitated by Phase II are covered under the Phase II New England Power AC Facilities Support Agreement (New England Power AC Support Agreement) and the Phase II Boston Edison AC Facilities Support Agreement (Boston Edison AC Support Agreement).

The provisions of this Agreement cover the commitments of the Equity Sponsors of New England Hydro to contribute equity funds to New England Hydro, to provide certain limited credit support in connection with debt financing of New England Hydro, to provide certain limited credit support in connection with the New England Power AC Support Agreement and the Boston Edison AC Support Agreement, and to accept an allocation of a share of Phase II in the event of a default by certain participating New England utilities under certain other Basic Agreements.

In view of the need to formalize the agreements among the parties at an early date so that (i) binding commitments with Hydro Quebec for Phase II may be made, (ii) binding commitments for ultimate construction and the financing of the United States portion of Phase II may be undertaken consistent with the time schedule anticipated by NEPOOL and with the assurance that commitments among the New England utilities are in place, and (iii) licensing activities may proceed on a schedule that enables completion of such construction consistent with the time schedule anticipated by NEPOOL, the following agreements are concurrently being entered into (the “Basic Agreements”) which collectively set forth rights and obligations with respect to the foregoing undertaking: (1) this Agreement, (2) the Massachusetts HVDC Support Agreement; (3) the New Hampshire HVDC Support Agreement; (4) the Equity Funding Agreement for New Hampshire Hydro; (5) the New England Power AC Support Agreement; (6) the Use Agreement; (7) various amendments to the NEPOOL Agreement relating to the sharing of savings, capability responsibilities, and Pool transmission arrangements; and (8) the Boston Edison AC Support Agreement.

In order to coordinate each participating utility's interest in Phase II to the fullest extent possible, each of the following Basic Agreements have been drafted with the intent that the participating interest of each participating utility will be the same under each agreement: the Massachusetts HVDC Support Agreement, the New Hampshire HVDC Support Agreement, the New England Power AC Support Agreement, the Boston Edison AC Support Agreement, and the Use Agreement. These Basic Agreements also provide that, notwithstanding any provision thereof that may be interpreted to the contrary, the proper interpretation of each of these Basic Agreements is to be consistent with such overriding intent. Each Equity Sponsor acknowledges this overriding intent and agrees that any action by it or its appointee affecting such participating interests shall be the same under this Agreement and the Equity Funding Agreement with New Hampshire Hydro in order to also be consistent with such overriding intent.

## Section 2. Conditions Precedent to Effectiveness

The effectiveness of this Agreement, and all rights, obligations, and performance of the signatories hereunder, is subject to (i) New England Electric System (NEES) and other signatories having executed this Agreement committing in the aggregate to Equity Shares (as hereinafter defined) equal to at least 100%, and each such signatory having demonstrated by December 30, 1985, to the satisfaction of New England Hydro that is qualified to be an Equity Sponsor pursuant to Section 4, (ii) New England Hydro or New Hampshire Hydro or New England Power or Boston Edison and members of NEPOOL (including Boston Edison and New England Power) serving at least 66-2/3% of the aggregate kilowatt-hour load served by NEPOOL members in 1980 having executed the other Basic Agreements (except for the Equity Funding Agreement for New Hampshire Hydro and the amendments to the NEPOOL Agreement), (iii) each signatory having also executed the Equity Funding Agreement for New Hampshire Hydro and having the same percentage of New Hampshire Hydro's equity as its Equity Share hereunder, (iv) members of NEPOOL having executed the amendments to the NEPOOL Agreement for Phase II in order that such amendments may become effective in accordance with the NEPOOL Agreement, and (v) each signatory having satisfied the conditions precedent set forth below.

By June 1, 1986, each signatory to this Agreement shall provide certificates and legal opinions from counsel satisfactory to New England Hydro, together with certified copies of related resolutions, consents, approvals, authorizations, and other documents (Documentation) necessary to establish to the satisfaction of New England Hydro that all corporate and regulatory consents, waivers, approvals, authorizations and other actions necessary in connection with performance by such signatory of its obligations under the Agreement have been obtained and are in full force and effect, that the Agreement has been duly authorized, executed, and delivered by such signatory, and that it constitutes a binding commitment by the signatory enforceable in accordance with its terms. Forms of Documentation acceptable to New England Hydro are included in Attachment B hereto. Prior to signing this Agreement, each signatory has provided to New England Hydro a listing of all consents, waivers, approvals, authorizations, and other actions required for that signatory to deliver its Documentation.

Vermont Electric Power Company, Inc. (VELCO) and Massachusetts Municipal Wholesale Electric Company (MMWEC) represent a number of electric systems. If they desire and are qualified to be Equity Sponsors, they shall be deemed to have signed on behalf of those respective systems listed in Schedules I or II, respectively. By March 1, 1986, VELCO and MMWEC will provide New England Hydro with copies of contracts with their respective systems which impose absolute and unconditional obligations on such systems to pay their proportionate shares of all costs or obligation incurred under this Agreement by VELCO or MMWEC, respectively. By that date, VELCO and MMWEC will also provide to New England Hydro as part of their Documentation certificates, legal opinions (from counsel satisfactory to New England Hydro), and other documents in form and substance satisfactory to New England Hydro representing unconditionally that all consents, approvals, and authorizations have been obtained by their contracting systems in connection with each such system's performance of its obligations under its respective contract with VELCO or MMWEC and that each such contract imposes absolute and unconditional obligations on such systems to pay their proportionate shares of all costs incurred under this Agreement by VELCO or MMWEC, respectively, and has been duly authorized, executed, and delivered and is a binding commitment of such system enforceable in accordance with its terms. If regulatory approvals have not been obtained by March 1, 1986, such representations shall be conditioned upon receipt of regulatory approvals. VELCO and MMWEC will have until June 1, 1986, to receive such approvals and make such representations unconditionally. In order that percentages of participation be consistent among the Basic Agreements, VELCO and MMWEC shall have their contracts with their contracting systems cover the necessary commitments for each Basic Agreement.

All expenses in connection with obtaining and delivering any Documentation under this Agreement, including legal opinions, are to be borne by the signatory incurring such expense. New England Hydro will have no responsibility for any expenses incurred by VELCO and MMWEC in providing Documentation for their respective contracting systems.

Any signatory that fails to meet the requirements of Section 2 by the deadlines contained herein will not be an Equity Sponsor under this Agreement and will not have any rights and obligations hereunder.

New England Hydro by written notice to all signatories may extend any deadline date specified in this Section to a later date, provided that any extension for longer than six months requires the consent of the Advisory Committee under the Massachusetts HVDC Support Agreement.

### Section 3. Effective Date and Term

This Agreement shall become effective (the Effective Date) upon the last to occur of the following dates:

- (i) the date that the Equity sponsors, committing in the aggregate to Equity Shares (as hereinafter defined) equal to at least 100%, have met the requirements of Section 2; and
- (ii) the date that the last of the other Basic Agreements (excluding the Use Agreement) becomes effective or would become effective but for a condition that its effectiveness is subject to this Agreement becoming effective.

Upon execution and delivery of the Agreement by New England Hydro and NEES and other signatories committing in the aggregate to Equity Shares (as hereinafter defined) equal to no less than 100%, and notwithstanding any provision herein to the contrary, no signatory may terminate its obligations hereunder except in accordance with provisions of this Agreement.

The term of this Agreement shall expire on the alter to occur of the termination dates of the Massachusetts HVDC Support Agreement or the New England Power and Boston Edison AC Support Agreements.

#### Section 4. Equity Sponsor Qualification

A. In order to enhance New England Hydro's ability to finance its portion of Phase II as required under the Massachusetts HVDC Support Agreement and to enhance the credit support of certain Supporters under the AC Support Agreement, some or all of the New England utilities participating in Phase II whose credit ratings are at least one grade above the lowest investment grade have agreed to provide, or to cause their designees to provide, credit support for those New England utilities participating in Phase II whose credit ratings are below investment grade. NEES and those New England utilities or their designees which have agreed to provide this credit support are the Equity Sponsors of New England Hydro under this Agreement.

B. A Participant under the Massachusetts HVDC Support Agreement or its authorized designee qualifies to be an Equity Sponsor by having its outstanding long-term debentures rated at least one grade above the lowest investment grade rating as of September 1, 1985. If no long-term debentures are outstanding, the ratings used shall be those of such company's most junior long-term mortgage or revenue bonds. If no mortgage bonds, revenue bonds, or debentures are outstanding, the ratings used shall be those of the most junior long-term debt. VELCO shall qualify to be an Equity Sponsor if 80% or more of its common stock is owned by utilities whose debt securities qualify pursuant to this subsection 4(B).

For purposes of this Agreement, "one grade above the lowest investment grade rating" means a rating equal to the following ratings from two of these rating agencies: Standard and Poor's Corporation - Rating BBB; Moodys Investor Service - Rating Baal; and Duff & Phelps - Rating D&P 9 (or the equivalent municipal ratings).

C. A "designee" shall be authorized to be an Equity Sponsor if it is a parent company of such Participant and (i) its debt securities meet the appropriate test specified in B above, or (ii) at least 80% of its consolidated utility revenues are derived from subsidiaries whose debt securities meet the appropriate test specified in B above. (For VELCO, each stockholder of VELCO shall be a parent company of VELCO.) On or before the date of execution of this Agreement, each Participant shall identify its designee, if any.

D. In order that the necessary credit enhancement is provided as specified in A above, the qualification of each Equity Sponsor shall be reviewed by New England Hydro as of the date that the first equity contributions are to be made by such Equity Sponsor. If an Equity Sponsor fails to qualify on such date, appropriate actions and allocations shall be instituted as provided elsewhere in this Agreement.

#### Section 5. Equity Shares

A. Each Equity Sponsor shall have and be charged with a percentage interest in all rights and obligations hereunder determined in accordance with this Section 5 (which interest is hereinafter referred to as its "Equity Share"). All of the equity of New England Hydro will be owned by the Equity Sponsors in proportion to their Equity Shares.

The Equity Share of each Equity Sponsor shall be computed both initially and as changed from time to time in accordance with the terms hereof, by New England Hydro as hereinafter provided. Such computations shall be made as of the first day of any month in which there is a change in the number of Equity Sponsors or any change in the interest of any Equity Sponsor as herein provided. The initial computation is to be made as of September 15, 1985, and subsequent computations are to be made in any month thereafter in which an interest is modified or terminated due (i) to the failure of a signatory to provide proof that it is qualified to be an Equity Sponsor by December 30, 1985, or (ii) to the failure to provide Documentation by June 1, 1986, or (iii) to the failure to be so qualified on the date the first equity contributions are to be made by such Equity Sponsor, or (iv) to the operation of any provision of this Agreement. All computations shall be final unless there is a manifest error. Such computations of Equity Sponsors' Equity Shares as initially calculated and as changed under (i) and (ii) shall be made pursuant to Attachment C. Changes under (iii) shall be made pursuant to section 5(C) below, and changes under (iv) shall be made pursuant to the appropriate section requiring the change.

B. The Equity Shares on and as of the initial computation date, and as of the date of subsequent computations under subparts (i) and (ii) of the second paragraph of A above, will be calculated as follows:

1. 51% to NEES; and
2. 49% apportioned among the other Equity Sponsors on the basis of the subscription process as described in Attachment C.

(Attachment C provides that each Equity Sponsor may specify a maximum percentage of equity and that such maximum shall remain in effect until June 1, 1986 or such later deadline if extended pursuant to Section 2 hereof.)

C. On the basis of New England Hydro's review of the qualifications of each Equity Sponsor other than NEES as of the date that the first equity contributions are to be made by such Equity Sponsor, if one or more Equity Sponsors are no longer qualified under Section 4, (i) the aggregate Equity Shares of such unqualified Equity Sponsors shall first be offered in writing by New England Hydro to all then qualified Equity Sponsors other than NEES for voluntary subscription, (ii) second, any remaining shortfall shall be allocated pro rata among such qualified Equity Sponsors not including NEES in proportion to their Equity Shares determined as of June 1, 1986, provided that the aggregate of all involuntary allocations under this Section 4(C) to such qualified Equity Sponsors shall not exceed an aggregate Equity Share of 10%, and further provided that the aggregate of all such involuntary allocations to any such Equity Sponsor shall not increase such Equity Sponsor's Equity Share determined as of June 1, 1986, by more than 25% thereof, and (iii) finally, any remaining shortfalls shall be retained pro rata by such no longer qualified Equity Sponsors in proportion to their Equity Shares

determined as of June 1, 1986; provided, however, that NEES and all qualified Equity Sponsors may agree to other allocation arrangements; and further provided that NEES shall not have an Equity Share of less than 51% unless it so consents. (The above deadlines of June 1, 1986 may be extended to a later deadline pursuant to Section 2 hereof.)

All offerings above shall be made in accordance with a voluntary subscription process as specified in New England Hydro's offering letter, and any oversubscriptions will be treated as provided therein.

#### Section 6. Relationship Among Equity Sponsors

The rights and obligations of the Equity Sponsors hereunder are several, in accordance with their respective Equity Shares, and not joint. The rights and obligations of New England Hydro hereunder are also several and not joint with those of the Equity Sponsors or any one thereof. There is no intention to create by this Agreement, or by any grant, lease, license, or activity related hereto, an association, joint venture, trust, or partnership or to impose on New England Hydro or any Equity Sponsor trust or partnership rights or obligations; and any such implied intention is expressly negated. Except as expressly provided in this Agreement, no Equity Sponsor shall have by virtue of this Agreement or of any such grant, lease, license, or activity the right or power to bind any other Equity Sponsor without its express written consent.

#### Section 7. Equity Contribution

A. Under the Massachusetts HVDC Support Agreement, New England Hydro has agreed to limit its equity investment to a maximum of 40% of its total capital as of the effective date of that agreement and has agreed to use its best efforts to continue to limit its equity investment to 40% of its total capital during the time that New England Hydro has outstanding debt in its capital structure.

New England Hydro may call from time to time by written notification upon the Equity Sponsors to contribute equity in any of the forms set forth in this Section up to a maximum aggregate amount of \$140 million, provided that Equity Sponsors having 66-2/3% of Equity Shares may agree to increase this maximum aggregate amount; and then all Equity Sponsors shall contribute such requested amount with each Equity Sponsor contributing up to its Equity Share of the new maximum. Any contribution made in response to New England Hydro's call in excess of the maximum aggregate amount, as adjusted from time to time, may be made on a voluntary basis by any contributing Equity Sponsor, and New England Hydro will make an appropriate adjustment in Equity Shares.

B. During the term of this Agreement, New England Hydro has the option from time to time to call for contribution of equity in any of the following forms:

(1) New England Hydro may offer shares of its common stock to its Equity Sponsors and each Equity Sponsor shall subscribe for and purchase, for cash at a price set by New England Hydro, its Equity Share of the common stock so offered.

(2) After each Equity Sponsor owns common stock of New England Hydro, New England Hydro may request that capital contributions be made, and each Equity Sponsor shall contribute to New England Hydro its Equity Share of the total capital contribution so requested.

C. In order that New England Hydro may limit its equity investment to a maximum of 40% of its total capital, New England Hydro may, at its option, from time to time, take any of the following actions:

(1) New England Hydro may repurchase for cash its common stock from Equity Sponsors in amounts that will not change the relative Equity Shares among Equity Sponsors and at a price per share equal to book value per share at the time of repurchase. Each Equity Sponsor shall sell such common stock to New England Hydro in the full amount so requested.

(2) New England Hydro may return any capital contribution previously received from Equity Sponsors in amounts that will not change the relative Equity Shares among Equity Sponsors. Each Equity Sponsor shall accept such return of capital contribution in the full amount so returned.

(3) New England Hydro may pay dividends out of earnings or make liquidating dividends to the Equity Sponsors.

D. New England Hydro shall give written notice of any call for contributions of equity under B above to each Equity Sponsor. Such notice shall specify the amount to be contributed, the form of the contribution, and a date, at least thirty days after the date of the notice, that the equity is to be contributed. New England Hydro will provide annually estimates of its equity requirements and estimated dates when any equity contributions hereunder will be due. New England Hydro shall give written notice of any action to reduce its equity under C above to each Equity Sponsor. Such notice shall specify the amount and form of the reduction and a date, at least fifteen days after the date of the notice, that the reduction in equity is to occur.

E. New England Hydro shall use the proceeds of any equity contribution under this Agreement for the sole purpose of meeting its capital requirements under the Massachusetts HVDC Support Agreement.

F. All transactions under B, up to a maximum aggregate amount of \$140 million, and under C above shall be subject to receipt of all necessary regulatory approvals, and New England Hydro and the Equity Sponsors shall use their best efforts to obtain, or to assist in obtaining, these approvals in advance of the Effective Date.

G. New England Hydro shall have two classes of common stock, both of which will have the same preferences, qualifications, special or relative rights or privileges, except that only one class shall have voting powers. Equity Shares allocated to NEES shall be evidenced by voting common stock. The Equity Shares allocated to each other Equity Sponsor shall, at the option of such Equity Sponsor, be evidenced by shares of voting common stock or non-voting common stock. Any reallocation of Equity Shares pursuant to Section 5 hereof shall be effected in such manner as to involve the issuance of additional common stock to each Equity Sponsor of the class then held by such Sponsor. Such election to take voting or non-voting stock shall be made in writing to New England Hydro by December 31, 1985.

H. Notwithstanding any provision of this Agreement to the contrary, prior to the date that New England Hydro first calls for equity contributions from all Equity Sponsors, all equity of New England Hydro will be owned and contributed by NEES.

Section 8. Cash Deficiency Guarantee

A. The Massachusetts HVDC Support Agreement provides that, if New England Hydro has, on any Due Date, a Cash Deficiency attributed to a Participant, the Participant absolutely and unconditionally guarantees to pay its Cash Deficiency on demand of Lenders. (The commitment is made in section 19 of that Agreement.) To provide further credit support to New England Hydro, each Equity Sponsor absolutely and unconditionally guarantees to pay its then Equity share of the Cash Deficiency attributed to any Credit Enhanced Participant (as defined in the Massachusetts HVDC Support Agreement) with respect to any third party debt financing of New England Hydro that was credit enhanced for such Participant, with such amounts to be paid directly on demand to Lenders, in cash, if for any reason a Credit Enhanced Participant fails to pay when due its Cash Deficiency on demand of Lenders. Each Equity Sponsor agrees that its obligations under this Section shall be continuing, absolute, and unconditional and without the benefit of any defense, claim, set-off, recoupment, abatement, or other right, existing or future, which an Equity Sponsor may have against the Lenders, New England Hydro, or any other person, and shall remain in full force and effect until all of the obligations of New England Hydro to the Lenders have been discharged.

Each Equity Sponsor hereby waives diligence, presentment, demand of payment, filing of claims with a court in the event of merger or bankruptcy of any Lender or New England Hydro or any other Equity Sponsor, protest or notice with respect to this guarantee, and covenants that the obligations contained in this guarantee will not be discharged except by complete performance of the obligations of New England Hydro to the Lenders.

B. Notwithstanding any other provision contained herein, each Equity Sponsor's obligations under this Section 8 shall be limited to its Equity Share of the Cash Deficiency attributed to any Credit Enhanced Participant with respect to any financing of any New England Hydro that was credit enhanced for such Participant.

C. In no event shall the several guarantees of the Equity Sponsors attributable to Credit Enhanced Participants for each debt financing of New England Hydro exceed in the aggregate 35% of the aggregate amount of the obligations relating to such financing, provided that Equity Sponsors having an aggregate of at least 80% of the Equity Shares may agree to exceed such 35% maximum and subject to receipt of any necessary regulatory approvals, such agreement shall be binding on all Equity Sponsors.

D. In no event shall Equity Sponsors be required to provide guarantees for a Participant with respect to a particular third party debt financing of New England Hydro if that would result in Credit Enhanced Participants with respect to that and all other outstanding financings of New England Hydro and New Hampshire Hydro having Participating Shares exceeding 35% under the Massachusetts HVDC Support Agreement, provided that Equity Sponsors having an aggregate of at least 80% of the Equity Shares may agree to exceed such 35% maximum and subject to receipt of any necessary regulatory approvals, such agreement shall be binding on all Equity Sponsors.

E. Each Equity Sponsor shall use its best efforts to obtain and assist others in obtaining all necessary regulatory approvals

required for the several guarantees made in this Section.

Section 9. Acceptance of Participating Shares

A. In accordance with section 15 of the Massachusetts HVDC Support Agreement, if a Participant that is a Credit Enhanced Participant is terminated by New England Hydro as a Participant, each Equity Sponsor or its appointee shall be allocated by New England Hydro its then Equity Share of the Participating Share of such terminated Participant; such allocation to be made as of the date of such termination. Each Equity Sponsor or its appointee shall accept such allocation from New England Hydro and shall unconditionally and absolutely assume the rights and obligations associated therewith from the date of such allocation. If a Participant that was not also a Credit Enhanced Participant is terminated, then acceptance of any allocation shall be voluntary by any Equity Sponsor or its appointee and shall be in accordance with New England Hydro's offer thereof. If required by New England Hydro, any Equity Sponsor or its appointee assuming rights and obligations under the Massachusetts HVDC Support Agreement shall execute and deliver any documents necessary to effectuate such assumption. If any Equity Sponsor that is the designee of a Participant is unable to deliver these documents to effectuate the assumption, such Equity Sponsor shall take all actions necessary for the Participant that so designated it as an Equity Sponsor to assume such rights and obligations as its appointee.

The appointee of NEES shall be New England Power Company. The appointee(s) of any other Equity Sponsor shall be the Participant(s) for which such Equity Sponsor was acting as a designee. Each Equity Sponsor agrees that if its appointee is allocated a Participating Share under the Massachusetts HVDC Support Agreement, such Equity sponsor shall also allocate to it an equal participating share and support share under the New Hampshire HVDC Support Agreement and New England Power and Boston Edison AC Support Agreements, respectively.

B. Each Equity Sponsor shall use its best efforts to obtain and assist others in obtaining all necessary regulatory approvals required for performance of its or its appointee's commitments made in this Section.

Section 10. Commitments under the AC Support Agreements

A. In accordance with sections 4 of the New England Power and Boston Edison AC Support Agreements, if a Credit Enhanced Supporter thereunder is terminated, each Equity Sponsor or its appointee shall be allocated its then Equity Share of the Support Share of such terminated Supporter; such allocation to be made as of the date of such termination. Each Equity Sponsor or its appointee shall accept such allocation made by New England Power and Boston Edison and shall unconditionally and absolutely assume the rights and obligations associated therewith from the date of such allocation. If a Supporter under the AC Support Agreements which is not also a Credit Enhanced Supporter is terminated, then acceptance of any allocation shall be voluntary by any Equity Sponsor or its appointee and shall be made in accordance with New England Power's and Boston Edison's offer thereof. If required by New England Power or Boston Edison, any Equity Sponsor or its appointee assuming rights and obligations under the AC Support Agreements shall execute and deliver any documents necessary to effectuate such assumption. If any Equity Sponsor that is a

designee of a Participant is unable to deliver these documents to effectuate the assumption, such Equity Sponsor shall take all actions necessary for the Participant that so designated it as an Equity Sponsor to assume such rights and obligation as its appointee.

The appointee of NEES shall be New England Power Company. The appointee(s) of any other Equity Sponsor shall be the Supporter for which such Equity Sponsor was acting as a designee. Each Equity Sponsor agrees that if its appointee is allocated a Support Share under the New England Power and Boston Edison AC Support Agreements, such Equity Sponsor shall also allocate to it an equal participating share under the New Hampshire HVDC Support Agreement and Massachusetts HVDC Support Agreement, respectively.

B. Recognizing the need to provide additional financial security to induce New England Power, Boston Edison, and the Supporters to undertake the substantial obligations of these AC Support Agreements, each Equity Sponsor agrees that it shall absolutely and unconditionally pay (or cause its appointee to pay), promptly upon request and in addition to any Support Share payment, its then Equity Share of any unpaid amounts attributed to a Credit Enhanced Supporter as specified in, and in accordance with, sections 14 of these AC Support Agreements (excluding any amounts due pursuant to sections 17 and 18 thereof).

C. Each Equity Sponsor shall use its best efforts to obtain and assist others in obtaining all necessary regulatory approvals required for performance of its commitments made in this Section.

#### Section 11. Character of Payment Obligations

The obligations of each Equity Sponsor to make payments hereunder, and to perform and observe all other agreements on its part contained herein, are absolute and unconditional and shall not be affected by any circumstances, including, without limitation, (i) any insolvency, composition, bankruptcy, reorganization, arrangement, liquidation or similar proceedings relating to New England Hydro, New England Power Company, Boston Edison Company, the Equity Sponsor, any other Equity Sponsor, or any affiliate thereof, (ii) any invalidity or unenforceability or disaffirmance by New England Hydro or any Equity Sponsor of any provision of this Agreement or any failure, omission, delay, or inability of New England Hydro to perform any of its obligations contained herein, (iii) any amendment, extension, or other change of, or any assignment or encumbrance of any rights or obligations under, this Agreement, or any waiver or other action or inaction, or any exercise or nonexercise of any right or remedy, under or in respect to this Agreement, or (iv) any inability of the Equity Sponsor or any other Equity Sponsor to obtain regulatory approvals for financing its Equity Share of any obligations under this Agreement, it being the intention of the parties hereto that all amounts payable by each Equity Sponsor in respect of this Agreement shall begin to be payable and shall continue to be payable in all events in the manner and at the time herein provided. In that connection, each Equity Sponsor hereby waives, to the extent permitted by applicable law, any and all rights which it may now have or which may at any time hereafter be conferred upon it, by statute or otherwise, to terminate, cancel, or surrender any of its obligations under this Agreement.

#### Section 12. Default

A. Any of the following events (Events of Default) that occur and are continuing are Events of Default:

(i) An Equity Sponsors shall fail to pay to New England Hydro when due any amount which it has agreed to pay under any provision of this Agreement, and such failure shall continue for more than 15 days after written notice thereof has been given to such Equity Sponsor by New England Hydro; or

(ii) Any Equity Sponsor shall fail to supply in accordance with the terms hereof any documentation required by New England Hydro in connection with financing with Lenders by New England Hydro (for VELCO and MMWEC, this includes documentation for their respective contracting electric systems), and such failure shall continue for more than 30 days after written notice of such failure has been given to such Equity Sponsor by New England Hydro; or

(iii) An Equity Sponsor shall fail to perform any other obligation under this Agreement in accordance with the terms hereof, and such failure shall continue for more than 30 days after written notice thereof has been given to such Equity Sponsor or any of its affiliates by New England Hydro.

(iv) Any Equity Sponsor shall experience an event of default under the Equity Funding Agreement for New Hampshire Hydro.

B. If an Event of Default under Section 12A(i) above shall have occurred, New England Hydro may, by written notice to each Equity Sponsor, request that the nondefaulting Equity Sponsors on a voluntary basis make the overdue payment to New England Hydro, provided that similar voluntary payments are made under the Equity Funding Agreement for New Hampshire Hydro.

C. New England Hydro or any Equity Sponsor shall be free to invoke such remedies at law or in equity as may be deemed appropriate against any Equity Sponsor that defaults under this Agreement.

### Section 13. Restrictions on Transfer of Common Stock

Each Equity Sponsor agrees that it will not transfer any or all of its common stock of New England Hydro to any other person unless such person is an Equity Sponsor or meets the requirements for being an Equity Sponsor under sections 4B or 4C hereof as of the date of such transfer and a similar transfer is made under the Equity Funding Agreement for New Hampshire Hydro.

### Section 14. Dividends on Common Stock

Any Equity Sponsor may direct New England Hydro to withhold the payment of a dividend to such Equity Sponsor and apply such dividend to reduce the current or the next Support Charge payment required to be made under the Massachusetts HVDC Support Agreement by such Equity Sponsor or its appointee.

### Section 15. Restrictions on Dividends, Return of Capital and Repurchase of Common Stock

Any Equity Sponsor which is in default hereunder pursuant to Section 12 is not entitled to receive any amounts from New England Hydro representing such Equity Sponsor's then Equity Share of dividends, return of capital, or proceeds from any repurchase of common stock until all amounts (including interest thereon at an annual rate equal to two percent over the current interest rate on

prime commercial loans from time to time in effect at the principal office of the First National Bank of Boston) owed by such Equity Sponsor to New England Hydro have been paid.

Section 16. Certain Actions of New England Hydro

A. New England Hydro shall not take any of the following actions without prior written approval of Equity Sponsors having at that time at least 80% of the Equity Shares:

- (i) Amend New England Hydro's articles of organization or by-laws to adversely affect the rights of the Equity Sponsors as stockholders in a material manner under the Basic Agreements, unless such amendment is required by regulation or law; and
- (ii) Merge, consolidate, or sell all or substantially all of the assets of New England Hydro not otherwise permitted by the Massachusetts HVDC Support Agreement.

B. New England Hydro shall distribute in a timely manner to each Equity Sponsor copies of (a) its annual audited financial statements, (b) notices of all of its directors' and stockholders' meetings (including any committees thereof), and (c) minutes of all of its directors' and stockholders' meetings.

Section 17. Miscellaneous

A. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of, and may be performed by, the successors and assigns of the parties and shall also be binding, insofar as permitted by law, on any receiver or trustee in bankruptcy, receivership, or reorganization of any party. No assignment of this Agreement shall operate to relieve the assignor of its obligations under this Agreement without the written consent of the parties hereto. Written notice to all parties will be given prior to any assignment hereunder.

Notwithstanding the above, New England Hydro may collaterally assign this Agreement without the consent of the Equity Sponsors in connection with a third party financing by New England Hydro.

B. Right of Setoff. No Equity Sponsor shall be entitled to set off against the payments required to be made by it hereunder (1) any amounts owed to it by New England Hydro, any affiliate of New England Hydro, or any other Equity Sponsor, or (2) the amount of any claim by it against New England Hydro, any affiliate of New England Hydro, or any other Equity Sponsor. However, the foregoing shall not affect in any other way any Equity Sponsor's rights and remedies with respect to any such amounts owed to it by New England Hydro, any affiliate of New England Hydro, or any other Equity Sponsor or any such claim by it against New England Hydro or any other Equity Sponsor.

C. Amendments. Any amendments changing the Equity Shares of the Equity Sponsors or the several nature of the obligations and rights of the Equity Sponsors hereunder as specified in Section 6, shall require consent by all parties. In the event that an Equity Sponsor is obligated to acquire Equity Shares hereunder and does not pay for such Shares, then such Shares will not be

issued to him and such Equity Sponsor's Equity Share will be reduced accordingly. All other amendments to this Agreement shall be by mutual agreement of New England Hydro and Equity Sponsors owning Equity Shares aggregating at least 80%, evidenced by a written amendment signed by New England Hydro and such Equity Sponsors; and New England Hydro and all Equity Sponsors shall be bound by any such amendment.

D. Notices. Except as the parties may otherwise agree, any notice, request, bill, or other communication relating to this Agreement, or the rights, obligations or performance of the parties hereunder, shall be in writing and shall be considered as duly delivered when delivered in person or mailed by registered or certified mail, postage prepaid, to the respective post office address of the other parties shown following the signatures of such other parties hereto, or such other address as may be designated by written notice given as provided in this paragraph D.

E. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of The Commonwealth of Massachusetts.

F. Other.

(1) No action, regardless of form, arising out of this Agreement may be brought by any party hereto more than three years after the cause of action has arisen.

(2) In the event that any clause or provision of this Agreement, or any part thereof, shall be declared invalid or unenforceable by any court having jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of the remaining portions of this Agreement.

(3) All provisions of this Agreement providing for limitation of, or protection against, liability shall apply to the full extent permitted by law, and regardless of fault, and shall survive either termination pursuant to this Agreement or cancellation.

(4) Each party shall, upon request of another party, execute and deliver any document reasonably required to implement any provision hereof.

(5) Any number of counterparts of this Agreement may be executed and each shall have the same force and effect as the original.

(6) This Agreement, with the other Basic Agreements, Preliminary Quebec Interconnection Support Agreement - Phase II, the agreements with Hydro-Quebec regarding Phase II, and the basic agreements covering Phase I shall constitute the entire understanding among the parties and shall supersede any and all previous understandings pertaining to the subject matter of this Agreement.

(7) Terms defined in the Massachusetts HVDC Support Agreement and the New England Power and Boston Edison AC Support Agreements used in this Equity Funding Agreement shall be incorporated herein as defined in such Agreements unless the context indicates otherwise.

(8) This Agreement is the act and obligation of the parties hereto in their corporate or governmental capacity, and any claim

hereunder against any shareholder, director, officer, employee, or agent of any party, as such, is expressly waived.

IN WITNESS WHEREOF, the signatories have caused this Agreement to be executed by their duly authorized officers or agents.

New England Hydro will supply a list of Equity Sponsors as of the date of initial computation and as of each date thereafter that the list changes.

#### ATTACHMENT B

Forms of the following documentation:

1. Opinion of Counsel
2. Certificate
3. Incumbency and Signature Certificate

#### 4. Directors' Vote

[Please note - governmental entities may make appropriate modifications to these documents to reflect that they are not corporations.]

[Form of Opinion of Counsel for Each Utility Participant]

New England Hydro-Transmission  
Electric Company, Inc.;  
New England Hydro-Transmission  
Corporation; or  
New England Power Company

Gentlemen:

This opinion is furnished in connection with the execution and delivery by \_\_\_\_\_ (the Company) of the following Agreements: \_\_\_\_\_.

We have acted as counsel to the Company, one of the Utility Participants, in connection with the execution and delivery of the Basic Agreements. We participated in reviewing and/or drafting the Agreements.

As general [special] counsel to the Company, we are generally familiar with its affairs. [If special counsel is giving the opinion, describe relationship to the Company.] We have reviewed the proceedings taken by the Company in connection with its authorization, execution, and delivery of the Agreements and any documentation supplied by the Company thereunder. We have also examined executed counterparts of the Agreements, have made such other investigation, and have examined such other records and documents, and have made such examination of law and satisfied ourselves as to such other matters as we have deemed relevant and necessary in order to enable us to express the opinions set forth below.

Based upon and subject to the foregoing and to the further qualifications in this opinion, we are of the opinion that:

1. The Company is a corporation duly organized, validly existing and in good standing under the laws of [the jurisdiction of its incorporation], has the corporate power to own its assets and to transact the business in which it is engaged, and is duly qualified as a foreign corporation in, and is in good standing under the laws of, each jurisdiction in which the conduct of its business or the ownership of its assets requires such qualification.

2. The Company has (and in the case of the Agreements at the time of execution and delivery thereof, had) full corporate power, and legal right to execute, deliver and perform the Agreements, and the Company has taken all necessary corporate action to authorize the execution, delivery, and performance by it of the Agreements.

3. The execution, delivery, and performance by the Company of the Agreements do not (a) contravene the Company's [charter documents] or by-laws, (b) violate any applicable law, rule, regulation, order, writ, judgment, injunction, decree, or award known to us by which the Company is bound, (c) violate any indenture, instrument, or agreement known to us by which the Company is bound, or (d) result in or require the creation or the imposition of any lien pursuant to the provisions of any indenture, instrument, or agreement known to us by which the Company is bound.

4. No authorization, approval, consent, or other action by, and no notice to or filing with, any federal, state, or other governmental authority or regulatory body which has not been obtained or given and is not in full force and effect is required for the valid and lawful execution, delivery, and performance by the Company of the Agreements. [In this connection, to the extent it may be required by law, the approval of the Massachusetts Department of Public Utilities [Connecticut PUC, or other] has been given for the Agreements and the Company's performance thereunder by order(s) dated \_\_\_\_\_, which remains in full force and effect.]

5. The Agreements have each been duly executed and delivered by the Company and constitute the legal, valid, and binding obligations of the Company enforceable against it in accordance with their respective terms.

6. No action, suit, proceeding, or investigation at law or in equity or by or before any governmental instrumentality or other agency now pending or threatened against or affecting the Company or its property or rights which, if adversely determined, would materially impair the ability of the Company to perform its obligations under the Agreements is known to us.

Our opinion that the Agreements are enforceable, each in accordance with the terms thereof, is qualified to the extent that the enforcement of the rights and remedies created thereby is subject to bankruptcy, insolvency, reorganization, and similar laws of general application affecting the rights and remedies of creditors and secured parties, and to the further extent that the availability of the remedies of specific enforcement, injunctive relief, or any other equitable remedy is subject to the discretion of the court before which any proceeding therefor may be brought.

Very truly yours,

CERTIFICATE

I, (insert name), the Clerk (or Secretary or other principal recording officer) of (insert name of Utility Participant), a (insert state of organization) (the "Company") do hereby certify that:

(1) Attached hereto as Exhibit A is a true and correct copy of a vote duly adopted at a meeting of the Board of

Directors of the Company, duly called and held on \_\_\_\_\_, \_\_\_\_, and that such vote and the authority vested thereby have not been amended or revoked and are still in full force and effect.

(2) Attached hereto as Exhibit B is a true and correct copy of the Articles of Organization (or other charter documents) of the Company, as amended and in effect as of the date of this Certificate.

(3) Attached hereto as Exhibit C is a true and correct copy of the By-Laws of the Company, as amended and in effect as of the date of this Certificate.

(4) The persons (or person) listed on Exhibit D have been duly elected to the offices set forth adjacent to their respective names since the first day of June, 1985, and the signatures adjacent to their respective names are the genuine signatures of said officers.

IN WITNESS WHEREOF, I have placed my hand and the seal of the Company this  
\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_.

FORM OF DIRECTORS' VOTE APPROVING AGREEMENTS

VOTED: That in connection with this Company's participation in the Phase II expansion of the proposed interconnection between the New England Power Pool companies and Hydro-Quebec, the execution and delivery on behalf of this Company by \_\_\_\_\_, President, of the following agreements: (being collectively referred to in this vote as "Agreements") copies of which Agreements have been presented at this meeting, are hereby authorized, approved, ratified, and confirmed, and that the officers of this Company are further authorized severally to take any and all such further actions including the execution and delivery of such further documents, as such officers or any of them may deem necessary or appropriate in connection with the actions and documents authorized by this vote.

ATTACHMENT C

Subscription Process for Determining  
Equity Shares under Section 5(B)

After allocation of 51% of the Equity Shares to NEES pursuant to Section 5(B)(1), the Equity Shares shall be allocated to Equity sponsors other than NEES as follows:

- (a) Each other Equity Sponsor shall be entitled to a pro rata share of the remainder based on the Participating Share of such Equity Sponsor or the Participant(s) that has designated it as an Equity Sponsor as a percentage of Participating Shares of all other Equity Sponsors or such Participants as shown in the New Hampshire HVDC Support Agreement. For the purpose of this calculation, the Participating Share of each Equity Sponsor designated by VELCO shall be deemed to be a pro rata share of VELCO's Participating Share based on the ratio of such Equity Sponsor's 1980 kwh load to the aggregate 1980 kwh load of all Equity Sponsors designated by VELCO.
- (b) Upon execution of this Agreement, each other Equity Sponsor may subscribe for more or less than its share under (a) above.
- (c) Upon execution of this Agreement, each other Equity Sponsor may specify a maximum limit on its share of such remainder that would apply to any allocations made on or before June 1, 1986 or such later deadline date as is fixed pursuant to Section 2 hereof.
- (d) If there are no undersubscriptions or oversubscriptions under (b) above or if the sum of the shares under (a) or (b) above for all Equity Sponsors equals 100% of such remaining shares, then each Equity Sponsor shall have a share as determined under (a) or (b) above. (For the purposes of this attachment, oversubscription shall mean, with respect to any Equity Sponsor, a subscription under (b) above of more than its share under (a) above. For the same purposes, undersubscription shall mean, with respect to any Equity Sponsor, a subscription under (b) above of less than its share under (a) above. The amount of such oversubscription shall be equal to (b) minus (a) and the amount of such undersubscription shall be equal to (a) minus (b).)
- (e) If there are undersubscriptions but not oversubscriptions or if there are oversubscriptions but no undersubscriptions, then each Equity Sponsor shall have a share as determined under (a) above; provided, however, that no Equity Sponsor shall be allocated more than its specified limit under (c) above. If the sum of all shares heretofore allocated is less than 100%, any remaining share shall be allocated to all Equity Sponsors that have received shares less than their limits under (c) above, pro rata by the difference between their limits under (c) above and their shares as heretofore allocated.
- (f) If the net result of subtracting the aggregate amount of all undersubscriptions from the aggregate amount of all oversubscriptions is greater than zero, the aggregate amount of all oversubscriptions must be reduced to the aggregate amount of all undersubscriptions. This amount shall be referred to as the total permitted amount of oversubscriptions. Each oversubscriber shall initially be allocated a share of the total permitted amount of oversubscriptions (pro rata by the Participating Shares of the oversubscribers or their designators as shown in the New Hampshire HVDC Support Agreement); provided that no oversubscriber shall be allocated more than its requested amount under (b) above. Any remaining unallocated portion of the total permitted amount of oversubscriptions shall be allocated to all oversubscribers that have not yet reached their requested amount under (b) above pro rata by the differences between their requested shares under (b) above and their shares as heretofore allocated.

- (g) If the net result of subtracting the aggregate amount of all oversubscriptions from the aggregate amount of all undersubscriptions is greater than zero, the aggregate amount of all undersubscriptions must be reduced to the aggregate amount of all oversubscriptions. This amount shall be referred to as the total permitted amount of undersubscriptions. The total permitted amount of undersubscriptions shall be allocated to the undersubscribers pro rata by the amounts of their undersubscriptions; provided, however, that no Equity Sponsor shall be allocated more than its specified limit under (c) above. If the sum of all shares heretofore allocated is less than 100%, any remaining share shall be allocated to all Equity Sponsors that have received shares less than their limits under (c) above, pro rata by the difference between their limits under (c) above and their shares as heretofore allocated.
- (h) If Equity Shares are required to be changed pursuant to subpart (i) or (ii) of Section 5(a), this reallocation shall be accomplished in accordance with this Attachment G on the basis of the subscriptions initially made under (b) and the maximum limits specified under (c) by each continuing Equity Sponsor, and giving effect to the termination of any Equity Sponsor pursuant to said subpart (i) or (ii).

CONFORMED

AMENDMENT NO. 1  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of May 1, 1986, is between New England Hydro-Transmission Corporation (New Hampshire Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985 (the "New Hampshire DC Support Agreement"), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Attachments A and F of the New Hampshire DC Support Agreement are hereby deleted and replaced with the Attachments A and F attached hereto.
3. This Amendment shall become binding upon New England Hydro and the Participants-when it has been executed by New England Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

Town of Peabody Municipal Light Plant	245,010,000 (f)
Town of Holden Municipal Light Department	63,676,000 (f)
Hudson Light and Power Department	127,808,000 (f)
Town of Middleborough Gas and Electric Department	92,081,000 (f)
Town of Braintree Electric Light Department	267,289,000 (f)
Town of Hingham Municipal Lighting Plant	103,929,000 (f)
Town of Boylston Municipal Light Department	17,324,000 (f)
Town of North Attleborough Electric Department	93,816,000 (f)
Town of Wakefield Municipal Lighting Department	107,609,000 (f)

City of Westfield Gas & Electric Light Department	219,026,000 (f)
Town of Danvers Electric Department	206,806,000 (f)
Town of West Boylston Municipal Lighting Plant	43,974,000 (f)
City of Holyoke Gas & Electric Light Department	214,448,000 (f)
Town of Reading Municipal Light Department	401,795,000 (f)
Town of Concord Municipal Light Plant	0 (c), (f)
Town of Groton Electric Light Department	22,908,000 (f)
Princeton Municipal Light Department	7,130,000 (f)
Town of Shrewsbury Electric Light Department	146,303,000 (f)
Town of Sterling Municipal Electric Department	24,510,000 (f)
Town of South Hadley	99,981,000 (f)

(a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.

(b) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.

(c) (1) Concord Municipal Light Plant has elected to be a direct signatory to this Agreement. However, if it does not receive required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required, Concord will be grouped with MMWEC. (2) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, either Concord or MMWEC, whichever is appropriate, shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.

(d) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.

(e) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

(f) The amount shown for any of these municipal utilities will be added to MMWEC's amount if such municipal (i) does not receive the required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required by this Agreement, and (ii) elects at that time to be grouped with MMWEC.

5/29/86

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New Hampshire Hydro's ability to finance the project. As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing, is required to be paid by each Credit Enhanced Participant which has its credit enhanced for such debt financing. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An "investment grade" Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An "investment grade" Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.4%) or less and which has outstanding junior long-term debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if

no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.)’ “Qualified debt ratings” are defined as a minimum rating-of Baa3 by Moody’s Investors Service, BBB- by Standard & Poor’s Corporation and D&P 10 by Duff & Phelps, Inc.

Any “substitute credit enhancement” shall mean, with respect to any New Hampshire Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of “AA” or better in form and substance Satisfactory to New Hampshire Hydro or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New Hampshire Hydro, or (iii) a guarantee in form and substance satisfactory to New Hampshire Hydro from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II Massachusetts Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant’s share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported under such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant’s Participating Share of the maximum amount of obligations under such New Hampshire Hydro debt financing plus, if not already provided in connection with any other debt financing of New v Hydro or New Hampshire Hydro, that Participant’s Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant’s Participating Share of the debt obligations of Boston Edison Company and New England Power Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively, of the amounts included therein for covering such debt obligations.

The Credit Enhancement Charge (E) for each Participant that has its credit enhanced is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

F = the Credit Enhancement Charge for each New England Hydro debt financing that is credit enhanced for the Participant.

i = a number from 1 to n representing each of New Hampshire Hydro debt financings.

n = total number of such financings.

G = the Participant’s Participating Share (in percent)

H = the maximum outstanding amount of New Hampshire Hydro debt during the month which was credit enhanced for such Participant

I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

<u>Participant's Debt Rating*</u>	<u>I(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing.

J = an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal O and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New Hampshire Hydro's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes.

CONFORMED

AMENDMENT NO.2  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of February 1, 1987, is between New England Hydro-Transmission Corporation (New Hampshire Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986 (the "New Hampshire DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Attachment D of the New Hampshire DC Support Agreement is hereby deleted and replaced with the following

Attachment D:

“ATTACHMENT D

1. “Return on Equity” shall be the return on equity on file with the FERC and in effect under the Federal Power Act. Any filing of a return on equity by New Hampshire Hydro shall be subject to Section 2 of this Attachment D or, if Section 2 is not accepted by the FERC, then any such filing shall be subject to Section 3 of this Attachment D.

2. New Hampshire Hydro shall request from the FERC a rate of return on equity determined by the applicable formula in Section 4 of this Attachment D. In February of each year following the initial filing of this Agreement with the FERC, New Hampshire Hydro shall file with the FERC a revised Exhibit 1 to this Attachment D, reflecting a new “Y” for the initial formula in Section 4, below. The value of “Y” shall be added to the fixed 1.9% value of “P”, which represents a levelized premium over the life of the project to reflect the unique risks of the project in addition to the risks encountered by a typical utility. New Hampshire Hydro shall request that the revised Exhibit 1 be made effective on February 1, of the calendar year in which the filing is made, without suspension. Each Participant agrees not to intervene in opposition to a change in “Y” filed by New Hampshire Hydro in accordance with this Section 2.

3. If Section 2 of this Attachment D is not accepted by the FERC, New Hampshire Hydro shall from time to time request from the FERC a specific rate of return on equity. Each Participant agrees not to intervene in opposition to a request for a rate of return on equity filed by New Hampshire Hydro on or before the tenth anniversary of the Date of Full Support Payment if such rate is equal to or lower than the rate that would have been determined under the applicable provision of such Section 4. Nothing in this Section 3 shall affect (i) the right of New Hampshire Hydro to request a rate of return on equity greater than that determined in accordance with such Section 4, or (ii) the right of any Participant to intervene in opposition to any such request.

4. The formula for the rate of return on equity referred to in Section 2 or Section 3 of this Attachment D, whichever is accepted by the FERC, shall be as follows:

$$R = Y + P$$

where:

R = the requested return on equity;

Y = the FERC generic return on equity in effect for filings made as of the date of the filing as set out in Exhibit 1 to this Attachment D;

P = 1.9, which represents a levelized premium to adjust the FERC generic return-for the unique risks of the project in addition to the risks encountered by a typical utility.

The following is a sample calculation of the Return on Equity as of February through April 1987:

$$R = 11.2 + 1.9 - 13.1\%$$

Application of this formula at this time thus yields an initial Return on Equity of 13.1%.

In the event that the FERC generic return on equity is no longer published for rate making purposes, then the following formula shall be used to determine "Y" in the above formula:

$$Y = A + B + C + D$$

where:

(i) A = Weighted average return on the average of three money market indicators

$$A = \frac{.25(E + F + G) + .75(H + I + J)}{3}$$

where:

E = The most recently available yield to maturity for Moody's "A" rated Public Utility Bonds.

F = The most recently available yield for 10 year Constant Maturity Treasury Bonds.

G = The most recently released figure for the annualized increase in the United States GNP price deflator.

H = The average yield to maturity for the most recently available 36 month period for Moody's "A" rated Public Utility Bonds4,,

I = The average yield for 10 year Constant Maturity Treasury Bonds for the most recently available 36 month period.

J = The average of the annualized percentage increases in the United States GNP price deflator for the most recent 36 month period.

(ii) B = The average equity premium required for utility stocks over the past 20 years.

$$B = K - \frac{L + M + N}{3}$$

where:

- K = the average for the most recent 20 years of the sum of (i) the average annual yield for Moody's Electric Utility Common Stock, plus (ii) the ten year growth in dividends per share for such group of electric utilities.
- L = the average for the most recent 20 years of yields to maturity for Moody's "A" rated Utility Bonds.
- M = The average for the most recent 20 years of the yield on en year constant maturity treasury bonds.
- N = The average for the most recent 20 years of the average annual percentage change in the United States GNP price deflator.

(iii) C = issuance cost for common equity

C = .05(A + B)

(iv) D = a dilution allowance to compensate the Equity Sponsors of New England Hydro for sale of common shares at a market price below book value

D = a percentage from 0 to 1 determined on a straight tine basis where 1 represents the weighted average of the common shares of the Equity Sponsors of New Hampshire Hydro selling at 30% below book and 0 represents those shares selling at book value. Such weighted average shall be calculated by weighting the market to book ratio of each Equity Sponsor by its respective equity ownership share in New Hampshire Hydro. This percentage shall be calculated semiannually as of January 1 and July 1 of each year until the Transmission Facilities goes into commercial operation. Each calculation shall cover the period beginning as of January 1 in the year this Agreement is dated as of and ending as of the date of the calculation. Book value is the average month end book value during a calculation period, and market price is the average of each quarters high and low market price during calculation period. The calculation made as of January or July next preceding the date of commercial operation of the Transmission Facilities will be the percentage used thereafter until the end of the term of this Agreement.

Should any of the indices used in calculating the values of A and B be discontinued, or should the underlying basis for the calculations in any of these indices be modified, New Hampshire Hydro may substitute a substantially similar index for such discontinued or modified index.

Recognizing that this is a long-term contract and that money market conditions can drastically change over time, New Hampshire Hydro retains the option, if the above formulae produce for two consecutive months a number lower than the arithmetic average of the return on common equity approved within the last twelve months by regulatory commissions having jurisdiction over rates for each of the investor owned public electric utilities as reported in the publication "Argus Utility Scope Regulatory Service - Returns Authorized" to use such average return as the Return on Equity. In the event this publication is no longer currently available,

New Hampshire Hydro will use a substantially similar publication which is available.

#### EXHIBIT 1 TO ATTACHMENT D

In determining the Return on Equity in accordance with the formula set out in Section 4 of Attachment D, the value of “Y” shall be \_\_\_\_\_. Applying this value of “Y” in the formula and adding it to the fixed 1.9% value of “P”, which represents a levelized premium over the life of the project, yields a Return on Equity of \_\_\_\_\_%.”

3. Section 6 is hereby amended by inserting in item (ix) of the second paragraph thereof after the words “debt financing” the following:

“or any other financial arrangements”

4. Section 12 of the New Hampshire DC Support Agreement is hereby amended by deleting the seventh paragraph thereof and substituting the following:

“Return on Equity’ shall be determined in accordance with Attachment D.”

5. Section 12 of the New Hampshire DC Support Agreement is hereby amended by adding the following sentence to the end of the fourth paragraph thereof:

“The allowance for state and federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.”

6. This Amendment shall become binding upon New Hampshire Hydro and the Participants when it has been executed by New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.

7. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED

AMENDMENT NO. 3  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of June 1, 1987, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1 dated as of May 1, 1986, and Amendment No. 2, dated as of February 1, 1987, (the "Massachusetts DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings there provided.
2. Attachment D of the Massachusetts DC Support Agreement is hereby revised by deleting the last sentence of paragraph 2 thereof and by deleting the second and third sentences of paragraph 3 thereof.
3. This Amendment shall become binding upon New England Hydro and the Participants when it has been executed by New England Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED

AMENDMENT NO. 4  
TO  
PHASE II MASSACHUSETTS TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of September 1, 1987, is between New England Hydro—Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1 dated as of May 1, 1966, Amendment No. 2, dated as of February 1, 1987, and Amendment No. 3, dated as of June 1, 1987, (the “Massachusetts DC Support Agreement”), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings there provided.
2. Section 1 is hereby amended by adding the following clause to the end of the last sentence of the thirteenth paragraph thereof:

“; provided, however, that New England Hydro shall be under no obligation to so limit its equity investment in the event that, after the Date of Full Support Payment (as defined in Section 13) the term of its debt financing or other financing arrangements is less than ten years”.

3. Section 12 is hereby deleted and replaced with the following Section 12.

Section 12. Support Charge

Commencing in the month of the Date of Full Support Payment (as defined in Section 13) and in each month thereafter, each Participant shall pay in accordance with Section 13 its Participating Share of a monthly Support Charge in an amount determined in accordance with this Section 12, plus a credit enhancement charge calculated in accordance with Attachment F. The Support Charge shall be equal to New England Hydro’s total cost of service related to the

Transmission Facilities for such month.

The “total cost of service related to the Transmission Facilities” for any month commencing with the month in which the Date of Full Support Payment occurs shall be the sum of (a) New England Hydro’s operating expenses for such month with respect to the Transmission Facilities, plus (b) an amount equal to one-twelfth of the composite percentage for such month times the average net rate base for the Transmission Facilities, less (c) investment earnings of the Debt Service Fund, as defined in Section 18, realized by New England Hydro, less (d) any other income received by New England Hydro resulting from costs or rate base supported by the Participants other than income received pursuant to (a), (b), or (c) above or Credit Enhancement Charges and other income allocated to Equity Sponsors elsewhere under this Agreement. If a Support Charge payment under Section 13 is to be calculated from a date other than the first day of a month, an appropriate proration of the amount determined in (b) above shall be made for such payment only.

“Uniform System” shall mean the appropriate Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC) for Public Utilities and Licensees, as from time to time in effect.

New England Hydro’s “operating expenses” shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto. in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the purpose of calculating such depreciation or amortization, will not exceed the amount of cost of removal) over the shorter of: (i) the estimated remaining useful life of the Transmission Facilities as determined by New England Hydro or (ii) the term of New England Hydro’s debt financings or other financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules, unless the term of such financing or other financing arrangements is less\* than ten years in which case such term shall, for purposes of this subpart (ii), be deemed to be ten years from the Date of Full Support Payment; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value. In addition, each Participant will pay to New England Power Company, for the benefit of its customers, such Participant’s Participating Share of a monthly charge of \$49,000 to compensate New England Power for the lost capacity on its Massachusetts right-of-way, provided however that no such charge shall be paid during such time as construction or

operation is suspended on account of a defect in title for such rights-of-way. The allowance for state and Federal income taxes included in operating expenses shall reflect the normalization of timing differences and the flow through of permanent differences between book income and tax income. New England Hydro as the tax owner of the Transmission Facilities, will be entitled to the benefits and subject to the burdens of such ownership for tax purposes. The allowance for state and Federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.

The “investment in the Transmission Facilities” shall be the aggregate amount incurred at any time either before or after commercial operation of the Transmission Facilities which relates to the Transmission Facilities and is properly chargeable to New England Hydro’s utility plant accounts in accordance with the Uniform System. The investment in the Transmission Facilities shall also include operating expenses incurred prior to the month in which the Date of Full Support Payment occurs and an allowance for funds used during the period prior to the Date of Full Support Payment (AFDC) accrued on the investment in the Transmission Facilities. The AFDC rate shall be calculated pursuant to the last FERC approved AFDC formula including in construction work in progress all investment in the Transmission Facilities prior to the Date of Full Support Payment and using 14 percent as the return on equity for such calculation.

“Composite percentage” shall be computed as of the last day of each month (the “computation date”). “Composite percentage” as of a computation date shall be the sum of (i) Return on Equity then in effect multiplied by the percentage which equity investment as of such date is of the total capital as of such date; plus (ii) the average monthly effective interest rate per annum of each principal amount of indebtedness outstanding on such date for money borrowed, whether long term or short term, multiplied by the percentage which each such principal amount is of total capital as of such date. The effective interest rate shall take into account premiums, discounts, fees, and other costs that are related to the indebtedness.

“Return on Equity” shall be the return on equity on file with the FERC and in effect under The Federal Power Act.

“Equity investment” as of any date shall consist of the sum of (i) all amounts theretofore paid to New England Hydro for all capital stock theretofore issued, plus all capital contributions, less the sum of any amounts paid by New England Hydro in the form of stock retirements, repurchases or redemptions or return of capital including liquidating dividends; plus (ii) any credit balance in the capital surplus account not included in (1) and any credit balance in the earned surplus (retained earnings) account on the books of New England Hydro as of such date.

“Total capital” as of any date shall be the equity investment plus the total of all indebtedness then outstanding for money borrowed.

From the Date of Full Support Payment until the first to occur of June 30 or December 31 thereafter, the “average net rate base” for the Transmission Facilities shall be the average of the net rate base determined as of the Date of Full Support Payment and the first to occur of June 30 or December 31 thereafter. Thereafter, for subsequent months of January through June, average net rate base shall be the average of the net rate base as of the preceding December 31 and the following June 30. For other months, average net rate base shall be the average of the net rate base as of the preceding June 30 and the following December 31. The “net rate base” shall consist of (i) the investment in the Transmission Facilities, less (ii) the amount of any accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities, less (or plus) (iii) the amount of any reserve for deferred income taxes received (or paid) by New England Hydro, such deferred income taxes to include deferred income taxes due to accelerated depreciation, construction tax benefits, and any other book/tax timing differences related to the Transmission Facilities, less (iv) the amount of any unamortized investment tax credits (ITC), plus (v) such allowances related to the Transmission Facilities for materials and supplies, prepaid items and cash working capital as may from time to time be determined by New England Hydro, as reasonably necessary and in accordance with accepted utility accounting practice, plus (vi) the amounts held in the Debt Service Fund, as described in Section 18. New England Hydro shall normalize ITC over the depreciation and/or amortization period relating to the Transmission Facilities. Any allowance for cash working capital shall be limited to that not sufficiently recovered through the use of estimated billing for the current month.

[End of Section 12]

4. The Massachusetts DC Support Agreement is hereby amended by adding the following Section 21:

Section 21. Refund of Gain on Sale or Other Disposition of Transmission Facilities

In the event that any of the Transmission Facilities are sold or otherwise disposed of during the term of this Agreement, if the Net Proceeds (defined as the amount received from such sale or disposition less all costs relating to or resulting from such sale or disposition, including without limitation any income taxes relating to or resulting from such sale or disposition, any premiums and penalties incurred because of the early retirement of any indebtedness associated with the sold or disposed of Transmission Facilities, and any costs of total or partial demolition of the sold or otherwise disposed of Transmission Facilities) from such sale or disposition exceed the greater of (i) the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) or (ii) the then total capital of New England Hydro (as defined in Section 12), New England Hydro shall (a) refund to the then current Participants, in proportion to their then current Participating Shares, any such excess, and (b) credit to the accumulated

provision for depreciation and amortization related to the investment in the Transmission Facilities the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition). The total capital of New England Hydro, for the purposes of this section, may exceed .the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) due to (1) any reserve for deferred income taxes paid by New England Hydro or (2) for other reasons related to the investment in the Transmission Facilities. If the Net Proceeds do not exceed the greater of (i) or (ii) above, the Net Proceeds will be credited to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities in lieu of payment to the Participants. The Participants agree to flow through any such refunds to their customers and shall seek any necessary regulatory approvals to reflect in their rates any such refunds and the effect of any such credits to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities; except that to the extent that a Participant's customers' rates have not reflected all or a portion of that Participant's share of the costs of the Transmission Facilities, then that Participant agrees that a complete flow-through of such refunds may not be appropriate and that particular Participant shall seek any necessary regulatory approvals for the appropriate disposition of an appropriate portion of such refunded amounts or credits.

[End of Section 21]

5. Attachment D of the Massachusetts DC Support Agreement is hereby deleted.
6. Attachment F of the Massachusetts DC Support Agreement is hereby deleted and replaced with the following Attachment F:

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New England Hydro's ability to finance the project. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An "investment grade" Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An "investment grade" Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.47.) or less and which has outstanding junior long-term

debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities- of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.) “Qualified debt ratings” are defined as a minimum rating of Baa3 by Moody’s Investors Service, BBB- by Standard & Poor’s Corporation and D&P 10 by Duff & Phelps, Inc.

Any “substitute credit enhancement” shall mean, with respect to any New England Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of “AA” or better in form and substance satisfactory to New England Hydro or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New England Hydro, or (iii) a guarantee from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II Massachusetts Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant’s share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported under such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant’s Participating Share of the maximum amount of obligations under such New England Hydro debt financing plus, if not already provided in connection with any other debt financing of New England Hydro or New Hampshire Hydro, that Participant’s Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant’s Participating Share of the debt obligations of Boston Edison Company and New England Power. Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively. of the amounts included therein for covering such debt obligations.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing is required to be paid by the Participants. If a Participant is a Credit Enhanced Participant by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant will be paid by all Participants with each Participant paying its Participating Share thereof; provided, however, that if a Participant is a Credit Enhanced Participant due to lack of debt ratings, the Credit Enhancement Charge attributed to that Credit

Enhanced Participant shall be paid by such Participant.

The Credit Enhancement Charge (E) attributed to a Credit Enhanced Participant is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

F = the Credit Enhancement Charge for each New England Hydro debt financing that is credit enhanced for the Participant.

I = a number from 1 to n representing each of New England Hydro debt financings.

n = total number of such financings.

G = the Participant's Participating Share (in percent)

H = the maximum outstanding amount of New England Hydro debt during the month which was credit enhanced for such Participant

I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

<u>Participant's Debt Rating*</u>	<u>I(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing.

J+ an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New England Hydro’s AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes.

[End of Attachment F]

- 7. This Amendment shall become binding upon New England Hydro and the Participants when it has been executed by New England Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
- 8. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED'

AMENDMENT NO. 5  
TO  
PHASE II MASSACHUSETTS TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of October 1, 1987, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986, Amendment No. 2, dated as of February 1, 1987, Amendment No. 3, dated as of June 1, 1987, and Amendment No. 4, dated as of September 1, 1987, (the "Massachusetts DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings there provided.
2. Section 12 is hereby amended by deleting the first sentence of the fourth paragraph thereof and replacing it with the following sentence:

New England Hydro's "operating expenses" shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto, in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that unless the FERC, upon application by New England Hydro, authorizes a shorter depreciation and/or amortization period, for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the purpose of calculating such depreciation and/or amortization, will not exceed the amount of cost of removal) over the greater of: (i) ten years from the Date of Full Support Payment or (ii) the term of New England Hydro's permanent debt financings or other permanent financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value.

3. This Amendment shall become binding upon New England Hydro and the Participants when it has been executed by New England Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED

AMENDMENT NO. 6  
TO  
PHASE II MASSACHUSETTS TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of August 1, 1988, is between New England Hydro—Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended (the “Massachusetts DC Support Agreement”), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings therein provided.
2. Section 1 is hereby amended by deleting the first sentence of the fifteenth paragraph thereof.
3. Section 2 is hereby amended by (i) changing each reference to a “June 1, 1986” deadline to “September 15, 1988” and (ii) changing each reference to a “March 1, 1986” deadline to “September 1, 1988.”
4. Section 2 is hereby amended further by deleting, in the last paragraph thereof, the words “Section 2” and inserting in lieu thereof “Agreement.”
5. Section 4A is hereby amended by deleting the third sentence of the second paragraph thereof and inserting in lieu thereof the following:

“The initial computation of Participating Shares shall be made on the basis that each signatory to this Agreement as shown in Attachment A is a Participant. After such initial computation and before the Effective Date, each Participant shall be entitled to transfer any or all of its Participating Share to one or more other Participants. On or before September 1, 1988, any Participant listed in Attachment A who has transferred, or intends to transfer, any or all of its Participating Share to one or more other Participants listed in Attachment A must provide documentation to New England Hydro covering the transfer. The initial computation is to be recomputed on and as of the Effective Date on the basis that each signatory to this Agreement which has provided timely documentation of its participation or transfer is a Participant. Any such transfers of Participating Shares will be taken into account after such recomputation. Any such transfer of Participating Shares hereunder shall have no effect on the interests, rights, or obligations of participants in Phase I. Subsequent computations are to be made thereafter as of the first day of each month in which an interest is modified or terminated pursuant to any provision hereof.”

6. Section 4B is hereby amended by deleting, in the first sentence thereof, the word “date”.
7. Section 12 is hereby amended by inserting into the second sentence of the fourth paragraph thereof following the words “In addition, each Participant will pay to” the following:

“New England Hydro, and New England Hydro will pay to”
8. Section 14 is hereby amended by adding the following clause to the end of the first sentence thereof:

“; provided, however, that nothing in this Section 14 shall (a) prevent a Participant from transferring its interests and obligations hereunder to another Participant prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Participant with respect to this Agreement incurred or relating to the period of time after said transferring Participant’s Participating Share has been reduced to zero.”
9. Section 20F is hereby amended by inserting into the second sentence thereof following the words “the Transmission Facilities,” the following:

and (iv) for a transfer of any or all of a Participant’s Participating Share prior to the Effective Date as provided in Section 4A hereof,”
10. The first attached Schedule I is hereby deleted and replaced with the second attached Schedule I.
11. Schedule II to the Agreement is hereby deleted and replaced with the attached Schedule II.
12. Attachment A to the Agreement is hereby deleted and replaced with the attached Attachment A.
- 13 Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as

an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

- (a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.
- (b) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.
- (c) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, Concord shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.
- (d) Includes New. Hampshire retail 1980 kilowatthour load of 4,939,218,744.
- (e) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.
- (s) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

TO  
PHASE II MASSACHUSETTS TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, .dated as of January 1, 1989, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended (the "Massachusetts DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provisions of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings therein provided.
2. Section 2 is hereby amended by inserting the following at the end of the second sentence of paragraph seven thereof:

“, or except with the approval of New England Hydro and New Hampshire Hydro, as required in connection with any financing by MMWEC, the proceeds of which are to be applied exclusively by MMWEC to meet its obligations under Phase II, provided that such grant by MMWEC to its third party lenders shall be on a pari passu basis with the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company, and provided further that MMWEC shall have its third party lenders execute and deliver intercreditor agreements acceptable to the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company providing an appropriate allocation between MMWEC’s third party lenders and the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company of payments made under MMWEC’s contract with its systems and including appropriate notice provisions.”
3. This amendment shall become effective upon acceptance thereof by the Federal Energy Regulatory Commission.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

## PHASE II NEW ENGLAND POWER AC FACILITIES SUPPORT AGREEMENT

This AGREEMENT dated as of June 1, 1985, is between New England Power Company (New England Power) and the New England utilities listed in Attachment A hereto. Those New England utilities that have executed this Agreement and that meet the further conditions for participation hereunder and New England Power are hereinafter referred to as Supporters or individually as a Supporter. The Supporters, each of which is a member of the New England Power Pool (NEPOOL), are sometimes referred to collectively herein, but their rights and obligations hereunder are several and not joint as described in Section 5 hereof.

In consideration of the premises, the concurrent execution of the other Basic Agreements hereinafter referred to, the mutual covenants hereinafter and therein set forth, and other good and valuable consideration, receipt whereof is hereby acknowledged, it is hereby agreed as follows:

### Section I. Basic Understandings and Purpose

Some or all of the Supporters are participants in the existing arrangements for the Phase I interconnection planned by NEPOOL with Hydro-Quebec, which is to consist of a  $\pm$  450 kV HVDC transmission line from a terminal at the Des Cantons Substation on the Hydro-Quebec system near Sherbrooke, Quebec to a terminal having an approximate rating of 690 MW at a

-2-

substation at the Comerford Generating Station on the Connecticut River (hereinafter referred to as Phase I). The basic arrangements covering the portion of Phase I in the United States are set forth in the New England Power Pool Agreement, as amended (the NEPOOL Agreement) and three contracts among the participants in Phase I as follows:

1. Vermont Transmission Line Support Agreement, dated as of December 1, 1981, as amended, with Vermont Electric Transmission Company, Inc.
2. Phase I Terminal Facilities Support Agreement, dated as of December 1, 1981, as amended, with New England Electric Transmission Corporation, and
3. Agreement With Respect To Use Of Quebec Interconnection, dated as of December 1, 1981, as amended, including the restatement thereof in connection with Phase II (the Use Agreement).

These Phase I interconnection facilities are currently under construction with completion scheduled during 1986.

With the completion of arrangements for Phase I and the related contracts with Hydro-Quebec, the members of NEPOOL have conducted studies of the benefits of an expanded interconnection for NEPOOL with Hydro-Quebec (Phase II) and have negotiated with Hydro-Quebec a firm energy (the Phase II Firm Energy Contract) arrangement to utilize the expanded interconnection facilities. The results of these NEPOOL

studies indicate that such an expansion of the interconnection capacity will be beneficial to the New England utilities and to their respective customers.

The portion of Phase II in the United States will consist of an extension of the Phase I DC transmission line from the proposed terminus of Phase I at the Comerford Station through New Hampshire to a site in Massachusetts with additional terminal facilities installed at that site to increase the total transfer capacity between Hydro Quebec and NEPOOL from the 690 MW of Phase I to approximately 2000 MW. Reinforcements to the existing transmission system of New England Power and to certain AC facilities of Boston Edison Company will also be required. Although about 2 miles of Boston Edison's transmission line are covered under this Agreement, Boston Edison has the option to have this line covered under the Phase II Boston Edison AC Facilities Support Agreement. The United States portion of the Phase II facilities will be designated as pool-planned facilities in the same manner as the United States portion of the Phase I facilities was so designated.

Each Supporter acknowledges that it has been represented on the Executive and Planning Committees of NEPOOL that had responsibility for evaluating the feasibility of Phase II and, through this representation, actively participated in the decision of NEPOOL to go forward with Phase II. Furthermore, each Supporter, other than New England Power, represents that

it made its own independent investigations and inquiries as it deemed appropriate and did not rely upon representations (other than those contained in this Agreement and the other Basic Agreements referred to hereinafter) of New England Power or its affiliates in deciding to enter into this Agreement.

The sharing of benefits among the New England utilities associated with Phase II is set forth in the Use Agreement. The Use Agreement also permits each participating New England utility to make its own entitlement transactions with Hydro Quebec and to use the interconnection for such transactions. Each Supporter acknowledges that the benefits of participating in Phase II set forth in the Use Agreement are the fundamental consideration for its signing of this Agreement and making the significant commitments to each other Supporter specified herein.

All improvements and reinforcements to Boston Edison Company's AC transmission system are covered under the Phase II Boston Edison AC Facilities Support Agreement.

The provisions of this Agreement cover all improvements and reinforcements to New England Power's AC transmission system in Massachusetts necessitated by Phase II as described in more detail in Attachment B hereto (the AC Facilities).

The provisions of the Phase II Massachusetts Transmission Facilities Support Agreement cover the Phase II Massachusetts HVDC transmission line and terminal facilities in

Massachusetts. New England Hydro-Transmission Electric Company, Inc. (New England Hydro), an affiliate of New England Power, will build, own, operate, and maintain those Massachusetts HVDC transmission facilities.

The portion of the Phase II HVDC transmission line to be constructed in New Hampshire is covered under the Phase II New Hampshire Transmission Facilities Support Agreement. New England Hydro-Transmission Corporation (New

Hampshire Hydro), an affiliate of New England Power, will build, own, operate, and maintain those New Hampshire HVDC transmission facilities.

In view of the need to formalize the agreements among the parties at an early date so that (i) binding commitments with Hydro Quebec for Phase II may be made, (ii) binding commitments for ultimate construction and the financing of the United States portion of Phase II may be undertaken consistent with the time schedule anticipated by NEPOOL and with the assurance that commitments among the New England utilities are in place and (iii) licensing activities may proceed on a schedule that enables completion of such construction consistent with the time schedule anticipated by NEPOOL, the following agreements are concurrently being entered into (the "Basic Agreements") which collectively set forth rights and obligations with respect to the foregoing undertaking: (1) this Agreement; (2) the Phase II Massachusetts Transmission Facilities Support Agreement; (3) an Equity Funding Agreement for New England

-6-

Hydro; (4) the Phase II New Hampshire Transmission Facilities Support Agreement; (5) an Equity Funding Agreement for New Hampshire Hydro; (6) an amendment of the Use Agreement, setting forth the rights of the Participants in the benefits of Phase II; (7) various amendments to the NEPOOL Agreement relating to the sharing of savings, capability responsibilities, and transmission arrangements; and (8) the Phase II Boston Edison AC Facilities Support Agreement.

In order to coordinate each Supporter's participation in Phase II to the fullest extent possible, each Supporter acknowledges that it is to have the same participating interest under each of these Agreements: this Agreement, the Phase II New Hampshire Transmission Facilities Support Agreement, the Phase II Massachusetts Transmission Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, and the Use Agreement. Each Supporter acknowledges that these Basic Agreements have been drafted with the overriding intent to so coordinate participating interests and that, notwithstanding any provision thereof that may be interpreted to the contrary, the proper interpretation of each of these Basic Agreements is to be consistent with such overriding intent. The Equity Funding Agreement for New Hampshire Hydro and the Equity Funding Agreement for New England Hydro have also been drafted to require actions of Equity Sponsors or their appointees affecting such

-7-

participating interests to be the same under each Equity Funding Agreement in order to also be consistent with such overriding intent.

#### Section 2. Conditions Precedent to Effectiveness

The effectiveness of this Agreement, and all rights, obligations, and performance of the signatories hereunder, is subject to (a) New England Power and other members of NEPOOL serving at least 66 2/3% of the aggregate kilowatt-hour load served by all NEPOOL members in 1980 (i) having executed this Agreement and the other Basic Agreements (except for the two Equity Funding Agreements and the amendments to the NEPOOL Agreement relating to Phase II) and (ii) having satisfied the conditions precedent set forth below; (b) Equity Sponsors under each of the Equity Funding Agreements covering 100% of New England Hydro's and New Hampshire Hydro's equity requirements, respectively, having executed those Agreements; (c) members of NEPOOL having executed the amendments to the NEPOOL Agreement for Phase II in order that such amendments may become effective in accordance with the NEPOOL Agreement; and (d) the signatories to this Agreement having also signed and supplied all required documentation under the Phase II Massachusetts Transmission

Facilities Support Agreement, the Phase II New Hampshire Transmission Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, the Use Agreement, and amendments to the NEPOOL Agreement relating to Phase II.

-8-

By September 15, 1988, each signatory to this Agreement shall provide certificates and legal opinions from counsel satisfactory to New England Power. together with certified copies of related resolutions, consents, approvals, authorizations, and other documents (Documentation) necessary to establish to the satisfaction of New England Power that all corporate and regulatory consents. waivers, approvals, authorizations and other actions necessary in connection with performance by such signatory of its obligations under the Agreement have been obtained and are in full force and effect, that the Agreement has been duly authorized, executed, and delivered by such signatory, and that it constitutes a binding commitment by the signatory enforceable in accordance with its terms. Forms of Documentation acceptable to New England Power are included in Attachment C hereto. Prior to signing this Agreement, each signatory has provided to New England Power a listing of all consents, waivers, approvals, authorizations, and other actions required for that signatory to deliver its Documentation.

Since Vermont Electric Power Company, Inc. (VELCO) and Massachusetts Municipal Wholesale Electric Company (MMWEC) represent a number of electric systems, in calculating their respective kilowatthour loads on Attachment A, they are deemed to have signed on behalf of those respective systems listed in Schedules I or II, respectively. By September 1, 1988, VELCO

-9-

and MMWEC will provide New England Power with copies of contracts with those respective systems which impose absolute and unconditional obligations on such systems to pay their proportionate shares of all costs incurred under this Agreement by VELCO or MMWEC, respectively. By that date, VELCO and MMWEC will also provide to New England Power as part of their Documentation certificates, legal opinions (from counsel satisfactory to New England Power), and other documents in form and substance satisfactory to New England Power representing unconditionally that all consents, waivers, approvals, and authorizations have been obtained by their contracting systems in connection with each such system's performance of its obligations under its respective contract with VELCO or MMWEC and that each such contract imposes "absolute and unconditional obligations on such systems to pay their proportionate shares of all costs incurred under this Agreement by VELCO or MMWEC, respectively, and has been duly authorized, executed, and delivered and is a binding commitment of such system enforceable in accordance with its terms. If regulatory approvals have not been obtained by September 1, 1988, such representations shall be conditioned upon receipt of regulatory approvals. VELCO and MMWEC will have until September 15, 1988, to receive such approvals and make such representations unconditionally. In order that percentages of participation be consistent among the Basic Agreements, VELCO and MMWEC shall have their contracts with their contracting systems cover the necessary commitments for each Basic Agreement.

-10-

All expenses in connection with obtaining and delivering any Documentation under this Agreement, including legal opinions, are to be borne by the signatory incurring such expense. New England Power will have no responsibility for any expenses incurred by VELCO and MMWEC in providing Documentation for their respective contracting systems.

In the event that VELCO or MMWEC does not provide such contracts and Documentation by the aforementioned deadlines, under this Agreement and similar contracts and documentation as required by the other Basic Agreements, for all electric systems shown on Schedules I or II, their respective kilowatthour loads on Attachment A will be automatically adjusted to equal the 1980 kilowatthour loads of those contracting electric systems for which the required contracts and Documentation have been provided. Promptly thereafter, New England Power will prepare and distribute an appropriately modified Attachment A with an additional column showing Support Shares for all Supporters and modified Schedules I and II.

Any signatory, that is unable to provide all Documentation by the applicable deadlines required by this Section 2 and all similar documentation as required by the other Basic Agreements or that fails to obtain any regulatory approval required to deliver such Documentation by the applicable deadlines, will not be a Supporter under this Agreement and will not have any rights and obligations hereunder after the date of such

-11-

deadline. All obligations of New England Power hereunder are subject to all regulatory approvals necessary for it to charge the Supporters in accordance with the terms of this Agreement having been obtained and no longer subject to appeal.

New England Power by written notice to all signatories may extend any deadline date specified in this Agreement to a later date, provided that any extension for longer than six months requires the consent of signatories that would have an aggregate Support Share of 66-2/3%.

### Section 3. Effective Date and Term

This Agreement shall become effective (the Effective Date) upon the last to occur of the following dates:

- (i) the date that members of NEPOOL (including New England Power) serving at least 66 2/3% of the aggregate kilowatthour load in 1980 served by NEPOOL members have satisfied all conditions precedent to effectiveness set forth in Section 2;
- (ii) the date that New England Power shall give written notice to all other Supporters that it has determined (such notice to be promptly given upon such determination) that all regulatory approvals necessary for it to charge the Supporters in accordance with the terms of this Agreement have been obtained and are no longer subject to appeal; and

-12-

- (iii) the date that the last of the other Basic Agreements (excluding the Use Agreement) becomes effective or would become effective but for a condition that its effectiveness is subject to this Agreement becoming effective.

Upon execution and delivery of the Agreement by New England

Power and other members of NEPOOL serving at least 66 2/3% of the aggregate kilowatthour load in 1980 served by NEPOOL members, and notwithstanding any provision herein to the contrary, no signatory may terminate its obligations hereunder except in accordance with provisions of this Agreement.

The term of this Agreement shall expire on the later of (1) thirty years from the Date of Full Support Payment as defined in Section 14, or (ii) the date that the Phase II Massachusetts Transmission Facilities Support Agreement and the Phase II New Hampshire Transmission Facilities Support Agreement (the Phase II HVDC Support Agreements) ultimately terminate taking into account any optional renewal term. If all regulatory approvals authorizing New England Power to charge the Supporters in accordance with the Support Charge described in Section 13 hereof are not received by June 1, 1986, New England Power may thereafter elect to terminate this Agreement by notice in writing to the Supporters.

#### Section 4. Support Shares

A. Allocation. Each Supporter shall have and be charged with a percentage interest in all of the rights and obligations

-13-

of the Supporters hereunder determined in accordance with this Section 4 (which interest is hereinafter referred to as its "Support Share").

The Support Share of each Supporter shall be computed both initially and as changed from time to time in accordance with the terms hereof by New England Power as hereinafter provided. Such computations shall be made as of the first day of any month in which there is a change in the number of Supporters or any change in the interest of any Supporter as herein

provided. The initial computation is to be made on or before the Effective Date and subsequent computations are to be made in any month thereafter as of the first day of each month in which an interest is modified or terminated pursuant to any provision hereof. All computations shall be final unless there is a manifest error.

B. The Support Share of each Supporter, on and as of the initial computation, will be equal to its Participating Share at the time of calculation under the Phase II Massachusetts Transmission Facilities Support Agreement.

C. In the event that a Credit Enhanced Supporter (as defined in Section 13) is terminated hereunder after its initial Support Share is determined under Section 48 and the Phase II HVDC Support Agreements continue in effect at the time of such termination, the Support Share for each Supporter will

be equal to its Participating Share at that time under the Phase II Massachusetts Transmission Facilities Support Agreement reflecting any reallocation on account of the terminated Supporter's termination of participation thereunder. If Equity Sponsors under the Equity Funding Agreements or their appointees are allocated Participating Shares under the Phase II HVDC Support Agreements, the Equity Funding Agreements provide that the Equity Sponsors or their appointees will become Supporters hereunder and shall execute appropriate documentation.

D. In the event that a Credit Enhanced Supporter (as defined in Section 13) is terminated hereunder after its initial Support Share is determined under Section 48, and the Phase II HVDC Support Agreements are terminated at the time of such termination, the Support Share for such terminated Credit Enhanced Supporter will be reallocated in accordance with the Equity Funding Agreements. If Equity Sponsors under the Equity Funding Agreements or their appointees are to be allocated Support Shares, the Equity Funding Agreements provide that the Equity Sponsors or their appointees will become Supporters hereunder and shall execute appropriate documentation.

E. Notwithstanding any provision in Section 4 A through D to the contrary, no reallocations under C or D above shall be made in the event of a default in any payment under Sections 17 or 18.

F. In the event that the Support Share of a terminated Supporter cannot be allocated under C above and the Phase II HVDC Support Agreements are in effect at the time of such termination, one or more Equity Sponsors or their appointees (as defined under the Equity Funding Agreements) may elect to increase their respective Support Shares by the Support Share of such terminated Supporter, provided that an equivalent election is made under the Phase II HVDC Support Agreements and the Phase II Boston Edison AC Facilities Support Agreement in order that support percentages hereunder are consistent therewith. If a Participant which is not an Equity Sponsor or an appointee of an Equity Sponsor accepts a voluntary allocation of participating shares under the Phase II HVDC Support Agreements, an equivalent allocation of the Support Shares of a terminated Supporter hereunder and under the Phase II Boston Edison AC Support Agreement shall be made. In the event that the Support Share of a terminated Supporter cannot be allocated under D above, and the Phase II HVDC Support Agreements are terminated at the time of such termination, one or more Equity Sponsors or their appointees (as defined under the Equity Funding Agreements) may elect to increase their respective Support Shares by the Support Share of such terminated Supporter. New England Power shall, by written notice to each Equity Sponsor, offer the Support Share of such terminated Supporter on a voluntary basis to the Equity

Sponsors or their appointees in accordance with a subscription process described in New England Power's offering letter, provided that if such Support Share is not so completely allocated, then New England Power will offer such unallocated Support Share as provided in Section 16B(ii) hereof.

Section 5. Relationship among Supporters

The rights and obligations of the Supporters hereunder are several, in accordance with their respective Support Shares, and not joint. The rights and obligations of New England Power hereunder are also several and not joint with those of the other Supporters or any one thereof. There is no intention to create by this Agreement, or by any grant, lease, license, or activity related hereto, an association, joint venture, trust, or partnership or to impose on New England Power or any other Supporter trust or partnership rights or obligations; and any such implied intention is expressly negated. Except as expressly provided in this Agreement, no Supporter shall have by virtue of this Agreement or of any such grant, lease, license, or activity the right or power to bind any other Supporter without its express written consent.

#### Section 6. Design and Construction of the AC Facilities

New England Power shall be responsible for the design, engineering, procurement, installation, and all other aspects of the construction of the AC Facilities, and any modifications or additions made to the AC Facilities at any time before or

-17-

after completion of the AC Facilities, all in accordance with good utility practice. In carrying out these activities, New England Power may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, design engineering firm, a construction engineering firm, consultants, and such other firms as it considers desirable. To the extent services are performed by an affiliate of New England Power, such affiliate will charge on the same basis that it would charge its costs to other affiliates pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) under the Public Utility Holding Company Act of 1935 (the 1935 Act).

New England Power shall not commence construction of the AC Facilities until so authorized by Supporters (including New England Power) having at least 66-2/3 of the Support Shares. The date of commencement of construction of the AC Facilities shall mean the first firm commitment in excess of \$5 million for procurement or construction of the AC Facilities.

New England Power intends, consistent with good utility practice, to construct the AC Facilities on a schedule consistent with the commercial operation of Phase II by September 1, 1990. However, New England Power does not represent that construction will be completed by such date or any other date.

-18-

#### Section 7. Operation and Maintenance of the AC Facilities

New England Power shall be responsible for the operation and maintenance of the AC Facilities in accordance with good utility practice. New England Power shall use its best efforts to coordinate the operation and maintenance of the AC Facilities with the operation and maintenance of the Phase I and Phase II facilities. In carrying out these activities, New England Power may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, consultants, and such other firms as it considers desirable. In

furtherance of its responsibility, New England Power may from time to time designate a company, which need not be a Supporter, to operate and maintain the AC Facilities. To the extent services are performed by an affiliate of New England Power, such affiliate will charge on the same basis that it would charge its costs to other affiliates pursuant to the rules and regulations of the SEC under the 1935 Act.

#### Section 8. Termination of Phase II HVDC Support Agreements

Recognizing that the AC Facilities are necessary for the proper operation of Phase II as well as a part of New England Power's AC transmission system, New England Power shall use its best efforts to coordinate the construction and operation of the AC Facilities with the Phase I and Phase II facilities and its own AC transmission system in accordance with good utility practice. In the event that the Phase II HVDC Support

-19-

Agreements are terminated, New England Power, no less than 60 days before the effective date of termination of the Phase II HVDC Support Agreements (as such date is defined therein), shall request, in writing, that each Supporter respond to New England Power, in writing, within 30 days as to whether it desires the continued construction and/or operation of the AC Facilities, other than the AC Facilities described in item number 4 to Attachment B hereto. Failure to respond within such 30-day period by a Supporter shall be deemed to be an election by such Supporter to continue. If Supporters other than New England Power with Support Shares aggregating 50% or more respond that they desire to discontinue further construction and/or terminate operation of AC Facilities, the investment in AC Facilities with respect to such AC Facilities (other than those described in item number 4 to Attachment B hereto) shall be limited to those costs previously incurred or committed by New England Power or which are necessary to restore the right-of-way or other facilities to their original condition consistent with good utility practice.

If Supporters other than New England Power with Support Shares aggregating less than 50% respond that they desire to discontinue further construction and/or terminate operation of such other AC Facilities, New England Power Company shall continue to construct and/or operate all of the AC Facilities and all Supporters shall continue to be bound by this

-20-

Agreement. However, any Supporter electing not to continue may terminate its participation hereunder upon payment of its share of the net investment in the AC Facilities, provided that the other Supporters voluntarily agree to support 100% of the costs of the AC Facilities hereunder after such payment. If the other Supporters do not so agree to support 100% of such costs, then construction shall be discontinued and/or operation terminated of the AC Facilities as though Supporters other than New England Power with Support Shares aggregating 50% or more responded that they so desired to discontinue and/or terminate.

Notwithstanding any provision of this Section 8 to the contrary, in the event that the Phase II HVDC Support Agreements are terminated and construction has commenced on the portion of the AC facilities described in item number 4 to Attachment B hereto or such AC Facilities have commenced operation, New England Power may continue such construction and/or operation and if it continues shall do so in a manner consistent with good utility practice recognizing the

desire of the Supporters to minimize costs.

#### Section 9. New England Power Relationship to Supporters

In carrying out its responsibilities hereunder, New England Power agrees that it shall use its best efforts to act for the collective benefit of all Supporters, to include in its contracts with independent contractors the customary provisions for assuring professional and workmanlike performance,

-21-

including warranties, insurance coverage and other protections consistent with good utility practice, and to enforce its rights under such contracts against the other contracting parties to the extent reasonable, reserving the discretion to settle claims on a reasonable basis. All costs of construction, including damages caused by the risks of negligence (other than gross negligence) and other risks of construction in excess of the recoveries obtained from offending parties or insurers, shall be included as part of investment in the AC Facilities (as defined in Section 13 below) and all costs of operating the AC Facilities, including damages caused by risks of negligence (other than gross negligence) or other risks of operation in excess of any recoveries obtained from offending parties or insurers, shall be included in New England Power's operating costs (as defined in Section 13 below).

#### Section 10. Payment for Preliminary Costs

New England Power agrees to pay those New England utilities for costs initially paid by them that (i) were related to the AC Facilities incurred under the Preliminary Quebec Interconnection Support Agreement - Phase II (the Preliminary Agreement), and (ii) that are determined by New England Power to be capitalizable costs of the AC Facilities, in accordance with the Uniform System (as defined hereinafter in Section 13). Within ninety days after the Effective Date, New England

-22-

Power agrees to make the payment with interest calculated from the original date of payment using the monthly average rate on one month commercial paper as published in the Federal Reserve Bulletin for each month during such time period.

#### Section 11. Transmission of Power

A. The AC Facilities are expected to be part of at least two transmission interfaces of NEPOOL (AC Facilities Interface). These include:

1. The transmission interface between substations at Sandy Pond and Millbury (Interface A); and
2. The transmission interface between substations at Millbury and West Medway (Interface B).

Based on studies to be performed from time-to-time, NEPOOL will

periodically determine the share of the interface transfer capability that the AC Facilities have contributed to each of the

interfaces, allocated on an appropriate basis consistent with NEPOOL practice at the time (AC Facilities Interface Transfer Capability Share).

Each Supporter shall have a right to the delivery of power over each interface in an amount equal to its Support Share of the AC Facilities Interface Transfer Capability Share for that interface at the time (Supported Transfer Capability Share). The aggregate of the Supported Transfer Capability Shares less any portion of a Supporter's Supported Transfer Capability Share which is required for its specific entitlement

-23-

transactions with Hydro-Quebec shall be available for the transfer of energy purchased by NEPOOL under the Phase II Firm Energy Contract.

For any transaction not covered by the NEPOOL Agreement or in the event that the NEPOOL Agreement is no longer in effect, each Supporter so using these interface transfer capabilities shall pay New England Power's then current applicable transmission rate.

B. In accordance with A. above, and subject to Section 12, New England Power shall deliver power over Interface A and/or Interface B or any other AC Facilities Interface as directed by the NEPEX Dispatch Center. Electrical losses incurred in the transmission of this power shall be for the account of the Phase II Savings Fund in the case of the Phase II Firm Energy Contract, or for the account of the purchaser in the case of an entitlement transaction, and shall be determined in accordance with whatever NEPOOL procedures are applicable or in absence of such procedures, in accordance with procedures that New England Power then uses for others.

C. All payments made directly to New England Power under this Section 11 shall be made in accordance with the invoice procedure specified in Section 14.

#### Section 12. Sharing of Costs of Capacity Restrictions

A. After the AC Facilities are in commercial operation, if there is a transfer restriction on any AC Facilities Interface

-24-

either with all facilities in service or with, one or more out of service, the total of the Supporters' share of any costs associated with the use of the interface for Phase II Firm Energy Contract transfers or Hydro-Quebec entitlement transactions during any hour that the restriction exists shall be determined in accordance with Attachment G hereto and shall be chargeable to the Hydro-Quebec Phase II Savings Fund or to individual Supporters who had Hydro-Quebec entitlement transactions during the hour the restriction occurred.

There may be a restriction and resultant sharing of costs on one AC Facilities Interface without there being any restrictions on other AC Facilities Interfaces. To the extent that the transfer capability of any of the AC Facilities Interfaces is restricted, New England Power's obligation to deliver power under Section 11 shall be appropriately reduced during the

duration of the restriction.

B. In accordance with NEPEX procedures, prompt notification of the existence and magnitude of any such restriction will be made. All computations of the amount of restriction of the transfer capability of Interface A or B or any other Interface shall be made by NEPEX and shall be final unless there is a manifest error. NEPEX shall make all computations of the sharing of the costs of such restriction which shall be final unless there is a manifest error.

-25-

### Section 13. Support Charge

Commencing with the month in which the Date of Full Support Payment occurs (as defined in Section 14) and in each month thereafter, each Supporter shall pay in accordance with Section 14 its Support Share of a monthly Support Charge in an amount determined in accordance with this Section 13, plus a Credit Enhancement Charge as calculated in accordance with Attachment F.

The Support Charge shall be equal to New England Power's total supported cost of service related to the AC Facilities for such month. The "total supported cost of service related to the AC Facilities" for any month commencing with the month in which the Date of Full Support Payment occurs shall equal (A+ B) where:

A= the Monthly Fixed Costs as determined in accordance with

Attachment D; and

B = the Monthly Operating Costs as determined in accordance with Attachment E.

All costs included in the total cost of service related to the AC Facilities shall be in accordance with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission, as from time to time in effect.

If a Support Charge payment under Section 14 is to be calculated from a date other than the first day of a month, an appropriate proration of "A" and "B" above shall be made for such payment only.

-26-

On the fifteenth day of each month, New England Power will promptly pay to each Equity Sponsor its pro rata share of the Credit Enhancement Charges received through the preceding month.

### Section 14. Payments

Commencing on or about the date that the AC Facilities are completed and ready for service (Date of Full Support Payment) and for each month thereafter, New England Power will render to each other Supporter an invoice for its Support Share of the Support Charge for such month calculated on an estimated basis for the current month and subject to corrective adjustment in subsequent months. Unless New England Power is prevented by circumstances beyond its reasonable control, New England Power shall use its best efforts to render final bills within two years after the end of the calendar year in which the estimated bill was rendered. New England Power will also render to each Supporter an invoice or notice for its Support Share of any amounts due under this Agreement (other than monthly Support Charges) including but not limited to payments to be made under Sections 16, 17, 18, and 19D.

Each Supporter shall promptly pay to New England Power the amount shown on any invoice submitted under this

Section. New England Power will date and mail its monthly invoice for Support Charge on or about the 25th day of the month for the coming month and this invoice shall be due and payable by the 15th day of the coming month and if not paid within that time period

-27-

shall bear interest compounded monthly from the first day of the month in which payment is due to the date when payment is made at an annual rate equal to two percent (2%) over the current interest rate on prime commercial loans from time to time in effect (the Base Rate) at the principal office of The First National Bank of Boston.

Any invoice or notice for payments due under this Agreement (other than a monthly Support Charge invoice) that is not paid when due shall bear interest compounded monthly from the mailing date of the invoice to the date when payment is made at an annual rate equal to two percent (2%) over the Base Rate at the principal office of The First National Bank of Boston.

Recognizing the need to provide additional financial security to induce New England Power and the Supporters to undertake the substantial obligations of this Agreement, each Equity Sponsor has agreed in the Equity Funding Agreement to pay, promptly upon request of New England Power a proportionate share of any invoice or notice rendered to a Credit Enhanced Supporter (as defined in Attachment F) under Section 14 (other than one for payments to be made under Sections 17 and 18) which remains unpaid for ninety days after the mailing date of the invoice. New England Power may render to each Equity Sponsor an invoice for its proportionate share, calculated as if participation of such nonpaying Credit Enhanced Supporter had been terminated and appropriate reallocation had been made under

-28-

Section 4, of the amount of such unpaid invoice or notice plus accrued interest thereon calculated at New England Power's short term borrowing rate or, if New England Power has no short term borrowings, at the Base Rate defined above.

All further invoices or notices as provided in the preceding paragraph shall be telecopied or delivered by overnight courier and shall be paid within 15 days of the date thereof. If not paid within that time period, interest shall accrue on the unpaid balance from the date thereof at the rate of 2% above the Base Rate as specified in this Section 14. In the event that any such invoice or notice remains unpaid for 15 days after its date, New England Power may render to those paying Equity Sponsors further invoices or notices as specified above and subject to the provisions of Section 4E until all amounts due are paid. To the extent that any Equity Sponsor pays to New England Power any amount due pursuant to the preceding paragraph, it shall be subrogated to the rights of New England Power to recover from the nonpaying Supporter the excess it paid to New England Power with interest at the rate of 2% above the Base Rate as specified in this Section 14.

Since New England Power is also a Supporter, New England Power will bear its Support Share of the payments due hereunder without the need to issue an invoice or notice to itself.

-29-

#### Section 15. Character of Payment Obligations

The obligations of each Supporter to make payments hereunder, and to perform and observe all other agreements on its part contained herein, are absolute and unconditional and shall not be affected by any circumstance, including, without limitation, (i) any insolvency, composition, bankruptcy, reorganization, arrangement, liquidation or similar proceedings relating to New England Power, any other Supporter, or any affiliate thereof, (ii) any failure of the AC Facilities to operate for any reason, including but not limited to the failure of Hydro-Quebec to sell electric power to the Supporters, (iii) any damage to or destruction of the AC Facilities, including but not limited to any defect in the quality, condition, design, operation, or fitness for use of, or any loss of use of, all or any part of the AC Facilities, (iv) any interruption or prohibition of the use or possession by New England Power of, or any ouster or dispossession by paramount title or otherwise of New England Power from, all or any part of the AC Facilities, or any interference with such use or possession by any governmental agency or authority or other person or otherwise, (v) any inability to use the AC Facilities because a necessary license or other necessary public authorization cannot be obtained or is revoked, or because the utilization of such a license or authorization is made subject to specified conditions which are not met, (vi) any invalidity or unenforceability or

-30-

disaffirmance by New England Power or any other Supporter of any provision of this Agreement or any failure, omission, delay, or inability of New England Power to perform any of its obligations contained herein, (vii) any amendment, extension, or other change of, or any assignment or encumbrance of any rights or obligations under, this Agreement, or any waiver or other action or inaction, or any exercise or nonexercise of any right or remedy, under or in respect to this Agreement, (viii) any inability of any Supporter or any other Supporter to obtain regulatory approvals for financing its Support Share of any obligations under this Agreement or for meeting any other obligations under this Agreement, or (ix) any inability to start, complete, or use the AC Facilities due to any other circumstance, happening, or event whatsoever, whether foreseeable or unforeseeable and whether similar or dissimilar to the foregoing, it being the intention of the parties hereto that all amounts payable by each Supporter in respect of this Agreement shall begin to be payable and shall continue to be payable in all events in the manner and at the time herein provided; provided, however, that nothing in this Section 15 shall (a) prevent a Supporter from transferring its interests and obligations hereunder to another Supporter prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Supporter with respect to this Agreement incurred or relating to the period of time after said transferring Supporter's Support Share has been reduced to

-31-

zero. In that connection, each Supporter hereby waives, to the extent permitted by applicable law, any and all rights which it may now have or which may at any time hereafter be conferred upon it, by statute or otherwise, to terminate, cancel, or surrender any of its obligations under this Agreement, and agrees that if, for any reason whatsoever, this Agreement shall be terminated in whole or in part by operation of law or otherwise, each Supporter will nonetheless promptly pay to New England Power amounts as required by Section 16 of this Agreement.

Notwithstanding the character of the above payment obligations, when the net proceeds from a total taking of the AC Facilities in an eminent domain proceeding or from insurance in the event of complete destruction of the AC Facilities have been received by New England Power in an amount equal to or greater than the amounts then due hereunder from the

Supporters, then no payment shall be required.

Section 16. Default

A. If any of the following events (Events of Default) shall occur and be continuing:

- (i) a Supporter other than New England Power shall fail to pay to New England Power when due any amount which it has agreed to pay under any provision of this Agreement, and such failure shall continue for more than 15 days after written notice thereof has been given to such Supporter by New England Power; or

-32-

- (ii) a Supporter other than New England Power shall admit in writing its inability to pay its debts, or shall make a general assignment for the benefit of its creditors; or any proceeding shall be instituted against a Supporter other than New England Power (and is not dismissed within sixty days), or by a Supporter other than New England Power, seeking to adjudicate it a bankrupt or insolvent, or seeking reorganization, arrangement, adjustment, or composition of it or its debt under any law relating to bankruptcy, insolvency or reorganization or relief of debtors or seeking appointment of a receiver, trustee, or other similar official for it or for any substantial part of its property; or if a Supporter other than New England Power shall take any action to authorize any of the actions set forth above in this subsection (ii); or
- (iii) a Supporter other than New England Power shall fail to perform any other obligation under this Agreement in accordance with the terms hereof, and such failure shall continue for more than 30 days after written notice thereof has been given to such Supporter by New England Power; or
- (iv) a Supporter other than New England Power shall experience an event of default under any of the other Basic Agreements or under any of the basic agreements for Phase I listed in the first paragraph of Section 1;

-33-

then, and in any such event, in addition to any other rights or remedies that it may have against such Supporter by reason thereof, New England Power shall, by written notice to such Supporter, terminate as of the date of such Event of Default, all rights of such Supporter under this Agreement; provided, however, that in no event shall New England Power terminate a defaulting Supporter under this Section 16 if planning or construction of the AC Facilities is terminated or cancelled under Section 17 or the AC Facilities are permanently shutdown under Section 17 or termination under Section 18 occurs (since no reallocation of Support Shares is required in such events). New England Power may with the approval of Supporters (including New England Power) having 66-2/3% or more of the Support Shares waive any Event of Default hereunder or grant extensions of time to cure any Event of Default.

B. Immediately upon termination of the rights of a Supporter pursuant to A above:

- (i) if such defaulting Supporter was a Credit Enhanced Supporter as of the date of the Event of Default, then New England Power shall allocate the Support Share of the defaulting Supporter to Equity Sponsors or their appointees in accordance with Section 4C or D hereof; or

(ii) if such defaulting Supporter was not a Credit Enhanced Supporter as of the date of the Event of Default or the Support Share of the defaulting

-34-

Supporter cannot be allocated under Section 4C or D hereof, then New England Power shall offer the Support Share of such defaulting Supporter to Equity Sponsors or their appointees in accordance with Section 4F hereof; provided that, if such Support Share is not so completely allocated, then New England Power will offer such unallocated Support Share to any Supporter whose most junior long term debt securities are then rated at least one grade above investment grade or, if not so rated, who has obtained the consent of New England Power and Supporters, including New England Power, then having 66-2/3% or more of the Support Shares (such offer and allocation to be made in accordance with Section 4F hereof); and provided further that such Equity Sponsors, or their appointees or Supporters receiving such an allocation accept an equal participating share under the Phase II HVDC Support Agreements and the Phase II Boston Edison AC Facilities Support Agreement; and

(iii) the defaulting Supporter shall pay to New England Power, in addition to any other amounts due under any provisions of this Agreement, an amount equal to its Support Share of the investment in the AC Facilities (including any cost of removal and disposal) less any depreciation and amortization relating to the AC Facilities to the date of such

-35-

payment. New England Power will credit any amounts so received (less any costs incurred by New England Power relating to such default) to the depreciation and amortization accounts for the AC Facilities.

C. New England Power or any Supporter shall be free to invoke such remedies at law or in equity as may be deemed appropriate against any Supporter that defaults under this Agreement.

#### Section 17. Delay, Suspension, Termination, Cancellation, or Shutdown of the AC Facilities

If at any time New England Power determines that continued planning, construction, or operation of the AC Facilities is not advisable for any reason New England Power deems appropriate, it may delay, restrict, suspend, terminate or cancel planning or construction, terminate operation, or shut the AC Facilities down.

If (i) planning or construction of the AC Facilities is to be terminated or cancelled, or (ii) the AC Facilities are to be permanently shutdown, then New England Power shall give each Supporter not less than ninety (90) days advance written notice of any such event. Each Supporter shall pay to New England Power within not less than ninety (90) days of New England Power's notice thereof an amount, as specified in such notice and calculated as of such date of payment, equal to the sum of its Support Share of the investment in AC Facilities (less any depreciation and amortization to the date of payment) together

-36-

with all costs relating to or resulting from such termination, cancellation or permanent shutdown, including without limitation any costs of total or partial demolition and disposal of the AC Facilities net of any actual salvage value received by New England Power including the proceeds from any sale.

If because of serious financial constraints New England Power determines that it cannot continue construction of the AC Facilities, New England Power has the right to request contributions in aid of construction from the Supporters. If Supporters (of which New England Power shall be one) having at least 66-2/3 of the Support Shares agree to make the requested contributions, then all Supporters, including New England Power, shall make such payments in accordance with Section 14, and New England Power will credit the amount of such payments to the investment in AC Facilities. If Supporters having at least 66-2/3 of the Support Shares do not so agree to make the requested contributions, then New England Power may terminate construction of the AC facilities in accordance with the immediately preceding paragraph.

If Supporters other than New England Power Company with aggregate Support Shares of 50% or more do not agree with New England Power's decision to terminate or cancel construction of the AC Facilities under this Section 17 other than a termination made pursuant to the immediately preceding

-37-

paragraph, New England Power shall, upon receipt of the full amounts due pursuant to this Section, undertake to permit one or more Supporters, as designated by such Supporters with aggregate Support Shares of 50% or more, to continue construction of the AC Facilities and to use and operate the AC Facilities upon completion of construction for the remaining term of this Agreement.

#### Section 18. Termination by New England Power

If at any time New England Power elects and so notifies in writing all other Supporters that, as a result of a default under Section 16, the Support Share of a terminated Supporter is not allocated pursuant to the required or voluntary reallocation provisions under this Agreement, each Supporter's participation hereunder shall terminate not less than 90 days after the date of New England Power's written notice (the "effective date of termination"), and each Supporter on or before the effective date of termination shall pay to New England Power an amount calculated in accordance with the second paragraph of Section 17.

Upon termination of this Agreement pursuant to this Section 18, New England Power shall offer each Supporter which (i) was not a terminated Supporter immediately prior to termination of the Agreement pursuant to this Section 18 and (ii) has paid all amounts due under the first paragraph of this Section 18, an opportunity to participate in a new support agreement, provided

-38-

that participants in such new support agreement agree to pay 100% of the costs of service of New England Power related to the AC Facilities. The new support agreement will have a term equal to the remaining term of this Agreement. Other provisions of the new support agreement will be substantially similar to those in this Agreement. The investment in AC

Facilities under the new support agreement shall be reduced by any amount received as termination payments hereunder which would be properly applied to utility plant accounts in accordance with the Uniform System less any costs of termination. Any participant in the new support agreement shall also be a supporter of the AC facilities of Boston Edison Company and, if the Phase II HVDC Support Agreements have not been terminated, of the transmission facilities of New Hampshire Hydro and New England Hydro.

No termination of this Agreement shall relieve any party of any obligation arising prior to making the payment to New England Power required by the first paragraph of this Section 18. In addition, notwithstanding the termination of this Agreement for other purposes, this Agreement shall continue in effect to the extent necessary to provide for paying all "windup costs" and final billings, billing adjustments and payments.

-39-

#### Section 19. Miscellaneous

A. Insurance. New England Power will at all times during the term of this Agreement keep the AC Facilities insured against such risks as electric utility companies, similarly situated, constructing and operating like properties, usually insure against. Any uninsured loss, damage, or liability related to the AC Facilities or arising out of New England Power's performance hereunder and any expenses in connection with any such loss, damage, or liability shall be deemed to be an expense reimbursable by the Supporters in accordance with Section 13. New England Power will assist any Supporter, at the Supporter's expense, in obtaining any other insurance coverage related to the AC Facilities that such Supporter requires. Upon request, New England Power will supply certificates of insurance coverage.

B. Limitation of Liability. For and in consideration of the fact that New England Power is undertaking to design, engineer, procure, install, construct, operate, and maintain the AC Facilities for and on behalf of the other Supporters and itself without any compensation or charge other than the payments provided under this Agreement, no Supporter shall be entitled to recover from New England Power or any affiliate or any shareholder, officer, director, employee, or agent of New England Power or any affiliate, any damages resulting from error or delay, whether or not due to negligence, in the

-40-

design, engineering, procurement, installation or construction of the AC Facilities, or for any damage to the AC Facilities, any curtailment of power, or any other damages of any kind, including but not limited to consequential damages, arising out of or in connection with the performance of this Agreement by New England Power. Notwithstanding the above limitation, if New England Power is found by a court of competent jurisdiction to have intentionally violated this Agreement in a

material manner or to have acted hereunder in a grossly negligent manner and if such court finding is final and no longer subject to appeal, then the Supporters shall be entitled to recover from New England Power direct damages (but not consequential or any other damages), resulting from such material intentional violation or gross negligence. New England Power will use its best efforts to enforce all contracts related to the construction and operation of the AC Facilities for the benefit of New England Power and the Supporters.

C. Audit. The books and records of New England Power (including metering records) related to this project shall be open to reasonable inspection and audit by any Supporter. The costs of any such audit, including the costs of New England Power in connection with such audit, shall be borne by the Supporter or Supporters requesting such audit. New England Power will promptly make any reasonable corrections necessitated as a result of such audit.

-41-

D. Cost Reimbursement. In the event New England Power reasonably incurs any costs not provided for elsewhere herein in connection with or as a result of planning, organizing, documenting, construction, suspensions, rescheduling, cancellation, operation, maintenance, shutdown, demolition, disposition, or termination of the AC Facilities, or otherwise arising in connection with this Agreement, each Supporter shall promptly reimburse to New England Power, within 15 days of the mailing date of the invoice, its Support Share of such costs. However, New England Power will endeavor to account for any additional costs, to the extent such additional costs are properly capitalizable, over the shorter of the then remaining useful life of the AC Facilities or the remaining term of the Agreement.

E. Uncontrollable Force. No delay or failure in the performance of any obligation by New England Power shall be deemed to exist if it is the result of an "uncontrollable force". The term "uncontrollable force" shall be deemed to mean any cause beyond the reasonable control of New England Power, which New England Power could not reasonably have been expected to avoid by exercise of due diligence and foresight, including, without limiting the generality of the foregoing, storm, flood, lightning, earthquake, fire, explosion, failure of facilities not due to lack of proper care or maintenance, civil disturbance, labor disturbance, sabotage, war, national

-42-

emergency, or restraint by court or public authority. In such event, New England Power shall use reasonable diligence to notify the Participants of such event.

F. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of, and may be performed by, the successors and assigns of the parties and shall also be binding, insofar as permitted by law, on any receiver or trustee in bankruptcy, receivership, or reorganization of any party. Except (i) for a reallocation under Section 4 resulting from a default as provided in Section 16, (ii) for a sale, merger, or consolidation which results in the transfer of substantially all of a Supporter's assets to, and the assumption of all of the Supporter's obligations hereunder by, an electric utility which is a member of NEPOOL, and (iii) for an assignment by New England Power to an affiliated company of New England Power which expressly assumes New England Power's rights and obligations hereunder and acquires the

AC Facilities, and (iv) for a transfer of any or all of a Supporter's Support Share prior to the Effective Date as provided in Section 4 hereof, no assignment of this Agreement shall operate to relieve the assignor of its obligations under this Agreement without the written consent of the parties hereto. Written notice to all parties will be given prior to any assignment hereunder.

-43-

G. Right of Setoff. No Supporter shall be entitled to set off against the payments required to be made by it hereunder (1) any amounts owed to it by New England Power, any affiliate of New England Power, or any other Supporter or (2) the amount of any claim by it against New England Power, any affiliate of New England Power, or any other Supporter. However, the foregoing shall not affect in any other way any Supporter's rights and remedies with respect to any such amounts owed to it by New England Power, any affiliate of New England Power, or any other Supporter or any such claim by it against New England Power or any other Supporter.

H. Amendments. New England Power shall have the right to amend the provisions of Section 13, including Attachments D and E, hereof from time to time by serving an appropriate statement of such amendment upon the Supporters and filing the same with the Federal Energy Regulatory Commission (or such other regulatory agency as may have jurisdiction) in accordance with the provisions of applicable laws and any rules and regulations thereunder, and the amendment shall thereupon become effective on the date specified therein, subject to any suspension order duly issued by such agency. The Supporters have the right to intervene in any regulatory proceeding brought by New England Power to consider such amendment of the provisions of Section 13.

-44-

Any amendments changing the Support Shares of the Supporters (other than changes in Support Shares pursuant to Sections 4 and 16), the rights of the Supporters or a Supporter as specified in Sections 11 and 12, or the several nature of the obligations and rights of the Supporters hereunder as specified in Section 5, shall require consent by all parties. All other amendments to this Agreement shall be by mutual agreement of Supporters (of which New England Power shall be one) owning Support Shares aggregating at least 66-2/3%, evidenced by a written amendment signed by New England Power and such Supporters; and New England Power and all Supporters shall be bound by any such amendment.

I. Notices. Except as the parties may otherwise agree, any notice, request, bill, or other communication relating to this Agreement, or the rights, obligations or performance of the parties hereunder, shall be in writing and shall be effective upon delivery. Any such communication shall be considered as duly delivered when delivered in person or mailed by registered or certified mail, postage prepaid, to the respective post office address of the other parties shown following the signatures of such other parties hereto, or such other address as may be designated by written notice given as provided in this paragraph I.

J. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of The Commonwealth of Massachusetts.

K. Other.

(1) No action, regardless of form, arising out of this Agreement may be brought by any party hereto more than three years after the cause of action has arisen.

(2) In the event that any clause or provision of this Agreement, or any part thereof, shall be declared invalid or unenforceable by any court having jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of the remaining portions of this Agreement.

(3) All provisions of this Agreement providing for limitation of, or protection against, liability shall apply to the full extent permitted by law and shall survive either termination pursuant to this Agreement or cancellation.

(4) Each party shall, upon request of another party, execute and deliver any document reasonably required to implement any provision hereof.

(5) Any number of counterparts of this Agreement may be executed and each shall have the same force and effect as the original.

(6) This Agreement, with the other Basic. Agreements, Preliminary Quebec Interconnection Support Agreement - Phase II, the agreements with Hydro-Quebec regarding Phase II, and the basic agreements covering Phase I shall constitute the entire understanding among the parties and shall supersede any and all previous understandings pertaining to the subject matter of this Agreement.

(7) This Agreement is the act and obligation of the parties hereto in their corporate or governmental capacity, and any claim hereunder against any shareholder, director, officer, employee, or agent of any party, as such, is expressly waived.

IN WITNESS WHEREOF, the signatories have caused this Agreement to be executed by their duly authorized officers or agents.

(a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.

-61-

(b) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.

(c) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, Concord shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.

(d) Includes New Hampshire retail 1980 kilowatthour load of 4,939,218,744.

(e) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.

(f) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

-62-

#### ATTACHMENT B

##### Description of the AC Facilities

The AC Facilities will include the following:

- 1) 35.8 miles of 345 kV ac transmission line connecting Sandy Pond and Millbury #3 substations.
- 2) 16.0 miles of 345 kV ac transmission line connecting Millbury #3 to the West Medway substations (including about 2 miles of transmission line under lease from Boston Edison which provides Boston Edison with an option to terminate the lease and include such line under the Phase II Boston Edison AC Facilities Support Agreement).
- 3) 345 kV ac circuit breakers and miscellaneous equipment at Sandy Pond and Millbury #3.
- 4) Remove and rebuild two sections of two 115 kV ac transmission lines and remove and rebuild portions of two 69 kV ac transmission lines and support structures on the Sandy Pond to Millbury right-of-way; and install 115 kV ac circuit breakers and miscellaneous substation equipment.
- 5) Such other AC Facilities in Massachusetts as approved by the Supporters with aggregate Support Shares of 66 2/3% or more.

[Form of Opinion of Counsel for Each Utility Participant]

New England Hydro-Transmission Electric Company, Inc.;  
 New England Hydro Transmission Corporation; or  
 New England Power Company

Gentlemen:

This opinion is furnished in connection with the execution and delivery by \_\_\_\_\_ (the Company) of the following Agreements: \_\_\_\_\_

We have acted as counsel to the Company, one of the Utility Participants, in connection with the execution and delivery of the Basic Agreements. We participated in reviewing and/or drafting the Agreements.

As general [special] counsel to the Company, we are generally familiar with its affairs. [If special counsel is giving the opinion, describe relationship to the Company.] We have reviewed the proceedings taken by the Company in connection with its authorization, execution, and delivery of the Agreements and any documentation supplied by the Company thereunder. We have also examined executed counterparts of the Agreements, have made such other investigation, and have examined such other records and documents, and have made such examination of law and satisfied ourselves as to such other matters as we have deemed relevant and necessary in order to enable us to express the opinions set forth below.

Based upon and subject to the foregoing and to the further qualifications in this opinion, we are of the opinion that:

1. The Company is a corporation duly organized, validly existing and in good standing under the laws of [the jurisdiction of its incorporation], has the corporate power to own its assets and to transact the business in which it is engaged, and is duly qualified as a foreign corporation in, and is in good standing under the laws of, each jurisdiction in which the conduct of its business or the ownership of its assets requires such qualification.

2. The Company has (and in the case of the Agreements at the time of execution and delivery thereof, had) full corporate power, and legal right to execute, deliver and perform the Agreements, and the Company has taken all necessary corporate action to authorize the execution, delivery, and performance by it of the Agreements.

-65-

3. The execution, delivery, and performance by the Company of the Agreements do not (a) contravene the Company's [charter documents] or by-laws, (b) violate any applicable law, rule, regulation, order, writ, judgment, injunction, decree, or award known to us by which the Company is bound, (c) violate any indenture, instrument, or agreement known to us by which the Company is bound, or (d) result in or require the creation or the imposition of any lien pursuant to the provisions of any indenture, instrument, or agreement known to us by which the Company is bound.

4. No authorization, approval, consent, or other action by, and no notice to or filing with, any federal, state, or other governmental authority or regulatory body which has not been obtained or given and is not in full force and effect is required for the valid and lawful execution, delivery, and performance by the Company of the Agreements. [In this connection, to the extent it may be required by law, the approval of the Massachusetts Department of Public Utilities [Connecticut PUC, or other] has been given for the Agreements and the Company's performance thereunder by order(s) dated \_\_\_\_\_, which remains in full force and effect.]

5. The Agreements have each been duly executed and delivered by the Company and constitute the legal, valid, and binding obligations of the Company enforceable against it in accordance with their respective terms.

6. No action, suit, proceeding, or investigation at law or in equity or by or before any governmental instrumentality or other agency now pending or threatened against or affecting the Company or its property or rights which, if adversely determined, would materially impair the ability of the Company to perform its obligations under the Agreements is known to us. Our opinion that the Agreements are enforceable, each in accordance with the terms thereof, is qualified to the extent that the enforcement of the rights and remedies created thereby is subject to bankruptcy, insolvency, reorganization, and similar laws of general application affecting the rights and remedies of creditors and secured parties, and to the further extent that the availability of the remedies of specific enforcement, injunctive relief, or any other equitable remedy is subject to the discretion of the court before which any proceeding therefor may be brought.

Very truly yours,

-66-

#### CERTIFICATE

I, (insert name), the Clerk (or Secretary or other principal recording officer) of (insert name of Utility Participant), a (insert state of organization) (the "Company") do hereby certify that:

(1) Attached hereto as Exhibit A is a true and correct copy of a vote duly adopted at a meeting of the Board of Directors of the

Company, duly called and held on \_\_\_\_\_, 198\_, and that such vote and the authority vested thereby have not been amended or revoked and are still in full force and effect.

(2) Attached hereto as Exhibit B is a true and correct copy of the Articles of Organization (or other charter documents) of the Company, as amended and in effect as of the date of this Certificate.

(3) Attached hereto as Exhibit C is a true and correct copy of the By-Laws of the Company, as amended and in effect as of the date of this Certificate.

(4) The persons (or person) listed on Exhibit D have been duly elected to the offices set forth adjacent to their respective names since the first day of June, 1985, and the signatures adjacent to their respective names are the genuine signatures of said officers.

IN WITNESS WHEREOF, I have placed my hand and the seal of the Company this \_\_\_\_\_ day of \_\_\_\_\_, 198\_.

By: \_\_\_\_\_

FORM OF DIRECTORS' VOTE APPROVING AGREEMENTS

VOTED: That in connection with this Company's participation in the Phase II expansion of the proposed interconnection between the New England Power Pool companies and Hydro-Quebec, the execution and delivery on behalf of this Company by \_\_\_\_\_, President, of the following agreements: (being collectively referred to in this vote as "Agreements") copies of which Agreements have been presented at this meeting, are hereby authorized, approved, ratified, and confirmed, and that the officers of this Company are further authorized severally to take any and all such further actions including the execution and delivery of such further documents, as such officers or any of them may deem necessary or appropriate in connection with the actions and documents authorized by this vote.

-69-

ATTACHMENT D

Determination of Monthly Fixed Costs

Monthly Fixed Costs shall be 1/12 of the sum of Items 4, 5, 6, and 7 below.

Item 1. Investment in AC Facilities

Investment in AC Facilities shall be the total cost incurred by New England Power from time to time, as reflected in its plant accounts, of constructing the AC Facilities including construction work in progress, less a credit to reflect the difference in cost between the size of the existing conductors and those being installed for facilities described in item 4 of Attachment B. The amount of any contributions in aid of construction made in accordance with Section 17 shall be credited to the investment in AC Facilities. The net book value of the portion of New England Power's rights of way allocable to the new 345 kV facilities shall be included in the

investment in the AC Facilities. New England Power shall credit to investment in AC Facilities any amounts it receives from Boston Edison for the sale of a portion of the AC Facilities described in item (2) to Attachment B hereto, excluding any expenses relating to such sale.

#### Item 2. Net Investment in AC Facilities

The net investment in AC Facilities at any time shall be the investment in the AC Facilities determined in accordance with Item 1 less the sum of the following taken at the same time:

-70-

(a) Accumulated depreciation accrued at the rate applicable in accordance with Item 7 and reflecting retirements, costs of removal and salvage, and

(b) Accumulated deferred Federal and state income taxes (not including any reserves for investment tax credits) arising from liberalized depreciation which are available to New England Power with respect to the AC Facilities under tax laws existing from time to time during the term of this Agreement.

#### Item 3. Prepaid Items and Working Capital

Prepaid items and working capital shall be the cost to New England Power of prepaid expenses and materials and supplies reasonably required to be on hand for the AC Facilities plus an allowance for cash working capital. Any allowance for cash working capital shall be limited to that not sufficiently recovered through the use of estimated billing for the current month.

#### Item 4. Investment Expense

The annual investment expense shall be the annual cost of capital related to the AC Facilities determined by multiplying (a) the arithmetic average of the sum of Items 2 and 3 determined as of the beginning and end of the current year by (b) the overall rate of return determined in accordance with the further provisions of this Item 4.

The overall rate of return shall equal the sum of the long-term debt, preferred stock, and common equity components, determined as follows:

-71-

##### (a) Long-term Debt Component

The long-term debt component shall be the product of (1) the weighted average effective cost of money of 30-year taxable bonds issued by New England Power during the period from the Effective Date to the Date of Full Support Payment or, in the event that no such bonds are issued in this period, the yield on "A" utility bonds at the end of the year prior to the Date of Full Support Payment as published by Moody's Investors Service, times (2) the actual ratio of long-term debt to total permanent capital of New England Power at the end of the year prior to the Date of Full Support Payment.

##### (b) Preferred Stock Component

The preferred stock component shall be the product of (1) the weighted average effective cost of money of preferred stock issued by New England Power during the period from the Effective Date to the Date of Full Support Payment or, in the event that no such preferred stock is issued in this period, the dividend rate on "A" utility preferred stocks at the end of the year prior to the Date of Full Support Payment as published by Moody's Investors Service, times (2) the actual ratio of preferred stock to total permanent capital of New England Power at the end of the year prior to the Date of Full Support Payment.

-72-

##### (c) Common Equity Component

The common equity component shall be the product of (1) the Return on Equity times (2) the actual ratio of common equity to total permanent capital of New England Power at the end of the year prior to the Date of Full Support Payment.

"Return on Equity" shall be the return on equity on file with the FERC and in effect under the Federal Power Act. New England Power shall from time to time request from the FERC a specific return on equity.

Item 5. Income and Franchise Tax Expenses

The income and franchise tax expenses shall be the annual amount of such taxes charged to expense by New England Power with respect to the AC Facilities after taking into account the normalization of timing differences and the flow through of permanent differences between book income and tax income. New England Power shall normalize investment tax credits relating to the AC Facilities by crediting expenses by an amount sufficient to amortize the balance in New England Power's unamortized investment tax credit account relating to the AC Facilities over the same period which NEP depreciates its other facilities which are similar to the AC Facilities.

Item 6. Property and Other Tax Expense

The property and other tax expense shall be the annual property tax expense and any other tax expense charged by New England Power to expense and directly allocable with respect to the AC Facilities.

-73-

Item 7. Depreciation Expense

The annual depreciation expense shall be a percentage of the depreciable portion of the investment in the AC Facilities determined in accordance with Item 1 (including estimated cost of removal less any salvage which salvage value, for the purpose of calculating such depreciation will not exceed the amount of cost of removal). The percentage shall be established on a straight line basis over the same period which NEP depreciates its other facilities which are similar to the AC Facilities.

-74-

ATTACHMENT E

Determination of Monthly Operating Costs

Monthly operating costs shall be the actual expense related to operation and maintenance of the AC Facilities or reasonable estimates thereof for the billed month as reportable on FERC Form No. 1, or any amendment thereto or replacement thereof, plus overheads consisting of allocable administrative and general expenses and payroll-related taxes. Procedures used in determining appropriate overheads shall be in accordance with good utility accounting practice and consistent with New England Power's usual practices. After the AC Facilities described in item number 4 on Attachment B are completed, monthly operating costs shall exclude any such costs relating to such AC Facilities.

Prior to the Date of Full Support Payment, New England Power will accrue all monthly operating costs incurred which relate to the AC Facilities in a deferred asset account on its books. On or about the Date of Full Support Payment and monthly thereafter, New England Power will include with its current monthly operating cost charges relating to the AC Facilities amounts sufficient to amortize such previously accrued operating costs over five years. Until such costs are billed and recovered from the Supporters, New England Power will accrue interest on such unamortized deferred operating cost charges at a rate equivalent to its current overall rate of return including a provision for taxes.

-75-

ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the AC Facilities, Equity Sponsors under the Equity Funding Agreements have provided certain credit support for the project in excess of their Support Shares or those of their appointees.

A Credit Enhanced Supporter shall mean any Supporter which is also then a Credit Enhanced Participant under either of the Phase II HVDC Support Agreements. If the Phase II HVDC Support Agreements have been terminated, then a Credit Enhanced Supporter shall mean any Supporter that, immediately prior to the effective date of termination of the Phase II HVDC Support Agreements, was also a Credit Enhanced Participant thereunder.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge is required to be paid by the Supporters. If a Supporter is a Credit Enhanced Supporter by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Supporter will be paid by all Supporters with each Supporter paying its Support Share thereof; provided, however, that if a Supporter is a Credit Enhanced Supporter due to lack of debt

ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Supporter shall be paid by such Supporter.

-76-

The Credit Enhancement Charge (A) attributed to a Credit Enhanced Supporter is a dollar value determined monthly by the following formula for each Supporter which is a Credit Enhanced Supporter (or was a Credit Enhanced Supporter):

$$A = 1/12 \times B/100 \times C/100 \times D \times E/100 + F$$

where B = the Supporter's Support Share (in percent)

C = the ratio of long-term debt to total permanent capital of New England Power (a) if prior to the month in which the Date of Full Support Payment occurs, at the end of the month, or (b) if in or after the month in which the Date of Full Support Payment occurs, at the end of the calendar year prior to the Date of Full Support Payment (in percent).

D = the net investment in AC Facilities at the end of the month.

E = debt premium (in percent) for the Credit Enhanced Supporter as shown in the following table:

<u>Credit Enhanced Supporter's Debt Rating*</u>	<u>E(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
Ba2	3.32
Ba1	2.82

\*Debt rating shall be the lower of the two highest ratings assigned to the Credit Enhanced

-77-

Supporter's junior long-term debt by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter. If the Supporter has a Support Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for that Supporter shall be such rating converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter.

F = an amount calculated as follows: During the period from the Effective Date to the Date of Full Support Payment, F shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Supporter with interest calculated at New England Power's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Supporter shall be treated as if it represented additional investment in the AC Facilities relating only to such Supporter. As a result, F shall include monthly amounts representing amortization of such previously accrued amount (with amortization over the same period which the investment in the AC Facilities is being amortized) plus one-twelfth of the overall rate of return (as defined in Attachment D hereof) times such unamortized accrued amount plus a provision for income taxes.

-78-

#### ATTACHMENT G

#### Determination of Supporters' Share of Costs Associated with Interface Restrictions

The following methodology is meant to provide a general framework to determine the sharing of costs under Section 12A. The Supporters recognize that given the term of this Agreement, this methodology may have to be changed from time to time to reflect then current practices. Modifications shall be proposed by New England Power Company for approval by Supporters with aggregate Support Shares of 66-2/3% or more.

Determination of such costs shall be as follows:

1. Separate load flow studies will be made from time to time for each Hydro-Quebec purchase with deliveries from Hydro-Quebec represented by an appropriate allocation between Comerford and Sandy Pond. These load flow studies will be revised with each major change in transmission system configuration.
2. For the load flow case representing the Phase II Firm Energy Contract, a load equal to each Supporter's percent share of the Hydro-Quebec maximum delivery, less any reductions for any entitlement transactions with Hydro-Quebec, will be represented at each Supporter's load center(s). For each load flow case representing a specific entitlement purchase from Hydro-Quebec, the entire maximum delivery from Hydro-Quebec will be represented at the load center(s) of the purchaser.
3. For each load-flow case, the aggregate resulting flow across the limited interface will be calculated.
4. In each case, this resulting flow will then be compared (i) to the AC Facilities Interface Transfer Capability Share less reductions for entitlements in the case of the Phase II Firm Energy Contract or (ii) to the individual Supporter's Supported Transfer Capability Share or fraction thereof in the case of an entitlement transaction with Hydro-Quebec. If the flow is in excess of the allocated transfer capability, the amount in excess will be used in the then applicable NEPOOL procedure to determine the dollar amount (if any) chargeable as a result of the restriction either to the Phase II Hydro-Quebec

-79-

Savings Fund or to the individual Supporter, as applicable. If the allocated transfer capability exceeds the above determined flow, there is no charge related to the transaction with Hydro-Quebec and this excess may be used by the Supporter for other transactions.

CONFORMED

AMENDMENT NO. 1  
TO  
PHASE II NEW ENGLAND POWER AC  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of May 1, 1986, is between New England Power Company (New England Power), and the New England utilities listed in Attachment A to the Phase II New England Power AC Support Agreement, dated as of June 1, 1985 (the "New England Power AC Support Agreement"), and amends the New England Power AC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 19H of the New England Power AC Support Agreement, it is hereby agreed as follows:

- 1 Certain terms defined in the New England Power AC Support Agreement are used herein with the meanings there provided.
2. Attachments A and F of the New England Power AC Support Agreement are hereby deleted and replaced with the Attachments A and F attached hereto.
3. This Amendment shall become binding upon New England Power and the Supporters when it has been executed by Supporters (of which New England Power shall be one) owning Support Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

-2-

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

Town of South Hadley	99,981,000 (f)

(a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.

(b) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.

(c) (1) Concord Municipal Light Plant has elected to be a direct signatory to this Agreement. However, if it does not receive required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required, Concord will be grouped with MMWEC. (2) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, either Concord or MMWEC, whichever is appropriate, shall have an additional Support Share equal to 1.087% of Edison's initial Support Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Support Share shall be reduced by such amount.

(d) The 1980 kilowatthour loads shown for Boston Edison Company and New England, Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.

(e) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

(f) The amount shown for any of these municipal utilities will be added to MWEC's amount if such municipal (i) does not receive the required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required by this Agreement, and (ii) elects at that time to be grouped with MMWEC.

-71-

5/29/86

As a result of the support arrangements for building, owning, and financing the AC Facilities, Equity Sponsors under the Equity Funding Agreements have provided certain credit support for the project in excess of their Support Shares or those of their appointees. As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge is required to be paid by each Supporter which is a Credit Enhanced Supporter or was a Credit Enhanced Supporter during construction of the AC Facilities that has not fully paid its Credit Enhancement Charge accrued during the construction period.

The Credit Enhancement Charge (A) is a dollar value determined monthly by the following formula for each Supporter which is a Credit Enhanced Supporter (or was a Credit Enhanced Supporter as described above):

$$A = 1/12 \times B/100 \times C/100 \times D \times E/100 + F$$

where B = the Supporter's Support Share (in percent)

C = the ratio of long-term debt to total permanent capital of New England Power (a) if prior to the month in which the Date of Full Support Payment occurs, at the end of the month, or (b) if in or after the month in which the Date of Full Support Payment occurs, at the end of the calendar year prior to the Date of Full Support Payment (in percent).

-72-

5/29/86

D = the net investment in AC Facilities at the end of the month.

E = debt premium (in percent) for the Credit Enhanced Supporter as shown in the following table:

<u>Credit Enhanced Supporter's Debt Rating*</u>	<u>E(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
Bat	3.32
Bal	2.82

\*Debt rating shall be the lower of the two highest ratings assigned to the Credit Enhanced Supporter's junior long-term debt by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter. If the Supporter has a Support Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for that Supporter shall be such rating converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter.

F = an amount calculated as follows: During the period from the Effective Date to the Date of Full Support Payment, F shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Supporter with interest calculated at New England Power's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Supporter shall be treated as if it represented additional investment in the AC Facilities relating only to such Supporter. As a result, each such Supporter shall pay as F monthly amounts representing amortization of such previously accrued amount (with amortization over the same period which the investment in the AC Facilities is being amortized) plus one-twelfth of the overall rate of return (as defined in Attachment D hereof) times such unamortized accrued amount plus a provision for income taxes.

CONFORMED

AMENDMENT NO. 2  
TO  
PHASE II NEW ENGLAND POWER AC  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of February 1, 1987, is between New England Power Company (New England Power), and the New

England utilities listed in Attachment A to the Phase II New England Power AC Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986, (the "New England Power AC Support Agreement"), and amends the New England Power AC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 19H of the New England Power AC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New England Power AC Support Agreement are used herein with the meanings there provided.

2. Attachment D of the New England Power AC Support Agreement is hereby amended by deleting paragraph (c) of Item 4 thereof and replacing it with the following:

"(c) Common Equity Component

The common equity component shall be the product of (1) the Return on Equity times (2) the actual ratio of common equity to total permanent capital of New England Power at the end of the year prior to the Date of Full Support Payment.

"Return on Equity" shall be the return on equity on file with the FERC and in effect under the Federal Power Act.

New England Power shall from time to time request from the FERC a specific return on equity.

(i) Each Supporter agrees not to intervene in opposition to a request for a rate of return on equity ("R") filed by New England Power if such return is equal to or less than the rate determined in accordance with the applicable formula in paragraph (ii) below. Nothing in this section shall affect (a) the right of New England Power to request a rate of return on equity greater than that determined in accordance with the applicable formula in paragraph (ii) below or (b) the right of any Supporter to intervene in opposition to any such request.

(ii) If the FERC generic return on equity continues to be published for rate making purposes, then "R" shall be equal to the FERC generic return on equity in effect for filings made as of the date of the filing. If the FERC generic return on equity is no longer published for rate making purposes, then "R" shall be determined in accordance with the following formula:

$$R = A + B + C + D$$

where:

(1) A = Weighted average return on the average of three money market indicators

$$A = \frac{.25(E + F + G) + .75(H + I + J)}{3}$$

where:

E = The most recently available yield to maturity for Moody's "A" rated Public Utility Bonds.

-2-

F = The most recently available yield for 10 year Constant Maturity Treasury Bonds.

G = The most recently released figure for the annualized increase in the United States GNP price deflator.

H = The average yield to maturity for the most recently available 36 month period for Moody's "A" rated Public Utility Bonds.

I = The average yield for 10 year Constant Maturity Treasury Bonds for the most recently available 36 month period.

J = The average of the annualized percentage increases in the United States GNP price deflator for the most recent 36 month period.

(2) B = The average equity premium required for utility stocks over the past 20 years.

$$B = K - \frac{L + M + N}{3}$$

where:

K = the average for the most recent 20 years of the sum of (i) the average annual yield for Moody's Electric Utility Common Stock, plus (ii) the ten year growth in dividends per share for such group of electric utilities.

-3-

L = the average for the most recent 20 years of yields to maturity for Moody's "A" rated Utility Bonds.

M = The average for the most recent 20 years of the yield on ten year constant maturity treasury bonds.

N = The average for the most recent 20 years of the average annual percentage change in the United States GNP price deflator.

(3) C = issuance cost for common equity

$$C = .05(A + 8)$$

(4) D = a dilution allowance to compensate the parent company of New England Power for sale of common shares at a market price below book value

D = a percentage from 0 to 1 determined on a straight line basis where 1 represents the weighted average of the common shares of the parent company of New England Power selling at 30% below book and 0 represents those shares selling at book value. This percentage shall be calculated semiannually as of January 1 and July 1 of each year until the AC Facilities go into commercial operation. Each calculation shall cover the period beginning as of January 1 in the year this Agreement is dated as of and ending as of the date of the calculation. Book value is the average month end book value during a calculation period, and

-4-

market price is the average of each quarter's high and low market price during calculation period. The calculation made as of January or July next preceding the date of commercial operation of the AC Facilities will be the percentage used thereafter until the end of the term of this Agreement.

Should any of the indices used in calculating the values of A and B be discontinued, or should the underlying basis for the calculations in any of these indices be modified, New England Power may substitute a substantially similar index for such discontinued or modified index.

Recognizing that this is a long-term contract and that money market conditions can drastically change over time, New England Power retains the option, if the above formulae produce for two consecutive months a number lower than the arithmetic average of the return on common equity approved within the last twelve months by regulatory commissions having jurisdiction over rates for each of the investor owned public electric utilities as reported in the publication "Argus Utility Scope Regulatory Service - Returns Authorized" to use such average return as the return on equity. In the event this publication is no longer currently available, New England Power will use a substantially similar publication which is available."

3. This Amendment shall become binding upon New England Power and the Supporters when it has been executed by Supporters (of which New England Power shall be one) owning Support Shares aggregating at least 66-2/3%.

4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

-5-

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

NEW ENGLAND POWER COMPANY

CONFORMED

AMENDMENT NO. 3  
TO  
PHASE II NEW ENGLAND POWER AC  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of June 1, 1987, is between New England Power Company (New England Power), and the New England utilities listed in Attachment A to the Phase II New England Power AC Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986, and Amendment No. 2, dated as of February 1, 1987, (the "New England Power AC Support Agreement"), and amends the New England Power AC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 19H of the New England Power AC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New England Power AC Support Agreement are used herein with the meanings there provided.

2. Attachment D of the New England Power AC Support Agreement is hereby amended by deleting paragraph (c) of Item 4 thereof and replacing it with the following:

"(c) Common Equity Component

The common equity component shall be the product of (1) the Return on Equity times (2) the actual ratio of common equity to total permanent capital of New England Power at the end of the year prior to the Date of Full Support Payment.

"Return on Equity" shall be the return on equity on file with the FERC and in effect under the Federal Power Act.

New England Power shall from time to time request from the FERC a specific return on equity."

3. This Amendment shall become binding upon New England Power and the Supporters when it has been executed by Supporters (of which New England Power shall be one) owning Support Shares aggregating at least 66-2/3%.

4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED

AMENDMENT NO. 4  
TO  
PHASE II NEW ENGLAND POWER AC  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of September 1, 1987, is between New England Power Company (New England Power), and the New England utilities listed in Attachment A to the Phase II New England Power AC Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986, Amendment No. 2, dated as of February 1, 1987, and Amendment No. 3, dated as of June 1, 1987, (the "New England Power AC Support Agreement") and amends the New England Power AC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 19H of the New England Power AC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New England Power AC Support Agreement are used herein with the meanings there provided.
2. Section 13 is hereby deleted and replaced with the following Section 13:

Section 13. Support Charge

Commencing with the month in which the Date of Full Support Payment occurs (as defined in Section 14) and in each month thereafter, each Supporter shall pay in accordance with Section 14 its Support Share of a monthly Support Charge in an amount determined in accordance with this Section 13, plus a Credit Enhancement Charge as calculated in accordance with Attachment F.

The Support Charge shall be equal to New England Power's total supported cost of service related to the AC Facilities for such month. The "total supported cost of service related to the AC Facilities" for any month commencing with the month in which the Date of Full Support Payment occurs shall equal (A + B) where:

- A = the Monthly Fixed Costs as determined in accordance with Attachment D; and  
B = the Monthly Operating Costs as determined in accordance with Attachment E.

All costs included in the total cost of service related to the AC Facilities shall be in accordance with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission, as from time to time in effect.

If a Support Charge payment under Section 14 is to be calculated from a date other than the first day of a month, an appropriate proration of "A" and "B" above shall be made for such payment only.

On the fifteenth day of each month, New England Power will promptly pay to each Equity Sponsor its pro rata share of the Credit Enhancement Charges received through the preceding month.

[End of Section 13]

3. Section 14 is hereby amended by inserting in the first sentence of the fourth paragraph thereof after the words "Credit Enhanced Supporter" the following:

"(as defined in Attachment F)"

4. Attachment F of the New England Power AC Support Agreement is hereby deleted and replaced with the following Attachment F:

-2-

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the AC Facilities, Equity Sponsors under the Equity Funding Agreements have provided certain credit support for the project in excess of their Support Shares or those of their appointees.

A Credit Enhanced Supporter shall mean any Supporter which is also then a Credit Enhanced Participant under either of the Phase II HVDC Support Agreements. If the Phase II HVDC Support Agreements have been terminated, then a Credit Enhanced Supporter shall mean any Supporter that, immediately prior to the effective date of termination of the Phase II HVDC Support Agreements, was also a Credit Enhanced Participant thereunder.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge is required to be paid by the Supporters. If a Supporter is a Credit Enhanced Supporter by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Supporter will be paid by all Supporters with each Supporter paying its Support Share thereof; provided, however, that if a Supporter is a Credit Enhanced Supporter due to lack of debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Supporter shall be paid by such Supporter.

The Credit Enhancement Charge (A) attributed to a Credit Enhanced Supporter is a dollar value determined monthly by the following formula for each Supporter which is a Credit Enhanced Supporter (or was a Credit Enhanced Supporter):

$$A = 1/12 \times B/100 \times C/100 \times D \times E/100 + F$$

-3-

where B = the Supporter's Support Share (in percent)

C = the ratio of long-term debt to total permanent capital of New England Power (a) if prior to the month in which the Date of Full Support Payment occurs, at the end of the month, or (b) if in or after the month in which the Date of Full Support Payment occurs, at the end of the calendar year prior to the Date of Full Support Payment (in percent).

D = the net investment in AC Facilities at the end of the month.

E = debt premium (in percent) for the Credit Enhanced Supporter as shown in the following table:

<u>Credit Enhanced Supporter's Debt Rating*</u>	<u>E(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
Ba2	3.32
Ba1	2.82

\*Debt rating shall be the lower of the two highest ratings assigned to the Credit Enhanced Supporter's junior long-term debt by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter. If the Supporter has a Support Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for that Supporter shall be such rating converted to a Moody's equivalent as measured at the date such Supporter first became a Credit Enhanced Supporter.

-4-

F = an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, F shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Supporter with interest calculated at New England Power's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Supporter shall be treated as if it represented additional investment in the AC Facilities relating only to such Supporter. As a result, F shall include monthly amounts representing amortization of such previously accrued amount (with amortization over the same period which the investment in the AC Facilities is being amortized) plus one-twelfth of the overall rate of return (as defined in Attachment D hereof) times such unamortized accrued amount plus a provision for income taxes.

[End of Attachment F]

-5-

5. This Amendment shall become binding upon New England Power and the Supporters when it has been executed by Supporters (of which New England Power shall be one) owning Support Shares aggregating at least 66-2/3%.
6. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

CONFORMED

AMENDMENT NO. 5  
TO  
PHASE II NEW ENGLAND POWER AC  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of August 1, 1988, is between New England Power Company (New England Power), and the New England utilities listed in Attachment A to the Phase II New England Power AC Support Agreement, dated as of June 1, 1985, as amended (the "New England Power AC Support Agreement") and amends the New England Power AC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 19H of the New England Power AC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New England Power AC Support Agreement are used herein with the meanings therein provided.
2. Section 2 is hereby amended by (i) changing each reference to a "June 1, 1986" deadline to "September 15, 1988," and (ii) changing each reference to a "March 1, 1986" deadline to "September 1, 1988."
3. Section 2 is hereby amended by deleting, in the last paragraph thereof, the word "Section" and inserting in lieu thereof "Agreement."
4. Section 4A is hereby amended by deleting, in the second paragraph thereof, the words "on and as of June 1, 1986, (or such other later deadline as specified by New England Power under Section 2)," and inserting in lieu thereof "on or before the Effective Date."
5. Section 4B is hereby amended by deleting the word "date".
6. Section 15 is hereby amended by adding the following clause to the end of the first sentence thereof:  
"; provided, however, that nothing in this Section 15 shall (a) prevent a Supporter from transferring its interests and obligations hereunder to another Supporter prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Supporter with respect to this Agreement incurred or relating to the period of time after said transferring Supporter's Support Share has been reduced to zero."
7. Section 19F is hereby amended by inserting into the second sentence thereof after the words "the AC Facilities," the following:  
"and (iv) for a transfer of any or all of a Supporter's Support Share prior to the Effective Date as provided in Section 4 hereof,"
8. The first attached Schedule I is hereby deleted and replaced with the second attached Schedule I.
9. Schedule II is hereby deleted and replaced with the attached Schedule II.

10. Attachment A to the Agreement is hereby deleted and replaced with the attached Attachment A.

-2-

11. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This AGREEMENT dated as of June 1, 1985, is between New England Hydro-Transmission Corporation (New Hampshire Hydro) and the New England utilities listed in Attachment A hereto. Those New England utilities that have executed this Agreement and meet the further conditions for participation hereunder are hereinafter referred to as Participants or individually as a Participant. The Participants, each of which is a member of the New England Power Pool (NEPOOL), are sometimes referred to collectively herein, but their rights and obligations hereunder are several and not joint as described in Section 5 hereof.

In consideration of the premises, the concurrent execution of the other Basic Agreements hereinafter referred to, the mutual covenants hereinafter and therein set forth, and other good and valuable consideration, receipt whereof is hereby acknowledged, it is hereby agreed as follows:

Section 1. Basic Understandings and Purpose

Some or all of the Participants are participants in the existing arrangements for the Phase I interconnection planned by NEPOOL with Hydro-Quebec, which is to consist of a  $\pm$  450 kV HVDC transmission line from a terminal at the Des Cantons Substation on the Hydro-Quebec system near Sherbrooke, Quebec to a terminal having an approximate rating of 690 MW at a substation at the Comerford Generating Station on the Connecticut River (hereinafter referred to as Phase I). The basic arrangements covering the portion of Phase I in the United States are set forth in the New England Power Pool Agreement, as amended (the NEPOOL Agreement) and three contracts among the participants in Phase I as follows:

1. Vermont Transmission Line Support Agreement, dated as of December 1, 1981, as amended, with Vermont Electric Transmission Company, Inc.
2. Phase I Terminal Facilities Support Agreement, dated as of December 1, 1981, as amended, with New England Electric Transmission Corporation, and
3. Agreement With Respect To Use Of Quebec Interconnection, dated as of December 1, 1981, as amended, including the restatement thereof in connection with Phase II (this Agreement as restated to cover Phase II is hereinafter referred to as the Use Agreement).

These Phase I interconnection facilities are currently under construction with completion scheduled during 1986.

With the completion of arrangements for Phase I and the related contracts with Hydro-Quebec, the members of NEPOOL have conducted studies of the benefits of an expanded interconnection for NEPOOL with Hydro-Quebec (Phase II) and have negotiated with Hydro-Quebec a firm energy arrangement to utilize the expanded interconnection facilities. The results of these studies indicate that such an expansion of the interconnection capacity will be beneficial to the New England utilities and to their respective customers.

The portion of Phase II in the United States will consist of an extension of the Phase I DC transmission line from the proposed terminus of Phase I at the Comerford Station through New Hampshire to a site in Massachusetts with additional terminal facilities installed at that site to increase the total transfer capacity between Hydro Quebec and NEPOOL from the 690 MW of Phase I to approximately 2000 MW. Reinforcements to the existing AC transmission system of New England Power and to certain AC facilities of Boston Edison Company will also be required. The United States portion of the Phase II facilities will be designated as pool-planned

facilities in the same manner as the United States portion of the Phase I facilities was so designated.

Hydro Quebec and the Participants have agreed to enter into a ten year energy contract for Phase II. Under that contract, the Participants would purchase, at favorable prices from Hydro Quebec, 7 Twh of energy per year. The Phase II energy will provide an opportunity to displace oil as a fuel for generation and should reduce consumers' annual fuel costs in New England. The commitment of Hydro Quebec to supply to the Participants this large amount of energy should also defer New England's need for expensive new generation. There is also the potential for additional benefits from Phase II, such as energy banking, energy interchange, and emergency transfer for mutual reliability purposes.

Studies performed on behalf of and by NEPOOL show that the aggregate present value of these benefits is expected to significantly exceed the cost of Phase II. The Phase I Support Agreements provide for allocation of participation in Phase II pro rata among all Participants based upon their proportionate shares of the 1980 NEPOOL load with provision for some preferential allocations to certain Participants involved in Phase II.

Each Participant acknowledges that it has been represented on the Executive and Planning Committees of NEPOOL that had responsibility for evaluating the feasibility of Phase II and, through this representation, actively participated in the decision of NEPOOL to go forward with Phase II. Furthermore, each Participant represents that it made its own independent investigations and inquiries as it deemed appropriate and did not rely upon representations (other than those contained in this Agreement) of New Hampshire Hydro or its affiliates in deciding to enter into this Agreement.

The sharing of benefits among the Participants associated with Phase II is set forth in the Use Agreement. The Use Agreement also permits each Participant to make its own entitlement transactions with Hydro Quebec and to use the interconnection for such transactions. Each Participant acknowledges that the benefits of participating in Phase II set forth in the Use Agreement are the fundamental consideration for its signing of this Agreement and making the significant commitments to each other Participant specified herein.

The provisions of this Agreement cover the Phase II New Hampshire HVDC transmission line (the Transmission Facilities) as described in more detail in Attachment B hereto. In accordance with the provisions hereof, New Hampshire Hydro agrees to build, own, operate, and maintain the Transmission Facilities. Each

Participant hereby agrees to support the construction, operation, maintenance, and capital costs of the Transmission Facilities in accordance with the provisions hereof. In connection with the HVDC transmission line to be constructed by New Hampshire Hydro in New Hampshire, New England Power and Public Service Company of New Hampshire have agreed to lease rights-of-way to New Hampshire Hydro for the full term of this Agreement.

All improvements and reinforcements to AC transmission systems in Massachusetts necessitated by Phase II are covered under the Phase II New England Power AC Facilities Support Agreement and the Phase II Boston Edison AC Facilities Support Agreement.

The portion of the Phase II HVDC transmission line to be constructed in Massachusetts and the terminal facilities to be constructed in Massachusetts are covered under the Phase II Massachusetts Transmission Facilities Support Agreement among New England Hydro-Transmission Electric Company, Inc. (New England Hydro), an affiliate of New Hampshire

Hydro, and the Participants. New England Hydro will build, own, operate, and maintain these Massachusetts Phase II facilities.

In view of the need to formalize the agreements among the parties at an early date so that (i) binding commitments with Hydro Quebec for Phase II may be made, (ii) binding commitments for ultimate construction and the financing of the United States portion of Phase II may be undertaken consistent with the time schedule anticipated by NEPOOL and with the assurance that the Participants' commitments are in place and (iii) licensing activities may proceed on a schedule that enables completion of such construction consistent with the time schedule anticipated by NEPOOL, the following agreements are concurrently being entered into (the "Basic Agreements") which collectively set forth rights and obligations with respect to the foregoing undertaking: (1) this Agreement; (2) the Equity Funding Agreement for New Hampshire Hydro; (3) the Phase II Massachusetts Transmission Facilities Support Agreement; (4) the Equity Funding Agreement for New England Hydro; (5) the Phase II New England Power AC Facilities Support Agreement; (6) the Use Agreement; (7) various amendments to the NEPOOL Agreement relating to the sharing of savings, capability responsibilities, and Pool transmission arrangements; and (8) the Phase II Boston Edison AC Facilities Support Agreement.

In order to coordinate each Participant's participation in Phase II to the fullest extent possible, each Participant acknowledges that it is to have the same participating interest under each of these agreements: this Agreement, the Phase II Massachusetts Transmission Facilities Support Agreement, the Phase II New England Power AC Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, and the Use Agreement. Each Participant acknowledges that these agreements have been drafted with the overriding intent to so coordinate participating interests and that, notwithstanding any provision thereof that may be

interpreted to the contrary, the proper interpretation of each of these agreements is to be consistent with such overriding intent. The Equity Funding Agreement for New Hampshire Hydro and the Equity Funding Agreement for New England Hydro have also been drafted to require actions of Equity Sponsors or their appointees affecting such participating interests to be the same under each Equity Funding Agreement in order to also be consistent with such overriding intent.

During the term of this Agreement, New Hampshire Hydro shall limit its activities to those necessary or desirable in connection with Phase II unless New Hampshire Hydro requests authority from the Advisory Committee for other activities and such authority is granted. New Hampshire Hydro shall endeavor to obtain permanent debt financing at reasonable rates with maturities approximating to the extent practicable the then remaining useful life of the Transmission Facilities or to secure other advantageous financial arrangements. New Hampshire Hydro will limit its equity investment to a maximum of 40% of its total capital as of the Effective Date. During the time that New Hampshire Hydro has outstanding debt in its capital structure, New Hampshire Hydro shall use its best efforts to continue to limit its equity investment to 40% of its total capital; provided, however, that New Hampshire Hydro shall be under no obligation to so limit its equity investment in the event that, after the Date of Full Support Payment (as defined in Section 13) the term of its debt financing or other financing arrangements is less than ten years.

New Hampshire Hydro's common equity will be provided under the Equity Funding Agreement by the Equity Sponsors thereunder including New England Electric System (NEES) and those Participants or their authorized designees that qualify by having outstanding long-term debt securities rated at least one grade above the lowest investment grade rating as of the date so

required under the Equity Funding Agreement. (The form of Equity Funding Agreement is included as Attachment G hereto.) The Equity Funding Agreement requires equity contributions to New Hampshire Hydro from Equity Sponsors up to a maximum of \$90 million unless Equity Sponsors having an aggregate of 66-2/3% equity participation agree to increase such maximum.

However, prior to the Effective Date, all equity of New Hampshire Hydro will be contributed by NEES.

To provide assurance that adequate funds will be available to support the financing of the Transmission Facilities, each Participant has agreed, in accordance with Section 14 hereof, to an absolute and unconditional obligation to make payments hereunder and to meet all other commitments hereunder, including but not limited to those of Section 19 hereof. In order to provide further assurance that adequate debt financing will be available to New Hampshire Hydro, the Equity Sponsors have agreed in the Equity Funding Agreement to severally guarantee certain obligations under Section 19 hereof of certain Participants with respect to each debt financing of New Hampshire Hydro; provided that the several guarantees of the Equity Sponsors are subject to the limits as set forth in section 8 C and D of the Equity Funding Agreement for New Hampshire Hydro; and further provided that one or more Equity Sponsors or their appointees may voluntarily agree to guarantee additional amounts of obligations under such debt financing. During the term of each New Hampshire Hydro debt financing, any Participant which, on the commitment date of that financing, (a) had below investment grade debt ratings on its most junior long-term debt securities or did not have a debt rating, (b) had not provided substitute credit enhancement in accordance with Attachment F, and (c) is credit enhanced by Equity Sponsors for such financing, is a Credit Enhanced Participant. In addition, any

Participant which is a credit enhanced participant under the Phase II Massachusetts Transmission Facilities Support Agreement is also a Credit Enhanced Participant hereunder.

Section 2. Precedent to Effectiveness

The effectiveness of this Agreement, and all rights, obligations, and performance of the signatories hereunder, is subject to (a) New Hampshire Hydro having executed this Agreement, (b) members of NEPOOL serving at least 66 2/3% of the aggregate kilowatthour load served by all NEPOOL members in 1980 (i) each having executed this Agreement and the other Basic Agreements (except for the two Equity Funding Agreements executed by the Equity Sponsors and the amendments to the NEPOOL Agreement) and (ii) each having satisfied the conditions precedent set forth below, (c) Equity Sponsors covering at least 100% of New Hampshire Hydro's equity requirements having executed the Equity Funding Agreement with New Hampshire Hydro and covering at least 100% of New England's Hydro's equity requirements having executed the Equity Funding Agreement with New England Hydro, and (d) members of NEPOOL having executed the amendments to the NEPOOL Agreement for Phase II in order that such amendments may become effective in accordance with the NEPOOL Agreement. The signatories to this Agreement shall also sign and supply any required documentation under the Phase II Massachusetts Transmission Facilities Support Agreement, the Phase II New England Power AC Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, the Use Agreement, and amendments to the NEPOOL Agreement relating to Phase II.

By September 15, 1988, each signatory to this Agreement shall provide certificates and legal opinions from counsel satisfactory to New Hampshire Hydro, together with certified copies of related resolutions, consents, approvals, authorizations, and other documents (Documentation)

necessary to establish to the satisfaction of New Hampshire Hydro that all corporate and regulatory consents, waivers, approvals, authorizations and other actions necessary in connection with performance by such signatory of its obligations under the Agreement have been obtained and are in full force and effect, that the Agreement has been duly authorized, executed, and delivered by such signatory, and that it constitutes a binding commitment by the signatory enforceable in accordance with its terms. Forms of Documentation acceptable to New Hampshire Hydro are included in Attachment C hereto. Prior to signing this Agreement, each signatory has provided to New Hampshire Hydro a listing of all consents, waivers, approvals, authorizations, and other actions required for that signatory to deliver its Documentation.

Since Vermont Electric Power Company, Inc. (VELCO) and Massachusetts Municipal Wholesale Electric Company (MMWEC) represent a number of electric systems, in calculating their respective kilowatthour loads on Attachment A, they are deemed to have signed on behalf of those respective systems listed in Schedules I or II, respectively. By September 1, 1988, VELCO and MMWEC will provide New Hampshire Hydro with copies of contracts with those respective systems which impose absolute and unconditional obligations on such systems to pay their proportionate shares of all costs incurred under this Agreement by VELCO or MMWEC, respectively. By that date, VELCO and MMWEC will also provide to New Hampshire Hydro, as part of their Documentation, certificates, legal opinions (from counsel satisfactory to New England Hydro), and other documents in form and substance satisfactory to New Hampshire Hydro representing unconditionally that all consents, approvals, and authorizations have been obtained by their contracting systems in connection with each such system's performance of its obligations under its respective contract with VELCO or MMWEC and that each such contract imposes absolute and unconditional obligations on such systems to pay their proportionate shares

of all costs incurred under this Agreement by VELCO or MMWEC, respectively, and has been duly authorized, executed, and delivered and is a binding commitment of such system enforceable in accordance with its terms. If regulatory approvals have not been obtained by September 1, 1988, such representations shall be conditioned upon receipt of regulatory approvals. VELCO and MMWEC will have until September 15, 1988 to receive such approvals and make such representations unconditionally. In order that percentages of participation be consistent among the Basic Agreements, VELCO and MMWEC shall have their contracts with their contracting systems cover the necessary commitments for each Basic Agreement.

All expenses in connection with obtaining and delivering any Documentation under this Agreement, including legal opinions, are to be borne by the signatory incurring such expense. New Hampshire Hydro will have no responsibility for any expenses incurred by VELCO and MMWEC in providing Documentation for their respective contracting systems. (All expenses of further Documentation including legal opinions required for any financing by New Hampshire Hydro with an unaffiliated third party will be borne by the Participants in the same manner).

In the event that VELCO or MMWEC does not provide such contracts and Documentation by the aforementioned deadlines under this Agreement and similar contracts and documentation as required by the other Basic Agreements, for all electric systems shown on Schedules I or II, their respective kilowatthour loads on Attachment A will be automatically adjusted to equal the 1980 kilowatthour loads of those contracting electric systems for which the required contracts and Documentation have been provided. Promptly thereafter, New Hampshire Hydro will prepare and distribute an appropriately modified Attachment A with an additional column showing Participating Shares for all Participants and modified Schedules I and II.

If MMWEC provides by December 31, 1985, to New Hampshire Hydro at MMWEC's expense an opinion of nationally recognized bond counsel (listed in the Blue Book) stating unequivocally that MMWEC is not legally authorized to enter into and perform the obligations of this Agreement on any basis other than as an obligation payable solely from revenues derived by MMWEC under the contracts entered into with its contracting electric systems, then New Hampshire Hydro and the other Participants agree that MMWEC's liability hereunder shall be so limited. Otherwise, MMWEC's liability hereunder shall not be so limited and shall be on the same basis as that of the other Participants.

VELCO and MMWEC hereby grant to New Hampshire Hydro, on a pari passu basis with New England Hydro, New England Power Company, and Boston Edison Company, a security interest in, and pledge of, their respective contracts with their respective systems covering Phase II, including but not limited to all revenues derived or to be derived therefrom. VELCO and MMWEC also agree not to grant to any other party any lien upon, or pledge or assignment of revenues from, such contracts, except as required in connection with any financing by New Hampshire Hydro with an unaffiliated third party (Lender) or by New England Hydro with a Lender, or except with the approval of New England Hydro and New Hampshire Hydro, as required in connection with any financing by MMWEC, the proceeds of which are to be applied exclusively by MMWEC to meet its obligations under Phase II, provided that such grant by MMWEC to its third party lenders shall be on a pari passu basis with the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company, and provided further that MMWEC shall have its third party lenders execute and deliver intercreditor agreements acceptable to the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company providing an appropriate

allocation between MMWEC's third party lenders and the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company of payments made under MMWEC's contract with its systems and including appropriate notice provisions. VELCO and MMWEC will execute and deliver in a timely manner all Documentation requested by New Hampshire Hydro to perfect such grants.

Any signatory, that is unable to provide all Documentation by the applicable deadlines required by this Section 2 or that fails to obtain any regulatory approval required to deliver such Documentation by the applicable deadlines, will not be a Participant under this Agreement and will not have any rights and obligations hereunder after the date of such deadline. All obligations of New Hampshire Hydro hereunder are subject to obtaining all regulatory approvals necessary for New Hampshire Hydro to charge the Participants in accordance with the terms of this Agreement.

New Hampshire Hydro by written notice to all signatories may extend any deadline date specified in this Agreement to a later date, provided that any extension for longer than six months requires the consent of the Advisory Committee.

Section 3. Effective Date and Term

This Agreement shall become effective (the Effective Date) upon the last to occur of the following dates:

- (i) the date that Participants serving at least 66 2/3% of the aggregate kilowatt-hour load in 1980 served by NEPOOL members have satisfied all conditions precedent to effectiveness set forth in Section 2;
- (ii) the date that New Hampshire Hydro shall give written notice to all Participants that it has determined (such notice to be promptly given upon such determination) that all regulatory

approvals necessary for it to charge the Participants in accordance with the terms of this Agreement have been obtained and are no longer subject to appeal;

(iii) the date on which New Hampshire Hydro shall give written notice to all Participants that it has determined (such notice to be promptly given upon such determination) that all major regulatory approvals and licenses necessary for construction and operation of Phase II have been obtained and are no longer subject to appeal, unless New Hampshire Hydro and the Advisory Committee agree that this Agreement shall become effective before one or more of such approvals and licenses has been obtained and is no longer subject to appeal;

(iv) the date that New Hampshire Hydro first receives borrowed funds as part of a financing arranged with Lenders for construction of the Transmission Facilities; and

(v) the date that the last of the other Basic Agreements (excluding the Use Agreement) becomes effective or would become effective but for a condition that its effectiveness is subject to this Agreement becoming effective.

Upon execution and delivery of the Agreement by members of NEPOOL serving at least 66 2/31, of the aggregate kilowatt-hour load in 1980 served by NEPOOL members, and notwithstanding any provision herein to the contrary, no signatory may terminate its obligations hereunder except in accordance with provisions of this Agreement.

Each Participant which is also a participant under the Phase I Support Agreements shall exercise its rights and take all actions under the Phase I Support Agreements to assure that the Phase I facilities are available to permit continued operation of Phase II. (In order to assure that Phase II is permitted to operate for a full maximum term of fifty years, New Hampshire Hydro understands that New England Electric Transmission Corporation and Vermont Electric

Transmission Company, Inc. have agreed to extend the provisions of the Phase I Support Agreements to the Phase II Participants to cover this time period.)

The initial term of this Agreement shall expire thirty years from the Date of Full Support Payment as defined in Section 13. If (i) the Transmission Facilities are in commercial operation and (ii) there are continuing commitments by Participants to support the full costs of the Transmission Facilities, a Participant at that time shall be entitled not less than two years prior to the expiration of the initial term to elect to continue participation for an additional period not to exceed 20 years upon the terms and conditions of this Agreement. Such additional period is to be determined by the Advisory Committee no later than two years and three months prior to the end of the initial term. The Advisory Committee in determining this additional period shall take into account the then remaining term of the Phase I Support Agreements.

If all regulatory approvals authorizing New Hampshire Hydro to charge the Participants in accordance with the Support Charge described in Section 12 hereof are not received by June 1, 1986, New Hampshire Hydro may thereafter elect to terminate this Agreement by notice in writing to the signatories.

Section 4. Participating Shares

A. Allocation. Each Participant shall have and be charged with a percentage interest in all of the rights and obligations hereunder determined in accordance with this Section 4 (which interest is herein referred to as its "Participating Share").

The Participating Share of each Participant shall be computed both initially and as changed from time to time in accordance with the terms hereof, by New Hampshire Hydro as hereinafter provided. Such computations shall be made as of the first day of any month in which there is a change in the number of Participants or any change in the interest of any Participant as

herein provided. The initial computation of Participating Shares shall be made on the basis that each signatory to this Agreement as shown in Attachment A is a Participant. After such initial computation and before the Effective Date, each Participant shall be entitled to transfer any or all of its Participating Share to one or more other Participants. On or before September 1, 1988, any Participant listed in Attachment A who has transferred, or intends to transfer, any or all of its Participating Share to one or more other Participants listed in Attachment A must provide documentation to New Hampshire Hydro covering the transfer. The initial computation is to be recomputed on and as of the Effective Date on the basis that each signatory to this Agreement which has provided timely documentation of its participation or transfer is a Participant. Any such transfers of Participating Shares will be taken into account after such recomputation. Any such transfer of Participating Shares hereunder shall have no effect on the interests, rights, or obligations of participants in Phase I. Subsequent computations are to be made thereafter as of the first day of each month in which an interest is modified or terminated pursuant to any provision hereof. All computations shall be final unless there is a manifest error.

B. The Participating Shares on and as of the initial computation will be calculated as follows:

- (i) up to 5% to VELCO, if then a Participant;
- (ii) up to 5% to Participants that serve “kilowatthour loads” in New Hampshire (New Hampshire Participants), if then Participants, (Apportioned on the basis of their relative “kilowatthour loads” in New Hampshire); and
- (iii) the balance (after deducting the percentages, if any, under paragraphs B(1) and B(2) above, respectively) apportioned among all Participants, including VELCO (if then a Participant) and

the New Hampshire Participants (if then Participants) on the basis of an initial share allocation determined by the subscription process as described in Attachment E.

C. The term "kilowatthour load," as used herein, shall mean the sum of a Participant's 1980 kilowatthour sales as shown on Attachment A hereto.

D. The precise percentages under B(1) and B(2) shall be specified by VELCO and the New Hampshire Participants, on or before the date of signing this Agreement.

Section 5. Relationship among Participants

The rights and obligations of the Participants hereunder are several, in accordance with their respective Participating Shares, and not joint. The rights and obligations of New Hampshire Hydro hereunder are also several and not joint with those of the Participants, the Equity Sponsors, or any one thereof. There is no intention to create by this Agreement, or by any grant, lease, license, or activity related hereto, an association, joint venture, trust, or partnership or to impose on New Hampshire Hydro or any Participant trust or partnership rights or obligations; and any such implied intention is expressly negated. Except as expressly provided in this Agreement, no Participant shall have by virtue of this Agreement or of any such grant, lease, license, or activity the right or power to bind any other Participant without its express written consent.

Section 6. Project Control and Advisory Committee

Each Participant may designate in writing, initially on or before June 1, 1986, and from time to time thereafter, a representative and an alternate representative to serve on the Advisory Committee. If a representative is unable to attend, an alternate may attend in his or her place. The Advisory Committee shall have the power and responsibilities set forth in this Agreement and shall adopt its own by-laws, provided that (i) voting shall be by Participating Shares at the

time of the vote, (ii) a vote of two-thirds or more of Participating Shares is required to accept a New Hampshire Hydro proposal or to take other affirmative action and a vote of more than one-third is required to reject a New Hampshire Hydro proposal, and (iii) one or more Participants having Participating Shares of at least 10% in the aggregate may by reasonable written notice to all Participants call a meeting of the Advisory Committee. The Advisory Committee will advise New Hampshire Hydro on all major matters of concern to the Participants regarding the Transmission Facilities and Phase II.

New Hampshire Hydro shall make prompt proposals for decisions on the following, and the Advisory Committee shall accept or reject these proposals for decisions on the following:

- (i) Commencement of construction of the Transmission Facilities;
- (ii) The original design concept for the Transmission Facilities;
- (iii) Overall project budget estimate for design, engineering and construction of the Transmission Facilities;
- (iv) Major changes to the original design concept of the Transmission Facilities that, based on reasonable engineering estimates, will increase or decrease the cost by more than 10% of the overall budget approved in (iii) above or might have a significant detrimental effect on reliability or availability; any changes whether changes to the original design concept or otherwise that will result in an increase in the cost to more than 100% above the initial overall project budget approved in (iii), which will require an affirmative vote of at least 80% to accept the changes, or an affirmative vote of a percentage less than 80% in the event that only one Participant (subsidiaries of Northeast Utilities shall be treated as a single Participant for this sole purpose) having more than 20% casts a negative vote;
- (v) General terms of major contracts in excess of \$25 million;

- (vi) Capital additions to the Transmission Facilities in excess of \$5 million;
- (vii) Major changes in operation and maintenance of the Transmission Facilities that will increase operation and maintenance costs by more than 10% of previous year's actual operation and maintenance costs or might have a significant detrimental effect on reliability or availability;
- (viii) Delay, restriction, suspension, termination or cancellation of planning or construction, or shut down of Transmission Facilities, for a period of six months or longer or permanently under Section 16;
- (ix) The term of any New Hampshire Hydro debt financing or any other financial arrangements (other than any construction financing) with a principal amount in excess of \$25 million, provided that such term must be between 5 and 30 years; the Advisory Committee may reject the proposed term only if it is less than 10 years and is unreasonable or impracticable; New Hampshire Hydro shall consult with the Advisory Committee on the other principal terms of such financings and any construction financing and shall use reasonable efforts to accommodate their reasonable requests;
- (x) The target date for commercial operation of the Transmission Facilities for purposes of Section 13B which shall be determined at least 90 days before the Effective Date; and
- (xi) Such other matters as are specified elsewhere in this Agreement.

If New Hampshire Hydro makes a proposal for a decision from the Advisory Committee and the Advisory Committee fails, however, to accept or reject such proposal within thirty days, the Advisory Committee shall be deemed by New Hampshire Hydro to have approved New Hampshire Hydro's proposal and New Hampshire Hydro may immediately proceed to implement its proposal.

Each Participant shall be responsible for all of its expenses related to membership on the Advisory Committee.

This Section shall be effective on June 1, 1986, notwithstanding that the Effective Date has not yet occurred.

Section 7. Design and Construction of the Transmission Facilities

Except for those areas of responsibility assigned to the Advisory Committee as specified in Section 6, New Hampshire Hydro shall be responsible for the design, engineering, procurement, installation, and all other aspects of the construction of the Transmission Facilities, and any modifications or additions made to the Transmission Facilities at any time before or after completion of the Transmission Facilities, all in accordance with good utility practice for the benefit of all Participants, the objective being to achieve an appropriate balance among minimization of construction cost, minimization of operation and maintenance cost, licensing and environmental considerations, and safety and reliability of service. In carrying out these activities, New Hampshire Hydro may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, design engineering firm, a construction engineering firm, consultants, and such other firms as it considers desirable. To the extent services are performed by an affiliate of New Hampshire Hydro, such affiliate will charge on the same basis that it would charge its costs to other affiliates pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) under the Public Utility Holding Company Act of 1935 (the 1935 Act).

In order for the Advisory Committee to meet its responsibilities as specified in Section 6, New Hampshire Hydro will provide all necessary information reasonably requested by the Advisory Committee. During the course of the work, New Hampshire Hydro shall furnish

quarterly reports to all Participants with respect to the progress of the work and an annual report to all Participants of actual and estimated construction expenditures for the Transmission Facilities.

New Hampshire Hydro intends, consistent with good utility practice, to construct the Transmission Facilities on a schedule that permits the commercial operation of Phase II by September 1, 1990. However, New Hampshire Hydro does not represent that construction will be completed by such date or any other date.

Section 8. Operation and Maintenance of the Transmission Facilities

Except for those areas of responsibility assigned to the Advisory Committee as specified in Section 6, New Hampshire Hydro shall be responsible for the operation and maintenance of the Transmission Facilities in accordance with good utility practice for the benefit of all Participants, the objective being to operate the Transmission Facilities as efficiently, economically, safely, and reliably as feasible. New Hampshire Hydro shall use its best efforts to coordinate the operation and maintenance of the Transmission Facilities with the operation and maintenance of the Phase I facilities and other Phase II facilities. In carrying out these activities, New Hampshire Hydro may utilize the services of its affiliates and may also select and employ a financial adviser, legal counsel, consultants, and such other firms as it considers desirable. In furtherance of its responsibility, New Hampshire Hydro may from time to time designate a company, which need not be a Participant, to operate and maintain the Transmission Facilities. To the extent services are performed by an affiliate of New Hampshire Hydro, such affiliate will charge its costs on the same basis that it would charge to other affiliates pursuant to the rules and regulations of the SEC under the 1935 Act.

In order for the Advisory Committee to meet its responsibilities as specified in Section 6, New Hampshire Hydro will provide all necessary information reasonably requested by the Advisory Committee.

After the Transmission Facilities are placed in commercial operation, New Hampshire Hydro shall furnish quarterly reports to all Participants with respect to the operation and maintenance of the Transmission Facilities and an annual report to all Participants of estimated operation and maintenance expenses.

Section 9. New Hampshire Hydro Relationship to Participants

In carrying out its responsibilities hereunder, New Hampshire Hydro agrees that it shall use its best efforts to act for the collective benefit of all Participants and New Hampshire Hydro, to include in its contracts with independent contractors the customary provisions for assuring professional and workmanlike performance, including warranties, insurance coverage and other protections consistent with good utility practice, and to enforce its rights under such contracts against the other contracting parties to the extent reasonable, reserving the discretion to settle claims on a reasonable basis. All costs of construction, including damages caused by the risks of negligence (other than gross negligence) and other risks of construction in excess of the recoveries obtained from offending parties or insurers, shall be included as part of investment in the Transmission Facilities (as defined in Section 12 below) and all costs of operating the Transmission Facilities, including damages caused by risks of negligence (other than gross negligence) or other risks of operation in excess of any recoveries obtained from offending parties or insurers, shall be included in New Hampshire Hydro's operating costs (as defined in Section 12 below).

Section 10. Payment for Preliminary Costs

New Hampshire Hydro agrees to pay those New England utilities that initially paid for costs related to the Transmission Facilities incurred under the Preliminary Quebec Interconnection Support Agreement - Phase II (the Preliminary Agreement) that are determined by New Hampshire Hydro to be capitalizable costs of the Transmission Facilities, in accordance with the Uniform System (as defined hereinafter in Section 12). It is understood that it is the intention of New Hampshire Hydro and the Participants for all costs related to and allocated to the Transmission Facilities incurred under the Preliminary Agreement, to be capitalized to the extent permitted in accordance with good utility practice. Within ninety days after the Effective Date, New Hampshire Hydro agrees to make the repayment with interest calculated from the original date of payment using the monthly average rate on one month commercial paper as published in the Federal Reserve Bulletin for each month during such time period.

Section 11. Transmission and Other Services

In accordance with good utility practice, New Hampshire Hydro will make the Transmission Facilities available for the Participants for transmission services as part of Phase II. New Hampshire Hydro hereby grants to each Participant an exclusive right to use its Participating Share of the Transmission Facilities in accordance with the Use Agreement.

New Hampshire Hydro agrees that it will serve as an agent or in other similar capacity for any Participant that so requests for the buying or selling of power to be transmitted over the Transmission Facilities as an entitlement transaction with Hydro-Quebec pursuant to the terms of the Use Agreement or otherwise, provided, however, that a formal written contract with terms

and conditions, including compensation for services, satisfactory to New Hampshire Hydro is executed and delivered prior to performance of such services.

Section 12. Support Charge

Commencing in the month of the Date of Full Support Payment (as defined in Section 13) and in each month thereafter, each Participant shall pay in accordance with Section 13 its Participating Share of a monthly Support Charge in an amount determined in accordance with this Section 12, plus a credit enhancement charge calculated in accordance with Attachment F. The Support Charge shall be equal to New Hampshire Hydro's total cost of service related to the Transmission Facilities for such month.

The "total cost of service related to the Transmission Facilities" for any month commencing with the month in which the Date of Full Support Payment occurs shall be the sum of (a) New Hampshire Hydro's operating expenses for such month with respect to the Transmission Facilities, plus (b) an amount equal to one-twelfth of the composite percentage for such month times the average net rate base for the Transmission Facilities, less (c) investment earnings of the Debt Service Fund, as defined in Section 18, realized by New Hampshire Hydro, less (d) any other income received by New Hampshire Hydro resulting from costs or rate base supported by the Participants other than income received pursuant to (a), (b), or (c) above or Credit Enhancement Charges and other income allocated to Equity Sponsors elsewhere under this Agreement. If a Support Charge payment under Section 13 is to be calculated from a date other than the first day of a month, an appropriate proration of the amount determined in (b) above shall be made for such payment only.

“Uniform System” shall mean the appropriate Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC) for Public Utilities and Licensees, as from time to time in effect.

New Hampshire Hydro’s “operating expenses” shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto, in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that unless the FERC, upon application by New Hampshire Hydro, authorizes a shorter depreciation and/or amortization period, for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the purpose of calculating such depreciation and/or amortization, will not exceed the amount of cost of removal) over the greater of: (i) ten years from the Date of Full Support Payment or (ii) the term of New Hampshire Hydro’s permanent debt financings or other permanent financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value. “Operating expenses” shall also include all payments made by New Hampshire Hydro pursuant to Section 8 of the Phase II Maine Electric Power SVC Facilities Support Agreement between New Hampshire Hydro and Maine Electric Power Company, dated as of October 1, 1988, as amended from time to time (the “SVC Agreement”). In addition, each Participant will pay to

New Hampshire Hydro, and New Hampshire and Hydro will pay to New England Power and Public Service Company of New Hampshire, for the benefit of their respective customers, such Participant's Participating Share of a monthly charges of \$268,000 and \$41,300, respectively, to compensate New England Power and Public Service Company for the lost capacity on their respective New Hampshire rights-of-way, provided however, that no such charges shall be paid to New England Power or Public Service Company during such time as construction or operation is suspended on account of a defect in title for such rights-of-way. The allowance for state and Federal income taxes included in operating expenses shall reflect the normalization of timing differences and the flow through of permanent differences between book income and tax income. New Hampshire Hydro, as the tax owner of the Transmission Facilities, will be entitled to the benefits and subject to the burdens of such ownership for tax purposes. The allowance for state and Federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.

The "investment in the Transmission Facilities" shall be the aggregate amount incurred at any time either before or after commercial operation of the Transmission Facilities which relates to the Transmission Facilities and is properly chargeable to New Hampshire Hydro's utility plant accounts in accordance with the Uniform System. The investment in the Transmission Facilities shall also include operating expenses incurred prior to the month in which the Date of Full Support Payment occurs and an allowance for funds used during the period prior to the Date of Full Support Payment (AFDC) accrued on the investment in the Transmission Facilities. The AFDC rate shall be calculated pursuant to the last FERC approved AFDC formula including in

construction work in progress all investment in the Transmission Facilities prior to the Date of Full Support Payment and using 14 percent as the return on equity for such calculation.

“Composite percentage” shall be computed as of the last day of each month (the “computation date”). “Composite percentage” as of a computation date shall be the sum of (i) Return on Equity then in effect multiplied by the percentage which equity investment as of such date is of the total capital as of such date; plus (ii) the average monthly effective interest rate per annum of each principal amount of indebtedness outstanding on such date for money borrowed, whether long term or short term, multiplied by the percentage which each such principal amount is of total capital as of such date. The effective interest rate shall take into account premiums, discounts, fees, and other costs that are related to the indebtedness.

“Return on Equity” shall be the return on equity on file with the FERC and in effect under The Federal Power Act.

“Equity investment” as of any date shall consist of the sum of (i) all amounts theretofore paid to New Hampshire Hydro for all capital stock theretofore issued, plus all capital contributions, less the sum of any amounts paid by New Hampshire Hydro in the form of stock retirements, repurchases or redemptions or return of capital including liquidating dividends; plus (ii) any credit balance in the capital surplus account not included in (i) and any credit balance in the earned surplus (retained earnings) account on the books of New Hampshire Hydro as of such date.

“Total capital” as of any date shall be the equity investment plus the total of all indebtedness then outstanding for money borrowed.

From the Date of Full Support Payment until the first to occur of June 30 or December 31 thereafter, the “average net rate base” for the Transmission Facilities shall be the average of the

net rate base determined as of the Date of Full Support Payment and the first to occur of June 30 or December 31 thereafter.

Thereafter, for subsequent months of January through June, average net rate base shall be the average of the net rate base as of the preceding December 31 and the following June 30. For other months, average net rate base shall be the average of the net rate base as of the preceding June 30 and the following December 31. The “net rate base” shall consist of (i) the investment in the Transmission Facilities, less (ii) the amount of any accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities, less (or plus) (iii) the amount of any reserve for deferred income taxes received (or paid) by New Hampshire Hydro, such deferred income taxes to include deferred income taxes due to accelerated depreciation, construction tax benefits, and any other book/tax timing differences related to the Transmission Facilities, less (iv) the amount of any unamortized investment tax credits (ITC), plus (v) such allowances related to the Transmission Facilities for materials and supplies, prepaid items and cash working capital as may from time to time be determined by New Hampshire Hydro, as reasonably necessary and in accordance with accepted utility accounting practice, plus (vi) the amounts held in the Debt Service Fund, as described in Section 18. New Hampshire Hydro shall normalize ITC over the depreciation and/or amortization period relating to the Transmission Facilities. Any allowance for cash working capital shall be limited to that not sufficiently recovered through the use of estimated billing for the current month.

Section 13. Payments

A. Commencing on or about the Date of Full Support Payment and for each month thereafter, New Hampshire Hydro will render to each Participant an invoice for its Participating Share of the Support Charge and the Credit Enhancement Charge, if any, for such month

calculated on an estimated basis for the current month and subject to corrective adjustment in subsequent months. Unless New Hampshire Hydro is prevented by circumstances beyond its reasonable control, New Hampshire Hydro shall use its best efforts to render final bills within two years after the end of the calendar year in which the estimated bill was rendered. New Hampshire Hydro will also render to each Participant an invoice or notice for its Participating Share of any amounts due under this Agreement (other than monthly Support Charge and the Credit Enhancement Charge) including but not limited to payments to be made under Sections 15, 16, 17, and 20D.

Each Participant shall promptly pay to New Hampshire Hydro the amount shown on any invoice submitted under this Section. New Hampshire Hydro will date and mail monthly invoices for the Support Charge and Credit Enhancement Charge, if any, on or about the 25<sup>th</sup> day of the month for the coming month and this invoice shall be due and payable by the 15<sup>th</sup> day of the coming month and if not paid within that time period shall bear interest compounded monthly from the first day of the month in which payment is due to the date when payment is made at an annual rate equal to two percent (2%) over the current interest rate on prime commercial loans from time to time in effect (the Base Rate) at the principal office of The First National Bank of Boston.

Any invoice or notice for payments due under this Agreement (other than a monthly Support Charge and Credit Enhancement Charge invoice), that is not paid when due under this Agreement shall bear interest compounded monthly from the mailing date of the invoice to the date when payment is made at an annual rate equal to two percent (2%) over the Base Rate at the principal office of The First National Bank of Boston.

B. The “Date of Full Support Payment” shall be the later of (i) the target date for commercial operation of the Transmission Facilities as determined by the Advisory Committee, or (ii) the date on which the Transmission Facilities are ready for commercial operation, but in no event later than one year after the date specified in subpart (i) above unless an extension is agreed to in writing by all Lenders. However, if all of Phase II commences commercial operation prior to the target date specified in subpart (i) above, the “Date of Full Support Payment” shall be the date on which Phase II is in commercial operation.

Section 14. Character of Payment Obligations

The obligations of each Participant to make payments hereunder, and to perform and observe all other agreements on its part contained herein, are absolute and unconditional and shall not be affected by any circumstance, including, without limitation, (i) any insolvency, composition, bankruptcy, reorganization, arrangement, liquidation or similar proceedings relating to New Hampshire Hydro, the Participant, any other Participant, any Equity Sponsor, or any affiliate thereof, (ii) any failure of the Transmission Facilities to operate for any reason, including but not limited to the failure of Hydro-Quebec to sell electric power to the Participants, (iii) any damage to or destruction of the Transmission Facilities, including but not limited to any defect in the title, quality, condition, design, operation, or fitness for use of, or any loss of use of, all or any part of the Transmission Facilities, (iv) any interruption or prohibition of the use or possession by New Hampshire Hydro of, or any ouster or dispossession by paramount title or otherwise of New Hampshire Hydro from, all or any part of the Transmission Facilities, or any interference with such use or possession by any governmental agency or authority or other person or otherwise, (v) any inability to use the Transmission Facilities because a necessary license or other necessary public authorization cannot be obtained or is revoked, or because the

utilization of such a license or authorization is made subject to specified conditions which are not met, (vi) any invalidity or unenforceability or disaffirmance by New Hampshire Hydro or any Participant of any provision of this Agreement or any failure, omission, delay, or inability of New Hampshire Hydro to perform any of its obligations contained herein, (vii) any amendment, extension, or other change of, or any assignment or encumbrance of any rights or obligations under, this Agreement, or any waiver or other action or inaction, or any exercise or nonexercise of any right or remedy, under or in respect to this Agreement, (viii) any inability of the Participant or any other Participant to obtain regulatory approvals for financing its Participating Share of any obligations under this Agreement or for meeting any other obligations under this Agreement, or (ix) any inability to start, complete, or use the Transmission Facilities due to any other circumstance, happening, or event whatsoever, whether foreseeable or unforeseeable and whether similar or dissimilar to the foregoing, it being the intention of the parties hereto that all amounts payable by each Participant in respect of this Agreement shall begin to be payable and shall continue to be payable in all events in the manner and at the time herein provided; provided, however, that nothing in this Section 14 shall (a) prevent a Participant from transferring its interests and obligations hereunder to another Participant prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Participant with respect to this Agreement incurred or relating to the period of time after said transferring Participant's Participating Share has been reduced to zero. In that connection, each Participant hereby waives, to the extent permitted by applicable law, any and all rights which it may now have or which may at any time hereafter be conferred upon it (other than those expressly conferred in this Agreement), by statute or otherwise, to terminate, cancel, or surrender any of its obligations under this Agreement, and agrees that if, for any reason whatsoever, this Agreement

shall be terminated in whole or in part by operation of law or otherwise, each Participant will nonetheless promptly pay to New Hampshire Hydro amounts as required by Section 16 of this Agreement.

Notwithstanding the character of the above payment obligations, when the net proceeds from a total taking of the Transmission Facilities in an eminent domain proceeding or from insurance in the event of complete destruction of the Transmission Facilities have been received by New Hampshire Hydro in an amount equal to or greater than the amounts then due hereunder from the Participants, then no payment shall be required.

Section 15. Default

A. If any of the following events (Events of Default) shall occur and be continuing:

- (i) a Participant shall fail to pay when due any amount which it has agreed to pay under any provision of this Agreement, and such failure shall continue for more than 10 days after written notice thereof has been given to such Participant by New Hampshire Hydro; or
- (ii) a Participant shall fail to supply in accordance with the terms hereof any documentation required by New Hampshire Hydro in connection with financing with Lenders by New Hampshire Hydro (for VELCO and MMWEC, this includes documentation for their respective contracting electric systems), and such failure shall continue for more than 30 days after written notice of such failure has been given to such Participant by New Hampshire Hydro; or
- (iii) a Participant shall admit in writing its inability to pay its debts, or shall make a general assignment for the benefit of its creditors; or any proceeding shall be instituted against a Participant (and is not dismissed within sixty days), or by a Participant, seeking to adjudicate it a bankrupt or insolvent, or seeking reorganization, arrangement, adjustment, or composition of it or its debt under any law relating to bankruptcy, insolvency or reorganization or relief of debtors

or seeking appointment of a receiver, trustee, or other similar official for it or for any substantial part of its property; or if a Participant shall take any action to authorize any of the actions set forth in this subsection (iii); or

(iv) prior to the retirement of the last amount of New Hampshire Hydro's debt and prior to the reduction of New Hampshire Hydro's equity investment to an amount less than or equal to 10% of its highest previous amount, a Participant shall fail to make a payment of principal under any bank loan or other obligation for borrowed money (including financing leases or other similar arrangements) exceeding the lesser of \$1 million or 5% of such Participant's total capitalization, which failure is not excused or cured within the earlier of 30 days or the acceleration of the maturity thereof; or

(v) a Participant shall fail to perform any other obligation under this Agreement in accordance with the terms hereof, and such failure shall continue for more than 30 days after written notice thereof has been given to such Participant by New Hampshire Hydro; or

(vi) a Participant shall experience an event of default under any of the other Basic Agreements or under any of the basic agreements for Phase I listed in the first paragraph of Section 1; then, and in any such event, in addition to any other rights or remedies that it may have against such Participant by reason thereof, New Hampshire Hydro shall, by written notice to such Participant, terminate all rights of such Participant under this Agreement as of the date of such Event of Default. New Hampshire Hydro may with the approval of the Advisory Committee waive any Event of Default hereunder or grant extensions of time to cure any Event of Default.

B. Immediately upon termination of the rights of a Participant pursuant to A above:

- (i) if such terminated Participant was then a Credit Enhanced Participant, then New Hampshire Hydro shall allocate the Participating Share of the terminated Participant to the Equity Sponsors or their appointees in proportion to the Equity Sponsors' then respective equity percentages;
- (ii) if such terminated Participant was not then a Credit Enhanced Participant, then New Hampshire Hydro will offer the Participating Share of the terminated Participant as of the date of termination to the Equity Sponsors or their appointees and upon acceptance of the offer will allocate the Participating Share in accordance with the acceptance (if the offer is oversubscribed by Equity Sponsors, the allocation will be made in proportion to such Equity Sponsors' then respective equity percentages); provided that, if such Participating Share is not so completely allocated, then New Hampshire Hydro will offer such unallocated Participating Share to Participants whose most junior long-term debt securities are then rated at least one grade above investment grade or, if not so rated, who have obtained the consent of all New Hampshire Hydro's Equity Sponsors (if the offer is oversubscribed, the allocation will be made in proportion to respective participating shares); and provided further that such Equity Sponsors or their appointees or Participants receiving such an allocation accept an equal support or participating share under the Phase II New England Power AC Facilities Support Agreement, the Phase II Boston Edison AC Facilities Support Agreement, and the Phase II Massachusetts Transmission Facilities Support Agreement; and
- (iii) the Equity Sponsors have been allocated B (i) or (ii) above have been allocated B (ii) above or New allocation is made, or their appointees that Participating Shares under or any Participants that Participating Shares under Hampshire Hydro, if no such shall allocation is made, shall be entitled to receive in accordance with the Use Agreement from the escrow agent as liquidated

damages the allocated share of all Phase II amounts retained under the Use Agreement on or after the date of such termination for the account of such terminated Participant.

C. The terminated Participant shall immediately pay either (i) if an allocation is made under Section 15B, to the Equity Sponsors or their appointees or any Participants that have received such allocation or (ii) otherwise, to New Hampshire Hydro, in addition to any other amounts due under any provisions of this Agreement, an amount equal to its Participating Share of the investment in the Transmission Facilities (including any cost of removal and disposal) less any depreciation and amortization relating to the Transmission Facilities to the date of such payment. In addition, such Participant's payment required by the preceding sentence shall be increased by an amount equal to its Participating Share of the "amounts" determined in Section 11B of the SVC Agreement. New Hampshire Hydro will credit any such amounts it receives from the terminated Participant for the benefit of the Equity Sponsors.

D. New Hampshire Hydro or any Equity Sponsor or any Participant shall be free to invoke such remedies at law or in equity as may be deemed appropriate against any Participant that defaults under this Agreement.

Section 16. Delay, Suspension, Termination, Cancellation, or Shutdown

If at any time New Hampshire Hydro determines that continued planning, construction, or operation of the Transmission Facilities is not advisable for any reason New Hampshire Hydro deems appropriate, it may, after written notice to all Participants, delay, restrict, or suspend planning, construction, or operation, or shut the Transmission Facilities down for a period of less than six months. In accordance with Section 6, the Advisory Committee has responsibility for accepting or rejecting a proposal submitted by New Hampshire Hydro recommending a delay, restriction, suspension, termination, or cancellation of planning or construction, or shut down of

the Transmission Facilities for a period of six months or longer or permanently. In any case in which New Hampshire Hydro determines that safety considerations require an immediate shutdown, it shall proceed without consultation with the Advisory Committee or written notice to the Participants.

If the Advisory Committee has determined that (i) planning or construction of the Transmission Facilities is to be terminated or cancelled, or (ii) the Transmission Facilities are to be permanently shutdown, then New Hampshire Hydro shall give each Participant not less than ninety days advance written notice of any such event. Each Participant shall pay to New Hampshire Hydro within such notice period an amount, as specified in such notice and calculated as of the date of the event so notified, equal to its Participating Share of the “amounts” determined in the second paragraph of Section 12 of the SVC Agreement plus the greater of:

- (a) its Participating Share of the investment in the Transmission Facilities (less any depreciation and amortization to the date of payment) together with all costs relating to or resulting from such termination, cancellation or permanent shutdown, including any premiums and penalties incurred because of the early retirement of any indebtedness and further including without limitation any costs of total or partial demolition and disposal of the Transmission Facilities net of any actual salvage value received by New Hampshire Hydro including the proceeds from any sale and net of the actual proceeds received by New Hampshire Hydro from any condemnation proceeding or insurance for destruction; or
- (b) its Participating Share of the then total capital of New Hampshire Hydro plus any premiums and penalties incurred because of the early retirement of any financing plus without limitation any costs of total or partial demolition and disposal of the Transmission Facilities net of any actual salvage value received by New Hampshire Hydro including the proceeds from any sale and net

of the actual proceeds received by New Hampshire Hydro from any condemnation proceeding or insurance for destruction.

If New Hampshire Hydro and the Advisory Committee agree on the decision to terminate, cancel or permanently shutdown the Transmission Facilities under this Section 16, New Hampshire Hydro shall have and retain, upon termination of this

Agreement, the right to sell the Transmission Facilities (including New Hampshire Hydro's rights to Transmission Facilities in Vermont and the SVC Facilities in Maine) at fair market value to any NEES affiliate of New Hampshire Hydro. Any amounts received from such sale shall be considered salvage value under (a) or (b) above. If New Hampshire Hydro's recommendation to terminate, cancel or permanently shutdown is not adopted by the Advisory Committee, New Hampshire Hydro shall be paid an amount determined in accordance with this Section 16 and if directed by the Advisory Committee shall transfer its rights, assets, and obligations related to the Transmission Facilities to the Participants or any group or designee thereof. New Hampshire Hydro's lease of the right-of-way shall be assigned in connection with such transfer.

If New Hampshire Hydro is paid such amount and transfers its rights, assets, and obligations related to the Transmission Facilities to the Participants or any group or designee thereof, New Hampshire Hydro shall refund any costs of total or partial demolition and disposal of the Transmission Facilities to such Participants or group or designee thereof.

Section 17. Termination by New Hampshire Hydro

If at any time New Hampshire Hydro elects and so notifies in writing all Participants that, as a result of a default under Section 15, the Participating Share of a terminated Participant cannot be allocated to Equity Sponsors or their appointees or other Participants pursuant to

Section 15B and the aggregate of the Participating Shares of all nonterminated Participants is less than 100%, each such other Participant's participation hereunder shall terminate on a date (effective date of termination) not less than 90 days after the date of New Hampshire Hydro's written notice, and each such other Participant on or before the effective date of termination shall pay to New Hampshire Hydro an amount calculated in accordance with the second paragraph of Section 16.

Upon termination of this Agreement pursuant to this Section 17, New Hampshire Hydro shall offer each Participant which (i) was not a terminated Participant immediately prior to termination of the Agreement pursuant to this Section 17 and (ii) has paid all amounts due under the first paragraph of this Section 17, an opportunity to participate in a new support agreement, provided that all participants in such new support agreement agree to pay 100% of the costs of service of New Hampshire Hydro, including, without limitation, the "amounts" that New Hampshire Hydro must pay to Chester SVC Partnership pursuant to Section 8 of the SVC Agreement. The new support agreement will have a term equal to the remaining term of this Agreement. Other provisions of the new support agreement will be substantially similar to those in this Agreement. The investment in the Transmission Facilities under the new support agreement shall be reduced by any amount received as termination payments hereunder which would be properly applied to utility plant accounts in accordance with the Uniform System less any costs of termination or premiums or penalties incurred because of the early retirement of any financing of New Hampshire Hydro. Any participant in the new support agreement shall also be a supporter of the AC facilities of New England Power and Boston Edison Company and the transmission facilities of New England Hydro.

No termination of this Agreement shall relieve any party of any obligation arising prior to making the payment to New Hampshire Hydro required by the first paragraph of this Section 17. In addition, notwithstanding the termination of this Agreement for other purposes, this Agreement shall continue in effect to the extent necessary to provide for paying all “windup costs” and final billings, billing adjustments and payments.

Section 18. Debt Service Fund

New Hampshire Hydro may establish and maintain at its option a Debt Service Fund with funds which may be borrowed from unaffiliated third parties. The Debt Service Fund may be assigned in connection with a financing by New Hampshire Hydro with the Lenders in order to provide assurance to such Lenders that New Hampshire Hydro will pay its debt service obligations in a timely manner.

The Debt Service Fund shall not exceed the lesser of (i) the amount required to pay six months of interest on indebtedness plus five percent of the largest principal amount of debt outstanding at any time plus any accrued earnings from investment of the amounts in the Debt Service Fund not yet credited to Support Charges as provided in Section 12 or (ii) the total amount of debt service remaining to be paid.

Section 19. Cash Deficiency Commitment

A. “Cash Deficiency” attributed to a Participant means with respect to any Due Date, the amount by which that Participant’s Participating Share of the aggregation of the principal of, premium, if any, and interest on any of the funds borrowed by New Hampshire Hydro from Lenders to finance the Transmission Facilities or the construction thereof and payable on such Due Date (whether at maturity, pursuant to mandatory prepayment, by acceleration or otherwise) exceeds the amount of cash from such Participant’s payments made under any other section of

this Agreement and available to New Hampshire Hydro for repayment to Lenders of such borrowed funds.

B. If New Hampshire Hydro has a Cash Deficiency attributed to a Participant on any Due Date, that Participant agrees that it shall absolutely and unconditionally guarantee to pay its Cash Deficiency on demand of Lenders, to be paid directly on demand to Lenders, in cash, provided, however, that no Cash Deficiency attributed to a Participant shall include any unpaid obligations hereunder of other Participants.

For purposes of this Section 19, "Due Date" shall mean the date any payments are due and payable under the terms of any indebtedness of New Hampshire Hydro with Lenders.

C. Payments by Participants under this section shall be considered by New Hampshire Hydro to be prepayments of amounts due or to become due to New Hampshire Hydro pursuant to any other section hereof.

Section 20. Miscellaneous

A. Insurance. New Hampshire Hydro will at all times during the term of this Agreement keep the Transmission Facilities insured against such risks as electric utility companies, similarly situated, constructing and operating like properties, usually insure against. Any uninsured loss, damage, or liability related to the Transmission Facilities or arising out of New Hampshire Hydro's performance hereunder and any expenses in connection with any such loss, damage, or liability shall be deemed to be an expense reimbursable by the Participants in accordance with Section 12. New Hampshire Hydro will assist any Participant, at the Participant's expense, in obtaining any other insurance coverage related to the Transmission Facilities that such Participant requires. Upon request, New Hampshire Hydro will supply certificates of insurance coverage.

B. Limitation of Liability. For and in consideration of the fact that New Hampshire Hydro is undertaking to design, engineer, procure, install, construct, operate, and maintain the Transmission Facilities for and on behalf of Participants without any compensation or charge other than the payments provided under this Agreement, no Participant shall be entitled to recover from New Hampshire Hydro or any affiliate or any shareholder, director, officer, employee, or agent of New Hampshire Hydro or any affiliate, any damages resulting from error or delay, whether or not due to negligence, in the design, engineering, procurement, installation or construction of the Transmission Facilities, or for any damage to the Transmission Facilities, any curtailment of power, or any other damages of any kind, including but not limited to consequential damages, arising out of or in connection with the performance of this Agreement by New Hampshire Hydro. Notwithstanding the above limitation, if New Hampshire Hydro is found by a court of competent jurisdiction to have intentionally violated this Agreement in a material manner or to have acted hereunder in a grossly negligent manner and if such court finding is final and no longer subject to appeal, then the Participants shall be entitled to recover from New Hampshire Hydro direct damages (but not consequential or any other damages) resulting from such material intentional violation or gross negligence, unless New Hampshire Hydro's actions or omissions have been expressly approved in advance by the Advisory Committee. New Hampshire Hydro will use its best efforts to enforce all contracts related to the construction and operation of the Transmission Facilities for the benefit of New Hampshire Hydro and the Participants.

C. Audit. New Hampshire Hydro will arrange for an annual audit to be performed by an independent public accounting firm of recognized standing selected by New Hampshire Hydro. The costs of the annual audit will be included in the operating expenses under Section

12. The books and records of New Hampshire Hydro (including metering records) shall be open to reasonable inspection and audit by any Participant. The costs of any such additional audit, including the costs of New Hampshire Hydro in connection with such audit, shall be borne by the Participant or Participants requesting such audit. New Hampshire Hydro will promptly make any reasonable corrections necessitated as a result of the annual audit or an additional audit.

D. Cost Reimbursement. In the event New Hampshire Hydro reasonably incurs any costs not provided for elsewhere herein in connection with or as a result of planning, organizing, documenting, construction, suspensions, rescheduling, cancellation, operation, maintenance, shutdown, demolition, disposition, or termination of the Transmission Facilities, or otherwise arising in connection with this Agreement, each Participant shall promptly reimburse to New Hampshire Hydro, within 15 days of the mailing date of the invoice, its Participating Share of such costs. Each Participant's obligation to reimburse New Hampshire Hydro under this Section shall also include its Participating Share of the amounts that New Hampshire Hydro must pay to Chester SVC Partnership under Section 11B or Section 12 of the SVC Agreement. However, New Hampshire Hydro will endeavor to finance any additional costs, to the extent such additional costs are properly capitalizable, over the shorter of the then remaining useful life of the Transmission Facilities, the remaining term of the Agreement, or the remaining term of its permanent financing. For the purpose of this subsection, the Transmission Facilities shall include the SVC Facilities as defined in the SVC Agreement.

E. Uncontrollable Force. No delay or failure in the performance of any obligation by New Hampshire Hydro shall be deemed to exist if it is the result of an "uncontrollable force". The term "uncontrollable force" shall be deemed to mean any cause beyond the reasonable control of New Hampshire Hydro, which New Hampshire Hydro could not reasonably have been

expected to avoid by exercise of due diligence and foresight, including, without limiting the generality of the foregoing, storm, flood, lightning, earthquake, fire, explosion, failure of facilities not due to lack of proper care or maintenance, civil disturbance, labor disturbance, sabotage, war, national emergency, or restraint by court or public authority. In such event, New Hampshire Hydro shall use reasonable diligence to notify the Participants of such event.

F. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of, and may be performed by, the successors and assigns of the parties and shall also be binding, insofar as permitted by law, on any receiver or trustee in bankruptcy, receivership, or reorganization of any party. Except (i) for a reallocation resulting from a default as provided in Section 15, (ii) for a sale, merger, or consolidation which is approved by New Hampshire Hydro and results in the transfer of substantially all of a Participant's assets to, and the assumption of all of the Participant's obligations hereunder by, an electric utility which is a member of NEPOOL, and (iii) for an assignment by New Hampshire Hydro to a NEES affiliate of New Hampshire Hydro which expressly assumes New Hampshire Hydro's rights and obligations hereunder and acquires the Transmission Facilities, and (iv) for a transfer of any or all of a Participant's Participating Share prior to the Effective Date as provided in Section 4A hereof, no assignment of this Agreement shall operate to relieve the assignor of its obligations under this Agreement without the written consent of the parties hereto. In addition to New Hampshire Hydro's right to assign to an affiliate, New Hampshire Hydro may assign, without the consent of the Participants, its right, title, and interest in this Agreement, in whole or in part, and any security interests contained herein or granted hereunder, to one or more banks, investment banking firms, insurance companies, other financial institutions, or others as collateral security for New

Hampshire Hydro's obligations in connection with financing the Transmission Facilities. Written notice to all parties will be given prior to any assignment hereunder.

G. Right of Setoff. No Participant shall be entitled to set off against the payments required to be made by it hereunder (1) any amounts owed to it by New Hampshire Hydro, any affiliate of New England Hydro, any Equity Sponsor, or any other Participant or (2) the amount of any claim by it against New Hampshire Hydro, any affiliate of New Hampshire Hydro, any Equity Sponsor, or any other Participant. However, the foregoing shall not affect in any other way any Participant's rights and remedies with respect to any such amounts owed to it by New Hampshire Hydro, any affiliate of New Hampshire Hydro, any Equity Sponsor, or any other Participant or any such claim by it against New Hampshire Hydro or any other Participant.

H. Amendments. New Hampshire Hydro shall have the right to amend the provisions of Section 12 hereof from time to time by serving an appropriate statement of such amendment upon the Participants and filing the same with the Federal Energy Regulatory Commission (or such other regulatory agency as may have jurisdiction) in accordance with the provisions of applicable laws and any rules and regulations thereunder, and the amendment shall thereupon become effective on the date specified therein, subject to any suspension order duly issued by such agency. The Participants have the right to intervene in any regulatory proceeding brought by New Hampshire Hydro to consider such amendment of the provisions of Section 12.

Any amendments changing the Participating Shares of the Participants, the rights of the Participants or a Participant as specified in Section 11, or the several nature of the obligations and rights of the Participants hereunder as specified in Section 5, shall require consent by all parties. All other amendments to this Agreement shall be by mutual agreement of New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66 2/3%,

evidenced by a written amendment signed by New Hampshire Hydro and such Participants; and New Hampshire Hydro and all Participants shall be bound by any such amendment.

I. Notices. Except as the parties may otherwise agree, any notice, request, bill, or other communication, relating to this Agreement, or the rights, obligations or performance of the parties hereunder, shall be in writing and shall be effective upon delivery. Any such communication shall be considered as duly delivered when delivered in person or mailed by registered or certified mail, postage prepaid, to the respective post office address of the other parties shown following the signatures of such other parties hereto, or such other address as may be designated by written notice given as provided in this paragraph I.

J. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of The Commonwealth of Massachusetts.

K. Other.

(1) No action, regardless of form, arising out of this Agreement may be brought by any party hereto more than three years after the cause of action has arisen.

(2) In the event that any clause or provision of this Agreement, or any part thereof, shall be declared invalid or unenforceable by any court having jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of the remaining portions of this Agreement.

(3) All provisions of this Agreement providing for limitation of, or protection against, liability shall apply to the full extent permitted by law, and regardless of fault, and shall survive either termination pursuant to this Agreement or cancellation.

(4) Each party shall, upon request of another party, execute and deliver any document reasonably required to implement any provision hereof.

(5) Any number of counterparts of this Agreement may be executed and each shall have the same force and effect as the original.

(6) This Agreement, with the other Basic Agreements, Preliminary Quebec Interconnection Support Agreement - Phase II, the agreements with Hydro-Quebec regarding Phase II, and the basic agreements covering Phase I shall constitute the entire understanding among the parties and shall supersede any and all previous understandings pertaining to the subject matter of this Agreement.

(7) This Agreement is the act and obligation of the parties hereto in their corporate or governmental capacity, and any claim hereunder against any shareholder, director, officer, employee, or agent of any party, as such, is expressly waived.

Section 21. Refund of Gain on Sale or Other Disposition of Transmission Facilities

In the event that any of the Transmission Facilities are sold or otherwise disposed of during the term of this Agreement, if the Net Proceeds (defined as the amount received from such sale or disposition less all costs relating to or resulting from such sale or disposition, including without limitation any income taxes relating to or resulting from such sale or disposition, any premiums and penalties incurred because of the early retirement of any indebtedness associated with the sold or disposed of Transmission Facilities, and any costs of total or partial demolition of the sold or otherwise disposed of Transmission Facilities) from such sale or disposition exceed the greater of (i) the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) or (ii) the then total capital of New Hampshire Hydro (as defined in Section 12), New Hampshire Hydro shall (a) refund to the then current Participants, in proportion to their then current Participating Shares, any such excess, and (b) credit to the accumulated provision for depreciation and amortization

related to the investment in the Transmission Facilities the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition). The total capital of New Hampshire Hydro, for the purposes of this section, may exceed the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) due to (1) any reserve for deferred income taxes paid by New Hampshire Hydro or (2) for other reasons related to the investment in the Transmission Facilities. If the Net Proceeds do not exceed the greater of (i) or (ii) above, the Net Proceeds will be credited to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities in lieu of payment to the Participants. The Participants agree to flow through any such refunds to their customers and shall seek any necessary regulatory approvals to reflect in their rates any such refunds and the effect of any such credits to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities; except that to the extent that a Participant's customers' rates have not reflected all or a portion of that Participant's share of the costs of the Transmission Facilities, then that Participant agrees that a complete flow-through of such refunds may not be appropriate and that particular Participant shall seek any necessary regulatory approvals for the appropriate disposition of an appropriate portion of such refunded amounts or credits.

IN WITNESS WHEREOF, the signatories have caused this Agreement to be executed by their duly authorized officers or agents.

- (a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.
- (b) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.
- (c) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, Concord shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.
- (d) Includes New Hampshire retail 1980 kilowatthour load of 4,939,218,744.

- (e) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.
- (f) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

ATTACHMENT B

Description of the Transmission Facilities

The Transmission Facilities will include the following:

- (1) the continuation of a single circuit  $\pm$  450 kV DC line on an existing right-of-way from the Comerford Substation to the New Hampshire state line at Hudson, a distance of 121 miles;
- (2) communication equipment located in New Hampshire; and
- (3) such other facilities in New Hampshire and Vermont as approved by the Advisory Committee.

ATTACHMENT C

Forms of the following documentation:

- 1. Opinion of Counsel
- 2. Certificate
- 3. Incumbency and Signature Certificate
- 4. Directors' Vote

[Please note - governmental entities may make appropriate modifications to these documents to reflect that they are not corporations.]

[Form of Opinion of Counsel for Each Utility Participant]

New England Hydro-Transmission  
Electric Company, Inc.;;  
New England Hydro Transmission  
Corporation; or  
New England Power Company

Gentlemen:

This opinion is furnished in connection with the execution and delivery by \_\_\_\_ (the Company) of the following Agreements:

\_\_\_\_\_.

We have acted as counsel to the Company, one of the Utility Participants, in connection with the execution and delivery of the Basic Agreements. We participated in reviewing and/or drafting the Agreements.

As general [special] counsel to the Company, we are generally familiar with its affairs. [If special counsel is giving the opinion, describe relationship to the Company.] We have reviewed the proceedings taken by the Company in connection with its authorization, execution, and delivery of the Agreements and any documentation supplied by the Company thereunder. We have also examined executed counterparts of the Agreements, have made such other investigation, and have examined such other records and documents, and have made such examination of law and satisfied ourselves as to such other matters as we have deemed relevant and necessary in order to enable us to express the opinions set forth below.

Based upon and subject to the foregoing and to the further qualifications in this opinion, we are of the opinion that:

1. The Company is a corporation duly organized, validly existing and in good standing under the laws of [the jurisdiction of its incorporation], has the corporate power to own its assets and to transact the business in which it is engaged, and is duly qualified as a foreign corporation in, and is in good standing under the laws of, each jurisdiction in which the conduct of its business or the ownership of its assets requires such qualification.

2. The Company has (and in the case of the Agreements at the time of execution and delivery thereof, had) full corporate power, and legal right to execute, deliver and perform the Agreements, and the Company has taken all necessary corporate action to authorize the execution, delivery, and performance by it of the Agreements.

3. The execution, delivery, and performance by the Company of the Agreements do not (a) contravene the Company's [charter documents] or by-laws, (b) violate any applicable law, rule, regulation, order, writ, judgment, injunction, decree, or award known to us by which the Company is bound, (c) violate any indenture, instrument, or agreement known to us by which the Company is bound, or (d) result in or require the creation or the imposition of any lien pursuant to the provisions of any indenture, instrument, or agreement known to us by which the Company is bound.

4. No authorization, approval, consent, or other action by, and no notice to or filing with, any federal, state, or other governmental authority or regulatory body which has not been obtained or given and is not in full force and effect is required for the valid and lawful execution, delivery, and performance by the Company of the Agreements. [In this connection, to the extent it may be required by law, the approval of the Massachusetts Department of Public Utilities [Connecticut PUC, or other] has been given for the Agreements and the Company's performance thereunder by order(s) dated \_\_\_\_\_, which remains in full force and effect.]

5. The Agreements have each been duly executed and delivered by the Company and constitute the legal, valid, and binding obligations of the Company enforceable against it in accordance with their respective terms.

6. No action, suit, proceeding, or investigation at law or in equity or by or before any governmental instrumentality or other agency now pending or threatened against or affecting the Company or its property or rights which, if adversely determined, would materially impair the ability of the Company to perform its obligations under the Agreements is known to us.

Our opinion that the Agreements are enforceable, each in accordance with the terms thereof, is qualified to the extent that the enforcement of the rights and remedies created thereby is subject to bankruptcy, insolvency, reorganization, and similar laws of general application affecting the rights and remedies of creditors and secured parties, and to the further extent that the availability of the remedies of specific enforcement, injunctive relief, or any other equitable remedy is subject to the discretion of the court before which any proceeding therefor may be brought.

Very truly yours,

#### CERTIFICATE

I, (insert name), the Clerk (or Secretary or other principal recording officer) of (insert name of Utility Participant), a (insert state of organization) (the "Company") do hereby certify that:

(1) Attached hereto as Exhibit A is a true and correct copy of a vote duly adopted at a meeting of the Board of Directors of the Company, duly called and held on \_\_\_\_\_, \_\_\_\_\_, and that such vote and the authority vested thereby have not been amended or revoked and are still in full force and effect.

(2) Attached hereto as Exhibit B is a true and correct copy of the Articles of Organization (or other charter documents) of the Company, as amended and in effect as of the date of this Certificate.

(3) Attached hereto as Exhibit C is a true and correct copy of the By-Laws of the Company, as amended and in effect as of the date of this Certificate.

(4) The persons (or person) listed on Exhibit D have been duly elected to the offices set forth adjacent to their respective names since the first day of June, 1985, and the signatures adjacent to their respective names are the genuine signatures of said officers.

IN WITNESS WHEREOF, I have placed my hand and the seal of the Company this \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_.

FORM OF DIRECTORS' VOTE APPROVING AGREEMENTS

VOTED:

That in connection with this Company's participation in the Phase II expansion of the proposed interconnection between the New England Power Pool companies and Hydro-Quebec, the execution and delivery on behalf of this Company by \_\_\_\_\_, President, of the following agreements: (being collectively referred to in this vote as "Agreements") copies of which Agreements have been presented at this meeting, are hereby authorized, approved, ratified, and confirmed, and that the officers of this Company are further authorized severally to take any and all such further actions including the execution and delivery of such further documents, as such officers or any of them may deem necessary or appropriate in connection with the actions and documents authorized by this vote.

ATTACHMENT E

Subscription Process for Determining  
Initial Participating Shares

After allocation of up to 10% of the Participating Shares pursuant to Section 4(B)(1) and (2), the remaining shares shall be allocated to Participants as follows:

- a. Each Participant shall be entitled to a pro rata share of the remainder based on its 1980 Kwh load as a percentage of all Participants' 1980 Kwh loads.
- b. Upon execution of this Agreement, each Participant may subscribe for more or less than its share under (a) above.

- c. If there are no undersubscriptions or oversubscriptions under (b) above or if the sum of the shares under (a) or (b) above for all Participants equals 100% of such remaining shares, then each Participant shall have a share as determined under (a) or (b) above. For the purposes of this section, oversubscription shall mean, with respect to any Participant, a subscription under (b) above of more than its share under (a) above. For the same purposes, undersubscription shall mean, with respect to any Participant, a subscription under (b) above of less than its share under (a) above. The amount of such oversubscription shall be equal to (b) minus (a) and the amount of such undersubscription shall be equal to (a) minus (b.)
- d. If there are undersubscriptions but no oversubscriptions or if there are oversubscriptions but no undersubscriptions, then each Participant shall have a share as determined under (a) above.
- e. If the net result of subtracting the aggregate amount of all undersubscriptions from the aggregate amount of all oversubscriptions is greater than zero, the aggregate amount of all oversubscriptions must be reduced to the aggregate amount of all undersubscriptions. This amount shall be referred to as the total permitted amount of oversubscriptions. Each oversubscriber shall initially be allocated a share of the total permitted amount of oversubscriptions (pro rata by the 1980 kwh loads of the oversubscribers); provided that no oversubscriber shall be allocated more than its requested amount under (b) above. Any remaining unallocated portion of the total permitted amount of oversubscriptions shall be allocated to all oversubscribers that have not yet reached their requested amount under (b) above pro rata by the differences between their requested amounts under (b) above and their amounts allocated thus far under this section (d).
- f. If the net result of subtracting the aggregate amount of all oversubscriptions from the aggregate amount of all undersubscriptions is greater than zero, the aggregate amount of all undersubscriptions must be reduced to the aggregate amount of all oversubscriptions. This amount shall be referred to as the total permitted amount of undersubscriptions. The total permitted amount of undersubscriptions shall be allocated to the undersubscribers pro rata by the amounts of their undersubscriptions.

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New Hampshire Hydro's ability to finance the project. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An "investment grade" Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An "investment grade" Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.4%) or less and which has outstanding junior long-term debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.) "Qualified debt ratings" are defined as a minimum rating of Baa3 by Moody's Investors Service, BBB- by Standard & Poor's Corporation and D&P 10 by Duff & Phelps, Inc.

Any "substitute credit enhancement" shall mean, with respect to any New Hampshire Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of "AA" or better in form and substance satisfactory to New Hampshire Hydro or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New Hampshire Hydro, or (iii) a guarantee from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II Massachusetts Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant's share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported

under such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant's Participating Share of the maximum amount of obligations under such New Hampshire Hydro debt financing plus, if not already provided in connection with any other debt financing of New Hampshire Hydro or New England Hydro, that Participant's Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant's Participating Share of the debt obligations of Boston Edison Company and New England Power Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively, of the amounts included therein for covering such debt obligations.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing is required to be paid by the Participants. If a Participant is a Credit Enhanced Participant by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant will be paid by all Participants with each Participant paying its Participating Share thereof; provided, however, that if a Participant is a Credit Enhanced Participant due to lack of debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant shall be paid by such Participant.

The Credit Enhancement Charge (E) attributed to a Credit Enhanced Participant is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

- F = the Credit Enhancement Charge for each New Hampshire Hydro debt financing that is credit enhanced for the Participant.
- i = a number from 1 to n representing each of New Hampshire Hydro debt financings.
- n = total number of such financings.
- G = the Participant's Participating Share (in percent)
- H = the maximum outstanding amount of New Hampshire Hydro debt during the month which was credit enhanced for such Participant
- I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

Participant's  
Debt Rating\*

I(%)

Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing.

J = an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal 0 and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New Hampshire Hydro's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes

#### ATTACHMENT G

#### FORM OF EQUITY FUNDING AGREEMENT

FOR

NEW ENGLAND HYDRO-TRANSMISSION CORPORATION

This AGREEMENT dated as of June 1, 1985, is between New England Hydro-Transmission Corporation (New Hampshire Hydro) and the New England entities listed in Attachment A hereto. Those New England entities that have executed this Agreement and that meet the further conditions for participation and qualification hereunder are hereinafter referred to as Equity Sponsors or individually as an Equity Sponsor. The Equity Sponsors are sometimes referred to collectively herein, but their rights and obligations

hereunder are several and not joint as described in Section 6 hereof.

In consideration of the premises, the concurrent execution of the other Basic Agreements hereinafter referred to, the mutual covenants hereinafter and therein set forth, and other good and valuable consideration, receipt whereof is hereby acknowledged, it is hereby agreed as follows:

Section 1. Basic Understandings and Purpose

New England utilities are currently participating in the arrangements for the Phase I interconnection planned by the New England Power Pool (NEPOOL) with Hydro-Quebec, which is to consist of a  $\pm$  450 kV HVDC transmission line from a terminal at the DES Cantons Substation on the Hydro-Quebec system near Sherbrooke, Quebec to a terminal having an approximate rating of 690 MW at a substation at the Comerford Generating Station on the Connecticut River (hereinafter referred to as Phase I). The basic arrangements covering the portion of Phase I in the United States are set forth in the New England Power Pool Agreement, as amended (the NEPOOL Agreement) and three contracts among the participants in Phase I as follows:

(1) Vermont Transmission Line Support Agreement, dated as of December 1, 1981, as amended, with Vermont Electric Transmission Company, Inc.

(2) Phase I Terminal Facilities Support Agreement, dated as of December 1, 1981, as amended, with New England Electric Transmission Corporation, and

(3) Agreement With Respect To Use Of Quebec Interconnection, dated as of December 1, 1981, as amended, including the restatement thereof in connection with Phase II (this Agreement as restated to cover Phase II is hereinafter referred to as the Use Agreement).

These Phase I interconnection facilities are currently under construction with completion scheduled during 1986.

With the completion of arrangements for Phase I and the related contracts with Hydro-Quebec, the members of NEPOOL have conducted studies of the benefits of an expanded interconnection for NEPOOL with Hydro-Quebec (Phase II) and have negotiated with Hydro-Quebec a firm energy arrangement to utilize the expanded interconnection facilities.

The portion of Phase II in the United States will consist of an extension of the Phase I DC transmission line from the proposed terminus of Phase I at the Comerford Station through New Hampshire to a site in Massachusetts with additional terminal facilities installed at that site to increase the total transfer capacity between Hydro Quebec and NEPOOL from the 690 MW of Phase I to approximately 2000 MW. Reinforcements to the existing AC transmission system of New England Power and to certain AC facilities of Boston Edison Company will also be required. The United States portion of the Phase II facilities will be designated as pool-planned facilities in the same manner as the United States portion of the Phase I facilities was so designated.

Each Equity Sponsor acknowledges that it has been represented on the Executive and Planning Committees of NEPOOL that had responsibility for evaluating the feasibility of Phase II and, through this representation, actively participated in the decision of

NEPOOL to go forward with Phase II. Furthermore, each Equity Sponsor represents that it made its own independent investigations and inquiries as it deemed appropriate and did not rely upon representations (other than those contained in this Agreement) of New England Hydro or its affiliates in deciding to enter into this Agreement.

The share of benefits among the New England utilities associated with Phase II is set forth in the Use Agreement. The Use Agreement also permits each New England utility to make its own entitlement transactions with Hydro Quebec and to use the interconnection for such transactions.

The provisions of the Phase II Massachusetts Transmission Facilities Support Agreement (Massachusetts HVDC Support Agreement) cover the Phase II Massachusetts HVDC transmission line and terminal facilities in Massachusetts. New England Hydro-Transmission Electric Company, Inc. (New England Hydro) will build, own, operate, and maintain those Massachusetts HVDC transmission facilities.

The portion of the Phase II HVDC transmission line to be constructed in New Hampshire is covered under the Phase II New Hampshire Transmission Facilities Support Agreement (New Hampshire HVDC Support Agreement). New Hampshire Hydro will build, own, operate, and maintain those New Hampshire HVDC transmission facilities.

All improvements and reinforcements to the AC transmission system in Massachusetts necessitated by Phase II are covered under the Phase II New England Power AC Facilities Support Agreement (New England Power AC Support Agreement) and the Phase II Boston Edison AC Facilities Support Agreement (Boston Edison AC Support Agreement).

The provisions of this Agreement cover the commitments of the Equity Sponsors of New Hampshire Hydro to contribute equity funds to New Hampshire Hydro, to provide certain limited credit support in connection with debt financing of New Hampshire Hydro and to accept an allocation of a share of Phase II in the event of a default by certain participating New England utilities under certain other Basic Agreements.

In view of the need to formalize the agreements among the parties at an early date so that (i) binding commitments with Hydro Quebec for Phase II may be made, (ii) binding commitments for ultimate construction and the financing of the United States portion of Phase II may be undertaken consistent with the time schedule anticipated by NEPOOL and with the assurance that commitments among the New England utilities are in place, and (iii) licensing activities may proceed on a schedule that enables completion of such construction consistent with the time schedule anticipated by NEPOOL, the following agreements are concurrently being entered into (the "Basic Agreements") which collectively set forth rights and obligations with respect to the foregoing undertaking: (1) this Agreement, (2) the Massachusetts HVDC Support Agreement; (3) the New Hampshire HVDC Support Agreement; (4) the Equity Funding Agreement for New England Hydro; (5) the New England Power AC Support Agreement; (6) the Use Agreement; (7) various amendments to the NEPOOL Agreement relating to the sharing of savings, capability responsibilities, and Pool transmission arrangements; and (8) the Boston Edison AC Support Agreement.

In order to coordinate each participating utility's interest in Phase II to the fullest extent possible, each of the following Basic Agreements have been drafted with the intent that the participating interest of each participating utility will be the same under each agreement: the Massachusetts HVDC Support Agreement, the New Hampshire HVDC Support Agreement, the New England Power AC Support Agreement, the Boston Edison AC Support Agreement, and the Use Agreement. These Basic Agreements also provide that, notwithstanding any provision thereof that may be interpreted to the contrary, the proper interpretation of each of these Basic Agreements is to be consistent with such overriding intent. Each Equity Sponsor acknowledges this overriding intent and agrees that any action by it or its appointee affecting such participating interests shall be the same under this Agreement and the Equity Funding Agreement with New England Hydro in order to also be consistent with such overriding intent.

## Section 2. Conditions Precedent to Effectiveness

The effectiveness of this Agreement, and all rights, obligations, and performance of the signatories hereunder, is subject to (i) New England Electric System (NEES) and other signatories having executed this Agreement committing in the aggregate to Equity Shares (as hereinafter defined) equal to at least 100%, and each such signatory having demonstrated by December 30, 1985, to the satisfaction of New Hampshire Hydro that is qualified to be an Equity Sponsor pursuant to Section 4, (ii) New England Hydro or New Hampshire Hydro or New England Power or Boston Edison and members of NEPOOL (including Boston Edison and New England Power) serving at least 66-2/3% of the aggregate kilowatt-hour load served by NEPOOL members in 1980 having executed the other Basic Agreements (except for the Equity Funding Agreement for New England Hydro and the amendments to the NEPOOL Agreement), (iii) each signatory having also executed the Equity Funding Agreement for New England Hydro and having the same percentage of New England Hydro's equity as its Equity Share hereunder, (iv) members of NEPOOL having executed the amendments to the NEPOOL Agreement for Phase II in order that such amendments may become effective in accordance with the NEPOOL Agreement, and (v) each signatory having satisfied the conditions precedent set forth below.

By June 1, 1986, each signatory to this Agreement shall provide certificates and legal opinions from counsel satisfactory to New Hampshire Hydro, together with certified copies of related resolutions, consents, approvals, authorizations, and other documents (Documentation) necessary to establish to the satisfaction of New Hampshire Hydro that all corporate and regulatory consents, waivers, approvals, authorizations and other actions necessary in connection with performance by such signatory of its obligations under the Agreement have been obtained and are in full force and effect, that the Agreement has been duly authorized, executed, and delivered by such signatory, and that it constitutes a binding commitment by the signatory enforceable in accordance with its terms. Forms of Documentation acceptable to New Hampshire Hydro are included in Attachment B hereto. Prior to signing this Agreement, each signatory has provided to New Hampshire Hydro a listing of all consents, waivers, approvals, authorizations, and other actions required for that signatory to deliver its Documentation.

Vermont Electric Power Company, Inc. (VELCO) and Massachusetts Municipal Wholesale Electric Company (MMWEC)

represent a number of electric systems. If they desire and are qualified to be Equity Sponsors, they shall be deemed to have signed on behalf of those respective systems listed in Schedules I or II, respectively. By March 1, 1986, VELCO and MMWEC will provide New Hampshire Hydro with copies of contracts with their respective systems which impose absolute and unconditional obligations on such systems to pay their proportionate shares of all costs or obligation incurred under this Agreement by VELCO or MMWEC, respectively. By that date, VELCO and MMWEC will also provide to New Hampshire Hydro as part of their Documentation certificates, legal opinions (from counsel satisfactory to New Hampshire Hydro), and other documents in form and substance satisfactory to New Hampshire Hydro representing unconditionally that all consents, approvals, and authorizations have been obtained by their contracting systems in connection with each such system's performance of its obligations under its respective contract with VELCO or MMWEC and that each such contract imposes absolute and unconditional obligations on such systems to pay their proportionate shares of all costs incurred under this Agreement by VELCO or MMWEC, respectively, and has been duly authorized, executed, and delivered and is a binding commitment of such system enforceable in accordance with its terms. If regulatory approvals have not been obtained by March 1, 1986, such representations shall be conditioned upon receipt of regulatory approvals. VELCO and MMWEC will have until June 1, 1986, to receive such approvals and make such representations unconditionally. In order that percentages of participation be consistent among the Basic Agreements, VELCO and MMWEC shall have their contracts with their contracting systems cover the necessary commitments for each Basic Agreement.

All expenses in connection with obtaining and delivering any Documentation under this Agreement, including legal opinions, are to be borne by the signatory incurring such expense. New Hampshire Hydro will have no responsibility for any expenses incurred by VELCO and MMWEC in providing Documentation for their respective contracting systems.

Any signatory that fails to meet the requirements of Section 2 by the deadlines contained herein will not be an Equity Sponsor under this Agreement and will not have any rights and obligations hereunder.

New Hampshire Hydro by written notice to all signatories may extend any deadline date specified in this Section to a later date, provided that any extension for longer than six months requires the consent of the Advisory Committee under the New Hampshire HVDC Support Agreement.

### Section 3. Effective Date and Term

This Agreement shall become effective (the Effective Date) upon the last to occur of the following dates:

- (i) the date that the Equity sponsors, committing in the aggregate to Equity Shares (as hereinafter defined) equal to at least 100%, have met the requirements of Section 2; and
- (ii) the date that the last of the other Basic Agreements (excluding the Use Agreement) becomes effective or would become effective but for a condition that its effectiveness is subject to this Agreement becoming effective.

Upon execution and delivery of the Agreement by New Hampshire Hydro and NEES and other signatories committing in the aggregate to Equity Shares (as hereinafter defined) equal to no less than 100%, and notwithstanding any provision herein to the contrary, no signatory may terminate its obligations hereunder except in accordance with provisions of this Agreement.

The term of this Agreement shall expire on termination date of the New Hampshire HVDC Support Agreement.

#### Section 4. Equity Sponsor Qualification

A. In order to enhance New Hampshire Hydro's ability to finance its portion of Phase II as required under the Massachusetts HVDC Support Agreement and to enhance the credit support of certain Supporters under the AC Support Agreement, some or all of the New England utilities participating in Phase II whose credit ratings are at least one grade above the lowest investment grade have agreed to provide, or to cause their designees to provide, credit support for those New England utilities participating in Phase II whose credit ratings are below investment grade. NEES and those New England utilities or their designees which have agreed to provide this credit support are the Equity Sponsors of New Hampshire Hydro under this Agreement.

B. A Participant under the New Hampshire HVDC Support Agreement or its authorized designee qualifies to be an Equity Sponsor by having its outstanding long-term debentures rated at least one grade above the lowest investment grade rating as of September 1, 1985. If no long-term debentures are outstanding, the ratings used shall be those of such company's most junior long-term mortgage or revenue bonds. If no mortgage bonds, revenue bonds, or debentures are outstanding, the ratings used shall be those of the most junior long-term debt. VELCO shall qualify to be an Equity Sponsor if 80% or more of its common stock is owned by utilities whose debt securities qualify pursuant to this subsection 4(B).

For purposes of this Agreement, "one grade above the lowest investment grade rating" means a rating equal to the following ratings from two of these rating agencies: Standard and Poor's Corporation - Rating BBB; Moodys Investor Service - Rating Baal; and Duff & Phelps - Rating D&P 9 (or the equivalent municipal ratings).

C. A "designee" shall be authorized to be an Equity Sponsor if it is a parent company of such Participant and (i) its debt securities meet the appropriate test specified in B above, or (ii) at least 80% of its consolidated utility revenues are derived from subsidiaries whose debt securities meet the appropriate test specified in B above. (For VELCO, each stockholder of VELCO shall be a parent company of VELCO.) On or before the date of execution of this Agreement, each Participant shall identify its designee, if any.

D. In order that the necessary credit enhancement is provided as specified in A above, the qualification of each Equity Sponsor shall be reviewed by New Hampshire Hydro as of the date that the first equity contributions are to be made by such Equity Sponsor. If an Equity Sponsor fails to qualify on such date, appropriate actions and allocations shall be instituted as provided elsewhere in this Agreement.

#### Section 5. Equity Shares

A. Each Equity Sponsor shall have and be charged with a percentage interest in all rights and obligations hereunder

determined in accordance with this Section 5 (which interest is hereinafter referred to as its "Equity Share"). All of the equity of New Hampshire Hydro will be owned by the Equity Sponsors in proportion to their Equity Shares.

The Equity Share of each Equity Sponsor shall be computed both initially and as changed from time to time in accordance with the terms hereof, by New Hampshire Hydro as hereinafter provided. Such computations shall be made as of the first day of any month in which there is a change in the number of Equity Sponsors or any change in the interest of any Equity Sponsor as herein provided. The initial computation is to be made as of September 15, 1985, and subsequent computations are to be made in any month thereafter in which an interest is modified or terminated due (i) to the failure of a signatory to provide proof that it is qualified to be an Equity Sponsor by December 30, 1985, or (ii) to the failure to provide Documentation by June 1, 1986, or (iii) to the failure to be so qualified on the date the first equity contributions are to be made by such Equity Sponsor, or (iv) to the operation of any provision of this Agreement. All computations shall be final unless there is a manifest error. Such computations of Equity Sponsors' Equity Shares as initially calculated and as changed under (i) and (ii) shall be made pursuant to Attachment C. Changes under (iii) shall be made pursuant to section 5(C) below, and changes under (iv) shall be made pursuant to the appropriate section requiring the change.

B. The Equity Shares on and as of the initial computation date, and as of the date of subsequent computations under subparts (i) and (ii) of the second paragraph of A above, will be calculated as follows:

1. 51% to NEES; and
2. 49% apportioned among the other Equity Sponsors on the basis of the subscription process as described in Attachment C.

(Attachment C provides that each Equity Sponsor may specify a maximum percentage of equity and that such maximum shall remain in effect until June 1, 1986 or such later deadline if extended pursuant to Section 2 hereof.)

C. On the basis of New Hampshire Hydro's review of the qualifications of each Equity Sponsor other than NEES as of the date that the first equity contributions are to be made by such Equity Sponsor, if one or more Equity Sponsors are no longer qualified under Section 4, (i) the aggregate Equity Shares of such unqualified Equity Sponsors shall first be offered in writing by New Hampshire Hydro to all then qualified Equity Sponsors other than NEES for voluntary subscription, (ii) second, any remaining shortfall shall be allocated pro rata among such qualified Equity Sponsors not including NEES in proportion to their Equity Shares determined as of June 1, 1986, provided that the aggregate of all involuntary allocations under this Section 4(C) to such qualified Equity Sponsors shall not exceed an aggregate Equity Share of 10%, and further provided that the aggregate of all such involuntary allocations to any such Equity Sponsor shall not increase such Equity Sponsor's Equity Share determined as of June 1, 1986, by more than 25% thereof, and (iii) finally, any remaining shortfalls shall be retained pro rata by such no longer qualified Equity Sponsors in proportion to their Equity Shares determined as of June 1, 1986; provided, however, that NEES and all qualified Equity Sponsors may

agree to other allocation arrangements; and further provided that NEES shall not have an Equity Share of less than 51% unless it so consents. (The above deadlines of June 1, 1986 may be extended to a later deadline pursuant to Section 2 hereof.)

All offerings above shall be made in accordance with a voluntary subscription process as specified in New Hampshire Hydro's offering letter, and any oversubscriptions will be treated as provided therein.

#### Section 6. Relationship Among Equity Sponsors

The rights and obligations of the Equity Sponsors hereunder are several, in accordance with their respective Equity Shares, and not joint. The rights and obligations of New Hampshire Hydro hereunder are also several and not joint with those of the Equity Sponsors or any one thereof. There is no intention to create by this Agreement, or by any grant, lease, license, or activity related hereto, an association, joint venture, trust, or partnership or to impose on New Hampshire Hydro or any Equity Sponsor trust or partnership rights or obligations; and any such implied intention is expressly negated. Except as expressly provided in this Agreement, no Equity Sponsor shall have by virtue of this Agreement or of any such grant, lease, license, or activity the right or power to bind any other Equity Sponsor without its express written consent.

#### Section 7. Equity Contribution

A. Under the Massachusetts HVDC Support Agreement, New England Hydro has agreed to limit its equity investment to a maximum of 40% of its total capital as of the effective date of that agreement and has agreed to use its best efforts to continue to limit its equity investment to 40% of its total capital during the time that New Hampshire Hydro has outstanding debt in its capital structure.

New Hampshire Hydro may call from time to time by written notification upon the Equity Sponsors to contribute equity in any of the forms set forth in this Section up to a maximum aggregate amount of \$90 million, provided that Equity Sponsors having 66-2/3% of Equity Shares may agree to increase this maximum aggregate amount; and then all Equity Sponsors shall contribute such requested amount with each Equity Sponsor contributing up to its Equity Share of the new maximum. Any contribution made in response to New Hampshire Hydro's call in excess of the maximum aggregate amount, as adjusted from time to time, may be made on a voluntary basis by any contributing Equity Sponsor, and New Hampshire Hydro will make an appropriate adjustment in Equity Shares.

B. During the term of this Agreement, New Hampshire Hydro has the option from time to time to call for contribution of equity in any of the following forms:

(1) New Hampshire Hydro may offer shares of its common stock to its Equity Sponsors and each Equity Sponsor shall subscribe for and purchase, for cash at a price set by New Hampshire Hydro, its Equity Share of the common stock so offered.

(2) After each Equity Sponsor owns common stock of New Hampshire Hydro, New Hampshire Hydro may request that capital contributions be made, and each Equity Sponsor shall contribute to New Hampshire Hydro its Equity Share of the total capital contribution so requested.

C. In order that New Hampshire Hydro may limit its equity investment to a maximum of 40% of its total capital, New Hampshire Hydro may, at its option, from time to time, take any of the following actions:

(1) New Hampshire Hydro may repurchase for cash its common stock from Equity Sponsors in amounts that will not change the relative Equity Shares among Equity Sponsors and at a price per share equal to book value per share at the time of repurchase. Each Equity Sponsor shall sell such common stock to New Hampshire Hydro in the full amount so requested.

(2) New Hampshire Hydro may return any capital contribution previously received from Equity Sponsors in amounts that will not change the relative Equity Shares among Equity Sponsors. Each Equity Sponsor shall accept such return of capital contribution in the full amount so returned.

(3) New Hampshire Hydro may pay dividends out of earnings or make liquidating dividends to the Equity Sponsors.

D. New Hampshire Hydro shall give written notice of any call for contributions of equity under B above to each Equity Sponsor. Such notice shall specify the amount to be contributed, the form of the contribution, and a date, at least thirty days after the date of the notice, that the equity is to be contributed. New Hampshire Hydro will provide annually estimates of its equity requirements and estimated dates when any equity contributions hereunder will be due. New Hampshire Hydro shall give written notice of any action to reduce its equity under C above to each Equity Sponsor. Such notice shall specify the amount and form of the reduction and a date, at least fifteen days after the date of the notice, that the reduction in equity is to occur.

E. New Hampshire Hydro shall use the proceeds of any equity contribution under this Agreement for the sole purpose of meeting its capital requirements under the New Hampshire HVDC Support Agreement.

F. All transactions under B, up to a maximum aggregate amount of \$90 million, and under C above shall be subject to receipt of all necessary regulatory approvals, and New Hampshire Hydro and the Equity Sponsors shall use their best efforts to obtain, or to assist in obtaining, these approvals in advance of the Effective Date.

G. New Hampshire Hydro shall have two classes of common stock, both of which will have the same preferences, qualifications, special or relative rights or privileges, except that only one class shall have voting powers. Equity Shares allocated to NEES shall be evidenced by voting common stock. The Equity Shares allocated to each other Equity Sponsor shall, at the option of such Equity Sponsor, be evidenced by shares of voting common stock or non-voting common stock. Any reallocation of Equity Shares pursuant to Section 5 hereof shall be effected in such manner as to involve the issuance of additional common stock to each Equity Sponsor of the class then held by such Sponsor. Such election to take voting or non-voting stock shall be made in writing to New Hampshire Hydro by December 31, 1985.

H. Notwithstanding any provision of this Agreement to the contrary, prior to the date that New Hampshire Hydro first calls for equity contributions from all Equity Sponsors, all equity of New Hampshire Hydro will be owned and contributed by NEES.

Section 8. Cash Deficiency Guarantee

A. The New Hampshire HVDC Support Agreement provides that, if New Hampshire Hydro has, on any Due Date, a Cash Deficiency attributed to a Participant, the Participant absolutely and unconditionally guarantees to pay its Cash Deficiency on demand of Lenders. (The commitment is made in section 19 of that Agreement.) To provide further credit support to New Hampshire Hydro, each Equity Sponsor absolutely and unconditionally guarantees to pay its then Equity share of the Cash Deficiency attributed to any Credit Enhanced Participant (as defined in the New Hampshire HVDC Support Agreement) with respect to any third party debt financing of New Hampshire Hydro that was credit enhanced for such Participant, with such amounts to be paid directly on demand to Lenders, in cash, if for any reason a Credit Enhanced Participant fails to pay when due its Cash Deficiency on demand of Lenders. Each Equity Sponsor agrees that its obligations under this Section shall be continuing, absolute, and unconditional and without the benefit of any defense, claim, set-off, recoupment, abatement, or other right, existing or future, which an Equity Sponsor may have against the Lenders, New Hampshire Hydro, or any other person, and shall remain in full force and effect until all of the obligations of New Hampshire Hydro to the Lenders have been discharged.

Each Equity Sponsor hereby waives diligence, presentment, demand of payment, filing of claims with a court in the event of merger or bankruptcy of any Lender or New Hampshire Hydro or any other Equity Sponsor, protest or notice with respect to this guarantee, and covenants that the obligations contained in this guarantee will not be discharged except by complete performance of the obligations of New Hampshire Hydro to the Lenders.

B. Notwithstanding any other provision contained herein, each Equity Sponsor's obligations under this Section 8 shall be limited to its Equity Share of the Cash Deficiency attributed to any Credit Enhanced Participant with respect to any financing of any New Hampshire Hydro that was credit enhanced for such Participant.

C. In no event shall the several guarantees of the Equity Sponsors attributable to Credit Enhanced Participants for each debt financing of New Hampshire Hydro exceed in the aggregate 35% of the aggregate amount of the obligations relating to such financing, provided that Equity Sponsors having an aggregate of at least 80% of the Equity Shares may agree to exceed such 35% maximum and subject to receipt of any necessary regulatory approvals, such agreement shall be binding on all Equity Sponsors.

D. In no event shall Equity Sponsors be required to provide guarantees for a Participant with respect to a particular third party debt financing of New Hampshire Hydro if that would result in Credit Enhanced Participants with respect to that and all other outstanding financings of New England Hydro and New Hampshire Hydro having Participating Shares exceeding 35% under the New Hampshire HVDC Support Agreement, provided that Equity Sponsors having an aggregate of at least 80% of the Equity Shares may agree to exceed such 35% maximum and subject to receipt of any necessary regulatory approvals, such agreement shall be binding on all Equity Sponsors.

E. Each Equity Sponsor shall use its best efforts to obtain and assist others in obtaining all necessary regulatory approvals

required for the several guarantees made in this Section.

Section 9. Acceptance of Participating Shares

A. In accordance with section 15 of the New Hampshire HVDC Support Agreement, if a Participant that is a Credit Enhanced Participant is terminated by New Hampshire Hydro as a Participant, each Equity Sponsor or its appointee shall be allocated by New Hampshire Hydro its then Equity Share of the Participating Share of such terminated Participant; such allocation to be made as of the date of such termination. Each Equity Sponsor or its appointee shall accept such allocation from New Hampshire Hydro and shall unconditionally and absolutely assume the rights and obligations associated therewith from the date of such allocation. If a Participant that was not also a Credit Enhanced Participant is terminated, then acceptance of any allocation shall be voluntary by any Equity Sponsor or its appointee and shall be in accordance with New Hampshire Hydro's offer thereof. If required by New Hampshire Hydro, any Equity Sponsor or its appointee assuming rights and obligations under the Massachusetts HVDC Support Agreement shall execute and deliver any documents necessary to effectuate such assumption. If any Equity Sponsor that is the designee of a Participant is unable to deliver these documents to effectuate the assumption, such Equity Sponsor shall take all actions necessary for the Participant that so designated it as an Equity Sponsor to assume such rights and obligations as its appointee.

The appointee of NEES shall be New England Power Company. The appointee(s) of any other Equity Sponsor shall be the Participant(s) for which such Equity Sponsor was acting as a designee. Each Equity Sponsor agrees that if its appointee is allocated a Participating Share under the New Hampshire HVDC Support Agreement, such Equity sponsor shall also allocate to it an equal participating share and support share under the Massachusetts HVDC Support Agreement and New England Power and Boston Edison AC Support Agreements, respectively.

B. Each Equity Sponsor shall use its best efforts to obtain and assist others in obtaining all necessary regulatory approvals required for performance of its or its appointee's commitments made in this Section.

Section 10. Character of Payment Obligations

The obligations of each Equity Sponsor to make payments hereunder, and to perform and observe all other agreements on its part contained herein, are absolute and unconditional and shall not be affected by any circumstances, including, without limitation, (i) any insolvency, composition, bankruptcy, reorganization, arrangement, liquidation or similar proceedings relating to New Hampshire Hydro, New England Power Company, Boston Edison Company, the Equity Sponsor, any other Equity Sponsor, or any affiliate thereof, (ii) any invalidity or unenforceability or disaffirmance by New Hampshire Hydro or any Equity Sponsor of any provision of this Agreement or any failure, omission, delay, or inability of New Hampshire Hydro to perform any of its obligations contained herein, (iii) any amendment, extension, or other change of, or any assignment or encumbrance of any rights or obligations under, this Agreement, or any waiver or other action or inaction, or any exercise or nonexercise of any right or remedy, under or in respect to this Agreement, or (iv) any inability of the Equity Sponsor or any other Equity Sponsor to obtain regulatory approvals for financing its

Equity Share of any obligations under this Agreement or for meeting any other obligations under this Agreement, it being the intention of the parties hereto that all amounts payable by each Equity Sponsor in respect of this Agreement shall begin to be payable and shall continue to be payable in all events in the manner and at the time herein provided. In that connection, each Equity Sponsor hereby waives, to the extent permitted by applicable law, any and all rights which it may now have or which may at any time hereafter be conferred upon it, by statute or otherwise, to terminate, cancel, or surrender any of its obligations under this Agreement.

#### Section 11. Default

A. Any of the following events (Events of Default) that occur and are continuing are Events of Default:

(i) An Equity Sponsors shall fail to pay to New Hampshire Hydro when due any amount which it has agreed to pay under any provision of this Agreement, and such failure shall continue for more than 15 days after written notice thereof has been given to such Equity Sponsor by New Hampshire Hydro; or

(ii) Any Equity Sponsor shall fail to supply in accordance with the terms hereof any documentation required by New Hampshire Hydro in connection with financing with Lenders by New Hampshire Hydro (for VELCO and MMWEC, this includes documentation for their respective contracting electric systems), and such failure shall continue for more than 30 days after written notice of such failure has been given to such Equity Sponsor by New Hampshire Hydro; or

(iii) An Equity Sponsor shall fail to perform any other obligation under this Agreement in accordance with the terms hereof, and such failure shall continue for more than 30 days after written notice thereof has been given to such Equity Sponsor or any of its affiliates by New Hampshire Hydro.

(iv) Any Equity Sponsor shall experience an event of default under the Equity Funding Agreement for New Hampshire Hydro.

B. If an Event of Default under Section 12A(i) above shall have occurred, New Hampshire Hydro may, by written notice to each Equity Sponsor, request that the nondefaulting Equity Sponsors on a voluntary basis make the overdue payment to New England Hydro, provided that similar voluntary payments are made under the Equity Funding Agreement for New Hampshire Hydro.

C. New Hampshire Hydro or any Equity Sponsor shall be free to invoke such remedies at law or in equity as may be deemed appropriate against any Equity Sponsor that defaults under this Agreement.

#### Section 12. Restrictions on Transfer of Common Stock

Each Equity Sponsor agrees that it will not transfer any or all of its common stock of New Hampshire Hydro to any other person unless such person is an Equity Sponsor or meets the requirements for being an Equity Sponsor under sections 4B or 4C hereof as of the date of such transfer and a similar transfer is made under the Equity Funding Agreement for New Hampshire Hydro.

#### Section 13. Dividends on Common Stock

Any Equity Sponsor may direct New England Hydro to withhold the payment of a dividend to such Equity Sponsor and apply

such dividend to reduce the current or the next Support Charge payment required to be made under the New Hampshire HVDC Support Agreement by such Equity Sponsor or its appointee.

Section 14. Restrictions on Dividends, Return of Capital and Repurchase of Common Stock

Any Equity Sponsor which is in default hereunder pursuant to Section 11 is not entitled to receive any amounts from New Hampshire Hydro representing such Equity Sponsor's then Equity Share of dividends, return of capital, or proceeds from any repurchase of common stock until all amounts (including interest thereon at an annual rate equal to two percent over the current interest rate on prime commercial loans from time to time in effect at the principal office of the First National Bank of Boston) owed by such Equity Sponsor to New Hampshire Hydro have been paid.

Section 15. Certain Actions of New Hampshire Hydro

A. New Hampshire Hydro shall not take any of the following actions without prior written approval of Equity Sponsors having at that time at least 80% of the Equity Shares:

- (i) Amend New Hampshire Hydro's articles of organization or by-laws to adversely affect the rights of the Equity Sponsors as stockholders in a material manner under the Basic Agreements, unless such amendment is required by regulation or law; and
- (ii) Merge, consolidate, or sell all or substantially all of the assets of New Hampshire Hydro not otherwise permitted by the New Hampshire HVDC Support Agreement.

B. New Hampshire Hydro shall distribute in a timely manner to each Equity Sponsor copies of (a) its annual audited financial statements, (b) notices of all of its directors' and stockholders' meetings (including any committees thereof), and (c) minutes of all of its directors' and stockholders' meetings.

Section 16. Miscellaneous

A. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of, and may be performed by, the successors and assigns of the parties and shall also be binding, insofar as permitted by law, on any receiver or trustee in bankruptcy, receivership, or reorganization of any party. No assignment of this Agreement shall operate to relieve the assignor of its obligations under this Agreement without the written consent of the parties hereto. Written notice to all parties will be given prior to any assignment hereunder.

Notwithstanding the above, New Hampshire Hydro may collaterally assign this Agreement without the consent of the Equity Sponsors in connection with a third party financing by New Hampshire Hydro.

B. Right of Setoff. No Equity Sponsor shall be entitled to set off against the payments required to be made by it hereunder (1) any amounts owed to it by New Hampshire Hydro, any affiliate of New Hampshire Hydro, or any other Equity Sponsor, or (2) the amount of any claim by it against New Hampshire Hydro, any affiliate of New Hampshire Hydro, or any other Equity Sponsor. However, the foregoing shall not affect in any other way any Equity Sponsor's rights and remedies with respect to any such amounts

owed to it by New Hampshire Hydro, any affiliate of New Hampshire Hydro, or any other Equity Sponsor or any such claim by it against New England Hydro or any other Equity Sponsor.

C. Amendments. Any amendments changing the Equity Shares of the Equity Sponsors or the several nature of the obligations and rights of the Equity Sponsors hereunder as specified in Section 6, shall require consent by all parties. In the event that an Equity Sponsor is obligated to acquire Equity Shares hereunder and does not pay for such Shares, then such Shares will not be issued to him and such Equity Sponsor's Equity Share will be reduced accordingly. All other amendments to this Agreement shall be by mutual agreement of New Hampshire Hydro and Equity Sponsors owning Equity Shares aggregating at least 80%, evidenced by a written amendment signed by New Hampshire Hydro and such Equity Sponsors; and New Hampshire Hydro and all Equity Sponsors shall be bound by any such amendment.

D. Notices. Except as the parties may otherwise agree, any notice, request, bill, or other communication relating to this Agreement, or the rights, obligations or performance of the parties hereunder, shall be in writing and shall be considered as duly delivered when delivered in person or mailed by registered or certified mail, postage prepaid, to the respective post office address of the other parties shown following the signatures of such other parties hereto, or such other address as may be designated by written notice given as provided in this paragraph D.

E. Governing Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of The Commonwealth of Massachusetts.

F. Other.

(1) No action, regardless of form, arising out of this Agreement may be brought by any party hereto more than three years after the cause of action has arisen.

(2) In the event that any clause or provision of this Agreement, or any part thereof, shall be declared invalid or unenforceable by any court having jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of the remaining portions of this Agreement.

(3) All provisions of this Agreement providing for limitation of, or protection against, liability shall apply to the full extent permitted by law, and regardless of fault, and shall survive either termination pursuant to this Agreement or cancellation.

(4) Each party shall, upon request of another party, execute and deliver any document reasonably required to implement any provision hereof.

(5) Any number of counterparts of this Agreement may be executed and each shall have the same force and effect as the original.

(6) This Agreement, with the other Basic Agreements, Preliminary Quebec Interconnection Support Agreement - Phase II, the

agreements with Hydro-Quebec regarding Phase II, and the basic agreements covering Phase I shall constitute the entire understanding among the parties and shall supersede any and all previous understandings pertaining to the subject matter of this Agreement.

(7) Terms defined in the Massachusetts HVDC Support Agreement and the New England Power and Boston Edison AC Support Agreements used in this Equity Funding Agreement shall be incorporated herein as defined in such Agreements unless the context indicates otherwise.

(8) This Agreement is the act and obligation of the parties hereto in their corporate or governmental capacity, and any claim hereunder against any shareholder, director, officer, employee, or agent of any party, as such, is expressly waived.

IN WITNESS WHEREOF, the signatories have caused this Agreement to be executed by their duly authorized officers or agents.

[Form of Opinion of Counsel for Each Utility Participant]

New England Hydro-Transmission  
Electric Company, Inc.;  
New England Hydro-Transmission  
Corporation; or  
New England Power Company

Gentlemen:

This opinion is furnished in connection with the execution and delivery by \_\_\_\_\_ (the Company) of the following Agreements: \_\_\_\_\_.

We have acted as counsel to the Company, one of the Utility Participants, in connection with the execution and delivery of the Basic Agreements. We participated in reviewing and/or drafting the Agreements.

As general [special] counsel to the Company, we are generally familiar with its affairs. [If special counsel is giving the opinion, describe relationship to the Company.] We have reviewed the proceedings taken by the Company in connection with its authorization, execution, and delivery of the Agreements and any documentation supplied by the Company thereunder. We have also examined executed counterparts of the Agreements, have made such other investigation, and have examined such other records and documents, and have made such examination of law and satisfied ourselves as to such other matters as we have deemed relevant and necessary in order to enable us to express the opinions set forth below.

Based upon and subject to the foregoing and to the further qualifications in this opinion, we are of the opinion that:

1. The Company is a corporation duly organized, validly existing and in good standing under the laws of [the jurisdiction of its incorporation], has the corporate power to own its assets and to transact the business in which it is engaged, and is duly qualified as a foreign corporation in, and is in good standing under the laws of, each jurisdiction in which the conduct of its business or the ownership of its assets requires such qualification.

2. The Company has (and in the case of the Agreements at the time of execution and delivery thereof, had) full corporate power, and legal right to execute, deliver and perform the Agreements, and the Company has taken all necessary corporate action to authorize the execution, delivery, and performance by it of the Agreements.

3. The execution, delivery, and performance by the Company of the Agreements do not (a) contravene the Company's [charter documents] or by-laws, (b) violate any applicable law, rule, regulation, order, writ, judgment, injunction, decree, or award known to us by which the Company is bound, (c) violate any indenture, instrument, or agreement known to us by which the Company is bound, or (d) result in or require the creation or the imposition of any lien pursuant to the provisions of any indenture, instrument, or agreement known to us by which the Company is bound.

4. No authorization, approval, consent, or other action by, and no notice to or filing with, any federal, state, or other governmental authority or regulatory body which has not been obtained or given and is not in full force and effect is required for the valid and lawful execution, delivery, and performance by the Company of the Agreements. [In this connection, to the extent it may be required by law, the approval of the Massachusetts Department of Public Utilities [Connecticut PUC, or other] has been given for the Agreements and the Company's performance thereunder by order(s) dated \_\_\_\_\_, which remains in full force and effect.]

5. The Agreements have each been duly executed and delivered by the Company and constitute the legal, valid, and binding obligations of the Company enforceable against it in accordance with their respective terms.

6. No action, suit, proceeding, or investigation at law or in equity or by or before any governmental instrumentality or other agency now pending or threatened against or affecting the Company or its property or rights which, if adversely determined, would materially impair the ability of the Company to perform its obligations under the Agreements is known to us.

Our opinion that the Agreements are enforceable, each in accordance with the terms thereof, is qualified to the extent that the enforcement of the rights and remedies created thereby is subject to bankruptcy, insolvency, reorganization, and similar laws of general application affecting the rights and remedies of creditors and secured parties, and to the further extent that the availability of the remedies of specific enforcement, injunctive relief, or any other equitable remedy is subject to the discretion of the court before which any proceeding therefor may be brought.

Very truly yours,

CERTIFICATE

I, (insert name), the Clerk (or Secretary or other principal recording officer) of (insert name of Utility Participant), a (insert state of organization) (the "Company") do hereby certify that:

(1) Attached hereto as Exhibit A is a true and correct copy of a vote duly adopted at a meeting of the Board of

Directors of the Company, duly called and held on \_\_\_\_\_, \_\_\_\_\_, and that such vote and the authority vested thereby have not been amended or revoked and are still in full force and effect.

(2) Attached hereto as Exhibit B is a true and correct copy of the Articles of Organization (or other charter documents) of the Company, as amended and in effect as of the date of this Certificate.

(3) Attached hereto as Exhibit C is a true and correct copy of the By-Laws of the Company, as amended and in effect as of the date of this Certificate.

(4) The persons (or person) listed on Exhibit D have been duly elected to the offices set forth adjacent to their respective names since the first day of June, 1985, and the signatures adjacent to their respective names are the genuine signatures of said officers.

IN WITNESS WHEREOF, I have placed my hand and the seal of the Company this \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_.

By \_\_\_\_\_

### FORM OF DIRECTORS' VOTE APPROVING AGREEMENTS

VOTED:

That in connection with this Company's participation in the Phase II expansion of the proposed interconnection between the New England Power Pool companies and Hydro-Quebec, the execution and delivery on behalf of this Company by \_\_\_\_\_, President, of the following agreements: (being collectively referred to in this vote as "Agreements") copies of which Agreements have been presented at this meeting, are hereby authorized, approved, ratified, and confirmed, and that the officers of this Company are further authorized severally to take any and all such further actions including the execution and delivery of such further documents, as such officers or any of them may deem necessary or appropriate in connection with the actions and documents authorized by this vote.

### ATTACHMENT C

#### Subscription Process for Determining Equity Shares under Section 5(B)

After allocation of 51% of the Equity Shares to NEES pursuant to Section 5(B)(1), the Equity Shares shall be allocated to Equity sponsors other than NEES as follows:

- (a) Each other Equity Sponsor shall be entitled to a pro rata share of the remainder based on the Participating Share of such Equity Sponsor or the Participant(s) that has designated it as an Equity Sponsor as a percentage of Participating Shares of all other Equity Sponsors or such Participants as shown in the Massachusetts HVDC Support Agreement. For the purpose of this calculation, the Participating Share of each Equity Sponsor designated by VELCO shall be deemed to be a pro rata share of VELCO's Participating Share based on the ratio of such Equity Sponsor's 1980 kwh load to the aggregate 1980 kwh load of all Equity Sponsors designated by VELCO.
- (b) Upon execution of this Agreement, each other Equity Sponsor may subscribe for more or less than its share under (a) above.
- (c) Upon execution of this Agreement, each other Equity Sponsor may specify a maximum limit on its share of such remainder that would apply to any allocations made on or before June 1, 1986 or such later deadline date as is fixed pursuant to Section 2 hereof.
- (d) If there are no undersubscriptions or oversubscriptions under (b) above or if the sum of the shares under (a) or (b) above for all Equity Sponsors equals 100% of such remaining shares, then each Equity Sponsor shall have a share as determined under (a) or (b) above. (For the purposes of this attachment, oversubscription shall mean, with respect to any Equity Sponsor, a subscription under (b) above of more than its share under (a) above. For the same purposes, undersubscription shall mean, with respect to any Equity Sponsor, a subscription under (b) above of less than its share under (a) above. The amount of such oversubscription shall be equal to (b) minus (a) and the amount of such undersubscription shall be equal to (a) minus (b).)
- (e) If there are undersubscriptions but not oversubscriptions or if there are oversubscriptions but no undersubscriptions, then each Equity Sponsor shall have a share as determined under (a) above; provided, however, that no Equity Sponsor shall be allocated more than its specified limit under (c) above. If the sum of all shares heretofore allocated is less than 100%, any remaining share shall be allocated to all Equity Sponsors that have received shares less than their limits under (c) above, pro rata by the difference between their limits under (c) above and their shares as heretofore allocated.

- (f) If the net result of subtracting the aggregate amount of all undersubscriptions from the aggregate amount of all oversubscriptions is greater than zero, the aggregate amount of all oversubscriptions must be reduced to the aggregate amount of all undersubscriptions. This amount shall be referred to as the total permitted amount of oversubscriptions. Each oversubscriber shall initially be allocated a share of the total permitted amount of oversubscriptions (pro rata by the Participating Shares of the oversubscribers or their designators as shown in the Massachusetts HVDC Support Agreement); provided that no oversubscriber shall be allocated more than its requested amount under (b) above. Any remaining unallocated portion of the total permitted amount of oversubscriptions shall be allocated to all oversubscribers that have not yet reached their requested amount under (b) above pro rata by the differences between their requested shares under (b) above and their shares as heretofore allocated.
- (g) If the net result of subtracting the aggregate amount of all oversubscriptions from the aggregate amount of all undersubscriptions is greater than zero, the aggregate amount of all undersubscriptions must be reduced to the aggregate amount of all oversubscriptions. This amount shall be referred to as the total permitted amount of undersubscriptions. The total permitted amount of undersubscriptions shall be allocated to the undersubscribers pro rata by the amounts of their undersubscriptions; provided, however, that no Equity Sponsor shall be allocated more than its specified limit under (c) above. If the sum of all shares heretofore allocated is less than 100%, any remaining share shall be allocated to all Equity Sponsors that have received shares less than their limits under (c) above, pro rata by the difference between their limits under (c) above and their shares as heretofore allocated.
- (h) If Equity Shares are required to be changed pursuant to subpart (i) or (ii) of Section 5(a), this reallocation shall be accomplished in accordance with this Attachment G on the basis of the subscriptions initially made under (b) and the maximum limits specified under (c) by each continuing Equity Sponsor, and giving effect to the termination of any Equity Sponsor pursuant to said subpart (i) or (ii).

CONFORMED

AMENDMENT NO. 1  
TO  
PHASE II MASSACHUSETTS TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of May 1, 1986, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II Massachusetts Transmission Facilities Support Agreement, dated as of June 1, 1985 (the "Massachusetts DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the Massachusetts DC Support Agreement are used herein with the meanings there provided.
2. Attachments A and F of the Massachusetts DC Support Agreement are hereby deleted and replaced with the Attachments A and F attached hereto.
3. This Amendment shall become binding upon New England Hydro and the Participants-when it has been executed by New England Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an

original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

Town of Shrewsbury Electric Light Department	146,303,000 (f)
Town of Sterling Municipal Electric Department	24,510,000 (f)
Town of South Hadley	99,981,000 (f)

(a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.

(b) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.

(c) (1) Concord Municipal Light Plant has elected to be a direct signatory to this Agreement. However, if it does not receive required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required, Concord will be grouped with MMWEC. (2) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, either Concord or MMWEC, whichever is appropriate, shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.

(d) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.

(e) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

(f) The amount shown for any of these municipal utilities will be added to MMWEC's amount if such municipal (i) does not receive the required consents, waivers, regulatory approvals, or other actions of governmental authorities within the time period required by this Agreement, and (ii) elects at that time to be grouped with MMWEC.

5/29/86

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New England Hydro's ability to finance the project. As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing is required to be paid by each Credit Enhanced Participant which has its credit enhanced for such debt financing. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not

will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An “investment grade” Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An “investment grade” Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.4%) or less and which has outstanding junior long-term debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.) - “Qualified debt ratings” are defined as a minimum rating-of Baa3 by Moody’s Investors Service, BBB- by Standard & Poor’s Corporation and D&P 10 by Duff & Phelps, Inc.

Any “substitute credit enhancement” shall mean, with respect to any New England Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of “AA” or better in form and substance Satisfactory to New England Hydro or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New England Hydro, or (iii) a guarantee from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II New Hampshire Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant’s share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported under such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant’s Participating Share of the maximum amount of obligations under such New England Hydro debt financing plus, if not already provided in connection with any other debt financing of New England Hydro or New Hampshire Hydro, that Participant’s Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant’s Participating Share of the debt obligations of Boston Edison Company and New England Power Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively, of the amounts included therein for covering such debt obligations.

The Credit Enhancement Charge (E) for each Participant that has its credit enhanced is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

F = the Credit Enhancement Charge for each New England Hydro debt financing that is credit enhanced for the Participant.

- i = a number from 1 to n representing each of New England Hydro debt financings.
- n = total number of such financings.
- G = the Participant's Participating Share (in percent)
- H = the maximum outstanding amount of New England Hydro debt during the month which was credit enhanced for such Participant
- I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

<u>Participant's Debt Rating*</u>	<u>I(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New England Hydro debt financing.

J = an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal O and the Credit Enhancement Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New England Hydro's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes.

CONFORMED

AMENDMENT NO.2  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of February 1, 1987, is between New England Hydro-Transmission Electric Company, Inc. (New England Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1 dated as of May 1, 1986 (the "New Hampshire DC Support

Agreement”), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Attachment D of the New Hampshire DC Support Agreement is hereby deleted and replaced with the following

Attachment D:

“ATTACHMENT D

1. “Return on Equity” shall be the return on equity on file with the FERC and in effect under the Federal Power Act. Any filing of a return on equity by New Hampshire Hydro shall be subject to Section 2 of this Attachment D or, if Section 2 is not accepted by the FERC, then any such filing shall be subject to Section 3 of this Attachment D.

2. New Hampshire Hydro shall request from the FERC a rate of return on equity determined by the applicable formula in Section 4 of this Attachment D. In February of each year following the initial filing of this Agreement with the FERC, New Hampshire Hydro shall file with the FERC a revised Exhibit 1 to this Attachment D, reflecting a new “Y” for the initial formula in Section 4, below. The value of “Y” shall be added to the fixed 1.9% value of “P”, which represents a levelized premium over the life of the project to reflect the unique risks of the project in addition to the risks encountered by a typical utility. New Hampshire Hydro shall request that the revised Exhibit 1 be made effective on February 1, of the calendar year in which the filing is made, without suspension. Each Participant agrees not to intervene in opposition to a change in “Y” filed by New Hampshire Hydro in accordance with this Section 2.

3. If Section 2 of this Attachment D is not accepted by the FERC, New Hampshire Hydro shall from time to time request from the FERC a specific rate of return on equity. Each Participant agrees not to intervene in opposition to a request for a rate of return on equity filed by New Hampshire Hydro on or before the tenth anniversary of the Date of Full Support Payment if such rate is equal to or lower than the rate that would have been determined under the applicable provision of such Section 4. Nothing in this Section 3 shall affect (i) the right of New Hampshire Hydro to request a rate of return on equity greater than that determined in accordance with such Section 4, or (ii) the right of any Participant to intervene in opposition to any such request.

4. The formula for the rate of return on equity referred to in Section 2 or Section 3 of this Attachment D, whichever is accepted by the FERC, shall be as follows:

$$R = Y + P$$

where:

R = the requested return on equity;

Y = the FERC generic return on equity in effect for filings made as of the date of the filing as set out in Exhibit 1 to this Attachment D;

P = 1.9, which represents a levelized premium to adjust the FERC generic return-for the unique risks of the project in addition to the risks encountered by a typical utility.

The following is a sample calculation of the Return on Equity as of February through April 1987:

$$R = 11.2 + 1.9 = 13.1\%$$

Application of this formula at this time thus yields an initial Return on Equity of 13.1%.

In the event that the FERC generic return on equity is no longer published for rate making purposes, then the following formula shall be used to determine "Y" in the above formula:

$$Y = A + B + C + D$$

where:

(i) A = Weighted average return on the average of three money market indicators

$$A = \frac{.25(E + F + G) + .75(H + I + J)}{3}$$

where:

E = The most recently available yield to maturity for Moody's "A" rated Public Utility Bonds.

F = The most recently available yield for 10 year Constant Maturity Treasury Bonds.

G = The most recently released figure for the annualized increase in the United States GNP price deflator.

H = The average yield to maturity for the most recently available 36 month period for Moody's "A" rated Public Utility Bonds<sup>4</sup>,

I = The average yield for 10 year Constant Maturity Treasury Bonds for the most recently available 36 month period.

J = The average of the annualized percentage increases in the United States GNP price deflator for the most recent 36 month period.

(ii) B = The average equity premium required for utility stocks over the past 20 years.

$$B = K - \frac{L + M + N}{3}$$

where:

- K = the average for the most recent 20 years of the sum of (i) the average annual yield for Moody's Electric Utility Common Stock, plus (ii) the ten year growth in dividends per share for such group of electric utilities.
- L = the average for the most recent 20 years of yields to maturity for Moody's "A" rated Utility Bonds.
- M = The average for the most recent 20 years of the yield on en year constant maturity treasury bonds.
- N = The average for the most recent 20 years of the average annual percentage change in the United States GNP price deflator.

(iii) C = issuance \_\_\_\_\_ common equity

C .05(A + B)

(iv) D = a dilution allowance to compensate the Equity Sponsors of New Hampshire Hydro for sale of common shares at a market price below book value

D = a percentage from 0 to 1 determined on a straight tine basis where 1 represents the weighted average of the common shares of the Equity Sponsors of New Hampshire Hydro selling at 30% below book and 0 represents those shares selling at book value. Such weighted average shall be calculated by weighting the market to book ratio of each Equity Sponsor by its respective equity ownership share in New Hampshire Hydro. This percentage shall be calculated semiannually as of January 1 and July 1 of each year until the Transmission Facilities goes into commercial operation. Each calculation shall cover the period beginning as of January 1 in the year this Agreement is dated as of and ending as of the date of the calculation. Book value is the average month end book value during a calculation period, and market price is the average of each quarters high and low market price during calculation period. The calculation made as of January or July next preceding the date of commercial operation of the Transmission Facilities will be the percentage used thereafter until the end of the term of this Agreement.

Should any of the indices used in calculating the values of A and B be discontinued, or should the underlying basis for the calculations in any of these indices be modified, New Hampshire Hydro may substitute a substantially similar index for such discontinued or modified index.

Recognizing that this is a long-term contract and that money market conditions can drastically change over time, New England Hydro retains the option, if the above formulae produce for two consecutive months a number lower than the arithmetic average of the return on common equity approved within the last twelve months by regulatory COMMISSIONS having jurisdiction over rates for each of the investor owned public electric utilities as reported in the publication "Argus Utility Scope Regulatory Service - Returns Authorized" to use such average return as the Return on Equity. In the event this publication is no longer currently available, New Hampshire Hydro will use a substantially similar publication which is available.

EXHIBIT 1 TO ATTACHMENT D

In determining the Return on Equity in accordance with the formula set out in Section 4 of Attachment D, the value of “Y” shall be \_\_\_\_\_%. Applying this value of “Y” in the formula and adding it to the fixed 1.9% value of “P”, which represents a levelized premium over the life of the project, yields a Return on Equity of \_\_\_\_\_%.”

3. Section 6 is hereby amended by inserting in item (ix) of the second paragraph thereof after the words “debt financing” the following:

“or any other financial arrangements”

4. Section 12 of the Hampshire DC Support Agreement is hereby amended by deleting the seventh paragraph thereof and substituting the following:

“Return on Equity’ shall be determined in accordance with Attachment D.”

5. Section 12 of the Hampshire DC Support Agreement is hereby amended by adding the following sentence to the end of the fourth paragraph thereof:

“The allowance for state and federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.”

6. This Amendment shall become binding upon New Hampshire Hydro and the Participants when it has been executed by New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.

7. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

AMENDMENT NO. 3  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of June 1, 1987, is between New England Hydro-Transmission Corporation (New Hampshire Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1 dated as of May 1, 1986, and Amendment No. 2, dated as of February 1, 1987, (the "New Hampshire DC Support Agreement"), and amends the Massachusetts DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Attachment D of the New Hampshire DC Support Agreement is hereby revised by deleting the last sentence of paragraph 2 thereof and by deleting the second and third sentences of paragraph 3 thereof.
3. This Amendment shall become binding upon New Hampshire Hydro and the Participants when it has been executed by New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this. Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF. the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

AMENDMENT NO. 4  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of September 1, 1987, is between New England Hydro-Transmission Electric Corporation (New Hampshire Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended by Amendment No. 1 dated as of May 1, 1966, Amendment No. 2, dated as of February 1, 1987, and Amendment No. 3, dated as of June 1, 1987, (the “New Hampshire DC Support Agreement”), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the Massachusetts DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Section 1 is hereby amended by adding the following clause to the end of the last sentence of the thirteenth paragraph thereof:

“; provided, however, that New Hampshire Hydro shall be under no obligation to so limit its equity investment in the event that, after the Date of Full Support Payment (as defined in Section 13) the term of its debt financing or other financing arrangements is less than ten years”.

3. Section 12 is hereby deleted and replaced with the following Section 12.

Section 12. Support Charge

Commencing in the month of the Date of Full Support Payment (as defined in Section 13) and in each month thereafter, each Participant shall pay in accordance with Section 13 its Participating Share of a monthly Support Charge in an amount determined in accordance with this Section 12, plus a credit enhancement charge calculated in accordance with Attachment F. The Support Charge shall be equal to New Hampshire Hydro’s total cost of service related to the Transmission Facilities for such month.

The “total cost of service related to the Transmission Facilities” for any month commencing with the month in which the Date of Full Support Payment occurs shall be the sum of (a) New Hampshire Hydro’s operating expenses for such month with respect to the Transmission Facilities, plus (b) an amount equal to one-twelfth of the composite percentage for such month times the average net rate base for the Transmission Facilities, less (c) investment earnings of the Debt Service Fund, as defined in Section 18, realized by New Hampshire Hydro, less (d) any other income received by New Hampshire Hydro resulting from costs or rate base supported by the Participants other than income received pursuant to (a), (b), or (c) above or Credit Enhancement Charges and other income allocated to Equity Sponsors elsewhere under this Agreement. If a Support Charge payment under Section 13 is to be calculated from a date other

than the first day of a month, an appropriate proration of the amount determined in (b) above shall be made for such payment only.

“Uniform System” shall mean the appropriate Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC) for Public Utilities and Licensees, as from time to time in effect.

New Hampshire Hydro’s “operating expenses” shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto. in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the purpose of calculating such depreciation or amortization, will not exceed the amount of cost of removal) over the shorter of: (i) the estimated remaining useful life of the Transmission Facilities as determined by New Hampshire Hydro or (ii) the term of New Hampshire Hydro’s debt financings or other financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules, unless the term of such financing or other financing arrangements is less\* than ten years in which case such term shall, for purposes of this subpart (ii), be deemed to be ten years from the Date of Full Support Payment; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value. In addition, each Participant will pay to New England Power Company and Public Service Company of New Hampshire, for the benefit of their respective customers, such Participant’s Participating Share of a monthly charges of \$268,000 and \$41,300, respectively, to compensate New England Power and Public Service Company for the lost capacity on their respective New Hampshire rights-of-way, provided however that no such charges shall be paid to New England Power or Public Service Company during such time as construction or operation is suspended on account of a defect in title for such rights-of-way. The allowance for state and Federal income taxes included in operating expenses shall reflect the normalization of timing differences and the flow through of permanent differences between book income and tax income. New Hampshire Hydro as the tax owner of the Transmission Facilities, will be entitled to the benefits and subject to the burdens of such ownership for tax purposes. The allowance for state and Federal income taxes included in operating expenses shall include a provision for taxes on dividends received by stockholders, calculated at the then current statutory rate for corporate stockholders.

The “investment in the Transmission Facilities” shall be the aggregate amount incurred at any time either before

or after commercial operation of the Transmission Facilities which relates to the Transmission Facilities and is properly chargeable to New Hampshire Hydro's utility plant accounts in accordance with the Uniform System. The investment in the Transmission Facilities shall also include operating expenses incurred prior to the month in which the Date of Full Support Payment occurs and an allowance for funds used during the period prior to the Date of Full Support Payment (AFDC) accrued on the investment in the Transmission Facilities. The AFDC rate shall be calculated pursuant to the last FERC approved AFDC formula including in construction work in progress all investment in the Transmission Facilities prior to the Date of Full Support Payment and using 14 percent as the return on equity for such calculation.

"Composite percentage" shall be computed as of the last day of each month (the "computation date").

"Composite percentage" as of a computation date shall be the sum of (i) Return on Equity then in effect multiplied by the percentage which equity investment as of such date is of the total capital as of such date; plus (ii) the average monthly effective interest rate per annum of each principal amount of indebtedness outstanding on such date for money borrowed, whether long term or short term, multiplied by the percentage which each such principal amount is of total capital as of such date. The effective interest rate shall take into account premiums, discounts, fees, and other costs that are related to the indebtedness.

"Return on Equity" shall be the return on equity on file with the FERC and in effect under The Federal Power Act.

"Equity investment" as of any date shall consist of the sum of (i) all amounts theretofore paid to New Hampshire Hydro for all capital stock theretofore issued, plus all capital contributions, less the sum of any amounts paid by New Hampshire Hydro in the form of stock retirements, repurchases or redemptions or return of capital including liquidating dividends; plus (ii) any credit balance in the capital surplus account not included in (1) and any credit balance in the earned surplus (retained earnings) account on the books of New England Hydro as of such date.

"Total capital" as of any date shall be the equity investment plus the total of all indebtedness then outstanding for money borrowed.

From the Date of Full Support Payment until the first to occur of June 30 or December 31 thereafter, the "average net rate base" for the Transmission Facilities shall be the average of the net rate base determined as of the Date of Full Support Payment and the first to occur of June 30 or December 31 thereafter. Thereafter, for subsequent months of January through June, average net rate base shall be the average of the net rate base as of the preceding December 31 and the following June 30. For other months, average net rate base shall be the average of the net rate base as of the preceding June 30 and the following December 31. The "net rate base" shall consist of (i) the investment in the Transmission Facilities, less (ii) the amount of any accumulated provision for depreciation and amortization related to

the investment in the Transmission Facilities, less (or plus) (iii) the amount of any reserve for deferred income taxes received (or paid) by New Hampshire Hydro, such deferred income taxes to include deferred income taxes due to accelerated depreciation, construction tax benefits, and any other book/tax timing differences related to the Transmission Facilities, less (iv) the amount of any unamortized investment tax credits (ITC), plus (v) such allowances related to the Transmission Facilities for materials and supplies, prepaid items and cash working capital as may from time to time be determined by New Hampshire Hydro, as reasonably necessary and in accordance with accepted utility accounting practice, plus (vi) the amounts held in the Debt Service Fund, as described in Section 18. New Hampshire Hydro shall normalize ITC over the depreciation and/or amortization period relating to the Transmission Facilities. Any allowance for cash working capital shall be limited to that not sufficiently recovered through the use of estimated billing for the current month.

[End of Section 12]

4. The New Hampshire DC Support Agreement is hereby amended by adding the following Section 21:

Section 21. Refund of Gain on Sale or Other Disposition of Transmission Facilities

In the event that any of the Transmission Facilities are sold or otherwise disposed of during the term of this Agreement, if the Net Proceeds (defined as the amount received from such sale or disposition less all costs relating to or resulting from such sale or disposition, including without limitation any income taxes relating to or resulting from such sale or disposition, any premiums and penalties incurred because of the early retirement of any indebtedness associated with the sold or disposed of Transmission Facilities, and any costs of total or partial demolition of the sold or otherwise disposed of Transmission Facilities) from such sale or disposition exceed the greater of (i) the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) or (ii) the then total capital of New Hampshire Hydro (as defined in Section 12), New Hampshire Hydro shall (a) refund to the then current Participants, in proportion to their then current Participating Shares, any such excess, and (b) credit to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition). The total capital of New Hampshire Hydro, for the purposes of this section, may exceed the investment in the entire Transmission Facilities (less any depreciation and amortization to the date of sale or disposition) due to (1) any reserve for deferred income taxes paid by New England Hydro or (2) for other reasons related to the investment in the Transmission Facilities. If the Net Proceeds do not exceed the greater of (i) or (ii) above, the Net Proceeds will be credited to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities in lieu

of payment to the Participants. The Participants agree to flow through any such refunds to their customers and shall seek any necessary regulatory approvals to reflect in their rates any such refunds and the effect of any such credits to the accumulated provision for depreciation and amortization related to the investment in the Transmission Facilities; except that to the extent that a Participant's customers' rates have not reflected all or a portion of that Participant's share of the costs of the Transmission Facilities, then that Participant agrees that a complete flow-through of such refunds may not be appropriate and that particular Participant shall seek any necessary regulatory approvals for the appropriate disposition of an appropriate portion of such refunded amounts or credits.

[End of Section 21]

5. Attachment D of the New Hampshire DC Support Agreement is hereby deleted.
6. Attachment F of the New Hampshire DC Support Agreement is hereby deleted and replaced with the following Attachment F:

#### ATTACHMENT F

As a result of the support arrangements for building, owning, and financing the Transmission Facilities, Equity Sponsors have provided credit support for the project in excess of their Participating Shares. This enhances New Hampshire Hydro's ability to finance the project. The status of a Participant as a Credit Enhanced Participant that receives credit enhancement or not will be determined in connection with, and as of the date of commitment for, each debt financing, including any construction financing, in accordance with Section 1 hereof, and the Credit Enhancement Charge will be determined with respect to each such financing and will continue to be paid as long as the financing is outstanding and as long as any accrued unamortized Credit Enhancement Charges for said Participant remain outstanding.

An "investment grade" Participant is defined in this Agreement as a Participant which has outstanding junior long-term debt securities which have qualified debt ratings by two of the three major rating agencies. An "investment grade" Participant is also defined as a Participant which has a Participating Share of four-tenths of one percent (0.4%) or less and which has outstanding junior long-term debt securities having a rating from only one of the three major rating agencies with that rating being a qualified debt rating. (For these purposes, the outstanding junior long-term debt securities- of a Participant shall mean (i) its outstanding long-term debentures, or (ii) if no long-term debentures are outstanding, its most junior outstanding long-term mortgage or revenue bonds, or (iii) if no long-term debentures, mortgage bonds or revenue bonds are outstanding, its most junior outstanding long-term debt.) "Qualified debt ratings" are defined as a minimum rating of Baa3 by Moody's Investors Service, BBB- by Standard & Poor's Corporation and D&P 10 by Duff & Phelps, Inc.

Any “substitute credit enhancement” shall mean, with respect to any New Hampshire Hydro debt financing, including any construction financing (i) a letter of credit from a commercial bank having capital, surplus, and undivided profits of at least \$250 million and a credit rating of “AA” or better in form and substance satisfactory to New Hampshire or (ii) a credit support that is equivalent to (i) above which is satisfactory in form and substance to New Hampshire Hydro, or (iii) a guarantee from an Equity Sponsor which at that time the guarantee is made satisfies the requirements to be an Equity Sponsor as set forth in section 4 of the Equity Funding Agreements; provided that such enhancement is irrevocable until the final maturity of such debt financing, including any optional extensions thereof. The first time that a Participant supplies substitute credit enhancement under this Agreement or under the Phase II Massachusetts Facilities Support Agreement, the substitute credit enhancement shall also cover such Participant’s share of the debt obligations of New England Power Company and Boston Edison Company relating to their respective AC Facilities and the term of such credit enhancement shall extend for the full term of the then remaining depreciation period for the AC facilities supported under such AC Facilities Support Agreements.

The principal amount of such substitute credit enhancement shall equal that Participant’s Participating Share of the maximum amount of obligations under such New Hampshire Hydro debt financing plus, if not already provided in connection with any other debt financing of New Hampshire Hydro or New England Hydro, that Participant’s Participating Share of the maximum amount of debt obligations of New England Power Company and Boston Edison Company relating to the AC Facilities as determined by New England Power and Boston Edison, respectively.

For any substitute credit enhancement that covers that Participant’s Participating Share of the debt obligations of Boston Edison Company and New England Power. Company relating to the AC Facilities, such substitute credit enhancement shall provide for direct payment to New England Power and Boston Edison, respectively. of the amounts included therein for covering such debt obligations.

As compensation to Equity Sponsors for providing this additional credit support, a Credit Enhancement Charge, as calculated in connection with each debt financing is required to be paid by the Participants. If a Participant is a Credit Enhanced Participant by reason of below-investment grade, withdrawn or suspended debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant will be paid by all Participants with each Participant paying its Participating Share thereof; provided, however, that if a Participant is a Credit Enhanced Participant due to lack of debt ratings, the Credit Enhancement Charge attributed to that Credit Enhanced Participant shall be paid by such Participant.

$$E = \sum_{i=1}^n F_i$$

$$\text{where } F_i = \left( \frac{G}{100} \times H_i \times \frac{I_i}{100} \times 0.8 \times \frac{1}{12} \right) + J_i$$

The Credit Enhancement Charge (E)

attributed to a Credit Enhanced Participant is a dollar value determined monthly for each Credit Enhanced Participant by the following formula:

F = the Credit Enhancement Change for each New England Hydro debt financing that is credit enhanced for the Participant.

I = a number from 1 to n representing each of New England Hydro debt financings.

n = total number of such financings.

G = the Participant's Participating Share (in percent)

H = the maximum outstanding amount of New Hampshire Hydro debt during the month which was credit enhanced for such Participant

I = debt premium (in percent) for the Credit Enhanced Participant as shown in the following table:

<u>Participant's Debt Rating*</u>	<u>I(%)</u>
Below B3 or not rated	7.57
B3	5.32
B2	4.82
B1	4.32
Ba3	3.82
6a2	3.32
Ba1	2.82

\* Debt rating shall be the lower of the two highest ratings assigned to the Participant's outstanding junior long-term debt securities by Moody's, Standard and Poor's, and Duff & Phelps, converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing. If the Participant has a Participating Share of four tenths of one percent (0.4%) or less and has only one debt rating, then the debt rating for such Participant shall be that rating converted to a Moody's equivalent as measured at the commitment date of such New Hampshire Hydro debt financing.

J + an amount calculated as follows:

During the period from the Effective Date to the Date of Full Support Payment, J shall equal 0 and the Credit Enhancement

Charge calculated during such period pursuant to the above formula shall be accrued for each Participant during such period with interest calculated at New Hampshire Hydro's AFDC rate. After the Date of Full Support Payment, such previously accrued amount for such Participant shall be treated as if it represented additional investment in the Transmission Facilities relating only to such Participant. As a result J shall include monthly amounts attributable to such Participant (whether or not it continues to be a Credit Enhanced Participant after the Date of Full Support Payment and whether or not the debt being enhanced continues to be outstanding) representing amortization of such previously accrued amount (with amortization over the period that the investment in the Transmission Facilities is being amortized) plus one-twelfth of the composite percentage (as defined in Section 12 hereof) times the unamortized accrued amount plus a provision for income taxes.

[End of Attachment F]

7. This Amendment shall become binding upon New Hampshire Hydro and the Participants when it has been executed by New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
8. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

AMENDMENT NO. 5  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of October 1, 1987, is between New England Hydro-Transmission Corporation (New Hampshire Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support

Agreement, dated as of June 1, 1985, as amended by Amendment No. 1, dated as of May 1, 1986, Amendment No. 2, dated as of February 1, 1987, Amendment No. 3, dated as of June 1, 1987, and Amendment No. 4, dated as of September 1, 1987, (the "New Hampshire DC Support Agreement"), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings there provided.
2. Section 12 is hereby amended by deleting the first sentence of the fourth paragraph thereof and replacing it with the following sentence:

New Hampshire Hydro's "operating expenses" shall include all amounts related to the Transmission Facilities and properly chargeable to expense accounts less any applicable credits thereto, in accordance with the Uniform System, including but not limited to operation and maintenance expense such as rent on leased property and administrative and general expenses, state and Federal income and franchise taxes, property taxes, payroll taxes, any other taxes not based on income, and depreciation and/or amortization expense; it being understood that unless the FERC, upon application by New Hampshire Hydro, authorizes a shorter depreciation and/or amortization period, for purposes of this Agreement depreciation and/or amortization shall be at a rate sufficient to recover the investment in the Transmission Facilities (including estimated cost of removal less any salvage value which salvage value, for the purpose of calculating such depreciation and/or amortization, will not exceed the amount of cost of removal) over the greater of: (i) ten years from the Date of Full Support Payment or (ii) the term of New Hampshire Hydro's permanent debt financings or other permanent financing arrangements related to the Transmission Facilities, adjusted for multiple maturities and repayment schedules; and it also being understood that rents on leased property shall include the rental of property or property rights related to the Transmission Facilities from any Participant with rent based on book value.

3. This Amendment shall become binding upon New Hampshire Hydro and the Participants when it has been executed by New Hampshire Hydro and Participants owning Participating Shares aggregating at least 66-2/3%.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or

agents.

CONFORMED

AMENDMENT NO. 6  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of August 1, 1988, is between New England Hydro—Transmission Corporation (New Hampshire Hydro), and the New Hampshire utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended (the “New Hampshire DC Support Agreement”), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provision of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings therein provided.
2. Section 1 is hereby amended by deleting the first sentence of the fifteenth paragraph thereof.
3. Section 2 is hereby amended by (i) changing each reference to a “June 1, 1986” deadline to “September 15, 1988” and (ii) changing each reference to a “March 1, 1986” deadline to “September 1, 1988.”
4. Section 2 is hereby amended further by deleting, in the last paragraph thereof, the words “Section 2” and inserting in lieu thereof “Agreement.”
5. Section 4A is hereby amended by deleting the third sentence of the second paragraph thereof and inserting in lieu thereof the following:

“The initial computation of Participating Shares shall be made on the basis that each signatory to this Agreement as shown in Attachment A is a Participant. After such initial computation and before the

Effective Date, each Participant shall be entitled to transfer any or all of its Participating Share to one or more other Participants. On or before September 1, 1988, any Participant listed in Attachment A who has transferred, or intends to transfer, any or all of its Participating Share to one or more other Participants listed in Attachment A must provide documentation to New Hampshire Hydro covering the transfer. The initial computation is to be recomputed on and as of the Effective Date on the basis that each signatory to this Agreement which has provided timely documentation of its participation or transfer is a Participant. Any such transfers of Participating Shares will be taken into account after such recomputation. Any such transfer of Participating Shares hereunder shall have no effect on the interests, rights, or obligations of participants in Phase I. Subsequent computations are to be made thereafter as of the first day of each month in which an interest is modified or terminated pursuant to any provision hereof.”

6. Section 4B is hereby amended by deleting, in the first sentence thereof, the word “date”.
7. Section 12 is hereby amended by inserting into the second sentence of the fourth paragraph thereof following the words “In addition, each Participant will pay to” the following:

“New Hampshire Hydro, and New Hampshire Hydro will pay to”
8. Section 14 is hereby amended by adding the following clause to the end of the first sentence thereof:

“; provided, however, that nothing in this Section 14 shall (a) prevent a Participant from transferring its interests and obligations hereunder to another Participant prior to the Effective Date, or (b) impose any continuing liabilities or obligations on said transferring Participant with respect to this Agreement incurred or relating to the period of time after said transferring Participant’s Participating Share has been reduced to zero.”
9. Section 20F is hereby amended by inserting into the second sentence thereof following the words “the Transmission Facilities,” the following:

and (iv) for a transfer of any or all of a Participant’s Participating Share prior to the Effective Date as provided in Section 4A hereof;”
10. The first attached Schedule I is hereby deleted and replaced with the second attached Schedule I.
11. Schedule II to the Agreement is hereby deleted and replaced with the attached Schedule II.
12. Attachment A to the Agreement is hereby deleted and replaced with the attached Attachment A.
- 13 Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or

agents.

	76,698,146,596

- (a) Includes New Hampshire retail 1980 kilowatthour load of 434,290,243.
- (b) The 1980 Kilowatthour loads shown for Boston Edison Company and New England Power Company have been adjusted to reflect the current status of Norwood as a full requirements customer of New England Power Company.
- (c) As of June 1, 1985, Concord continues to be a full requirements customer of Edison. At such time as Concord ceases to be a full requirements customer of Edison, for purposes of this Agreement, Concord shall have an additional Participating Share equal to 1.087% of Edison's initial Participating Share (based on a 1980 Kwh load of 103,629,000 Kwh for Concord) and Edison's Participating Share shall be reduced by such amount.
- (d) Includes New. Hampshire retail 1980 kilowatthour load of 4,939,218,744.
- (e) The amount shown for Montaup Electric Company includes the load of the other members of the Eastern Utilities Associates system.
- (s) The amount shown for UNITIL Power Corp. represents the 1980 kilowatthour load of its affiliates, Concord Electric Company and Exeter & Hampton Electric Company.

AMENDMENT NO. 7  
TO  
PHASE II NEW HAMPSHIRE TRANSMISSION  
FACILITIES SUPPORT AGREEMENT

This Amendment, dated as of January 1, 1989, is between New England Hydro-Transmission Corporation (New Hampshire

Hydro), and the New England utilities listed in Attachment A to the Phase II New Hampshire Transmission Facilities Support Agreement, dated as of June 1, 1985, as amended (the “New Hampshire DC Support Agreement”), and amends the New Hampshire DC Support Agreement as hereinafter provided.

In consideration of the premises and other good and valuable consideration, receipt of which is hereby acknowledged, and pursuant to the provisions of Section 20H of the New Hampshire DC Support Agreement, it is hereby agreed as follows:

1. Certain terms defined in the New Hampshire DC Support Agreement are used herein with the meanings therein provided.
2. Section 2 is hereby amended by inserting the following at the end of the second sentence of paragraph seven thereof:

“, or except with the approval of New England Hydro and New Hampshire Hydro, as required in connection with any financing by MMWEC, the proceeds of which are to be applied exclusively by MMWEC to meet its obligations under Phase II, provided that such grant by MMWEC to its third party lenders shall be on a pari passu basis with the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company, and provided further that MMWEC shall have its third party lenders execute and deliver intercreditor agreements acceptable to the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company providing an appropriate allocation between MMWEC’s third party lenders and the Lenders, New England Hydro, New Hampshire Hydro, New England Power Company and Boston Edison Company of payments made under MMWEC’s contract with its systems and including appropriate notice provisions.”

Section 12 is hereby amended by inserting in the fourth paragraph thereof after the first sentence the following:

“‘Operating expenses’ shall also include all support -charges incurred by New Hampshire Hydro pursuant to Section 8 of the Phase II Maine Electric Power SVC Facilities Support Agreement between New Hampshire Hydro and Maine Electric Power Company, dated as of October 1, 1988 (SVC Agreement).”

Section 15C is hereby amended by inserting after the first sentence thereof the following:

“In addition, such Participant’s payment required by the preceding sentence shall be increased by an amount equal to its Participating Share of the ‘amounts’ determined in the first and second sentences of Section 11B of the SVC Agreement.”

Section 16 is hereby amended by inserting in the second sentence of the second paragraph thereof, after the words “notified, equal to”, the following:

“its Participating Share of the ‘amounts’ determined in the second and third sentences of the second paragraph of Section 12 of the SVC Agreement plus”

Section 16 is hereby further amended by inserting in the first sentence of the third paragraph thereof, after the words “sell the Transmission Facilities”; the following:

“(including New Hampshire Hydro’s rights to Transmission Facilities in Vermont and the SVC Facilities in Maine)”

Section 20D is hereby amended by inserting the following at the end of such section:

“For the purpose of this subsection, the Transmission Facilities shall include the SVC Facilities as defined in the SVC Agreement.”

3. This amendment shall become effective on the last to occur of (i) the acceptance of this amendment by the Federal Energy Regulatory Commission, and (ii) the effective date of the SVC Agreement.
4. Any number of counterparts of this Amendment may be executed, and each shall have the same force and effect as an original instrument and as if all the parties to all of the counterparts had signed the same instrument.

IN WITNESS WHEREOF, the signatories have caused this Amendment to be executed by their duly authorized officers or agents.

## PURCHASE AND SALE AGREEMENT

This PURCHASE AND SALE AGREEMENT (this “**Agreement**”), dated and effective as of October 11, 2017 (the “**Effective Date**”), is entered into by and between Granite Shore Power LLC, a Delaware limited liability company (“**Buyer**”), and Public Service Company of New Hampshire, a New Hampshire corporation (“**Seller**”). Buyer and Seller are each referred to in this Agreement as a “**Party**” and collectively as the “**Parties**.”

## RECITALS:

WHEREAS, Seller owns the electric generating facilities described in Schedule 1 hereto (collectively, the “**Facilities**”);

WHEREAS, on the terms and subject to the conditions set forth in this Agreement, Seller desires to sell and assign to Buyer, and Buyer desires to purchase and assume from Seller certain assets and liabilities respecting the Facilities, all as set forth herein.

NOW, THEREFORE, in consideration of the foregoing and the representations, warranties, covenants and agreements hereinafter set forth, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, hereby agree as follows:

**ARTICLE I**  
**DEFINITIONS AND INTERPRETATION**

**Section 1.1 Definitions.** As used in this Agreement, the following capitalized terms have the meanings set forth below:

“**Accrued Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(C).

“**Acquired Assets**” has the meaning set forth in Section 2.1.

“**Actual Prorated Amount**” has the meaning set forth in Section 2.7(c).

“**Affiliate**” means, with respect to any Person, any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. For purposes of this definition, the term “control” (including the terms “controlled by” and “under common control with”) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of such Person, whether through ownership of voting securities or other ownership interests, by Contract or otherwise.

“**Affected Employees**” means employees of Seller or Eversource Service whose primary employment duties include support of the Facilities and whose employment is terminated or significantly negatively affected as a direct result of the transactions contemplated hereby.

“**Agreement**” has the meaning set forth in the preamble.

“**Asset Demarcation Agreement**” has the meaning set forth in Section 2.10(e).

“**Assigned Contracts**” has the meaning set forth in Section 2.1(e).

“**Assigned Intellectual Property**” has the meaning set forth in Section 2.1(g).

“**Assigned Leases**” has the meaning set forth in Section 2.1(b).

“**Assignment and Assumption Agreement**” has the meaning set forth in Section 2.10(d).

“**Assignment and Assumption of Lease**” has the meaning set forth in Section 2.10(b).

“**Assumed Liabilities**” has the meaning set forth in Section 2.3.

“**Base Purchase Price**” has the meaning set forth in Section 2.5.

“**Bill of Sale**” has the meaning set forth in Section 2.10(c).

“**Business**” means the ownership, construction and operation of a portfolio of thermal electric generation assets and related facilities listed on Schedule 1 together with fuel inventories, and including the generation, sale, transmission and delivery of electric

energy, capacity, ancillary services and Environmental Attributes from the generation assets to the relevant interconnection point with the high voltage transmission system operated by ISO-NE or, in the case of Lost Nation, with the distribution system operated by Seller.

“**Business Day**” means any day other than a Saturday, Sunday or day on which banks are legally closed for business in Manchester, New Hampshire or New York, New York.

“**Buyer**” has the meaning set forth in the preamble.

“**Buyer Fundamental Warranties**” means the representations and warranties of Buyer set forth in Section 4.1 (Organization and Existence), Section 4.2 (Authority and Enforceability) and Section 4.6 (Brokers).

“**Buyer Indemnified Parties**” has the meaning set forth in Section 7.2.

“**Buyer Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(E).

“**Buyer Required Consents**” has the meaning set forth in Section 4.3(c).

“**Buyer Subsidiary**” has the meaning set forth in Section 9.6.

“**Buyer’s Observers**” has the meaning set forth in Section 5.4(b).

“**Buyer’s Contributory Plan**” has the meaning set forth in Section 5.8(e)(ii)(A).

“**Buyer’s Retirement Benefit**” has the meaning set forth in Section 5.8(e)(i)(E).

“**Buyer’s Retirement Plan**” has the meaning set forth in Section 5.8(e)(i)(A).

“**CAMS**” means ISO-NE’s Customer and Asset Management System.

“**Capacity Supply Obligation**” is an obligation to provide capacity from a resource, or a portion thereof, to satisfy a portion of the Installed Capacity Requirement that is acquired through a Forward Capacity Auction in accordance with Section III.13.2 of the ISO-NE Tariff, a reconfiguration auction in accordance with Section III.13.4 of the ISO-NE Tariff, or a Capacity Supply Obligation Bilateral in accordance with Section III.13.5.1 of Market Rule 1 of the ISO-NE Tariff. For avoidance of doubt, capitalized terms used in this definition but not defined in this Agreement have the meaning given them in the ISO-NE Tariff.

“**Cash**” means cash and cash equivalents (including marketable securities and short-term investments) calculated in accordance with GAAP.

“**Casualty Loss**” has the meaning set forth in Section 5.16.

“**CBA MOA**” means that certain Memorandum of Agreement Clarifying Certain Employee Protections Following a Divestiture by PSNH of its Generating Assets, dated September 7, 2017, between Seller and the Union.

“**CBA Term**” means June 1, 2017 through the later of May 31, 2020 or two years after the Closing Date.

“**Claim**” means any claim, demand, complaint, action, legal proceeding (whether at law or in equity), summons, citation, notice of violation, arbitration, investigation, audit or suit commenced, brought, received from, conducted or heard by or before any Governmental Authority, arbitrator, or Third Party.

“**Closing**” has the meaning set forth in Section 2.9.

“**Closing Date**” has the meaning set forth in Section 2.9.

“**Closing Purchase Price**” has the meaning set forth in Section 2.5.

“**Closing Statement**” has the meaning set forth in Section 2.6(c)(i).

“**Code**” means the Internal Revenue Code of 1986.

“**Combined Minimum Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(B).

“**Confidentiality Agreements**” means those certain Confidentiality Agreements between Seller and Atlas FRM LLC d/b/a

Atlas Holdings LLC, dated as of March 20, 2017 and Seller and Castleton Commodities International LLC, dated as of March 31, 2017.

“**Consent**” means any consent, authorization, approval, release, waiver, estoppel certificate or any similar agreement or approval of or by, or registration, notice, declaration or filing to or with, the applicable Governmental Authority or other Person, including any certificate, license, permit, Order or other action issued or taken by a Governmental Authority.

“**Contract**” means any legally binding contract, lease, mortgage, license, instrument, note or other evidence of indebtedness, purchase order, commitment, undertaking, indenture or other agreement.

“**Counterparty**” has the meaning set forth in [Section 5.3\(a\)](#).

“**Data Site**” means the “Project PurpleFinch” electronic data site established and maintained by Seller with IntraLinks, Inc. as it exists at 4 p.m. ET on October 6, 2017 and for which Buyer has been given access to the contents.

“**Deed**” has the meaning set forth in [Section 2.10\(a\)](#).

“**Dig Activities**” means (i) any investigation (including any drilling, sampling, testing or monitoring of any air, soil, soil gas, surface water, groundwater, sediments, building materials or other environmental media), monitoring, correction, removal or Remediation or other similar activity conducted by or on behalf of Buyer or any of its Affiliates (or any of their respective successors or assigns) on or after the Closing Date that is not required by applicable Environmental Law, Environmental Permits or pursuant to an express Order or directive of any Governmental Authority with jurisdiction (other than any such Order or directive that is issued at the request of or otherwise solicited by or on behalf of Buyer or any of its Affiliates (or any of their respective successors or assigns)); or (ii) any change by or on behalf of Buyer or any of its Affiliates (or any of their respective successors or assigns) to the operation and use of any of the Acquired Assets on or after the Closing Date not required by applicable Environmental Law, Environmental Permits or pursuant to an express Order or directive of any Governmental Authority with jurisdiction (other than any such Order or directive that is issued at the request of or otherwise solicited by or on behalf of Buyer or any of its Affiliates (or any of their respective successors or assigns)) compared to the operation and use of such Acquired Assets as operated and used by Seller in the twelve (12) months prior to the Closing Date (including the decommissioning, dismantling or removal of any Facility by or on behalf of Buyer or any of its Affiliates (or any of their respective successors or assigns)). Any of the foregoing activities engaged in as a result of a force majeure event shall not be “Dig Activities.”

“**Direct Claim**” has the meaning set forth in [Section 7.5\(c\)](#).

“**Easements**” means easements to be granted by Seller to Buyer to implement the Easement Plans.

“**Easement Plans**” means the plans to be agreed to by the Parties for purposes of implementing the transactions contemplated by this Agreement and the Related Agreements, including the Demarcation Agreement.

“**Effective Date**” has the meaning set forth in the preamble.

“**Employee Benefit Plan**” means any “employee benefit plan” (as such term is defined in Section 3(3) of ERISA), whether or not subject to ERISA, and any other employee benefit plan, program, policy or Contract, including any employment, pension, retirement, profit-sharing, thrift, savings, bonus plan, incentive, stock bonus, stock purchase, stock option or other equity or equity-based compensation, or retention, change in control, severance, deferred compensation, welfare benefit or fringe benefit plan, policy, program, agreement or arrangement.

“**Environment**” means soil, land surface or subsurface strata, real property, surface waters, groundwater, wetlands, sediments, plant or animal life, drinking water supply, ambient air (including indoor air) and any other environmental medium or natural resource.

“**Environmental Attributes**” means any emissions and renewable energy credits, energy conservation credits, benefits, offsets and allowances, emission reduction credits or items of similar import or regulatory effect (including emissions reduction credits or allowances under all applicable emission trading, compliance or budget programs, or any other federal, state or regional emission, renewable energy or energy conservation trading or budget program) that are attributable to the operation of the Facilities.

“**Environmental Claim**” means any Claim by any Person alleging Liability of whatever kind or nature (including with respect to loss of life, injury to persons, property or business, damage to natural resources or trespass to property, whether or not such loss, injury, damage or trespass arose or was made manifest before the Closing Date or arises or becomes manifest on or after the Closing Date) arising out of, resulting from or in connection with: (a) the presence, Release of, or exposure to, any Hazardous Substances or (b) any actual or alleged violation or non-compliance with any Environmental Law or term or condition of any Environmental Permit.

“**Environmental Laws**” means all applicable Laws, Orders and any binding administrative or judicial interpretations thereof

(including any binding agreement with any Governmental Authority) relating to: (a) pollution (or the cleanup thereof); (b) the regulation, protection and use of the Environment; (c) the protection, conservation, management, development, control and/or use of land, natural resources and wildlife (including endangered and threatened species); (d) the protection of human health or safety; (e) the management, manufacture, possession, presence, processing, use, generation, transportation, treatment, containment, storage, disposal, recycling, reclamation, Release, threatened Release, abatement, removal, remediation, or handling of, or exposure to, any Hazardous Substances; or (f) noise; and includes, without limitation, the following federal statutes (and their implementing regulations): the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986 (42 U.S.C. § 9601 et seq.); the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments Act of 1984 (42 U.S.C. § 6901 et seq.); the Federal Water Pollution Control Act of 1972, as amended by the Clean Water Act of 1977 (33 U.S.C. § 1251 et seq.); the Toxic Substances Control Act of 1976, as amended (15 U.S.C. § 2601 et seq.); the Emergency Planning and Community Right to Know Act of 1986 (42 U.S.C. § 11001 et seq.); the Clean Air Act of 1966, as amended by the Clean Air Act Amendments of 1990 (42 U.S.C. § 7401 et seq.); the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. § 136 et seq.); the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1451 et seq.); the Oil Pollution Act of 1990, as amended (33 U.S.C. § 2701 et seq.); the Rivers and Harbors Act of 1899, as amended (33 U.S.C. § 401 et seq.); the Hazardous Materials Transportation Act, as amended (49 U.S.C. §§ 5101 et seq.); the Endangered Species Act of 1973, as amended (16 U.S.C. § 1531 et seq.); the Occupational Safety and Health Act of 1970, as amended (29 U.S.C. § 651 et seq.); and the Safe Drinking Water Act of 1974, as amended (42 U.S.C. § 300f et seq.); and all analogous or comparable statutes and regulations of any Governmental Authority.

**“Environmental Liabilities”** means any Liabilities of whatever kind or nature (including without limitation any natural resources damages, property damages, personal injury damages, losses, Claims, judgments, amounts paid in settlement, fines, penalties, fees, expenses and costs, including Remediation costs, engineering costs, environmental consultant fees, laboratory fees, permitting fees, investigation costs, defense costs, costs of enforcement proceedings, costs of indemnification and contribution, costs of medical monitoring, and attorneys’ fees and expenses) arising out of, resulting from or in connection with (a) any violation or alleged violation of Environmental Laws or Environmental Permits, with respect to the ownership, operation or use of the Acquired Assets; (b) any Environmental Claims caused or allegedly caused by the presence, Release of, or exposure to Hazardous Substances at, on, in, under, adjacent to or migrating from the Acquired Assets; (c) the investigation and/or Remediation (whether or not such investigation or Remediation commenced before the Closing Date or commences on or after the Closing Date) of Hazardous Substances that are present or have been Released at, on, in, under, adjacent to or migrating from the Acquired Assets; (d) compliance with Environmental Laws or Environmental Permits with respect to the ownership, operation or use of the Acquired Assets; (e) any Environmental Claim arising from or relating to the off-site disposal, treatment, storage, transportation, discharge, Release or recycling, or the arrangement for such activities, of Hazardous Substances in connection with the ownership or operation of the Acquired Assets; and (f) the investigation and/or Remediation of Hazardous Substances that are generated, disposed, treated, stored, transported, discharged, Released, recycled, or the arrangement of such activities in connection with the ownership or operation of the Acquired Assets, at any Offsite Disposal Facility.

**“Environmental Permits”** means those Permits required for the ownership or operation of any Acquired Asset or the Business under Environmental Laws.

**“ERISA”** means the Employee Retirement Income Security Act of 1974.

**“Escrow Agreement”** has the meaning set forth in [Section 2.6\(a\)\(iii\)\(B\)](#).

**“Estimated Closing Statement”** has the meaning set forth in [Section 2.6\(b\)](#).

**“Estimated Prorated Amount”** has the meaning set forth in [Section 2.7\(b\)](#).

**“Estimated Proration Adjustment Amount”** has the meaning set forth in [Section 2.7\(b\)](#).

**“Estimated Purchase Price Adjustment”** has the meaning set forth in [Section 2.6\(b\)](#).

**“Eversource”** means Eversource Energy, a Massachusetts voluntary association and the parent company of Seller, formerly known as Northeast Utilities.

**“Eversource Service”** means Eversource Energy Service Company, a Connecticut corporation and an Affiliate of Seller, formerly known as Northeast Utilities Service Company.

**“Excluded Assets”** has the meaning set forth in [Section 2.2](#).

**“Excluded Environmental Liabilities”** has the meaning set forth in [Section 2.4\(i\)](#).

“**Excluded Environmental Liability Termination Date**” means, (i) with respect to those Excluded Environmental Liabilities described in Section 2.4(i)(A) and Section 2.4(i)(B)(I), the seventh (7th) anniversary of the Closing Date, and (ii) with respect to those Excluded Environmental Liabilities described in Section 2.4(i)(B)(II), the seventh (7th) anniversary of the Schiller Boiler Removal Completion Date.

“**Excluded Liabilities**” has the meaning set forth in Section 2.4.

“**Facilities**” has the meaning set forth in the recitals. For avoidance of doubt, any individual Facility referred to herein by the name set forth in Schedule 1 shall mean such Facility, as described in Schedule 1.

“**FERC**” means the Federal Energy Regulatory Commission.

“**Final Purchase Price Adjustment**” has the meaning set forth in Section 2.6(c)(iii).

“**GAAP**” means United States generally accepted accounting principles in effect from time to time, as applied by Seller.

“**GADS**” means the Generating Availability Data System operated by NERC.

“**GADS Event**” means an outage or derating reportable to GADS affecting any unit at any Facility, the effect of which is that such Facility’s applicable Capacity Supply Obligation as listed in Schedule 3.21(a) exceeds the amount of capacity reported as available in GADS by the lesser of 5 megawatts or 10 percent of the Facility’s Capacity Supply Obligation as listed in Schedule 3.21(a).

“**Generation CBA**” means the Generation Group Contract, IBEW Local 1837, between Seller and the Union, made and entered into as of June 1, 2013, as amended by (i) that Addendum, dated June 1, 2017 and ratified on June 9, 2017, that modified wages and certain benefits including the Disability Plan, Vacation and Holiday Schedules, (ii) that Memorandum of Agreement Extending Current CBA Upon Divestiture by PSNH of any Generating Asset dated May 20, 2015 (including the Memorandum of Understanding attached as Exhibit A thereto and the Enhanced Bidding Rights Agreement attached as Exhibit B thereto), (iii) that Amendment to Memorandum of Agreement Extending Current CBA Upon Divestiture by PSNH of any Generating Asset dated November 14, 2016, (iv) the CBA MOA; and (v) as further amended by that Memorandum of Understanding regarding “Policies” between IBEW Locals 455, 457, 420 & 1837 and Northeast Utilities, that January 20, 1994 Agreement regarding Schiller 12 hour shifts signed April 18, 1995, that September 8, 2015 Memorandum of Understanding Regarding Day Worker Path to Operator Maintenance as amended by an Agreement dated January 21, 2016, that Memorandum of Understanding regarding Global Positioning System signed October 26, 2015, that August 5, 2016 Agreement regarding Holiday in lieu of practice, that April 26, 2016 Agreement regarding Generation positions retention, that July 29, 1998 Agreement regarding the 12 Hour Shift Policy at Newington; the August 25, 1999 Schiller Stations Operations Agreement, and that April 21, 1997 Settlement Agreement as amended by the June 15, 2009 Amendment to that Settlement Agreement regarding working foremen at Schiller Station.

“**Good Utility Practice**” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric power generation industry during the relevant time period, or any of the practices, methods or acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather is intended to include acceptable practices, methods or acts generally accepted in the region, or required by the NHPUC, including but not limited to compliance with the standards established by the National Electrical Safety Code and ISO-NE.

“**Governmental Authority**” means any federal, state, local, municipal or foreign government or political subdivision thereof, or any agency or instrumentality of such government or political subdivision, or any self-regulated organization or other non-governmental regulatory authority or quasi-governmental authority (to the extent that the rules, regulations or orders of such organization or authority have the force of Law), or any arbitrator, court or tribunal of competent jurisdiction, including, without limitation, FERC, NERC, ISO-NE and Northeast Power Coordinating Council, Inc., but excluding Buyer and any subsequent owner of any of the Acquired Assets (if otherwise a Governmental Authority under this definition).

“**Guaranties**” means each Guaranty delivered to Seller on the Effective Date by Atlas Capital Resources II LP and Castleton Commodities International LLC.

“**Handling**” means any manner of manufacturing, using, generating, accumulating, storing, treating, disposing of, recycling, processing, distributing, handling, labeling, producing, releasing, or transporting, as any such terms may be defined in any Environmental Law, of Hazardous Substances.

“**Hazardous Substance**” means (a) any petrochemical or petroleum product, oil, waste oil, coal ash, radioactive materials,

radon, asbestos in any form, urea formaldehyde foam insulation, lead-containing materials and polychlorinated biphenyls; (b) any products, mixtures, compounds, materials or wastes, air emissions, toxic substances, wastewater discharges and any chemical, material or substance that may give rise to Liability pursuant to, or is listed or regulated under, or the human exposure to which or the Release of which is controlled or limited by applicable Environmental Laws; and (c) any materials or substances defined in Environmental Laws as “hazardous”, “toxic”, “pollutant” or “contaminant”, or words of similar meaning or regulatory effect.

“**HSR Act**” means the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

“**Hydro Business**” means the ownership, construction and operation of the portfolio of hydroelectric generation assets and related facilities owned by Seller on the Effective Date, together with storage reservoirs, including generating, selling, transmitting and delivering electric energy, capacity, ancillary services and Environmental Attributes from the generation assets to the relevant interconnection point with the high voltage transmission system operated by ISO-NE.

“**Improvements**” means all buildings, structures (including all fuel handling and storage facilities), machinery and equipment, fixtures, construction in progress, including all piping, cables and similar equipment forming part of the mechanical, electrical, plumbing or HVAC infrastructure of any building, structure or equipment, and including all generating units, located on and affixed to the Sites other than the Seller Marks.

“**Indemnified Party**” has the meaning set forth in Section 7.4.

“**Indemnifying Party**” has the meaning set forth in Section 7.4.

“**Independent Accountant**” means a nationally recognized independent accounting firm mutually agreed upon by the Parties.

“**Intellectual Property**” means any and all of the following in any jurisdiction throughout the world: (a) trademarks and service marks, including all applications and registrations and the goodwill connected with the use of and symbolized by the foregoing, but not including the Seller Marks; (b) copyrights, including all applications and registrations, and works of authorship, whether or not copyrightable; (c) trade secrets and confidential knowhow; (d) patents and patent applications; (e) websites and internet domain name registrations; and (f) all other intellectual property and industrial property rights and assets, and all rights, interests and protections that are associated with, similar to, or required for the exercise of, any of the foregoing.

“**Intercompany Arrangements**” has the meaning set forth in Section 2.2(j).

“**Interconnection Agreements**” has the meaning set forth in Section 2.10(f).

“**Interim Period**” means the period of time commencing on the Effective Date and ending on the Closing.

“**Inventory**” or “**Inventories**” means natural gas, coal, biomass and oil inventories, and raw materials, spare parts and consumable supplies located at or held or acquired for use in connection with the Business, whether on or off any Site, or in transit to any of the Sites or identified in any Schedule hereto.

“**ISO-NE**” means ISO New England, Inc. or its successor.

“**ISO-NE Tariff**” means the ISO New England Inc. Transmission, Markets and Services Tariff as in effect from time to time.

“**ISO-Recognized Capacity**” means, for a Facility, the most recent FCA Qualified Capacity as of the Effective Date as listed in Schedule 3.21(a) and as reported by ISO-NE in its most recent “CCP Forward Capacity Auction Obligations” report.

“**Law**” means any statute, law, ordinance, regulation, rule, code, Order, constitution, treaty, common law, judgment, tariff, approval, directive, writ, decree or other requirement, rule or other pronouncement having the effect of law of any Governmental Authority.

“**Leased Real Property**” has the meaning set forth in Section 2.1(b).

“**Liability**” means any liability or obligation, or contingent liability or obligation of any type whatsoever (whether known or unknown, whether asserted or unasserted, whether absolute or contingent, whether accrued or unaccrued, whether liquidated or unliquidated, whether incurred or consequential and whether due or to become due), including any liability for Taxes.

“**Lien**” means any lien, pledge, mortgage, deed of trust, security interest, charge, claim, easement, encroachment, conditional sale or other title retention device or arrangement, option, restriction on transfer, third party purchase right, right of first offer or refusal, or other encumbrance of any kind, or restriction on the creation of any of the foregoing.

“**Losses**” means any and all judgments, losses, Liabilities, amounts paid in settlement, damages, fines, penalties, deficiencies, costs, Taxes, obligations and expenses (including interest, court costs and reasonable fees of attorneys, accountants and other experts and the cost of enforcing any right to indemnification hereunder). For all purposes in this Agreement, the term “Losses” does not include any Non-Reimbursable Damages.

“**Made Available**” means, with respect to documents and materials, that such documents or materials have been posted to the Data Site or otherwise provided to Buyer by Seller or its Representatives.

“**Material Adverse Effect**” means any change or event, whether singly or in the aggregate, that is materially adverse to the assets, liabilities, operations or financial condition of any of the Business or the ownership, use, operation repair, maintenance or replacement of any of the Acquired Assets, taken as a whole; *provided, however*, that any changes or events resulting from or arising out of the following shall not be considered when determining whether a Material Adverse Effect has occurred: (a) any change generally affecting the international, national or New England regional electric generating, transmission or distribution industry; (b) any change generally affecting the international, national or New England regional wholesale or retail markets for electric power; (c) any change generally affecting the international, national or New England regional wholesale or retail markets for the coal, natural gas or oil industries or the transportation or storage of coal, natural gas or oil; (d) any change in markets for commodities or supplies, including electric power, natural gas, oil, coal or other fuel and water, as applicable, used in connection with the Facilities; (e) any change in market (including the market for electrical power, coal, natural gas or oil) design, pricing or rules (including rules, systems, procedures, guidelines or requirements promulgated or modified by ISO-NE, any other regional transmission organization, NERC or any similar organization); (f) any change in general regulatory or political conditions, including any engagements of hostilities, acts of war or terrorist activities or changes imposed by a Governmental Authority associated with additional security; (g) any change in the international, national or New England regional electric transmission or distribution systems or operations thereof; (h) any change in any Laws (including Environmental Laws), GAAP, regulatory accounting principles or industry standards; (i) any change in the financial condition or results of operation of Buyer or its Affiliates, including its ability to access capital and equity markets and changes due to a change in the credit rating of Buyer or its Affiliates; (j) any change in the financial, banking, securities or currency markets (including the inability to finance the transactions contemplated hereby or any increased costs for financing or suspension of trading in, or limitation on prices for, securities on any domestic or international securities exchange); (k) any change in general national or New England regional economic or financial conditions or any failure or bankruptcy (or any similar event) of any financial services or banking institution or insurance company or counterparty to any Contract; (l) any actions to be taken pursuant to or in accordance with this Agreement, or taken by or at the written request of Buyer; (m) the announcement, pendency or consummation of the transactions contemplated hereby, or the fact that the prospective owner of the Acquired Assets is Buyer; (n) any labor strike, request for representation, organizing campaign, work stoppage, slowdown, or lockout or other labor dispute; (o) any new or announced power provider entrants, including their effect on pricing or transmission; (p) any Casualty Loss or event of condemnation; (q) seasonality of the operations of the Facilities; or (r) any failure of the Acquired Assets to meet projections or forecasts or revenue or earnings predictions for any period; *provided*, that any Loss, Claim, occurrence, change or effect that is cured prior to the Closing Date shall not be considered a Material Adverse Effect; *provided, further*, that, for the avoidance of doubt, a Material Adverse Effect shall be measured only against past performance of the Acquired Assets, taken as a whole, and not against any forward-looking statements, financial projections or forecasts of the Acquired Assets.

“**Material Contracts**” has the meaning set forth in Section 2.1(e).

“**Merrimack Landfill Trust**” has the meaning set forth in Section 5.3(c).

“**Mortgage Indenture**” means that certain First Mortgage Indenture, dated as of August 15, 1978, as amended and restated effective as of June 1, 2011, and supplemented, between Seller and U.S. Bank National Association, successor to Wachovia Bank, National Association, successor to First Union National Bank, formerly known as First Fidelity Bank, National Association, New Jersey, as trustee.

“**NEPOOL**” means the New England Power Pool, or its successor.

“**NERC**” means the North American Electric Reliability Corporation or its successors and assigns.

“**NHDES**” means the New Hampshire Department of Environmental Services.

“**NHPUC**” means the New Hampshire Public Utilities Commission.

“**NHPUC Approval**” means the Consent of the NHPUC to the transactions contemplated by this Agreement and the Related Agreements as required under New Hampshire Law.

“**Non-Assigned Contracts**” has the meaning set forth in Section 5.3(a)(v).

“**Non-Reimbursable Damages**” has the meaning set forth in Section 7.8(e).

“**Non-Represented Scheduled Employees**” has the meaning set forth in Section 3.12(a).

“**Non-Represented Transferred Employees**” has the meaning set forth in Section 5.8(c)(i).

“**Objection Notice**” has the meaning set forth in Section 2.6(c)(i).

“**Offsite Disposal Facility**” means a location, other than a Facility or a Site, that receives or received Hazardous Substances for disposal by Seller prior to the Closing Date or by Seller as a result of Remediation at a Facility or a Site (including, but not limited to, the removal of Hazardous Substances pursuant to the Removal Contract) on or after the Closing Date, or by Buyer on or after the Closing Date; *provided, however*, Offsite Disposal Facility does not include any location to which Hazardous Substances disposed of or Released at any of the Sites have migrated.

“**Order**” means any award, decision, injunction, judgment, order, writ, decree, stipulation, rule, ruling, subpoena, arbitration award or verdict entered, issued, made or rendered by any Governmental Authority or arbitrator that possesses competent jurisdiction.

“**Organizational Documents**” means, with respect to any Person, the certificate or articles of incorporation, organization or formation and by-laws, the limited partnership agreement, the partnership agreement or the operating or limited liability company agreement, equity holder agreements and/or other organizational and governance documents of such Person.

“**Other Assigned Contracts**” has the meaning set forth in Section 2.1(e).

“**Outside Date**” has the meaning set forth in Section 8.1(a).

“**Party**” and “**Parties**” each has the meaning set forth in the preamble.

“**Permits**” means all certificates, licenses, permits, approvals, authorizations, registrations, Consents, Orders, decisions and other authorizing actions of a Governmental Authority pertaining to a particular Acquired Asset, or the ownership, operation or use thereof.

“**Permitted Lien**” means (a) any Lien for Taxes not yet due or payable; (b) any Lien arising in the ordinary course of business by operation of Law (including mechanics’, materialmen’s, warehousemen’s, carriers’, workmen’s, repairmen’s, landlords’, suppliers’ and other similar Liens) with respect to a Liability that is not yet due or payable; (c) any purchase money Lien (including Liens under purchase price conditional sales contracts and equipment leases) arising in the ordinary course of business and listed on Schedule 1.1-PL; (d) any deposit or pledge made in connection with, or to secure payment of, workers’ compensation, unemployment insurance, old age pension programs mandated under applicable Laws or other social security regulations; (e) any exception or other matter set forth in Schedule BII of each of the Title Commitments; (f) any zoning or planning restriction, building and land use Law or similar restriction or condition imposed by any Governmental Authority that does not materially and adversely affect the Business or the ownership, use, operation, maintenance, repair or replacement of any of the Acquired Assets; (g) the terms and conditions of the Assigned Contracts, Assigned Leases and Transferable Permits; (h) any Lien that will no longer be binding on the Acquired Assets after Closing; (i) any Lien created by or resulting from any act or omission of Buyer; (j) any Lien granted or created by the execution and delivery of this Agreement or any of the Related Agreements or pursuant to the terms and conditions hereof or thereof (including without limitation the Reserved Easements); and (k) the matters and Liens set forth on Schedule 1.1-PL.

“**Person**” means an individual, corporation, partnership (general or limited), limited liability company, joint venture, trust, association, unincorporated organization, other business organization or Governmental Authority.

“**Potential Qualified Capacity Increase**” has the meaning set forth in Section 2.6(a)(iii).

“**Potential Qualified Capacity Reduction**” has the meaning set forth in Section 2.6(a)(iii)(B).

“**Prepayments**” means all advance payments, prepaid expenses (including rent), prepaid Taxes, progress payments and deposits of Seller, and rights to receive prepaid expenses, deposits or progress payments relating to the ownership and operation of the Acquired Assets, but not including any prepaid expenses or deposits attributable to Excluded Assets.

“**Property Tax Stabilization Payments**” mean those property tax stabilization payments with respect to the Facilities payable by Seller under the Settlement Agreement.

“**Prorated Amount**” means (a) with respect to any Prorated Item that is a Prepayment, the amount allocable to the period on or after the Closing Date that was paid by Seller prior to the Closing Date, and (b) with respect to any other Prorated Item, the amount (expressed as a negative number) allocable to the period prior to the Closing Date, whether or not then due and payable, which was not

paid by Seller prior to the Closing Date and which represents an Assumed Liability (excluding, for the avoidance of doubt, any amount paid by Seller after the Closing Date directly to the applicable Third Party), in each case, prorated in accordance with the methodology specified in Section 2.7.

“**Prorated Items**” has the meaning set forth in Section 2.7(a).

“**Purchase Price**” has the meaning set forth in Section 2.5.

“**Purchase Price Adjustment**” has the meaning set forth in Section 2.6(c)(i).

“**Qualified Capacity**” means the amount of capacity a resource may provide in the summer or winter in a Capacity Commitment Period (as defined in the ISO-NE Tariff), as determined in the Forward Capacity Market (as defined in the ISO-NE Tariff) qualification processes.

“**Qualified Capacity Increase**” has the meaning given to it in Section 2.6(a)(iii)(C).

“**Qualified Capacity Reduction**” has the meaning given to it in Section 2.6(a)(iii).

“**Real Property**” has the meaning set forth in Section 2.1(a).

“**Real Property Agreements**” has the meaning set forth in Section 3.17(d).

“**Related Agreements**” means the Deeds, each Assignment and Assumption of Lease, the Bill of Sale, the Assignment and Assumption Agreement, the Asset Demarcation Agreement, the Easements, the Interconnection Agreements, the Transition Services Agreement, the Release of Mortgage Indenture, the Guaranties, the Escrow Agreement and the other agreements, certificates and documents to be delivered pursuant to this Agreement.

“**Release**” means any release, spill, emission, escape, migration, leaking, leaching, pumping, injection, dispersal, migration, dumping, deposit, disposal or discharge at, into, onto, or through the Environment, whether sudden or non-sudden and whether accidental or non-accidental, or any release, emission or discharge as those terms are defined in any applicable Environmental Law.

“**Release of Mortgage Indenture**” has the meaning set forth in Section 2.10(h).

“**Remediation**” means any or all of the following activities to the extent required to address the presence or Release of, or exposure to, Hazardous Substances: (a) monitoring, investigation, assessment, treatment, cleanup, containment, removal, mitigation, response or restoration work; (b) obtaining any Permits or Consents of any Governmental Authority necessary to conduct any such activity; (c) preparing and implementing any plans or studies for any such activity; (d) obtaining a written notice (or an oral notice which is appropriately documented or memorialized) from a Governmental Authority with competent jurisdiction under Environmental Laws or a written opinion of a Licensed Professional Geologist (as defined in New Hampshire RSA 310-A:118, IV), as contemplated by the relevant Environmental Laws and in lieu of a written notice from a Governmental Authority, that no material additional work is required; and (e) any other activities reasonably determined by a Party to be necessary or appropriate or required under Environmental Laws.

“**Removal Contract**” means that certain Cover Agreement for Abatement, Demolition and Disposal of the Mercury Vapor Power Units at Schiller Station between Eversource Service, as agent for Seller, and Manafort Brothers, Inc., as contractor, dated as of April 12, 2016, as amended by the First Amendment to the Cover Agreement for Abatement, Demolition and Disposal of the Mercury Vapor Power Units at Schiller Station, dated October 24, 2016.

“**Removal Contractor**” means Manafort Brothers, Inc., the contractor under the Removal Contract.

“**Representative**” means, with respect to any Person, such Person’s Affiliates, and such Person and its Affiliates’ respective officers, directors, managers, employees, agents, consultants and advisors (including financial advisors, accountants and counsel).

“**Represented Scheduled Employees**” has the meaning set forth in Section 3.12(a).

“**Represented Transferred Employees**” has the meaning set forth in Section 5.8(b)(ii).

“**Reserved Easements**” means easements to be reserved by Seller with respect to certain T&D Assets and associated telecommunications facilities located on the site of the Acquired Assets, to be reserved in the Deeds pursuant to Section 5.2(f).

“**Restoration Cost**” has the meaning set forth in Section 5.16.

“**Scheduled Employees**” has the meaning set forth in Section 3.12(a).

“**Schedule Update**” has the meaning set forth in Section 5.15(b).

“**Schiller Boiler Removal Completion Date**” means the date that Seller notifies Buyer that it has satisfied in full its obligations under Section 5.20.

“**Selected Represented Employees**” has the meaning set forth in Section 5.8(b)(i).

“**Selected Non-Represented Employees**” has the meaning set forth in Section 5.8(c)(i).

“**Seller**” has the meaning set forth in the preamble.

“**Seller Fundamental Warranties**” means the representations and warranties of Seller set forth in Section 3.1 (Organization and Existence), Section 3.2 (Authority and Enforceability), Section 3.6 (Title to Acquired Assets) and Section 3.19 (Brokers).

“**Seller Indemnified Parties**” has the meaning set forth in Section 7.3.

“**Seller Marks**” means any and all names, marks, trade names, trademarks and corporate symbols and logos incorporating “PSNH,” “Public Service Company of New Hampshire,” “Public Service of New Hampshire,” “Eversource,” “Eversource Energy” or “Northeast Utilities,” or any word or expression similar thereto or constituting an abbreviation or extension thereof, together with all other names, marks, trade names, trademarks and corporate symbols and logos of Seller or any of its Affiliates.

“**Seller Required Consents**” has the meaning set forth in Section 3.3.

“**Seller’s Knowledge**” means the actual knowledge (and not imputed or constructive knowledge) of the individuals listed on Schedule 1.1-K, after due inquiry.

“**Seller’s Pension Plan**” has the meaning set forth in Section 5.8(e)(i)(B).

“**Settlement Agreement**” means that certain 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, dated as of June 10, 2015, by and among Seller, Eversource, the Office of Energy and Planning, Designated Advocate Staff of the NHPUC, the Office of Consumer Advocate, New Hampshire District 3 Senator Jeb Bradley, New Hampshire District 15 Senator Dan Feltes, the City of Berlin, New Hampshire, the Union, the Conservation Law Foundation, Inc., TransCanada Power Marketing Ltd., TransCanada Hydro Northeast Inc., and the New Hampshire Sustainable Energy Association d/b/a NH CleanTech Council, as amended by that certain Amendment to the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, dated January 26, 2016, and the Partial Litigation Settlement Between Settling Parties and Non-Advocate Staff, dated January 26, 2016, all as approved by NHPUC Order No. 25,920, dated July 1, 2016.

“**Site**” means the Real Property or Leased Real Property (as applicable) and Improvements forming a part of, or used or usable in connection with, a Facility. Any reference to a Site shall include, by definition, the surface and subsurface elements, including the soils and groundwater present at such Site, and any reference to items “at the Site” shall include all items “at, on, in, upon, over, across, under and within” the Site.

“**T&D Assets**” means the transmission, distribution, communication, substation and other assets necessary to current or future T&D Operations of Seller.

“**T&D Operations**” means the process of conducting and supporting the transmission, distribution and sale of electricity.

“**Taking**” has the meaning set forth in Section 5.17.

“**Tax**” or “**Taxes**” means any federal, state, local, or foreign income, gross receipts, license, payroll, employment, excise, severance, stamp, occupation, premium, windfall profits, environmental (including taxes under Code Section 59A), customs duties, capital stock, franchise, profits, withholding, social security (or similar, including FICA), unemployment, disability, real property, personal property, *ad valorem*, sales, use, transfer, border adjustment, registration, value added, alternative or add-on minimum, estimated, or other tax, governmental charge or assessment of any kind whatsoever, including any interest, penalty, or addition thereto, whether disputed or not.

“**Tax and HR Warranties**” means the representations and warranties set forth in Section 3.10 (Taxes), Section 3.12 (Employment and Labor Matters) and Section 3.13 (Employee Benefit Plans).

“**Taxing Authority**” means, with respect to any Tax, the Governmental Authority (including the Internal Revenue Service)

that imposes such Tax, and the agency (if any) charged with the collection or administration of such Tax for such Governmental Authority.

“**Tax Return**” means any return, declaration, report, claim for refund, or information return or statement relating to Taxes filed with or submitted to, or required to be filed with or submitted to, any Governmental Authority in connection with the determination, assessment, collection, or payment of any Tax or in connection with the administration, implementation, or enforcement of or compliance with any Law relating to any Tax, including any schedule or attachment thereto, and including any amendment thereof.

“**Terminated Contracts**” has the meaning set forth in Section 5.6(a).

“**Third Party**” means a Person that is not a Party.

“**Third Party Claim**” has the meaning set forth in Section 7.5(a).

“**Threshold Amount**” has the meaning set forth in Section 7.4(a).

“**Title Commitments**” has the meaning set forth in Section 3.6.

“**Title Policies**” means the title insurance policies which may be purchased by Buyer pursuant to Section 6.1(b).

“**Transfer Taxes**” means all transfer, sales, ad valorem, use, goods and services, value added, documentary, stamp duty, gross receipts, excise, transfer and conveyance Taxes and other similar Taxes, duties, fees or charges, together with any interest, penalties or additions in respect thereof, including, but not limited to, the New Hampshire real estate transfer tax due pursuant to NH RSA 78-B:1, *et seq.*

“**Transferable Permits**” has the meaning set forth in Section 2.1(d).

“**Transferred Books and Records**” means all books, operating records, engineering designs, blueprints, as-built plans, specifications, procedures, studies, reports (including PI software historical data), manuals, equipment repair records, safety records, maintenance records, service records, supplier, contractor and subcontractor lists, pending purchase orders, property and sales Tax Returns and related Tax records, and all Transferred Employee Records (in each case, in the format (including electronic format) in which such items are reasonably and practically available), in each case, in the possession or control of Seller or any of its Affiliates to the extent relating specifically to the ownership or operation of the Facilities, the Sites and the Acquired Assets; *provided*, that “Transferred Books and Records” shall not include: (a) any files or records relating to any employees who are not Transferred Employees, (b) files or records relating to any Transferred Employee afforded confidential treatment under any applicable Laws, except to the extent the affected employee consents in writing to such disclosure to Buyer, (c) all records prepared in connection with the sale of the Acquired Assets (and Seller’s other generation assets), including bids received from Third Parties and analyses relating to the Acquired Assets, (d) financial records, books of account or projections relating to the Acquired Assets, (e) books, records or other documents of Seller or its Affiliates related to corporate compliance matters not primarily developed for the Acquired Assets, (f) organizational documents (including minute books) of Seller, (g) materials, the disclosure of which would constitute a waiver of attorney-client or attorney work product privilege, or (h) any other books and records which Seller is prohibited from transferring to Buyer under applicable Law and is required by applicable Law to retain.

“**Transferred Employees**” means the Non-Represented Transferred Employees and the Represented Transferred Employees, collectively.

“**Transferred Employee Records**” means all personnel records maintained by Seller relating to the Transferred Employees, to the extent such files contain (a) names, addresses, dates of birth, job titles and descriptions; (b) dates of employment; (c) compensation and benefits information; (d) resumes and job applications; and (e) any other documents that Seller is not prohibited by Law from delivering to Buyer. To the extent the consent of a Transferred Employee is required under applicable Law in order for Seller to deliver a document that is part of the Transferred Employee Records to Buyer, Seller agrees to use commercially reasonable efforts to secure such consent.

“**Transition Service Cost Percentage**” means 100% during the period of the first thirty (30) days after the Closing Date, 110% for the next sixty (60) days, 125% for the next ninety (90) days, and 150% thereafter.

“**Transition Services Agreement**” has the meaning set forth in Section 5.6(b).

“**Union**” means International Brotherhood of Electrical Workers, Local 1837.

“**WARN Act**” means the Worker Adjustment and Retraining Notification Act, 29 U.S.C. § 2101, et seq.

**Section 1.2 Rules of Interpretation.** The following rules of interpretation apply to this Agreement:

(a) Unless otherwise specified, all Article, Section, Schedule and Exhibit references in this Agreement are to the Articles and Sections of, and the Schedules and Exhibits attached to, this Agreement. The Schedules and Exhibits attached to this Agreement constitute a part of this Agreement and are incorporated in this Agreement for all purposes.

(b) Article, Section and subsection headings in this Agreement are inserted for convenience only and shall not affect in any way the meaning or interpretation of this Agreement.

(c) If a term is defined as one part of speech (such as a noun), it shall have a corresponding meaning when used as another part of speech (such as a verb). Unless the context of this Agreement clearly requires otherwise, (i) words importing the masculine gender shall include the feminine and neutral genders and vice versa and (ii) words in the singular shall include the plural and vice versa. The words “include,” “includes,” and “including” are not limiting and shall mean “including without limitation.” The word “or” shall not be exclusive. The words “herein,” “hereunder,” “hereof,” “hereto” and similar terms used in this Agreement are references to this Agreement as a whole and not to any particular Article or Section or other portion of this Agreement in which such words appear. For purposes of computation of periods of time, the word “from” means “from and including” and the words “to” and “until” each mean “to but excluding.”

(d) Whenever this Agreement refers to a number of days, such number shall refer to calendar days unless Business Days are specified. Whenever any action must be taken hereunder on or by a day that is not a Business Day, then such action may validly be taken on or by the next day that is a Business Day.

(e) Unless the context of this Agreement clearly requires otherwise, any reference to any Contract means such Contract as amended and in effect from time to time in accordance with its terms and, if applicable, the terms of this Agreement.

(f) Unless the context of this Agreement clearly requires otherwise, reference to any Law means such Law as amended, modified, codified, replaced or re-enacted, in whole or in part, and in effect from time to time, including any successor legislation thereto and all rules and regulations promulgated thereunder.

(g) Currency amounts referenced in this Agreement are in U.S. Dollars.

(h) All accounting terms used but not expressly defined herein have the meanings given to them under GAAP.

(i) Each Party acknowledges that it and its attorneys have been given equal opportunity to negotiate the terms and conditions of this Agreement and that any rule of construction to the effect that ambiguities are to be resolved against the drafting Party, or any similar rule operating against the drafter of an agreement, shall not be applicable to the construction or interpretation of this Agreement.

## ARTICLE II PURCHASE AND SALE; CLOSING

**Section 2.1 Purchase and Sale of Acquired Assets.** On the terms and subject to the conditions set forth in this Agreement, at the Closing, Seller shall sell, assign, convey and transfer to Buyer, and Buyer shall purchase, assume and acquire from Seller, free and clear of Liens other than Permitted Liens, all of Seller’s right, title and interest in and to the following properties, rights and assets owned by Seller constituting, or used in and necessary for the operation of, the Business (collectively, the “**Acquired Assets**”):

(a) The real property, Improvements thereon, easements, licenses and other rights in real property described in Schedule 2.1(a), but subject to the Permitted Liens (the “**Real Property**”);

(b) The leasehold interests and rights thereunder relating to real property with respect to which Seller is lessee set forth in Schedule 2.1(b), but subject to the Permitted Liens (the “**Leased Real Property**”), and all leases set forth in Schedule 2.1(b) with respect to the Leased Real Property (the “**Assigned Leases**”);

(c) The machinery, equipment, tools, furniture, vehicles, Inventories and other tangible and intangible personal property owned by Seller and located at or in transit to the Facilities (if related primarily to any of the Acquired Assets) (including without limitation the items of personal property described on Schedule 2.1(c)), or, in the case of intangible personal property (other than Intellectual Property), otherwise used primarily in the operation of any of the Facilities or the other Acquired Assets, including any Prepayments and all applicable warranties of manufacturers or vendors to the extent that such warranties are transferable, in each case as in existence on the Effective Date, but excluding such items disposed of by Seller in the ordinary course of business during the

Interim Period and including such additional items as may be acquired by Seller for use in connection with the Acquired Assets in the ordinary course of business during the Interim Period, in each case in accordance with Section 5.5;

(d) All Permits (including all pending applications for Permits or renewals thereof) relating to the ownership and operation of the Facilities or the Acquired Assets that, as of the Closing Date, are transferable by Seller to Buyer by assignment or otherwise under applicable Law and that are identified as “Transferable Permits” on Schedule 3.5(b) or Schedule 3.11(a) (the “**Transferable Permits**”);

(e) Excluding the Assigned Leases addressed in Section 2.1(b), but including personal property leases (whether Seller is lessor or lessee thereunder), real property leases with respect to which Seller is lessor thereunder and railroad crossing licenses and side-track agreements for the benefit of Seller, (i) those Contracts that are material to the ownership or operation of the Acquired Assets and that are set forth in Schedule 2.1(e) (the “**Material Contracts**”) and (ii) all other Contracts that relate primarily to the ownership or operation of any of the Acquired Assets or otherwise in connection with the Business, a copy of each Seller will provide to Buyer during the Interim Period and each of which will be subject to Buyer’s agreement to assume in accordance with Section 5.6(a) (the “**Other Assigned Contracts**” and, together with the Material Contracts, the “**Assigned Contracts**”); *provided* that subject to and to the extent it does not interfere with Buyer’s rights under any Assigned Contract, including Buyer’s right to exculpation and indemnification, Seller shall retain the rights and interests under any Assigned Contract to the extent such rights and interests provide for indemnity and exculpation rights for pre-Closing occurrences for which Seller remains liable under this Agreement; and *provided further*, that Seller shall, during the Interim Period, amend such Schedule to set forth any amendments to any Material Contract, or any additional Contracts entered into during the Interim Period that are material to the ownership or operation of the Acquired Assets, subject to the applicable covenants in Section 5.5;

(f) All Transferred Books and Records, subject to the right of Seller to retain copies for its use to the extent and subject to the conditions set forth herein;

(g) All Intellectual Property that is owned by Seller and primarily used in connection with the operation of the Facilities, as set forth in Schedule 2.1(g) (the “**Assigned Intellectual Property**”);

(h) Subject to Section 2.2(f), the rights of Seller to the use of the names of the Facilities set forth in Schedule 1;

(i) Those Environmental Attributes set forth in Schedule 2.1(i), excluding such Environmental Attributes or portions thereof disposed of by Seller in the ordinary course of business during the Interim Period and including such additional Environmental Attributes as may be acquired by Seller for use in the operation of the Facilities in the ordinary course of business during the Interim Period, in each case in accordance with Section 5.5; and

(j) All rights of Seller in and to any claims, causes of action, rights of recovery, rights of set-off, rights of refund and similar rights against a Third Party relating to any Assumed Liability, but excluding any such rights of Seller in, to or under any insurance policies of Seller or any insurance proceeds therefrom; *provided however*, if any such insurance proceeds relate to equipment or other tangible property to be transferred to Buyer and such equipment or tangible property is not repaired or otherwise restored to its condition as of the Effective Date on or prior to Closing, Seller will transfer such proceeds to Buyer at the Closing.

**Section 2.2 Excluded Assets.** Notwithstanding anything to the contrary in this Agreement, Buyer expressly understands and agrees that it is not purchasing or acquiring, and Seller is not selling, assigning or transferring, any properties, rights or assets of Seller other than the Acquired Assets, and all such other properties, rights and assets shall be excluded from the Acquired Assets (collectively, the “**Excluded Assets**”). The Excluded Assets to be retained by Seller include all of Seller’s right, title and interest in and to the following properties, rights and assets:

(a) As identified on Schedule 2.2(a) or in the Asset Demarcation Agreement, the real and personal property comprising or constituting any or all of the T&D Assets (whether or not regarded as a “transmission,” “distribution” or “generation” asset for regulatory or accounting purposes), including all electric power, communications and telecommunications underground and aboveground lines, switchyard facilities, substation facilities, support equipment and other Improvements, the Reserved Easements, and all Permits and Contracts, to the extent they relate to the T&D Assets, and those certain assets and facilities identified for use or used by Seller or others pursuant to an agreement or agreements with Seller for telecommunications purposes;

(b) The real property and Improvements thereon described in Schedule 2.2(b);

(c) Except for Prepayments, (i) all Cash, accounts receivable, notes receivable, checkbooks and canceled checks, bank accounts and deposits, commercial paper, certificates of deposit, securities, and property or income Tax receivables, other than the Merrimack Landfill Trust assets, and (ii) any other Tax refunds, credits, prepayments or other rights to payment related to the Acquired Assets to the extent allocable to a period ending prior to the Closing Date;

(d) All Contracts of Seller (other than the Assigned Contracts and Assigned Leases), *provided* that any excluded Contract of Seller used in connection with the Business that is not an Assigned Contract or an Assigned Lease is identified on Schedule 3.7(a);

(e) All Permits of Seller (other than the Transferable Permits), *provided* that any excluded Permit of Seller used in connection with the Business that is not a Transferable Permit is identified on Schedule 3.7(a);

(f) All Intellectual Property including all Seller Marks (other than the Assigned Intellectual Property), *provided* that any excluded Intellectual Property of Seller used in connection with the Business that is not included in the Assigned Intellectual Property is identified on Schedule 3.7(a);

(g) Duplicate copies of all Transferred Books and Records (to the extent and subject to the conditions set forth herein), and all other records of Seller other than the Transferred Books and Records, including corporate seals, organizational documents, minute books, stock books, Tax Returns, financial records, books of account and other corporate records of Seller, and all employee-related or employee benefit-related files or records other than the Transferred Employee Records;

(h) All insurance policies of Seller and insurance proceeds therefrom, subject to Section 2.1(j);

(i) All rights of Seller in and to any claims, causes of action, rights of recovery, rights of set-off, rights of refund and similar rights against a Third Party relating to any period through the Closing or otherwise relating to any Excluded Liability, but excluding any such rights of Seller to the extent relating to an Assumed Liability;

(j) All of Seller's rights arising from or associated with any Contract or arrangement representing an intercompany transaction, agreement or arrangement between Seller and an Affiliate of Seller, whether or not such transaction, agreement or arrangement relates to the provisions of goods or services, payment arrangements, intercompany charges or balances or the like, including, but not limited to, the Terminated Contracts ("**Intercompany Arrangements**"), other than those Assigned Contracts set forth on Schedule 2.2(j), *provided* that any excluded Intercompany Arrangement used in connection with the Business is identified on Schedule 3.7(a);

(k) All Employee Benefit Plans and trusts or other assets attributable thereto;

(l) Seller's Hydro Business; and

(m) The rights that accrue or will accrue to Seller under this Agreement and the Related Agreements.

**Section 2.3 Assumption of Assumed Liabilities.** On the terms and subject to the conditions set forth in this Agreement, from and after the Closing, Buyer shall assume and shall satisfy, perform or discharge when due all of the Liabilities of Seller in respect of, or otherwise arising from the ownership, operation or use of the Acquired Assets, other than the Excluded Liabilities (the "**Assumed Liabilities**"), including the following Liabilities:

(a) All Environmental Liabilities, other than the Excluded Environmental Liabilities until such Excluded Environmental Liabilities become Assumed Liabilities as provided in Section 2.4(i) and, for avoidance of doubt, it is the intention of the Parties that (i) Environmental Liabilities described in Section 2.4(i)(B)(II), Section 2.4(i)(C) and Section 2.4(i)(D) are not and would never become Assumed Liabilities and (ii) Environmental Liabilities resulting from Dig Activities are Assumed Liabilities;

(b) Except as set forth in Section 2.4(c), all Liabilities related to the performance or non-performance of contractual obligations or commitments to be performed or addressed, in each case first arising from and after the Closing Date under (i) the Assigned Contracts, the Assigned Leases, the Transferable Permits and the Assigned Intellectual Property, in each case in accordance with the terms thereof, except with respect to Taxes, which shall be assumed in accordance with Section 2.7, and (ii) the Contracts, commitments and Transferable Permits entered into by Seller with respect to the Acquired Assets during the Interim Period in accordance with Section 5.5;

(c) Except as set forth in Section 2.4(c), all Liabilities related to the performance or non-performance of contractual obligations or commitments to be performed or addressed, in each case first arising from and after the Closing Date under the Permitted Liens, other than under or with respect to the exercise of the Reserved Easements;

(d) All Liabilities first arising from and after the Closing Date (i) for any compensation, benefits, employment Taxes, workers compensation benefits and other similar Liabilities in respect of the Transferred Employees (including under the Generation CBA, any Employee Benefit Plan of Buyer, or any other agreement, plan, practice, policy, instrument or document relating to any of the Transferred Employees) created or owing as a consequence of employment by Buyer on or after the Closing Date, but not including any Liabilities arising out of the CBA MOA, (ii) relating to the Transferred Employees which Buyer has assumed or for which Buyer is otherwise responsible under Section 5.8, and (iii) in respect of any discrimination, wrongful discharge, unfair labor practice or similar Claim under applicable employment Laws by any Transferred Employee arising out of or relating to acts or omissions occurring on or after the Closing Date;

(e) All Liabilities for (i) Taxes (including, with respect to property Taxes, payments in addition to or in lieu of Taxes, but not including the Property Tax Stabilization Payments) relating to the ownership, operation, sale or use of the Facilities and the Acquired Assets, in each case first arising from and after the Closing Date, or the Assumed Liabilities and (ii) Taxes for which Buyer is liable pursuant to Section 2.7, Section 5.12 and Section 5.13; and

(f) All other Liabilities expressly allocated to Buyer in this Agreement or in any of the Related Agreements.

**Section 2.4 Excluded Liabilities.** Buyer shall not assume or be responsible for the performance of any of the following Liabilities (collectively, the “**Excluded Liabilities**”):

(a) Any Liability of Seller exclusively in respect of or otherwise arising from the operation or use of (x) the Excluded Assets or (y) except as expressly set forth in this Agreement, for the period prior to the Closing, the Acquired Assets;

(b) Any Liability of Seller arising from the making or performance of this Agreement or a Related Agreement or the transactions contemplated hereby or thereby;

(c) Any Liability of Seller under the Assigned Contracts or Assigned Leases (i) in respect of payment obligations for goods delivered or services rendered prior to the Closing Date, (ii) relating to a breach or default by Seller of any of its obligations thereunder occurring prior to the Closing Date whenever such breach is declared by the Counterparty thereto or (iii) relating to the CBA MOA;

(d) Except for those Assumed Liabilities set forth in Section 2.3(d), any Liability of Seller (i) for any compensation, benefits, employment Taxes, workers compensation benefits and other similar Liabilities (including under the Generation CBA, any Employee Benefit Plan of Seller, or any other agreement, plan, practice, policy, instrument or document relating to any of the Transferred Employees) created, arising or accruing before the Closing Date, whether or not subject to any continued service agreement, including pro rata payments earned before the Closing Date, in respect of the Transferred Employees, any temporary employees, and the Scheduled Employees who are not offered, or who do not accept, employment with the Buyer, (ii) relating to the Transferred Employees or temporary employees for which Seller is responsible under Section 5.8, (iii) relating to former employees, temporary employees or Scheduled Employees who are not offered, or who do not accept, employment with Buyer, or (iv) in respect of any workers’ compensation, tort, Hazardous Substance exposure, discrimination, wrongful discharge, unfair labor practice or other employee Claim under applicable Laws or under Seller’s Employee Benefits Plans by any Transferred Employee arising out of or relating to acts or omissions occurring prior to the Closing Date, by any former employee, by any temporary employee or by any Scheduled Employee who is not offered, or who does not accept, employment with Buyer;

(e) Any Liability of Seller arising from or associated with any Intercompany Arrangement, other than Liabilities under those Assigned Contracts set forth on Schedule 2.2(j);

(f) Any Liability of Seller for any fines or penalties imposed by a Governmental Authority resulting from (i) any investigation or proceeding pending prior to the Closing Date or (ii) illegal acts or willful misconduct of Seller prior to the Closing Date;

(g) Any Liability for Taxes (including, with respect to property Taxes, payments in addition to or in lieu of Taxes and the Property Tax Stabilization Payments) relating to the ownership, operation, sale or use of the Acquired Assets prior to the Closing, except those Taxes for which Buyer is liable pursuant to Section 2.7, Section 5.12 and Section 5.13.

(h) Any Liability of Seller pursuant to Section 5.20; and

(i) Subject to the provisions of Section 5.11, (A) any Environmental Liability caused, created or otherwise in existence due to the activities of or otherwise attributable to Seller prior to the Closing, except those Environmental Liabilities described in Section 2.4(i)(B)(II), Section 2.4(i)(C) and Section 2.4(i)(D) below, (B) any Environmental Liability arising out of or resulting from any Release of mercury at Schiller Station that occurred (I) prior to or on the Closing or (II) during the performance of the work

pursuant to the Removal Contract, which Release occurred after Closing but prior to the Schiller Boiler Removal Completion Date, (C) any Environmental Liability relating to the treatment, disposal, storage, discharge, Release, recycling or the arrangement for such activities at, or the transportation to, any Offsite Disposal Facility by Seller, prior to or on the Closing Date, of Hazardous Substances that were generated at the Sites, and (D) any Environmental Liability of Seller for any fines or penalties imposed by a Governmental Authority resulting from (I) any investigation or proceeding pending prior to the Closing Date or (II) illegal acts or willful misconduct of Seller prior to the Closing Date; *provided, however*, that the Liability of Seller pursuant to Section 2.4(i)(A) and, from and after the occurrence of the Schiller Boiler Removal Completion Date, Section 2.4(i)(B)(I) (and, together with such clauses, any associated indemnification obligations of Seller hereunder) shall terminate (x) on the applicable Excluded Environmental Liability Termination Date, after which any Liabilities described in Section 2.4(i)(A) and Section 2.4(i)(B)(I) shall be Assumed Liabilities for which Buyer is liable pursuant to Section 2.3(a), and Seller shall have no further Liability with respect thereto, or (y) upon exceeding the indemnification cap set forth in Section 7.4(a)(ii), if earlier than the applicable Excluded Environmental Liability Termination Date, any Liabilities described in Section 2.4(i)(A) and Section 2.4(i)(B)(I) shall be Assumed Liabilities for which Buyer is liable pursuant to Section 2.3(a), and Seller shall have no further Liability with respect thereto.

The Excluded Liabilities described in Section 2.4(d) (solely as it relates to employee exposure to Hazardous Substances), Section 2.4(h) and Section 2.4(i), as limited by the terms thereof, are referred to herein as the “**Excluded Environmental Liabilities**.” For avoidance of doubt, it is the intention of the Parties that Section 2.4(d) (solely as it relates to employee exposure to Hazardous Substances), Section 2.4(h) and Section 2.4(i) shall exclusively define those Environmental Liabilities constituting Excluded Liabilities hereunder, and that no other provision of this Section 2.4 shall be construed to include any Environmental Liabilities.

**Section 2.5 Purchase Price.** In consideration for Seller’s sale, assignment and transfer of the Acquired Assets to Buyer, at the Closing, Buyer shall (i) pay to Seller an aggregate amount equal to One Hundred Seventy-Five Million Dollars (\$175,000,000) (the “**Base Purchase Price**”) plus or minus amounts to account for (a) the Estimated Purchase Price Adjustment to be made as of the Closing under Section 2.6(a) and Section 2.6(b), and (b) the prorations to be made as of the Closing under Section 2.7 (the Base Purchase Price, as so adjusted, shall be referred to herein as the “**Closing Purchase Price**”), and (ii) assume the Assumed Liabilities. The Closing Purchase Price shall be payable in cash by wire transfer to Seller in accordance with written instructions of Seller given to Buyer at least three (3) Business Days prior to the Closing. Following the Closing, the Closing Purchase Price shall be subject to adjustment pursuant to Section 2.6(c) and Section 2.7(b), and the Closing Purchase Price, as so adjusted pursuant to such Sections, shall be herein referred to as the “**Purchase Price**.”

**Section 2.6 Certain Adjustments to Base Purchase Price.** At the Closing, the Base Purchase Price shall be adjusted as set forth in Section 2.6(a) and Section 2.6(b), and the Closing Purchase Price shall be subject to adjustment following the Closing as set forth in Section 2.6(c).

(a) Determination of Adjustment. The Base Purchase Price shall be increased or decreased to account for the following items:

(i) Increased or decreased, as the case may be, by an amount equal to the working capital adjustment, which adjustment will be calculated in accordance with Schedule 2.6(a)(i);

(ii) Increased by any non-ordinary course operations and maintenance expenses incurred and paid for by Seller during the Interim Period that Seller is not otherwise obligated to perform and incur under this Agreement and that Seller would not have actually incurred and paid for but for Buyer’s written request;

(iii) If prior to Closing, any event occurs which has or may have the effect of increasing or decreasing the Qualified Capacity of any Facility during the Interim Period or following Closing, then the following provisions shall apply:

(A) (1) If Seller receives notice from ISO-NE that has or may have the effect of reducing the Qualified Capacity of any Facility individually or any number of Facilities such that in the aggregate the Qualified Capacity of all Facilities is less than the ISO-Recognized Capacity of all of the Facilities (a “**Qualified Capacity Reduction**”) and such Qualified Capacity Reduction (i) results in an aggregate decrease in Qualified Capacity that is equal to or greater than 20 megawatts but is less than 100 megawatts with respect to all Facilities, or (ii) is greater than zero with respect to Lost Nation, then in each case the Base Purchase Price shall be reduced by an amount equal to the product of the aggregate Qualified Capacity Reduction (in megawatts) and (x) Three Hundred Twenty-Five Thousand Dollars (\$325,000) per megawatt for Qualified Capacity Reduction relating to Newington Station as identified on Schedule 1 or (y) Two Hundred Fifty Thousand Dollars (\$250,000) per megawatt for Qualified Capacity Reduction relating to each other Facility. (2) To the extent Seller receives notice of a Qualified Capacity Reduction and such Qualified Capacity Reduction, together with any other Qualified Capacity Reduction with respect to any Facility, results in an aggregate decrease in Qualified Capacity that is equal to or greater than 100 megawatts, then Buyer in its sole discretion may elect to terminate this Agreement pursuant to Section 8.1(f) of this Agreement.

(B) If Seller receives notice from ISO-NE prior to the Closing Date that has or may have the effect of a Qualified Capacity Reduction for any Facility and (i) Seller pursues a formal dispute or correction of the event that would result in such Qualified Capacity Reduction and resolution is not achieved prior to Closing or (ii) Seller does not pursue a resolution of the event which gave rise to such notice (in which case, as soon as practicable, the Buyer shall pursue in good faith and with commercially reasonable efforts and in cooperation with Seller a remediation plan or other similar efforts to avoid such Qualified Capacity Reduction) and resolution is not achieved prior to Closing (a “**Potential Qualified Capacity Reduction**”), then the amount by which the Base Purchase Price would be reduced using the formula in Section 2.6(a)(iii)(A)(1) shall be paid by Buyer into an escrow account subject to an escrow agreement mutually acceptable to the Parties (the “**Escrow Agreement**”) and the amount placed in the escrow account under the Escrow Agreement shall be released to (x) Seller, to the extent there is no Qualified Capacity Reduction and (y) Buyer, to the extent there is a Qualified Capacity Reduction.

(C) To the extent Seller receives notice from ISO-NE that has or may have the effect of increasing the Qualified Capacity of any Facility such that it is greater than the ISO-Recognized Capacity (a “**Qualified Capacity Increase**”) and such Qualified Capacity Increase, together with any other Qualified Capacity Increases with respect to any Facility, results in an aggregate increase of Qualified Capacity equal to or greater than 20 megawatts but is less than 100 megawatts, then the Base Purchase Price shall be increased by an amount equal to the product of the aggregate Qualified Capacity Increase (in megawatts) and (i) Three Hundred Twenty-Five Thousand Dollars (\$325,000) per megawatt for Qualified Capacity Increase relating to Newington Station as identified on Schedule 1 or (ii) Two Hundred Fifty Thousand Dollars (\$250,000) per megawatt for Qualified Capacity Increase relating to each other Facility.

(iv) Decreased by the delayed closing adjustment, calculated in accordance with Schedule 2.6(a)(iv), if any.

(b) Estimated Purchase Price Adjustment. At least five (5) Business Days prior to the Closing Date, Seller shall prepare and deliver to Buyer a statement (the “**Estimated Closing Statement**”) setting forth in reasonable detail Seller’s good faith estimate of the net amount of all adjustments to the Base Purchase Price required by Section 2.6(a) (the “**Estimated Purchase Price Adjustment**”), together with reasonable supporting material regarding the computation thereof. In calculating the Closing Purchase Price pursuant to Section 2.5, the Base Purchase Price will be increased to reflect the Estimated Proration Adjustment Amount.

(c) Post-Closing Adjustment.

(i) Within sixty (60) days following the Closing Date, Seller shall prepare and deliver to Buyer a statement (the “**Closing Statement**”) that shall set forth in reasonable detail Seller’s calculation of the net amount of all adjustments to the Base Purchase Price required by Section 2.6(a) taking into account actual data (the “**Purchase Price Adjustment**”), together with reasonable supporting material regarding the computation thereof. Buyer shall have thirty (30) days to review the Closing Statement following receipt thereof. On or before the end of such 30-day review period, Buyer may object to the Closing Statement by written notice to Seller (the “**Objection Notice**”), setting forth Buyer’s specific objections to the calculation of the Purchase Price Adjustment. Such Objection Notice shall specify those items or amounts with which Buyer disagrees, together with a detailed written explanation of the reasons for disagreement with each such item or amount (and reasonable supporting material therefor), and shall set forth Buyer’s calculation of the Purchase Price Adjustment based on such objections. To the extent not set forth in a timely-delivered Objection Notice, Buyer shall be deemed to have agreed with Seller’s calculation of all other items and amounts contained in the Closing Statement and neither party may thereafter dispute any item or amount not set forth in such Objection Notice. If Buyer does not timely deliver any Objection Notice, Buyer shall be deemed to have agreed with and accepted Seller’s calculation of the Purchase Price Adjustment, and the Closing Statement shall be final and binding on the Parties as of the end of Buyer’s 30-day review period.

(ii) If Buyer timely delivers an Objection Notice to Seller, Buyer and Seller shall, during the thirty (30) day period following such delivery (or any mutually agreed extension thereof), use their commercially reasonable efforts to negotiate and reach agreement on the disputed items and amounts in order to determine the amount of the Purchase Price Adjustment. If, at the end of such period (or any mutually agreed extension thereof), the Parties are unable to resolve their disagreements, they shall jointly retain and refer their disagreements to the Independent Accountant. The Parties shall instruct the Independent Accountant to promptly review this Section 2.6 and to determine solely with respect to the disputed items and amounts so submitted whether and to what extent, if any, the Purchase Price Adjustment set forth in the Closing Statement requires adjustment. The Independent Accountant shall base its determination solely on written submissions by the Parties. As promptly as practicable, but in no event later than thirty (30) days after its retention, the Independent Accountant shall deliver to Buyer and Seller a report which sets forth its resolution of the disputed items and amounts and its calculation of the Purchase Price Adjustment; *provided* that the Independent Accountant may not assign a value to any item greater than the greatest value for such item claimed by either Party or less than the smallest value for such item claimed by either Party. The decision of the Independent Accountant shall be final and binding on the Parties. The costs and expenses of the Independent Accountant shall

be allocated between the Parties based upon the percentage which the portion of the contested amount not awarded to each party bears to the amount actually contested by such party, as determined by the Independent Accountant. The Parties agree to execute, if requested by the Independent Accountant, a reasonable engagement letter, including customary indemnities in favor of the Independent Accountant. The Parties shall cooperate and shall furnish each other and, if applicable, the Independent Accountant, with such documents and other records that may be reasonably requested in connection with the preparation, review and final determination of the Closing Statement and Purchase Price Adjustment and the other matters addressed in this Section 2.6.

(iii) For purposes of this Section 2.6(c), “**Final Purchase Price Adjustment**” means the Purchase Price Adjustment:

(A) As shown in the Closing Statement delivered by Seller to Buyer pursuant to Section 2.6(c)(i), if no Objection Notice with respect thereto is timely delivered by Buyer to Seller pursuant to Section 2.6(c)(i); or

(B) If an Objection Notice is so delivered, (x) as agreed by the Parties pursuant to Section 2.6(c)(ii) or (y) in the absence of such agreement, as shown in the Independent Accountant’s report delivered pursuant to Section 2.6(c)(ii).

(iv) Within three (3) Business Days after the Final Purchase Price Adjustment has been finally determined pursuant to this Section 2.6(c):

(A) If the Final Purchase Price Adjustment is less than the Estimated Purchase Price Adjustment, Seller shall pay to Buyer an amount equal to (x) the Estimated Purchase Price Adjustment minus (y) the Final Purchase Price Adjustment; and

(B) If the Final Purchase Price Adjustment is greater than the Estimated Purchase Price Adjustment, Buyer shall pay to Seller an amount equal to (x) the Final Purchase Price Adjustment minus (y) the Estimated Purchase Price Adjustment.

Any payment required to be made by a Party pursuant to this Section 2.6(c)(iv) shall be made to the other Party by wire transfer of immediately available funds to the account designated in writing by such other Party.

## **Section 2.7 Proration.**

(a) Buyer and Seller agree that all of the items (including any Prepayments with respect to such items) normally prorated in a sale of assets of the type contemplated by this Agreement, including those listed below, relating to the ownership and operation of the Acquired Assets (collectively, the “**Prorated Items**”), shall be prorated on a daily basis as of the Closing Date in accordance with this Section 2.7, with Seller liable to the extent such items relate to any period prior to the Closing Date, and Buyer liable to the extent such items relate to periods on and after the Closing Date:

(i) Personal property, real property, occupancy and water Taxes, assessments and other charges, if any, on or associated with the Acquired Assets;

(ii) Rent, Taxes and other items payable by or to Seller under any of the Assigned Contracts or Assigned Leases;

(iii) Any Permit, license, registration or other fees with respect to any Transferable Permit associated with the Acquired Assets;

(iv) Sewer rents and charges for water, telephone, electricity and other utilities; and

(v) Revenues associated with the Environmental Attributes set forth in Schedule 2.1(i).

(b) At least five (5) Business Days prior to the Closing Date, Seller will deliver to Buyer a worksheet setting forth in reasonable detail (i) Seller’s good faith reasonable estimate of the Prorated Amount for each Prorated Item (with respect to each Prorated Item, the “**Estimated Prorated Amount**”), together with reasonable supporting material regarding such estimate, and (ii) the calculation of the net amount of the Estimated Prorated Amounts (the “**Estimated Proration Adjustment Amount**”). In the event that, with respect to any Prorated Item, actual figures are not available as of the time of the calculation of the Estimated Prorated Amount, the Estimated Prorated Amount for such Prorated Item shall be a good faith reasonable estimate based upon the actual fee, cost or amount of the Prorated Item for the most recent preceding year (or appropriate period) for which an actual fee, cost or amount paid is available. In calculating the Closing Purchase Price pursuant to Section 2.5, the Base Purchase Price will be adjusted

appropriately to reflect the Estimated Proration Adjustment Amount.

(c) When the actual Prorated Amount with respect to any Prorated Item (the “**Actual Prorated Amount**”) becomes available to either Party, it shall promptly (and in any event within ninety (90) days following Closing) notify the other Party of such Prorated Item and Actual Prorated Amount, together with reasonable detail and supporting material regarding the computation thereof. For any Prorated Item with respect to which the Estimated Prorated Amount is not equal to the Actual Prorated Amount, upon the request of either Seller or Buyer, made within thirty (30) days of the date when such Actual Prorated Amount became available to such Party (or such Party received notice of such Actual Prorated Amount from the other Party, as applicable), the Parties shall agree on an adjustment to account for the difference between the Estimated Prorated Amount and the Actual Prorated Amount for such Prorated Item. All disputes between Seller and Buyer respecting any such requested adjustments that are not resolved by mutual agreement within sixty (60) days following the end of the foregoing ninety (90) day notice period shall be referred by the Parties to the Independent Accountant, who shall resolve such disputes and determine such final adjustment substantially in accordance with the procedures set forth in Section 2.6(c)(ii), applied *mutatis mutandis*. Any adjustment payment to be made by Buyer or Seller, as applicable, to the other Party pursuant to this Section 2.7(c) shall be paid within ten (10) days following the Parties’ agreement (or the Independent Accountant’s determination) with respect thereto by wire transfer of immediately available funds to the account designated in writing by such other Party. The Parties agree to cooperate and furnish each other with such documents and other records that may be reasonably requested in order to confirm all adjustment and proration calculations made pursuant to this Section 2.7.

### **Section 2.8 Allocation of Purchase Price.**

(a) Buyer and Seller shall use their good faith commercially reasonable efforts to agree upon an allocation among the Acquired Assets of the sum of the Purchase Price and the Assumed Liabilities consistent with Section 1060 of the Code and the Treasury Regulations thereunder prior to or within a reasonable time after the Closing Date (or any mutually agreed extension thereof). Each of Buyer and Seller agrees to file Internal Revenue Service Form 8594 and all federal, state, local and foreign Tax Returns, and to report the transactions contemplated by this Agreement and the Related Agreements for federal income Tax and all other Tax purposes, in a manner consistent with the allocation determined pursuant to this Section 2.8 (as revised to take into account subsequent adjustments to the Purchase Price, including adjustments to the Purchase Price pursuant to Section 2.6 and Section 2.7 and any indemnification payment treated as an adjustment to the Purchase Price pursuant to Section 7.6, as mutually agreed upon by the Parties and in accordance with the provisions of the Code and the Treasury Regulations thereunder). Notwithstanding the foregoing, in the event Buyer and Seller cannot agree as to the allocation, each party shall be entitled to take its own position in any Tax Return, Tax proceeding or audit, provided that such position is reasonable and consistent with the general principles of Section 1060 of the Code and the Treasury Regulations thereunder. Each of Buyer and Seller agrees to provide the other promptly with any other information required to complete Form 8594. Each of Buyer and Seller shall notify and provide the other with reasonable assistance in the event of an examination, audit or other proceeding regarding the agreed upon allocation of the Purchase Price.

(b) In compliance with the Settlement Agreement’s requirement to fairly allocate among individual assets the sale price of any assets that are sold as a group, the Parties acknowledge and agree that the portion of the Purchase Price allocable to each Facility is as set forth on Schedule 2.8(b).

**Section 2.9 Closing.** Subject to the terms and conditions of this Agreement, the closing of the transactions contemplated by this Agreement (the “**Closing**”) shall take place at the offices of Seller, 780 N. Commercial Street, Manchester, New Hampshire 03105-0330, beginning at 10:00 a.m. local time, on the third (3<sup>rd</sup>) Business Day following the date on which all of the conditions set forth in Article VI have either been satisfied or expressly waived by the Party for whose benefit such condition exists (other than conditions which, by their nature, are to be satisfied at Closing, but subject to the satisfaction or waiver of those conditions), or at such other time, date or place as the Parties may mutually agree. The date of Closing is hereinafter called the “**Closing Date**.” The Closing shall be effective for all purposes herein as of 12:01 a.m. Eastern time on the Closing Date.

**Section 2.10 Deliveries by Seller at Closing.** At Closing, Seller shall deliver the following to Buyer, duly executed and properly acknowledged, if appropriate:

(a) With respect to each parcel of Real Property, a deed conveying such parcel to Buyer, substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) and otherwise in a form suitable for recording (each, a “**Deed**”);

(b) With respect to each Assigned Lease, an assignment and assumption of lease, substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) and otherwise in a form suitable for recording, if necessary (each, an “**Assignment and Assumption of Lease**”);

(c) A bill of sale transferring the tangible personal property included in the Acquired Assets to Buyer, substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Bill of Sale**”);

(d) An assignment and assumption agreement pursuant to which Seller shall assign certain rights, liabilities and obligations to Buyer and Buyer shall assume the Assumed Liabilities, substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Assignment and Assumption Agreement**”);

(e) An agreement between the Parties evidencing their agreement as to the demarcation of ownership with respect to certain assets not situated wholly on real property owned, or to be owned, by either Seller or Buyer, as applicable, substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Asset Demarcation Agreement**”);

(f) With respect to each Facility, an agreement between the Parties respecting the interconnection of such Facility with Seller’s transmission system, substantially in the applicable forms agreed to by Seller and Buyer in accordance with Section 5.2(f) (together, the “**Interconnection Agreements**”);

(g) The Escrow Agreement, if applicable;

(h) All documents necessary to release or discharge all Liens affecting the Acquired Assets, except for Permitted Liens, in form and substance reasonably satisfactory to Buyer, including the document or documents necessary to discharge the Lien imposed by the Mortgage Indenture, which discharge will be substantially in the form agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Release of Mortgage Indenture**”);

(i) The Easements;

(j) If requested by Buyer, the Transition Services Agreement;

(k) Certificates of title for the vehicles and boats which are part of the Acquired Assets;

(l) Copies of all Seller Required Consents;

(m) Seller’s Transfer Tax Declarations of Consideration required under New Hampshire RSA 78-B:10 and New Hampshire Department of Revenue Administration rules (Forms CD-57-S), together with Seller’s share of applicable real estate transfer taxes;

(n) Affidavits and indemnities typically delivered in commercial real estate transactions sufficient for purposes of issuing the Title Policies without the standard title insurance policy exceptions regarding mechanic’s liens, if available, parties in possession, real estate taxes not yet due and payable and broker liens for brokers engaged by or on behalf of Seller;

(o) A certification of non-foreign status, pursuant to Treasury Regulations Section 1.1445-2(b)(2), with respect to Seller;

(p) The officer’s certificate of Seller required by Section 6.1(d);

(q) A certificate of existence and good standing with respect to Seller, as of a recent date, issued by the secretary of state or other appropriate Governmental Authority of the jurisdiction of Seller’s organization, and certificates of good standing and qualification or authorization to do business (or the equivalent certificates) with respect to Seller, each as of a recent date, issued by the secretary of state or similar Governmental Authority in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary;

(r) A copy, certified by the Secretary or an Assistant Secretary of Seller, of corporate resolutions authorizing the execution and delivery of this Agreement and the Related Agreements and the consummation of the transactions contemplated hereby and thereby;

(s) A certificate of the Secretary or an Assistant Secretary of Seller which shall identify by name and title and bear the signature of the officers of Seller authorized to execute and deliver this Agreement and the Related Agreements; and

(t) All such other instruments or documents as Buyer and its counsel may reasonably request in order to give effect to the transfer of the Acquired Assets as contemplated hereby or to otherwise facilitate the transactions contemplated by this Agreement and the Related Agreements; *provided, however*, that this Section 2.10(t) shall not require Seller to prepare or obtain any surveys relating to the Real Property or Leased Real Property other than those previously provided to Buyer.

**Section 2.11 Deliveries by Buyer at Closing.** At Closing, Buyer shall deliver to Seller, duly executed and properly acknowledged, if appropriate:

- (a) The Closing Purchase Price in accordance with Section 2.5;
- (b) The Assignment and Assumption of Lease respecting each Assigned Lease;
- (c) The Bill of Sale;
- (d) The Assignment and Assumption Agreement;
- (e) The Asset Demarcation Agreement;
- (f) The Interconnection Agreements;
- (g) The Escrow Agreement, if applicable;
- (h) The Easements;
- (i) If requested by Buyer, the Transition Services Agreement;
- (j) Copies of all Buyer Required Consents;
- (k) Evidence of Buyer's membership in NEPOOL or other evidence that Buyer has sufficient authority to sell the Facilities' electrical output into the wholesale market;
- (l) Buyer's Transfer Tax Declarations of Consideration required under New Hampshire RSA 78-B:10 and New Hampshire Department of Revenue Administration rules (Forms CD-57-P) and Inventory of Property Transfer Forms (Forms PA-34), together with Buyer's share of any taxes and other fees due thereunder;
- (m) All applicable exemption certificates with respect to Taxes that would otherwise be imposed with respect to the transactions contemplated by this Agreement;
- (n) The officer's certificate of Buyer required by Section 6.2(c);
- (o) A certificate of existence and good standing with respect to Buyer, as of a recent date, issued by the secretary of state or other appropriate Governmental Authority of the jurisdiction of Buyer's organization, and certificates of good standing and qualification or authorization to do business (or the equivalent certificates) with respect to Buyer, each as of a recent date, issued by the secretary of state or similar Governmental Authority in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary;
- (p) A copy, certified by the Secretary or an Assistant Secretary of Buyer, of limited liability company resolutions authorizing the execution and delivery of this Agreement and the Related Agreements and the consummation of the transactions contemplated hereby and thereby;
- (q) A certificate of the Secretary or an Assistant Secretary of Buyer which shall identify by name and title and bear the signature of the officers of Seller authorized to execute and deliver this Agreement and the Related Agreements; and
- (r) All such other instruments or documents as Seller and its counsel may reasonably request in order to give effect to the transfer of the Acquired Assets or the assumption of the Assumed Liabilities as contemplated hereby or to otherwise facilitate the transactions contemplated by this Agreement and the Related Agreements.

**Section 2.12 Guaranties.** The executed Guaranties will be delivered to Seller simultaneously with the execution of this Agreement.

### **ARTICLE III REPRESENTATIONS AND WARRANTIES OF SELLER**

Seller represents and warrants to Buyer that the statements contained in this Article III are true and correct as of the Effective Date, except as set forth in the Schedules.

**Section 3.1 Organization and Existence.** Seller is a corporation duly organized, validly existing and in good standing under the Laws of the State of New Hampshire. Seller is duly qualified or authorized to do business in each other jurisdiction in which the ownership or operation of the Acquired Assets make such qualification or authorization necessary, except in those jurisdictions where

the failure to be so duly qualified or authorized would not have a Material Adverse Effect. Schedule 3.1 lists each jurisdiction in which Seller is qualified to do business in connection with the Business.

**Section 3.2 Authority and Enforceability.** Seller has the corporate power and authority to execute and deliver this Agreement and the Related Agreements to which it is a party and, subject to receipt of the Seller Required Consents, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. All corporate actions or proceedings to be taken by or on the part of Seller to authorize and permit the due execution and valid delivery by Seller of this Agreement and the Related Agreements to which it is a party, the performance by Seller of its obligations hereunder and thereunder, and the consummation by Seller of the transactions contemplated hereby and thereby have been duly and properly taken. This Agreement has been duly executed and delivered by Seller and, assuming the due authorization, execution and delivery by Buyer and receipt of the Seller Required Consents, constitutes the valid and legally binding obligation of Seller, enforceable against Seller in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law. When each Related Agreement to which Seller is a party has been duly executed and delivered by Seller, assuming the due authorization, execution and delivery by each other party thereto and receipt of the Seller Required Consents, such Related Agreement will constitute the valid and legally binding obligation of Seller, enforceable against Seller in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law.

**Section 3.3 No Conflicts; Consents and Approvals.** Assuming all of the Consents of the Governmental Authorities and other Persons set forth on Schedule 3.3 (the "**Seller Required Consents**") have been obtained, and assuming the truth and accuracy of Buyer's representations and warranties set forth herein, the execution and delivery by Seller of this Agreement and the Related Agreements to which it is or will be a party do not and will not, the performance by Seller of its obligations hereunder and thereunder will not, and the consummation of the transactions contemplated hereby and thereby will not:

(a) conflict with or result in a violation or breach of any of the terms, conditions or provisions of the Organizational Documents of Seller;

(b) (i) conflict with, result in a breach of, constitute a default under, result in the acceleration of, or create in any Person the right to accelerate, terminate, modify, revoke, suspend or cancel (with or without giving of notice, the lapse of time or both), any Material Contract to which Seller is bound or to which any of the Acquired Assets is subject, (ii) conflict with or result in a violation or breach of any Law or material Permit to which Seller or any of the Acquired Assets is subject, or (iii) require the Consent of any Governmental Authority under any applicable Law; or

(c) result in the imposition or creation of any Lien on any Acquired Asset, other than any Permitted Lien.

**Section 3.4 Legal Proceedings.** Except as set forth on Schedule 3.4, there is no Claim pending or, to Seller's Knowledge, threatened against Seller (a) that, if adversely determined against Seller would, individually or in the aggregate, reasonably be expected to materially and adversely affect Seller, the Business or the Acquired Assets, or (b) that, as of the Closing Date, seeks an Order restraining, enjoining or otherwise prohibiting or making illegal any of the transactions contemplated hereby. Except as set forth on Schedule 3.4, neither Seller nor any of the Acquired Assets are bound by any Order (other than any Order of general applicability) that would, individually or in the aggregate, reasonably be expected to materially and adversely affect Seller, the Business or the Acquired Assets. As of the Closing Date, Seller is not subject to any Order that prohibits the consummation of the transactions contemplated by this Agreement. Seller has not received from any Person a Claim in writing that Seller or any of its Affiliates' use of the Assigned Intellectual Property infringes on the Intellectual Property of such Person nor, to Seller's Knowledge, has any such Claim been threatened. None of the representations and warranties set forth in this Section 3.4 shall be deemed to relate to (i) Tax matters, which are addressed in Section 3.10, (ii) environmental matters, which are addressed in Section 3.11, (iii) employment and labor matters, which are addressed in Section 3.12, or (iv) employee benefits matters, which are addressed in Section 3.13.

**Section 3.5 Compliance with Laws; Permits.**

(a) Except as set forth on Schedule 3.5(a), Seller is (and has been for the last two years with respect to FERC and NERC Laws only), and the Business and the Acquired Assets are owned, operated and maintained, in compliance in all material respects with all Laws applicable to it, the Business and the Acquired Assets and in the last two years, Seller has not received written notice or, to Seller's Knowledge, any threat from ISO-NE, NERC or any Governmental Authority alleging any material non-compliance with Laws or orders applicable to it.

(b) Schedule 3.5(b) lists all Permits (other than Environmental Permits) that are material to the ownership and operation of the Acquired Assets, and identifies those material Permits that are Transferable Permits. The Permits listed in Schedule

3.5(b) are in full force and effect, except to the extent that the failure of such Permits to be in full force and effect would not, individually or in the aggregate, reasonably be expected to have a material and adverse effect on the operation or ownership of each Facility individually or in the aggregate. Seller is in compliance in all material respects with the terms and conditions of all Permits listed in Schedule 3.5(b).

(c) None of the representations and warranties set forth in this Section 3.5 shall be deemed to relate to (i) Tax matters, which are addressed in Section 3.10, (ii) environmental matters, which are addressed in Section 3.11, (iii) employment and labor matters, which are addressed in Section 3.12, or (iv) employee benefits matters, which are addressed in Section 3.13.

**Section 3.6 Title to Acquired Assets.** Except for the Mortgage Indenture (which will which will be discharged at or prior to Closing), the Assigned Leases and the Permitted Liens, Seller has (x) title to each Site, to the extent, and only to the extent, specified in the title policy commitments referred to on Schedule 3.6 (the “**Title Commitments**”); (y) good and marketable title to, and valid leases, licenses or other rights to use, as applicable, all tangible personal property free and clear of any Liens and (z) the necessary ownership rights, valid leases and licenses or other rights, as applicable, to all other Acquired Assets (excluding tangible personal property) free and clear of any Liens, in each case that are material to the conduct of the Business and the ownership, use, operation, maintenance, repair and replacement of any of the Acquired Assets.

### **Section 3.7 Assets Used in Operation of the Facilities.**

(a) Except as set forth in Schedule 3.7(a), (i) the Acquired Assets constitute all of the material assets necessary for use in connection with the operation of the Business as (x) currently operated by Seller, (y) otherwise required for Seller to comply with all Transferrable Permits and Material Contracts, and (z) required by applicable Law; and (ii) all Acquired Assets that constitute tangible personal property are currently located at (or are in transit to) the Facilities and no such Acquired Assets intended for the Facilities are being held by Third Parties.

(b) Except as set forth on Schedule 3.7(b-1), (i) the Interconnection Agreements and the Acquired Assets constitute all of the assets necessary for Buyer to connect each Facility to the grid operated by ISO-NE through the T&D Assets; (ii) the portion of the Acquired Assets that is necessary or desirable for use in connection with each Interconnection Agreement meets and satisfies Seller’s specifications and requirements for T&D Operations and no transmission upgrades are required; and (iii) upon execution, the Interconnection Agreements will be sufficient to ensure each Facility has access to a Pool Transmission Facility (as defined in the ISO-NE Tariff) administered by ISO-NE without the need for any modifications to the transmission system and without incurring any local network service charges for transmission. Notwithstanding anything to the contrary in the existing interconnection agreements for Merrimack and Schiller or the proposed interconnection agreements for Newington, White Lake and Lost Nation, to Seller’s Knowledge, no further studies or analyses are required under or pursuant to such interconnection agreements. Schedule 3.7(b-2) sets forth Seller’s expectations with respect to certain equipment and services used in the operation of the Facilities.

(c) To Seller’s Knowledge, the only Acquired Assets requiring or containing any material credit support obligations by Seller or its Affiliates in connection with the Business for the benefit of any Third Party, including ISO-NE, are the Merrimack Landfill Trust, NHDES Groundwater Management Permits GWP-100112013-004, GWP-198400065-B-006, GWP-198404088-P-002, GWP-199112013-N-003, Standard Large Generator Interconnection Agreement, dated May 31, 2010, by and between ISO-NE and Seller, Master Delivered Petroleum Products Sales Agreement, dated August 4, 2015, between Sprague Operating Resources LLC and Seller, Base Contract for Sale and Purchase of Natural Gas, dated November 1, 2011, between Emera Energy Services, Inc. and Seller, Distillate Fuel Oil Agreement, dated February 7, 2017, between C.N. Brown Company and Seller, REC Purchase Agreement, dated as of January 30 2014, between Seller and United Illuminating Co., and REC Purchase Agreement, dated as of January 20, 2014, between Seller and Connecticut Light and Power Co.

### **Section 3.8 Material Contracts.**

(a) The Material Contracts set forth on Schedule 2.1(e) include the Contracts meeting the following criteria to which Seller is a party and used in connection with the operation of the Business or by which any of the Acquired Assets may be bound:

- (i) Contracts for the future purchase, exchange or sale of fuel oil or other fuel for a Facility;
- (ii) Contracts for the future purchase, exchange or sale of electric power or ancillary services;
- (iii) Contracts for the future transportation of fuel oil or other fuel for a Facility;
- (iv) Contracts for the future transmission of electric power;
- (v) interconnection Contracts, including the Interconnection Agreements;

(vi) Contracts for the future purchase, exchange, transmission or sale of electric power in any form, including energy, capacity, Environmental Attributes or any ancillary services;

(vii) other than Contracts of the nature addressed by Section 3.8(a)(i) to Section 3.8(a)(ii), Contracts (A) for the purchase or sale of any Acquired Asset (by merger or otherwise) or that grant a right or option to purchase or sell any Acquired Asset (including by merger or otherwise), other than in each case Contracts relating to the Acquired Assets or services with a nominal value of less than Two Hundred Fifty Thousand Dollars (\$250,000) individually or One Million Dollars (\$1,000,000) in the aggregate and (B) for the provision or receipt of any services or that grant a right or option to provide or receive any services, other than in each case Contracts relating to services with a nominal value of less than Two Hundred Fifty Thousand Dollars (\$250,000) individually or One Million Dollars (\$1,000,000) in the aggregate;

(viii) Contracts under which (A) Seller has imposed a security interest on any of the Acquired Assets, tangible or intangible (excluding the Mortgage Indenture) and (B) any credit support has been issued in favor Seller relating to any of the Acquired Assets or the operation of the Business, including, without limitation, letters of credit or any guaranties;

(ix) Contracts of guaranty, indemnity, surety or similar obligation, direct or indirect, by Seller that affect, are related to, or otherwise encumber or may be reasonably expected to encumber any of the Acquired Assets, other than Contracts entered into in the ordinary course of business that include standard indemnity provisions;

(x) collective bargaining Contracts and employment Contracts;

(xi) outstanding futures, swap, collar, put, call, floor, cap, option or other Contracts that are intended to benefit from or reduce or eliminate the risk of fluctuations in interest rates or the price of commodities, including electric power, in any form, including energy, capacity or any ancillary services, natural gas, oil or securities;

(xii) partnership, joint venture, licensing arrangement (other than in respect of Intellectual Property) or limited liability company agreements or Contracts for sharing profits;

(xiii) real property leases and any ground leases relating to, or affecting, any of the Acquired Assets and property tax agreements;

(xiv) Contracts that purport to limit Seller's freedom to compete in any line of business or in any geographic area;

(xv) any Contract between Seller, on the one hand, and any Affiliate of Seller, or any current officer, director or manager of Seller or any Affiliate, on the other hand, in each case related to the Business or any of the Acquired Assets, all of which shall be terminated or modified to exclude the Acquired Assets as of the Closing Date (but excluding the Assigned Intercompany Agreements); and

(xvi) any Contract entered into with a Governmental Authority.

(b) Except as described on Schedule 3.8(b), Seller has provided Buyer with accurate and complete copies of all Material Contracts, including all amendments, modifications and waivers related thereto.

(c) Except as described in Schedule 3.8(c), and assuming all Seller Required Consents required in connection with each Material Contract are obtained prior to Closing, (i) each Material Contract (except to the extent such Material Contract terminates or expires after the Effective Date in accordance with its terms) is in full force and effect and is a valid and binding obligation of Seller and, to Seller's Knowledge, of the other parties thereto, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether considered in a proceeding in equity or at law, (ii) neither Seller nor, to Seller's Knowledge, any other party thereto, is in violation of or default under any Material Contract, (iii) each Material Contract may be assigned to Buyer pursuant to this Agreement without breaching the terms thereof or resulting in the forfeiture or impairment of any material rights thereunder, and (iv) Seller has not received written notice from nor, to Seller's Knowledge, any threat that, any other party to a Material Contract intends to terminate a Material Contract.

**Section 3.9 Insurance.** The Acquired Assets are insured to the extent specified under the material insurance policies listed on Schedule 3.9. No written notice of cancellation or termination has been received by Seller with respect to any such policy that has not been replaced on substantially similar terms prior to the date of such cancellation or termination. Schedule 3.9 sets forth a list of all pending claims that have been made under any such policy with respect to the Acquired Assets. Except as described in Schedule 3.9, Seller has not been refused any material insurance with respect to the Acquired Assets, nor has coverage with respect to the Acquired Assets been limited in any material respect by any insurance carrier to which Seller has applied for any such insurance or with which it has carried insurance, in each case, during the preceding twelve (12) month period.

**Section 3.10 Taxes.** Seller has filed all material Tax Returns that it was required to file with respect to the Acquired Assets or its operation thereof and has paid all Taxes that have become due as indicated thereon and all Taxes due in the absence of a Return (except where Seller is contesting such Taxes in good faith by appropriate proceedings). There is no unpaid Tax due and payable that would reasonably be expected to result in a lien on all or any part of the Acquired Assets or for which Buyer could become liable. Except as set forth on Schedule 3.10, there is no audit or other Claim now pending with respect to any material Tax respecting the Acquired Assets, including without limitation any claim regarding or based on the valuation of all or any part of the Acquired Assets. Except as set forth in the Settlement Agreement or on Schedule 3.10, there is no agreement, treaty or settlement regarding the valuation of all or any part of the Acquired Assets or any Taxes payable in respect thereof. No part of the Acquired Assets is located within any so-called “tax increment financing” district or special assessment district or is otherwise subject to assessment other than in accordance with generally applicable provisions of New Hampshire Law. Notwithstanding any other provision of this Agreement to the contrary, this Section 3.10 contains the sole and exclusive representations and warranties of Seller relating to Tax matters.

**Section 3.11 Environmental Matters.**

(a) Schedule 3.11(a) lists all Environmental Permits that are material to the ownership and operation of the Acquired Assets, and identifies those material Environmental Permits that are Transferable Permits; all Environmental Permits necessary for the operation of the Acquired Assets are transferrable. Except as set forth on Schedule 3.11(a), the Environmental Permits listed in Schedule 3.11(a) are in full force and effect.

(b) Except as disclosed on Schedule 3.11(b), during the previous six (6)-year period, with respect to the Acquired Assets: (i) Seller has not received any written notice from any Governmental Authority that it is not in material compliance with Environmental Laws, that it failed to obtain or timely apply for the renewal of any material Environmental Permits, or that it is not in material compliance with any Environmental Permit; (ii) there is no proceeding pending or, to Seller’s Knowledge, threatened, to revoke, prevent the renewal of, rescind, modify, refuse to renew or limit any material Environmental Permit, nor has Seller received any written notice from any Governmental Authority with respect to same; (iii) Seller has not received any written notice from any Governmental Authority that any Acquired Asset is listed under the Comprehensive Environmental Response, Compensation Liability Information Systems or any similar state list; (iv) Seller has not received written notice from any Person alleging Liability for any Environmental Claims and no Environmental Claims are pending or, to Seller’s Knowledge, threatened, against Seller by any Governmental Authority under any Environmental Laws; (v) Seller was not required by any applicable Environmental Laws to place any use or activities restrictions or any institutional controls on any Acquired Assets; and (vi) except as authorized by applicable Environmental Permits, to Seller’s Knowledge there has been no Release or threatened Release of any Hazardous Substances from any Real Property. Except as described in Schedule 3.11(b), Seller has no Knowledge of any matters which could give rise to material Environmental Liabilities.

(c) Seller has provided to Buyer copies of all material reports and investigations within its possession or control regarding the environmental condition of the Acquired Assets that are required to be maintained by the operator of the Facilities pursuant to applicable Law or relate to the un-permitted Release of Hazardous Substances.

(d) During the previous six (6)-year period, to Seller’s Knowledge Seller has not sent or disposed of Hazardous Substances to or at a site which, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act or any similar state law, has been listed or proposed for listing on the National Priorities List or its state equivalent.

(e) Seller has provided Buyer with a true and complete copy of the Removal Contract. Except as set forth in Schedule 3.11(e), the Removal Contract is in full force and effect, the work thereunder is being timely performed in accordance with its terms, and neither Eversource Services, Seller, or to Seller’s Knowledge, the Removal Contractor are in default of their respective obligations thereunder.

(f) Notwithstanding any other provision of this Agreement to the contrary, this Section 3.11 contains the sole and exclusive representations and warranties of Seller relating to Environmental Laws, Environmental Permits, Hazardous Substances or other environmental matters.

**Section 3.12 Employment and Labor Matters.**

(a) Schedule 3.12(a) sets forth (i) a list, organized by job classification at each Facility, of all employees of Seller who are represented by the Union and employed under the terms of the Generation CBA, and who are primarily employed in the operation or support of the Facilities, including all such employees who are on inactive status due to any short-term disability, long-term disability or other approved leave or on layoff status as of the Effective Date (the “**Represented Scheduled Employees**”), and (ii) a list of all other employees of Seller or Eversource Service who are primarily employed in the operation or support of the Facilities as of the Effective Date, but are not represented by the Union (the “**Non-Represented Scheduled Employees**” and, together with the

Represented Scheduled Employees, the “**Scheduled Employees**”), which list shall be amended during the Interim Period to reflect any changes thereto, to the extent such changes are not in violation of any applicable covenants in this Agreement. For each Scheduled Employee, Seller has provided Buyer the following information: employer; name; job title; job classification; facility or operating unit; date of commencement of employment; details of leave of absence or layoff; exempt or non-exempt status; full-time or part-time status; status as temporary if applicable; rate of compensation; bonus, commission or incentive compensation arrangement; a description of the medical/dental/vision/life insurance, pension, retirement and other benefits provided to the employee; accrued vacation, personal and sick time; years of service; and service credited for purposes of vesting and eligibility to participate under any Benefit Plan. Each Scheduled Employee classified as exempt under the Fair Labor Standards Act and state and local wage and hour laws is properly classified.

(b) The Generation CBA is the only collective bargaining agreement to which Seller is a party and which governs terms and conditions of employment of any Scheduled Employees listed in part (i) of Schedule 3.12(a), and Seller is not a party to or bound by any other collective bargaining agreement that is applicable to any Scheduled Employee. Seller has provided Buyer with a true and complete copy of the Generation CBA in effect as of the Effective Date. Except as described in Schedule 3.12(b): (i) there has not been in the preceding two (2) year period, there is not presently pending or existing, and to Seller’s Knowledge there is not threatened any strike, work slowdown, informational picketing activity, lockout, work stoppage, employee grievance process or labor dispute at any of the Facilities; (ii) Seller is, and for the preceding three (3) year period has been, in material compliance with all applicable Laws respecting employment and employment practices, equal employment opportunity, nondiscrimination, harassment, retaliation, family and medical leave obligations, workers compensation, unemployment compensation, immigration, benefits, COBRA and similar state laws, labor relations, worker classification, collective bargaining, the WARN Act and similar state and local laws, workforce reductions, plant closings, uniformed services employment and reemployment rights, occupational health and safety, affirmative action, terms and conditions of employment and wages and hours with respect to the Scheduled Employees; (iii) Seller is not currently subject to any pending, or to Seller’s Knowledge, threatened, unfair labor practice charge or complaint against Seller before the National Labor Relations Board with respect to the Scheduled Employees; (iv) Seller is not the subject of any pending or to Seller’s Knowledge threatened Claim or grievance pertaining to labor relations or employment matters including any charge or complaint filed with any Governmental Body with respect to the Scheduled Employees; (v) there are no pending, or to Seller’s Knowledge, threatened, claims against Seller under any workers compensation plan or policy or for long term disability with respect to the Scheduled Employees; (vi) there are no grievance or arbitration proceeding arising out of or under the Generation CBA pending, or to Seller’s Knowledge threatened, against Seller with respect to the Scheduled Employees; and (vii) Seller is in compliance in all material respects with the Generation CBA and all other contracts with respect to the Scheduled Employees. Seller is not liable for any arrears of wages or unpaid wages or the payment of any Taxes, fines, penalties, damages or other amounts, however designated, for failure to comply with any of the foregoing Laws or legal requirements with respect to the Scheduled Employees.

(c) Schedule 3.12(c) sets forth: (i) a list with the name, responsibilities, and inclusive dates of engagement of every independent contractor of Seller or Eversource Service who, as of the Effective Date, provides individual services related to the operation or support of the Facilities (and Seller has provided Buyer with copies of each agreement with such independent contractors to which Seller or Eversource Service is a party); and (ii) a list with the name of each staffing or employee leasing agency/company with whom Seller or Eversource Service has an agreement or arrangement, as of the Effective Date, for temporary or leased employees to provide services related to the operation or support of the Facilities (and Seller Parties have provided Buyer with copies of each such agreement), the number of temporary employees at each Facility performing services for Seller through each such agency/company, and the type of services provided or position(s) filled. Seller is not liable for any arrears of payments to such independent contractors or temporary employees or the payment of any Taxes, fines, penalties, damages or other amounts for failure to comply with any Laws pertaining to independent contractors or temporary employees.

(d) Notwithstanding any other provision of this Agreement to the contrary, this Section 3.12 contains the sole and exclusive representations and warranties of Seller relating to employment and labor matters.

**Section 3.13 Employee Benefit Plans.** Schedule 3.13 lists, as of the Effective Date, all Employee Benefit Plans established, sponsored, maintained or contributed to (or required to be contributed to) by Seller in respect of the Scheduled Employees. True and complete copies of all such Employee Benefit Plans have been Made Available to Buyer. Seller does not contribute to, and has no obligation to contribute to, a “multiemployer plan” within the meaning of Section 3(37) of ERISA. No liability under Title IV or Section 302 of ERISA or Section 412 of the Code has been incurred by Seller with respect to the Scheduled Employees that has not been satisfied in full, and to Seller’s Knowledge no condition exists that presents a material risk to Seller of incurring any such liability, other than liability for premiums due the Pension Benefit Guaranty Corporation, which premiums have been paid. Notwithstanding any other provision of this Agreement to the contrary, this Section 3.13 contains the sole and exclusive representations and warranties of Seller relating to employee benefits matters.

**Section 3.14 Condemnation.** Seller has received no written notice from any Governmental Authority of any pending or threatened proceeding to condemn or take by power of eminent domain or otherwise, by any Governmental Authority, all or any part of the Acquired Assets having a Condemnation Value exceeding the Condemnation Threshold.

**Section 3.15 Financial Information.** Set forth on Schedule 3.15 are true and complete copies of segregated historical financial information relating to the Acquired Assets dated as of June 30, 2017, prepared by or on behalf of senior management of Seller. The Parties acknowledge that the limited balance sheet financial information provided on Schedule 3.15 is a good faith estimate not maintained in the ordinary course and is not prepared in accordance with GAAP, provided that the fuel, limestone and allowances inventory quantities set forth on Schedule 3.15 are, as of June 30, 2017, true, accurate, and complete in all material respects, and represent all Inventory of a quality and quantity that is usable in the operation of the Business as currently conducted by Seller. The Parties acknowledge that the limited operating expenses and capital expenditure information provided on Schedule 3.15 is a good faith estimate not maintained in the ordinary course of the Business and is not prepared in accordance with GAAP, provided that such information for the four-year period from January 1, 2013 through December 31, 2016 is, in all material respects, true, accurate and complete representations of amounts related to the Acquired Assets as captured in the Seller's accounting system, and this information is a portion of the books and records from which Seller's complete and consolidated audited financial statements are prepared.

**Section 3.16 Absence of Certain Changes.** Except as set forth on Schedule 3.16, from December 31, 2016, Seller has operated the Business, including the Acquired Assets, in all material respects in the ordinary course of business consistent with past practices. Since December 31, 2016, there has not occurred any set of circumstances individually or in the aggregate that has or could be reasonably expected to result in a Material Adverse Effect.

**Section 3.17 Real Property.**

(a) Schedule 2.1(a) lists all of the Sites used by Seller in connection with Seller's operation of the Business.

(b) Seller has exclusive possession of all Sites and Facilities necessary or desirable for the operation of each Facility and the Business except for (A) the rights of others in accordance with Permitted Liens; (B) such possession which would not materially deny, diminish, restrict or interfere with the Seller's or, after Closing, Buyer's right to use, operate, and maintain the Sites and Facilities as currently operated; and (C) as otherwise noted on Schedule 2.1(a).

(c) Except for Permitted Liens or as set forth on Schedule 2.1(a) or Schedule 2.1(e), (i) with respect to each Site and Facility, Seller has not leased or otherwise granted any Person the right to use or occupy such Property or any material portion thereof that is still in effect and (ii) Seller has not granted any outstanding options, rights of first refusal, rights of first offer, rights of reverter or other third party rights to purchase any of the Property. To Seller's Knowledge, except for Permitted Liens, there are no unrecorded Liens, easements, restrictions, covenants, licenses or other matters affecting the Property.

(d) Schedule 2.1(a), Schedule 2.1(b), Schedule 2.1(e) and the Easement Plans set forth a complete list of all leases, easements and access agreements used by Seller in the conduct of the Business (the "**Real Property Agreements**"). Except as set forth in such schedules and Easement Plans, each Real Property Agreement is in full force and effect in all material respects and constitutes a valid and binding obligation of Seller and, to Seller's Knowledge, of the other parties thereto.

(e) Except as set forth on Schedule 3.17(e), Seller is not in breach or default in any material respect under any Real Property Agreement, and to Seller's Knowledge, no other party to any of the Real Property Agreement is in breach or default in any material respect thereunder.

(f) Except for Permitted Liens or as otherwise set forth on Schedule 3.17(f), Seller has not subleased or otherwise granted to any Person the right to use or occupy any property leased under any Real Property Agreements.

(g) Seller has good and valid rights in the Real Property Agreements to which it is a party, free and clear of Liens, except Permitted Liens.

(h) All Sites and Facilities have access to and use of such public utilities as are necessary for the operation of the Business as currently conducted by Seller and no public utility has, to Seller's Knowledge, threatened to discontinue or curtail such services.

**Section 3.18 Regulatory Status.** Seller is a "public utility" under New Hampshire RSA 362:2 and is subject to regulation as such by the NHPUC. Seller is an "electric utility company" that is a "subsidiary company" of a "holding company" which is registered under (and as those terms are defined in) the Public Utility Holding Company Act of 2005, is a "public utility" under (and as that term is defined in) the Federal Power Act, and is subject to regulation as such by FERC. Except as set forth on Schedule 3.18, each Facility is registered with NERC.

**Section 3.19 Brokers.** Except for the fees and expenses of J.P. Morgan Securities LLC, for which Seller is solely responsible, Seller does not have any Liability to pay fees or commissions to any broker, finder or agent with respect to the transactions

contemplated by this Agreement or the Related Agreements for which Buyer could become liable or obligated.

**Section 3.20 Complete Copies.** True and complete copies of the Material Contracts, the Assigned Leases, the Transferable Permits and the Generation CBA have been Made Available to Buyer.

**Section 3.21 Capacity Markets; Winter Reliability Program.**

(a) Schedule 3.21(a) sets forth for each Facility its (i) Capacity Supply Obligations and Qualified Capacity with respect to the Facility as established by ISO-NE for each Capacity Commitment Period associated with any of Forward Capacity Auctions #8, #9, #10, and #11, in each case after accounting for any reconfiguration auctions, bilateral transactions, or other adjustments; (ii) all information with respect to any de-list bids submitted to ISO-NE with respect to the Facility in connection with any Forward Capacity Auctions for which Capacity Supply Obligations have not yet been awarded; and (iii) for each Capacity Commitment Period associated with any of Forward Capacity Auctions #7, #8, #9, #10, and #11 the summer and winter Seasonal Claimed Capabilities and Capacity Network Resource Capabilities of the Facility as formally recognized or determined by ISO-NE and the instrument used to identify Capacity Network Resource Capability. For purposes of this Section 3.21(a), capitalized terms used in this subsection but not defined in this Agreement have the meaning given them in the ISO-NE Tariff.

(b) Except as set forth on Schedule 3.21(b), the capacity allocated to any Capacity Supply Obligations and any revenues expected from ISO-NE therefrom have not been pledged, encumbered or committed by Seller, except for any pledge, encumbrance or commitment that will be released at or prior to Closing.

(c) Except as set forth on Schedule 3.21(c), Seller has not received written notice or, to Seller's Knowledge, other notice, from ISO-NE of a Qualified Capacity Reduction.

(d) Schedule 3.21(d) sets forth for each Facility the obligations undertaken with respect to ISO-NE's 2017-18 Winter Reliability Program and the anticipated revenue from such undertaking, as reflected by any notifications, awards or orders from ISO-NE or FERC regarding the nature of such obligations or any anticipated revenue therefrom. Seller has received no written notice or, to Seller's Knowledge, other notice, from ISO-NE determining that any revenue set forth on Schedule 3.21(d) will be reduced, except as according to the rules of Appendix K of Section III of the ISO New England Transmission, Markets and Services Tariff, including its Performance Adjustment.

**Section 3.22 Exclusive Representations and Warranties.** It is the explicit intent of each Party hereto that Seller is not making any representation or warranty whatsoever, express or implied, respecting the Business, the Acquired Assets, the Assumed Liabilities or the transactions contemplated by this Agreement and the Related Agreements, except those representations and warranties expressly set forth in this Article III, the Related Agreements or under any certificates delivered by Seller in connection with the Closing.

**ARTICLE IV  
REPRESENTATIONS AND WARRANTIES OF BUYER**

Buyer represents and warrants to Seller that the statements contained in this Article IV are true and correct as of the Effective Date.

**Section 4.1 Organization and Existence.** Buyer is a limited liability company duly organized, validly existing and in good standing under the Laws of the State of Delaware. Buyer is duly qualified or authorized to do business in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary.

**Section 4.2 Authority and Enforceability.** Buyer has the limited liability company power and authority to execute and deliver this Agreement and the Related Agreements to which it is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. All limited liability company actions or proceedings to be taken by or on the part of Buyer to authorize and permit the due execution and valid delivery by Buyer of this Agreement and the Related Agreements to which it is a party, the performance by Buyer of its obligations hereunder and thereunder, and the consummation by Buyer of the transactions contemplated hereby and thereby have been duly and properly taken. This Agreement has been duly executed and delivered by Buyer and, assuming the due authorization, execution and delivery by Seller, constitutes the valid and legally binding obligation of Buyer, enforceable against Buyer in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law. When each Related Agreement to which Buyer is a party has been duly executed and delivered by Buyer, assuming the due authorization, execution and delivery by each other party thereto, such Related Agreement will constitute the valid and legally binding obligation of Buyer, enforceable against Buyer in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization,

moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law.

**Section 4.3 Noncontravention.** The execution and delivery by Buyer of this Agreement and the Related Agreements to which it is or will be a party do not and will not, the performance by Buyer of its obligations hereunder and thereunder will not, and the consummation of the transactions contemplated hereby and thereby will not:

(a) Conflict with or result in a violation or breach of any of the terms, conditions or provisions of the Organizational Documents of Buyer;

(b) Conflict with, result in a breach of, constitute a default under, result in the acceleration of, or create in any Person the right to accelerate, terminate, modify, revoke, suspend or cancel (with or without giving of notice, the lapse of time or both), any Contract to which Buyer is bound or to which any of its assets is subject, except as would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on Buyer's ability to perform its obligations hereunder; or

(c) Assuming all of the Consents of the Governmental Authorities set forth on Schedule 4.3(c) (the "**Buyer Required Consents**") have been obtained in form and substance reasonably satisfactory to Buyer, (i) conflict with or result in a violation or breach of any Law, Order or Permit to which Buyer or any of its assets is subject, or (ii) require the Consent of any Governmental Authority under any applicable Law; except, in the case of each of clauses (i) and (ii), as would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.4 Legal Proceedings.** Buyer has not been served with notice of any Claim and no Claim is pending or, to Buyer's knowledge, threatened, against Buyer (a) that seeks an Order restraining, enjoining or otherwise prohibiting or making illegal any of the transactions contemplated hereby or (b) that would, individually or in the aggregate, reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder. Buyer is not bound by any Order that prohibits the consummation of the transactions contemplated by this Agreement or that would, individually or in the aggregate, reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.5 Compliance with Laws.** Buyer is not in violation of any Law applicable to Buyer or its assets the effect of which, individually or in the aggregate, would reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.6 Brokers.** Except for the fees and expenses of Guggenheim Securities, LLC, for which Buyer is solely responsible, neither Buyer nor any of its Affiliates has any Liability to pay fees or commissions to any broker, finder or agent with respect to the transactions contemplated by this Agreement for which Seller or its Affiliates could become liable or obligated.

**Section 4.7 Availability of Funds.** Buyer has, and at the Closing will have, (a) cash on hand or other sources of immediately available funds in amounts sufficient to pay the full amount of the Purchase Price as well as any related fees, costs and expenses incurred by Buyer in connection with the transactions contemplated hereby, and (b) the resources and capabilities (financial or otherwise) to perform its obligations (including the Assumed Liabilities) under this Agreement and any Related Agreements. Buyer acknowledges and agrees that, notwithstanding anything to the contrary contained herein, its obligation to consummate the transactions contemplated hereby is not subject to Buyer or any of its Affiliates obtaining any financing, or to any other contingency or condition respecting financing or availability of funds.

**Section 4.8 Qualified Buyer.** Buyer is qualified to obtain any Permits necessary for Buyer to own and operate the Acquired Assets as of the Closing, to the extent such operation is either required by any Related Agreement or this Agreement, or is contemplated by Buyer.

**Section 4.9 Governmental Approvals.** As of the Effective Date, neither Buyer nor any of its Affiliates is a party to any Contract respecting the construction, development, acquisition, ownership or operation of any power facility or related asset that would reasonably be expected to cause a delay in any Governmental Authority's granting of a Buyer Required Consent or Seller Required Consent, and neither Buyer nor any of its Affiliates has any plans or has engaged in any discussions to enter into any such Contract prior to the Closing Date.

**Section 4.10 WARN Act.** Buyer does not intend, with respect to the Acquired Assets or Transferred Employees, to engage in a "plant closing" or "mass layoff," as such terms are defined in the WARN Act, within sixty (60) days after the Closing Date.

**Section 4.11 Independent Investigation.** Buyer is a sophisticated Person, knowledgeable about the industry in which Seller operates, experienced in investments in such businesses, and able to bear the economic risks associated with the transactions contemplated by this Agreement and the Related Agreements. Buyer has such knowledge and experience as to be aware of the risks

and uncertainties inherent in the acquisition of the Acquired Assets, the assumption of the Assumed Liabilities, and the rights and obligations of the type contemplated in this Agreement. Buyer has conducted to its satisfaction, independently and without reliance on Seller or its Representatives (except to the extent that Buyer has relied on the representations and warranties of Seller set forth in Article III hereof), its own investigation, review and analysis of the Facilities, the Acquired Assets and the Assumed Liabilities, and based on such investigation, review and analysis, has formed an independent judgment concerning the assets, Liabilities, condition, operations and prospects of the Acquired Assets and the ownership and operation thereof. In making its decision to execute this Agreement and the Related Agreements and to enter into the transactions contemplated hereby and thereby, Buyer has relied and will rely solely upon the results of such independent investigation, review and analysis and the terms and conditions of this Agreement and the Related Agreements. Buyer acknowledges that it has had reasonable and sufficient access to the Facilities, the Acquired Assets and documents and other information and materials in connection therewith, that all documents and other information and materials requested by Buyer have been provided to Buyer to its satisfaction, and that it and its Representatives have had the opportunity to meet with the personnel and Representatives of Seller to discuss and ask questions concerning the foregoing.

**Section 4.12 Disclaimer Regarding Projections.** Buyer may be in possession of certain plans, projections and other forecasts regarding the Acquired Assets and the Assumed Liabilities, including estimates, budgets of future revenues, expenses or expenditures, projections of future results of operations (or any component thereof), future cash flows (or any component thereof) or future financial condition (or any component thereof). Buyer acknowledges that there are substantial uncertainties inherent in attempting to make such plans, projections and other forecasts, that Buyer is familiar with such uncertainties, that Buyer is taking full responsibility for making its own independent evaluation of the adequacy and accuracy of all plans, projections and other forecasts so furnished to it, and that Buyer shall have no claim against Seller, its Affiliates or their respective Representatives with respect thereto. Accordingly, Buyer acknowledges that without limiting the generality of this Section 4.12, neither Seller nor any of its Affiliates has made any representation or warranty with respect to such plans, projections or other forecasts.

## ARTICLE V COVENANTS

**Section 5.1 Closing Conditions.** From the Effective Date until the Closing (the “**Interim Period**”), subject to the terms and conditions of this Agreement, each Party shall use its commercially reasonable efforts to take such actions as are necessary, proper or advisable in order to expeditiously consummate and make effective the transactions contemplated by this Agreement and the Related Agreements (including satisfaction, but not waiver, of those closing conditions set forth in Article VI).

**Section 5.2 Notices, Consents; Approvals and Related Agreements.** During the Interim Period:

(a) Subject to Section 5.2(c), during the Interim Period, each Party will and will cause its respective applicable Affiliates to, in order to consummate the transactions contemplated by this Agreement and the Related Agreements, provide reasonable cooperation to the other Party, and proceed diligently and in good faith and use all commercially reasonable efforts, as promptly as practicable, to (i) obtain the Buyer Required Consents and the Seller Required Consents, (ii) make all required filings with, and give all required notices to, the applicable Governmental Authorities or other Persons required to consummate the transactions contemplated by this Agreement and the Related Agreements, and (iii) cooperate in good faith with the applicable Governmental Authorities or other Persons and promptly provide such other information and communications to such Governmental Authorities or other Persons as such Governmental Authorities or other Persons may reasonably request in connection with the foregoing. The Parties will provide prompt notification to each other when any such Consent referred to in this Section 5.2(a) is obtained, taken, made, given or denied, as applicable, and will, subject to Section 5.2(b), promptly advise each other of any material communications (in oral or written form) with any Governmental Authority or other Person regarding any of the transactions contemplated under this Agreement or the Related Agreements. Each Party will pay any fees and expenses associated with obtaining any Consent from a Governmental Authority as may be imposed by applicable Law, provided that if applicable Law does not impose the fees or expenses on a Party, the Parties shall equally share the cost of such fees or expenses.

(b) In furtherance of the covenants set forth in Section 5.2(a):

(i) As soon as practicable following the Effective Date, Buyer and Seller shall prepare all necessary filings in connection with the transactions contemplated by this Agreement and the Related Agreements that may be required to be filed by such Party with applicable Governmental Authorities or under any applicable Laws. Such filings shall be submitted as soon as practicable following the Effective Date, but in no event later than thirty (30) days thereafter (subject to extension by mutual written agreement). The Parties shall (A) request expedited treatment of any such filings (where applicable), (B) subject to applicable Law and the instructions of any Governmental Authority, keep each other apprised of the status of matters relating to such filings, including by promptly furnishing each other with copies of any notices, correspondence or other written communication from the relevant Governmental Authority, (C) promptly make any appropriate or necessary subsequent or supplemental filings, submissions or responses to any Governmental Authority, and (D) cooperate in the preparation of such filings, submissions or responses as is reasonably necessary and appropriate, including by making available to the other Party

such information as the other Party may reasonably request in order to complete such filings or respond to information requests by any Governmental Authority. Prior to making any material filing, submission, response or other communication to any Governmental Authority (or members of their respective staffs) in oral or written form, each Party will permit the other Party (or its counsel) a reasonable opportunity to review and provide comments on such proposed filing, submission, response or other communication, and will consult with and consider in good faith the views of the other Party in connection therewith. Each Party will consult with the other Party in advance of any material meeting or conference (in person or by telephone) with any such Governmental Authority, and to the extent not prohibited by Law or such Governmental Authority, give the other Party the opportunity to attend and to participate in such meetings and conferences. Notwithstanding the foregoing, neither Buyer nor Seller shall be obligated to share any information, filing, submission or response with the other Party if a Governmental Authority objects to the sharing of such information, filing, submission or response or if prohibited by applicable Law.

(ii) The Parties shall not, and shall cause their respective Affiliates not to, take any action that would reasonably be expected to materially adversely affect or delay the Consent of any Governmental Authority with respect to any of the filings referred to in Section 5.2(a) or with respect to the divestiture of the Hydro Business.

(iii) Except as set forth in Section 9.1 or as otherwise set forth in this Section 5.2, each Party shall bear its own fees, costs and all other expenses (including filing fees, transfer fees, legal fees and other filing preparation costs) associated with any Consents or other actions contemplated by this Section 5.2 in connection with or otherwise related to the transactions contemplated by this Agreement and the Related Agreements.

(c) In addition to the covenants set forth in Section 5.2(a) and Section 5.2(b), Buyer shall undertake promptly any and all actions required to complete lawfully the transactions contemplated by this Agreement and the Related Agreements prior to the Outside Date, including by (i) responding to and complying with, as promptly as reasonably practicable, any request for information or documentary material regarding such transactions from any relevant Governmental Authority (including responding to any “second request” for additional information or documentary material under the HSR Act as promptly as reasonably practicable), (ii) causing the prompt expiration or termination (including requesting early termination and/or approvals thereof) of any applicable waiting period and clearance or approval by any relevant Governmental Authority, including defense against, and the resolution of, any objections or challenges, in court or otherwise, by any relevant Governmental Authority or other Person preventing consummation of such transactions, and (iii) making any necessary post-Closing filing or proffering and consenting to an Order providing for the sale or other disposition, or the holding separate, of particular assets, categories of assets or lines of business, including the Acquired Assets or any other assets or lines of business of Buyer or any of its Affiliates, in order to mitigate or otherwise remedy any requirements of, or concerns of, any Governmental Authority, or proffering and consenting to any other restriction, prohibition or limitation on any of the Acquired Assets, or on Buyer or any of Buyer’s Affiliates or any of their respective assets, in order to mitigate or remedy such requirements or concerns. The entry by any Governmental Authority in any legal proceeding of an Order permitting the consummation of the transactions contemplated by this Agreement and/or any of the Related Agreements but which is subject to certain conditions or requires Buyer or any of its Affiliates to take any action, including any restructuring of the Acquired Assets or lines of business of Buyer or any of its Affiliates or any changes to the existing business of Buyer or any of its Affiliates, shall not be deemed a failure to satisfy the conditions specified in Article VI. For the avoidance of doubt, Buyer shall not take any action with respect to its obligations under this Section 5.2(c) which would bind Seller or any of its Affiliates irrespective of whether the transactions contemplated hereby occur. Notwithstanding anything to the contrary in this Agreement, neither Buyer nor any of its Affiliates will have any obligation to (x) accept any material condition or requirement of any Consent that is not already imposed on Seller, (y) divest itself of any assets, whether tangible or intangible, or any portion of any of its or its Affiliates businesses in order to obtain any Consent required in connection with the transactions contemplated by this Agreement or any Related Agreement, or (z) take or refrain from taking any action that could result in a Material Adverse Effect.

(d) Buyer further agrees that neither it nor any of its Affiliates shall, prior to Closing, enter into any other Contract to acquire or market or control the output of, nor acquire or market or control the output of, electric generating facilities or uncommitted generation capacity in the ISO-NE market if the proposed acquisition or ability to market or control output of such additional electric generating facilities or uncommitted generation capacity in such market could reasonably be expected to increase the market power attributable to Buyer and its Affiliates in such market in a manner materially adverse to approval of the transactions contemplated by this Agreement and the Related Agreements or that would reasonably be expected to prevent or otherwise materially interfere with, or materially delay the consummation of the transactions contemplated hereby and thereby.

(e) During the Interim Period, Buyer and Seller shall cooperate and use their commercially reasonable efforts to secure the transfer or reissuance of the Transferable Permits to Buyer (including obtaining any necessary Consents thereto), or the substitution of Buyer for Seller where appropriate on pending applications for such Transferable Permits or renewals thereof, effective as of the Closing Date. If the Parties are unable to secure the transfer, reissuance or substitution respecting one or more Transferable Permits effective as of the Closing Date, Seller shall continue to reasonably cooperate with Buyer’s efforts to secure such transfer, reissuance or substitution following the Closing Date. Each Party agrees that it will accept the terms of all Transferable Permits as existing on the Effective Date relating to the operation of the Acquired Assets, and that it will not seek to amend any of such terms in connection with

filings with Governmental Authorities relating to the transactions contemplated by this Agreement and the Related Agreements, other than as necessary to effect the transfer or reissuance thereof to Buyer. In addition, with respect to any Transferable Permits for which the date for renewal will have passed by the Closing Date, Seller and Buyer shall cooperate to file by the Closing Date all applications with Governmental Authorities necessary to renew such Transferable Permits in a timely fashion without any material modifications to the terms thereof, except by agreement of the Parties, as may be required by applicable Law or to effect the renewal of such Permit in the name of Buyer. Nothing in this Section 5.2(e), however, shall prohibit Buyer or Seller from appealing the terms of any Permit that is issued or renewed following the Effective Date, with respect to which the Parties shall cooperate in good faith.

(f) Promptly after the Effective Date and during the Interim Period, Buyer and Seller will in good faith negotiate the terms and conditions of the Related Agreements to implement the transactions contemplated by this Agreement with the intention that the forms are each in final form on or before the sixtieth (60<sup>th</sup>) day after the Effective Date; *provided, however*, that the final Easement and Easement Plan for the White Lake Site shall be finalized as soon as reasonably practicable in light of the subdivision of the White Lake Site currently in progress, but in all events prior to the Closing Date; and *provided further*, the Interconnection Agreements and related arrangements will satisfy all reasonable requirements of Buyer for purposes of supplying energy, capacity and ancillary services to the ISO-NE market without incurring any local network service charges for transmission, except as set forth in Schedule 3.7(b-1), and without the need for modifications to the transmission system unless, in each case, expressly approved in writing by Buyer.

### **Section 5.3 Assigned Contracts; Other Interim Covenants.**

(a) During the Interim Period, Buyer and Seller shall use commercially reasonable efforts to obtain all required Consents to the assignment to Buyer of the Assigned Contracts from the applicable counterparties thereto (each, a “**Counterparty**”), effective as of the Closing Date, in accordance with the following:

(i) Seller shall have primary responsibility for obtaining all necessary Consents to the assignment of Material Contracts, *provided* that Buyer shall cooperate with Seller’s efforts in this regard and shall use commercially reasonable efforts to assist Seller when so requested by Seller. Seller shall have primary responsibility for obtaining all necessary Consents to the assignment of Other Assigned Contracts, and in furtherance thereof, to the maximum extent permitted by Law and each applicable Other Assigned Contract, Seller appoints Buyer as Seller’s agent to obtain all required Consents of any Counterparty to each of the Other Assigned Contracts for the assignment thereof to Buyer effective as of the Closing Date, which Seller shall pursue, using commercially reasonable efforts, in accordance with a mutually agreed protocol and form letters to be sent to such Counterparties.

(ii) To the extent that any Assigned Contract relates to assets or services that are both used in the operations of one or more Facilities and used by Seller in its other operations, the Parties shall cooperate and use commercially reasonable efforts to obtain the required Consent for any partial assignment, apportionment or other arrangement as may be necessary or practicable to permit Buyer to obtain such portion of assets or services necessary for the continued operation of such Facilities on and after the Closing Date, and to permit Seller to retain such other rights or portion of the assets or services to continue its operations on and after the Closing Date, it being understood that the portion of each such Assigned Contract relating to Buyer’s continued operation of such Facilities on and after the Closing Date must be assigned to Buyer as of the Closing.

(iii) Seller shall reasonably cooperate with Buyer in providing any notices to Counterparties as may be required by the terms of any Assigned Contract or as Buyer (acting reasonably) may deem necessary or advisable, including notices providing Counterparties with updated notice information and updated bank account information to which any applicable payments should be made by such Counterparties. Buyer shall, where necessary, enter into a master agreement or similar enabling agreement with any Counterparty, on substantially the same terms as those in place on the Effective Date in a master or enabling agreement between Seller and such Counterparty, in connection with the assignment to Buyer of one or more purchase orders or similar Contracts subject to such master agreement or enabling agreement with Seller.

(iv) For the avoidance of doubt, it is specifically acknowledged and agreed by the Parties that neither Party shall be obligated to incur, pay, reimburse or provide or cause any of their respective Affiliates to incur, pay, reimburse or provide, any liability, compensation, consideration or charge to obtain the Consent of any Counterparty to the assignment of any Assigned Contract, unless any such liability, compensation, consideration or charge is expressly contemplated by any such Assigned Contract, in which case Seller shall incur the liability or make any such payment or charge.

(v) To the extent that Seller’s rights under any Contract included as an Acquired Asset may not be assigned without the Consent of another Person, and such Consent has not been obtained by the Closing, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful or ineffective (or would otherwise impair Buyer’s rights and obligations thereunder), and such Contract shall not be so assigned at the Closing (such non-assigned Contracts, the “**Non-Assigned Contracts**”). Seller and Buyer shall continue to comply with their obligations under this Section 5.3(a) to the extent and for so long as the applicable Non-Assigned Contract shall not have

been assigned to Buyer (and Seller, to the maximum extent permitted by Law and such Non-Assigned Contract, shall appoint Buyer to be Seller's agent with respect to such Non-Assigned Contract for the purpose of obtaining an assignment thereof to Buyer); *provided* that neither Seller nor Buyer shall have any obligation to offer or pay any consideration in order to obtain any such Consent to assignment; *provided, further*, that Buyer and Seller shall use their commercially reasonable efforts, to the maximum extent permitted by Law and such Non-Assigned Contract, to enter into one or more back-to-back Contracts, or such other reasonable arrangements, that would place Buyer in the same or a substantially similar position and provide Buyer the same or substantially similar rights, privileges, liabilities, benefits and obligations, in each case, as if such Non-Assigned Contract had been assigned to Buyer as of the Closing.

(b) During the Interim Period, Buyer and Seller shall use commercially reasonable efforts to obtain all required Consents to the assignment to Buyer of any warranty described in Section 2.1(c), effective as of the Closing Date. To the extent that Seller's rights under any such warranty may not be assigned without the Consent of another Person, and such Consent has not been obtained by the Closing, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful or ineffective (or would otherwise impair Buyer's rights and obligations thereunder), and such warranty shall not be so assigned at the Closing. Seller and Buyer shall continue to comply with their obligations under this Section 5.3(b) to the extent and for so long as the applicable warranty shall not have been assigned to Buyer, and Seller, to the maximum extent permitted by Law and such warranty, shall from and after the Closing, appoint Buyer to be Seller's agent for the purpose of enforcing such warranty so as to the maximum extent possible to provide Buyer with the rights and obligations of such warranty. Notwithstanding the foregoing, Seller shall not be obligated to bring or file suit against any Third Party; *provided* that if Seller shall determine not to bring or file suit after being requested by Buyer to do so, Seller shall, to the maximum extent permitted by Law or any applicable Contract, enter into such reasonable arrangements with Buyer so that Buyer may bring or file such suit with respect to the rights of Seller.

(c) In connection with Seller's assignment to Buyer of the Trust Agreement, dated as of April 7, 2017, between Seller and The Bank of New York Mellon, as trustee, respecting the coal ash landfill located at Merrimack Station (the "**Merrimack Landfill Trust**"), Buyer shall, in conjunction with Seller's written notice of assignment to be provided to such trustee in accordance therewith, promptly satisfy the information and documentation requirements set forth in Section 15 of the letter agreement between Seller and such trustee, also dated April 7, 2017, executed in connection with such Trust Agreement.

(d) The Parties will cooperate in good faith from and after the Closing if any Acquired Asset requires Buyer to provide credit support in any form for the benefit of a Third Party, and to further release Seller from any credit support provided in connection with any Acquired Asset.

(e) To the extent that Seller's rights under any Contract included as an Acquired Asset may not be assigned without the Consent of another Person, and such Consent has not been obtained by the Closing, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful or ineffective (or would otherwise impair Buyer's rights and obligations thereunder), and such Contract shall not be so assigned at the Closing. To the extent Buyer elects to proceed to Closing without obtaining Consent regarding any Non-Assigned Contracts, Buyer will not be deemed to have waived any such requirement for Consent and Seller will take all commercially reasonable actions requested by Buyer to obtain such Consent after the Closing or to otherwise transfer to Buyer the benefit of such Non-Assigned Contract. If any such Consent shall not be obtained or if any attempted assignment would be ineffective or would impair Buyer's rights under the Non-Assigned Contract in question so that Buyer would not in effect acquire the benefit of all such rights, Seller, to the maximum extent permitted by Law and the Non-Assigned Contract, shall act after the Closing as Buyer's agent in order to obtain for it the benefits thereunder and shall cooperate, to the maximum extent permitted by Law and the Non-Assigned Contract, with Buyer in any other reasonable arrangement designed to provide such benefits to Buyer. In addition to the foregoing, to the extent any Material Contract that is currently used in both the Hydro Business and the Business is not assigned to Buyer at the Closing and is assigned to any purchaser of all or any portion of the Hydro Business, Seller will obtain such benefits with the same counterparty for Buyer at the same costs as set forth in any such Contract.

#### **Section 5.4 Access of Buyer and Seller.**

(a) During the Interim Period, Seller will provide Buyer and its Representatives with reasonable access, upon reasonable prior notice and during normal business hours, to the Facilities, the Scheduled Employees and all information related to the Acquired Assets, the Scheduled Employees and the Assumed Liabilities in possession of Seller and its Affiliates (including, subject to the receipt of any required Consents and in accordance with applicable Law, such information and records respecting the Scheduled Employees as Buyer reasonably deems necessary to comply with its obligations under this Agreement), and to the Representatives of Seller who have significant responsibility with respect thereto, in each case, as reasonably requested by Buyer in connection with the consummation of the transactions contemplated by this Agreement, but only to the extent that such access does not unreasonably interfere with the operation of the Facilities or the other business or operations of Seller or its Affiliates, and subject to compliance with applicable Laws and Permits; *provided*, that Seller shall have the right to have its Representatives present for any communication with

the Scheduled Employees, or any other employees or officers of Seller or its Affiliates, and to impose reasonable restrictions and requirements for safety purposes. In connection with and subject to the limitations set forth in the foregoing, during the Interim Period, (i) Seller shall permit Buyer and its Representatives to make such reasonable inspections of the Sites as Buyer may reasonably request (and Buyer shall be entitled, at its expense, to have the Sites surveyed and to conduct non-invasive physical inspections thereof), and (ii) Buyer shall be entitled to perform Phase I environmental studies or environmental site assessments of the Acquired Assets at Buyer's cost and upon notice to and in cooperation with Seller, utilizing an environmental firm reasonably acceptable to Buyer and Seller to update any or all of the existing Phase I environmental assessments posted to the Data Site, with Buyer and Seller as the identified users of the updated Phase I environmental assessments, and Buyer shall promptly furnish Seller with a copy of any such updates; *provided, however*, that during the Interim Period Buyer shall not be entitled to perform any Phase II environmental site assessments or invasive environmental studies. Seller shall furnish Buyer with a copy of each material report, schedule or other document filed or received by Seller or its Affiliates with or from a Governmental Authority with respect to the Acquired Assets during the Interim Period. During the Interim Period and following Closing, with respect to Environmental Liabilities that constitute Excluded Environmental Liabilities, Seller agrees to provide to Buyer draft copies of all plans, studies and reports prepared after the Effective Date in connection with any site investigation or Remediation related to the Acquired Assets (including with regard to its obligations under Section 2.4(i)(A) and Section 2.4(i)(B)) and, during the Interim Period, Seller further agrees to provide to Buyer draft copies of any Environmental Permit renewal or modification applications related to the Acquired Assets, in each case prior to their submission to the Governmental Authority with jurisdiction under Environmental Laws. Further, Buyer shall have the right, without the obligation, to attend all meetings between Seller, its Representatives, and such Governmental Authorities with respect to matters that constitute Excluded Environmental Liabilities or are related to Environmental Permit renewals or modifications. Notwithstanding the foregoing, and without limiting the generality of the confidentiality provisions set forth in this Agreement, the Confidentiality Agreements or any Related Agreement, Seller shall not be required to provide any information or access to any Facilities (A) which Seller reasonably believes it is prohibited from providing to Buyer by reason of any applicable Law or Permit, (B) which, if provided to Buyer, could constitute a waiver by Seller of the attorney-client privilege in respect of such information, (C) which Seller is required to keep confidential or prevent access to by reason of a Contract with a Third Party, or (D) relating to any potential sale of the Acquired Assets, or any other generating facilities of Seller, to any other Person; *provided, however*, that the Parties will, to the extent legally permissible, reasonably necessary and practicable, use commercially reasonable efforts to make appropriate substitute disclosure arrangements, or seek appropriate waivers or consents, under circumstances in which the foregoing restrictions of this sentence apply.

(b) During the Interim Period, upon reasonable prior request of Buyer and at Buyer's sole cost and expense, Seller will permit designated employees or Representatives of Buyer ("**Buyer's Observers**") to observe all operations of Seller related to the Facilities, with such observation permitted on a cooperative basis in the presence of personnel of Seller during normal daytime business hours of Seller; *provided, however*, that Buyer's Observers shall not unreasonably interfere with the operation of the Facilities by Seller or the other business or operations of Seller or its Affiliates.

(c) Buyer shall not be permitted during the Interim Period to contact any of Seller's vendors, customers or suppliers, or any Governmental Authorities (except, in accordance with Section 5.2 or Section 5.3, in connection with Consents to be obtained in connection with this Agreement or any Related Agreement), regarding the operations or regulatory status of Seller or with respect to the transactions contemplated under this Agreement or the Related Agreements without receiving prior written authorization from Seller (not to be unreasonably withheld, conditioned or delayed); *provided*, that nothing in this Section 5.4(c) shall be construed to restrict Buyer or its Affiliates from contacting any Person to the extent the subject of such communications is not related to this Agreement or any Related Agreement, or the transactions contemplated hereby or thereby.

(d) Buyer agrees to indemnify and hold harmless Seller, its Affiliates and their Representatives for any and all Losses incurred by Seller, its Affiliates or their Representatives arising out of any exercise of the access rights under this Section 5.4, including any Claims by any of Buyer's Representatives for any injuries or property damage while present at the Facilities, except in cases of Seller's or its Representatives' willful misconduct.

(e) On or as soon as reasonably practicable after the Closing Date (but in no event more than twenty (20) days thereafter), Seller shall deliver to Buyer all the Transferred Books and Records (to the extent not already located at the Facilities or otherwise Made Available to Buyer on or prior to the Closing), except as prohibited by applicable Law.

(f) Following the Closing, Seller shall be entitled to retain copies (at Seller's sole cost and expense) of all books and records relating to its ownership or operation of the Acquired Assets and the Assumed Liabilities.

(g) After the Closing, Buyer will, and will cause its Representatives to, provide Seller and its Affiliates, including their respective Representatives, reasonable access to or copies of all books, records, files and documents to the extent they are related to the Acquired Assets or the Assumed Liabilities, and to periods ending prior to the Closing Date in order to permit Seller and its Affiliates and their respective Representatives to prepare and file their Tax Returns and to prepare for and participate in any investigation with respect thereto, to prepare for and participate in any other investigation and defend any Claims relating to or involving Seller or its Affiliates, to discharge its obligations under this Agreement, to comply with financial reporting requirements, and for other reasonable

purposes, and will afford Seller and its Affiliates reasonable assistance in connection therewith at no cost to Seller. Buyer will cause such records to be maintained for not less than seven (7) years from the Closing Date and will not dispose of such records without first offering in writing to deliver them to Seller; *provided, however*, that in the event that Buyer transfers all or a portion of the Acquired Assets or the Assumed Liabilities to any Third Person during such period, Buyer may transfer to such Third Person all or a portion of the books, records, files and documents related thereto, *provided* such transferee expressly assumes in writing the obligations of Buyer under this Section 5.4(g).

(h) On and after the Closing Date, (i) at the request of either Party, the other Party shall make available to such requesting Party, its Affiliates and their respective Representatives, those employees of the non-requesting Party or its Affiliates requested by such requesting Party in connection with any Claim, including to provide testimony, to be deposed, to act as witnesses and to assist counsel, and (ii) at the reasonable request of Seller, Seller shall have reasonable access to the Transferred Employees for a period of seven (7) years following the Closing Date, for purposes of consultation or otherwise, to the extent that such access may reasonably be required by Seller in connection with matters relating to or affected by the operations of Seller prior to the Closing; *provided, however*, that, in each case, (x) such access to such employees shall not unreasonably interfere with the normal conduct of the operations of the non-requesting Party, (y) the requesting Party shall pay and reimburse the non-requesting Party for the out-of-pocket costs reasonably incurred by the non-requesting Party in making such employees available, and (z) such assistance shall be provided insofar as the same may be provided without violating any Law or Permit, or waiving any attorney-client privilege, as determined in the reasonable opinion of counsel to the non-requesting Party.

**Section 5.5 Conduct of Business Pending the Closing.** During the Interim Period, Seller will operate and maintain the Acquired Assets in the ordinary course of business consistent with Good Utility Practice, unless otherwise expressly contemplated by this Agreement or with the prior written consent of Buyer (which consent shall not be unreasonably withheld or delayed). Good Utility Practice during the Interim Period shall include, but not be limited to, the following: to the extent Seller experiences a GADS Event, Seller will cure in accordance with Good Utility Practice the cause of such GADS Event for each Facility such that it reports in GADS as available an amount of capacity equal to or greater than each Facility's applicable Capacity Supply Obligation as of the Closing Date. Without limiting the generality of the foregoing, except as otherwise expressly contemplated by this Agreement or as set forth in Schedule 5.5, Seller shall not, without the prior written consent of the Buyer (which consent shall not be unreasonably withheld or delayed), during the Interim Period, with respect to the Acquired Assets or Assumed Liabilities:

(a) Except for Acquired Assets used at or consumed by the Facilities in the ordinary course of business consistent with Good Utility Practice, and except for sales or dispositions of obsolete or surplus assets in connection with the normal repair or replacement of assets or properties, (i) sell, lease (as lessor), license (as licensor), transfer or otherwise dispose of any of the Acquired Assets, or (ii) encumber, pledge, mortgage or suffer to be imposed on any of the Acquired Assets any Lien other than Permitted Liens;

(b) Make any material change in the levels of Inventories customarily maintained by the Seller with respect to the Acquired Assets, except for such changes that are consistent with Good Utility Practice, nor transfer, sell or otherwise acquire or dispose of any assets described in Section 2.1(c) except in the ordinary course of business consistent with past practices; *provided, however*, that Seller shall consult with Buyer with respect to the purchase of any fuel Inventory during the Interim Period, the terms of which purchase shall be subject to Buyer's prior written approval, not to be unreasonably withheld, conditioned or delayed; *provided, further*, that Seller shall consult with Buyer with respect to the purchase of any non-fuel Inventory during the Interim Period in excess of Five Hundred Thousand Dollars (\$500,000) in the aggregate, the terms of which purchase shall be subject to Buyer's prior written approval, not to be unreasonably withheld, conditioned or delayed;

(c) (i) Terminate, make any waiver under, extend, materially amend, or renew or replace any Material Contract, Assigned Lease or Transferable Permit, except in connection with transferring Seller's rights or obligations thereunder to the Buyer pursuant to this Agreement; or (ii) enter into or commit to enter into any Contract that would be a Material Contract, in each case without the prior written consent of Buyer (which consent shall not be unreasonably withheld or delayed). Except with the prior written consent of Buyer (which consent may be granted or withheld by Buyer in its sole discretion), Seller shall not enter into any Contract relating to the ownership or operation of the Acquired Assets or the operation of the Business, except for any Contract (w) entered into in the ordinary course of business that will be terminated or fully performed prior to the Closing (without assignment to, or any continuing Liability of, Buyer on or after the Closing), (x) that can be freely assigned to Buyer at the Closing and terminated by Buyer at its option at any time on or after the Closing without penalty or cancellation charge, (y) that can be freely assigned to Buyer at the Closing and that does not increase an Assumed Liability or which increases an Assumed Liability by an amount of Two Hundred Fifty Thousand Dollars (\$250,000) or less individually or One Million Dollars (\$1,000,000) or less in the aggregate with other such Contracts, or (z) as may be required or permitted pursuant to Section 5.3 or to implement another provision of this Section 5.5, so long as such Contract can be freely assigned to Buyer at the Closing; *provided* that, during the Interim Period, Schedule 2.1(e), be amended to account for any Contract permitted under this Section 5.5(c);

(d) Enter into, amend, or otherwise modify any real or personal property Tax agreement, treaty or settlement that would reasonably be expected to affect the Tax Liabilities of Buyer or any of its Affiliates in a material manner for any taxable year or

period ending after the Closing Date;

(e) Make, or enter into any commitment to make, any capital expenditures relating to the Acquired Assets, Facilities or Sites, except for those capital expenditures or commitments necessitated by Good Utility Practice and which will be paid in full prior to the Closing, *provided that* if not paid in full prior to the Closing, not more than Two Hundred Fifty Thousand Dollars (\$250,000), in the aggregate, will be payable at any time from and after the Closing;

(f) Increase the level of wages, compensation or other benefits of any Scheduled Employee, except as required pursuant to the Generation CBA or applicable Law or in accordance with Seller's ordinary course of business consistent with past practices; *provided, however*, that such increase shall not in the aggregate, together with any increases resulting from Seller's or its Affiliates' actions set forth in Section 5.5(g) below, exceed the greater of a three percent (3%) of the Scheduled Employees' wages or Two Hundred Fifty Thousand Dollars (\$250,000) annually;

(g) Terminate the employment of any Scheduled Employee except for cause, or hire any employee who would be a Scheduled Employee (other than to replace or fill vacancies), in each case, other than as consistent with past practices, without first consulting with Buyer; *provided, however*, that any such hiring shall not, in the aggregate and, together with any increases resulting from Seller's or its Affiliates' actions set forth in Section 5.5(f) above, exceed Two Hundred Fifty Thousand Dollars (\$250,000) annually; *provided further*, that, during the Interim Period, Schedule 3.12(a) shall be amended to reflect any changes in the Scheduled Employees listed thereon that are permitted under this Section 5.5(g); or

(h) Except as required by Law, agree to any amendment to or waiver of any term of the Generation CBA, or enter into any new collective bargaining agreement with respect to any Scheduled Employees.

Notwithstanding anything to the contrary herein, Seller may take commercially reasonable actions with respect to emergency situations or as required by Law as reasonably determined by Seller and without Buyer's prior written consent, so long as Seller shall promptly inform Buyer upon taking any such action.

#### **Section 5.6 Termination of Certain Services and Contracts; Transition Matters.**

(a) Notwithstanding anything in this Agreement to the contrary, at or prior to the Closing, Seller, subject to consultation with Buyer and Buyer's right to request modifications to the Schedules as set forth in Section 5.15(a), shall (i) terminate, effective upon the Closing, any services provided to any of the Facilities or with respect to the Acquired Assets by Seller, or by any Affiliate thereof under an Intercompany Arrangement, including the termination or severance of insurance policies with respect to coverage for any of the Facilities, Tax services, legal services and banking services (to include the severance of any centralized clearance accounts), other than any such services provided pursuant to the Transition Services Agreement and other than with respect to those Assigned Contracts set forth on Schedule 2.2(j) and (ii) terminate each Contract designated by Buyer on Schedule 5.6(a), which Schedule will be finalized by the Parties acting in good faith within sixty (60) days and which does not result in a termination fee to Seller (such services or Contracts collectively, the "**Terminated Contracts**"). Within thirty (30) days of the Effective Date, Seller will provide Buyer a full and complete copy of each Contract used in connection with the operation of the Business that is not a Material Contract and is available for assumption at Closing by Buyer. Buyer will, acting reasonably and in good faith, determine which of such Contracts Buyer will assume at Closing. For avoidance of doubt, Buyer acknowledges and agrees that all insurance coverage with respect to the Acquired Assets, including those policies referred to in Section 3.9, shall be terminated as of the Closing, and that Buyer shall be solely responsible for providing insurance in respect of the Acquired Assets and for any claims made in connection with such insurance policies after the Closing but only for those claims relating to events or occurrences first occurring on and after the Closing Date.

(b) At the request of Buyer, at the Closing, Seller shall, and shall cause Eversource Services to, enter into an agreement with Buyer to provide, following Closing, those transition services respecting the Acquired Assets as, and for such periods of time, set forth on Schedule 5.6(b) (which schedule may be amended by mutual agreement of Buyer and Seller prior to Closing) at a price equal to the applicable Transition Service Cost Percentage of cost (as allocated in accordance with the same methodologies used for such allocations by Seller and its Affiliates in accordance with past practice); *provided, however*, the escalation provisions in the Transition Service Cost Percentage will be subject to negotiation and potential expansion of time periods during the Interim Period with respect to information technology services in accordance with the other terms and conditions set forth therein (the "**Transition Services Agreement**"). The Parties will agree upon any remaining terms and conditions of the Transition Services Agreement in a commercially reasonable manner as soon as practicable after the date hereof and in any event within sixty (60) days of the date hereof.

(c) Within thirty (30) days after the date hereof, Buyer shall deliver to Seller a list of its proposed representatives to a joint transition team. Seller will add its representatives to such team within ten (10) Business Days after receipt of Buyer's list. Such team will be responsible for preparing as soon as reasonably practicable after the date hereof, and using commercially reasonable efforts to timely implement, a transition plan which will identify and describe substantially all of the various transition activities that the

Parties will cause to occur before and after the Closing and any other transfer of control matters that any Party reasonably believes should be addressed in such transition plan. Buyer and Seller shall use commercially reasonable efforts to cause their representatives on such transition team to cooperate in good faith and take reasonable steps necessary to develop a mutually acceptable transition plan no later than sixty (60) days after the date of this Agreement.

**Section 5.7 Seller Marks.** Buyer acknowledges and agrees that as a result of the consummation of the transactions contemplated by this Agreement, it will not obtain any right, title, interest, license or other right hereunder to use any of the Seller Marks. Prior to the Closing, Seller may remove any of the Seller Marks as it determines in its sole discretion. As soon as reasonably practicable but in no event more than one hundred eighty (180) days after the Closing Date, Buyer shall remove, cover or conceal from the Facilities or the Acquired Assets all of the Seller Marks, including signage at the Facilities, and shall dispose of any unused products, signage, materials, stationery and literature bearing the Seller Marks remaining at the Facilities following the Closing; *provided* that Buyer shall, within ten (10) Business Days after the Closing Date, remove, cover or conceal the Seller Marks appearing on signage at the primary entrances of the Facilities. Thereafter, Buyer shall not use any Seller Mark or any name or term confusingly similar to any Seller Mark in connection with the sale of any products or services, in the corporate or doing business name of any of its Affiliates or otherwise in the conduct of its or any of its Affiliates' businesses or operations. In the event that Buyer breaches this Section 5.7, Seller shall be entitled to specific performance of this Section 5.7 and to injunctive relief against further violations, as well as any other remedies at law or in equity available to Seller.

### **Section 5.8 Employee Matters.**

(a) Settlement Agreement. The Parties acknowledge and agree that under New Hampshire Law (New Hampshire RSA 369-B:3-b) and the Settlement Agreement, Affected Employees are entitled to certain employee protections that apply in connection with the transactions contemplated hereby, including provisions requiring that Buyer undertake certain employee-related obligations as a condition to the consummation of the transactions contemplated hereby. The Parties acknowledge and agree that the covenants and agreements set forth in this Section 5.8 are intended to implement the applicable employee protection provisions and requirements set forth under New Hampshire Law and in the Settlement Agreement and shall be interpreted consistently therewith.

#### (b) Represented Transferred Employees.

(i) Schedule 5.8(b)(i) sets forth the total number of Represented Scheduled Employees (including all such Represented Scheduled Employees who are on inactive status due to any short-term disability, long-term disability or other approved leave) employed in each job classification at each Facility as of the Effective Date. Within twenty (20) days following the Effective Date, Buyer shall provide notice to Seller of the number of Represented Scheduled Employees by classification and Facility whom Buyer desires to hire. The Parties shall cooperate in good faith with the Union to identify, within fifteen (15) days after receipt of Buyer's notice pursuant to Section 5.8(k), in accordance with the applicable provisions of the Generation CBA and the Settlement Agreement, the particular Represented Scheduled Employees to whom Buyer shall offer employment pursuant to the terms of this Section 5.8 (the "**Selected Represented Employees**"). Within sixty (60) days following the date the Selected Represented Employees are identified, Buyer shall offer employment, commencing as of 12:01 a.m. Eastern time on the Closing Date, to all such Selected Represented Employees. Effective immediately before the commencement of employment by Buyer, Seller will terminate the employment of all such Selected Represented Employees who have accepted employment with the Buyer.

(ii) All such offers of employment shall be (A) contingent upon the employee's satisfactory completion of background and drug tests to the extent permitted under the Generation CBA and applicable Law, (B) made in accordance with applicable Laws, the Generation CBA and the Settlement Agreement, and (C) otherwise on terms consistent with the provisions of this Section 5.8. Those employees who accept such offer of employment are referred to herein as the "**Represented Transferred Employees**." Buyer shall, as soon as reasonably practicable and in no event more than twenty (20) days following the Effective Date, provide notice to the Union (x) that Buyer intends to recognize the Union, as of the Closing, as the collective bargaining representative for all Represented Transferred Employees, (y) that, subject to Section 5.8(e), Buyer agrees to become party to and bound by the terms of the Generation CBA as of the Closing with respect to the Represented Transferred Employees, and (z) that describes Buyer's plans regarding staffing by classification and operations of the Facilities.

(iii) On and after the Closing, Buyer shall, subject to Section 5.8(e), comply with all applicable obligations under the Generation CBA with respect to the Represented Transferred Employees covered thereby.

#### (c) Non-Represented Transferred Employees.

(i) Buyer may interview some or all Non-Represented Scheduled Employees listed in Schedule 3.12(a) to determine whether to make offers of employment. As of the Effective Date, Seller will provide Buyer reasonable access to the Facilities and shall make Non-Represented Scheduled Employees available to Buyer for purposes of conducting employment

interviews. Within sixty (60) days following the Effective Date, Buyer shall offer employment to those Non-Represented Scheduled Employees listed in Schedule 3.12(a) whom Buyer desires to employ commencing as of 12:01 a.m. Eastern time on the Closing Date (the “**Selected Non-Represented Employees**”). All such offers of employment shall be contingent upon the employee’s satisfactory completion of background and drug tests to the extent permitted under applicable Law, made in accordance with applicable Laws and otherwise on terms consistent with the provisions of this Section 5.8. Those Selected Non-Represented Employees who accept such offer of employment are referred to herein as the “**Non-Represented Transferred Employees**.” Buyer will provide Seller a list of the Non-Represented Transferred Employees prior to the Closing. Effective immediately before Closing, Seller will terminate the employment of all Non-Represented Transferred Employees.

(ii) The Parties acknowledge and agree that, pursuant to the Settlement Agreement and New Hampshire RSA 369-B:3-b, the Non-Represented Transferred Employees are entitled to employee protections no less than those set forth in the Generation CBA with respect to the Represented Transferred Employees. As required by the Settlement Agreement, Buyer shall, from and after Closing, assume and comply with those employee protection obligations with respect to the Non-Represented Transferred Employees as required by New Hampshire RSA 369-B:3-b as set forth in Section 5.8(c)(iii), Section 5.8(d), Section 5.8(e) and Section 5.8(g) herein.

(iii) Continuing from Closing through no sooner than the end of the CBA Term, Buyer shall maintain an overall benefit package for the Non-Represented Transferred Employees that has an aggregate value at least as favorable as the overall benefit package provided to each such Non-Represented Transferred Employee immediately prior to the Closing and shall provide to each Non-Represented Transferred Employee vacation, holiday and sick leave benefits that are as favorable as such benefits provided to them immediately prior to Closing. Seller shall cooperate and consult in good faith with Buyer in structuring its proposed benefits during the Interim Period.

(d) Service Credit. With respect to benefits accruing during the CBA Term, Buyer shall recognize and apply each Transferred Employee’s prior service with Seller toward any eligibility and vesting under the Employee Benefits Plans and other compensation arrangements of Buyer and, in the case of Represented Transferred Employees, any other plans established to provide benefits described in the Generation CBA and in the case of Non-Represented Transferred Employees in Seller’s policies or plans, if any, that may become applicable to Non-Represented Transferred Employees. Buyer shall vest each Transferred Employee under the Employee Benefits Plans of Buyer to the extent such employee is vested under the Employee Benefits Plans of Seller (or its applicable Affiliates) immediately prior to the Closing, provided that all vacation, personal and sick days accrued by each Transferred Employee under the plans, policies, programs and arrangements of Seller (or its applicable Affiliates) immediately prior to the Closing shall not be a cost to Buyer, but shall be paid as provided in Section 5.8(f). Buyer shall waive all limitations with respect to preexisting conditions, exclusions based on health status and waiting periods with respect to participation and coverage requirements under Buyer’s health and welfare plans. Except as provided in this Section 5.8(d), Seller shall be solely responsible for all Liabilities including any applicable termination pay, severance pay, accrued wages or salary, accrued bonus and/or incentive pay (whether or not such bonus or incentive compensation is subject to any continued service requirement), accrued vacation and sick time, as well as any other benefits, created or owing as a consequence of the employment on or before the Closing Date of any Transferred Employee, or the cessation of any Scheduled Employee’s employment on or before the Closing Date, including (i) all Liabilities under any Employee Benefit Plan maintained by Seller and any Liabilities resulting from any deficiency in the administration or funding of any such plan, (ii) all claims for health care and other welfare benefits, including any workers’ compensation claims, (iii) COBRA continuation coverage requirements, (iv) any and all Liabilities with respect to any employees who are not Transferred Employees, and (v) any and all Liabilities accruing from the CBA MOA.

(e) Pension and Retirement Benefits.

(i) Employees Participating in Seller’s Defined Benefit Pension Plan.

(A) As soon as practicable after the Effective Date, Buyer shall take all necessary and appropriate action to establish and maintain a tax qualified retirement plan (“**Buyer’s Retirement Plan**”) for Transferred Employees who currently participate in Seller’s defined benefit pension plan in accordance with this Section 5.8(e). Seller shall cooperate and consult in good faith with Buyer in structuring Buyer’s Retirement Plan during the Interim Period, and Seller shall further take commercially reasonable actions as are reasonably requested by Buyer to ensure compliance of the Buyer’s Retirement Plan with the Settlement Agreement and the Generation CBA.

(B) For purposes of this Section 5.8(e)(i), the term “**Combined Minimum Pension Benefit**” means, for any such Transferred Employee, the Transferred Employee’s total pension benefit as calculated as of the earlier of (i) such Transferred Employee’s retirement date and (ii) the end of the CBA Term, using (A) the pension benefit formula under the Eversource Pension Plan (“**Seller’s Pension Plan**”) applicable to such Transferred Employee as of the Closing Date, as adjusted to incorporate the provisions of the CBA MOA, (B) such Transferred Employee’s final average earnings (as specified in Seller’s Pension Plan) as of the earlier of (i) such Transferred Employee’s retirement

date and (ii) the end of the CBA Term,, taking into account compensation earned from both Seller and Buyer, (C) such Transferred Employee's total years of service with both Seller (or its applicable Affiliates and predecessors) and Buyer as of the earlier of (i) such Transferred Employee's retirement date and (ii) the end of the CBA Term, and (D) covered compensation as of the earlier of (i) such Transferred Employee's retirement date and (ii) the end of the CBA Term.

(C) For purposes of this Section 5.8(e)(i), the term "**Accrued Pension Benefit**" means, for any such Transferred Employee, the pension benefit payable to such Transferred Employee under Seller's Pension Plan at such Transferred Employee's retirement, which shall be calculated based upon (A) the pension benefit formula under the Seller's Pension Plan applicable to such Transferred Employee as of the Closing Date, as adjusted to incorporate the provisions of the CBA MOA, (B) such Transferred Employee's years of credited service with Seller (or its applicable Affiliates) as of the Closing Date, (C) such Transferred Employee's final average earnings (as specified in the Seller's Pension Plan) as of the Closing Date, and (D) such Transferred Employee's covered compensation as of the Closing Date.

(D) Upon such Transferred Employee's retirement date, Seller (or its Affiliates) shall provide each such Transferred Employee with a vested and non-forfeitable right to a pension benefit equal to such Transferred Employee's Accrued Pension Benefit.

(E) On and after Closing, and continuing through no sooner than the end of the CBA Term, Buyer shall provide each such Transferred Employee with a retirement benefit (or contributions) under Buyer's Retirement Plan with a value that is at least equal to the actuarial equivalent of the difference between such Transferred Employee's Combined Minimum Pension Benefit and such Transferred Employee's Accrued Pension Benefit (the "**Buyer's Retirement Benefit**"). For the avoidance of any doubt, such retirement benefit may be provided through Buyer's Contributory Plan or another defined contribution plan. Such Buyer's Retirement Benefit must be guaranteed to each Transferred Employee and protected from forfeiture to no less extent than an ERISA plan benefit. If any such Transferred Employee's Buyer's Retirement Benefit should be subject to Social Security and Medicare Taxes that do not apply to ERISA pension benefits, Buyer shall "gross up" such Buyer's Retirement Benefit to offset such additional Tax liability to the applicable Transferred Employee.

(F) On and after Closing, and continuing through no sooner than the end of the CBA Term, in the event that any such Transferred Employee (A) is involuntarily separated from employment as a result of layoff from Buyer (or any of its Affiliates) and (B) at the time of Closing (x) is age 50-54 and (y) whose age plus credited service equal or exceed 65 years, then Buyer shall provide to such Transferred Employee those pension and other retirement benefits described in Schedule 5.8(e)(i)(F).

(ii) Employees Participating in Seller's Contributory Retirement Plan.

(A) As soon as practicable after the Effective Date, Buyer shall take all necessary and appropriate action to establish and maintain a tax qualified contributory retirement plan ("**Buyer's Contributory Plan**") for the Transferred Employees who participate in Seller's "K-Vantage" contributory retirement plan in accordance with the provisions of this Section 5.8(e)(ii).

(B) On and after Closing and through the end of the CBA Term, Buyer (or its Affiliates) shall provide each Transferred Employee with contributions to Buyer's Contributory Plan in an amount no less than the amount such Transferred Employee would have received under Seller's "K-Vantage" contributory retirement plan, as set forth in Schedule 5.8(e)(ii)(B).

(f) Transition Matters. Effective as of the Closing, the Transferred Employees shall cease active participation in all Employee Benefit Plans of Seller (or its applicable Affiliates). Seller (or its applicable Affiliates) shall pay, in accordance with Seller's customary practice, to all Transferred Employees all accrued salary or wages, including overtime, vacation pay, all bonus or incentive pay due in connection with the 2017 and other applicable performance year(s), or other benefits to which they are entitled under the Employee Benefit Plans of Seller (or its applicable Affiliates) as of immediately prior to the Closing. For the avoidance of any doubt, Seller shall pay to Transferred Employees all bonus or incentive compensation, if any, calculated in accordance with Seller's customary practice with respect to the period prior to the Closing Date, whether or not such incentive compensation is subject to any continued service requirement. Buyer and Seller intend that the transactions contemplated by this Agreement should not constitute a separation, termination or severance of employment of any Transferred Employee for purposes of any Employee Benefit Plan that provides for separation, termination or severance benefits, and that each such Transferred Employee will have continuous employment immediately before and immediately after the Closing. All Liability and Claims relating to the employment and compensation of any Transferred Employee on and after the Closing shall be the sole responsibility of Buyer, and Buyer agrees to indemnify and hold harmless Seller, its Affiliates and their Representatives for any and all Losses incurred by Seller, its Affiliates or their Representatives

arising out of or related to Buyer's (or its Affiliate's) employment of any Transferred Employee following the Closing.

(g) Severance Benefits. Any Transferred Employee who is terminated as a result of a reduction in force or change in operational practices prior to the end of the CBA Term will be entitled to the benefits set forth in Schedule 5.8(g).

(h) WARN Act; Restructuring Activities. Seller will notify Buyer of any separations or layoffs in the 90 day period prior to the Closing Date, and agrees to timely perform and discharge all requirements under the WARN Act and under applicable similar state and local Laws for the notification of its and its Affiliates' employees arising from any "plant closing," "mass layoff," relocation, employment losses, group termination or similar event, including those arising from Buyer's election not to offer employment to Scheduled Employees or the sale of the Acquired Assets to Buyer up to and including the Closing. Buyer shall be responsible for performing and discharging all requirements under the WARN Act and under applicable similar state and local Laws for the notification of its employees, whether Transferred Employees or otherwise, arising from any "plant closing," "mass layoff," relocation, employment losses, group termination or similar event undertaken by Buyer after the Closing Date. Seller undertakes to indemnify and shall keep indemnified the Buyer and its Affiliates against all liabilities and all related costs and expenses arising from or relating to any claim brought as a result of any action of Seller or its Affiliates, including the sale of the Acquired Assets, that would cause any termination of employment or employment loss of any employees of Seller or its Affiliates that occurs prior to or as of the Closing, to (i) constitute a "plant closing," "mass layoff," relocation, employment loss, or group termination or similar event under the WARN Act or any similar state or local Law, or (ii) result in any other liability or penalty to the Buyer or its Affiliates under applicable law. Buyer will indemnify Seller for any liability under the WARN Act or any similar federal, state or local Law for any actions of Buyer or its Affiliates that would cause any termination of employment of any Transferred Employees by Buyer or its Affiliates that occurs after the Closing to (i) constitute a "plant closing," "mass layoff" or group termination or similar event under the WARN Act or any similar state or local Law, or (ii) result in any other liability or penalty to the Seller or its Affiliates under applicable law after the Closing. All severance and other costs associated with workforce restructuring activities associated with the Acquired Assets and/or the Transferred Employees subsequent to the Closing Date shall be borne solely by Buyer.

(i) Successors and Assigns. Notwithstanding anything herein to the contrary, the agreements and obligations of Buyer set forth in this Section 5.8 shall be binding upon and enforceable against any successor or assign or any other entity acquirer of Buyer, whether by sale, transfer, merger, acquisition or otherwise. Buyer shall make it a condition of any such sale, transfer, merger, acquisition or other transaction or event that any such successor or assign or other entity acquirer shall be bound by the terms of this Section 5.8.

(j) Non-solicitation. For a period of twelve (12) months following the Closing, neither Seller nor any its Affiliates shall directly or indirectly hire or solicit for hire any person who is employed by Buyer or any of its Affiliates. The foregoing, however, shall not preclude Seller or its Affiliates from making good faith generalized solicitations of employment, so long as such solicitations are not targeted to or focused on the officers or employees of Buyer or any of its Affiliates or from hiring any former employee of Buyer or any of its Affiliates who has not been employed with Buyer or its Affiliate in preceding 6 months.

(k) Hiring Commitment. Buyer will make offers of employment to at least eighty percent (80%) of the Scheduled Employees.

### **Section 5.9 ISO-NE and NEPOOL Matters.**

(a) At the Closing, Buyer shall be a member in good standing in NEPOOL or otherwise have sufficient authority to sell the Facilities' electrical output into the wholesale market. Except as required to preserve system reliability and in compliance with the requirements of the ISO-NE or NEPOOL, and as may be otherwise provided in any Related Agreement, following Closing, Seller shall not interfere with Buyer's efforts to expand or modify generation capacity at any of the Sites.

(b) Not less than five (5) Business Days prior to the Closing Date, Buyer shall initiate, and Seller shall confirm, with ISO-NE Buyer's acquisition of the Facilities from Seller, to be effective as of the Closing Date, pursuant to the CAMS User Guide for Company and Affiliate Maintenance, Version 1.4, Section 2.3.15, Asset Ownership Share Transfers. In the event that ISO-NE (or NEPOOL) does not recognize until after the Closing Buyer's acquisition of the Facilities as of the Closing Date (or recognizes such acquisition effective as of any date other than the Closing Date), the Parties agree that (i) any proceeds received by Seller or its Affiliates from ISO-NE (or NEPOOL) after Closing relating to Buyer's ownership of the Facilities on and after the Closing Date shall be promptly paid over to Buyer, and (ii) any proceeds received by Buyer or its Affiliates from ISO-NE (or NEPOOL) after Closing relating to Seller's ownership of the Facilities prior to the Closing Date shall be promptly paid over to Seller. The Parties further agree that (x) any amounts received by Buyer or its Affiliates from ISO-NE after the Closing respecting the Facilities, to the extent attributable to any period prior to the Closing, including (A) ISO-NE Winter Reliability Program revenues attributable to any period prior to the Closing, and (B) ISO-NE Forward Capacity Market capacity payments attributable to any period prior to the Closing, shall be promptly paid over to Seller; and (y) any amounts received by Seller or its Affiliates from ISO-NE after Closing respecting the Facilities, to the extent attributable to any period on and after the Closing, including (A) ISO-NE Winter Reliability Program revenues

attributable to any period on and after the Closing and (B) ISO-NE Forward Capacity Market capacity payments attributable to any period on and after the Closing, shall be promptly paid over to Buyer. Any payment required to be made by a Party pursuant to this Section 5.9(b) shall be made to the other Party by wire transfer of immediately available funds to the account designated in writing by such other Party.

(c) The Parties shall cooperate and provide reasonable assistance in connection with any Potential Qualified Capacity Reduction or Potential Qualified Capacity Increase dispute or correction related thereto, whether prior to or following the Closing; *provided, however*, Buyer shall not be required to incur any cost or expense outside of the ordinary course in connection with such cooperation or assistance.

(d) Seller agrees that it shall promptly notify Buyer in writing of the receipt of notice from ISO-NE determining a Qualified Capacity Reduction for any Facility.

(e) If the Closing has not occurred prior to January 1, 2018, Seller and Buyer will cooperate to bid the Facilities into the ISO-NE forward capacity market to the extent such cooperation is allowed by FERC and ISO-NE.

**Section 5.10 Post-Closing Operations.** As required by the Settlement Agreement, Buyer hereby covenants and agrees that Buyer shall (and shall cause any successor or assign of Buyer to) cause the Facilities to remain in service for a minimum of eighteen (18) months following the Closing Date.

#### **Section 5.11 Post-Closing Environmental Matters.**

(a) On and after the Closing Date, with respect to Environmental Liabilities which constitute Excluded Environmental Liabilities, Buyer will (i) use commercially reasonable efforts not to prejudice or impair Seller's rights under the Environmental Laws or interfere with Seller's ability to contest in appropriate administrative, judicial or other proceedings its Liability, if any, for Environmental Claims or Remediation, and (ii) provide reasonable access to Seller to any Facility for purposes of (x) assisting in Seller's ability to contest its Liability, if any, for Environmental Claims or Remediation or (y) undertaking Remediation; *provided, however*, such access may not unreasonably interfere with ordinary business operations of any Facility. Until such time as Seller's obligations for Excluded Environmental Liabilities are extinguished and only to the extent relevant to those Environmental Liabilities which constitute Excluded Environmental Liabilities, (A) Buyer further agrees to provide to Seller draft copies of all plans and studies prepared in connection with any Site investigation or Remediation related to the Acquired Assets prior to their submission to the Governmental Authority with jurisdiction under Environmental Laws, (B) Seller shall have the right, without the obligation, to attend all meetings between Buyer, its Representatives, and such Governmental Authorities, and (C) Buyer shall promptly provide to Seller copies of all written information, plans, documents and material correspondence submitted to or received from such Governmental Authorities relating to Buyer's discharge of any Environmental Liabilities assumed pursuant to this Agreement.

(b) Buyer shall provide Seller with reasonable advance written notice before commencing any Dig Activities prior to the Excluded Environmental Liability Termination Date.

**Section 5.12 Transfer Taxes; Expenses.** Notwithstanding any other provision of this Agreement to the contrary, in accordance with New Hampshire Law and custom, Buyer and Seller shall in good faith determine the amount and at Closing each pay fifty percent (50%) of all Transfer Taxes that may be imposed upon, or payable, collectible or incurred in connection with the transfer of the Acquired Assets to Buyer or otherwise in connection with the transactions contemplated by this Agreement and the Related Agreements. Except as provided in Section 2.10(m), Buyer shall, at its own expense, prepare and timely file all Tax Returns relating to any such Transfer Tax (and Seller shall cooperate with respect thereto as reasonably necessary, including by preparing, executing and providing its Tax Return to Buyer, or by joining in the execution of any such Tax Returns if required by applicable Law), shall notify Seller when such filings have been made and shall provide Seller with copies of all Forms CD-57-S.

#### **Section 5.13 Tax Matters.** Except as provided in Section 5.12 relating to Transfer Taxes:

(a) With respect to Taxes to be prorated in accordance with Section 2.7 of this Agreement, Buyer shall prepare and timely file all Tax Returns required to be filed after the Closing with respect to the Acquired Assets, if any, and Buyer shall duly and timely pay all such Taxes shown to be due on such Tax Returns (or shall reimburse Seller for any such Taxes paid by Seller). Buyer's preparation of any such Tax Returns shall be subject to Seller's review and comment, and Buyer shall consider in good faith any comments received from Seller. No later than twenty (20) Business Days prior to the due date of any such Tax Return, Buyer shall make such Tax Return available for Seller's review and comment. Buyer shall respond no later than five (5) Business Days prior to the due date for filing such Tax Return. Without the prior written consent of Seller, Buyer will not (i) file or amend any Tax Return relating to any taxable period ending on or prior to the Closing Date, or to any taxable period beginning before the Closing Date and ending after the Closing Date, or any portion thereof or (ii) extend or waive, or cause to be extended or waived, any statute of limitations or other period for the assessment of any Tax or deficiency related to any such taxable period (or portion thereof), in each

case for Tax Returns related to the Acquired Assets.

(b) Whenever any Taxing Authority asserts a claim, makes an assessment, or otherwise disputes the amount of Taxes relating to any taxable period ending on or prior to the Closing Date, or to any taxable period beginning before the Closing Date and ending after the Closing Date, or any portion thereof, Buyer shall, upon receipt of such assertion, promptly, but no later than thirty (30) days thereafter, inform Seller in writing of such assertion. With respect to proceedings that relate solely to Taxes that represent Excluded Liabilities and to any proceedings described on Schedule 3.10, Seller shall have the sole right to control any such proceedings and to determine whether and when to settle any such claim, assessment or dispute; *provided, however*, that Seller shall not settle any Tax controversies in a manner that would reasonably be expected to affect the Tax Liabilities of Buyer or any of its Affiliates in a material manner for any taxable year or period ending after the Closing Date without the prior written consent of Buyer. With respect to proceedings that relate to Taxes that represent Assumed Liabilities, Buyer shall have the sole right to control any such proceedings and determine whether and when to settle any such claim, assessment or dispute; *provided, however*, that Buyer shall not settle any Tax controversies in a manner that would reasonably be expected to affect the Tax Liabilities of Seller or any of its Affiliates in a material manner for any taxable year or period without the prior written consent of Seller. Each of Buyer and Seller shall provide the other with such assistance and cooperation as may reasonably be requested by the other Party in connection with the preparation of any Tax Return, any audit or other examination by any Taxing Authority, or any judicial or administrative proceedings relating to Liability for Taxes. Such assistance and cooperation shall include the retention and (upon the other Party's request) the provision of records and information that are reasonably relevant to any such audit, litigation or other proceeding and making employees available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and each will retain and provide the requesting Party with any records or information until the expiration of the statute of limitations (and, to the extent notified by the other Party, any extensions thereof) of the respective taxable periods which may be relevant to such Tax Return, audit or examination, proceedings or determination.

**Section 5.14 Further Assurances.** At any time and from time to time after the Closing, at the reasonable request of a Party and without further consideration, the other Party will or will cause its Affiliates to execute and deliver such instruments of sale, transfer, conveyance, assignment, assumption and confirmation and take such actions as the Parties may reasonably agree are necessary to transfer, convey and assign to Buyer, and to confirm Buyer's title to or interest in the Acquired Assets and assumption of and obligation with respect to the Assumed Liabilities, to put Buyer in actual possession and operating control of the Acquired Assets, and otherwise to consummate and give effect to the transactions contemplated by this Agreement. For avoidance of doubt, in the event that any asset that is an Acquired Asset shall not have been conveyed to Buyer at the Closing, Seller shall, subject to Section 5.3, use its commercially reasonable efforts to convey such asset to Buyer as promptly as is practicable after the Closing.

#### **Section 5.15 Schedule Modifications During the Interim Period and Updates.**

(a) Schedule Modifications. The Parties acknowledge and agree that Schedule 1.1-PL (solely with respect to matters that are or may be disclosed in any Title Commitment or any additional title insurance commitments obtained by Seller or Buyer pursuant to this Agreement, provided that any such disclosed matter will not be deemed to be a "Permitted Lien" under this Agreement without the Buyer's consent, not to be unreasonably withheld), Schedule 2.1(a), Schedule 2.1(c), Schedule 2.1(e), Schedule 2.1(g), Schedule 2.2(a), Schedule 2.2(b), Schedule 3.3, Schedule 3.6 (and upon such agreed upon modification based on updated title commitments, such updated title commitments shall become the "Title Commitments"), Schedule 3.7(b-1) and Schedule 3.7(b-2) are not final and in each case are subject to review and reasonable modifications requested in good faith by the Parties during the Interim Period. The Parties will cooperate in good faith during the Interim Period in connection with any requested modifications to such Schedules and to finalize Schedule 2.1(a) to effect the transactions contemplated by this Agreement, including the Related Agreements. For the avoidance of doubt, any modifications to the Schedules pursuant to this Section 5.15(a) are not intended to and shall not be made in order to cure any Party's breach as of the Effective Date or the Closing Date of a representation or warranty, but such modifications may be made to allow the Parties to finalize the Related Agreements and Schedule 2.1(a) in good faith and in accordance with the terms and conditions of this Agreement, and to confirm that the Acquired Assets constitute all of the assets intended to be transferred to Buyer in accordance with this Agreement.

(b) Schedule Updates. During the Interim Period, Seller shall supplement or amend the Schedules hereto with respect to any matter (regardless of whether such matter arose prior to, on or after the date hereof) if necessary to remedy any inaccuracy of any representation or warranty of Seller (each, a "**Schedule Update**"); *provided* that, except as specifically provided in this Section 5.15(b), no Schedule Update shall be deemed to be incorporated into or to supplement, amend or modify the Schedules. If Seller notifies Buyer that such event, development or occurrence which is the subject of the Schedule Update arose after the Effective Date and was not the result of a breach of this Agreement by Seller and constitutes a Material Adverse Effect, then Buyer shall have the right to terminate this Agreement without any penalty whatsoever. If Buyer has the right to, but does not elect to terminate this Agreement and the Closing occurs, then (i) Buyer shall be deemed to have irrevocably waived any right to terminate this Agreement with respect to the matters specifically set forth in such Schedule Update that constituted or otherwise had a Material Adverse Effect, (ii) such Schedule Update shall be deemed to be incorporated into and to supplement, amend and modify the Schedules, and (iii) Buyer shall have irrevocably waived its rights to indemnification under Section 7.2 solely with respect to the matters specifically set forth in

such Schedule Update. For purpose of clarity, Buyer and the Seller acknowledge and agree that any Schedule Update that reflects an event, development or occurrence that either (A) occurred prior to the Effective Date and should have been set forth on the Schedules as of the execution of this Agreement or (B) that does not give Buyer the right to terminate this Agreement for failure to satisfy the closing condition set forth in Section 6.1(a) or otherwise pursuant to this Agreement shall be deemed to have been provided for information purposes only, shall not be deemed to cure any breach of this Agreement or affect the conditions to Closing or Buyer's indemnification rights set forth in this Agreement. In the event Buyer determines in good faith that any such Schedule Update, or prior Schedule Updates in the aggregate, could reasonably be expected to result in the incurrence by Buyer of Losses in excess of one percent (1.00%) of the Base Purchase Price, Buyer shall notify Seller of such determination within twenty (20) days of receipt of such Schedule Update from Seller, and the Parties shall negotiate in good faith an equitable adjustment to the Base Purchase Price to account for such Losses. Buyer will have the right to terminate this Agreement without any liability whatsoever if the aggregate of all such Losses equal or exceeds ten percent (10%) of the Base Purchase Price. In the event Buyer fails to deliver such determination to Seller within such twenty (20) day period, the Parties agree that no such equitable adjustment shall be made in respect of such Schedule Update.

**Section 5.16 Casualty.** If any material Acquired Asset is damaged or destroyed by a casualty loss during the Interim Period (a "**Casualty Loss**"), Seller shall promptly give Buyer written notice thereof, including reasonable details regarding the Casualty Loss, the amounts recoverable from insurance, any deductible for which Seller or any of its Affiliates would be required to pay out-of-pocket and any other information related to the costs and sources of repayment to restore such Casualty Loss. Upon receipt of such notice, Buyer will have the right, in its sole discretion, to (a) require Seller to restore such damaged or destroyed Acquired Asset to a condition reasonably comparable to its condition prior to such Casualty Loss (such costs with respect to any Acquired Asset, the "**Restoration Cost**") prior to the Closing; (b) proceed to Closing without Seller restoring such damaged or destroyed Acquired Asset, in which case Buyer will be entitled to a reduction in the Purchase Price equal to the difference between the Restoration Cost less any proceeds delivered to Buyer by Seller at the Closing related to the Casualty Loss; or (c) terminate this Agreement with no penalty whatsoever if the cost to repair exceeds ten percent (10%) of the Base Purchase Price (as determined by a qualified firm mutually selected by Buyer and Seller as promptly as practicable after the date of the event of casualty). Buyer will give notice to Seller of its election within sixty (60) days after receipt from Seller of all information reasonably required by Buyer and in Seller's possession or control related to the Casualty Loss. If Buyer requires Seller to restore the Casualty Loss, Buyer and Seller will negotiate in good faith if Seller believes that an extension of the Outside Date is required.

**Section 5.17 Condemnation.** If from time to time any portion of any Acquired Asset is taken by condemnation during the Interim Period (a "**Taking**"), Seller shall promptly give Buyer written notice thereof, including reasonable details regarding the Taking and the Acquired Assets affected thereby, the amounts being paid to Seller in connection with such Taking and any other information related to the costs and sources of repayment related to the Acquired Assets affected by such Taking. If the value of the Acquired Assets affected by the Taking is less than or equal to ten percent (10%) of the Base Purchase Price and no material portion of any Facility is affected, the proceeds of the Taking will be credited against the Base Purchase Price. If the value of the Acquired Assets affected by the Taking is greater than ten percent (10%) or if a material portion of any Facility is affected (regardless of the amount at issue), Buyer will have the right, in its sole discretion, to (a) proceed to Closing, in which case Buyer will be entitled to a reduction in the Purchase Price equal to the proceeds of the Taking, or (b) terminate this Agreement with no penalty whatsoever if the cost to restore exceeds ten percent (10%) of the Base Purchase Price (as determined by a qualified firm mutually selected by Buyer and Seller as promptly as practicable after the date of the event of condemnation). Buyer will give notice to Seller of its election within sixty (60) days after receipt from Seller of all information reasonably required by Buyer and in Seller's possession or control related to the Taking.

**Section 5.18 Confidentiality.** Buyer acknowledges and agrees that the Confidentiality Agreements remain in full force and effect and, in addition, covenants and agrees to keep confidential, in accordance with the provisions of the Confidentiality Agreements, information provided to Buyer pursuant to this Agreement (including this Agreement and the Exhibits and Schedules hereto); *provided*, that from and after Closing, Buyer shall not have any obligation to maintain the confidentiality of information with respect to the Business or the Acquired Assets, but Buyer's confidentiality obligations under the Confidentiality Agreements (with respect to information concerning Seller and its Affiliates) shall otherwise continue. If this Agreement is, for any reason, terminated prior to the Closing, the Confidentiality Agreements and the provisions of this Section 5.18 shall nonetheless continue in full force and effect.

**Section 5.19 Public Announcements.** Except as otherwise expressly provided herein, each Party shall, and shall cause its Affiliates (as applicable) to, consult with the other Party regarding the timing and content of any public announcements regarding this Agreement, the Closing and the other transactions contemplated by this Agreement to the news media, financial community, any Governmental Authority, customers, suppliers or the general public. Except as otherwise provided herein, no Party or its Affiliates shall make any such public announcement without the prior written consent of the other Party, unless any such disclosure is otherwise required by Law or by the rules of a national securities exchange (in which case such Party will provide to the other Party reasonable advance notice of and an opportunity to review any such disclosure).

**Section 5.20 Mercury Removal Contract.** Seller shall be responsible for completing the scope of work set forth in the

“Scope of Work for the Abatement, Demolition and Disposal of the Mercury Vapor Power Units at Schiller Station – Rev 12.15.16” attached to and part of the Removal Contract as Exhibit E. If the Closing occurs before the Schiller Boiler Removal Completion Date, Buyer shall provide Seller, its Representatives, Removal Contractor and its subcontractors under the Removal Contract with reasonable access to Schiller Station to permit all such persons to complete such removal, but only to the extent that such access does not unreasonably interfere with the operation of Schiller Station, and subject to compliance with applicable Laws. Seller shall furnish Buyer with such information or other data related to the completion of such removal as Buyer may reasonably request, and Buyer shall cooperate with Seller and the Removal Contractor (at Seller’s expense) in connection with the completion of such removal.

## ARTICLE VI CONDITIONS TO CLOSING

**Section 6.1 Buyer’s Conditions to Closing.** The obligation of Buyer to consummate the transactions contemplated by this Agreement is subject to the fulfillment, at or prior to Closing, of each of the following conditions (except to the extent waived in writing by Buyer):

(a) Representations and Warranties. (i) The representations and warranties (other than the Seller Fundamental Warranties, which are addressed in clause (ii) below) made by Seller in Article III hereof (without giving effect to any materiality or Material Adverse Effect qualifiers contained therein) shall be true and correct on the Closing Date as though made on and as of the Closing Date, except (x) for changes expressly permitted or contemplated hereby, (y) representations and warranties that address matters only as of a specified date, which shall be true and correct as of such specified date, subject to the immediately following clause (z), or (z) where the failure to be so true and correct would not individually or in the aggregate have or would not reasonably be expected to have a Material Adverse Effect, or would not have a material adverse effect on Seller’s ability to consummate the transactions contemplated by this Agreement or the Related Agreements. (ii) The Seller Fundamental Warranties shall be true and correct in all material respects on the Closing Date as though made on and as of the Closing Date, except for changes expressly permitted Section 5.15(a) with respect to Section 3.6. (iii) Notwithstanding anything contained herein to the contrary, to the extent any inaccuracy in any representation or warranty of Seller that, individually or in the aggregate with any other such inaccuracy, results in or creates or could reasonably be expected to result in or create a Loss or Claim in excess of ten percent (10%) of the Base Purchase Price, the conditions of this Section 6.1(a) shall be deemed to be not fulfilled.

(b) Title Commitments. Receipt of title commitments for each Facility, each in form and substance reasonably satisfactory to Buyer, and such that the only condition to the issuance of Title Policies from such title commitments is the payment of the title insurance premiums.

(c) Performance. Seller shall have performed and complied, in all material respects, with all agreements, covenants and obligations required by this Agreement to be performed or complied with by Seller at or before the Closing.

(d) Officer’s Certificate. Seller shall have delivered to Buyer at the Closing a certificate of an authorized officer of Seller, dated as of the Closing Date, stating that the conditions set forth in Section 6.1(a) and Section 6.1(c) have been satisfied.

(e) Consents. The Seller Required Consents and the Buyer Required Consents marked with an asterisk on Schedule 3.3 and Schedule 4.3 shall have been duly obtained, made or given and shall be in full force and effect, all appeal, reconsideration, rehearing or other time periods relating to the finality of all such Consents have expired with no appeals, motions for reconsideration, or rehearing shall have been made or exist or, if any such matters shall exist, they have been finally determined to the reasonable satisfaction of Buyer, and all terminations or expirations of waiting periods imposed by any Governmental Authority with respect thereto (including under the HSR Act) shall have occurred.

(f) No Injunctions. On the Closing Date, there shall be no Laws in effect that operate to restrain, enjoin or otherwise prevent or make illegal the consummation of the transactions contemplated by this Agreement.

(g) Deliveries. Seller shall have delivered or shall stand ready to deliver all of the certificates, instruments, agreements, documents and other items specified to be delivered by it hereunder, including pursuant to Section 2.10.

**Section 6.2 Seller’s Conditions to Closing.** The obligation of Seller to consummate the transactions contemplated by this Agreement is subject to the fulfillment, at or prior to Closing, of each of the following conditions (except to the extent waived in writing by Seller):

(a) Representations and Warranties. (i) The representations and warranties (other than the Buyer Fundamental Warranties, which are addressed in clause (ii) below) of Buyer set forth in Article IV hereof (without giving effect to any materiality qualifiers contained therein) shall be true and correct in all respects on the Closing Date as though made on and as of the Closing Date except (x) for changes expressly permitted or contemplated hereby, (y) in the case of representations and warranties that address

matters only as of a specified date, on and as of such specified date, subject to the immediately following clause (z), or (z) where the failure to be so true and correct would not reasonably be expected to have a material adverse effect on the ability of Buyer to consummate the transactions contemplated by this Agreement and the Related Agreements. (ii) The Buyer Fundamental Warranties shall be true and correct in all material respects on the Closing Date as though made on and as of the Closing Date.

(b) Performance. Buyer shall have performed and complied, in all material respects, with all agreements, covenants and obligations required by this Agreement to be performed or complied with by Buyer at or before the Closing.

(c) Officer's Certificate. Buyer shall have delivered to Seller at the Closing a certificate of an authorized officer of Buyer, dated as of the Closing Date, stating that the conditions set forth in Section 6.2(a) and Section 6.2(b) have been satisfied.

(d) Consents. The Seller Required Consents and the Buyer Required Consents marked with an asterisk on Schedule 3.3 and Schedule 4.3 shall have been duly obtained, made or given and shall be in full force and effect, and all terminations or expirations of waiting periods imposed by any Governmental Authority with respect thereto (including under the HSR Act) shall have occurred.

(e) No Injunctions. On the Closing Date, there shall be no Laws in effect that operate to restrain, enjoin, prohibit or otherwise prevent or make illegal the consummation of the transactions contemplated by this Agreement.

(f) Deliveries. Buyer shall have delivered or shall stand ready to deliver all of the certificates, instruments, agreements, documents and other items specified to be delivered by it hereunder, including pursuant to Section 2.11.

(g) Closing Purchase Price. Buyer shall have delivered the Closing Purchase Price in accordance with Section 2.5.

## ARTICLE VII INDEMNIFICATION; LIMITATIONS OF LIABILITY AND WAIVERS

**Section 7.1 Survival.** Subject to the limitations and other provisions of this Agreement, including Section 7.4, (a) the Seller Fundamental Warranties and the Buyer Fundamental Warranties shall survive the Closing and remain in full force and effect indefinitely; (b) each of the Tax and HR Warranties shall survive until the expiration of all applicable statutes of limitation with respect to claims for breach of any such Tax and HR Warranty; (c) the representation and warranty in Section 3.7(a) shall survive the Closing and shall remain in full force and effect for a period of five (5) years following the Closing Date; and (d) all other representations and warranties of Seller set forth in Article III and all other representations and warranties of Buyer set forth in Article IV shall survive the Closing and shall remain in full force and effect for a period of twelve (12) months following the Closing Date. The covenants and agreements of the Parties contained in this Agreement to be performed on or prior to the Closing shall expire at the Closing and have no further force or effect, and the covenants and agreements of the Parties contained in this Agreement that by their terms survive the Closing or contemplate performance after the Closing shall survive for the period set forth therein or otherwise until fully performed. The indemnification obligations of any Party pursuant to this Article VII with respect to any breach of a representation or warranty hereunder shall terminate upon the expiration of such representation or warranty as set forth in this Section 7.1.

**Section 7.2 Indemnification by Seller.** Subject to the other provisions of this Article VII, from and after the Closing, Seller shall indemnify, defend and hold harmless Buyer, its Affiliates and their respective Representatives (collectively, the “**Buyer Indemnified Parties**”) from and against all Losses suffered or incurred by a Buyer Indemnified Party resulting or arising from:

(a) Any breach of any representation or warranty of Seller contained in this Agreement that survives the Closing as specified in Section 7.1;

(b) Any breach of any covenant or agreement of Seller contained in this Agreement that survives the Closing as specified in Section 7.1; or

(c) Any Excluded Liability, excluding from this indemnity obligation (i) any Excluded Environmental Liability that has become an Assumed Liability pursuant to Section 2.4(i) and (ii) any Environmental Liability resulting from Buyer's Dig Activities.

**Section 7.3 Indemnification by Buyer.** Subject to the other provisions of this Article VII, from and after the Closing, Buyer shall indemnify, defend and hold harmless Seller, its Affiliates and their respective Representatives (collectively, the “**Seller Indemnified Parties**”) from and against all Losses suffered or incurred by a Seller Indemnified Party resulting or arising from:

(a) Any breach of any representation or warranty of Buyer contained in this Agreement that survives the Closing as specified in Section 7.1;

(b) Any breach of any covenant or agreement of Buyer contained in this Agreement that survives the Closing as

specified in Section 7.1;

(c) Any Assumed Liability, including within this indemnity obligation (i) any Excluded Environmental Liability that has become an Assumed Liability pursuant to Section 2.4(i) and (ii) any Environmental Liability resulting from Buyer's Dig Activities.

**Section 7.4 Certain Limitations and Provisions.** The Buyer Indemnified Party or Seller Indemnified Party, as applicable, making a claim for indemnification under this Article VII is referred to herein as the "**Indemnified Party**" and the Party against whom such claims are asserted under this Article VII is referred to as the "**Indemnifying Party**." The indemnification provided for in this Article VII shall be subject to the following limitations and other provisions:

(a) Seller shall have no liability for indemnification of any Losses under Section 7.2(a) (other than arising out of any breach of the Seller Fundamental Warranties, the Tax and HR Warranties and instances of Seller's criminal conduct or common law or statutory fraud for which, in each case, the Threshold Amount shall be zero) until the aggregate amount of all such Losses equals or exceeds one-half percent (0.5%) of the Base Purchase Price (the "**Threshold Amount**"), in which event Seller shall only be liable for Losses in excess of the Threshold Amount. Notwithstanding anything herein to the contrary, the aggregate amount of all Losses for which Seller shall be liable shall be limited as follows:

(i) Indemnification for Losses pursuant to Section 7.2(a) (excluding such Losses set forth in Section 7.4(a)(ii) and Section 7.4(a)(iii) below) shall not exceed an amount equal to ten percent (10%) of the Base Purchase Price;

(ii) Indemnification for Losses pursuant to Section 2.4(i)(A), Section 2.4(i)(B)(I) and Section 7.2(a) (to the extent relating to Seller's breach of Section 3.11(b) or Section 3.11(d)) shall not exceed Twenty-Five Million Dollars (\$25,000,000); and

(iii) Indemnification for breach of any Seller Fundamental Warranty or Tax and HR Warranty shall not exceed an amount equal to the Base Purchase Price.

Notwithstanding anything herein to the contrary, Seller shall have no liability for indemnification under Section 7.2(a) or Section 7.2(b) for Losses with respect to any individual item or set of items arising out of substantially similar facts and circumstances unless the amount of Losses with respect to such item equals or exceeds Fifty Thousand Dollars (\$50,000), and if such amount is not equaled or exceeded, none of the Losses with respect to such items will be counted toward the Threshold Amount.

(b) Buyer shall have no liability for indemnification of any Losses under Section 7.3(a) (other than arising out of any breach of the Buyer Fundamental Warranties and instances of Buyer's criminal conduct or common law or statutory fraud for which, in each case, the Threshold Amount shall be zero) until the aggregate amount of all such Losses equals or exceeds the Threshold Amount, in which event Buyer shall only be liable for Losses in excess of the Threshold Amount. Notwithstanding anything herein to the contrary, the aggregate amount of all Losses for which Buyer shall be liable pursuant to Section 7.3(a) shall not exceed an amount equal to ten percent (10%) of the Base Purchase Price, except with respect to any breach of any Buyer Fundamental Warranty, in which case Buyer's liability shall not exceed an amount equal to the Base Purchase Price. Notwithstanding anything herein to the contrary, Buyer shall have no liability for indemnification under Section 7.3(a) or Section 7.3(b) for Losses with respect to any individual item or set of items arising out of substantially similar facts and circumstances unless the amount of Losses with respect to such item equals or exceeds Fifty Thousand Dollars (\$50,000), and if such amount is not equaled or exceeded, none of the Losses with respect to such items will be counted toward the Threshold Amount, *provided, further* that Buyer shall have no liability for indemnification of any Losses incurred by Seller related to court costs, fees of attorneys, accountants, consultants and other experts, and document production in defense of Claims arising under Section 7.3(c)(i); *provided, however*, if Buyer fails to assume (and had the obligation to assume) the obligation to indemnify Seller under Section 7.3(c) for an Excluded Environmental Liability that has become an Assumed Liability, then Buyer shall reimburse Seller for those enumerated Losses.

(c) Any Indemnified Party that becomes aware of a Loss for which it seeks indemnification under this Article VII shall be required to use commercially reasonable efforts to mitigate the Loss.

(d) Losses of any Indemnified Party hereunder shall be calculated after deducting the amount of any insurance proceeds and any indemnity, contribution or other similar Third Party recoveries actually received or reasonably expected to be received by such Indemnified Party in respect of such Loss at or prior to the time of such calculation (net of the reasonable out of pocket costs and expenses associated with such recoveries and any associated increases in insurance premiums). The Indemnified Party shall use its commercially reasonable efforts to recover under insurance policies or indemnity, contribution or similar agreements for any Losses prior to seeking indemnification under this Agreement.

(e) All Losses shall be determined without duplication of recovery under any other provisions of this Agreement or any Related Agreement. Without limiting the generality of the foregoing, (i) if any fact, circumstance, condition, agreement or event

forming a basis for a claim for indemnification under this Article VII shall overlap with any fact, circumstance, condition, agreement or event forming the basis of any other claim for indemnification under this Article VII, there shall be no duplication in the calculation of the amount of Losses, and (ii) neither Seller nor Buyer shall have any liability under this Article VII for Losses relating to matters to the extent included in the calculation of the Purchase Price Adjustment in accordance with Section 2.6 or the prorations made in accordance with Section 2.7 (other than the failure to pay or credit any amounts so included).

(f) Solely for purposes of calculating Losses arising from a breach of any representation, warranty or covenant hereunder (and not for purposes of determining the existence of a breach of any representation, warranty or covenant), any materiality or Material Adverse Effect qualifications in such representation or warranty shall be disregarded.

(g) Notwithstanding anything to the contrary contained in this Agreement, the limitations on any liability or Loss set forth in this Agreement shall not apply in instances of Seller's or Buyer's, as applicable, willful misconduct, criminal conduct or common law or statutory fraud.

### **Section 7.5 Indemnification Procedures.**

(a) Third Party Claims. If any Indemnified Party receives notice of the assertion or commencement of any Claim made or brought by any Third Party (a "**Third Party Claim**") against such Indemnified Party with respect to which the Indemnifying Party is obligated to provide indemnification under this Agreement, the Indemnified Party shall give the Indemnifying Party prompt written notice thereof. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits rights or defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Third Party Claim in reasonable detail, shall include copies of all material written evidence thereof and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have the right to participate in, or by giving written notice to the Indemnified Party, to assume the defense of any Third Party Claim at the Indemnifying Party's expense and by the Indemnifying Party's own counsel, and the Indemnified Party shall cooperate in good faith in such defense. In the event that the Indemnifying Party assumes the defense of any Third Party Claim, subject to Section 7.5(b), it shall have the right to take such action as it deems necessary to avoid, dispute, defend, appeal or make counterclaims pertaining to any such Third Party Claim in the name and on behalf of the Indemnified Party. The Indemnified Party shall have the right, at its own cost and expense, to participate in the defense of any Third Party Claim with counsel selected by it, subject to the Indemnifying Party's right to control the defense thereof. If the Indemnifying Party elects not to compromise or defend such Third Party Claim or fails to promptly notify the Indemnified Party in writing of its election to defend as provided in this Agreement, the Indemnified Party may, subject to Section 7.5(b), pay, compromise or defend such Third Party Claim and, subject to the limitations set forth in this Article VII, seek indemnification for any and all Losses based upon, arising from or relating to such Third Party Claim. Seller and Buyer shall cooperate with each other in all reasonable respects in connection with the defense of any Third Party Claim, including making available (subject to the provisions of Section 5.18) information reasonably available to such Party relating to such Third Party Claim.

(b) Settlement of Third Party Claims. Notwithstanding any other provision of this Agreement, the Indemnifying Party shall not enter into settlement of any Third Party Claim without the prior written consent of the Indemnified Party (which consent shall not be unreasonably withheld or delayed), except as provided in this Section 7.5(b). If a firm offer is made to settle a Third Party Claim without leading to liability or the creation of a financial or other obligation on the part of the Indemnified Party and provides, in customary form, for the unconditional release of each Indemnified Party from all liabilities and obligations in connection with such Third Party Claim and the Indemnifying Party desires to accept and agree to such offer, the Indemnifying Party shall give written notice to that effect to the Indemnified Party. If the Indemnified Party fails to consent to such firm offer within ten (10) days after its receipt of such notice, the Indemnified Party may continue to contest or defend such Third Party Claim and in such event, the maximum liability of the Indemnifying Party as to such Third Party Claim shall not exceed the amount of such settlement offer. If the Indemnified Party fails to consent to such firm offer and also fails to assume defense of such Third Party Claim, the Indemnifying Party may settle the Third Party Claim upon the terms set forth in such firm offer to settle such Third Party Claim. If the Indemnified Party has assumed the defense pursuant to Section 7.5(a), it shall not agree to any settlement without the written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) Direct Claims. Any Claim by an Indemnified Party for indemnification on account of a Loss which does not result from a Third Party Claim (a "**Direct Claim**") shall be asserted by the Indemnified Party giving the Indemnifying Party prompt written notice thereof, and in any event within thirty (30) days after the discovery by the Indemnified Party of the circumstances giving rise to such Claim. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits rights or defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Direct Claim in reasonable detail, shall include copies of all material written evidence thereof and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have thirty (30) days after its receipt of such notice to respond in writing to such Direct Claim. During such thirty (30) day period, the Indemnified Party shall allow the Indemnifying Party and its Representatives to

investigate the matter or circumstance alleged to give rise to the Direct Claim, and whether and to what extent any amount is payable in respect of the Direct Claim, and the Indemnified Party shall assist the Indemnifying Party's investigation by giving such reasonable information and assistance (including access to the Indemnified Party's premises and personnel and the right to examine and copy any accounts, documents or records) as the Indemnifying Party or any of its professional advisors may reasonably request (subject to the provisions of Section 5.18). If the Indemnifying Party does not so respond within such thirty (30) day period, the Indemnifying Party shall be deemed to have rejected such claim, in which case the Indemnified Party shall be free to pursue such remedies as may be available to the Indemnified Party on the terms and subject to the provisions of this Agreement.

**Section 7.6 Tax Treatment of Indemnification Payments.** Unless otherwise required by applicable Law, all indemnification payments made pursuant to this Agreement will be treated as an adjustment to the Purchase Price for all Tax purposes

**Section 7.7 Waiver of Other Representations; No Reliance; "As Is" Sale.**

(a) NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY AND EXCEPT FOR THOSE REPRESENTATIONS AND WARRANTIES EXPRESSLY SET FORTH IN ARTICLE III, IT IS THE EXPLICIT INTENT OF EACH PARTY, AND THE PARTIES HEREBY AGREE, THAT NONE OF SELLER, ITS AFFILIATES OR THEIR RESPECTIVE REPRESENTATIVES HAS MADE OR IS MAKING ANY REPRESENTATION OR WARRANTY WHATSOEVER, EXPRESS OR IMPLIED, AT COMMON LAW, STATUTORY OR OTHERWISE, WRITTEN OR ORAL, WITH RESPECT TO, (I) THE ACQUIRED ASSETS, THE ASSUMED LIABILITIES, OR ANY PART THEREOF OR (II) THE ACCURACY OR COMPLETENESS OF THE INFORMATION, RECORDS, AND DATA NOW, HERETOFORE, OR HEREAFTER MADE AVAILABLE TO BUYER IN CONNECTION WITH THIS AGREEMENT AND ANY SUCH OTHER REPRESENTATIONS OR WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED. BUYER HAS NOT EXECUTED OR AUTHORIZED THE EXECUTION OF THIS AGREEMENT IN RELIANCE UPON ANY SUCH PROMISE, REPRESENTATION OR WARRANTY NOT EXPRESSLY SET FORTH HEREIN.

(b) WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, EXCEPT FOR THOSE REPRESENTATIONS AND WARRANTIES EXPRESSLY SET FORTH IN ARTICLE III, THE ACQUIRED ASSETS ARE SOLD "AS IS, WHERE IS," "WITH ALL FAULTS," AND NONE OF SELLER OR ITS AFFILIATES, NOR ANY OF THEIR RESPECTIVE REPRESENTATIVES, MAKE OR HAVE MADE, AND BUYER IS NOT RELYING ON, ANY REPRESENTATIONS OR WARRANTIES OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, AT COMMON LAW, STATUTORY OR OTHERWISE, WRITTEN OR ORAL, AS TO LIABILITIES, OPERATIONS OF THE FACILITIES, TITLE, CONDITION, VALUE OR QUALITY OF THE ACQUIRED ASSETS OR THE PROSPECTS (FINANCIAL AND OTHERWISE), RISKS OR ANY OTHER MATTERS RESPECTING THE ACQUIRED ASSETS OR ASSUMED LIABILITIES, INCLUDING, WITHOUT LIMITATION, WITH RESPECT TO (I) THE ACTUAL OR RATED GENERATING CAPABILITY OF ANY OF THE FACILITIES OR THE ABILITY OF BUYER TO SELL FROM ANY OF THE FACILITIES ELECTRIC ENERGY, CAPACITY OR OTHER PRODUCTS RECOGNIZED BY ISO-NE FROM TIME TO TIME, (II) MERCHANTABILITY, USAGE, OR SUITABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WITH RESPECT TO THE ACQUIRED ASSETS, OR ANY PART THEREOF, (III) THE WORKMANSHIP OF THE ACQUIRED ASSETS, OR THE ABSENCE OF ANY DEFECTS THEREIN, WHETHER LATENT OR PATENT, (IV) COMPLIANCE WITH ENVIRONMENTAL REQUIREMENTS RESPECTING THE ACQUIRED ASSETS, (V) WHETHER SELLER POSSESSES SUFFICIENT REAL PROPERTY OR PERSONAL PROPERTY TO OPERATE THE ACQUIRED ASSETS, OR (VI) THE PROBABLE SUCCESS OR PROFITABILITY OF OPERATING THE ACQUIRED ASSETS AFTER THE CLOSING, ALL OF WHICH ARE EXPRESSLY DISCLAIMED BY SELLER. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED HEREIN, SELLER FURTHER SPECIFICALLY DISCLAIMS ANY REPRESENTATION OR WARRANTY REGARDING THE ABSENCE OF HAZARDOUS SUBSTANCES OR LIABILITY OR POTENTIAL LIABILITY ARISING UNDER ENVIRONMENTAL LAWS. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER EXPRESSLY DISCLAIMS ANY REPRESENTATION OR WARRANTY OF ANY KIND REGARDING THE CONDITION OF THE ACQUIRED ASSETS OR THE SUITABILITY THEREOF FOR OPERATION AS POWER GENERATION FACILITIES OR AS SITES FOR THE DEVELOPMENT OF ADDITIONAL OR REPLACEMENT GENERATION CAPACITY. NO MATERIAL OR INFORMATION MADE AVAILABLE BY OR COMMUNICATIONS MADE BY SELLER, ITS AFFILIATES AND THEIR RESPECTIVE REPRESENTATIVES, THE NHPUC, OR ANY BROKER OR INVESTMENT BANKER IN EXPECTATION OF OR IN CONNECTION WITH THE TRANSACTIONS CONTEMPLATED HEREBY, INCLUDING WITHOUT LIMITATION ANY INFORMATION OR MATERIAL CONTAINED IN THE CONFIDENTIAL INFORMATION MEMORANDUM DATED AS OF MARCH 2017, ANY OTHER EVALUATION OR DUE DILIGENCE MATERIAL, THE DATA SITE, MANAGEMENT PRESENTATIONS, FUNCTIONAL "BREAK-OUT" DISCUSSIONS, OR ANY ORAL, WRITTEN OR ELECTRONIC RESPONSE TO ANY INFORMATION REQUEST MADE AVAILABLE TO BUYER, WILL CAUSE OR CREATE ANY WARRANTY, EXPRESS OR IMPLIED, AS TO THE TITLE, CONDITION, VALUE OR QUALITY OF THE ACQUIRED ASSETS OTHER THAN THOSE REPRESENTATIONS AND WARRANTIES OF SELLER EXPRESSLY SET FORTH IN ARTICLE III, AND EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER SHALL NOT HAVE OR BE SUBJECT TO ANY LIABILITY TO

BUYER RESULTING THEREFROM.

### **Section 7.8 Exclusive Remedies; Certain Waivers, Releases and Limitations.**

(a) Notwithstanding anything to the contrary set forth herein, subject to Section 8.3, from and after the Closing, the rights and remedies of the Parties under this Article VII, in Section 5.4(d) and in Section 5.8(f) shall be the exclusive rights and remedies available to any Party hereto with respect to any breach of any representation, warranty, covenant or agreement set forth in this Agreement, except in each case with respect to Losses arising from common law or statutory fraud, criminal activity or willful misconduct. Nothing in this Section 7.8(a) shall limit any Party's rights to seek and obtain any equitable relief to which such Party is entitled pursuant to Article VIII.

(b) Without limiting the provisions of Section 7.8(a), Buyer, for itself and its Affiliates, effective as of the Closing, hereby irrevocably releases, and forever discharges Seller, its Representatives and its Affiliates from any and all claims, demands, Losses, Liabilities, damages, complaints, causes of action, investigations, hearings, actions, suits or other Claims or proceedings of any kind or character whether known or unknown, hidden or concealed, arising out of or related to any Environmental Liability, except for those Excluded Environmental Liabilities but only to the extent and for so long as the same are retained by Seller pursuant to Section 2.4(h) and Section 2.4(i). In furtherance of the foregoing, effective as of the Closing, Buyer, for itself and its Affiliates, hereby irrevocably waives, with respect to any matter it is releasing pursuant to the preceding sentence, any and all rights and benefits that it now has or in the future may have conferred upon it by virtue of any Law or common law principle which provides that a general release does not extend to claims which a party does not know or suspect to exist in its favor at the time of executing such release, if knowledge of such claims would have materially affected such party's settlement with the obligor. Buyer hereby acknowledges that it is aware that factual matters now unknown to it may have given or hereafter may give rise to claims, demands, Losses, Liabilities, damages, complaints, causes of action, investigations, hearings, actions, suits or other Claims or proceedings that are unknown, unanticipated and unsuspected as of the Effective Date and will not be known, anticipated or suspected prior to the Closing Date, and Buyer further agrees that this Section 7.8(b) has been negotiated and agreed upon in light of that awareness, and Buyer, for itself and on behalf of its Affiliates, nevertheless hereby intends to irrevocably release, forever discharge Seller and its Affiliates as set forth in the first sentence of this Section 7.8(b).

(c) To the extent the transfer, conveyance, assignment and delivery of the Acquired Assets to Buyer as contemplated in this Agreement is accomplished by deeds, assignments, easements, leases, licenses, bills of sale or other instruments of transfer and conveyance, whether executed at the Closing or thereafter, these instruments are made without representation or warranty by, or recourse against, Seller, except as expressly provided in this Agreement or in any such instrument.

(d) No Representative or Affiliate of Seller shall have any personal liability to Buyer or any other Person as a result of the breach of any representation, warranty, covenant, agreement or obligation of Seller in this Agreement, and no Representative or Affiliate of Buyer shall have any personal liability to Seller or any other Person as a result of the breach of any representation, warranty, covenant, agreement or obligation of Buyer in this Agreement.

(e) NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY, NO PARTY SHALL BE LIABLE FOR SPECIAL, PUNITIVE, EXEMPLARY, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES, OR LOST OPPORTUNITY, OR ANY DAMAGES BASED ON ANY TYPE OF MULTIPLE, WHETHER BASED ON CONTRACT, TORT, STRICT LIABILITY, OTHER LAW OR OTHERWISE AND WHETHER OR NOT ARISING FROM THE OTHER PARTY'S SOLE, JOINT OR CONCURRENT NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT ("NON-REIMBURSABLE DAMAGES"), PROVIDED, THAT ANY AMOUNTS PAYABLE TO THIRD PARTIES PURSUANT TO A THIRD PARTY CLAIM SHALL NOT BE DEEMED TO CONSTITUTE NON-REIMBURSABLE DAMAGES.

## **ARTICLE VIII TERMINATION**

**Section 8.1 Termination.** This Agreement may be terminated at any time before the Closing as follows:

(a) By either Buyer or Seller, by written notice to the other, if the Closing shall not have occurred within twelve (12) months after the Effective Date, as may be extended pursuant to Section 5.16 (the "**Outside Date**"); *provided*, that (i) if the sole reason Closing has not occurred prior to the Outside Date is that one or more Consents of a Governmental Authority required to consummate the Closing pursuant to Article VI have not yet been obtained or made, and such Consents are being diligently pursued by the appropriate Party, then such Outside Date may be extended by either Party by written notice to the other Party delivered at any time before termination of this Agreement, for an additional ninety (90) days, and (ii) Buyer cannot terminate this Agreement under this provision if the failure of the Closing to occur is the result of the failure on the part of Buyer to perform any of its obligations hereunder and Seller cannot terminate this Agreement under this provision if the failure of the Closing to occur is the result of the failure on the

part of Seller to perform any of its obligations hereunder;

(b) By Seller, by written notice to Buyer if Seller is not then in material default of any of its obligations under this Agreement and Buyer has breached in any material respect any of its representations, warranties, covenants, agreements or obligations in this Agreement and such breach has not been cured within thirty (30) days following written notification thereof (*provided*, that if, at the end of such thirty (30) day period, Buyer is endeavoring in good faith, and proceeding diligently, to cure such breach, Buyer shall have an additional thirty (30) days in which to effect such cure), and such breach, if not cured, would have a material adverse effect on Buyer's ability to perform its obligations hereunder;

(c) By Buyer, by written notice to Seller if Buyer is not then in material default of any of its obligations under this Agreement and Seller has breached in any material respect any of its representations, warranties, covenants, agreements or obligations in this Agreement and (i) such breach has not been cured within thirty (30) days following written notification thereof; *provided, however*, that if, at the end of such thirty (30) day period, Seller is endeavoring in good faith, and proceeding diligently, to cure such breach, Seller shall have an additional thirty (30) days in which to effect such cure and (ii) such breach (to the extent not cured) would have a material and adverse effect on the operation of the Business, including the Acquired Assets, or would have a material and adverse effect on Seller's ability to perform its obligations hereunder;

(d) By either Buyer or Seller, by written notice to the other, if there shall be in effect any Law or final, non-appealable Order restraining, enjoining or otherwise prohibiting or making illegal the consummation of the transactions contemplated by this Agreement;

(e) By Buyer in accordance with Section 5.16 or Section 5.17;

(f) By Buyer pursuant to Section 2.6(a)(iii)(A)(2) or Section 5.15(b); or

(g) By mutual written agreement of Buyer and Seller.

## **Section 8.2 Effect of Termination; Termination Fee.**

(a) If this Agreement is validly terminated pursuant to Section 8.1, there will be no liability or obligation on the part of Seller or Buyer (or any of their respective Representatives or Affiliates), except as provided in this Section 8.2.

(b) Regardless of the reason for termination, Section 5.4(d), Section 5.18, Section 5.19, Section 7.7, Section 8.2, Section 8.2(d), Section 8.3 and Article IX (and, in each case the applicable definitions and rules of interpretation set forth in Article I) will survive any termination of this Agreement.

(c) Upon termination of this Agreement by either Party for any reason, each Party shall return or destroy, in accordance with the terms of the Confidentiality Agreements and Section 5.18, all documents and other materials provided by the other Party relating to the Acquired Assets, the Assumed Liabilities, the Facilities or to this Agreement, the Related Agreements or the transactions contemplated hereby or thereby, including any information relating to the Parties to this Agreement, whether obtained before or after the execution of this Agreement, and all information received by Buyer with respect to Seller, the Acquired Assets, the Assumed Liabilities, the Facilities, this Agreement, the Related Agreements or otherwise respecting the transactions contemplated hereby shall remain subject to the terms of the Confidentiality Agreements and Section 5.18.

(d) If this Agreement is terminated by Buyer pursuant to Section 8.1(a) (arising out of a failure of Seller to comply in all material respects with its obligations under this Agreement) or Section 8.1(c), and such failure to comply is through no fault of Buyer, and provided that Buyer has complied in all material respects with its obligations under this Agreement, Buyer shall be entitled to recover from Seller all costs incurred by Buyer in connection with the preparation, negotiation and execution of this Agreement or recovery of damages from Seller, including attorneys' fees and expenses of financial and other advisors. In addition to the foregoing damages (and not in lieu thereof), if such termination by Buyer occurs after January 1, 2018, Buyer is entitled to its loss of bargain, cost of funding or, at the election of Buyer but without duplication, loss or cost incurred as a result of its terminating, liquidating, obtaining or reestablishing any hedge or related trading position (or any gain resulting from any of them) of Buyer relating to any of the Facilities.

(e) If this Agreement is terminated by Seller pursuant to Section 8.1(a) (arising out of a failure by Buyer to pay the Purchase Price and make its other Closing deliverables under this Agreement after all of Buyer's conditions precedents to proceed to Closing have been satisfied) or Section 8.1(b), and such failure to comply is through no fault of Seller, and provided that Seller has complied in all material respects with its obligations under this Agreement, then, and in lieu of any other rights or remedies Seller may have at law or in equity, (i) Buyer hereby agrees to immediately pay to Seller, as liquidated damages (and not a penalty), an amount equal to Twenty-Six Million Two Hundred Fifty Dollars (\$26,250,000) in immediately available funds and (ii) Seller shall have the

right to immediately seek such relief from the guarantors under the Guaranty to satisfy such payment obligation. The Parties acknowledge and agree that the provisions for payment of liquidated damages in this Section 8.2(d) have been included because, in the event of termination of this Agreement pursuant to Section 8.1(a) or Section 8.1(b), the actual damages to be incurred by Seller are reasonably expected to approximate the amount of liquidated damages set forth in this Section 8.2(d) and because the actual amount of such damages would be difficult if not impossible to measure and prove precisely. The Parties therefore expressly intend to liquidate damages in advance in accordance with this Section 8.2(d), and, without limiting the generality of the foregoing, acknowledge and agree that the amount of liquidated damages set forth in this Section 8.2(d) is reasonable and is not greatly disproportionate to the presumable loss or injury of Seller in the event of termination of this Agreement pursuant to Section 8.1(a) or Section 8.1(b). Buyer acknowledges that the agreements contained in this Section 8.2(d) are an integral part of the transactions contemplated by this Agreement and that, without these agreements, Seller would not enter into this Agreement. The Parties acknowledge and agree that (A) Seller shall be entitled to pursue either payment of liquidated damages in accordance with this Section 8.2(d) or to pursue specific performance pursuant to Section 8.3 and (B) Seller may, in its sole discretion, elect to receive either an award of liquidated damages in accordance with this Section 8.2(d) or seek judgment awarding specific performance pursuant to Section 8.3; *provided*, that the Parties acknowledge and agree that under no circumstance shall Seller be entitled to receive both payment of liquidated damages in accordance with this Section 8.2(d) and specific performance pursuant to Section 8.3.

**Section 8.3 Specific Performance and Other Remedies.** Each Party hereby acknowledges and agrees that the rights of each Party to consummate the transactions contemplated hereby are special, unique and of extraordinary character, and that, if any of the provisions of this Agreement were not performed by a Party in accordance with their specific terms or were otherwise breached by a Party, the non-breaching Party would suffer irreparable damage and would be without an adequate remedy at law. Notwithstanding anything to the contrary herein, if any Party violates or fails or refuses to perform any covenant or agreement made by such Party herein, without limiting or waiving in any respect any rights or remedies of a Party under this Agreement now or hereafter existing at law, in equity or by statute, the non-breaching Party shall, in addition to any other remedy to which a Party is entitled at law or in equity, be entitled to specific performance of such covenant or agreement, injunctions to prevent or restrain breaches of this Agreement, and any other equitable relief, in each case without the proof of actual damages. Each Party agrees to waive any requirement for the security or posting of any bond in connection with any such equitable remedy, and agrees that it will not oppose the granting of an injunction, specific performance or other equitable relief on the basis that (a) the other Party has an adequate remedy at law, or (b) an award of specific performance is not an appropriate remedy for any reason at law or equity.

## ARTICLE IX MISCELLANEOUS

**Section 9.1 Expenses.** Except as otherwise expressly provided in this Agreement, including in Section 8.2, whether or not the Closing shall have occurred, each Party will pay its own costs and expenses (including, without limitation, fees and disbursements of counsel, financial advisors and accountants) incurred in anticipation of, relating to and in connection with the negotiation and execution of this Agreement and the transactions contemplated hereby. Notwithstanding the foregoing, (a) each Party will pay all filing fees for Consents of Governmental Authorities required in connection with this Agreement, the Related Agreements and the transactions contemplated hereby and thereby, including filing fees in connection with filings under the HSR Act or in connection with obtaining required Consents from FERC as set forth in this Agreement, (b) Buyer will pay all document recordation costs (including all New Hampshire County Registry of Deeds recording fees and New Hampshire Land and Community Heritage Investment Program surcharges for all deeds, mortgage indenture releases, easements, plans and other recorded documents), and (c) Seller will pay all fees, including filing and recording fees, related to the discharge and release of all Liens encumbering the Acquired Assets, excluding the Permitted Liens.

**Section 9.2 Notices.** All notices, requests, consents, waivers, demands, claims and other communications hereunder will be in writing and shall be deemed duly given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by facsimile or e-mail (in each case, with confirmation of delivery) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient; or (d) on the fifth day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the applicable Party at the address and/or other contact information for such Party set forth below (or at such other address and/or other contact information for a Party as shall be specified in a notice given in accordance with this Section 9.2):

If to Seller:           Public Service Company of New Hampshire  
                                  c/o Eversource Energy  
                                  56 Prospect Street  
                                  Hartford, Connecticut 06103

Attention: General Counsel

and

Granite Shore Power LLC  
c/o Castleton Commodities International LLC  
2200 Atlantic Street, Suite 800  
Stamford, Connecticut 06902  
Attn: General Counsel

**Section 9.3 Entire Agreement.** This Agreement (including the Exhibits and Schedules hereto), the Related Agreements and the Confidentiality Agreements constitute, as a complete and final integration thereof, the sole and entire agreement of the Parties with respect to the subject matter hereof, and supersede all prior and contemporaneous agreements (other than the Confidentiality Agreements), understandings or representations, both written and oral, between the Parties with respect to such subject matter. Except as otherwise set forth herein, all conflicts or inconsistencies between the terms hereof and the terms of any of the Related Agreements, if any, shall be resolved in favor of this Agreement.

**Section 9.4 Severability.** Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be valid, binding and enforceable under applicable Law. If any provision of this Agreement is held to be illegal, invalid or unenforceable under any present or future Law, and if the rights and obligations of any Party will not be materially and adversely affected thereby, (a) such provision will be fully severable, (b) this Agreement will be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part hereof, (c) the remaining provisions of this Agreement will remain in full force and effect and will not be affected by the illegal, invalid or unenforceable provision or by its severance herefrom and (d) in lieu of such illegal, invalid or unenforceable provision, there will be added automatically as a part of this Agreement a legal, valid and enforceable provision as similar in terms of such illegal, invalid or unenforceable provision as may be possible.

**Section 9.5 Schedules and Exhibits.** Except as otherwise provided in this Agreement, all Schedules and Exhibits referred to herein, as the same may be amended, modified or supplemented from time to time in accordance with this Agreement, are intended to be and hereby are made a part of this Agreement. Any matter set forth in any Schedule under this Agreement corresponding to or qualifying a specific numbered paragraph of this Agreement shall be deemed to correspond to and qualify any other numbered paragraph of this Agreement to which the relevance or applicability of such matter is reasonably apparent on its face, whether or not there is an explicit cross-reference thereto. Certain information set forth in the Schedules is included solely for informational and other disclosure purposes, is not an admission of liability with respect to the matters covered by the information, and may not be required to be disclosed pursuant to this Agreement. The specification of any dollar amount in any provision of this Agreement or the inclusion of any specific item in the Schedules is not intended to imply, and shall not be deemed to be an acknowledgement or admission, that such amounts (or higher or lower amounts) or items are or are not material, and shall not otherwise be deemed to establish any standard of materiality or to define further or otherwise interpret the meaning of "material," "Material Adverse Effect," or any similar terms for purposes of the Agreement. In no event shall the inclusion of any matter in these Schedules be deemed or interpreted to broaden or otherwise amplify the representations, warranties, covenants or agreements contained in this Agreement. Capitalized terms used and not otherwise defined in the Schedules shall have the meanings given to them in this Agreement.

**Section 9.6 Successors and Assigns.** This Agreement shall be binding upon and inure to the benefit of the Parties named herein and their respective successors and permitted assigns. No Party may assign either this Agreement or any of its rights, interests, or obligations hereunder without the prior written consent of the other Party. Notwithstanding the foregoing, either Party may assign its rights under this Agreement without the consent of the other Party for purposes of providing collateral security in connection with any financing. No assignment shall relieve the assigning Party of any of its obligations hereunder or thereunder. Notwithstanding the foregoing, Buyer will have the right by written notice to Seller not less than fifteen (15) days prior to the Closing to direct the transfer of Acquired Assets (but without duplication) to one or more wholly-owned subsidiaries of Buyer (each, a "**Buyer Subsidiary**") and agrees that each Buyer Subsidiary will assume in writing (a copy of which shall be provided to Seller) any Assumed Liability related to such Acquired Assets assigned to it and be liable to Seller for Buyer's obligations under this Agreement related to such Assumed Liabilities and Acquired Assets, provided that Buyer will remain liable for all obligations related to such any Assumed Liability

assumed by a Buyer Subsidiary.

**Section 9.7 No Third Party Beneficiaries.** The terms and provisions of this Agreement are intended solely for the benefit of the Parties hereto, their respective successors and permitted assigns, and any Person benefitting from the indemnities, releases or limitations of liability provided herein, and nothing herein, express or implied, is intended to or shall confer upon any other Person (including any employee, any beneficiary or dependents thereof, or any collective bargaining representative thereof) any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

**Section 9.8 No Joint Venture or Agency.** Nothing in this Agreement creates or is intended to create an association, trust, partnership, joint venture or other entity or similar legal relationship between the Parties, or impose a trust, partnership or fiduciary duty, obligation or liability on or with respect to either Party. Except as expressly provided herein, neither Party is or shall act as or be the agent or representative of the other Party.

**Section 9.9 Amendments and Waivers.** Except to the extent expressly set forth herein with respect to Schedule Updates during the Interim Period, this Agreement may not be amended, modified or supplemented except by an agreement in writing signed by each Party hereto. No waiver by any Party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the Party so waiving. No waiver by any Party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after such written waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof, nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

**Section 9.10 Governing Law.** This Agreement shall be governed by and construed in accordance with the internal laws of the state of New Hampshire without giving effect to any choice or conflict of law provision or rule (whether of the state of New Hampshire or any other jurisdiction) that would cause the application of Laws of any jurisdiction other than those of the state of New Hampshire, except to the extent that certain matters are pre-empted by federal Law or are governed by the Law of the jurisdiction of organization of any Party or other Person referred to herein.

**Section 9.11 Dispute Resolution.** Prior to instituting any litigation or dispute resolution mechanism, each of the Parties will attempt in good faith to resolve any dispute or claim promptly by referring any such matter to their respective senior executives for resolution. Either Party may give the other Party written notice of any dispute or claim. Within ten (10) days after delivery of said notice, the executives will meet at a mutually acceptable time and place, and thereafter as often as they reasonably deem necessary to exchange information and to attempt to resolve the dispute or claim within thirty (30) days.

**Section 9.12 Submission to Jurisdiction.** ANY ACTION, SUIT OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE RELATED AGREEMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY SHALL BE INSTITUTED IN THE FEDERAL OR STATE COURTS LOCATED IN THE STATE OF NEW HAMPSHIRE IN ACCORDANCE WITH THE PROVISIONS OF THIS SECTION 9.12. EACH PARTY IRREVOCABLY AND UNCONDITIONALLY CONSENTS AND DOES HEREBY SUBMIT TO THE EXCLUSIVE JURISDICTION OF THE BUSINESS AND COMMERCIAL DISPUTE DOCKET (BCDD) OF THE SUPERIOR COURT OF THE STATE OF NEW HAMPSHIRE PURSUANT TO N.H. SUPERIOR COURT CIVIL RULE 207 OR THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF NEW HAMPSHIRE FOR ANY SUCH ACTION, SUIT OR PROCEEDING, AND HEREBY FURTHER IRREVOCABLY AND UNCONDITIONALLY WAIVES AND AGREES NOT TO PLEAD IN ANY SUCH COURT THAT ANY SUCH ACTION, SUIT, OR PROCEEDING BROUGHT IN ANY SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.

**Section 9.13 Waiver of Jury Trial.** EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE RELATED AGREEMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE RELATED AGREEMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY.

**Section 9.14 Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail, PDF or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

*[Signature page follows.]*

IN WITNESS WHEREOF, the Parties have caused this Agreement to be duly executed as of the date first written above.

## PURCHASE AND SALE AGREEMENT

This PURCHASE AND SALE AGREEMENT (the “**Agreement**”), dated and effective as of October 11, 2017 (the “**Effective Date**”), is entered into by and between HSE Hydro NH AC, LLC, a Delaware limited liability company (“**Buyer**”) and Public Service Company of New Hampshire, a New Hampshire corporation (“**Seller**”). Buyer and Seller are each referred to in this Agreement as a “**Party**” and collectively as the “**Parties**.”

### RECITALS:

WHEREAS, Seller owns the electric generating facilities described in Schedule 1 hereto (collectively, the “**Facilities**”);

WHEREAS, Seller owns 1,250 shares of capital stock (the “**ARCO Shares**”) of Androscoggin Reservoir Company, a Maine corporation (“**ARCO**”); and

WHEREAS, on the terms and subject to the conditions set forth in this Agreement, Seller desires to sell and assign to Buyer, and Buyer desires to purchase and assume from Seller, (i) certain assets and liabilities respecting the Facilities, and (ii) the ARCO Shares, all as set forth herein.

NOW, THEREFORE, in consideration of the foregoing and the representations, warranties, covenants and agreements hereinafter set forth, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, hereby agree as follows:

### ARTICLE I DEFINITIONS AND INTERPRETATION

**Section 1.1 Definitions.** As used in this Agreement, the following capitalized terms have the meanings set forth below:

“**Accrued Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(C).

“**Acquired Assets**” has the meaning set forth in Section 2.1.

“**Actual Prorated Amount**” has the meaning set forth in Section 2.7(c).

“**Affiliate**” means, with respect to any Person, any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. For purposes of this definition, the term “control” (including the terms “controlled by” and “under common control with”) means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of such Person, whether through ownership of voting securities or other ownership interests, by Contract or otherwise.

“**Agreement**” has the meaning set forth in the preamble.

“**ARCO**” has the meaning set forth in the recitals.

“**ARCO By-Laws**” means the By-Laws of ARCO, dated as of January 25, 1985.

“**ARCO ROFR**” means the right of ARCO and its stockholders to purchase the ARCO Shares pursuant to Article VII of the ARCO By-Laws.

“**ARCO Shares**” has the meaning set forth in the recitals.

“**Asset Demarcation Agreement**” has the meaning set forth in Section 2.10(e).

“**Assigned Contracts**” has the meaning set forth in Section 2.1(e).

“**Assigned Intellectual Property**” has the meaning set forth in Section 2.1(g).

“**Assigned Leases**” has the meaning set forth in Section 2.1(b).

“**Assignment and Assumption Agreement**” has the meaning set forth in Section 2.10(d).

“**Assignment and Assumption of Lease**” has the meaning set forth in Section 2.10(b).

“**Assumed Liabilities**” has the meaning set forth in Section 2.3.

“**Base Purchase Price**” has the meaning set forth in Section 2.5.

“**Bill of Sale**” has the meaning set forth in Section 2.10(c).

“**Business**” means the production and sale of power through the ownership and operation of the Acquired Assets.

“**Business Day**” means any day other than a Saturday, Sunday or day on which banks are legally closed for business in Manchester, New Hampshire or New York, New York.

“**Buyer**” has the meaning set forth in the preamble.

“**Buyer Indemnified Parties**” has the meaning set forth in Section 7.3.

“**Buyer Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(E).

“**Buyer Required Consents**” has the meaning set forth in Section 4.3(c).

“**Buyer’s Observers**” has the meaning set forth in Section 5.4(b).

“**Buyer’s Contributory Plan**” has the meaning set forth in Section 5.8(e)(ii)(A).

“**Buyer’s Pension Plan**” has the meaning set forth in Section 5.8(e)(i)(A).

“**CAMS**” means ISO-NE’s Customer and Asset Management System.

“**Cash**” means cash and cash equivalents (including marketable securities and short term investments) calculated in accordance with GAAP.

“**Casualty Loss**” has the meaning set forth in Section 5.16.

“**CBA Term**” means June 1, 2017 through the later of May 31, 2020 or two years after the Closing Date.

“**Claim**” means any claim, demand, complaint, action, legal proceeding (whether at law or in equity), arbitration, investigation, audit or suit commenced, brought, conducted or heard by or before any Governmental Authority or arbitrator.

“**Closing**” has the meaning set forth in Section 2.9.

“**Closing Date**” has the meaning set forth in Section 2.9.

“**Closing Purchase Price**” has the meaning set forth in Section 2.5.

“**Closing Statement**” has the meaning set forth in Section 2.6(c)(i).

“**Code**” means the Internal Revenue Code of 1986.

“**Combined Minimum Pension Benefit**” has the meaning set forth in Section 5.8(e)(i)(B).

“**Condemnation Value**” has the meaning set forth in Section 5.17.

“**Confidentiality Agreement**” means that certain Confidentiality Agreement between Seller and Hull Street Energy, LLC, a Delaware limited liability company, dated as of March 15, 2017.

“**Consent**” means any consent, authorization, approval, release, waiver, estoppel certificate or any similar agreement or approval of or by, or registration, notice, declaration or filing to or with, the applicable Governmental Authority or other Person, including any certificate, license, permit, Order or other action issued or taken by a Governmental Authority.

“**Contract**” means any legally binding contract, lease, mortgage, license, instrument, note or other evidence of indebtedness, purchase order, commitment, undertaking, indenture or other agreement.

“**Counterparty**” has the meaning set forth in Section 5.3(a).

“**Data Site**” means the “Project PurpleFinch” electronic data site established and maintained by Seller with IntraLinks, Inc.

“**Deed**” has the meaning set forth in Section 2.10(a).

“**Direct Claim**” has the meaning set forth in Section 7.6(c).

“**Easements**” means easements to be granted by Seller to Buyer to implement the easement plans with respect to the Facilities to be agreed to by Buyer and Seller in accordance with Section 5.2(f).

“**Effective Date**” has the meaning set forth in the preamble.

“**Employee Benefit Plan**” means any “employee benefit plan” (as such term is defined in Section 3(3) of ERISA), whether or not subject to ERISA, and any other employee benefit plan, program, policy or Contract, including any employment, pension, retirement, profit-sharing, thrift, savings, bonus plan, incentive, stock bonus, stock purchase, stock option or other equity or equity-based compensation, or retention, change in control, severance, deferred compensation, welfare benefit or fringe benefit plan, policy, program, agreement or arrangement.

“**Environment**” means soil, land surface or subsurface strata, real property, surface waters, groundwater, wetlands, sediments, drinking water supply, ambient air (including indoor air) and any other environmental medium or natural resource.

“**Environmental Attributes**” means any emissions and renewable energy credits, energy conservation credits, benefits, offsets and allowances, emission reduction credits or items of similar import or regulatory effect (including emissions reduction credits or allowances under all applicable emission trading, compliance or budget programs, or any other federal, state or regional emission, renewable energy or energy conservation trading or budget program) that are held by Seller and attributable to the operation of the Facilities.

“**Environmental Claim**” means any Claim by any Person alleging Liability of whatever kind or nature (including with respect to loss of life, injury to persons, property or business, damage to natural resources or trespass to property, whether or not such loss, injury, damage or trespass arose or was made manifest before the Closing Date or arises or becomes manifest on or after the Closing Date) arising out of, resulting from or in connection with: (a) the presence, Release of, or exposure to, any Hazardous Substances or (b) any actual or alleged violation or non-compliance with any Environmental Law or term or condition of any Environmental Permit.

“**Environmental Laws**” means all applicable Laws, Orders and any binding administrative or judicial interpretations thereof (including any binding agreement with any Governmental Authority) relating to: (a) pollution (or the cleanup thereof); (b) the regulation, protection and use of the Environment; (c) the protection, conservation, management, development, control and/or use of land, natural resources and wildlife (including endangered and threatened species); (d) the protection of human health or safety; (e) the management, manufacture, possession, presence, processing, use, generation, transportation, treatment, containment, storage, disposal, recycling, reclamation, Release, threatened Release, abatement, removal, remediation, or handling of, or exposure to, any Hazardous Substances; or (f) noise; and includes, without limitation, the following federal statutes (and their implementing regulations): the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986 (42 U.S.C. § 9601 et seq.); the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments Act of 1984 (42 U.S.C. § 6901 et seq.); the Federal Water Pollution Control Act of 1972, as amended by the Clean Water Act of 1977 (33 U.S.C. § 1251 et seq.); the Toxic Substances Control Act of 1976, as amended (15 U.S.C. § 2601 et seq.); the Emergency Planning and Community Right to Know Act of 1986 (42 U.S.C.

§ 11001 et seq.); the Clean Air Act of 1966, as amended by the Clean Air Act Amendments of 1990 (42 U.S.C. § 7401 et seq.); the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. § 136 et seq.); the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1451 et seq.); the Oil Pollution Act of 1990, as amended (33 U.S.C. § 2701 et seq.); the Rivers and Harbors Act of 1899, as amended (33 U.S.C. § 401 et seq.); the Hazardous Materials Transportation Act, as amended (49 U.S.C. §§ 5101 et seq.); the Endangered Species Act of 1973, as amended (16 U.S.C. § 1531 et seq.); the Occupational Safety and Health Act of 1970, as amended (29 U.S.C. § 651 et seq.); and the Safe Drinking Water Act of 1974, as amended (42 U.S.C. § 300f et seq.); and all analogous or comparable state statutes and regulations.

**“Environmental Liabilities”** means any Liabilities of whatever kind or nature (including without limitation any natural resources damages, property damages, personal injury damages, losses, Claims, judgments, amounts paid in settlement, fines, penalties, fees, expenses and costs, including Remediation costs, engineering costs, environmental consultant fees, laboratory fees, permitting fees, investigation costs, defense costs, costs of enforcement proceedings, costs of indemnification and contribution, costs of medical monitoring, and attorneys’ fees and expenses) arising out of, resulting from or in connection with (a) any violation or alleged violation of Environmental Laws or Environmental Permits, prior to, on or after the Closing Date, with respect to the ownership, operation or use of the Acquired Assets; (b) any Environmental Claims caused or allegedly caused by the presence, Release of, or exposure to Hazardous Substances at, on, in, under, adjacent to or migrating from the Acquired Assets prior to, on or after the Closing Date; (c) the investigation and/or Remediation (whether or not such investigation or Remediation commenced before the Closing Date or commences on or after the Closing Date) of Hazardous Substances that are present or have been Released prior to, on or after the Closing Date at, on, in, under, adjacent to or migrating from the Acquired Assets; (d) compliance with Environmental Laws or Environmental Permits on or after the Closing Date with respect to the ownership, operation or use of the Acquired Assets; (e) any Environmental Claim arising from or relating to the off-site disposal, treatment, storage, transportation, discharge, Release or recycling, or the arrangement for such activities, of Hazardous Substances, on or after the Closing Date, in connection with the ownership or operation of the Acquired Assets; and (f) the investigation and/or Remediation of Hazardous Substances that are generated, disposed, treated, stored, transported, discharged, Released, recycled, or the arrangement of such activities, on or after the Closing Date, in connection with the ownership or operation of the Acquired Assets, at any Offsite Disposal Facility.

**“Environmental Permits”** means those Permits required for the ownership or operation of any Acquired Asset under Environmental Laws.

**“ERISA”** means the Employee Retirement Income Security Act of 1974.

**“Estimated Closing Statement”** has the meaning set forth in [Section 2.6\(b\)](#).

**“Estimated Prorated Amount”** has the meaning set forth in [Section 2.7\(b\)](#).

**“Estimated Proration Adjustment Amount”** has the meaning set forth in [Section 2.7\(b\)](#).

**“Estimated Purchase Price Adjustment”** has the meaning set forth in [Section 2.6\(b\)](#).

**“Eversource”** means Eversource Energy, a Massachusetts voluntary association and the parent company of Seller, formerly known as Northeast Utilities.

**“Eversource Service”** means Eversource Energy Service Company, a Connecticut corporation and an Affiliate of Seller, formerly known as Northeast Utilities Service Company.

**“Excluded Assets”** has the meaning set forth in [Section 2.2](#).

**“Excluded Environmental Liabilities”** has the meaning set forth in [Section 2.4\(h\)](#).

**“Excluded Liabilities”** has the meaning set forth in [Section 2.4](#).

**“Facilities”** has the meaning set forth in the recitals. For avoidance of doubt, any individual Facility referred to herein by the name set forth in [Schedule 1](#) shall mean such Facility, as described in [Schedule 1](#).

**“FERC”** means the Federal Energy Regulatory Commission.

**“Final Purchase Price Adjustment”** has the meaning set forth in [Section 2.6\(c\)\(iii\)](#).

**“GAAP”** means United States generally accepted accounting principles in effect from time to time, as applied by Seller.

**“Generation CBA”** means the collective bargaining agreement between Seller and the Union, with respect to Seller’s Generation Group, in force as of the Effective Date.

**“Good Utility Practice”** means any of the practices, methods and acts engaged in or approved by a significant portion of the electric power generation industry during the relevant time period, or any of the practices, methods or acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather is intended to include acceptable practices, methods or acts generally accepted in the region, or required by the NHPUC, including but not limited to compliance with the standards established by the National Electrical Safety Code and ISO-NE.

**“Governmental Authority”** means any federal, state, local, municipal or foreign government or political subdivision thereof, or any agency or instrumentality of such government or political subdivision, or any self-regulated organization or other non-governmental regulatory authority or quasi-governmental authority (to the extent that the rules, regulations or orders of such organization or authority have the force of Law), or any arbitrator, court or tribunal of competent jurisdiction, but excluding Buyer and any subsequent owner of any of the Acquired Assets (if otherwise a Governmental Authority under this definition).

**“Hazardous Substance”** means (a) any petrochemical or petroleum product, oil, waste oil, coal ash, radioactive materials, radon, asbestos in any form, urea formaldehyde foam insulation, lead-containing materials and polychlorinated biphenyls; (b) any products, mixtures, compounds, materials or wastes, air emissions, toxic substances, wastewater discharges and any chemical, material or substance that may give rise to Liability pursuant to, or is listed or regulated under, or the human exposure to which or the Release of which is controlled or limited by applicable Environmental Laws; and (c) any materials or substances defined in Environmental Laws as “hazardous”, “toxic”, “pollutant” or “contaminant”, or words of similar meaning or regulatory effect.

**“HSR Act”** means the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

**“Improvements”** means all buildings, structures (including all fuel handling and storage facilities), machinery and equipment, fixtures, construction in progress, including all piping, cables and similar equipment forming part of the mechanical, electrical, plumbing or HVAC infrastructure of any building, structure or equipment, and including all generating units, located on and affixed to the Sites, other than the Seller Marks.

**“Indemnified Party”** has the meaning set forth in [Section 7.5](#).

**“Indemnifying Party”** has the meaning set forth in [Section 7.5](#).

**“Independent Accountant”** has the meaning set forth in [Section 2.6\(c\)\(ii\)](#).

**“Independent Appraiser”** has the meaning set forth in [Section 2.8](#).

**“Intellectual Property”** means any and all of the following in any jurisdiction throughout the world: (a) trademarks and service marks, including all applications and registrations and the goodwill connected with the use of and symbolized by the foregoing, but not including the Seller Marks; (b) copyrights, including all applications and registrations, and works of authorship, whether or not copyrightable; (c) trade secrets and confidential knowhow; (d) patents and patent applications; (e) websites and internet domain name registrations; and (f) all other intellectual property and industrial property rights and assets, and all rights, interests and protections that are associated with, similar to, or required for the exercise of, any of the foregoing.

**“Intercompany Arrangements”** has the meaning set forth in [Section 2.2\(j\)](#).

**“Interconnection Agreements”** has the meaning set forth in [Section 2.10\(f\)](#).

**“Interim Period”** means the period of time commencing on the Effective Date and ending on the Closing.

**“Inventory”** or **“Inventories”** means natural gas, coal, biomass and oil inventories, raw materials, spare parts and consumable supplies located at or in transit to the Sites or identified in any Schedule hereto.

**“ISO-NE”** means ISO New England, Inc. or its successor.

**“Law”** means any statute, law, ordinance, regulation, rule, code, Order, constitution, treaty, common law, judgment, decree or other requirement, rule or other pronouncement having the effect of law of any Governmental Authority.

**“Leased Real Property”** has the meaning set forth in [Section 2.1\(b\)](#).

**“Liability”** means any liability or obligation (whether known or unknown, whether asserted or unasserted, whether absolute or contingent, whether accrued or unaccrued, whether liquidated or unliquidated, whether incurred or consequential and whether due or

to become due), including any liability for Taxes.

“**Lien**” means any lien, pledge, mortgage, deed of trust, security interest, charge, claim, easement, encroachment, conditional sale or other title retention device or arrangement, option, restriction on transfer, third party purchase right, right of first offer or refusal, or other similar encumbrance, or restriction on the creation of any of the foregoing.

“**Losses**” means any and all judgments, losses, liabilities, amounts paid in settlement, damages, fines, penalties, deficiencies, costs, Taxes, obligations and expenses (including interest, court costs and reasonable fees of attorneys, accountants and other experts). For all purposes in this Agreement, the term “Losses” does not include any Non-Reimbursable Damages.

“**Made Available**” means, with respect to documents and materials, that such documents or materials have been posted to the Data Site or otherwise provided to Buyer by Seller or its Representatives.

“**Material Adverse Effect**” means any change or event that is materially adverse to the assets, liabilities, operations or financial condition of the Acquired Assets, taken as a whole; provided, however, that any changes or events resulting from or arising out of the following shall not be considered when determining whether a Material Adverse Effect has occurred: (a) any change generally affecting the international, national or regional electric generating, transmission or distribution industry; (b) any change generally affecting the international, national or regional wholesale or retail markets for electric power; (c) any change generally affecting the international, national or regional wholesale or retail markets for the coal, natural gas or oil industries or the transportation or storage of coal, natural gas or oil; (d) any change in markets for commodities or supplies, including electric power, natural gas, oil, coal or other fuel and water, as applicable, used in connection with the Facilities; (e) any change in market (including the market for electrical power, coal, natural gas or oil) design, pricing or rules (including rules, systems, procedures, guidelines or requirements promulgated or modified by ISO-NE, any other regional transmission organization, NERC or any similar organization); (f) any change in general regulatory or political conditions, including any engagements of hostilities, acts of war or terrorist activities or changes imposed by a Governmental Authority associated with additional security; (g) any change in the international, national or regional electric transmission or distribution systems or operations thereof; (h) any change in any Laws (including Environmental Laws), GAAP, regulatory accounting principles or industry standards; (i) any change in the financial condition or results of operation of Buyer or its Affiliates, including its ability to access capital and equity markets and changes due to a change in the credit rating of Buyer or its Affiliates; (j) any change in the financial, banking, securities or currency markets (including the inability to finance the transactions contemplated hereby or any increased costs for financing or suspension of trading in, or limitation on prices for, securities on any domestic or international securities exchange); (k) any change in general national or regional economic or financial conditions or any failure or bankruptcy (or any similar event) of any financial services or banking institution or insurance company or counterparty to any Contract; (l) any actions to be taken pursuant to or in accordance with this Agreement, or taken by or at the request of Buyer; (m) the announcement, pendency or consummation of the transactions contemplated hereby, or the fact that the prospective owner of the Acquired Assets is Buyer; (n) any labor strike, request for representation, organizing campaign, work stoppage, slowdown, or lockout or other labor dispute; (o) any new or announced power provider entrants, including their effect on pricing or transmission; (p) any effects of weather and other acts of God; (q) any Casualty Loss or event of condemnation; (r) seasonality of the operations of the Facilities; or (s) any failure of the Acquired Assets to meet projections or forecasts or revenue or earnings predictions for any period; provided, that any Loss, Claim, occurrence, change or effect that is cured prior to the Closing Date shall not be considered a Material Adverse Effect; provided, further, that, for the avoidance of doubt, a Material Adverse Effect shall be measured only against past performance of the Acquired Assets, taken as a whole, and not against any forward-looking statements, financial projections or forecasts of the Acquired Assets.

“**Material Contracts**” has the meaning set forth in [Section 2.1\(e\)](#).

“**Mortgage Indenture**” means that certain First Mortgage Indenture, dated as of August 15, 1978, as amended and restated effective as of June 1, 2011, and supplemented, between Seller and U.S. Bank National Association, successor to Wachovia Bank, National Association, successor to First Union National Bank, formerly known as First Fidelity Bank, National Association, New Jersey, as trustee.

“**NEPOOL**” means the New England Power Pool, or its successor.

“**NHPUC**” means the New Hampshire Public Utilities Commission.

“**NHPUC Approval**” means the Consent of the NHPUC to the transactions contemplated by this Agreement and the Related Agreements as required under New Hampshire Law.

“**Non-Assigned Contracts**” has the meaning set forth in [Section 5.3\(a\)\(v\)](#).

“**Non-Reimbursable Damages**” has the meaning set forth in [Section 7.9\(e\)](#).

**“Non-Represented Scheduled Employees”** has the meaning set forth in Section 3.12(a).

**“Non-Represented Transferred Employees”** has the meaning set forth in Section 5.8(c).

**“Objection Notice”** has the meaning set forth in Section 2.6(c)(i).

**“Offsite Disposal Facility”** means a location, other than a Facility or a Site, that receives or received Hazardous Substances for disposal by Seller prior to the Closing Date or by Buyer on or after the Closing Date.

**“Order”** means any award, decision, injunction, judgment, order, writ, decree, rule, ruling, subpoena, or verdict entered, issued, made or rendered by any Governmental Authority that possesses competent jurisdiction.

**“Organizational Documents”** means, with respect to any Person, the certificate or articles of incorporation, organization or formation and by-laws, the limited partnership agreement, the partnership agreement or the operating or limited liability company agreement, equity holder agreements and/or other organizational and governance documents of such Person.

**“Other Assigned Contracts”** has the meaning set forth in Section 2.1(e).

**“Outside Date”** has the meaning set forth in Section 8.1(a).

**“Party”** and **“Parties”** each has the meaning set forth in the preamble.

**“Permits”** means all certificates, licenses, permits, approvals, Consents, Orders, decisions and other actions of a Governmental Authority pertaining to a particular Acquired Asset, or the ownership, operation or use thereof.

**“Permitted Capital Expenditures”** means (a) any capital expenditure or commitment to make capital expenditures which will not be completely funded by the later of December 31, 2017 and the Closing Date, and which will not involve a total liability after such date of an amount equal to or less than Three Hundred Thousand Dollars (\$300,000) individually or One Million Dollars (\$1,000,000) in the aggregate; (b) those capital expenditures that are set forth on Schedule 5.5; or (c) those capital expenditures otherwise agreed to by the Parties.

**“Permitted Lien”** means (a) any Lien for Taxes not yet due or delinquent or being contested in good faith; (b) any Lien arising in the ordinary course of business by operation of Law (including mechanics’, materialmen’s, warehousemen’s, carriers’, workmen’s, repairmen’s, landlords’, suppliers’ and other similar Liens) with respect to a Liability that is not yet due or delinquent or that is being contested in good faith; (c) any purchase money Lien (including Liens under purchase price conditional sales contracts and equipment leases) arising in the ordinary course of business; (d) any deposit or pledge made in connection with, or to secure payment of, workers’ compensation, unemployment insurance, old age pension programs mandated under applicable Laws or other social security regulations; (e) any exception or other matter set forth in the Title Commitments (whether or not subsequently deleted or endorsed over) or discoverable based on a review or examination of an accurate survey of the Sites or the land records of the respective counties in which the Sites are located; (f) any easement, right of way, zoning or planning restriction, building and land use Law or similar restriction or condition imposed by any Governmental Authority; (g) any Lien that will no longer be binding on the Acquired Assets after Closing; (h) any Lien created by or resulting from any act or omission of Buyer; (i) any Lien granted or created by the execution and delivery of this Agreement or any of the Related Agreements or pursuant to the terms and conditions hereof or thereof (including without limitation the Reserved Easements); (j) with respect to the ARCO Shares, the ARCO ROFR and restrictions on sales of securities under applicable securities Laws; and (k) the matters and Liens set forth on Schedule 1.1-PL.

**“Person”** means an individual, corporation, partnership (general or limited), limited liability company, joint venture, trust, association, unincorporated organization, other business organization or Governmental Authority.

**“Prepayments”** means all advance payments, prepaid expenses (including rent), prepaid Taxes, progress payments and deposits of Seller, and rights to receive prepaid expenses, deposits or progress payments relating to the ownership and operation of the Acquired Assets, but not including any prepaid expenses or deposits attributable to Excluded Assets.

**“Property Tax Stabilization Payments”** mean those property tax stabilization payments with respect to the Facilities payable by Seller under the Settlement Agreement.

**“Prorated Amount”** means (a) with respect to any Prorated Item that is a Prepayment, the amount allocable to the period on or after the Closing Date that was paid by Seller prior to the Closing Date, and (b) with respect to any other Prorated Item, the amount (expressed as a negative number) allocable to the period prior to the Closing Date, whether or not then due and payable, which was not paid by Seller prior to the Closing Date and which represents an Assumed Liability (excluding, for the avoidance of doubt, any amount paid by Seller after the Closing Date directly to the applicable Third Party), in each case, prorated in accordance with the methodology specified in Section 2.7.

“**Prorated Item**” has the meaning set forth in Section 2.7(a).

“**Purchase Price**” has the meaning set forth in Section 2.5.

“**Purchase Price Adjustment**” has the meaning set forth in Section 2.6(c)(i).

“**Real Property**” has the meaning set forth in Section 2.1(a).

“**Related Agreements**” means the Deeds, each Assignment and Assumption of Lease, the Bill of Sale, the Assignment and Assumption Agreement, the Asset Demarcation Agreement, the Easements, the Interconnection Agreements, the Transition Services Agreement, the Release of Mortgage Indenture, and the other agreements, certificates and documents to be delivered pursuant to this Agreement.

“**Release**” means any release, spill, emission, escape, migration, leaking, leaching, pumping, injection, dumping, deposit, disposal or discharge into or through the Environment.

“**Release of Mortgage Indenture**” has the meaning set forth in Section 2.10(g).

“**Remediation**” means any or all of the following activities to the extent required to address the presence or Release of, or exposure to, Hazardous Substances: (a) monitoring, investigation, assessment, treatment, cleanup, containment, removal, mitigation, response or restoration work; (b) obtaining any Permits or Consents of any Governmental Authority necessary to conduct any such activity; (c) preparing and implementing any plans or studies for any such activity; (d) obtaining a written notice (or an oral notice which is appropriately documented or memorialized) from a Governmental Authority with competent jurisdiction under Environmental Laws or a written opinion of a Licensed Professional Geologist (as defined in New Hampshire RSA 310-A:118, IV), as contemplated by the relevant Environmental Laws and in lieu of a written notice from a Governmental Authority, that no material additional work is required; and (e) any other activities reasonably determined by a Party to be necessary or appropriate or required under Environmental Laws.

“**Representative**” means, with respect to any Person, such Person’s Affiliates, and such Person and its Affiliates’ respective officers, directors, managers, employees, agents, consultants and advisors (including financial advisors, accountants and counsel).

“**Represented Scheduled Employees**” has the meaning set forth in Section 3.12(a).

“**Represented Transferred Employees**” has the meaning set forth in Section 5.8(a).

“**Reserved Easements**” means easements to be reserved by Seller with respect to certain T&D Assets and associated telecommunications facilities located on the site of the Acquired Assets, as set forth in Schedule 2.1(a), to be reserved in the Deeds substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f).

“**Restoration Cost**” has the meaning set forth in Section 5.16.

“**Scheduled Employees**” has the meaning set forth in Section 3.12(a).

“**Schedule Update**” has the meaning set forth in Section 5.15.

“**Selected Represented Employees**” has the meaning set forth in Section 5.8(a).

“**Selected Non-Represented Employees**” has the meaning set forth in Section 5.8(c).

“**Seller**” has the meaning set forth in the preamble.

“**Seller Indemnified Parties**” has the meaning set forth in Section 7.4.

“**Seller Marks**” means any and all names, marks, trade names, trademarks and corporate symbols and logos incorporating “PSNH,” “Public Service Company of New Hampshire,” “Public Service of New Hampshire,” “Eversource,” “Eversource Energy” or “Northeast Utilities,” or any word or expression similar thereto or constituting an abbreviation or extension thereof, together with all other names, marks, trade names, trademarks and corporate symbols and logos of Seller or any of its Affiliates.

“**Seller Required Consents**” has the meaning set forth in Section 3.3.

“**Seller’s Knowledge**” means the actual knowledge (and not imputed or constructive knowledge) of the individuals listed on Schedule 1.1-K, after due inquiry.

“**Seller’s Pension Plan**” has the meaning set forth in Section 5.8(e)(i)(B).

“**Settlement Agreement**” means that certain 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, dated as of June 10, 2015, by and among Seller, Eversource, the Office of Energy and Planning, Designated Advocate Staff of the NHPUC, the Office of Consumer Advocate, New Hampshire District 3 Senator Jeb Bradley, New Hampshire District 15 Senator Dan Feltes, the City of Berlin, New Hampshire, the Union, the Conservation Law Foundation, Inc., TransCanada Power Marketing Ltd., TransCanada Hydro Northeast Inc., and the New Hampshire Sustainable Energy Association d/b/a NH CleanTech Council, as amended by that certain Amendment to the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, dated January 26, 2016, and the Partial Litigation Settlement Between Settling Parties and Non-Avocate Staff, dated January 26, 2016, all as approved by NHPUC Order No. 25,920, dated July 1, 2016.

“**Site**” means the Real Property or Leased Real Property (as applicable) and Improvements forming a part of, or used or usable in connection with, a Facility. Any reference to a Site shall include, by definition, the surface and subsurface elements, including the soils and groundwater present at such Site, and any reference to items “at the Site” shall include all items “at, on, in, upon, over, across, under and within” the Site.

“**T&D Assets**” means the transmission, distribution, communication, substation and other assets necessary to current or future T&D Operations of Seller.

“**T&D Operations**” means the process of conducting and supporting the transmission, distribution and sale of electricity.

“**Tax**” or “**Taxes**” means any federal, state, local, or foreign income, gross receipts, license, payroll, employment, excise, severance, stamp, occupation, premium, windfall profits, environmental (including taxes under Code Section 59A), customs duties, capital stock, franchise, profits, withholding, social security (or similar, including FICA), unemployment, disability, real property, personal property, sales, use, transfer, border adjustment, registration, value added, alternative or add-on minimum, estimated, or other tax of any kind whatsoever, including any interest, penalty, or addition thereto, whether disputed or not.

“**Taxing Authority**” means, with respect to any Tax, the Governmental Authority (including the Internal Revenue Service) that imposes such Tax, and the agency (if any) charged with the collection of such Tax for such Governmental Authority.

“**Tax Return**” means any return, declaration, report, claim for refund, or information return or statement relating to Taxes, including any schedule or attachment thereto, and including any amendment thereof.

“**Terminated Contracts**” has the meaning set forth in Section 5.6(a).

“**Third Party**” means a Person that is not a Party, or an Affiliate of a Party, to this Agreement.

“**Third Party Claim**” has the meaning set forth in Section 7.6(a).

“**Title Commitments**” has the meaning set forth in Section 2.1(a).

“**Transferable Permits**” has the meaning set forth in Section 2.1(d).

“**Transferred Books and Records**” means all books, operating records, engineering designs, blueprints, as-built plans, specifications, procedures, studies, reports, manuals, equipment repair records, safety records, maintenance records, service records, supplier, contractor and subcontractor lists, pending purchase orders, property and sales Tax Returns and related Tax records, and all Transferred Employee Records (in each case, in the format (including electronic format) in which such items are reasonably and practically available), in each case, in the possession of Seller to the extent relating specifically to the ownership or operation of the Facilities and the Acquired Assets; *provided*, that “Transferred Books and Records” shall not include: (a) any files or records relating to any employees who are not Transferred Employees, (b) files or records relating to any Transferred Employee afforded confidential treatment under any applicable Laws, except to the extent the affected employee consents in writing to such disclosure to Buyer, (c) all records prepared in connection with the sale of the Acquired Assets (and Seller’s other generation assets), including bids received from Third Parties and analyses relating to the Acquired Assets, (d) financial records, books of account or projections relating to the Acquired Assets, (e) books, records or other documents of Seller or its Affiliates related to corporate compliance matters not primarily developed for the Acquired Assets, (f) organizational documents (including minute books) of Seller, (g) materials, the disclosure of which would constitute a waiver of attorney-client or attorney work product privilege, or (h) any other books and records which Seller is prohibited from transferring to Buyer under applicable Law and is required by applicable Law to retain.

“**Transferred Employees**” means the Non-Represented Transferred Employees and the Represented Transferred Employees, collectively.

“**Transferred Employee Records**” means all personnel records maintained by Seller relating to the Transferred Employees, to the extent such files contain (a) names, addresses, dates of birth, job titles and descriptions; (b) dates of employment; (c) compensation and benefits information; (d) resumes and job applications; and (e) any other documents that Seller is not prohibited by Law from delivering to Buyer. To the extent the consent of a Transferred Employee is required under applicable Law in order for Seller to deliver a document that is part of the Transferred Employee Records to Buyer, Seller agrees to use commercially reasonable efforts to secure such consent.

“**Transfer Taxes**” means all transfer, sales, ad valorem, use, goods and services, value added, documentary, stamp duty, gross receipts, excise, transfer and conveyance Taxes and other similar Taxes, duties, fees or charges, together with any interest, penalties or additions in respect thereof.

“**Transition Service Cost Percentage**” means one hundred ten percent (110%) during the period of the first ninety (90) days after the Closing Date, one hundred twenty-five percent (125%) for the next ninety (90) days, and one hundred fifty percent (150%) thereafter.

“**Transition Services Agreement**” has the meaning set forth in Section 5.6(b).

“**Union**” means International Brotherhood of Electrical Workers, Local 1837.

“**VTPUC**” means the Vermont Public Utility Commission.

“**WARN Act**” means the Worker Adjustment and Retraining Notification Act, 29 U.S.C. § 2101, et seq.

**Section 1.2 Rules of Interpretation.** The following rules of interpretation apply to this Agreement:

(a) Unless otherwise specified, all Article, Section, Schedule and Exhibit references in this Agreement are to the Articles and Sections of, and the Schedules and Exhibits attached to, this Agreement. The Schedules and Exhibits attached to this Agreement constitute a part of this Agreement and are incorporated in this Agreement for all purposes.

(b) Article, Section and subsection headings in this Agreement are inserted for convenience only and shall not affect in any way the meaning or interpretation of this Agreement.

(c) If a term is defined as one part of speech (such as a noun), it shall have a corresponding meaning when used as another part of speech (such as a verb). Unless the context of this Agreement clearly requires otherwise, (i) words importing the masculine gender shall include the feminine and neutral genders and vice versa and (ii) words in the singular shall include the plural and vice versa. The words “include,” “includes,” and “including” are not limiting and shall mean “including without limitation.” The word “or” shall not be exclusive. The words “herein,” “hereunder,” “hereof,” “hereto” and similar terms used in this Agreement are references to this Agreement as a whole and not to any particular Article or Section or other portion of this Agreement in which such words appear. For purposes of computation of periods of time, the word “from” means “from and including” and the words “to” and “until” each mean “to but excluding.”

(d) Whenever this Agreement refers to a number of days, such number shall refer to calendar days unless Business Days are specified. Whenever any action must be taken hereunder on or by a day that is not a Business Day, then such action may validly be taken on or by the next day that is a Business Day.

(e) Unless the context of this Agreement clearly requires otherwise, any reference to any Contract means such Contract as amended and in effect from time to time in accordance with its terms and, if applicable, the terms of this Agreement.

(f) Unless the context of this Agreement clearly requires otherwise, reference to any Law means such Law as amended, modified, codified, replaced or re-enacted, in whole or in part, and in effect from time to time, including any successor legislation thereto and all rules and regulations promulgated thereunder.

(g) Currency amounts referenced in this Agreement are in U.S. Dollars.

(h) All accounting terms used but not expressly defined herein have the meanings given to them under GAAP.

(i) Each Party acknowledges that it and its attorneys have been given equal opportunity to negotiate the terms and conditions of this Agreement and that any rule of construction to the effect that ambiguities are to be resolved against the drafting Party, or any similar rule operating against the drafter of an agreement, shall not be applicable to the construction or interpretation of this Agreement.

**ARTICLE II**  
**PURCHASE AND SALE; CLOSING**

**Section 2.1 Purchase and Sale of Acquired Assets.** On the terms and subject to the conditions set forth in this Agreement, at the Closing, Seller shall sell, assign, convey and transfer to Buyer, and Buyer shall purchase, assume and acquire from Seller, free and clear of Liens other than Permitted Liens, all of Seller's right, title and interest in and to (i) the ARCO Shares and (ii) all properties, rights and assets owned by Seller constituting, or used in and necessary for the operation of, the Facilities and the Business (collectively, the "**Acquired Assets**"):

(a) The real property, Improvements thereon, easements and other rights in real property described in Schedule 2.1(a), but subject to the exceptions and encumbrances set forth in the title policy commitments provided to Buyer and described on Schedule 2.1(a) (the "**Title Commitments**") and subject to the Permitted Liens (the "**Real Property**");

(b) The leasehold interests and rights thereunder relating to real property with respect to which Seller is lessee set forth in Schedule 2.1(b), but subject to the exceptions and encumbrances set forth in the Title Commitments and subject to the Permitted Liens (the "**Leased Real Property**"), and all leases set forth in Schedule 2.1(b) with respect to the Leased Real Property (the "**Assigned Leases**");

(c) The machinery, equipment, tools, furniture, boats, vehicles, Inventories and other tangible and intangible personal property owned by Seller and located at or in transit to the Facilities (if related solely to any of the Acquired Assets) (including without limitation the items of personal property described on Schedule 2.1(c)), or, in the case of intangible personal property (other than Intellectual Property), otherwise used exclusively for the Facilities or the other Acquired Assets, including any Prepayments and all applicable warranties against manufacturers or vendors to the extent that such warranties are transferable, in each case as in existence on the Effective Date, but excluding such items disposed of by Seller in the ordinary course of business during the Interim Period and including such additional items as may be acquired by Seller for use in connection with the Acquired Assets in the ordinary course of business during the Interim Period;

(d) All Permits (including all pending applications for Permits or renewals thereof) relating to the ownership and operation of the Facilities or the Acquired Assets that, as of the Closing Date, are transferable by Seller to Buyer by assignment or otherwise under applicable Law including those that are identified as Transferable Permits on Schedule 3.5(b) or Schedule 3.11(a) (the "**Transferable Permits**"); *provided* that Seller shall, during the Interim Period, amend such Schedules to account for applicable changes arising during the Interim Period, to the extent such changes are not in violation of any applicable covenants in Section 5.5;

(e) Excluding the Assigned Leases addressed in Section 2.1(b), but including personal property leases (whether Seller is lessor or lessee thereunder), real property leases with respect to which Seller is lessor thereunder and railroad crossing licenses and side-track agreements for the benefit of Seller, (i) those Contracts that relate to, and are material to, the ownership or operation of the Acquired Assets or the Business and that are set forth in Schedule 2.1(e) (the "**Material Contracts**") and (ii) all other Contracts that relate exclusively to the ownership or operation of the Acquired Assets or otherwise relate to the operation of the Business and in either case are not, individually, or in the aggregate, material to Business (the "**Other Assigned Contracts**" and, together with the Material Contracts, the "**Assigned Contracts**"); *provided* that Seller shall retain the rights and interests under any Assigned Contract to the extent such rights and interests provide for indemnity and exculpation rights for pre-Closing occurrences for which Seller remains liable under this Agreement; and *provided further*, that Seller shall, during the Interim Period, amend such Schedule to set forth any amendments to any Material Contract, or any additional Contracts entered into during the Interim Period that are material to the ownership or operation of the Acquired Assets, in each case that are not in violation of any applicable covenants in Section 5.5;

(f) All Transferred Books and Records, subject to the right of Seller to retain copies for its use to the extent and subject to the conditions set forth herein;

(g) All Intellectual Property that is owned by Seller and primarily used in connection with the operation of the Facilities set forth in Schedule 2.1(g) (the "**Assigned Intellectual Property**");

(h) Subject to Section 2.2(f), the rights of Seller to the use of the names of the Facilities set forth in Schedule 1;

(i) Those Environmental Attributes set forth in Schedule 2.1(i), excluding such Environmental Attributes or portions thereof disposed of by Seller in the ordinary course of business during the Interim Period and including such additional Environmental Attributes as may be acquired by Seller for use in the operation of the Facilities in the ordinary course of business during the Interim Period; and

(j) All rights of Seller in and to any claims, causes of action, rights of recovery, rights of set-off, rights of refund and similar rights against a Third Party relating to any Assumed Liability, but excluding any such rights of Seller in, to or under any

insurance policies of Seller or any insurance proceeds therefrom.

For avoidance of doubt, the terms “Acquired Assets” and “Facilities” as used in this Agreement shall not include any properties, rights, assets or facilities of ARCO.

**Section 2.2 Excluded Assets.** Notwithstanding anything to the contrary in this Agreement, Buyer expressly understands and agrees that it is not purchasing or acquiring, and Seller is not selling, assigning or transferring, any properties, rights or assets of Seller other than the Acquired Assets, and all such other properties, rights and assets shall be excluded from the Acquired Assets (collectively, the “**Excluded Assets**”). The Excluded Assets to be retained by Seller include all of Seller’s right, title and interest in and to the following properties, rights and assets:

- (a) As identified on Schedule 2.2(a) or in the Asset Demarcation Agreement, the real and personal property comprising or constituting any or all of the T&D Assets (whether or not regarded as a “transmission,” “distribution” or “generation” asset for regulatory or accounting purposes), including all electric power, communications and telecommunications underground and aboveground lines, switchyard facilities, substation facilities, support equipment and other Improvements, the Reserved Easements, and all Permits and Contracts, to the extent they relate to the T&D Assets, and those certain assets and facilities identified for use or used by Seller or others pursuant to an agreement or agreements with Seller for telecommunications purposes;
- (b) The real property and Improvements thereon described in Schedule 2.2(b);
- (c) Except for Prepayments, (i) all Cash, accounts receivable, notes receivable, checkbooks and canceled checks, bank accounts and deposits, commercial paper, certificates of deposit, securities, and property or income Tax receivables, and (ii) any other Tax refunds, credits, prepayments or other rights to payment related to the Acquired Assets to the extent allocable to a period ending on or before the Closing Date;
- (d) All Contracts of Seller other than the Assigned Contracts and Assigned Leases;
- (e) All Permits of Seller other than the Transferable Permits;
- (f) All Intellectual Property including all Seller Marks other than the Assigned Intellectual Property;
- (g) Duplicate copies of all Transferred Books and Records (to the extent and subject to the conditions set forth herein), and all other records of Seller other than the Transferred Books and Records, including corporate seals, organizational documents, minute books, stock books, Tax Returns, financial records, books of account and other corporate records of Seller, and all employee-related or employee benefit-related files or records other than the Transferred Employee Records;
- (h) All insurance policies of Seller and insurance proceeds therefrom;
- (i) All rights of Seller in and to any claims, causes of action, rights of recovery, rights of set-off, rights of refund and similar rights against a Third Party relating to any period through the Closing or otherwise relating to any Excluded Liability, but excluding any such rights of Seller to the extent relating to an Assumed Liability;
- (j) All of Seller’s rights arising from or associated with any Contract or arrangement representing an intercompany transaction, agreement or arrangement between Seller and an Affiliate of Seller, whether or not such transaction, agreement or arrangement relates to the provisions of goods or services, payment arrangements, intercompany charges or balances or the like, including, but not limited to, the Terminated Contracts (“**Intercompany Arrangements**”), other than those Assigned Contracts set forth on Schedule 2.2(j);
- (k) All Employee Benefit Plans and trusts or other assets attributable thereto;
- (l) All assets of Seller related to its ownership, construction and operation of a portfolio of thermal electric generation assets and related facilities, together with fuel inventories, and including generating, selling, transmitting and delivering electric energy, capacity, ancillary services and Environmental Attributes from the generation assets to the interconnection point set forth in the respective Interconnection Agreements; and
- (m) The rights that accrue or will accrue to Seller under this Agreement and the Related Agreements.

**Section 2.3 Assumption of Assumed Liabilities.** On the terms and subject to the conditions set forth in this Agreement, from and after the Closing, Buyer shall assume and shall satisfy, perform or discharge when due only those Liabilities of Seller expressly provided for herein in respect of, or otherwise arising from the operation of the Business or the ownership, operation or use of the Acquired Assets, other than the Excluded Liabilities (the “**Assumed Liabilities**”) as follows:

(a) All Environmental Liabilities, excluding the Excluded Environmental Liabilities, but only to the extent that such Excluded Environmental Liabilities are subject to indemnification by Seller pursuant to Section 7.5(f), after which they shall become an Assumed Liability;

(b) Except as set forth in Section 2.4(c), all Liabilities under (i) the Assigned Contracts (including the Androscoggin River Headwaters Benefits Agreement, dated June 1, 1983, by and among Androscoggin Reservoir Company, Union Water Power Company, International Paper Company, Rumford Falls Power Company, James River Corporation, and Seller), the Assigned Leases, the Transferable Permits, in each case in accordance in its terms, (ii) the Assigned Intellectual Property, to the extent set forth on Schedule 2.1(g), and (iii) the Contracts, commitments and Transferable Permits entered into by Seller with respect to the Acquired Assets during the Interim Period consistent with Section 5.5, including, without limitation, commitments and agreements with respect to capital expenditures or Liabilities for real or personal property Taxes on any of the Acquired Assets (or, to the extent such agreements do not allocate such Tax liability between the Acquired Assets and the Excluded Assets, all Tax liability under such agreements entered into by Seller and any local government);

(c) All Liabilities (i) for any compensation, benefits, employment Taxes, workers compensation benefits and other similar Liabilities in respect of the Transferred Employees (including under the Generation CBA, any Employee Benefit Plan of Buyer, or any other agreement, plan, practice, policy, instrument or document relating to any of the Transferred Employees) to the extent arising or accruing on or after the Closing Date, but not including any Liabilities arising out of the Memorandum of Agreement to the Generation CBA dated September 7, 2017, (ii) relating to the Transferred Employees which Buyer has assumed or for which Buyer is otherwise responsible under Section 5.8, and (iii) in respect of any discrimination, wrongful discharge, unfair labor practice or similar Claim under applicable employment Laws by any Transferred Employee arising out of or relating to acts or omissions occurring on or after the Closing Date;

(d) All Liabilities for (i) Taxes (including, with respect to property Taxes, payments in addition to or in lieu of Taxes, but not including the Property Tax Stabilization Payments) relating to the ownership, operation, sale or use of the Facilities, the Acquired Assets or the Assumed Liabilities on or after the Closing Date and (ii) Taxes for which Buyer is liable pursuant to Section 2.7, Section 5.12 and Section 5.13; and

(e) All other Liabilities expressly allocated to Buyer in this Agreement or in any of the Related Agreements.

**Section 2.4 Excluded Liabilities.** Except for the Assumed Liabilities, Buyer shall not assume or be responsible for the performance of any Liabilities of Seller including, without limitation, any of the following Liabilities (collectively, the “**Excluded Liabilities**”):

(a) Any Liability of Seller in respect of or otherwise arising from the operation or use of the Excluded Assets;

(b) Any Liability of Seller arising from the making or performance of this Agreement or a Related Agreement or the transactions contemplated hereby or thereby;

(c) Any Liability of Seller under the Assigned Contracts or Assigned Leases (i) in respect of payment obligations for goods delivered or services rendered prior to the Closing Date or (ii) relating to a breach or default by Seller of any of its obligations thereunder occurring prior to the Closing Date, regardless of whether such Liability arises or is discovered on or after the Closing Date;

(d) Except for those Assumed Liabilities set forth in Section 2.3(c), any Liability of Seller (i) for any compensation, benefits, employment Taxes, workers compensation benefits and other similar Liabilities in respect of the Transferred Employees (including under the Generation CBA, any Employee Benefit Plan of Seller, or any other agreement, plan, practice, policy, instrument or document relating to any of the Transferred Employees) to the extent arising or accruing prior to the Closing Date, (ii) relating to the Transferred Employees for which Seller is responsible under Section 5.8, or (iii) in respect of any discrimination, wrongful discharge, unfair labor practice or similar Claim under applicable employment Laws by any Transferred Employee arising out of or relating to acts or omissions occurring prior to the Closing Date;

(e) Any Liability of Seller arising from or associated with any Intercompany Arrangement, other than Liabilities under those Assigned Contracts set forth on Schedule 2.2(j);

(f) Any Liability of Seller for any fines or penalties imposed by a Governmental Authority resulting from (i) any investigation or proceeding pending prior to the Closing Date or (ii) illegal acts or willful misconduct of Seller prior to the Closing Date;

(g) Any Liability for Taxes (including, with respect to property Taxes, payments in addition to or in lieu of Taxes and the Property Tax Stabilization Payments) relating to the ownership, operation, sale or use of the Acquired Assets prior to the Closing,

except those Taxes for which Buyer is liable pursuant to Section 2.7, Section 5.12 and Section 5.13;

(h) (i) any Environmental Liability to the extent such Environmental Liability arises out of or relates to any Governmental Authority's allegation and investigation of any violations of Environmental Laws by Seller, and (ii) any Liability relating to the treatment, disposal, storage, discharge, or Release of Hazardous Substances that were generated at the Sites through ownership or operation prior to the Closing Date, including relating to recycling or the arrangement for such activities at, or the transportation to, any Offsite Disposal Facility by Seller, prior to the Closing Date (such liabilities, the "**Excluded Environmental Liabilities**"). For the avoidance of doubt, it is the intention of the Parties that this Section 2.4(h) shall exclusively define those Environmental Liabilities constituting Excluded Liabilities hereunder, and that no other provision of this Section 2.4 shall be construed to include any Environmental Liabilities; and

(i) Any Liability of Seller in respect of accounts payable or accrued expenses.

**Section 2.5 Purchase Price.** In consideration for Seller's sale, assignment and transfer of the Acquired Assets to Buyer, at the Closing, Buyer shall (i) pay to Seller an aggregate amount equal to Eighty-Three Million Dollars (\$83,000,000) (the "**Base Purchase Price**") plus or minus amounts to account for (a) the Estimated Purchase Price Adjustment to be made as of the Closing under Section 2.6(a) and Section 2.6(b), and (b) the prorations to be made as of the Closing under Section 2.7 (the Base Purchase Price, as so adjusted, shall be referred to herein as the "**Closing Purchase Price**"), and (ii) assume the Assumed Liabilities. The Closing Purchase Price shall be payable in cash by wire transfer to Seller in accordance with written instructions of Seller given to Buyer at least three (3) Business Days prior to the Closing. Following the Closing, the Closing Purchase Price shall be subject to adjustment pursuant to Section 2.6(c) and Section 2.7(b), and the Closing Purchase Price, as so adjusted pursuant to such Sections, shall be herein referred to as the "**Purchase Price**."

**Section 2.6 Certain Adjustments to Base Purchase Price.** At the Closing, the Base Purchase Price shall be adjusted as set forth in Section 2.6(a) and Section 2.6(b), and the Closing Purchase Price shall be subject to adjustment following the Closing as set forth in Section 2.6(c).

(a) Determination of Adjustment. The Base Purchase Price shall be increased to account for the following items:

(i) The lesser of net book value of all Inventory held by Seller with respect to the Facilities as of the Closing Date and Three Hundred Ten Thousand Dollars (\$310,000);

(ii) Any Permitted Capital Expenditures paid by Seller during the Interim Period; and

(iii) Subject to, and without limiting, Seller's obligations in Section 5.5 to operate and maintain the Acquired Assets in the ordinary course of business consistent with Good Utility Practice, any operations and maintenance expenses paid for by Seller during the Interim Period that Seller would not have actually paid for but for Buyer's written request.

(b) Estimated Purchase Price Adjustment. At least five (5) Business Days prior to the Closing Date, Seller shall prepare and deliver to Buyer a statement (the "**Estimated Closing Statement**") setting forth in reasonable detail Seller's good faith estimate of the net amount of all adjustments to the Base Purchase Price required by Section 2.6(a) (the "**Estimated Purchase Price Adjustment**"), together with reasonable supporting material regarding the computation thereof. In calculating the Closing Purchase Price pursuant to Section 2.5, the Base Purchase Price will be increased to reflect the Estimated Proration Adjustment Amount.

(c) Post-Closing Adjustment.

(i) Within sixty (60) days following the Closing Date, Seller shall prepare and deliver to Buyer a statement (the "**Closing Statement**") that shall set forth in reasonable detail Seller's calculation of the net amount of all adjustments to the Base Purchase Price required by Section 2.6(a) taking into account actual data (the "**Purchase Price Adjustment**"), together with reasonable supporting material regarding the computation thereof. Buyer shall have thirty (30) days to review the Closing Statement following receipt thereof. On or before the end of such 30-day review period, Buyer may object to the Closing Statement by written notice to Seller (the "**Objection Notice**"), setting forth Buyer's specific objections to the calculation of the Purchase Price Adjustment. Such Objection Notice shall specify those items or amounts with which Buyer disagrees, together with a detailed written explanation of the reasons for disagreement with each such item or amount (and reasonable supporting material therefor), and shall set forth Buyer's calculation of the Purchase Price Adjustment based on such objections. To the extent not set forth in a timely-delivered Objection Notice, Buyer shall be deemed to have agreed with Seller's calculation of all other items and amounts contained in the Closing Statement and neither party may thereafter dispute any item or amount not set forth in such Objection Notice. If Buyer does not timely deliver any Objection Notice, Buyer shall be deemed to have agreed with and accepted Seller's calculation of the Purchase Price Adjustment, and the Closing Statement shall be final and binding on the Parties as of the end of Buyer's 30-day review period.

(ii) If Buyer timely delivers an Objection Notice to Seller, Buyer and Seller shall, during the thirty (30) day period following such delivery (or any mutually agreed extension thereof), use their commercially reasonable efforts to negotiate and reach agreement on the disputed items and amounts in order to determine the amount of the Purchase Price Adjustment. If, at the end of such period (or any mutually agreed extension thereof), the Parties are unable to resolve their disagreements, they shall jointly retain and refer their disagreements to a nationally recognized independent accounting firm selected by Seller (the “**Independent Accountant**”). The Parties shall instruct the Independent Accountant to promptly review this Section 2.6 and to determine solely with respect to the disputed items and amounts so submitted whether and to what extent, if any, the Purchase Price Adjustment set forth in the Closing Statement requires adjustment. The Independent Accountant shall base its determination solely on written submissions by Buyer and Seller. As promptly as practicable, but in no event later than thirty (30) days after its retention, the Independent Accountant shall deliver to Buyer and Seller a report which sets forth its resolution of the disputed items and amounts and its calculation of the Purchase Price Adjustment; *provided* that the Independent Accountant may not assign a value to any item greater than the greatest value for such item claimed by either Party or less than the smallest value for such item claimed by either Party. The decision of the Independent Accountant shall be final and binding on the Parties. The costs and expenses of the Independent Accountant shall be allocated between the Parties based upon the percentage which the portion of the contested amount not awarded to each party bears to the amount actually contested by such party, as determined by the Independent Accountant. The Parties agree to execute, if requested by the Independent Accountant, a reasonable engagement letter, including customary indemnities in favor of the Independent Accountant. The Parties shall cooperate and shall furnish each other and, if applicable, the Independent Accountant, with such documents and other records that may be reasonably requested in connection with the preparation, review and final determination of the Closing Statement and Purchase Price Adjustment and the other matters addressed in this Section 2.6.

(iii) For purposes of this Section 2.6(c), “**Final Purchase Price Adjustment**” means the Purchase Price Adjustment:

(A) As shown in the Closing Statement delivered by Seller to Buyer pursuant to Section 2.6(c)(i), if no Objection Notice with respect thereto is timely delivered by Buyer to Seller pursuant to Section 2.6(c)(i); or

(B) If an Objection Notice is so delivered, (x) as agreed by the Parties pursuant to Section 2.6(c)(ii) or (y) in the absence of such agreement, as shown in the Independent Accountant’s report delivered pursuant to Section 2.6(c)(ii).

(iv) Within three (3) Business Days after the Final Purchase Price Adjustment has been finally determined pursuant to this Section 2.6(c):

(A) If the Final Purchase Price Adjustment is less than the Estimated Purchase Price Adjustment, Seller shall pay to Buyer an amount equal to (x) the Estimated Purchase Price Adjustment minus (y) the Final Purchase Price Adjustment; and

(B) If the Final Purchase Price Adjustment is greater than the Estimated Purchase Price Adjustment, Buyer shall pay to Seller an amount equal to (x) the Final Purchase Price Adjustment minus (y) the Estimated Purchase Price Adjustment.

Any payment required to be made by a Party pursuant to this Section 2.6(c)(iv) shall be made to the other Party by wire transfer of immediately available funds to the account designated in writing by such other Party.

## **Section 2.7 Proration.**

(a) Buyer and Seller agree that all of the items (including any Prepayments with respect to such items) normally prorated in a sale of assets of the type contemplated by this Agreement, including those listed below, relating to the ownership and operation of the Acquired Assets (collectively, the “**Prorated Items**”), shall be prorated on a daily basis as of the Closing Date in accordance with this Section 2.7, with Seller liable to the extent such items relate to any period prior to the Closing Date, and Buyer liable to the extent such items relate to periods on and after the Closing Date:

(i) Personal property, real property, occupancy and water Taxes, assessments and other charges, if any, on or associated with the Acquired Assets;

(ii) Rent, Taxes and other items payable by or to Seller under any of the Assigned Contracts or Assigned Leases;

(iii) Any Permit, license, registration or other fees with respect to any Transferable Permit associated with the

Acquired Assets;

- (iv) Sewer rents and charges for water, telephone, electricity and other utilities; and
- (v) Revenues associated with the Environmental Attributes set forth in Schedule 2.1(i).

(b) At least five (5) Business Days prior to the Closing Date, Seller will deliver to Buyer a worksheet setting forth in reasonable detail (i) Seller's good faith reasonable estimate of the Prorated Amount for each Prorated Item (with respect to each Prorated Item, the "**Estimated Prorated Amount**"), together with reasonable supporting material regarding such estimate, and (ii) the calculation of the net amount of the Estimated Prorated Amounts (the "**Estimated Proration Adjustment Amount**"). In the event that, with respect to any Prorated Item, actual figures are not available as of the time of the calculation of the Estimated Prorated Amount, the Estimated Prorated Amount for such Prorated Item shall be a good faith reasonable estimate based upon the actual fee, cost or amount of the Prorated Item for the most recent preceding year (or appropriate period) for which an actual fee, cost or amount paid is available. In calculating the Closing Purchase Price pursuant to Section 2.5, the Base Purchase Price will be adjusted appropriately to reflect the Estimated Proration Adjustment Amount.

(c) When the actual Prorated Amount with respect to any Prorated Item (the "**Actual Prorated Amount**") becomes available to either Party, it shall promptly (and in any event within ninety (90) days following Closing) notify the other Party of such Prorated Item and Actual Prorated Amount, together with reasonable detail and supporting material regarding the computation thereof. For any Prorated Item with respect to which the Estimated Prorated Amount is not equal to the Actual Prorated Amount, upon the request of either Seller or Buyer, made within thirty (30) days of the date when such Actual Prorated Amount became available to such Party (or such Party received notice of such Actual Prorated Amount from the other Party, as applicable), the Parties shall agree on an adjustment to account for the difference between the Estimated Prorated Amount and the Actual Prorated Amount for such Prorated Item. All disputes between Seller and Buyer respecting any such requested adjustments that are not resolved by mutual agreement within sixty (60) days following the end of the foregoing ninety (90) day notice period shall be referred by the Parties to the Independent Accountant, who shall resolve such disputes and determine such final adjustment substantially in accordance with the procedures set forth in Section 2.6(c)(ii), applied *mutatis mutandis*. Any adjustment payment to be made by Buyer or Seller, as applicable, to the other Party pursuant to this Section 2.7(c) shall be paid within ten (10) days following the Parties' agreement (or the Independent Accountant's determination) with respect thereto by wire transfer of immediately available funds to the account designated in writing by such other Party. The Parties agree to cooperate and furnish each other with such documents and other records that may be reasonably requested in order to confirm all adjustment and proration calculations made pursuant to this Section 2.7.

## **Section 2.8 Allocation of Purchase Price.**

(a) Buyer and Seller shall agree upon an allocation among the Acquired Assets of the sum of the Purchase Price and the Assumed Liabilities consistent with Section 1060 of the Code and the Treasury Regulations thereunder on or before the Closing Date (or any mutually agreed extension thereof). Each of Buyer and Seller agrees to file Internal Revenue Service Form 8594 and all federal, state, local and foreign Tax Returns, and to report the transactions contemplated by this Agreement and the Related Agreements for federal income Tax and all other Tax purposes, in a manner consistent with the allocation determined pursuant to this Section 2.8 (as revised to take into account subsequent adjustments to the Purchase Price, including adjustments to the Purchase Price pursuant to Section 2.6 and Section 2.7 and any indemnification payment treated as an adjustment to the Purchase Price pursuant to Section 7.7, as mutually agreed upon by the Parties and in accordance with the provisions of the Code and the Treasury Regulations thereunder). Each of Buyer and Seller agrees to provide the other promptly with any other information required to complete Form 8594. Each of Buyer and Seller shall notify and provide the other with reasonable assistance in the event of an examination, audit or other proceeding regarding the agreed upon allocation of the Purchase Price.

(b) In compliance with the Settlement Agreement's requirement to fairly allocate among individual assets the sale price of any assets that are sold as a group, the Parties acknowledge and agree that the portion of the Purchase Price allocable to each Facility and to the ARCO Shares for purposes of the ARCO ROFR is as set forth on Schedule 2.8(b).

**Section 2.9 Closing.** Subject to the terms and conditions of this Agreement, the closing of the transactions contemplated by this Agreement (the "**Closing**") shall take place at the offices of Seller, 780 N. Commercial Street, Manchester, New Hampshire 03105-0330, beginning at 10:00 a.m. local time, on the third (3<sup>rd</sup>) Business Day following the date on which all of the conditions set forth in ARTICLE VI have either been satisfied or expressly waived by the Party for whose benefit such condition exists (other than conditions which, by their nature, are to be satisfied at Closing, but subject to the satisfaction or waiver of those conditions), or at such other time, date or place as the Parties may mutually agree. The date of Closing is hereinafter called the "**Closing Date**." The Closing shall be effective for all purposes herein as of 12:01 a.m. Eastern time on the Closing Date.

**Section 2.10 Deliveries by Seller at Closing.** At Closing, Seller shall deliver the following to Buyer, duly executed and properly acknowledged, if appropriate:

- (a) With respect to each parcel of Real Property, a deed conveying such parcel to Buyer, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) and otherwise in a form suitable for recording (each, a “**Deed**”);
- (b) With respect to each Assigned Lease, an assignment and assumption of lease, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) and otherwise in a form suitable for recording, if necessary (each, an “**Assignment and Assumption of Lease**”);
- (c) A bill of sale transferring the tangible personal property included in the Acquired Assets to Buyer, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Bill of Sale**”);
- (d) An assignment and assumption agreement pursuant to which Seller shall assign certain rights, liabilities and obligations to Buyer and Buyer shall assume the Assumed Liabilities, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Assignment and Assumption Agreement**”);
- (e) An agreement between the Parties evidencing their agreement as to the demarcation of ownership with respect to certain assets not situated wholly on real property owned, or to be owned, by either Seller or Buyer, as applicable, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Asset Demarcation Agreement**”);
- (f) With respect to each Facility, an agreement between the Parties respecting the interconnection of such Facility with Seller’s transmission system, substantially in the applicable forms to be agreed to by Seller and Buyer in accordance with Section 5.2(f) (together, the “**Interconnection Agreements**”);
- (g) A release of the Acquired Assets from the Lien imposed by the Mortgage Indenture, substantially in the form to be agreed to by Seller and Buyer in accordance with Section 5.2(f) (the “**Release of Mortgage Indenture**”);
- (h) The Easements;
- (i) If requested by Buyer, the Transition Services Agreement;
- (j) Stock certificates evidencing the ARCO Shares, duly endorsed in blank or accompanied by stock powers or other instruments of transfer duly executed in blank;
- (k) Certificates of title for the vehicles and boats which are part of the Acquired Assets;
- (l) Copies of all Seller Required Consents;
- (m) Seller’s Transfer Tax Declarations of Consideration required under New Hampshire RSA 78-B:10 and New Hampshire Department of Revenue Administration rules (Forms CD-57-S);
- (n) A certification of non-foreign status, pursuant to Treasury Regulations Section 1.1445-2(b)(2), with respect to Seller;
- (o) The officer’s certificate of Seller required by Section 6.1(c);
- (p) A certificate of existence and good standing with respect to Seller, as of a recent date, issued by the secretary of state or other appropriate Governmental Authority of the jurisdiction of Seller’s organization, and certificates of good standing and qualification or authorization to do business (or the equivalent certificates) with respect to Seller, each as of a recent date, issued by the secretary of state or similar Governmental Authority in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary;
- (q) A copy, certified by the Secretary or an Assistant Secretary of Seller, of corporate resolutions authorizing the execution and delivery of this Agreement and the Related Agreements and the consummation of the transactions contemplated hereby and thereby;
- (r) A certificate of the Secretary or an Assistant Secretary of Seller which shall identify by name and title and bear the signature of the officers of Seller authorized to execute and deliver this Agreement and the Related Agreements; and
- (s) All such other instruments or documents as Buyer and its counsel may reasonably request in order to give effect to the transfer of the Acquired Assets as contemplated hereby or to otherwise facilitate the transactions contemplated by this Agreement and the Related Agreements; *provided, however*, that this Section 2.10(s) shall not require Seller to prepare or obtain any surveys relating to the Real Property or Leased Real Property other than those previously provided to Buyer.

**Section 2.11 Deliveries by Buyer at Closing.** At Closing, Buyer shall deliver to Seller, duly executed and properly acknowledged, if appropriate:

- (a) The Closing Purchase Price in accordance with Section 2.5;
- (b) The Assignment and Assumption of Lease respecting each Assigned Lease;
- (c) The Bill of Sale;
- (d) The Assignment and Assumption Agreement;
- (e) The Asset Demarcation Agreement;
- (f) The Interconnection Agreements;
- (g) The Easements;
- (h) If requested by Buyer, the Transition Services Agreement;
- (i) Copies of all Buyer Required Consents;
- (j) Evidence of Buyer's membership in NEPOOL;
- (k) Buyer's Transfer Tax Declarations of Consideration required under New Hampshire RSA 78-B:10 and New Hampshire Department of Revenue Administration rules (Forms CD-57-P) and Inventory of Property Transfer Forms (Forms PA-34);
- (l) All applicable exemption certificates with respect to Taxes that would otherwise be imposed with respect to the transactions contemplated by this Agreement;
- (m) The officer's certificate of Buyer required by Section 6.2(c);
- (n) A certificate of existence and good standing with respect to Buyer, as of a recent date, issued by the secretary of state or other appropriate Governmental Authority of the jurisdiction of Buyer's organization, and certificates of good standing and qualification or authorization to do business (or the equivalent certificates) with respect to Buyer, each as of a recent date, issued by the secretary of state or similar Governmental Authority in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary;
- (o) A copy, certified by the Secretary or an Assistant Secretary of Buyer, of resolutions authorizing the execution and delivery of this Agreement and the Related Agreements and the consummation of the transactions contemplated hereby and thereby;
- (p) A certificate of the Secretary or an Assistant Secretary of Buyer which shall identify by name and title and bear the signature of the officers of Seller authorized to execute and deliver this Agreement and the Related Agreements; and
- (q) All such other instruments or documents as Seller and its counsel may reasonably request in order to give effect to the transfer of the Acquired Assets or the assumption of the Assumed Liabilities as contemplated hereby or to otherwise facilitate the transactions contemplated by this Agreement and the Related Agreements.

### **ARTICLE III REPRESENTATIONS AND WARRANTIES OF SELLER**

Seller represents and warrants to Buyer that the statements contained in this ARTICLE III are true and correct as of the Effective Date and as of the Closing Date, except as set forth in the Schedules.

**Section 3.1 Organization and Existence.** Seller is a corporation duly organized, validly existing and in good standing under the Laws of the State of New Hampshire. Seller is duly qualified or authorized to do business in each other jurisdiction in which the ownership or operation of the Acquired Assets make such qualification or authorization necessary, except in those jurisdictions where the failure to be so duly qualified or authorized would not have a Material Adverse Effect.

**Section 3.2 Authority and Enforceability.** Seller has the corporate power and authority to execute and deliver this Agreement and the Related Agreements to which it is a party and, subject to receipt of the Seller Required Consents, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. All corporate actions or

proceedings to be taken by or on the part of Seller to authorize and permit the due execution and valid delivery by Seller of this Agreement and the Related Agreements to which it is a party, the performance by Seller of its obligations hereunder and thereunder, and the consummation by Seller of the transactions contemplated hereby and thereby have been duly and properly taken. This Agreement has been duly executed and delivered by Seller and, assuming the due authorization, execution and delivery by Buyer and receipt of the Seller Required Consents, constitutes the valid and legally binding obligation of Seller, enforceable against Seller in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law. When each Related Agreement to which Seller is a party has been duly executed and delivered by Seller, assuming the due authorization, execution and delivery by each other party thereto and receipt of the Seller Required Consents, such Related Agreement will constitute the valid and legally binding obligation of Seller, enforceable against Seller in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law.

**Section 3.3 No Conflicts; Consents and Approvals.** Assuming all of the Consents of the Governmental Authorities and other Persons set forth on Schedule 3.3 (the “**Seller Required Consents**”) have been obtained, and assuming the truth and accuracy of Buyer's representations and warranties set forth herein, the execution and delivery by Seller of this Agreement and the Related Agreements to which it is or will be a party do not and will not, the performance by Seller of its obligations hereunder and thereunder will not, and the consummation of the transactions contemplated hereby and thereby will not:

(a) conflict with or result in a violation or breach of any of the terms, conditions or provisions of the Organizational Documents of Seller;

(b) (i) conflict with, result in a breach of, constitute a default under, result in the acceleration of, or create in any Person the right to accelerate, terminate, modify, revoke, suspend or cancel (with or without giving of notice, the lapse of time or both), any material Contract to which Seller is bound or to which any of the Acquired Assets is subject, (ii) conflict with or result in a violation or breach of any Law, Order or Permit to which Seller or any of the Acquired Assets is subject, or (iii) require the Consent of any Governmental Authority under any applicable Law; or

(c) result in the imposition or creation of any Lien on any Acquired Asset, other than any Permitted Lien.

**Section 3.4 Legal Proceedings.** Except as set forth on Schedule 3.4, there is no Claim pending or, to Seller's Knowledge, threatened against Seller (a) that relates to any Facility or any of the Acquired Assets or that would, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect, or (b) that, as of the Effective Date, seeks an Order restraining, enjoining or otherwise prohibiting or making illegal any of the transactions contemplated hereby. Except as set forth on Schedule 3.4, neither Seller (to the extent relating to the Acquired Assets or the Business) nor any of the Acquired Assets are bound by any Order (other than any Order of general applicability). As of the Effective Date, Seller is not subject to any Order that prohibits the consummation of the transactions contemplated by this Agreement. None of the representations and warranties set forth in this Section 3.4 shall be deemed to relate to (i) Tax matters, which are addressed in Section 3.10, (ii) environmental matters, which are addressed in Section 3.11, (iii) employment and labor matters, which are addressed in Section 3.12, or (iv) employee benefits matters, which are addressed in Section 3.13.

**Section 3.5 Compliance with Laws; Permits.**

(a) Except as set forth on Schedule 3.5(a), Seller is in compliance in all material respects with all Laws applicable to the Acquired Assets and Seller's ownership and operation thereof.

(b) Schedule 3.5(b) lists all Permits (other than Environmental Permits) that are material to the ownership and operation of the Acquired Assets, and identifies those material Permits that are Transferable Permits. The Permits listed in Schedule 3.5(b) are in full force and effect. Seller is in compliance in all material respects with the terms of all Permits listed in Schedule 3.5(b).

(c) None of the representations and warranties set forth in this Section 3.5 shall be deemed to relate to (i) Tax matters, which are addressed in Section 3.10, (ii) environmental matters, which are addressed in Section 3.11, (iii) employment and labor matters, which are addressed in Section 3.12, or (iv) employee benefits matters, which are addressed in Section 3.13.

**Section 3.6 Title to Acquired Assets.** Except for Permitted Liens, Seller has valid title to the Real Property, and leasehold interests in the Leased Real Property, free and clear of Liens other than Permitted Liens. Seller has valid title to, valid leasehold interests in or valid licenses or rights to use all other Acquired Assets, free and clear of Liens other than Permitted Liens.

**Section 3.7 Assets Used in Operation of the Facilities.** Except as set forth in Schedule 3.7, (a) the Acquired Assets include

all of the material assets and properties that are used by Seller in the operation of the Facilities and necessary for the operation of the Business, and (b) all Acquired Assets that constitute tangible personal property are currently located at (or are in transit to) the Facilities and no such Acquired Assets intended for the Facilities are being held by Third Parties.

### **Section 3.8 Material Contracts.**

(a) Except (i) as listed in Schedule 2.1(b) or Schedule 2.1(e), (ii) for Contracts that will expire or be fully performed prior to the Closing Date, (iii) for Contracts that can be terminated upon sixty (60) days' or less notice without liability, and (iv) for Contracts entered into in the ordinary course of business that will not by their terms extend more than two (2) years beyond the Closing Date and whose payment obligations do not exceed Three Hundred Thousand Dollars (\$300,000) individually or One Million Dollars (\$1,000,000) in the aggregate, Seller is not a party to any Contract that is material to the ownership or operation of the Acquired Assets as owned and operated by Seller on the Effective Date.

(b) Except as described in Schedule 3.8(b), and assuming all Seller Required Consents required in connection with each Material Contract are obtained prior to Closing, (i) each Material Contract (except to the extent such Material Contract terminates or expires after the Effective Date in accordance with its terms) is in full force and effect and is a valid and binding obligation of Seller and, to Seller's Knowledge, of the other parties thereto, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether considered in a proceeding in equity or at law, (ii) neither Seller nor, to Seller's Knowledge, any other party thereto, is in violation of or default under any Material Contract, and (iii) each Material Contract may be assigned to Buyer pursuant to this Agreement without breaching the terms thereof or resulting in the forfeiture or impairment of any material rights thereunder. No Material Contract has been terminated, repudiated, rescinded, amended or modified and, to Seller's Knowledge, no such termination, repudiation, rescission, amendment or modification is contemplated.

**Section 3.9 Insurance.** The Acquired Assets are insured to the extent specified under the material insurance policies listed on Schedule 3.9. No written notice of cancellation or termination has been received by Seller with respect to any such policy that has not been replaced on substantially similar terms prior to the date of such cancellation or termination. Schedule 3.9 sets forth a list of all pending claims that have been made under any such policy with respect to the Acquired Assets. Except as described in Schedule 3.9, Seller has not been refused any material insurance with respect to the Acquired Assets, nor has coverage with respect to the Acquired Assets been limited in any material respect by any insurance carrier to which Seller has applied for any such insurance or with which it has carried insurance, in each case, during the twelve (12) months ending on the Effective Date.

**Section 3.10 Taxes.** Seller has filed all Tax Returns that it was required to file with respect to the Acquired Assets and has paid all Taxes that have become due as indicated thereon (except where Seller is contesting such Taxes in good faith by appropriate proceedings), where the failure to so file or pay would, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect or result in any Liability to Buyer. There is no unpaid Tax due and payable that would reasonably be expected to result in a Material Adverse Effect or for which Buyer could become liable. Except as set forth on Schedule 3.10, there is no audit or other Claim now pending with respect to any material Tax respecting the Acquired Assets. Notwithstanding any other provision of this Agreement to the contrary, this Section 3.10 contains the sole and exclusive representations and warranties of Seller relating to Tax matters.

### **Section 3.11 Environmental Matters.**

(a) Schedule 3.11(a) lists all Environmental Permits that are material to the ownership and operation of the Acquired Assets, and identifies those material Environmental Permits that are Transferable Permits. Except as set forth on Schedule 3.11(a), the Environmental Permits listed in Schedule 3.11(a) are in full force and effect.

(b) Except as disclosed on Schedule 3.11(b), during the past five (5) years, with respect to the Acquired Assets: (i) Seller has not received any written notice from any Governmental Authority that it is not in compliance with Environmental Laws or that it failed to obtain material Environmental Permits; (ii) Seller has not received any written notice from any Governmental Authority that any Acquired Asset is listed under the Comprehensive Environmental Response, Compensation Liability Information Systems or any similar state list; (iii) Seller has not received written notice from any Person alleging Liability for any Environmental Claims and no Environmental Claims are pending or, to Seller's Knowledge, threatened, against Seller by any Governmental Authority or third party under any Environmental Laws; and (iv) Seller was not required by any applicable Environmental Laws to place any use or activities restrictions or any institutional controls on any Acquired Assets. Except as disclosed on Schedule 3.11(b), with respect to the Acquired Assets, there has been no occurrence of any the events described in clauses (i) – (iv) of the previous sentence at any time during Seller's ownership of the Acquired Assets which are not finally resolved or satisfied. Except as described in Schedule 3.11(b), Seller has no Knowledge of any matters which could give rise to material Environmental Liabilities.

(c) To the Seller's Knowledge, there has been no Release of Hazardous Substances in violation of Environmental

Laws at any of the Facilities that has not been duly and finally resolved to a condition of “No Further Action Required” or equivalent under applicable Environmental Laws.

(d) Notwithstanding any other provision of this Agreement to the contrary, this Section 3.11 contains the sole and exclusive representations and warranties of Seller relating to Environmental Laws, Environmental Permits, Hazardous Substances or other environmental matters.

### **Section 3.12 Employment and Labor Matters.**

(a) Schedule 3.12(a) sets forth (i) a list, organized by job classification at each Facility, of all employees of Seller who are represented by the Union and employed under the terms of the Generation CBA, and who are primarily employed in the operation or support of the Facilities as of the Effective Date (the “**Represented Scheduled Employees**”), and (ii) a list of all other employees of Seller or Eversource Service who are primarily employed in the operation or support of the Facilities as of the Effective Date, but are not represented by the Union (the “**Non-Represented Scheduled Employees**” and, together with the Represented Scheduled Employees, the “**Scheduled Employees**”), which list shall be amended during the Interim Period to reflect any changes thereto, to the extent such changes are not in violation of any applicable covenants in Section 5.5. Except as set forth on Schedule 3.12(a), there are no agreements or contracts for employment between Seller, on the one hand, and any Non-Represented Scheduled Employee, on the other which require the Buyer to pay any severance or other amounts following termination of such Non-Represented Scheduled Employee’s employment.

(b) The Generation CBA is the only collective bargaining agreement to which Seller is a party and which governs terms and conditions of employment of any Scheduled Employees listed in part (i) of Schedule 3.12(a), and Seller is not a party to any other collective bargaining agreement that is applicable to any other Scheduled Employee. Except as described in Schedule 3.12(b): (i) Seller has not experienced any strikes or work stoppages at any of the Facilities due to labor disagreements in the past five (5) years and to Seller’s Knowledge none is currently pending or threatened; (ii) Seller is in compliance in all material respects with all applicable Laws respecting employment and employment practices, equal employment opportunity, occupational health and safety and affirmative action, terms and conditions of employment and wages and hours with respect to the Scheduled Employees; (iii) Seller is not currently subject to any pending, or to Seller’s Knowledge threatened, unfair labor practice charge or complaint against Seller before the National Labor Relations Board or any other Governmental Authority with respect to the Scheduled Employees; (iv) no arbitration proceeding arising out of or under the Generation CBA is pending or, to Seller’s Knowledge threatened, against Seller with respect to the Scheduled Employees; and (v) Seller is in compliance in all material respects with the Generation CBA.

(c) Notwithstanding any other provision of this Agreement to the contrary, this Section 3.12 contains the sole and exclusive representations and warranties of Seller relating to employment and labor matters.

**Section 3.13 Employee Benefit Plans.** Schedule 3.13 lists, as of the Effective Date, all Employee Benefit Plans established, sponsored, maintained or contributed to (or required to be contributed to) by Seller in respect of the Scheduled Employees. True and complete copies of all such Employee Benefit Plans have been Made Available to Buyer. Seller does not contribute to, and has no obligation to contribute to, a “multiemployer plan” within the meaning of Section 3(37) of ERISA. No liability under Title IV or Section 302 of ERISA or Section 412 of the Code has been incurred by Seller with respect to the Scheduled Employees that has not been satisfied in full, and to Seller’s Knowledge no condition exists that presents a material risk to Seller of incurring any such liability, other than liability for premiums due the Pension Benefit Guaranty Corporation, which premiums have been paid. Notwithstanding any other provision of this Agreement to the contrary, this Section 3.13 contains the sole and exclusive representations and warranties of Seller relating to employee benefits matters.

**Section 3.14 Condemnation.** Seller has received no written notice from any Governmental Authority of any pending or threatened proceeding to condemn or take by power of eminent domain or otherwise, by any Governmental Authority, all or any part of the Acquired Assets.

**Section 3.15 Regulatory Status.** Seller is a “public utility” under New Hampshire RSA 362:2 and is subject to regulation as such by the NHPUC. With respect to Canaan Station, Seller is a “public service corporation” under the laws of Vermont and is subject to regulation as such by the VTPUC. Seller is an “electric utility company” that is a “subsidiary company” of a “holding company” which is registered under (and as those terms are defined in) the Public Utility Holding Company Act of 2005, and is subject to regulation as such by FERC. With respect to the Facilities and the Business, Seller has authorization from FERC to charge market-based rates for wholesale sales of capacity and energy in a final order, no longer subject to rehearing or appeal. Seller is not subject to any pending action, and to Seller’s Knowledge, no such action is threatened, in either case by FERC, NERC, any independent system operator or regional transmission organization, any state utility, or any state public services commission in any manner relating to the Facilities or the Business, and Seller is in compliance in all material respects with the requirements under the Federal Power Act, applicable to a “public utility” with authority to sell wholesale electric power, capacity and ancillary services at market-based rates and is in compliance in all material respects with all requirements of any federal, state, independent system operator or regional transmission

organization related to the generation or sale of wholesale power, in each case to the extent related to the Business. To Seller's Knowledge, there has been no Claim or conduct by any Person that would serve as the basis for any Claim against Seller before FERC. All material filings required to be made within the last three (3) calendar years with the FERC under the Federal Power Act, the Public Utility Holding Company Act of 2005, the Department of Energy or any applicable state public utility commissions, as the case may be, have been made, including all material forms, statements, reports, agreements and all material documents, exhibits, amendments and supplements appertaining thereto, including all rates, tariffs and related documents, in each case to the extent related to the Business, and all such filings complied in all material respects, as of their respective dates, with applicable requirements of applicable Law.

**Section 3.16 ARCO Shares.** Seller is the sole record and beneficial owner of the ARCO Shares, free and clear of Liens other than Permitted Liens. The ARCO By-Laws are in full force and effect, have not been terminated, repudiated, rescinded, amended or modified, and no such termination, repudiation, rescission, amendment or modification is contemplated. Other than the ARCO Bylaws, there are no agreements among or binding upon all of the shareholders of ARCO (in their capacity as such). Notwithstanding any other provision of this Agreement to the contrary, Section 3.2, Section 3.3, Section 3.4 and this Section 3.16 contain the sole and exclusive representations and warranties of Seller relating to ARCO and the ARCO Shares.

**Section 3.17 Brokers.** Except for the fees and expenses of J.P. Morgan Securities LLC, for which Seller is solely responsible, Seller does not have any Liability to pay fees or commissions to any broker, finder or agent with respect to the transactions contemplated by this Agreement or the Related Agreements for which Buyer could become liable or obligated.

**Section 3.18 Complete Copies.** True and complete copies of the Material Contracts, the Assigned Leases, the Transferable Permits and the Generation CBA have been Made Available to Buyer.

**Section 3.19 Exclusive Representations and Warranties.** It is the explicit intent of each Party hereto that Seller is not making any representation or warranty whatsoever, express or implied, respecting the Business, the Acquired Assets, the Assumed Liabilities or the transactions contemplated by this Agreement and the Related Agreements, except those representations and warranties expressly set forth in this ARTICLE III.

#### **ARTICLE IV REPRESENTATIONS AND WARRANTIES OF BUYER**

Buyer represents and warrants to Seller that the statements contained in this ARTICLE IV are true and correct as of the Effective Date and the Closing Date.

**Section 4.1 Organization and Existence.** Buyer is a limited liability company duly organized, validly existing and in good standing under the Laws of the State of Delaware. Buyer is duly qualified or authorized to do business in each other jurisdiction where the actions to be performed hereunder make such qualification or authorization necessary.

**Section 4.2 Authority and Enforceability.** Buyer has the limited liability company power and authority to execute and deliver this Agreement and the Related Agreements to which it is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. All limited liability company actions or proceedings to be taken by or on the part of Buyer to authorize and permit the due execution and valid delivery by Buyer of this Agreement and the Related Agreements to which it is a party, the performance by Buyer of its obligations hereunder and thereunder, and the consummation by Buyer of the transactions contemplated hereby and thereby have been duly and properly taken. This Agreement has been duly executed and delivered by Buyer and, assuming the due authorization, execution and delivery by Seller, constitutes the valid and legally binding obligation of Buyer, enforceable against Buyer in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law. When each Related Agreement to which Buyer is a party has been duly executed and delivered by Buyer, assuming the due authorization, execution and delivery by each other party thereto, such Related Agreement will constitute the valid and legally binding obligation of Buyer, enforceable against Buyer in accordance with its terms and conditions, subject to applicable bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance or other similar Laws relating to creditors' rights generally and general principles of equity, whether such enforceability is considered in a proceeding in equity or at law.

**Section 4.3 Noncontravention.** The execution and delivery by Buyer of this Agreement and the Related Agreements to which it is or will be a party do not and will not, the performance by Buyer of its obligations hereunder and thereunder will not, and the consummation of the transactions contemplated hereby and thereby will not:

(a) conflict with or result in a violation or breach of any of the terms, conditions or provisions of the Organizational Documents of Buyer;

(b) conflict with, result in a breach of, constitute a default under, result in the acceleration of, or create in any Person the right to accelerate, terminate, modify, revoke, suspend or cancel (with or without giving of notice, the lapse of time or both), any Contract to which Buyer is bound or to which any of its assets is subject, except as would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on Buyer's ability to perform its obligations hereunder; or

(c) assuming all of the Consents of the Governmental Authorities set forth on Schedule 4.3(c) (the "**Buyer Required Consents**") have been obtained, (i) conflict with or result in a violation or breach of any Law, Order or Permit to which Buyer or any of its assets is subject, or (ii) require the Consent of any Governmental Authority under any applicable Law; except, in the case of each of clauses (i) and (ii), as would not reasonably be expected to have, individually or in the aggregate, a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.4 Legal Proceedings.** Buyer has not been served with notice of any Claim and no Claim is pending or, to Buyer's knowledge, threatened, against Buyer (a) that seeks an Order restraining, enjoining or otherwise prohibiting or making illegal any of the transactions contemplated hereby or (b) that would, individually or in the aggregate, reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder. Buyer is not bound by any Order that prohibits the consummation of the transactions contemplated by this Agreement or that would, individually or in the aggregate, reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.5 Compliance with Laws.** Buyer is not in violation of any Law applicable to Buyer or its assets the effect of which, individually or in the aggregate, would reasonably be expected to have a material adverse effect on Buyer's ability to perform its obligations hereunder.

**Section 4.6 Brokers.** Neither Buyer nor any of its Affiliates has any Liability to pay fees or commissions to any broker, finder or agent with respect to the transactions contemplated by this Agreement for which Seller or its Affiliates could become liable or obligated.

**Section 4.7 Availability of Funds.** Buyer has, and at the Closing will have, (a) cash on hand or other sources of immediately available funds in amounts sufficient to pay the full amount of the Purchase Price as well as any related fees, costs and expenses incurred by Buyer in connection with the transactions contemplated hereby, and (b) the resources and capabilities (financial or otherwise) to perform its obligations (including the Assumed Liabilities) under this Agreement and any Related Agreements. Buyer acknowledges and agrees that, notwithstanding anything to the contrary contained herein, its obligation to consummate the transactions contemplated hereby is not subject to Buyer or any of its Affiliates obtaining any financing, or to any other contingency or condition respecting financing or availability of funds.

**Section 4.8 Qualified Buyer.** To Buyer's knowledge, Buyer is qualified to obtain any Permits necessary for Buyer to own and operate the Acquired Assets as of the Closing, to the extent required by any Related Agreement or this Agreement, or is contemplated by Buyer.

**Section 4.9 Governmental Approvals.** As of the Effective Date, neither Buyer nor any of its Affiliates is a party to any Contract respecting the construction, development, acquisition, ownership or operation of any power facility or related asset that would reasonably be expected to cause a delay in any Governmental Authority's granting of a Buyer Required Consent or Seller Required Consent, and neither Buyer nor any of its Affiliates has any plans or has engaged in any discussions to enter into any such Contract prior to the Closing Date.

**Section 4.10 WARN Act.** Buyer does not intend, with respect to the Acquired Assets or Transferred Employees, to engage in a "plant closing" or "mass layoff," as such terms are defined in the WARN Act, within sixty (60) days after the Closing Date.

**Section 4.11 Independent Investigation.** Buyer is a sophisticated Person, knowledgeable about the industry in which Seller operates, experienced in investments in such businesses, and able to bear the economic risks associated with the transactions contemplated by this Agreement and the Related Agreements. Buyer has such knowledge and experience as to be aware of the risks and uncertainties inherent in the acquisition of the Acquired Assets, the assumption of the Assumed Liabilities, and the rights and obligations of the type contemplated in this Agreement. Buyer has conducted to its satisfaction, independently and without reliance on Seller or its Representatives (except to the extent that Buyer has relied on the representations and warranties of Seller set forth in ARTICLE III hereof), its own investigation, review and analysis of the Facilities, the Acquired Assets and the Assumed Liabilities, and based on such investigation, review and analysis, has formed an independent judgment concerning the assets, Liabilities, condition, operations and prospects of the Acquired Assets and the ownership and operation thereof. In making its decision to execute this Agreement and the Related Agreements and to enter into the transactions contemplated hereby and thereby, Buyer has relied and will rely solely upon the results of such independent investigation, review and analysis and the terms and conditions of this Agreement (including the representations and warranties of Seller set forth in ARTICLE III hereof) and the Related Agreements. Buyer acknowledges that it has had reasonable and sufficient access to the Facilities, the Acquired Assets and documents and other

information and materials in connection therewith, that all documents and other information and materials requested by Buyer have been provided to Buyer to its satisfaction, and that it and its Representatives have had the opportunity to meet with the personnel and Representatives of Seller to discuss and ask questions concerning the foregoing.

**Section 4.12 Disclaimer Regarding Projections.** Buyer may be in possession of certain plans, projections and other forecasts regarding the Acquired Assets and the Assumed Liabilities, including estimates, budgets of future revenues, expenses or expenditures, projections of future results of operations (or any component thereof), future cash flows (or any component thereof) or future financial condition (or any component thereof). Buyer acknowledges that there are substantial uncertainties inherent in attempting to make such plans, projections and other forecasts, that Buyer is familiar with such uncertainties, that Buyer is taking full responsibility for making its own independent evaluation of the adequacy and accuracy of all plans, projections and other forecasts so furnished to it, and that Buyer shall have no claim against Seller, its Affiliates or their respective Representatives with respect thereto. Accordingly, Buyer acknowledges that without limiting the generality of this Section 4.12, neither Seller nor any of its Affiliates has made any representation or warranty with respect to such plans, projections or other forecasts.

**Section 4.13 Investment Purposes; No Distribution.** Buyer acknowledges that the ARCO Shares being acquired pursuant to this Agreement have not been registered under the Securities Act of 1933 or under any state or foreign securities Laws, and that the ARCO Shares may not be transferred, assigned, sold, offered for sale, pledged or otherwise disposed of except pursuant to the registration provisions of the Securities Act of 1933 and any applicable state or foreign securities Laws or pursuant to an applicable exemption from registration under the Securities Act of 1933 and any applicable state or foreign securities Laws. Buyer is purchasing the ARCO Shares for its own account for investment purposes and not with a view to any public resale or other distribution thereof. Buyer is an “accredited investor” as defined under Rule 501 promulgated under the Securities Act of 1933, is able to bear the economic risk of holding the ARCO Shares for an indefinite period (including total loss of its investment), and has sufficient knowledge and experience in financial and business matters so as to be capable of evaluating the merits and risk of such investment.

## ARTICLE V COVENANTS

**Section 5.1 Closing Conditions.** From the Effective Date until the Closing (the “**Interim Period**”), subject to the terms and conditions of this Agreement, each Party shall use its commercially reasonable efforts to take such actions as are necessary, proper or advisable in order to expeditiously consummate and make effective the transactions contemplated by this Agreement and the Related Agreements (including satisfaction, but not waiver, of those closing conditions set forth in ARTICLE VI).

**Section 5.2 Notices, Consents and Approvals.** During the Interim Period:

(a) Subject to Section 5.2(c), during the Interim Period, each Party will and will cause its respective applicable Affiliates to, in order to consummate the transactions contemplated by this Agreement and the Related Agreements, provide reasonable cooperation to the other Party, and proceed diligently and in good faith and use all reasonable best efforts, as promptly as practicable, to (i) obtain the Buyer Required Consents and the Seller Required Consents, (ii) make all required filings with, and give all required notices to, the applicable Governmental Authorities or other Persons required to consummate the transactions contemplated by this Agreement and the Related Agreements, and (iii) cooperate in good faith with the applicable Governmental Authorities or other Persons and promptly provide such other information and communications to such Governmental Authorities or other Persons as such Governmental Authorities or other Persons may reasonably request in connection with the foregoing. The Parties will provide prompt notification to each other when any such Consent referred to in this Section 5.2(a) is obtained, taken, made, given or denied, as applicable, and will, subject to Section 5.2(b), promptly advise each other of any material communications (in oral or written form) with any Governmental Authority or other Person regarding any of the transactions contemplated under this Agreement or the Related Agreements.

(b) In furtherance of the covenants set forth in Section 5.2(a):

(i) As soon as practicable following the Effective Date, Buyer and Seller shall prepare all necessary filings in connection with the transactions contemplated by this Agreement and the Related Agreements that may be required to be filed by such Party with applicable Governmental Authorities or under any applicable Laws. Such filings shall be submitted as soon as practicable following the Effective Date, but in no event later than thirty (30) days thereafter (subject to extension by mutual written agreement. The Parties shall (A) request expedited treatment of any such filings (where applicable), (B) subject to applicable Law and the instructions of any Governmental Authority, keep each other apprised of the status of matters relating to such filings, including by promptly furnishing each other with copies of any notices, correspondence or other written communication from the relevant Governmental Authority, (C) promptly make any appropriate or necessary subsequent or supplemental filings, submissions or responses to any Governmental Authority, and (D) cooperate in the preparation of such filings, submissions or responses as is reasonably necessary and appropriate, including by making available to the other Party such information as the other Party may reasonably request in order to complete such filings or respond to information requests

by any Governmental Authority. Prior to making any material filing, submission, response or other communication to any Governmental Authority (or members of their respective staffs) in oral or written form, each Party will permit the other Party (or its counsel) a reasonable opportunity to review and provide comments on such proposed filing, submission, response or other communication, and will consult with and consider in good faith the views of the other Party in connection therewith. Each Party will consult with the other Party in advance of any material meeting or conference (in person or by telephone) with any such Governmental Authority, and to the extent not prohibited by Law or such Governmental Authority, give the other Party the opportunity to attend and to participate in such meetings and conferences. Notwithstanding the foregoing, neither Buyer nor Seller shall be obligated to share any information, filing, submission or response with the other Party if a Governmental Authority objects to the sharing of such information, filing, submission or response or if prohibited by applicable Law.

(ii) The Parties shall not, and shall cause their respective Affiliates not to, take any action that would reasonably be expected to materially adversely affect or delay the Consent of any Governmental Authority with respect to any of the filings referred to in Section 5.2(a). In addition, Buyer shall not knowingly take any action that would reasonably be expected to materially adversely affect or delay the Consent of any Governmental Authority with respect to any other asset sales being undertaken by Seller.

(iii) Except as set forth in Section 9.1 or as otherwise set forth in this Section 5.2, each Party shall bear its own fees, costs and all other expenses (including filing fees, transfer fees, legal fees and other filing preparation costs) associated with any Consents or other actions contemplated by this Section 5.2 in connection with or otherwise related to the transactions contemplated by this Agreement and the Related Agreements.

(c) In addition to the covenants set forth in Section 5.2(a) and Section 5.2(b), Buyer and Seller, as applicable, shall undertake promptly any and all actions required to complete lawfully the transactions contemplated by this Agreement and the Related Agreements prior to the Outside Date, including by (i) responding to and complying with, as promptly as reasonably practicable, any request for information or documentary material regarding such transactions from any relevant Governmental Authority (including, if applicable, responding to any “second request” for additional information or documentary material under the HSR Act as promptly as reasonably practicable), (ii) causing the prompt expiration or termination (including requesting early termination and/or approvals thereof) of any applicable waiting period and clearance or approval by any relevant Governmental Authority, including defense against, and the resolution of, any objections or challenges, in court or otherwise, by any relevant Governmental Authority or other Person preventing consummation of such transactions, and (iii) making any necessary post-Closing filing or proffering and consenting to an Order providing for the sale or other disposition, or the holding separate, of particular assets, categories of assets or lines of business, including the Acquired Assets or any other assets or lines of business of Buyer or any of its Affiliates, in order to mitigate or otherwise remedy any requirements of, or concerns of, any Governmental Authority, or proffering and consenting to any other restriction, prohibition or limitation on any of the Acquired Assets, or on Buyer or any of Buyer’s Affiliates or any of their respective assets, in order to mitigate or remedy such requirements or concerns. The entry by any Governmental Authority in any legal proceeding of an Order permitting the consummation of the transactions contemplated by this Agreement and/or any of the Related Agreements but which is subject to certain conditions or requires Buyer or any of its Affiliates to take any action, including any restructuring of the Acquired Assets or lines of business of Buyer or any of its Affiliates or any changes to the existing business of Buyer or any of its Affiliates, shall not be deemed a failure to satisfy the conditions specified in ARTICLE VI. For the avoidance of doubt, Buyer shall not take any action with respect to its obligations under this Section 5.2(c) which would bind Seller or any of its Affiliates irrespective of whether the transactions contemplated hereby occur.

(d) Buyer further agrees that neither it nor any of its Affiliates shall, prior to Closing, enter into any other Contract to acquire or market or control the output of, nor acquire or market or control the output of, electric generating facilities or uncommitted generation capacity in the ISO-NE market if the proposed acquisition or ability to market or control output of such additional electric generating facilities or uncommitted generation capacity in such market could reasonably be expected to increase the market power attributable to Buyer and its Affiliates in such market in a manner materially adverse to approval of the transactions contemplated by this Agreement and the Related Agreements by any relevant Governmental Authority or Counterparty or that would reasonably be expected to prevent or otherwise materially interfere with, or materially delay the consummation of the transactions contemplated hereby and thereby.

(e) During the Interim Period, Buyer and Seller shall cooperate and use their commercially reasonable efforts to secure the transfer or reissuance of the Transferable Permits to Buyer (including obtaining any necessary Consents thereto), or the substitution of Buyer for Seller where appropriate on pending applications for such Transferable Permits or renewals thereof, effective as of the Closing Date. If the Parties are unable to secure the transfer, reissuance or substitution respecting one or more Transferable Permits effective as of the Closing Date, Seller shall continue to reasonably cooperate with Buyer’s efforts to secure such transfer, reissuance or substitution following the Closing Date. Each Party agrees that it will accept the terms of all Transferable Permits as existing on the Effective Date relating to the operation of the Acquired Assets, and that it will not seek to amend any of such terms in connection with filings with Governmental Authorities relating to the transactions contemplated by this Agreement and the Related Agreements, other

than as necessary to effect the transfer or reissuance thereof to Buyer. In addition, with respect to any Transferable Permits for which the date for renewal will have passed by the Closing Date, Seller and Buyer shall cooperate to file by the Closing Date all applications with Governmental Authorities necessary to renew such Transferable Permits in a timely fashion without any material modifications to the terms thereof, except as may be required by applicable Law or to effect the renewal of such Permit in the name of Buyer.

(f) Promptly after the Effective Date and during the Interim Period, Buyer and Seller will in good faith negotiate the terms and conditions of the Related Agreements, Easements and easement plans with the intention of the forms of each being final on or before the thirtieth (30<sup>th</sup>) day after the Effective Date.

### **Section 5.3 Assigned Contracts.**

(a) During the Interim Period, Buyer and Seller shall use commercially reasonable efforts to obtain all required Consents to the assignment to Buyer of the Assigned Contracts from the applicable counterparties thereto (each, a “**Counterparty**”), effective as of the Closing Date, in accordance with the following:

(i) Seller shall have primary responsibility for obtaining all necessary Consents to the assignment of Material Contracts, *provided* that Buyer shall cooperate with Seller’s efforts in this regard and shall use commercially reasonable efforts to assist Seller when so requested by Seller. Seller shall have primary responsibility for obtaining all necessary Consents to the assignment of Other Assigned Contracts, and in furtherance thereof, to the maximum extent permitted by Law and each applicable Other Assigned Contract, Seller appoints Buyer as Seller’s agent to obtain all required Consents of any Counterparty to each of the Other Assigned Contracts for the assignment thereof to Buyer effective as of the Closing Date, which Seller shall pursue, using commercially reasonable efforts, in accordance with a mutually agreed protocol and form letters to be sent to such Counterparties.

(ii) To the extent that any Assigned Contract relates to assets or services that are both used in the operations of one or more Facilities and used by Seller in its other operations, the Parties shall cooperate and use commercially reasonable efforts to obtain the required Consent for any partial assignment, apportionment or other arrangement as may be necessary or practicable to permit Buyer to obtain such portion of assets or services necessary for the continued operation of such Facilities on and after the Closing Date, and to permit Seller to retain such other rights or portion of the assets or services to continue its operations on and after the Closing Date, it being understood that the portion of each such Assigned Contract relating to Buyer’s continued operation of such Facilities on and after the Closing Date must be assigned to or otherwise obtained by Buyer as of the Closing pursuant to Section 2.1(e), and Schedule 2.1(e) (with respect to Material Contracts) shall be updated accordingly.

(iii) Seller shall reasonably cooperate with Buyer in providing any notices to Counterparties as may be required by the terms of any Assigned Contract or as Buyer (acting reasonably) may deem necessary or advisable, including notices providing Counterparties with updated notice information and updated bank account information to which any applicable payments should be made by such Counterparties. Buyer shall, where necessary, enter into a master agreement or similar enabling agreement with any Counterparty, on substantially the same terms as those in place on the Effective Date in a master or enabling agreement between Seller and such Counterparty, in connection with the assignment to Buyer of one or more purchase orders or similar Contracts subject to such master agreement or enabling agreement with Seller.

(iv) For the avoidance of doubt, it is specifically acknowledged and agreed by the Parties that neither Party shall be obligated to incur, pay, reimburse or provide or cause any of their respective Affiliates to incur, pay, reimburse or provide, any liability, compensation, consideration or charge to obtain the Consent of any Counterparty to the assignment of any Assigned Contract except to the extent set forth in or required by the terms of such Assigned Contract.

(v) To the extent that Seller’s rights under any Contract included as an Acquired Asset may not be assigned without the Consent of another Person, and such Consent has not been obtained by the Closing, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful or ineffective (or would otherwise impair Buyer’s rights and obligations thereunder), and such Contract shall not be so assigned at the Closing (such non-assigned Contracts, the “**Non-Assigned Contracts**”). Seller and Buyer shall continue to comply with their obligations under this Section 5.3(a) to the extent and for so long as the applicable Non-Assigned Contract shall not have been assigned to Buyer (and Seller, to the maximum extent permitted by Law and such Non-Assigned Contract, shall appoint Buyer to be Seller’s agent with respect to such Non-Assigned Contract for the purpose of obtaining an assignment thereof to Buyer); *provided* that neither Seller nor Buyer shall have any obligation to offer or pay any consideration in order to obtain any such Consent to assignment; *provided, further*, that Buyer and Seller shall use their commercially reasonable efforts, to the maximum extent permitted by Law and such Non-Assigned Contract, to enter into one or more back-to-back Contracts, or such other reasonable arrangements, that would place Buyer in the same or a substantially similar position and provide Buyer the same or substantially similar rights, privileges, liabilities, benefits and obligations, in each case, as if such Non-Assigned

Contract had been assigned to Buyer as of the Closing.

(b) During the Interim Period, Buyer and Seller shall use commercially reasonable efforts to obtain all required Consents to the assignment to Buyer of any warranty described in Section 2.1(c), effective as of the Closing Date. To the extent that Seller's rights under any such warranty may not be assigned without the Consent of another Person, and such Consent has not been obtained by the Closing, this Agreement shall not constitute an agreement to assign the same if an attempted assignment would constitute a breach thereof or be unlawful or ineffective (or would otherwise impair Buyer's rights and obligations thereunder), and such warranty shall not be so assigned at the Closing. Seller and Buyer shall continue to comply with their obligations under this Section 5.3(b) to the extent and for so long as the applicable warranty shall not have been assigned to Buyer, and Seller, to the maximum extent permitted by Law and such warranty, shall from and after the Closing, appoint Buyer to be Seller's agent for the purpose of enforcing such warranty so as to the maximum extent possible to provide Buyer with the rights and obligations of such warranty. Notwithstanding the foregoing, Seller shall not be obligated to bring or file suit against any Third Party; *provided* that if Seller shall determine not to bring or file suit after being requested by Buyer to do so, Seller shall, to the maximum extent permitted by Law or any applicable Contract, enter into such reasonable arrangements with Buyer so that Buyer may bring or file such suit with respect to the rights of Seller.

#### **Section 5.4 Access of Buyer and Seller.**

(a) During the Interim Period, Seller will provide Buyer and its Representatives with reasonable access, upon reasonable prior notice and during normal business hours, to the Facilities, the Scheduled Employees and all information related to the Acquired Assets, the Scheduled Employees and the Assumed Liabilities in possession of Seller and its Affiliates (including, subject to the receipt of any required Consents and in accordance with applicable Law, such information and records respecting the Scheduled Employees as Buyer reasonably deems necessary to comply with its obligations under this Agreement), and to the Representatives of Seller who have significant responsibility with respect thereto, in each case, as reasonably requested by Buyer in connection with the consummation of the transactions contemplated by this Agreement, but only to the extent that such access does not unreasonably interfere with the operation of the Facilities or the other business or operations of Seller or its Affiliates, and subject to compliance with applicable Laws and Permits; *provided*, that Seller shall have the right to have its Representatives present for any communication with the Scheduled Employees, or any other employees or officers of Seller or its Affiliates, and to impose reasonable restrictions and requirements for safety purposes. In connection with and subject to the limitations set forth in the foregoing, during the Interim Period, Seller shall permit Buyer and its Representatives to make such reasonable inspections of the Sites as Buyer may reasonably request (and Buyer shall be entitled, at its expense, to have the Sites surveyed and to conduct non-invasive physical inspections thereof); *provided, however*, that Buyer shall not be entitled to (i) perform any Phase I or Phase II environmental studies or environmental site assessments, except that Buyer may, at Buyer's cost and direction and upon notice to and in cooperation with Seller, engage the original environmental firm to update the existing Phase I environmental assessments posted to the Data Site to enable Buyer to conduct an examination of all appropriate inquiries and be afforded the protections of a bona fide purchaser under Environmental Laws, and Buyer shall promptly furnish Seller with a copy of any such updates or reports, and shall cause Seller to be listed as an identified user of the updated reports, or (ii) collect any air, soil, surface water or ground water samples nor to perform any invasive or destructive sampling on the Sites. Seller shall furnish Buyer with a copy of each material report, schedule or other document filed or received by Seller or its Affiliates with a Governmental Authority with respect to the Acquired Assets during the Interim Period. Notwithstanding the foregoing, and without limiting the generality of the confidentiality provisions set forth in this Agreement, the Confidentiality Agreement or any Related Agreement, Seller shall not be required to provide any information or access to any Facilities (A) which Seller reasonably believes it is prohibited from providing to Buyer by reason of any applicable Law or Permit, (B) which, if provided to Buyer, could constitute a waiver by Seller of the attorney-client privilege in respect of such information, (C) which Seller is required to keep confidential or prevent access to by reason of a Contract with a Third Party, or (D) relating to any potential sale of the Acquired Assets, or any other generating facilities of Seller, to any other Person; *provided, however*, that the Parties will, to the extent legally permissible, reasonably necessary and practicable, use commercially reasonable efforts to make appropriate substitute disclosure arrangements, or seek appropriate waivers or consents, under circumstances in which the foregoing restrictions of this sentence apply.

(b) During the Interim Period, upon reasonable prior request of Buyer and at Buyer's sole cost and expense, Seller will permit designated employees or Representatives of Buyer ("**Buyer's Observers**") to observe all operations of Seller related to the Facilities, with such observation permitted on a cooperative basis in the presence of personnel of Seller during normal daytime business hours of Seller; *provided, however*, that Buyer's Observers shall not unreasonably interfere with the operation of the Facilities by Seller or the other business or operations of Seller or its Affiliates.

(c) Buyer shall not be permitted during the Interim Period to contact any of Seller's vendors, customers or suppliers, or any Governmental Authorities (except, in accordance with Section 5.2 or Section 5.3, in connection with Consents to be obtained in connection with this Agreement or any Related Agreement), regarding the operations or legal status of Seller or with respect to the transactions contemplated under this Agreement or the Related Agreements without receiving prior written authorization from Seller (not to be unreasonably withheld, conditioned or delayed); *provided*, that nothing in this Section 5.4(c) shall be construed to restrict Buyer or its Affiliates from contacting any Person to the extent the subject of such communications is not related to this Agreement or

any Related Agreement, or the transactions contemplated hereby or thereby.

(d) Buyer agrees to indemnify and hold harmless Seller, its Affiliates and their Representatives for any and all Losses incurred by Seller, its Affiliates or their Representatives arising out of any exercise of the access rights under this Section 5.4, including any Claims by any of Buyer's Representatives for any injuries or property damage while present at the Facilities, except in cases of Seller's or its Representatives' gross negligence or willful misconduct.

(e) On or as soon as reasonably practicable after the Closing Date (but in no event more than twenty (20) days thereafter), Seller shall deliver to Buyer all the Transferred Books and Records (to the extent not already located at the Facilities or otherwise Made Available to Buyer on or prior to the Closing), except as prohibited by applicable Law.

(f) Following the Closing, Seller shall be entitled to retain copies (at Seller's sole cost and expense and subject to the confidentiality and non-disclosure obligations set forth herein) of all books and records relating to its ownership or operation of the Acquired Assets and the Assumed Liabilities.

(g) After the Closing, Buyer will, and will cause its Representatives to, provide Seller and its Affiliates, including their respective Representatives, reasonable access to or copies of all books, records, files and documents to the extent they are related to the Acquired Assets or the Assumed Liabilities, and to periods ending prior to the Closing Date in order to permit Seller and its Affiliates and their respective Representatives to prepare and file their Tax Returns and to prepare for and participate in any investigation with respect thereto, to prepare for and participate in any other investigation and defend any Claims relating to or involving Seller or its Affiliates, to discharge its obligations under this Agreement, to comply with financial reporting requirements, and for other reasonable purposes, and will afford Seller and its Affiliates reasonable assistance in connection therewith at no cost to Seller. Buyer will cause such records to be maintained for not less than seven (7) years from the Closing Date and will not dispose of such records without first offering in writing to deliver them to Seller; *provided, however*, that in the event that Buyer transfers all or a portion of the Acquired Assets or the Assumed Liabilities to any Third Person during such period, Buyer may transfer to such Third Person all or a portion of the books, records, files and documents related thereto, *provided* such transferee expressly assumes in writing the obligations of Buyer under this Section 5.4(g).

(h) On and after the Closing Date, (i) at the request of either Party, the other Party shall make available to such requesting Party, its Affiliates and their respective Representatives, those employees of the non-requesting Party or its Affiliates requested by such requesting Party in connection with any Claim, including to provide testimony, to be deposed, to act as witnesses and to assist counsel, and (ii) at the reasonable request of Seller, Seller shall have reasonable access to the Transferred Employees for a period of seven (7) years following the Closing Date, for purposes of consultation or otherwise, to the extent that such access may reasonably be required by Seller in connection with matters relating to or affected by the operations of Seller prior to the Closing; *provided, however*, that, in each case, (x) such access to such employees shall not unreasonably interfere with the normal conduct of the operations of the non-requesting Party, (y) the requesting Party shall pay and reimburse the non-requesting Party for the out-of-pocket costs reasonably incurred by the non-requesting Party in making such employees available, and (z) such assistance shall be provided insofar as the same may be provided without violating any Law or Permit, or waiving any attorney-client privilege, as determined in the reasonable opinion of counsel to the non-requesting Party.

**Section 5.5 Conduct of Business Pending the Closing.** Except as set forth in Schedule 5.5, during the Interim Period, Seller will operate and maintain the Acquired Assets in the ordinary course of business consistent with Good Utility Practice, unless otherwise contemplated by this Agreement or with the prior written consent of Buyer (which consent shall not be unreasonably withheld or delayed). Without limiting the generality of the foregoing, except as otherwise expressly contemplated by this Agreement or as set forth in Schedule 5.5, Seller shall not, without the prior written consent of the Buyer (which consent shall not be unreasonably withheld or delayed), during the Interim Period, with respect to the Acquired Assets or Assumed Liabilities:

(a) Except for Acquired Assets used at or consumed by the Facilities in the ordinary course of business consistent with Good Utility Practice, and except for sales or dispositions of obsolete or surplus assets in connection with the normal repair or replacement of assets or properties, (i) sell, lease (as lessor), license (as licensor), transfer or otherwise dispose of any of the Acquired Assets, or (ii) encumber, pledge, mortgage or suffer to be imposed on any of the Acquired Assets any Lien other than Permitted Liens;

(b) Make any material change in the levels of Inventories customarily maintained by the Seller with respect to the Acquired Assets, except for such changes that are consistent with Good Utility Practice;

(c) Terminate, make any waiver under, extend, materially amend, or renew or replace any Material Contract, Assigned Lease or Transferable Permit other than in the ordinary course of business consistent with Good Utility Practice, or as may be required or permitted to implement another provision of this Section 5.5, pursuant to Section 5.2(e) or Section 5.3 or otherwise in connection with transferring Seller's rights or obligations thereunder to the Buyer pursuant to this Agreement; *provided* that, during the Interim Period, and subject to Section 5.15, Schedule 2.1(b), Schedule 2.1(e), Schedule 3.5(b) and Schedule 3.11(a), as appropriate, shall be

amended to account for any matter permitted under this Section 5.5(c);

(d) Enter into any Contract relating to the ownership or operation of the Acquired Assets, except for any Contract (i) entered into in the ordinary course of business that will be terminated or fully performed prior to the Closing (without assignment to, or any continuing Liability of, Buyer on or after the Closing), (ii) that can be freely assigned to Buyer at the Closing and terminated by Buyer at its option at any time on or after the Closing without penalty or cancellation charge, (iii) that can be freely assigned to Buyer at the Closing and that does not increase an Assumed Liability or which increases an Assumed Liability by an amount of Three Hundred Thousand Dollars (\$300,000) or less individually or One Million Dollars (\$1,000,000) or less in the aggregate with other such Contracts, or (iv) as may be required or permitted pursuant to Section 5.3 or to implement another provision of this Section 5.5, so long as such Contract can be freely assigned to Buyer at the Closing; *provided* that, during the Interim Period, Schedule 2.1(e) shall be amended to account for any Contract permitted under this Section 5.5(d);

(e) Enter into, amend, or otherwise modify any real or personal property Tax agreement, treaty or settlement that would reasonably be expected to affect the Tax Liabilities of Buyer or any of its Affiliates in a material manner for any taxable year or period ending after the Closing Date;

(f) Make, or enter into any Contractual commitment to make, any capital expenditures relating to the Acquired Assets, Facilities or Sites, except for those capital expenditures or commitments necessitated by Good Utility Practice;

(g) Materially increase the level of wages, compensation or other benefits of any Scheduled Employee, except as required pursuant to the Generation CBA or applicable Law or in accordance with Seller's ordinary course of business consistent with past practices;

(h) Terminate the employment of any Scheduled Employee except for cause, or hire any employee who would be a Scheduled Employee (other than to replace or fill vacancies on compensation and other terms substantially similar to those paid by Seller for any replaced employee), in each case, without first consulting with Buyer; *provided*, that, during the Interim Period, Schedule 3.12(a) shall be amended to reflect any changes in the Scheduled Employees listed thereon that are permitted under this Section 5.5(h); or

(i) Except for amendments which do not result in any increased liability by Buyer following the Closing or as required by Law, agree to any amendment to or waiver of any term of the Generation CBA, or enter into any new collective bargaining agreement with respect to any Scheduled Employees.

Notwithstanding anything to the contrary herein, Seller may take commercially reasonable actions with respect to emergency situations or as required by Law as reasonably determined by Seller and without Buyer's prior written consent, so long as Seller shall promptly inform Buyer upon taking any such action; *provided*, that Seller shall notify Buyer of any such actions as soon as reasonably practicable; *provided*, further, that the taking of such actions in an emergency that would otherwise be prohibited hereunder shall not be deemed to cure any breach of this Agreement (other than a breach of Section 5.5 resulting from the taking of such action).

#### **Section 5.6 Termination of Certain Services and Contracts; Transition Matters.**

(a) Notwithstanding anything in this Agreement to the contrary, at or prior to the Closing, Seller shall (i) terminate, effective upon the Closing, any services provided to any of the Facilities or with respect to the Acquired Assets by Seller, or by any Affiliate thereof under an Intercompany Arrangement, including the termination or severance of insurance policies with respect to coverage for any of the Facilities, Tax services, legal services and banking services (to include the severance of any centralized clearance accounts), other than any such services provided pursuant to the Transition Services Agreement and other than with respect to those Assigned Contracts set forth on Schedule 2.2(j) and (ii) terminate each Contract requested by Buyer within thirty (30) days after the date hereof or such later date as may be requested by Buyer and agreed to by Seller (which such terminations shall be provided so long as Seller will not incur any Liability from and after the Closing Date as a result of such termination) (such services or Contracts collectively, the "**Terminated Contracts**"). For avoidance of doubt, Buyer acknowledges and agrees that all insurance coverage with respect to the Acquired Assets, including those policies referred to in Section 3.9, shall be terminated as of the Closing, and that Buyer shall be solely responsible for providing insurance in respect of the Acquired Assets and for any claims made in connection with such insurance policies after the Closing regardless of when the event or occurrence relating to any claim arose.

(b) At the request of Buyer, at the Closing, Seller shall, and shall cause Eversource Services to, enter into an agreement with Buyer to provide, following Closing, those transition services respecting the Acquired Assets that are reasonably agreed upon by Buyer and Seller at a price equal to the applicable Transition Service Cost Percentage of cost (as allocated in accordance with the same methodologies used for such allocations by Seller and its Affiliates in accordance with past practice) and in accordance with the other terms and conditions set forth therein (the "**Transition Services Agreement**"). The Parties will agree upon any remaining terms and conditions of the Transition Services Agreement in a commercially reasonable manner as soon as practicable

after the date hereof and in any event within sixty (60) days of the date hereof.

(c) Within thirty (30) days after the date hereof, Buyer shall deliver to Seller a list of its proposed representatives to a joint transition team. Seller will add its representatives to such team within ten (10) Business Days after receipt of Buyer's list. Such team will be responsible for preparing as soon as reasonably practicable after the date hereof, and using commercially reasonable efforts to timely implement, a transition plan which will identify and describe substantially all of the various transition activities that the Parties will cause to occur before and after the Closing and any other transfer of control matters that any Party reasonably believes should be addressed in such transition plan. Buyer and Seller shall use commercially reasonable efforts to cause their representatives on such transition team to cooperate in good faith and take reasonable steps necessary to develop a mutually acceptable transition plan no later than sixty (60) days after the date of this Agreement.

**Section 5.7 Seller Marks.** Buyer acknowledges and agrees that as a result of the consummation of the transactions contemplated by this Agreement, it will not obtain any right, title, interest, license or other right hereunder to use any of the Seller Marks. Prior to the Closing, Seller may remove any of the Seller Marks as it determines in its sole discretion. As soon as reasonably practicable but in no event more than sixty (60) days after the Closing Date, Buyer shall dispose of any unused products, materials, stationery and literature bearing the Seller Marks remaining at the Facilities following the Closing. Following the Closing, upon reasonable prior written notice and at mutually agreed upon reasonable times, Buyer shall allow Seller, at Seller's cost, to remove, cover or conceal the Seller Marks appearing on signage at the primary entrances of the Facilities; provided, however, Seller agrees to indemnify and hold harmless Buyer, its Affiliates and their Representatives for any and all Losses incurred by Buyer, its Affiliates or their Representatives arising out of any exercise of the access rights under this Section 5.7, including any Claims by any of Seller's Representatives for any injuries or property damage while present at the Facilities, except in cases of Buyer's or its Representatives' gross negligence or willful misconduct. Thereafter, Buyer shall not use any Seller Mark or any name or term confusingly similar to any Seller Mark in connection with the sale of any products or services, in the corporate or doing business name of any of its Affiliates or otherwise in the conduct of its or any of its Affiliates' businesses or operations; provided, however that Buyer shall not be in violation of this Section 5.7 to the extent such violation results from Seller's failure to remove all Seller Marks at the Facilities. In the event that Buyer breaches this Section 5.7, Seller shall be entitled to specific performance of this Section 5.7 and to injunctive relief against further violations, as well as any other remedies at law or in equity available to Seller.

#### **Section 5.8 Employee Matters.**

(a) Settlement Agreement. The Parties acknowledge and agree that under New Hampshire Law (New Hampshire RSA 369-B:3-b) and the Settlement Agreement, affected employees are entitled to certain employee protections that apply in connection with the transactions contemplated hereby, including provisions requiring that Buyer undertake certain employee-related obligations as a condition to the consummation of the transactions contemplated hereby. The Parties acknowledge and agree that the covenants and agreements set forth in this Section 5.8 are intended to implement the applicable employee protection provisions and requirements set forth under New Hampshire Law and in the Settlement Agreement and shall be interpreted consistently therewith.

#### (b) Represented Transferred Employees.

(i) Schedule 5.8(b)(i) sets forth the total number of Represented Scheduled Employees (including all such Represented Scheduled Employees who are on inactive status due to any short-term disability, long-term disability or other approved leave) employed in each job classification as of the Effective Date. Within fifteen (15) days following the Effective Date, Buyer shall provide notice to Seller of the number of Represented Scheduled Employees by classification and facility which Buyer desires to retain. The Parties shall cooperate in good faith with the Union to identify, within thirty (30) days after receipt of Buyer's notice, in accordance with the applicable provisions of the Generation CBA and the Settlement Agreement, the particular Represented Scheduled Employees to whom Buyer shall offer employment pursuant to the terms of this Section 5.8 (the "**Selected Represented Employees**"). Within sixty (60) days following the Effective Date, Buyer shall offer employment, commencing as of 12:01 a.m. Eastern time on the Closing Date, to all such Selected Represented Employees.

(ii) All such offers of employment shall be made in accordance with applicable Laws, the Generation CBA and the Settlement Agreement, and otherwise on terms consistent with the provisions of this Section 5.8. Those employees who accept such offer of employment are referred to herein as the "**Represented Transferred Employees.**" Buyer shall, as soon as reasonably practicable and in no event more than fifteen (15) Business Days following the Effective Date, provide notice to the Union (i) that Buyer recognizes the Union, as of the Closing, as the collective bargaining representative for all Represented Transferred Employees, (ii) that Buyer agrees to become party to and bound by the terms of the Generation CBA and to assume Seller's obligations with respect to the Represented Transferred Employees thereunder, and (iii) that describes Buyer's plans regarding staffing by classification and operations of the Facilities, as required by the Generation CBA.

(iii) On and after the Closing, Buyer shall comply with all applicable obligations under the Generation CBA with respect to the Represented Transferred Employees covered thereby.

(c) Non-Represented Transferred Employees.

(i) Within forty-five (45) days following the Effective Date, Buyer shall offer employment to those Non-Represented Scheduled Employees set forth on Schedule 5.8(c)(i) whom Buyer desires to employ commencing as of 12:01 a.m. Eastern time on the Closing Date (the “**Selected Non-Represented Employees**”). All such offers of employment shall be made in accordance with applicable Laws and otherwise on terms consistent with the provisions of this Section 5.8. Those Selected Non-Represented Employees who accept such offer of employment are referred to herein as the “**Non-Represented Transferred Employees**.”

(ii) The Parties acknowledge and agree that, pursuant to the Settlement Agreement and New Hampshire RSA 369-B:3-b, the Non-Represented Transferred Employees are entitled to employee protections no less than those set forth in the Generation CBA with respect to the Represented Transferred Employees. As required by the Settlement Agreement, Buyer shall, from and after Closing, assume and comply with those employee protection obligations to the Non-Represented Transferred Employees required by New Hampshire RSA 369-B:3-b.

(iii) Continuing from Closing through no sooner than the end of the CBA Term, Buyer shall maintain an overall benefit package for the Non-Represented Transferred Employees at least as favorable as the overall benefit package provided to each such Non-Represented Transferred Employee immediately prior to the Closing.

(d) Service Credit. Buyer shall recognize and apply each Transferred Employee’s prior service with Seller toward any eligibility, vesting, accrual and benefit calculation purposes under the Employee Benefits Plans and other compensation arrangements of Buyer, including Buyer’s Pension Plan and any other plans established to provide benefits described in the Generation CBA and/or in Seller’s policies and plans applicable to Non-Represented Transferred Employees. Buyer shall vest each Transferred Employee under the Employee Benefits Plans of Buyer to the extent such employee is vested under the Employee Benefits Plans of Seller (or its applicable Affiliates) immediately prior to the Closing. Buyer shall waive all limitations with respect to preexisting conditions, exclusions and waiting periods with respect to participation and coverage requirements under Buyer’s health and welfare plans under Seller’s (or its applicable Affiliates’) comparable plans in which such Transferred Employee participates. Within a reasonable time prior to the Closing Date, Seller shall, subject to applicable Law, provide Buyer with such pertinent data or information as Buyer shall reasonably require to determine each Transferred Employee’s service, eligibility, vesting, accrued benefits and other relevant information under the Employee Benefits Plans of Seller or its applicable Affiliates (including Seller’s Pension Plan).

(e) Pension and Retirement Benefits.

(i) Defined Benefit Pension Plan Participants.

(A) As soon as practicable after the Effective Date, Buyer shall take all necessary and appropriate action to establish and maintain a tax qualified defined benefit or defined contribution plan (“**Buyer’s Pension Plan**”) for Transferred Employees who participate in Seller’s defined benefit pension plan in accordance with the provisions of this Section 5.8(e).

(B) For purposes of this Section 5.8(e)(i), the term “**Combined Minimum Pension Benefit**” means, for any such Transferred Employee, the Transferred Employee’s total pension benefit as calculated as of the earlier of (i) such Transferred Employee’s retirement date and (ii) the end of the CBA Term, using (A) the pension benefit formula under the Eversource Pension Plan (“**Seller’s Pension Plan**”) applicable to such Transferred Employee as of the Closing Date, (B) such Transferred Employee’s final average earnings (as specified in Seller’s Pension Plan) as of the earlier of (i) such Transferred Employee’s retirement date and (ii) the end of the CBA Term,, taking into account compensation earned from both Seller and Buyer, (C) such Transferred Employee’s total years of service with both Seller (or its applicable Affiliates and predecessors) and Buyer as of the earlier of (i) such Transferred Employee’s retirement date and (ii) the end of the CBA Term, and (D) covered compensation as of the earlier of (i) such Transferred Employee’s retirement date and (ii) the end of the CBA Term.

(C) For purposes of this Section 5.8(e)(i), the term “**Accrued Pension Benefit**” means, for any such Transferred Employee, the pension benefit payable to such Transferred Employee under Seller’s Pension Plan at such Transferred Employee’s retirement, which shall be calculated based upon (A) the pension benefit formula under the Seller’s Pension Plan applicable to such Transferred Employee as of the Closing Date, (B) such Transferred Employee’s years of credited service with Seller (or its applicable Affiliates) as of the Closing Date, (C) such Transferred Employee’s final average earnings (as specified in the Seller’s Pension Plan) as of the Closing Date, and (D) such Transferred Employee’s covered compensation as of the Closing Date.

(D) Upon such Transferred Employee’s retirement date, Seller (or its Affiliates) shall provide each such

Transferred Employee with a vested and non-forfeitable right to a pension benefit equal to such Transferred Employee's Accrued Pension Benefit.

(E) On and after Closing, and continuing through no sooner than the end of the CBA Term, Buyer shall provide each such Transferred Employee with a pension benefit under Buyer's Pension Plan equal to or exceeding the difference between such Transferred Employee's Combined Minimum Pension Benefit and such Transferred Employee's Accrued Pension Benefit (the "**Buyer Pension Benefit**"). Such Buyer Pension Benefit must be guaranteed to each Transferred Employee and protected from forfeiture to no less extent than an ERISA plan benefit. If any such Transferred Employee's Buyer Pension Benefit should be subject to Social Security and Medicare Taxes that do not apply to ERISA pension benefits, Buyer shall "gross up" such Buyer Pension Benefit to offset such additional Tax liability to the applicable Transferred Employee.

(F) On and after Closing, and continuing through no sooner than the end of the CBA Term, in the event that any such Transferred Employee (A) is involuntarily separated from employment as a result of layoff from Buyer (or any of its Affiliates) and (B) at the time of Closing (x) is age 50-54 and (y) whose age plus credited service equal or exceed 65 years, then such Transferred Employees shall be provided those pension and other retirement benefits described in Schedule 5.8(e)(i)(F).

(ii) Contributory Retirement Plan Participants.

(A) As soon as practicable after the Effective Date, Buyer shall take all necessary and appropriate action to establish and maintain a tax qualified contributory retirement plan ("**Buyer's Contributory Plan**") for the Transferred Employees who participate in Seller's "K-Vantage" contributory retirement plan in accordance with the provisions of this Section 5.8(e)(ii).

(B) On and after Closing and through the end of the CBA Term, Buyer (or its Affiliates) shall provide each Transferred Employee with contributions to Buyer's Contributory Plan in an amount no less than the amount such Transferred Employee would have received under Seller's "K-Vantage" contributory retirement plan, as set forth in Schedule 5.8(e)(ii)(B).

(f) Transition Matters. Effective as of the Closing, the Transferred Employees shall cease active participation in all Employee Benefit Plans of Seller (or its applicable Affiliates). Seller (or its applicable Affiliates) shall pay, in accordance with Seller's customary practice, to all Transferred Employees all accrued salary or wages, including overtime, vacation pay or other benefits to which they are entitled under the Employee Benefit Plans of Seller (or its applicable Affiliates) as of immediately prior to the Closing. Buyer and Seller intend that the transactions contemplated by this Agreement should not constitute a separation, termination or severance of employment of any Transferred Employee for purposes of any Employee Benefit Plan that provides for separation, termination or severance benefits, and that each such Transferred Employee will have continuous employment immediately before and immediately after the Closing. All Liability and Claims relating to the employment and compensation of any Transferred Employee on and after the Closing shall be the sole responsibility of Buyer, and Buyer agrees to indemnify and hold harmless Seller, its Affiliates and their Representatives for any and all Losses incurred by Seller, its Affiliates or their Representatives arising out of or related to Buyer's (or its Affiliate's) employment of any Transferred Employee following the Closing.

(g) Severance Benefits. Any Transferred Employee who is terminated as a result of a reduction in force or change in operational practices prior to the end of the CBA Term will be entitled to the benefits set forth in Schedule 5.8(g) from Buyer.

(h) WARN Act; Restructuring Activities. Seller agrees to timely perform and discharge all requirements under the WARN Act and under applicable state and local Laws for the notification of its and its Affiliates' employees arising from the sale of the Acquired Assets to Buyer up to and including the Closing Date, including those employees who will become Transferred Employees effective as of the Closing Date. After the Closing Date, Buyer shall be responsible for performing and discharging all requirements under the WARN Act and under applicable state and local Laws for the notification of its employees, whether Transferred Employees or otherwise. All severance and other costs (other than in respect of any Accrued Pension Benefits) associated with workforce restructuring activities associated with the Transferred Employees subsequent to the Closing Date shall be borne solely by Buyer.

(i) Successors and Assigns. Notwithstanding anything herein to the contrary, the agreements and obligations of Buyer set forth in this Section 5.8 shall be binding upon and enforceable against any successor or assign or any other entity acquirer of Buyer, whether by sale, transfer, merger, acquisition or otherwise. Buyer shall make it a condition of any such sale, transfer, merger, acquisition or other transaction or event that any such successor or assign or other entity acquirer shall be bound by the terms of this Section 5.8.

(j) Notwithstanding anything to the contrary herein, except for Buyer's obligations in respect of the Buyer Pension Benefit and the Buyer's Contribution Plan which are set forth in Section 5.8(e)(i) and Section 5.8(e)(ii), respectively, and Buyer's obligations in respect of severance benefits as set forth in Section 5.8(g), Buyer shall have no obligation to provide any other post-employment benefits to any Transferred Employee and to the extent any obligations to provide any such post-employment benefits are owing to Transferred Employees, including without limitation in respect of retiree health benefits or contributions, Seller shall provide any such benefits and shall be solely responsible for any obligations associated therewith.

**Section 5.9 ISO-NE and NEPOOL Matters.**

(a) At the Closing, Buyer shall be a member in good standing in NEPOOL. Except as required to preserve system reliability and in compliance with the requirements of the ISO-NE or NEPOOL, and as may be otherwise provided in any Related Agreement, following Closing, Seller shall not, directly or indirectly, interfere with Buyer's efforts to expand or modify generation capacity at any of the Sites.

(b) Not less than five (5) Business Days prior to the Closing Date, Buyer shall initiate, and Seller shall confirm, with ISO-NE Buyer's acquisition of the Facilities from Seller, to be effective as of the Closing Date, pursuant to the CAMS User Guide for Company and Affiliate Maintenance, Version 1.4, Section 2.3.15, Asset Ownership Share Transfers. In the event that ISO-NE (or NEPOOL) does not recognize until after the Closing Buyer's acquisition of the Facilities as of the Closing Date (or recognizes such acquisition effective as of any date other than the Closing Date), the Parties agree that (i) any proceeds received by Seller or its Affiliates from ISO-NE (or NEPOOL) after Closing relating to Buyer's ownership of the Facilities on and after the Closing Date shall be promptly paid over to Buyer, and (ii) any proceeds received by Buyer or its Affiliates from ISO-NE (or NEPOOL) after Closing relating to Seller's ownership of the Facilities prior to the Closing Date shall be promptly paid over to Seller. The Parties further agree that (x) any amounts received by Buyer or its Affiliates from ISO-NE after the Closing respecting the Facilities, to the extent attributable to any period prior to the Closing, including (A) ISO-NE Winter Reliability Program revenues attributable to any period prior to the Closing, and (B) ISO-NE Forward Capacity Market capacity payments attributable to any period prior to the Closing, shall be promptly paid over to Seller; and (y) any amounts received by Seller or its Affiliates from ISO-NE after Closing respecting the Facilities, to the extent attributable to any period on and after the Closing, including (A) ISO-NE Winter Reliability Program revenues attributable to any period on and after the Closing and (B) ISO-NE Forward Capacity Market capacity payments attributable to any period on and after the Closing, shall be promptly paid over to Buyer. Any payment required to be made by a Party pursuant to this Section 5.9(b) shall be made to the other Party by wire transfer of immediately available funds to the account designated in writing by such other Party.

**Section 5.10 Post-Closing Operations.** As required by the Settlement Agreement, Buyer hereby covenants and agrees that Buyer shall (and shall cause any successor or assign of Buyer to) cause the Facilities to remain in service for a minimum of eighteen (18) months following the Closing Date.

**Section 5.11 Discharge of Environmental Liabilities.** On and after the Closing Date, with respect to Environmental Liabilities which constitute Excluded Environmental Liabilities, Buyer will use commercially reasonable efforts not to prejudice or impair Seller's rights under the Environmental Laws or interfere with Seller's ability to contest in appropriate administrative, judicial or other proceedings its Liability, if any, for Environmental Claims or Remediation. To the extent relevant to those Environmental Liabilities which constitute Excluded Liabilities, (a) Buyer further agrees to provide to Seller draft copies of all plans and studies prepared in connection with any Site investigation or Remediation prior to their submission to the Governmental Authority with jurisdiction under Environmental Laws, (b) Seller shall have the right, without the obligation, to attend all meetings between Buyer, its Representatives, and such Governmental Authorities, and (c) Buyer shall promptly provide to Seller copies of all written information, plans, documents and material correspondence submitted to or received from such Governmental Authorities relating to Buyer's discharge of any Environmental Liabilities assumed pursuant to this Agreement.

**Section 5.12 Transfer Taxes.** Notwithstanding any other provision of this Agreement to the contrary, Buyer and Seller shall in good faith determine the amount and at Closing each pay fifty percent (50%) of all Transfer Taxes that may be imposed upon, or payable, collectible or incurred in connection with the transfer of the Acquired Assets to Buyer or otherwise in connection with the transactions contemplated by this Agreement and the Related Agreements. Accordingly, if Seller is required by Law to pay any such Transfer Taxes, Buyer shall reimburse Seller such that Buyer bears fifty percent (50%) of such Transfer Taxes. Buyer shall, at its own expense, prepare and timely file all Tax Returns relating to any such Transfer Tax (and Seller shall cooperate with respect thereto as reasonably necessary, including by preparing, executing and providing its Tax Return to Buyer, or by joining in the execution of any such Tax Returns if required by applicable Law), shall notify Seller when such filings have been made and shall provide Seller with copies thereof.

**Section 5.13 Tax Matters.** Except as provided in Section 5.12 relating to Transfer Taxes:

(a) With respect to Taxes to be prorated in accordance with Section 2.7 of this Agreement, Buyer shall prepare and

timely file all Tax Returns required to be filed after the Closing with respect to the Acquired Assets, if any, and Buyer shall duly and timely pay all such Taxes shown to be due on such Tax Returns (or shall reimburse Seller for any such Taxes paid by Seller). Buyer's preparation of any such Tax Returns shall be subject to Seller's review and comment, and Buyer shall consider in good faith any comments received from Seller. No later than twenty (20) Business Days prior to the due date of any such Tax Return, Buyer shall make such Tax Return available for Seller's review and comment. Buyer shall respond no later than five (5) Business Days prior to the due date for filing such Tax Return. Without the prior written consent of Seller, Buyer will not (i) file or amend any Tax Return relating to any taxable period ending on or prior to the Closing Date, or to any taxable period beginning before the Closing Date and ending after the Closing Date, or any portion thereof or (ii) extend or waive, or cause to be extended or waived, any statute of limitations or other period for the assessment of any Tax or deficiency related to any such taxable period (or portion thereof).

(b) Whenever any Taxing Authority asserts a claim, makes an assessment, or otherwise disputes the amount of Taxes relating to any taxable period ending on or prior to the Closing Date, or to any taxable period beginning before the Closing Date and ending after the Closing Date, or any portion thereof, Buyer shall, upon receipt of such assertion, promptly, but no later than thirty (30) days thereafter, inform Seller in writing of such assertion. With respect to proceedings that relate solely to Taxes that represent Excluded Liabilities and to any proceedings described on Schedule 3.10, Seller shall have the sole right to control any such proceedings and to determine whether and when to settle any such claim, assessment or dispute; *provided, however*, that Seller shall not settle any Tax controversies in a manner that would reasonably be expected to affect the Tax Liabilities of Buyer or any of its Affiliates in a material manner for any taxable year or period ending after the Closing Date without the prior written consent of Buyer. With respect to proceedings that relate to Taxes that represent Assumed Liabilities, Buyer shall have the sole right to control any such proceedings and determine whether and when to settle any such claim, assessment or dispute; *provided, however*, that Buyer shall not settle any Tax controversies in a manner that would reasonably be expected to affect the Tax Liabilities of Seller or any of its Affiliates in a material manner for any taxable year or period without the prior written consent of Seller. Each of Buyer and Seller shall provide the other with such assistance and cooperation as may reasonably be requested by the other Party in connection with the preparation of any Tax Return, any audit or other examination by any Taxing Authority, or any judicial or administrative proceedings relating to Liability for Taxes. Such assistance and cooperation shall include the retention and (upon the other Party's request) the provision of records and information that are reasonably relevant to any such audit, litigation or other proceeding and making employees available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder, and each will retain and provide the requesting Party with any records or information until the expiration of the statute of limitations (and, to the extent notified by the other Party, any extensions thereof) of the respective taxable periods which may be relevant to such Tax Return, audit or examination, proceedings or determination.

**Section 5.14 Further Assurances.** At any time and from time to time after the Closing, at the reasonable request of a Party and without further consideration, the other Party will or will cause its Affiliates to execute and deliver such instruments of sale, transfer, conveyance, assignment, assumption and confirmation and take such actions as the Parties may reasonably agree are necessary to transfer, convey and assign to Buyer, and to confirm Buyer's title to or interest in the Acquired Assets and assumption of and obligation with respect to the Assumed Liabilities, to put Buyer in actual possession and operating control of the Acquired Assets, and otherwise to consummate and give effect to the transactions contemplated by this Agreement. For avoidance of doubt, in the event that any asset that is an Acquired Asset shall not have been conveyed to Buyer at the Closing, Seller shall, subject to Section 5.3, use its commercially reasonable efforts to convey such asset to Buyer as promptly as is practicable after the Closing.

**Section 5.15 Schedule Updates.** From time to time during the Interim Period, Seller may supplement or amend and deliver updates to the Schedules with respect to any changes or events occurring or conditions arising after the Effective Date, including such supplements or amendments to Schedules expressly permitted or required herein (each, a "**Schedule Update**"). In the event that any Schedule Update discloses any such change, event or condition that would prevent the Seller from satisfying the condition set forth in Section 6.1(a), then either (A) Seller shall have a reasonable opportunity to cure such fact or circumstance or (B) if Seller determines that such fact or circumstance is incapable of cure by Seller by the Outside Date, Seller shall promptly notify Buyer of such determination, and then within five (5) Business Days of such determination, Buyer and Seller shall in good faith seek to quantify the amount of Losses relating to such fact or circumstance that Buyer would reasonably be expected to suffer as a result thereof. In the event the Buyer and Seller are unable to agree as to the amount of Losses resulting from such fact or circumstance, such matter shall be referred to the Independent Accountant for final determination. The amount of any such Losses finally determined (whether by agreement of the parties or by the Independent Accountant) shall result in a dollar for dollar reduction to the Base Purchase Price payable by Buyer at the Closing, provided, that if the amount of such Losses are equal to or greater than ten percent (10%) of the Base Purchase Price, either Seller or Buyer may, in their discretion, elect to terminate this Agreement in lieu of accepting a reduction to the Base Purchase Price by delivering a written termination notice to the other Party. If, pursuant to this Section 5.15, either Seller cures such fact or circumstance, or the amount of Losses is finally determined (and, if applicable, neither Seller nor Buyer exercises any termination right pursuant to the previous sentence), then the Schedule Update relating to such fact or circumstance shall be deemed to be part of the Schedules for purposes of determining whether Seller has satisfied the condition set forth in Section 6.1(a). In the event that Seller provides a Schedule Update, Seller shall also promptly provide any additional information relating thereto as Buyer may reasonably request.

**Section 5.16 Casualty.** If any Acquired Asset is damaged or destroyed by a casualty loss during the Interim Period (a “**Casualty Loss**”), and the cost of restoring such damaged or destroyed Acquired Asset to a condition reasonably comparable to its prior condition inclusive of a reasonable estimate of the likely business interruption cost associated with such event (assuming commercially reasonable efforts are undertaken to remediate such casualty event) (such costs with respect to any Acquired Asset, the “**Restoration Cost**”) does not exceed ten percent (10%) of the Base Purchase Price, Seller may elect, by written notice to Buyer provided within sixty (60) days of the applicable Casualty Loss, to either (a) reduce the amount of the Purchase Price by the estimated Restoration Cost (as estimated by a qualified firm mutually selected by Buyer and Seller as promptly as practicable after the date of the event giving rise to the Casualty Loss) or (b) restore such damaged or destroyed Acquired Asset at Seller’s expense at any time prior to the Outside Date to a condition reasonably comparable to its condition prior to such Casualty Loss, and in either event such Casualty Loss shall not affect the Closing; *provided*, that in the event Seller elects to restore such damaged or destroyed Acquired Asset pursuant to the foregoing clause (b), Seller shall have the option, exercisable by delivering written notice to Buyer, to extend the Outside Date by an additional period of up to ninety (90) days after the original Outside Date set forth in Section 8.1(a) to the extent additional time is needed to complete such restoration. If Seller does not make an election as set forth in the preceding sentence within such sixty (60) day period following the Casualty Loss, Seller shall be deemed to have elected to reduce the amount of the Purchase Price by the estimated Restoration Cost as provided above. If the Restoration Cost exceeds ten percent (10%) of the Base Purchase Price, Buyer may elect, by written notice to Seller provided within sixty (60) days of the applicable Casualty Loss, to either (i) reduce the amount of the Purchase Price by the estimated Restoration Cost (as estimated by a qualified firm mutually selected by Buyer and Seller as promptly as practicable after the date of the event giving rise to the Casualty Loss) or (ii) terminate this Agreement. If Buyer does not make an election as set forth in the preceding sentence within such sixty (60) day period following the Casualty Loss, Seller may elect to terminate this Agreement by written notice to Buyer delivered within ten (10) days thereafter. In the event Seller elects to restore such damaged or destroyed Acquired Asset or to reduce the amount of the Purchase Price by the estimated Restoration Cost pursuant to this Section 5.16, (A) for avoidance of doubt, Buyer shall have no rights to any insurance proceeds related thereto, to which Seller shall be solely entitled, and (B) on or after the Closing, Buyer will, at Seller’s written election, assign to Seller the rights, if any, to any contribution available under any long term service agreement or other Contract included in the Acquired Assets, as and to the extent relating to the applicable Casualty Loss, and, to the extent that Buyer receives any proceeds or other compensation associated with any such Casualty Loss, Buyer shall cause the amount of such proceeds or compensation to be paid over to Seller promptly upon receipt.

**Section 5.17 Condemnation.** If any Acquired Assets are taken by condemnation during the Interim Period and such Acquired Assets have a condemnation value (the “**Condemnation Value**”) that does not exceed ten percent (10%) of the Base Purchase Price, the Purchase Price shall be reduced by such Condemnation Value and such condemnation shall not affect the Closing. If the Condemnation Value exceeds ten percent (10%) of the Base Purchase Price, Buyer may elect, by written notice to Seller provided within sixty (60) days of the applicable Condemnation Event, to either reduce the Purchase Price by such Condemnation Value or terminate this Agreement. If Buyer does not make such an election within such sixty (60) day period, Seller may elect to terminate this Agreement by written notice to Buyer delivered within ten (10) days thereafter. To the extent the amount of the Purchase Price is reduced by the Condemnation Value pursuant to this Section 5.17, (A) for avoidance of doubt, Buyer shall have no rights to any condemnation award or insurance proceeds related thereto, to which Seller shall be solely entitled, and (B) Buyer shall, to the extent that it receives any award, proceeds or other compensation associated with any such condemnation event on or after Closing, cause the amount of such award, proceeds or compensation to be paid over to Seller promptly upon receipt.

**Section 5.18 Confidentiality.** Buyer acknowledges and agrees that the Confidentiality Agreement remains in full force and effect and, in addition, covenants and agrees to keep confidential, in accordance with the provisions of the Confidentiality Agreement, information provided to Buyer pursuant to this Agreement (including this Agreement and the Exhibits and Schedules hereto); *provided*, that from and after Closing, Buyer shall not have any obligation to maintain the confidentiality of information with respect to the Acquired Assets, but Buyer’s confidentiality obligations under the Confidentiality Agreement (including with respect to information concerning Seller and its Affiliates) shall otherwise continue. If this Agreement is, for any reason, terminated prior to the Closing, the Confidentiality Agreement and the provisions of this Section 5.18 shall nonetheless continue in full force and effect. From and after the Closing, Seller agrees to keep all non-public information relating to Buyer or the Acquired Assets (including to the extent contained in any copy of the Transferred Books and Records maintained by Seller) confidential and not to disclose such information without Buyer’s written consent (unless required by Law or Order).

**Section 5.19 Public Announcements.** Except as otherwise expressly provided herein, each Party shall, and shall cause its Affiliates (as applicable) to, consult with the other Party regarding the timing and content of any public announcements regarding this Agreement, the Closing and the other transactions contemplated by this Agreement to the news media, financial community, any Governmental Authority, customers, suppliers or the general public. Except as otherwise provided herein, no Party or its Affiliates shall make any such public announcement without the prior written consent of the other Party, unless any such disclosure is otherwise required by Law or by the rules of a national securities exchange (in which case such Party will provide to the other Party reasonable advance notice of and an opportunity to review any such disclosure).

**Section 5.20 ARCO ROFR.** As promptly as practicable following the Effective Date, Seller shall comply with the ARCO

ROFR requirements set forth in Article VII of the ARCO By-Laws, and shall promptly notify Buyer in the event that ARCO or any of its stockholders exercises its right to purchase the ARCO Shares in accordance with the ARCO ROFR. Upon the exercise of such right by ARCO or any of its stockholders, (a) Seller shall not be required to sell, and Buyer shall not be required to purchase, the ARCO Shares pursuant to this Agreement, the ARCO Shares shall cease to be included as an Acquired Asset hereunder, and any provisions of this Agreement relating to the ARCO Shares shall be deemed of no further force and effect, (b) the Purchase Price shall automatically be deemed to be reduced by the amount allocated to the ARCO Shares on Schedule 2.8(b), (c) except as set forth in the foregoing, the remaining provisions of this Agreement shall continue in full force and effect in all respects, and (d) the removal of the ARCO Shares from the transactions contemplated hereby as contemplated by this Section 5.20 shall not be deemed a breach or default of this Agreement in any event.

**Section 5.21 Exclusivity.** From and after the Effective Date, Seller agrees not to engage in any discussions or negotiations concerning any potential sale of the Acquired Assets to any party other than Buyer.

## ARTICLE VI CONDITIONS TO CLOSING

**Section 6.1 Buyer's Conditions to Closing.** The obligation of Buyer to consummate the transactions contemplated by this Agreement is subject to the fulfillment, at or prior to Closing, of each of the following conditions (except to the extent waived in writing by Buyer):

(a) Representations and Warranties. (i) The representations and warranties made by Seller in ARTICLE III that are not qualified by "materiality," "Material Adverse Effect" or similar qualifiers shall be true and correct in all material respects on the Closing Date as though made on and as of the Closing Date (except to the extent such representations and warranties expressly relate to an earlier date, in which case as of such earlier date) and (ii) the representations and warranties made by Seller in ARTICLE III that are qualified by "materiality," "Material Adverse Effect" or similar qualifiers shall be true and correct on the Closing Date as though made on and as of the Closing Date (except to the extent such representations and warranties expressly relate to an earlier date, in which case as of such earlier date).

(b) Performance. Seller shall have performed and complied, in all material respects, with all agreements, covenants and obligations required by this Agreement to be performed or complied with by Seller at or before the Closing.

(c) Officer's Certificate. Seller shall have delivered to Buyer at the Closing a certificate of an authorized officer of Seller, dated as of the Closing Date, stating that the conditions set forth in Section 6.1(a) and Section 6.1(b) have been satisfied.

(d) Consents. The Seller Required Consents and the Buyer Required Consents marked with an asterisk on Schedule 3.3 and Schedule 4.3(c) shall have been duly obtained, made or given and shall be in full force and effect, and all terminations or expirations of waiting periods imposed by any Governmental Authority with respect thereto (including under the HSR Act, if applicable) shall have occurred.

(e) No Injunctions. On the Closing Date, there shall be no Laws or Orders in effect that operate to restrain, enjoin or otherwise prevent or make illegal the consummation of the transactions contemplated by this Agreement.

(f) Deliveries. Seller shall have delivered or shall stand ready to deliver all of the certificates, instruments, agreements, documents and other items specified to be delivered by it hereunder, including pursuant to Section 2.10.

(g) Material Adverse Effect. No Material Adverse Effect shall have occurred.

**Section 6.2 Seller's Conditions to Closing.** The obligation of Seller to consummate the transactions contemplated by this Agreement is subject to the fulfillment, at or prior to Closing, of each of the following conditions (except to the extent waived in writing by Seller):

(a) Representations and Warranties. (i) The representations and warranties made by Buyer in ARTICLE IV that are not qualified by "materiality," "Material Adverse Effect" or similar qualifiers shall be true and correct in all material respects on the Closing Date as though made on and as of the Closing Date (except to the extent such representations and warranties expressly relate to an earlier date, in which case as of such earlier date) and (ii) the representations and warranties made by Buyer in ARTICLE IV that are qualified by "materiality," "Material Adverse Effect" or similar qualifiers shall be true and correct on the Closing Date as though made on and as of the Closing Date (except to the extent such representations and warranties expressly relate to an earlier date, in which case as of such earlier date).

(b) Performance. Buyer shall have performed and complied, in all material respects, with all agreements, covenants and obligations required by this Agreement to be performed or complied with by Buyer at or before the Closing.

(c) Officer's Certificate. Buyer shall have delivered to Seller at the Closing a certificate of an authorized officer of Buyer, dated as of the Closing Date, stating that the conditions set forth in Section 6.2(a) and Section 6.2(b) have been satisfied.

(d) Consents. The Seller Required Consents and the Buyer Required Consents marked with an asterisk on Schedule 3.3 and Schedule 4.3(c) shall have been duly obtained, made or given and shall be in full force and effect, and all terminations or expirations of waiting periods imposed by any Governmental Authority with respect thereto (including under the HSR Act, if applicable) shall have occurred.

(e) No Injunctions. On the Closing Date, there shall be no Laws or Orders in effect that operate to restrain, enjoin, prohibit or otherwise prevent or make illegal the consummation of the transactions contemplated by this Agreement.

(f) Deliveries. Buyer shall have delivered or shall stand ready to deliver all of the certificates, instruments, agreements, documents and other items specified to be delivered by it hereunder, including pursuant to Section 2.11.

(g) Closing Purchase Price. Buyer shall have delivered the Closing Purchase Price in accordance with Section 2.5.

## ARTICLE VII INDEMNIFICATION; LIMITATIONS OF LIABILITY AND WAIVERS

**Section 7.1 Survival.** Subject to the limitations and other provisions of this Agreement, the representations and warranties of Seller set forth in Section 3.1 (Organization and Existence), Section 3.2 (Authority and Enforceability) and Section 3.17 (Brokers) and the representations and warranties of Buyer set forth in Section 4.1 (Organization and Existence), Section 4.2 (Authority and Enforceability) and Section 4.6 (Brokers), shall survive the Closing and shall remain in full force and effect for a period of twelve (12) months following the Closing Date. All other representations and warranties of any Party contained in this Agreement shall expire at the Closing and shall have no further force or effect. The covenants and agreements of the Parties contained in this Agreement to be performed on or prior to the Closing shall expire at the Closing and have no further force or effect, and the covenants and agreements of the Parties contained in this Agreement that by their terms survive the Closing or contemplate performance after the Closing shall survive Closing until fully performed. The indemnification obligations of any Party pursuant to this ARTICLE VII with respect to any breach of a representation, warranty, covenant or other agreement hereunder shall terminate upon the expiration of such representation, warranty, covenant or other agreement.

**Section 7.2 Effect of Closing.** Upon the Closing, any condition to the obligations of either Party to consummate the transactions contemplated hereby that has not been satisfied as of the Closing Date, and any representation, warranty, covenant or agreement that has been breached or left unsatisfied by either Party as of the Closing Date, will be deemed waived by the Parties as of the Closing Date, and each Party will be deemed to fully release and forever discharge the other Party on account of any and all Claims and Losses with respect to the same. Nothing in this Section 7.2 shall be deemed to affect any provision herein which expressly survives the Closing or pertains to matters which will occur after the Closing.

**Section 7.3 Indemnification by Seller.** Subject to the other provisions of this ARTICLE VII, from and after the Closing, Seller shall indemnify, defend and hold harmless Buyer, its Affiliates and their respective Representatives (collectively, the “**Buyer Indemnified Parties**”) from and against all Losses suffered or incurred by a Buyer Indemnified Party resulting or arising from:

(a) Any breach of any representation or warranty of Seller contained in this Agreement that survives the Closing pursuant to Section 7.1;

(b) Any breach of any covenant or agreement of Seller contained in this Agreement that survives the Closing pursuant to Section 7.1; or

(c) Any Excluded Liability.

**Section 7.4 Indemnification by Buyer.** Subject to the other provisions of this ARTICLE VII, from and after the Closing, Buyer shall indemnify, defend and hold harmless Seller, its Affiliates and their respective Representatives (collectively, the “**Seller Indemnified Parties**”) from and against all Losses suffered or incurred by a Seller Indemnified Party resulting or arising from:

(a) Any breach of any representation or warranty of Buyer contained in this Agreement that survives the Closing pursuant to Section 7.1;

(b) Any breach of any covenant or agreement of Buyer contained in this Agreement that survives the Closing pursuant to Section 7.1; or

(c) Any Assumed Liability.

**Section 7.5 Certain Limitations.** The Buyer Indemnified Party or Seller Indemnified Party, as applicable, making a claim for indemnification under this ARTICLE VII is referred to herein as the “**Indemnified Party**” and the Party against whom such claims are asserted under this ARTICLE VII is referred to as the “**Indemnifying Party**.” The indemnification provided for in this ARTICLE VII shall be subject to the following limitations and other provisions:

(a) Notwithstanding anything herein to the contrary, the aggregate amount of all Losses for which Seller shall be liable pursuant to Section 7.3(a) shall not exceed an amount equal to the Purchase Price.

(b) Any Indemnified Party that becomes aware of a Loss for which it seeks indemnification under this ARTICLE VII shall be required to use commercially reasonable efforts to mitigate the Loss.

(c) Losses of any Indemnified Party hereunder shall be calculated after deducting the amount of any insurance proceeds and any indemnity, contribution or other similar Third Party recoveries actually received or reasonably expected to be received by such Indemnified Party in respect of such Loss at or prior to the time of such calculation (net of the reasonable out of pocket costs and expenses associated with such recoveries and any associated increases in insurance premiums). The Indemnified Party shall use its commercially reasonable efforts to recover under insurance policies or indemnity, contribution or similar agreements for any Losses prior to seeking indemnification under this Agreement.

(d) Losses of any Indemnified Party hereunder shall be determined net of (i) any Tax benefit actually realized as of the time of such determination as a result of sustaining such Losses, and (ii) the net present value, calculated as of the time of such determination, of Tax benefits reasonably expected to be derived as a result of sustaining such Losses.

(e) All Losses shall be determined without duplication of recovery under any other provisions of this Agreement or any Related Agreement. Without limiting the generality of the foregoing, (i) if any fact, circumstance, condition, agreement or event forming a basis for a claim for indemnification under this ARTICLE VII shall overlap with any fact, circumstance, condition, agreement or event forming the basis of any other claim for indemnification under this ARTICLE VII, there shall be no duplication in the calculation of the amount of Losses, and (ii) neither Seller nor Buyer shall have any liability under this ARTICLE VII for Losses relating to matters to the extent included in the calculation of the Purchase Price Adjustment in accordance with Section 2.6 or the prorations made in accordance with Section 2.7 (other than the failure to pay or credit any amounts so included).

(f) Notwithstanding anything to the contrary herein, Seller’s liability for indemnification of Excluded Environmental Liabilities pursuant to Section 7.3(c) (i) shall terminate on the fifth (5<sup>th</sup>) anniversary of the Closing Date, after which Seller shall have no further obligation to indemnify any Buyer Indemnified Party in respect of such Excluded Environmental Liabilities pursuant to Section 7.3(c); *provided*, that any such claims for indemnification in respect of Excluded Environmental Liabilities asserted in good faith by any Buyer Indemnified Party prior to the fifth (5<sup>th</sup>) anniversary of the Closing Date and not finally resolved prior to the fifth (5<sup>th</sup>) anniversary of the Closing Date shall survive until finally resolved, subject to the dollar limitations set forth in clause (ii) below, (ii) shall in no event exceed, in the aggregate, ten percent (10%) of the Purchase Price, and (iii) shall be subject to reduction to the extent such liability results from a violation by Buyer of its obligations under Section 5.11.

#### **Section 7.6 Indemnification Procedures.**

(a) Third Party Claims. If any Indemnified Party receives notice of the assertion or commencement of any Claim made or brought by any Third Party (a “**Third Party Claim**”) against such Indemnified Party with respect to which the Indemnifying Party is obligated to provide indemnification under this Agreement, the Indemnified Party shall give the Indemnifying Party prompt written notice thereof. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits rights or defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Third Party Claim in reasonable detail, shall include copies of all material written evidence thereof and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have the right to participate in, or by giving written notice to the Indemnified Party, to assume the defense of any Third Party Claim at the Indemnifying Party’s expense and by the Indemnifying Party’s own counsel, and the Indemnified Party shall cooperate in good faith in such defense. In the event that the Indemnifying Party assumes the defense of any Third Party Claim, subject to Section 7.6(b), it shall have the right to take such action as it deems necessary to avoid, dispute, defend, appeal or make counterclaims pertaining to any such Third Party Claim in the name and on behalf of the Indemnified Party. The Indemnified Party shall have the right, at its own cost and expense, to participate in the defense of any Third Party Claim with counsel selected by it, subject to the Indemnifying Party’s right to control the defense thereof. If the Indemnifying Party elects not to compromise or defend such Third Party Claim or fails to promptly notify the Indemnified Party in writing of its election to defend as provided in this Agreement, the Indemnified Party may, subject to Section 7.6(b), pay, compromise or defend such Third Party Claim and, subject to the limitations set forth in this ARTICLE VII, seek indemnification for any and all Losses based upon, arising from or

relating to such Third Party Claim. Seller and Buyer shall cooperate with each other in all reasonable respects in connection with the defense of any Third Party Claim, including making available (subject to the provisions of Section 5.18) information reasonably available to such Party relating to such Third Party Claim.

(b) Settlement of Third Party Claims. Notwithstanding any other provision of this Agreement, the Indemnifying Party shall not enter into settlement of any Third Party Claim without the prior written consent of the Indemnified Party (which consent shall not be unreasonably withheld or delayed), except as provided in this Section 7.6(b). If a firm offer is made to settle a Third Party Claim without leading to liability or the creation of a financial or other obligation on the part of the Indemnified Party and provides, in customary form, for the unconditional release of each Indemnified Party from all liabilities and obligations in connection with such Third Party Claim and the Indemnifying Party desires to accept and agree to such offer, the Indemnifying Party shall give written notice to that effect to the Indemnified Party. If the Indemnified Party fails to consent to such firm offer within ten (10) days after its receipt of such notice, the Indemnified Party may continue to contest or defend such Third Party Claim and in such event, the maximum liability of the Indemnifying Party as to such Third Party Claim shall not exceed the amount of such settlement offer. If the Indemnified Party fails to consent to such firm offer and also fails to assume defense of such Third Party Claim, the Indemnifying Party may settle the Third Party Claim upon the terms set forth in such firm offer to settle such Third Party Claim. If the Indemnified Party has assumed the defense pursuant to Section 7.6(a), it shall not agree to any settlement without the written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) Direct Claims. Any Claim by an Indemnified Party for indemnification on account of a Loss which does not result from a Third Party Claim (a “**Direct Claim**”) shall be asserted by the Indemnified Party giving the Indemnifying Party prompt written notice thereof, and in any event within thirty (30) days after the discovery by the Indemnified Party of the circumstances giving rise to such Claim. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits rights or defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Direct Claim in reasonable detail, shall include copies of all material written evidence thereof and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have thirty (30) days after its receipt of such notice to respond in writing to such Direct Claim. During such thirty (30) day period, the Indemnified Party shall allow the Indemnifying Party and its Representatives to investigate the matter or circumstance alleged to give rise to the Direct Claim, and whether and to what extent any amount is payable in respect of the Direct Claim, and the Indemnified Party shall assist the Indemnifying Party’s investigation by giving such reasonable information and assistance (including access to the Indemnified Party’s premises and personnel and the right to examine and copy any accounts, documents or records) as the Indemnifying Party or any of its professional advisors may reasonably request (subject to the provisions of Section 5.18). If the Indemnifying Party does not so respond within such thirty (30) day period, the Indemnifying Party shall be deemed to have rejected such claim, in which case the Indemnified Party shall be free to pursue such remedies as may be available to the Indemnified Party on the terms and subject to the provisions of this Agreement.

**Section 7.7 Tax Treatment of Indemnification Payments.** Unless otherwise required by applicable Law, all indemnification payments made pursuant to this Agreement will be treated as an adjustment to the Purchase Price for all Tax purposes

**Section 7.8 Waiver of Other Representations; No Reliance; “As Is” Sale.**

(a) NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY AND EXCEPT FOR THOSE REPRESENTATIONS AND WARRANTIES EXPRESSLY SET FORTH IN ARTICLE III, IT IS THE EXPLICIT INTENT OF EACH PARTY, AND THE PARTIES HEREBY AGREE, THAT NONE OF SELLER, ITS AFFILIATES OR THEIR RESPECTIVE REPRESENTATIVES HAS MADE OR IS MAKING ANY REPRESENTATION OR WARRANTY WHATSOEVER, EXPRESS OR IMPLIED, AT COMMON LAW, STATUTORY OR OTHERWISE, WRITTEN OR ORAL, WITH RESPECT TO, (I) THE ACQUIRED ASSETS, THE ASSUMED LIABILITIES, OR ANY PART THEREOF OR (II) THE ACCURACY OR COMPLETENESS OF THE INFORMATION, RECORDS, AND DATA NOW, HERETOFORE, OR HEREAFTER MADE AVAILABLE TO BUYER IN CONNECTION WITH THIS AGREEMENT AND ANY SUCH OTHER REPRESENTATIONS OR WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED. BUYER HAS NOT EXECUTED OR AUTHORIZED THE EXECUTION OF THIS AGREEMENT IN RELIANCE UPON ANY SUCH PROMISE, REPRESENTATION OR WARRANTY NOT EXPRESSLY SET FORTH HEREIN.

(b) WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, EXCEPT FOR THOSE REPRESENTATIONS AND WARRANTIES EXPRESSLY SET FORTH IN ARTICLE III, THE ACQUIRED ASSETS ARE SOLD “AS IS, WHERE IS,” “WITH ALL FAULTS,” AND NONE OF SELLER OR ITS AFFILIATES, NOR ANY OF THEIR RESPECTIVE REPRESENTATIVES, MAKE OR HAVE MADE, AND BUYER IS NOT RELYING ON, ANY REPRESENTATIONS OR WARRANTIES OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, AT COMMON LAW, STATUTORY OR OTHERWISE, WRITTEN OR ORAL, AS TO LIABILITIES, OPERATIONS OF THE FACILITIES, TITLE, CONDITION, VALUE OR QUALITY OF THE ACQUIRED ASSETS OR THE PROSPECTS (FINANCIAL AND OTHERWISE), RISKS OR ANY OTHER MATTERS RESPECTING THE ACQUIRED ASSETS OR ASSUMED

LIABILITIES, INCLUDING, WITHOUT LIMITATION, WITH RESPECT TO (TO THE EXTENT NOT OTHERWISE PROVIDED FOR HEREIN) (I) THE ACTUAL OR RATED GENERATING CAPABILITY OF ANY OF THE FACILITIES OR THE ABILITY OF BUYER TO SELL FROM ANY OF THE FACILITIES ELECTRIC ENERGY, CAPACITY OR OTHER PRODUCTS RECOGNIZED BY ISO-NE FROM TIME TO TIME, (II) MERCHANTABILITY, USAGE, OR SUITABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WITH RESPECT TO THE ACQUIRED ASSETS, OR ANY PART THEREOF, (III) THE WORKMANSHIP OF THE ACQUIRED ASSETS, OR THE ABSENCE OF ANY DEFECTS THEREIN, WHETHER LATENT OR PATENT, (IV) COMPLIANCE WITH ENVIRONMENTAL REQUIREMENTS RESPECTING THE ACQUIRED ASSETS, (V) WHETHER SELLER POSSESSES SUFFICIENT REAL PROPERTY OR PERSONAL PROPERTY TO OPERATE THE ACQUIRED ASSETS, OR (VI) THE PROBABLE SUCCESS OR PROFITABILITY OF OPERATING THE ACQUIRED ASSETS AFTER THE CLOSING, ALL OF WHICH ARE EXPRESSLY DISCLAIMED BY SELLER. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED HEREIN, SELLER FURTHER SPECIFICALLY DISCLAIMS ANY REPRESENTATION OR WARRANTY REGARDING THE ABSENCE OF HAZARDOUS SUBSTANCES OR LIABILITY OR POTENTIAL LIABILITY ARISING UNDER ENVIRONMENTAL LAWS. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER EXPRESSLY DISCLAIMS ANY REPRESENTATION OR WARRANTY OF ANY KIND REGARDING THE CONDITION OF THE ACQUIRED ASSETS OR THE SUITABILITY THEREOF FOR OPERATION AS POWER GENERATION FACILITIES OR AS SITES FOR THE DEVELOPMENT OF ADDITIONAL OR REPLACEMENT GENERATION CAPACITY. NO MATERIAL OR INFORMATION MADE AVAILABLE BY OR COMMUNICATIONS MADE BY SELLER, ITS AFFILIATES AND THEIR RESPECTIVE REPRESENTATIVES, THE NHPUC, OR ANY BROKER OR INVESTMENT BANKER IN EXPECTATION OF OR IN CONNECTION WITH THE TRANSACTIONS CONTEMPLATED HEREBY, INCLUDING WITHOUT LIMITATION ANY INFORMATION OR MATERIAL CONTAINED IN THE CONFIDENTIAL INFORMATION MEMORANDUM DATED AS OF MARCH 2017, ANY OTHER EVALUATION OR DUE DILIGENCE MATERIAL, THE DATA SITE, MANAGEMENT PRESENTATIONS, FUNCTIONAL “BREAK-OUT” DISCUSSIONS, OR ANY ORAL, WRITTEN OR ELECTRONIC RESPONSE TO ANY INFORMATION REQUEST MADE AVAILABLE TO BUYER, WILL CAUSE OR CREATE ANY WARRANTY, EXPRESS OR IMPLIED, AS TO THE TITLE, CONDITION, VALUE OR QUALITY OF THE ACQUIRED ASSETS OTHER THAN THOSE REPRESENTATIONS AND WARRANTIES OF SELLER EXPRESSLY SET FORTH IN ARTICLE III, AND EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER SHALL NOT HAVE OR BE SUBJECT TO ANY LIABILITY TO BUYER RESULTING THEREFROM.

**Section 7.9 Exclusive Remedies; Certain Waivers, Releases and Limitations.**

(a) Notwithstanding anything to the contrary set forth herein, subject to Section 8.3, from and after the Closing, the rights and remedies of the Parties under this ARTICLE VII shall be the exclusive rights and remedies available to any Party hereto with respect to any breach of any representation, warranty, covenant or agreement set forth in this Agreement or otherwise in respect of the transactions contemplated by this Agreement or the Related Agreements (excluding the Asset Demarcation Agreement, the Easements, the Interconnection Agreements, and the Transition Services Agreement). In furtherance of the foregoing, subject to Section 8.3, each Party hereby waives, from and after the Closing, any and all rights, claims and causes of action for any breach of any representation, warranty, covenant or agreement set forth in this Agreement or otherwise relating to the transactions contemplated by this Agreement or the Related Agreements that it may have against the other Party hereto and its Affiliates and their respective Representatives arising under or based upon any Law or otherwise, except pursuant to the provisions of this ARTICLE VII. Nothing in this Section 7.9(a) shall limit any Party’s rights to seek and obtain any equitable relief to which such Party is entitled pursuant to Section 8.3; provided, however, that any monetary awards awarded as a part of such equitable relief shall be subject to the limitations set forth in this ARTICLE VII.

(b) Without limiting the provisions of Section 7.9(a), Buyer, for itself and its Affiliates, effective as of the Closing, hereby irrevocably releases, agrees to hold harmless and forever discharges Seller, its Representatives and its Affiliates from any and all claims, demands, Losses, Liabilities, damages, complaints, causes of action, investigations, hearings, actions, suits or other Claims or proceedings of any kind or character whether known or unknown, hidden or concealed, arising out of or related to any Environmental Liability, except for Excluded Environmental Liabilities but only to the extent and for so long as the same are retained by Seller pursuant to Section 2.4(h). In furtherance of the foregoing, effective as of the Closing, Buyer, for itself and its Affiliates, hereby irrevocably waives, with respect to any matter it is releasing pursuant to the preceding sentence, any and all rights and benefits that it now has or in the future may have conferred upon it by virtue of any Law or common law principle which provides that a general release does not extend to claims which a party does not know or suspect to exist in its favor at the time of executing such release, if knowledge of such claims would have materially affected such party’s settlement with the obligor. Buyer hereby acknowledges that it is aware that factual matters now unknown to it may have given or hereafter may give rise to claims, demands, Losses, Liabilities, damages, complaints, causes of action, investigations, hearings, actions, suits or other Claims or proceedings that are unknown, unanticipated and unsuspected as of the Effective Date and will not be known, anticipated or suspected prior to the Closing Date, and Buyer further agrees that this Section 7.9(b) has been negotiated and agreed upon in light of that awareness, and Buyer, for itself and on behalf of its Affiliates, nevertheless hereby intends to irrevocably release, hold harmless and forever discharge

Seller and its Affiliates as set forth in the first sentence of this Section 7.9(b).

(c) To the extent the transfer, conveyance, assignment and delivery of the Acquired Assets to Buyer as contemplated in this Agreement is accomplished by deeds, assignments, easements, leases, licenses, bills of sale or other instruments of transfer and conveyance, whether executed at the Closing or thereafter, these instruments are made without representation or warranty by, or recourse against, Seller, except as expressly provided in this Agreement or in any such instrument.

(d) No Representative or Affiliate of Seller shall have any personal liability to Buyer or any other Person as a result of the breach of any representation, warranty, covenant, agreement or obligation of Seller in this Agreement, and no Representative or Affiliate of Buyer shall have any personal liability to Seller or any other Person as a result of the breach of any representation, warranty, covenant, agreement or obligation of Buyer in this Agreement.

(e) NOTWITHSTANDING ANYTHING IN THIS AGREEMENT OR ANY RELATED AGREEMENT (EXCLUDING THE ASSET DEMARCATION AGREEMENT, THE EASEMENTS, THE INTERCONNECTION AGREEMENTS, AND THE TRANSITION SERVICES AGREEMENT) TO THE CONTRARY, EXCEPT TO THE EXTENT PURSUANT TO A THIRD PARTY CLAIM, NO PARTY SHALL BE LIABLE FOR SPECIAL, PUNITIVE, EXEMPLARY, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES, OR LOST OPPORTUNITY, LOST PROFITS, DIMINUTION OF VALUE OR ANY DAMAGES BASED ON ANY TYPE OF MULTIPLE, WHETHER BASED ON CONTRACT, TORT, STRICT LIABILITY, OTHER LAW OR OTHERWISE AND WHETHER OR NOT ARISING FROM THE OTHER PARTY'S SOLE, JOINT OR CONCURRENT NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT (“NON-REIMBURSABLE DAMAGES”).

## ARTICLE VIII TERMINATION

**Section 8.1 Termination.** This Agreement may be terminated at any time before the Closing as follows:

(a) By either Buyer or Seller, by written notice to the other, if the Closing shall not have occurred within twelve (12) months after the Effective Date, as may be extended pursuant to Section 5.16 (the “**Outside Date**”); *provided*, that (i) if the sole reason Closing has not occurred prior to the Outside Date is that one or more Consents of a Governmental Authority required to consummate the Closing pursuant to ARTICLE VI have not yet been obtained or made, and such Consents are being diligently pursued by the appropriate Party, then such Outside Date may be extended by either Party by written notice to the other Party delivered at any time before termination of this Agreement, for an additional ninety (90) days, and (ii) Buyer cannot terminate this Agreement under this provision if the failure of the Closing to occur is the result of the failure on the part of Buyer to perform any of its obligations hereunder and Seller cannot terminate this Agreement under this provision if the failure of the Closing to occur is the result of the failure on the part of Seller to perform any of its obligations hereunder;

(b) By Seller, by written notice to Buyer, (i) immediately if Buyer has (A) breached its obligation to pay the Closing Purchase Price pursuant to Section 2.5 and Section 2.11(a), or (B) breached any of its covenants, agreements or obligations contained in Section 5.18 at any time; or (ii) if Buyer has breached in any material respect any other representation, warranty, covenant, agreement or obligation in this Agreement and such breach, in the case of this clause (ii), has not been cured within thirty (30) days following written notification thereof; *provided, however*, that if, at the end of such thirty (30) day period, Buyer is endeavoring in good faith, and proceeding diligently, to cure such breach, Buyer shall have an additional thirty (30) days in which to effect such cure;

(c) By Buyer, by written notice to Seller, if Seller has breached any of its representations, warranties, covenants, agreements or obligations in this Agreement and (i) such breach has not been cured within thirty (30) days following written notification thereof; *provided, however*, that if, at the end of such thirty (30) day period, Seller is endeavoring in good faith, and proceeding diligently, to cure such breach, Seller shall have an additional thirty (30) days in which to effect such cure and (ii) such breach (to the extent not cured) would result in a Material Adverse Effect or would have a material adverse effect on Seller's ability to perform its obligations hereunder;

(d) By either Buyer or Seller, by written notice to the other, if there shall be in effect any Law or final, non-appealable Order restraining, enjoining or otherwise prohibiting or making illegal the consummation of the transactions contemplated by this Agreement;

(e) By Buyer or Seller, as applicable, in accordance with Section 5.16 or Section 5.17; or

(f) By mutual written agreement of Buyer and Seller.

**Section 8.2 Effect of Termination; Termination Fee.**

(a) If this Agreement is validly terminated pursuant to Section 8.1, there will be no liability or obligation on the part of Seller or Buyer (or any of their respective Representatives or Affiliates), except as provided in this Section 8.2.

(b) Regardless of the reason for termination, Section 5.4(d), Section 5.18, Section 5.19, Section 7.9, Section 8.2, Section 8.3 and ARTICLE IX (and, in each case the applicable definitions and rules of interpretation set forth in ARTICLE I) will survive any termination of this Agreement.

(c) Upon termination of this Agreement by either Party for any reason, each Party shall return or destroy, in accordance with the terms of the Confidentiality Agreement and Section 5.18, all documents and other materials provided by the other Party relating to the Acquired Assets, the Assumed Liabilities, the Facilities or to this Agreement, the Related Agreements or the transactions contemplated hereby or thereby, including any information relating to the Parties to this Agreement, whether obtained before or after the execution of this Agreement, and all information received by Buyer with respect to Seller, the Acquired Assets, the Assumed Liabilities, the Facilities, this Agreement, the Related Agreements or otherwise respecting the transactions contemplated hereby shall remain subject to the terms of the Confidentiality Agreement and Section 5.18.

(d) If this Agreement is terminated by Seller pursuant to Section 8.1(b), then notwithstanding any other provision of this Agreement but without limiting any right of Seller to an injunction, specific performance or other non-monetary equitable relief in accordance with Section 8.3, Buyer hereby agrees to pay immediately to Seller, as liquidated damages (and not a penalty) in connection with any such termination, an amount equal to Twelve Million, Four Hundred Fifty Dollars (\$12,450,000) in immediately available funds. The Parties acknowledge and agree that the provisions for payment of liquidated damages in this Section 8.2(d) have been included because, in the event of termination of this Agreement pursuant to Section 8.1(b), the actual damages to be incurred by Seller are reasonably expected to approximate the amount of liquidated damages set forth in this Section 8.2(d) and because the actual amount of such damages would be difficult if not impossible to measure and prove precisely. The Parties therefore expressly intend to liquidate damages in advance in accordance with this Section 8.2(d), and, without limiting the generality of the foregoing, acknowledge and agree that the amount of liquidated damages set forth in this Section 8.2(d) is reasonable and is not greatly disproportionate to the presumable loss or injury of Seller in the event of termination of this Agreement pursuant to Section 8.1(b). Buyer acknowledges that the agreements contained in this Section 8.2(d) are an integral part of the transactions contemplated by this Agreement and that, without these agreements, Seller would not enter into this Agreement. The Parties acknowledge and agree that (A) Seller shall be entitled both to pursue payment of liquidated damages in accordance with this Section 8.2(d) and to pursue specific performance pursuant to Section 8.3 and (B) Seller may, in its sole discretion, elect to receive either an award of liquidated damages in accordance with this Section 8.2(d) or judgment awarding specific performance pursuant to Section 8.3; *provided*, that the Parties acknowledge and agree that under no circumstance shall Seller be entitled to receive both payment of liquidated damages in accordance with this Section 8.2(d) and specific performance pursuant to Section 8.3.

(e) In the event Seller or Buyer, as applicable, commences a proceeding in order to obtain (i) payment hereunder that results in a judgment against Buyer or Seller for the amounts set forth in Section 8.2(d), or (ii) specific performance or other equitable relief that results in a judgment against Buyer or Seller pursuant to Section 8.3, then in either case Buyer or Seller, as applicable, shall also pay to Seller or Buyer, as applicable, its costs and expenses (including reasonable attorneys' fees and expenses) in connection with such proceeding, together with interest on the amounts due pursuant to Section 8.2(d) or this Section 8.2(e) from the date such payment was required to be made until the date of payment at the prime lending rate as published in The Wall Street Journal in effect on the date such payment was required to be made.

**Section 8.3 Specific Performance and Other Remedies.** Each Party hereby acknowledges and agrees that the rights of each Party to consummate the transactions contemplated hereby are special, unique and of extraordinary character, and that, if any of the provisions of this Agreement were not performed by a Party in accordance with their specific terms or were otherwise breached by a Party, the non-breaching Party would suffer irreparable damage and would be without an adequate remedy at law. Notwithstanding anything to the contrary herein, if any Party violates or fails or refuses to perform any covenant or agreement made by such Party herein, without limiting or waiving in any respect any rights or remedies of a Party under this Agreement now or hereafter existing at law, in equity or by statute, the non-breaching Party shall, in addition to any other remedy to which a Party is entitled at law or in equity, be entitled to specific performance of such covenant or agreement, injunctions to prevent or restrain breaches of this Agreement, and any other equitable relief, in each case without the proof of actual damages. Each Party agrees to waive any requirement for the security or posting of any bond in connection with any such equitable remedy, and agrees that it will not oppose the granting of an injunction, specific performance or other equitable relief on the basis that (a) the other Party has an adequate remedy at law, or (b) an award of specific performance is not an appropriate remedy for any reason at law or equity.

## ARTICLE IX MISCELLANEOUS

**Section 9.1 Expenses.** Except as otherwise expressly provided in this Agreement, including in Section 8.2, whether or not the Closing shall have occurred, each Party will pay its own costs and expenses (including, without limitation, fees and disbursements of

counsel, financial advisors and accountants) incurred in anticipation of, relating to and in connection with the negotiation and execution of this Agreement and the transactions contemplated hereby. Notwithstanding the foregoing, Buyer will pay (a) all filing fees for Consents of Governmental Authorities required in connection with this Agreement, the Related Agreements and the transactions contemplated hereby and thereby, including filing fees in connection with obtaining required Consents from FERC and any filings under the HSR Act, (b) all document recordation costs (including all New Hampshire County Registry of Deeds recording fees and New Hampshire Land and Community Heritage Investment Program surcharges for all deeds, mortgage indenture releases, easements, plans and other recorded documents) and fifty percent (50%) of all Transfer Taxes in connection with the transactions contemplated by this Agreement and the Related Agreements in accordance with Section 5.12, and (c) all costs and expenses of any title policy and all endorsements thereto that Buyer elects to obtain.

**Section 9.2 Notices.** All notices, requests, consents, waivers, demands, claims and other communications hereunder will be in writing and shall be deemed duly given (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by facsimile or e-mail (in each case, with confirmation of delivery) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient; or (d) on the fifth day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the applicable Party at the address and/or other contact information for such Party set forth below (or at such other address and/or other contact information for a Party as shall be specified in a notice given in accordance with this Section 9.2):

If to Seller:           Public Service Company of New Hampshire  
                                  c/o Eversource Energy

                                  e-mail: anoskow@manatt.com

**Section 9.3 Entire Agreement.** This Agreement (including the Exhibits and Schedules hereto), the Related Agreements and the Confidentiality Agreement constitute, as a complete and final integration thereof, the sole and entire agreement of the Parties with respect to the subject matter hereof, and supersede all prior and contemporaneous agreements (other than the Confidentiality Agreement), understandings or representations, both written and oral, between the Parties with respect to such subject matter. Except as otherwise set forth herein, all conflicts or inconsistencies between the terms hereof and the terms of any of the Related Agreements, if any, shall be resolved in favor of this Agreement.

**Section 9.4 Severability.** Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be

valid, binding and enforceable under applicable Law. If any provision of this Agreement is held to be illegal, invalid or unenforceable under any present or future Law, and if the rights and obligations of any Party will not be materially and adversely affected thereby, (a) such provision will be fully severable, (b) this Agreement will be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part hereof, (c) the remaining provisions of this Agreement will remain in full force and effect and will not be affected by the illegal, invalid or unenforceable provision or by its severance herefrom and (d) in lieu of such illegal, invalid or unenforceable provision, there will be added automatically as a part of this Agreement a legal, valid and enforceable provision as similar in terms of such illegal, invalid or unenforceable provision as may be possible.

**Section 9.5 Schedules and Exhibits.** Except as otherwise provided in this Agreement, all Schedules and Exhibits referred to herein, as the same may be amended, modified or supplemented from time to time in accordance with this Agreement, are intended to be and hereby are made a part of this Agreement. Any matter set forth in any Schedule under this Agreement corresponding to or qualifying a specific numbered paragraph of this Agreement shall be deemed to correspond to and qualify any other numbered paragraph of this Agreement to which the relevance or applicability of such matter is reasonably apparent on its face, whether or not there is an explicit cross-reference thereto. Certain information set forth in the Schedules is included solely for informational and other disclosure purposes, is not an admission of liability with respect to the matters covered by the information, and may not be required to be disclosed pursuant to this Agreement. The specification of any dollar amount in any provision of this Agreement or the inclusion of any specific item in the Schedules is not intended to imply, and shall not be deemed to be an acknowledgement or admission, that such amounts (or higher or lower amounts) or items are or are not material, and shall not otherwise be deemed to establish any standard of materiality or to define further or otherwise interpret the meaning of “material,” “Material Adverse Effect,” or any similar terms for purposes of the Agreement. In no event shall the inclusion of any matter in these Schedules be deemed or interpreted to broaden or otherwise amplify the representations, warranties, covenants or agreements contained in this Agreement. Capitalized terms used and not otherwise defined in the Schedules shall have the meanings given to them in this Agreement.

**Section 9.6 Successors and Assigns.** This Agreement shall be binding upon and inure to the benefit of the Parties named herein and their respective successors and permitted assigns. No Party may assign either this Agreement or the Related Agreements or any of its rights, interests, or obligations hereunder or thereunder without the prior written consent of the other Party; *provided*, that Buyer may, upon notice to Seller, collaterally assign all or part of its rights under this Agreement or other Related Agreements to any third party lender or one or more wholly-owned subsidiaries of Buyer, *provided*, that such transferee agrees in writing to be bound by the terms hereof applicable to Buyer and provides a copy of such undertaking to Seller. No assignment shall relieve the assigning Party of any of its obligations hereunder or thereunder.

**Section 9.7 No Third Party Beneficiaries.** The terms and provisions of this Agreement are intended solely for the benefit of the Parties hereto, their respective successors and permitted assigns, and any Person benefitting from the indemnities, releases or limitations of liability provided herein, and nothing herein, express or implied, is intended to or shall confer upon any other Person (including any employee, any beneficiary or dependents thereof, or any collective bargaining representative thereof) any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

**Section 9.8 No Joint Venture or Agency.** Nothing in this Agreement creates or is intended to create an association, trust, partnership, joint venture or other entity or similar legal relationship between the Parties, or impose a trust, partnership or fiduciary duty, obligation or liability on or with respect to either Party. Except as expressly provided herein, neither Party is or shall act as or be the agent or representative of the other Party.

**Section 9.9 Amendments and Waivers.** Except to the extent expressly set forth herein with respect to Schedule Updates during the Interim Period, this Agreement may not be amended, modified or supplemented except by an agreement in writing signed by each Party hereto. No waiver by any Party of any of the provisions hereof shall be effective unless explicitly set forth in writing and signed by the Party so waiving. No waiver by any Party shall operate or be construed as a waiver in respect of any failure, breach or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after such written waiver. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from this Agreement shall operate or be construed as a waiver thereof, nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

**Section 9.10 Governing Law.** This Agreement shall be governed by and construed in accordance with the internal laws of the state of New Hampshire without giving effect to any choice or conflict of law provision or rule (whether of the state of New Hampshire or any other jurisdiction) that would cause the application of Laws of any jurisdiction other than those of the state of New Hampshire, except to the extent that certain matters are pre-empted by federal Law or are governed by the Law of the jurisdiction of organization of any Party or other Person referred to herein.

**Section 9.11 Dispute Resolution.** Prior to instituting any litigation or dispute resolution mechanism, each of the Parties will attempt in good faith to resolve any dispute or claim promptly by referring any such matter to their respective senior executives for resolution. Either Party may give the other Party written notice of any dispute or claim. Within ten (10) days after delivery of said

notice, the executives will meet at a mutually acceptable time and place, and thereafter as often as they reasonably deem necessary to exchange information and to attempt to resolve the dispute or claim within thirty (30) days.

**Section 9.12 Submission to Jurisdiction.** ANY ACTION, SUIT OR PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE RELATED AGREEMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY SHALL BE INSTITUTED IN THE FEDERAL OR STATE COURTS LOCATED IN THE STATE OF NEW HAMPSHIRE IN ACCORDANCE WITH THE PROVISIONS OF THIS SECTION 9.12. EACH PARTY IRREVOCABLY AND UNCONDITIONALLY CONSENTS HEREBY TO SUBMIT TO THE EXCLUSIVE JURISDICTION OF THE BUSINESS AND COMMERCIAL DISPUTE DOCKET (BCDD) OF THE SUPERIOR COURT OF THE STATE OF NEW HAMPSHIRE PURSUANT TO N.H. SUPERIOR COURT CIVIL RULE 207 OR THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF NEW HAMPSHIRE FOR ANY SUCH ACTION, SUIT OR PROCEEDING, AND HEREBY FURTHER IRREVOCABLY AND UNCONDITIONALLY WAIVES AND AGREES NOT TO PLEAD IN ANY SUCH COURT THAT ANY SUCH ACTION, SUIT, OR PROCEEDING BROUGHT IN ANY SUCH COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM. SERVICE OF PROCESS, SUMMONS, NOTICE OR OTHER DOCUMENT BY MAIL TO SUCH PARTY'S ADDRESS SET FORTH HEREIN SHALL BE EFFECTIVE SERVICE OF PROCESS FOR ANY ACTION, SUIT OR OTHER PROCEEDING BROUGHT IN ANY SUCH COURT.

**Section 9.13 Waiver of Jury Trial.** EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE RELATED AGREEMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE RELATED AGREEMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY.

**Section 9.14 Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail, PDF or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

*[Signature page follows.]*

IN WITNESS WHEREOF, the Parties have caused this Agreement to be duly executed as of the date first written above.

February 23, 2018

CERTIFICATION PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, James J. Judge, certify that:

1. I have reviewed this Annual Report on Form 10-K of Eversource Energy (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Securities registered pursuant to Section 12(b) of the Act:

<b><u>Registrant</u></b>	<b><u>Title of Each Class</u></b>	<b><u>Name of Each Exchange on Which Registered</u></b>
<b>Eversource Energy</b>	Common Shares, \$5.00 par value	New York Stock Exchange, Inc.

Securities registered pursuant to Section 12(g) of the Act:

<u>Registrant</u>	<u>Title of Each Class</u>
<b>The Connecticut Light and Power Company</b>	Preferred Stock, par value \$50.00 per share, issuable in series, of which the following series are outstanding:
	\$1.90 Series of 1947
	\$2.00 Series of 1947
	\$2.04 Series of 1949
	\$2.20 Series of 1949
	3.90% Series of 1949
	\$2.06 Series E of 1954
	\$2.09 Series F of 1955
	4.50% Series of 1956
	4.96% Series of 1958
	4.50% Series of 1963
	5.28% Series of 1967
	\$3.24 Series G of 1968
6.56% Series of 1968	

<b>NSTAR Electric Company</b>	Preferred Stock, par value \$100.00 per share, issuable in series, of which the following series are outstanding:
	4.25% Series of 1956
	4.78% Series of 1958

NSTAR Electric Company and Public Service Company of New Hampshire each meet the conditions set forth in General Instruction I(1)(a) and (b) of Form 10-K, and each is therefore filing this Form 10-K with the reduced disclosure format specified in General Instruction I(2) of Form 10-K.

Indicate by check mark if the registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act.

<u>Yes</u>	<u>No</u>
<input checked="" type="checkbox"/>	<input type="checkbox"/>

Indicate by check mark if the registrants are not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

<u>Yes</u>	<u>No</u>
<input type="checkbox"/>	<input checked="" type="checkbox"/>

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days.

<u>Yes</u>	<u>No</u>
<input checked="" type="checkbox"/>	<input type="checkbox"/>

Indicate by check mark whether the registrants have submitted electronically and posted on its corporate Web sites, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrants were required to submit and post such files).

<u>Yes</u>	<u>No</u>
<input checked="" type="checkbox"/>	<input type="checkbox"/>

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrants' knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

	<u>Large accelerated filer</u>	<u>Accelerated filer</u>	<u>Non-accelerated filer</u>	<u>Smaller reporting company</u>	<u>Emerging growth company</u>
Eversource Energy	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The Connecticut Light and Power Company	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
NSTAR Electric Company	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Public Service Company of New Hampshire	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act):

	<u>Yes</u>	<u>No</u>
Eversource Energy	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The Connecticut Light and Power Company	<input type="checkbox"/>	<input checked="" type="checkbox"/>
NSTAR Electric Company	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Public Service Company of New Hampshire	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The aggregate market value of Eversource Energy's Common Shares, \$5.00 par value, held by non-affiliates, computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of Eversource Energy's most recently completed second fiscal quarter (June 30, 2018) was \$18,544,847,538 based on a closing market price of \$58.61 per share for the 316,410,980 common shares outstanding held by non-affiliates on June 30, 2018.

Indicate the number of shares outstanding of each of the issuers' classes of common stock, as of the latest practicable date:

<u>Company - Class of Stock</u>	<u>Outstanding as of January 31, 2019</u>
Eversource Energy Common Shares, \$5.00 par value	316,981,088
The Connecticut Light and Power Company Common Stock, \$10.00 par value	6,035,205 shares
NSTAR Electric Company Common Stock, \$1.00 par value	200 shares
Public Service Company of New Hampshire Common Stock, \$1.00 par value	301 shares

Eversource Energy holds all of the 6,035,205 shares , 200 shares and 301 shares of the outstanding common stock of The Connecticut Light and Power Company, NSTAR Electric Company and Public Service Company of New Hampshire, respectively.

Eversource Energy, The Connecticut Light and Power Company, NSTAR Electric Company and Public Service Company of New Hampshire each separately file this combined Form 10-K. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants.

---

## GLOSSARY OF TERMS

The following is a glossary of abbreviations and acronyms that are found in this report:

### Current or former Eversource Energy companies, segments or investments:

Eversource, ES or the Company	Eversource Energy and subsidiaries
Eversource parent or ES parent	Eversource Energy, a public utility holding company
ES parent and other companies	ES parent and other companies are comprised of Eversource parent, Eversource Service, Eversource Water Ventures, Inc. (parent company of Aquarion), and other subsidiaries, which primarily includes our unregulated businesses, HWP Company, The Rocky River Realty Company (a real estate subsidiary), the consolidated operations of CYAPC and YAEC, and Eversource parent's equity ownership interests that are not consolidated
CL&P	The Connecticut Light and Power Company
NSTAR Electric	NSTAR Electric Company
PSNH	Public Service Company of New Hampshire
PSNH Funding	PSNH Funding LLC 3, a bankruptcy remote, special purpose, wholly-owned subsidiary of PSNH
NSTAR Gas	NSTAR Gas Company
Yankee Gas	Yankee Gas Services Company
Aquarion	Eversource Aquarion Holdings, Inc. and its subsidiaries (formerly known as Macquarie Utilities Inc)
NPT	Northern Pass Transmission LLC
Northern Pass	The HVDC and associated alternating-current transmission line project from Canada into New Hampshire
Eversource Service	Eversource Energy Service Company
Bay State Wind	A project being developed jointly by Eversource and Denmark-based Ørsted (formerly known as DONG Energy) to construct an offshore wind farm off the coast of Massachusetts
CYAPC	Connecticut Yankee Atomic Power Company
MYAPC	Maine Yankee Atomic Power Company
YAEC	Yankee Atomic Electric Company
Yankee Companies	CYAPC, YAEC and MYAPC
Regulated companies	The Eversource regulated companies are comprised of the electric distribution and transmission businesses of CL&P, NSTAR Electric and PSNH, the natural gas distribution businesses of Yankee Gas and NSTAR Gas, NPT, Aquarion, and the solar power facilities of NSTAR Electric

### Regulators:

DEEP	Connecticut Department of Energy and Environmental Protection
DOE	U.S. Department of Energy
DOER	Massachusetts Department of Energy Resources
DPU	Massachusetts Department of Public Utilities
EPA	U.S. Environmental Protection Agency
FERC	Federal Energy Regulatory Commission
ISO-NE	ISO New England, Inc., the New England Independent System Operator
MA DEP	Massachusetts Department of Environmental Protection
NHPUC	New Hampshire Public Utilities Commission
PURA	Connecticut Public Utilities Regulatory Authority
SEC	U.S. Securities and Exchange Commission
SJC	Supreme Judicial Court of Massachusetts

### Other Terms and Abbreviations:

Access Northeast	A project jointly owned by Eversource, Enbridge, Inc. ("Enbridge"), and National Grid plc ("National Grid") through Algonquin Gas Transmission, LLC ("AGT")
ADIT	Accumulated Deferred Income Taxes
AFUDC	Allowance For Funds Used During Construction
AOCI	Accumulated Other Comprehensive Income
ARO	Asset Retirement Obligation
Bcf	Billion cubic feet
C&LM	Conservation and Load Management
CfD	Contract for Differences
CTA	Competitive Transition Assessment
CWIP	Construction Work in Progress
EDC	Electric distribution company
EPS	Earnings Per Share
ERISA	Employee Retirement Income Security Act of 1974

ESOP	Employee Stock Ownership Plan
Eversource 2017 Form 10-K	The Eversource Energy and Subsidiaries 2017 combined Annual Report on Form 10-K as filed with the SEC
Fitch	Fitch Ratings
FMCC	Federally Mandated Congestion Charge
FTR	Financial Transmission Rights
GAAP	Accounting principles generally accepted in the United States of America
GSC	Generation Service Charge
GSRP	Greater Springfield Reliability Project
GWh	Gigawatt-Hours
HQ	Hydro-Québec, a corporation wholly-owned by the Québec government, including its divisions that produce, transmit and distribute electricity in Québec, Canada
HVDC	High-voltage direct current
Hydro Renewable Energy	Hydro Renewable Energy, Inc., a wholly-owned subsidiary of Hydro-Québec
IPP	Independent Power Producers
ISO-NE Tariff	ISO-NE FERC Transmission, Markets and Services Tariff
kV	Kilovolt
kVa	Kilovolt-ampere
kW	Kilowatt (equal to one thousand watts)
kWh	Kilowatt-Hours (the basic unit of electricity energy equal to one kilowatt of power supplied for one hour)
LBR	Lost Base Revenue
LNG	Liquefied natural gas
LRS	Supplier of last resort service
MG	Million gallons
MGP	Manufactured Gas Plant
MMBtu	One million British thermal units
MMcf	Million cubic feet
Moody's	Moody's Investors Services, Inc.
MW	Megawatt
MWh	Megawatt-Hours
NEEWS	New England East-West Solution
NETOs	New England Transmission Owners (including Eversource, National Grid and Avangrid)
OCI	Other Comprehensive Income/(Loss)
PAM	Pension and PBOP Rate Adjustment Mechanism
PBOP	Postretirement Benefits Other Than Pension
PBOP Plan	Postretirement Benefits Other Than Pension Plan
PCRBS	Pollution Control Revenue Bonds
Pension Plan	Single uniform noncontributory defined benefit retirement plan
PPA	Pension Protection Act
RRBs	Rate Reduction Bonds
RECs	Renewable Energy Certificates
Regulatory ROE	The average cost of capital method for calculating the return on equity related to the distribution and generation business segment excluding the wholesale transmission segment
RNS	Regional Network Service
ROE	Return on Equity
RRB	Rate Reduction Bond or Rate Reduction Certificate
RSUs	Restricted share units
S&P	Standard & Poor's Financial Services LLC
SBC	Systems Benefits Charge
SCRC	Stranded Cost Recovery Charge
SERP	Supplemental Executive Retirement Plans and non-qualified defined benefit retirement plans
SS	Standard service
TCAM	Transmission Cost Adjustment Mechanism
TSA	Transmission Service Agreement
UI	The United Illuminating Company

**EVERSOURCE ENERGY AND SUBSIDIARIES  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

**SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES  
LITIGATION REFORM ACT OF 1995**

References in this Annual Report on Form 10-K to "Eversource," the "Company," "we," "our," and "us" refer to Eversource Energy and its consolidated subsidiaries. CL&P, NSTAR Electric, and PSNH are each doing business as Eversource Energy.

From time to time, we make statements concerning our expectations, beliefs, plans, objectives, goals, strategies, assumptions of future events, future financial performance or growth and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. You can generally identify our forward-looking statements through the use of words or phrases such as "estimate," "expect," "anticipate," "intend," "plan," "project," "believe," "forecast," "should," "could," and other similar expressions. Forward-looking statements are based on the current expectations, estimates, assumptions or projections of management and are not guarantees of future performance. These expectations, estimates, assumptions or projections may vary materially from actual results. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors that could cause our actual results to differ materially from those contained in our forward-looking statements, including, but not limited to:

- cyberattacks or breaches, including those resulting in the compromise of the confidentiality of our proprietary information and the personal information of our customers,
- acts of war or terrorism, physical attacks or grid disturbances that may damage and disrupt our transmission and distribution systems,
- ability or inability to commence and complete our major strategic development projects and opportunities,
- actions or inaction of local, state and federal regulatory, public policy and taxing bodies,
- substandard performance of third-party suppliers and service providers,
- fluctuations in weather patterns, including extreme weather due to climate change,
- changes in business conditions, which could include disruptive technology related to our current or future business model,
- increased conservation measures of customers and development of alternative energy sources,
- contamination of, or disruption in, our water supplies,
- changes in economic conditions, including impact on interest rates, tax policies, and customer demand and payment ability,
- changes in levels or timing of capital expenditures,
- disruptions in the capital markets or other events that make our access to necessary capital more difficult or costly,
- changes in laws, regulations or regulatory policy, including compliance with environmental laws and regulations,
- changes in accounting standards and financial reporting regulations,
- actions of rating agencies, and
- other presently unknown or unforeseen factors.

Other risk factors are detailed in our reports filed with the SEC and updated as necessary, and we encourage you to consult such disclosures.

All such factors are difficult to predict and contain uncertainties that may materially affect our actual results, many of which are beyond our control. You should not place undue reliance on the forward-looking statements, as each speaks only as of the date on which such statement is made, and, except as required by federal securities laws, we undertake no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for us to predict all of such factors, nor can we assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. For more information, see Item 1A, *Risk Factors*, included in this combined Annual Report on Form 10-K. This Annual Report on Form 10-K also describes material contingencies and critical accounting policies in the accompanying *Management's Discussion and Analysis of Financial Condition and Results of Operations* and *Combined Notes to Financial Statements*. We encourage you to review these items.

**EVERSOURCE ENERGY AND SUBSIDIARIES  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

**PART I**

**Item 1. Business**

Please refer to the Glossary of Terms for definitions of defined terms and abbreviations used in this combined Annual Report on Form 10-K.

Eversource Energy, headquartered in Boston, Massachusetts and Hartford, Connecticut, is a public utility holding company subject to regulation by the FERC under the Public Utility Holding Company Act of 2005. We are engaged primarily in the energy delivery business through the following wholly-owned utility subsidiaries:

- The Connecticut Light and Power Company (CL&P), a regulated electric utility that serves residential, commercial and industrial customers in parts of Connecticut;
- NSTAR Electric Company (NSTAR Electric), a regulated electric utility that serves residential, commercial and industrial customers in parts of eastern and western Massachusetts and owns solar power facilities;
- Public Service Company of New Hampshire (PSNH), a regulated electric utility that serves residential, commercial and industrial customers in parts of New Hampshire;
- NSTAR Gas Company (NSTAR Gas), a regulated natural gas utility that serves residential, commercial and industrial customers in parts of Massachusetts;
- Yankee Gas Services Company (Yankee Gas), a regulated natural gas utility that serves residential, commercial and industrial customers in parts of Connecticut; and
- Eversource Aquarion Holdings, Inc. (Aquarion), a utility holding company that owns three separate regulated water utility subsidiaries and collectively serves residential, commercial, industrial, and municipal and fire protection customers in parts of Connecticut, Massachusetts and New Hampshire. On December 4, 2017, Eversource acquired Eversource Aquarion Holdings, Inc. and its subsidiaries (formerly known as Macquarie Utilities Inc).

CL&P, NSTAR Electric and PSNH also serve New England customers through Eversource Energy's electric transmission business. Along with NSTAR Gas and Yankee Gas, each is doing business as Eversource Energy in its respective service territory.

Eversource Energy, CL&P, NSTAR Electric and PSNH each report their financial results separately. We also include information in this report on a segment basis for Eversource Energy. Eversource Energy has four reportable segments: electric distribution, electric transmission, natural gas distribution and water distribution. These segments represent substantially all of Eversource Energy's total consolidated revenues. CL&P, NSTAR Electric and PSNH do not report separate business segments.

**ELECTRIC DISTRIBUTION SEGMENT**

Eversource Energy's electric distribution segment consists of the distribution businesses of CL&P, NSTAR Electric and PSNH, which are engaged in the distribution of electricity to retail customers in Connecticut, Massachusetts and New Hampshire, respectively, and the solar power facilities of NSTAR Electric, and the generation facilities of PSNH before such facilities were sold in January and August 2018.

**ELECTRIC DISTRIBUTION – CONNECTICUT – THE CONNECTICUT LIGHT AND POWER COMPANY**

CL&P's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2018, CL&P furnished retail franchise electric service to approximately 1.25 million customers in 149 cities and towns in Connecticut, covering an area of 4,400 square miles. CL&P does not own any electric generation facilities.

**Rates**

CL&P is subject to regulation by the PURA, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities. CL&P's present general rate structure consists of various rate and service classifications covering residential, commercial and industrial services. CL&P's retail rates include a delivery service component, which includes distribution, transmission, conservation, renewable energy programs and other charges that are assessed on all customers.

Under Connecticut law, all of CL&P's customers are entitled to choose their energy suppliers, while CL&P remains their electric distribution company. For those customers who do not choose a competitive energy supplier, under SS rates for customers with less than 500 kilowatts of demand (residential customers and small and medium commercial and industrial customers), and LRS rates for customers with 500 kilowatts or more of demand (larger commercial and industrial customers), CL&P purchases power under standard offer contracts and passes the cost of the purchased power to customers through a combined charge on customers' bills.

The rates established by the PURA for CL&P are comprised of the following:

- An electric GSC, which recovers energy-related costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers. The GSC is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- A revenue decoupling adjustment that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the PURA of approximately \$1.1 billion, effective May 1, 2018 and May 1, 2019, and \$1.2 billion, effective May 1, 2020. These pre-established levels of baseline distribution delivery service revenue requirement are also subject to adjustment at each of these dates in accordance with provisions of the April 2018 rate case settlement agreement described below.
- A distribution charge, which includes a fixed customer charge and a demand and/or energy charge to collect the costs of building and expanding the infrastructure to deliver electricity to customers, as well as ongoing operating costs to maintain the infrastructure.
- An Electric System Improvements (ESI) charge, which collects the costs of building and expanding the infrastructure to deliver electricity to customers above the level recovered through the distribution charge. The ESI also recovers costs associated with CL&P's system resiliency program. The ESI is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- An FMCC, which recovers any costs imposed by the FERC as part of the New England Standard Market Design, including locational marginal pricing, locational installed capacity payments, and any costs approved by the PURA to reduce these charges. The FMCC has both a bypassable component and a non-bypassable component, and is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market. The transmission charge is adjusted periodically and reconciled annually to actual costs incurred, and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- A CTA charge, assessed to recover stranded costs associated with electric industry restructuring such as various IPP contracts. The CTA is reconciled annually to actual costs incurred and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- An SBC, established to fund expenses associated with various hardship and low-income programs. The SBC is reconciled annually to actual costs incurred and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- A Renewable Energy Investment Charge, which is used to promote investment in renewable energy sources. Amounts collected by this charge are deposited into the Connecticut Clean Energy Fund and administered by the Connecticut Green Bank.
- A conservation charge, comprised of both a statutory rate and Conservation Adjustment Mechanism (CAM) established to implement cost-effective energy conservation programs and market transformation initiatives. The conservation charge is reconciled annually to actual costs incurred, and reviewed by the PURA, with any difference refunded to, or recovered from, customers through an approved adjustment to the following year's energy conservation spending plan budget.

As required by regulation, CL&P, jointly with UI, entered into the following contracts whereby UI will share 20 percent and CL&P will share 80 percent of the costs and benefits (CL&P's portion of these costs are either recovered from, or refunded to, customers through the FMCC):

- Four capacity CfDs (totaling approximately 787 MW of capacity) with three electric generation units and one demand response project, which extend through 2026 and have terms of up to 15 years beginning in 2009. The capacity CfDs obligate both CL&P and UI to make or receive payments on a monthly basis to or from the project and generation owners based on the difference between a contractually set capacity price and the capacity market prices that the project and generation owners receive in the ISO-NE capacity markets.
- Three peaker CfDs (totaling approximately 500 MW of peaking capacity) with three peaking generation units. The three peaker CfDs pay the generation owners the difference between capacity, forward reserve and energy market revenues and a cost-of-service payment stream for 30 years beginning in 2008 (including costs of plant operation and the prices that the generation owners receive for capacity and other products in the ISO-NE markets).

Distribution Rate Case: CL&P's distribution rates were established in an April 2018 PURA-approved rate case settlement agreement with rates effective May 1, 2018. For further information, see "Regulatory Developments and Rate Matters - Connecticut" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### Sources and Availability of Electric Power Supply

As noted above, CL&P does not own any generation assets and purchases energy supply to serve its SS and LRS loads from a variety of competitive sources through requests for proposals. During 2018, CL&P supplied approximately 45 percent of its customer load at SS or LRS rates while the other 55 percent of its customer load had migrated to competitive energy suppliers. In terms of the total number of CL&P customers, this equates to 28 percent being on competitive supply, while 72 percent remain with SS or LRS. Because this customer migration is only for energy supply service, it has no impact on CL&P's electric distribution business or its operating income.

CL&P periodically enters into full requirements contracts for SS loads for periods of up to one year. CL&P typically enters into full requirements contracts for LRS loads every three months. Currently, CL&P has full requirements contracts in place for 100 percent of its SS loads for the first half of 2019. For the second half of 2019, CL&P has 70 percent of its SS load under full requirements contracts and intends to purchase an additional 30 percent of full requirements. None of the SS load for 2020 has been procured. CL&P has full requirements contracts in place for its LRS loads through June 2019 and intends to purchase 100 percent of full requirements for the remainder of 2019.

### ELECTRIC DISTRIBUTION – MASSACHUSETTS – NSTAR ELECTRIC COMPANY

NSTAR Electric's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2018, NSTAR Electric furnished retail franchise electric service to approximately 1.47 million customers in Boston and 139 cities and towns in eastern and western Massachusetts, including Cape Cod, Martha's Vineyard and the greater Springfield metropolitan area, covering an aggregate area of approximately 3,200 square miles. NSTAR Electric does not own any generating facilities used to supply customers and purchases its energy requirements from competitive energy suppliers.

In December 2016, the DPU approved NSTAR Electric's application to develop 62 MW of new solar power facilities in addition to the 8 MW of existing solar power facilities. Currently, NSTAR Electric owns 58 MW of solar power facilities on sites in Massachusetts that were completed from 2010 through 2018. We expect the remaining 4 MW of new facilities to be completed in 2019. Similar to NSTAR Electric's current practice on the existing 58 MW of solar power facilities, we expect that NSTAR Electric will sell energy from the new facilities into the ISO-NE market. We estimate our investment in these new facilities will be approximately \$170 million.

### Rates

NSTAR Electric is subject to regulation by the DPU, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, acquisition of securities, standards of service and construction and operation of facilities. The present general rate structure for NSTAR Electric consists of various rate and service classifications covering residential, commercial and industrial services.

Under Massachusetts law, all customers of NSTAR Electric are entitled to choose their energy suppliers, while NSTAR Electric remains their electric distribution company. NSTAR Electric purchases power from competitive suppliers on behalf of, and passes the related cost through to, its customers who do not choose a competitive energy supplier (basic service). Electric distribution companies in Massachusetts are required to obtain and resell power to retail customers through basic service for those who choose not to buy energy from a competitive energy supplier. Most of the residential customers of NSTAR Electric have continued to buy their power from NSTAR Electric at basic service rates. Most commercial and industrial customers have switched to a competitive energy supplier.

The Cape Light Compact, an inter-governmental organization consisting of the 21 towns and two counties on Cape Cod and Martha's Vineyard, serves 200,000 customers through the delivery of energy efficiency programs, consumer advocacy, competitive electricity supply and green power options. NSTAR Electric continues to provide electric service to these customers including the delivery of power, maintenance of infrastructure, capital investment, meter reading, billing, and customer service.

The rates established by the DPU for NSTAR Electric are comprised of the following:

- A basic service charge that represents the collection of energy costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers, including costs related to charge-offs of uncollectible energy costs from customers. Basic service rates are reset every six months (every three months for large commercial and industrial customers). Additionally, the DPU has authorized NSTAR Electric to recover the cost of its NSTAR Green wind contracts through the basic service charge. Basic service costs are reconciled annually, with any differences refunded to, or recovered from, customers.
- A distribution charge, which includes a fixed customer charge and a demand and/or energy charge to collect the costs of building and expanding the distribution infrastructure to deliver electricity to its destination, as well as ongoing operating costs.
- A revenue decoupling adjustment that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the DPU of approximately \$956 million on an annualized basis for 2018. Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure. Annual

base distribution amounts are adjusted for inflation and filed for approval by the DPU on an annual basis, until the next rate case. The baseline distribution delivery service revenue requirement approved by the DPU for 2019 is \$988 million.

- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market. The transmission charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- A transition charge that represents costs to be collected primarily from previously held investments in generating plants, costs related to existing above-market power contracts, and contract costs related to long-term power contract buy-outs. The transition charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- A renewable energy charge that represents a legislatively-mandated charge to support the Massachusetts Renewable Energy Trust Fund.
- An energy efficiency charge that represents a legislatively-mandated charge to collect costs for energy efficiency programs. The energy efficiency charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- Reconciling adjustment charges that recover certain DPU-approved costs, including pension and PBOP benefits, low income customer discounts, credits issued to net-metering facilities installed by customers, payments to solar facilities qualified under the state solar renewable energy target program, attorney general consultant expenses, long-term renewable contracts, company owned solar facilities, vegetation management costs, credits related to the Tax Cuts and Jobs Act of 2017, and storm restoration. These charges are reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.

As required by regulation, NSTAR Electric, along with two other Massachusetts electric utilities, signed long-term commitments to purchase a combined estimated generating capacity of approximately 101 MW of wind and solar power from one wind farm in New York (28 MW), and nine solar projects in Connecticut, Maine, New Hampshire and Rhode Island (73 MW), over 20 years. One solar project began operating in January 2019, and the other eight solar projects are scheduled to begin operating in late 2019. In addition, the one wind farm in New York is scheduled to begin operating by year end 2020.

Distribution Rate Case: NSTAR Electric's distribution rates were established in a 2017 DPU-approved rate case with rates effective February 1, 2018. For further information, see "Regulatory Developments and Rate Matters - Massachusetts" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Service Quality Metrics: NSTAR Electric is subject to service quality ("SQ") metrics that measure safety, reliability and customer service, and could be required to pay to customers a SQ charge of up to 2.5 percent of annual transmission and distribution revenues for failing to meet such metrics. NSTAR Electric will not be required to pay a SQ charge for its 2018 performance as the company achieved results at or above target for all of its SQ metrics in 2018.

#### **Sources and Availability of Electric Power Supply**

As noted above, NSTAR Electric does not own any generation assets (other than solar power facilities) and purchases its energy requirements from a variety of competitive sources through requests for proposals issued periodically, consistent with DPU regulations. NSTAR Electric enters into supply contracts for basic service for 48 percent of its residential and small commercial and industrial ("C&I") customers twice per year for twelve-month terms. NSTAR Electric enters into supply contracts for basic service for 18 percent of large C&I customers every three months.

During 2018, NSTAR Electric supplied approximately 55 percent of its residential customer load, 33 percent of its small C&I customer load, and 8 percent of its large C&I customer load at basic service rates. The remainder of its customer load was distributed between municipal aggregation and competitive supply. Because customer migration is limited to energy supply service, it has no impact on the delivery business or operating income of NSTAR Electric.

#### **ELECTRIC DISTRIBUTION – NEW HAMPSHIRE – PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE**

PSNH's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2018, PSNH furnished retail franchise electric service to approximately 519,000 retail customers in 211 cities and towns in New Hampshire, covering an area of approximately 5,630 square miles.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to a 2017 purchase and sale agreement. The thermal generation facilities included approximately 1,100 MW of coal, natural gas, biomass and oil-fired electricity generation facilities. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to a separate 2017 purchase and sale agreement. For further information, see "Generation Divestiture" below. As of December 31, 2018, PSNH does not own any electric generation facilities.

## Rates

PSNH is subject to regulation by the NHPUC, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of securities, standards of service and construction and operation of facilities.

Under New Hampshire law, all of PSNH's customers are entitled to choose competitive energy suppliers. During 2018, approximately 24 percent of all of PSNH's customers (approximately 56 percent of load) were taking service from competitive energy suppliers.

The rates established by the NHPUC for PSNH are comprised of the following:

- A default energy service charge recovers energy-related costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers. Through March 31, 2018, the default energy service charge recovered the costs of PSNH's generation, as well as purchased power, and included an allowed ROE of 9.81 percent. Effective April 1, 2018, as a result of the completion of the divestiture of its non-hydro generation assets, PSNH purchased power for retail customers who had not chosen a competitive supplier through a periodic market solicitation with the rate set to recover the cost of that power, statutorily mandated renewable portfolio standard costs and the continued cost associated with the ownership of the Hydro generation units until the completion of the divestiture of the hydro units in August 2018. Effective September 1, 2018, any remaining costs from ownership of generation are recovered as part of the SCRC described below.
- A distribution charge, which includes kilowatt-hour and/or demand-based charges to recover costs related to the maintenance and operation of PSNH's infrastructure to deliver power to its destination, as well as power restoration and service costs. It also includes a customer charge to collect the cost of providing service to a customer; such as the installation, maintenance, reading and replacement of meters and maintaining accounts and records.
- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market.
- An SCRC, which allows PSNH to recover its stranded costs, including above-market expenses incurred under mandated power purchase obligations, other long-term investments and obligations, and the remaining costs associated with the 2018 sales of its generation facilities.
- An SBC, which funds energy efficiency programs for all customers, as well as assistance programs for residential customers within certain income guidelines.

The default energy service charge and SCRC rates change semi-annually and the transmission and SBC rates change annually. These rates are reconciled annually in accordance with the policies and procedures of the NHPUC, with any differences refunded to, or recovered from, customers.

PSNH distribution rates were established in a settlement approved by the NHPUC in 2010. Prior to the expiration of that settlement on June 30, 2015, the NHPUC approved the continuation of those rates, and increased funding via rates, of PSNH's reliability enhancement program.

## Generation Divestiture

In June 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, pursuant to which PSNH agreed to divest its generation assets, subject to NHPUC approval. The NHPUC approved this agreement as well as the final divestiture plan and auction process in 2016. On October 11, 2017, PSNH entered into two Purchase and Sale Agreements with private investors, one to sell its thermal generation assets at a purchase price of \$175 million, subject to adjustment, (the "Thermal Agreement") and a second to sell its hydroelectric generation assets at a purchase price of \$83 million, subject to adjustment (the "Hydro Agreement"). The NHPUC approved these agreements in late November 2017, at which time the Company classified these assets as held for sale.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to the Thermal Agreement. In accordance with the Thermal Agreement, the original purchase price of \$175 million was adjusted to reflect working capital adjustments, closing date adjustments and proration of taxes and fees prior to closing, totaling \$40.9 million. In the second quarter of 2018, the purchase price was further adjusted by \$17.3 million relating to the valuation of certain allowances. As a result of these adjustments, net proceeds from the sale of the thermal assets totaled \$116.8 million.

On July 16, 2018, FERC issued its order approving the transfer of PSNH's six hydroelectric licenses to private investors. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to the Hydro Agreement. In accordance with the Hydro Agreement, the original purchase price of \$83 million was adjusted to reflect contractual adjustments totaling \$5.8 million, resulting in net proceeds of \$77.2 million. The difference between the carrying value of the hydroelectric generation assets and the sale proceeds resulted in a gain of \$17.3 million. An estimated gain from the sale of these assets was included as an offset to the total remaining costs associated with the sale of generation assets that were securitized on May 8, 2018.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs pursuant to a finance order issued by the NHPUC on January 30, 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets. These RRBs are secured by a non-bypassable charge recoverable from PSNH customers. PSNH recorded regulatory assets and other deferred costs in connection with the generation asset divestiture and the securitization of remaining costs, which are probable of recovery through collection of the non-bypassable charge. For further information on the securitized RRB issuance, see "Liquidity - Rate Reduction Bonds" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **Sources and Availability of Electric Power Supply**

From January 1, 2018 through March 31, 2018, approximately 24 percent of PSNH's default energy service load was met through its own generation and approximately 18 percent was met through long-term power supply provided pursuant to orders of the NHPUC. The remaining 58 percent of PSNH's load was met by short-term (less than one year) purchases and spot purchases in the competitive New England wholesale power market. Included in the 58 percent are PSNH's obligations to purchase power from approximately two dozen IPPs, the output of which it either uses to serve its customer load or sells into the ISO-NE market. Beginning on April 1, 2018, 100 percent of PSNH's default energy service load was met through purchases of energy requirements from competitive sources through requests for proposals issued periodically, consistent with NHPUC regulations.

PSNH no longer owns any generation assets and enters into supply contracts for energy service twice per year for six-month terms for 76 percent of its residential and small commercial and industrial ("C&I") customers and for 15 percent of its large C&I customers.

During 2018, PSNH supplied approximately 42 percent of its customer load at default energy service rates while the other 58 percent of its customer load had migrated to competitive energy suppliers. Because this customer migration is only for energy supply service, it has no impact on PSNH's electric distribution business or its operating income.

### **ELECTRIC TRANSMISSION SEGMENT**

Each of CL&P, NSTAR Electric and PSNH owns and maintains transmission facilities that are part of an interstate power transmission grid over which electricity is transmitted throughout New England. Each of CL&P, NSTAR Electric and PSNH, and most other New England utilities, are parties to a series of agreements that provide for coordinated planning and operation of the region's transmission facilities and the rules by which they acquire transmission services. Under these arrangements, ISO-NE, a non-profit corporation whose board of directors and staff are independent of all market participants, serves as the regional transmission organization of the New England transmission system.

### **Wholesale Transmission Rates**

Wholesale transmission revenues are recovered through FERC-approved formula rates. Annual transmission revenue requirements include recovery of transmission costs and include a return on equity applied to transmission rate base. Transmission revenues are collected from New England customers, including distribution customers of CL&P, NSTAR Electric and PSNH. The transmission rates provide for an annual true-up of estimated to actual costs. The financial impacts of differences between actual and estimated costs are deferred for future recovery from, or refunded to, transmission customers.

### **FERC ROE Complaints**

Four separate complaints have been filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15 -month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE of 10.57 percent and the maximum ROE for transmission incentive ("incentive cap") of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

In response to appeals of the FERC decision in the first complaint filed by the NETOs and the Complainants, the U.S. Court of Appeals for the D.C. Circuit issued a decision on April 14, 2017 vacating and remanding the FERC's decision. On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. For further information, see "FERC Regulatory Matters - FERC ROE Complaints" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **Transmission Projects**

During 2018, we were involved in the planning, development and construction of a series of electric transmission projects, including the Greater Hartford Central Connecticut projects ("GHCC") and the Greater Boston Reliability Solutions, that will be built within the next three years and that will enhance system reliability and improve capacity. We were also involved in the planning and development of the Seacoast Reliability Project, for which the New Hampshire Site Evaluation Committee ("NHSEC") indicated its unanimous approval of the project on December 10, 2018, and subsequently issued its written decision on January 31, 2019. This project is scheduled to be completed by the end of 2019.

In March 2018, the NHSEC issued a written decision denying Northern Pass' siting application after which the Massachusetts EDCs terminated the selection of, and subsequent contract negotiations with, Northern Pass under the Massachusetts Clean Energy RFP. On April 27, 2018, NPT filed a motion for rehearing with the NHSEC and on July 12, 2018, the NHSEC issued its written decision denying Northern Pass' motion for rehearing. On August 10, 2018, NPT filed an appeal to the New Hampshire Supreme Court, alleging that the NHSEC failed to follow applicable law in its review of the project. On October 12, 2018, the New Hampshire Supreme Court accepted this appeal. Subsequently, the NHSEC transmitted the record of its proceedings to the New Hampshire Supreme Court on December 11, 2018. Briefing of the appeal began on February 4, 2019. The New Hampshire Supreme Court has not set a date for oral argument. NPT intends to continue to pursue NHSEC approval to construct this project. Consistent with Eversource's and HQ's long-term relationship to bring clean energy into New England, Eversource and HQ remain committed to Northern Pass and the many benefits this project will bring to our customers and the region. For further information, see "Business Development and Capital Expenditures - Electric Transmission Business" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **Transmission Rate Base**

Transmission rate base under our FERC-approved tariff primarily consists of our investment in transmission net utility plant less accumulated deferred income taxes.

Under our FERC-approved tariff, and with the exception of transmission projects that received specific FERC approval to include CWIP in rate base, transmission projects generally enter rate base after they are placed in commercial operation. At the end of 2018, our estimated transmission rate base was approximately \$6.7 billion, including approximately \$3.0 billion at CL&P, \$2.7 billion at NSTAR Electric, and \$920 million at PSNH.

### **NATURAL GAS DISTRIBUTION SEGMENT**

NSTAR Gas distributes natural gas to approximately 296,000 customers in 51 communities in central and eastern Massachusetts covering 1,067 square miles, and Yankee Gas distributes natural gas to approximately 237,000 customers in 72 cities and towns in Connecticut covering 2,187 square miles. Total throughput (sales and transportation) in 2018 was approximately 70.1 Bcf for NSTAR Gas and 58.6 Bcf for Yankee Gas. Our natural gas businesses provide firm natural gas sales and transportation service to eligible retail customers who require a continuous natural gas supply throughout the year, such as residential customers who rely on natural gas for heating, hot water and cooking needs, as well as commercial and industrial customers that rely on natural gas for space heating, hot water, cooking and commercial and industrial applications.

A portion of the storage of natural gas supply for NSTAR Gas during the winter heating season is provided by Hopkinton LNG Corp., an indirect, wholly-owned subsidiary of Eversource Energy. NSTAR Gas has access to Hopkinton LNG Corp. facilities in Hopkinton, Massachusetts consisting of a LNG liquefaction and vaporization plant and three above-ground cryogenic storage tanks having an aggregate capacity of 3.0 Bcf of liquefied natural gas. NSTAR Gas also has access to Hopkinton LNG Corp. facilities in Acushnet, Massachusetts that include additional storage capacity of 0.5 Bcf. Total vaporization capacity of these facilities is 0.21 Bcf per day. Yankee Gas owns a 1.2 Bcf LNG facility in Waterbury, Connecticut, which also has the ability to liquefy and vaporize up to 0.1 Bcf per day. This facility is used primarily to assist Yankee Gas in meeting its supplier-of-last-resort obligations and also enables it to provide economic supply and make economic refill of natural gas, typically during periods of low demand.

NSTAR Gas and Yankee Gas generate revenues primarily through the sale and/or transportation of natural gas. While all NSTAR Gas customers have the ability to choose to transport natural gas, in the past year, transportation represented only about two percent of the total residential load, while transportation represented about 56 percent of the total commercial and industrial load. Retail natural gas service in Connecticut is partially unbundled: residential customers in Yankee Gas' service territory buy natural gas supply and delivery only from Yankee Gas while commercial and industrial customers may choose their natural gas suppliers. NSTAR Gas offers firm transportation service to all customers who purchase natural gas from sources other than NSTAR Gas while Yankee Gas offers firm transportation service to its commercial and industrial customers who purchase natural gas from sources other than Yankee Gas. NSTAR Gas offers interruptible transportation and interruptible natural gas sales service to high volume commercial and industrial customers. Yankee Gas offers interruptible transportation and interruptible natural gas sales service to commercial and industrial customers that have the ability to switch from natural gas to an alternate fuel on short notice. NSTAR Gas and Yankee Gas can interrupt service to these customers during peak demand periods or at any other time to maintain distribution system integrity.

### **Rates**

NSTAR Gas and Yankee Gas are subject to regulation by the DPU and the PURA, respectively, which, among other things, have jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities.

Retail natural gas delivery and supply rates are established by the DPU and the PURA and are comprised of:

- A distribution charge consisting of a fixed customer charge and a demand and/or energy charge that collects the costs of building, maintaining, and expanding the natural gas infrastructure to deliver natural gas supply to its customers. This also includes collection of ongoing operating costs.
- A seasonal cost of gas adjustment clause ("CGAC") at NSTAR Gas that collects natural gas supply costs, pipeline and storage capacity costs, costs related to charge-offs of uncollected energy costs and working capital related costs. The CGAC is reset semi-annually

with any difference being recovered from, or refunded to, customers during the following corresponding season. In addition, NSTAR Gas files interim changes to its CGAC factor when the actual costs of natural gas supply vary from projections by more than five percent.

- A local distribution adjustment clause ("LDAC") at NSTAR Gas that collects all energy efficiency and related program costs, environmental costs, pension and PBOP related costs, attorney general consultant costs, and costs associated with low income customers. The LDAC is reset annually with any difference being recovered from, or refunded to, customers during the following period and provides for the recovery of certain costs applicable to both sales and transportation customers.
- A Purchased Gas Adjustment ("PGA") clause, which is evaluated monthly and allows Yankee Gas to recover the costs of the procurement of natural gas for its firm and seasonal customers. Differences between actual natural gas costs and collection amounts on August 31st of each year are deferred and then recovered from, or refunded to, customers during the following year. Carrying charges on outstanding balances are calculated using Yankee Gas' weighted average cost of capital in accordance with the directives of the PURA.
- Conservation Adjustment Mechanism ("CAM") at Yankee Gas, which allows 100 percent recovery of conservation costs through this mechanism including program incentives to promote energy efficiency, as well as recovery of any lost revenues associated with implementation of energy conservation measures. A reconciliation of CAM revenues to expenses is performed annually with any difference being recovered from, or refunded to, customers with carrying charges during the following year.

NSTAR Gas purchases financial contracts based on the New York Mercantile Exchange ("NYMEX") natural gas futures in order to reduce cash flow variability associated with the price for approximately one-third of its normal winter season natural gas supplies. These purchases are made under a program approved by the DPU in 2006. This practice attempts to minimize the impact of fluctuations in natural gas prices to NSTAR Gas' firm natural gas customers. These financial contracts do not procure natural gas supply. All costs incurred or benefits realized when these contracts are settled are included in the CGAC.

NSTAR Gas is subject to SQ metrics that measure safety, reliability and customer service and could be required to pay to customers a SQ charge of up to 2.5 percent of annual distribution revenues for failing to meet such metrics. NSTAR Gas will not be required to pay a SQ charge for its 2018 performance as it achieved results at or above target for all of its SQ metrics in 2018.

NSTAR Gas distribution rates were set in its 2015 DPU approved rate case. Yankee Gas distribution rates were set in a December 2018 PURA approved rate case settlement agreement, with rates effective November 15, 2018.

The 2018 Yankee Gas settlement agreement required Yankee Gas to implement a Distribution Integrity Management Program ("DIMP") cost recovery mechanism to further invest capital to replace aging infrastructure. The DIMP mechanism allows for recovery of costs associated with capital additions of approximately \$26 million to \$37 million annually, which is incremental to the \$150 million included in base distribution rate base per year. The settlement agreement also provides Yankee Gas the opportunity to seek recovery of additional capital spending above these levels with PURA approval. PURA ordered an accelerated replacement program for Yankee Gas to fully replace its cast iron and bare steel facilities in 11 years and fully replace copper services and certain steel mains and services in 14 years. Yankee Gas was also authorized to continue its ongoing natural gas system expansion program, implement a revenue decoupling rate mechanism, and recover merger costs. The settlement agreement included a regulatory ROE of 9.3 percent. In addition, the distribution rates charged to customers were adjusted to reflect the prospective impacts of the lower federal corporate income tax rate, the overcollection of the lower income tax rate from January 1, 2018, and the EDIT from the Tax Cuts and Jobs Act. Although new rates were effective January 1, 2019, the provisions of the settlement agreement took effect November 15, 2018. For further information on the 2018 Yankee Gas settlement agreement, see "Regulatory Developments and Rate Matters - Connecticut" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **Natural Gas Replacement and Expansion**

Massachusetts: On July 7, 2014, Massachusetts enacted "An Act Relative to Natural Gas Leaks". This act established a uniform natural gas leak classification standard for all Massachusetts natural gas utilities and a program that accelerates the replacement of aging natural gas infrastructure. The program enabled companies, including NSTAR Gas, to better manage the scheduling and costs of replacement. The act also called for the DPU to authorize natural gas utilities to design and offer programs to customers that will increase the availability, affordability and feasibility of natural gas service for new customers.

In October of each year, pursuant to the act, NSTAR Gas files the Gas System Enhancement Program ("GSEP") with the DPU for the following construction year. NSTAR Gas' program accelerates the replacement of certain natural gas distribution facilities in the system to less than 25 years. The GSEP includes a tariff that provides NSTAR Gas an opportunity to collect the costs for the program on an annual basis through a reconciling factor. On April 30th each year, the DPU approves the GSEP rate recovery factor that goes into effect on May 1st.

Connecticut: In 2013, in accordance with Connecticut law and regulations, the PURA approved a comprehensive joint natural gas infrastructure expansion plan (the "Expansion Plan") filed by Yankee Gas and other Connecticut natural gas distribution companies. In January 2015, the PURA approved a joint settlement agreement proposed by Yankee Gas and other Connecticut natural gas distribution companies and regulatory agencies that clarified the procedures and oversight criteria applicable to the Expansion Plan. Yankee Gas has received approval from PURA for its 2014, 2015 and 2016 System Expansion Reconciliations as of November 2017. Yankee Gas filed its 2017 System Expansion Reconciliation in March 2018 and is awaiting PURA review. Yankee Gas intends to file its 2018 System Expansion Reconciliation on March 15, 2019.

## Sources and Availability of Natural Gas Supply

NSTAR Gas maintains a flexible resource portfolio consisting of natural gas supply contracts, transportation contracts on interstate pipelines, market area storage and peaking services. NSTAR Gas purchases transportation, storage, and balancing services from Tennessee Gas Pipeline Company and Algonquin Gas Transmission Company, as well as other upstream pipelines that transport natural gas from major natural gas producing regions in the U.S., including the Gulf Coast, Mid-continent region, and Appalachian Shale supplies to the final delivery points in the NSTAR Gas service area. NSTAR Gas purchases all of its natural gas supply under a firm, competitively bid annual portfolio management contract. In addition to the firm transportation and natural gas storage supplies discussed above, NSTAR Gas utilizes on-system LNG facilities to meet its winter peaking demands. These LNG facilities, described below, are located within NSTAR Gas' distribution system and are used to liquefy and store pipeline natural gas during the warmer months for vaporization and use during the heating season. During the summer injection season, excess pipeline capacity and supplies are used to deliver and store natural gas in market area underground storage facilities located in Maryland and Pennsylvania. Stored natural gas is withdrawn during the winter season to supplement flowing pipeline supplies in order to meet firm heating demand. NSTAR Gas has firm underground storage contracts and total storage capacity entitlements of approximately 6.6 Bcf, of which 3.5 Bcf LNG storage is provided by Hopkinton LNG Corp. in facilities located in Hopkinton and Acushnet, MA.

The PURA requires Yankee Gas to meet the needs of its firm customers under all weather conditions. Specifically, Yankee Gas must structure its supply portfolio to meet firm customer needs under a design day scenario (defined as the coldest day in 30 years) and under a design year scenario (defined as the average of the four coldest years in the last 30 years). Yankee Gas also maintains a flexible resource portfolio consisting of natural gas supply contracts, transportation contracts on interstate pipelines, off-system storage and its on-system 1.2 Bcf LNG storage facility to meet consumption needs during the coldest days of winter. Yankee Gas obtains its interstate capacity from the three interstate pipelines that directly serve Connecticut: the Algonquin, Tennessee and Iroquois Pipelines, which connect to other upstream pipelines that transport natural gas from major natural gas producing regions, including the Gulf Coast, Mid-continent, Canadian regions and Appalachian Shale supplies.

Based on information currently available regarding projected growth in demand and estimates of availability of future supplies of pipeline natural gas, each of NSTAR Gas and Yankee Gas believes that participation in planned and anticipated pipeline and storage expansion projects will be required in order for it to meet current and future sales growth opportunities.

## WATER DISTRIBUTION SEGMENT

Eversource Water Ventures, Inc., a Connecticut corporation, through its wholly-owned subsidiary, Eversource Aquarion Holdings, Inc. (Aquarion), operates three separate regulated water utilities in Connecticut (Aquarion Water Company of Connecticut, or "AWC-CT"), Massachusetts (Aquarion Water Company of Massachusetts, or "AWC-MA") and New Hampshire (Aquarion Water Company of New Hampshire, or "AWC-NH"). These regulated companies provide water services to approximately 228,000 residential, commercial, industrial, municipal and fire protection and other customers, in 59 towns and cities in Connecticut, Massachusetts and New Hampshire. As of December 31, 2018, approximately 87 percent of Aquarion's customers were based in Connecticut.

### Rates

Aquarion's water utilities are subject to regulation by the PURA, the DPU and the NHPUC in Connecticut, Massachusetts and New Hampshire, respectively. These regulatory agencies, have jurisdiction over, among other things, rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities.

Aquarion's general rate structure consists of various rate and service classifications covering residential, commercial, industrial, and municipal and fire protection services.

The rates established by the PURA, DPU and NHPUC are comprised of the following:

- A base rate, which is comprised of fixed charges based on meter/fire connection sizes, as well as volumetric charges based on the amount of water sold. Together these charges are designed to recover the full cost of service resulting from a general rate proceeding.
- In Connecticut, a revenue adjustment mechanism ("RAM") that reconciles earned revenues, with certain allowed adjustments, on an annual basis, to the revenue requirement approved by the PURA in AWC-CT's last rate case (2013), which is an annual amount of \$177.9 million.
- In Connecticut and New Hampshire, a water infrastructure conservation adjustment ("WICA") charge, which is applied between rate case proceedings and seeks recovery of allowed costs associated with WICA-eligible capital projects placed in-service. The WICA is updated semi-annually in Connecticut and annually in New Hampshire.
- In Massachusetts, treatment plant surcharges, which are a series of three surcharges in Massachusetts (one fixed and two volumetric in nature) that are designed to recover certain operating costs and the costs of the lease of the treatment plant located in Hingham. These surcharges are applicable only to customers in Hingham, Hull and Cohasset.

## Sources and Availability of Water Supply

Our water utilities obtain their water supplies from owned surface water sources (reservoirs) and groundwater supplies (wells) with a total supply yield of approximately 131 million gallons per day, as well as water purchased from other water suppliers. Approximately 98 percent of our annual production is self-supplied and processed at 10 surface water treatment plants and numerous well stations, which are all located in Connecticut, Massachusetts, and New Hampshire.

The capacities of Aquarion's sources of supply, and water treatment, pumping and distribution facilities, are considered sufficient to meet the present requirements of Aquarion's customers under normal conditions. On occasion, drought declarations are issued for portions of Aquarion's service territories in response to extended periods of dry weather conditions.

## OFFSHORE WIND PROJECTS

Bay State Wind is an offshore wind project being jointly developed by Eversource and Denmark-based Ørsted. Bay State Wind is located in a 300-square-mile area of the Atlantic Ocean approximately 25 miles south of the coast of Massachusetts and has the ultimate potential to generate at least 2,000 MW of clean, renewable energy. Eversource and Ørsted each hold a 50 percent ownership interest in Bay State Wind. Bay State Wind has previously submitted proposals, and expects to participate in future solicitations, for offshore wind in Connecticut, Massachusetts, New York and Rhode Island based on each state's clean energy requirements.

On February 8, 2019, Eversource and Ørsted entered into a 50-50 partnership for key offshore wind assets in the Northeast. Eversource paid approximately \$225 million for a 50 percent interest in Ørsted's Revolution Wind and South Fork Wind power projects, as well as the 257-square-mile tract off the coasts of Massachusetts and Rhode Island. Revolution Wind is a 700 MW offshore wind power project located approximately 15 miles south of the Rhode Island coast, and South Fork Wind is approximately a 130 MW offshore wind power project located 35 miles east of Long Island. Subject to permitting, finalized power purchase agreements, where applicable, further development, and final investment decisions by Ørsted and Eversource, Revolution Wind is expected to be commissioned in 2023 and South Fork Wind is expected by the end of 2022.

For more information, see "Business Development and Capital Expenditures – Offshore Wind Projects" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

## NATURAL GAS TRANSMISSION PROJECT

Access Northeast is a natural gas pipeline and storage project jointly owned by Eversource, Enbridge, Inc. ("Enbridge") and National Grid plc ("National Grid"), through Algonquin Gas Transmission, LLC ("AGT"). Eversource owns a 40 percent interest in the project, which is accounted for as an equity method investment. In 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. As a result, Eversource recorded an other-than-temporary impairment of \$32.9 million pre-tax within Other Income, Net on our statement of income in 2018, which represented the full carrying value of our equity method investment. For more information, see "Business Development and Capital Expenditures – Natural Gas Transmission Project" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

## PROJECTED CAPITAL EXPENDITURES

We project to make capital expenditures of \$12.75 billion from 2019 through 2023, of which we expect \$8.06 billion to be in our electric and natural gas distribution segments, \$3.35 billion to be in our electric transmission segment and \$0.62 billion to be in our water distribution segment. We also project to invest \$0.72 billion in information technology and facilities upgrades and enhancements. These projections do not include any expected investments related to NPT or offshore wind projects.

## FINANCING

Our credit facilities and indentures require that Eversource parent and certain of its subsidiaries, including CL&P, NSTAR Electric, PSNH, NSTAR Gas, Yankee Gas, and Aquarion, comply with certain financial and non-financial covenants as are customarily included in such agreements, including maintaining a ratio of consolidated debt to total capitalization of no more than 65 percent. All of these companies currently are, and expect to remain, in compliance with these covenants.

As of December 31, 2018, \$801.1 million of Eversource's long-term debt, including \$350.0 million, \$250.0 million, \$150.0 million, \$50.0 million and \$1.1 million for Eversource parent, CL&P, PSNH, Yankee Gas and Aquarion, respectively, will mature within the next 12 months.

## **NUCLEAR FUEL STORAGE**

CL&P, NSTAR Electric, PSNH, and several other New England electric utilities are stockholders in three inactive regional nuclear generation companies, CYAPC, MYAPC and YAEC (collectively, the Yankee Companies). The Yankee Companies have completed the physical decommissioning of their respective generation facilities and are now engaged in the long-term storage of their spent nuclear fuel. The Yankee Companies have completed collection of their decommissioning and closure costs through the proceeds from the spent nuclear fuel litigation against the DOE and have refunded amounts to their member companies. These proceeds were used by the Yankee Companies to offset the decommissioning and closure cost amounts due from their member companies or to decrease the wholesale FERC-approved rates charged under power purchase agreements with CL&P, NSTAR Electric and PSNH and several other New England utilities. The decommissioning rates charged by the Yankee Companies have been reduced to zero. CL&P, NSTAR Electric and PSNH can recover these costs from, or refund proceeds to, their customers through state regulatory commission-approved retail rates.

We consolidate the assets and obligations of CYAPC and YAEC on our consolidated balance sheet because our ownership and voting interests are more than 50 percent of each of these companies.

## **OTHER REGULATORY AND ENVIRONMENTAL MATTERS**

### **General**

We are regulated in virtually all aspects of our business by various federal and state agencies, including FERC, the SEC, and various state and/or local regulatory authorities with jurisdiction over the industry and the service areas in which each of our companies operates, including the PURA, which has jurisdiction over CL&P, Yankee Gas, and Aquarion, the NHPUC, which has jurisdiction over PSNH and Aquarion, and the DPU, which has jurisdiction over NSTAR Electric, NSTAR Gas, and Aquarion.

### **Environmental Regulation**

We are subject to various federal, state and local requirements with respect to water quality, air quality, toxic substances, hazardous waste and other environmental matters. Additionally, major generation and transmission facilities may not be constructed or significantly modified without a review of the environmental impact of the proposed construction or modification by the applicable federal or state agencies.

### **Renewable Portfolio Standards**

Each of the states in which we do business also has Renewable Portfolio Standards ("RPS") requirements, which generally require fixed percentages of our energy supply to come from renewable energy sources such as solar, wind, hydropower, landfill gas, fuel cells and other similar sources.

New Hampshire's RPS provision requires increasing percentages of the electricity sold to retail customers to have direct ties to renewable sources. In 2018, the total RPS obligation was 18.7 percent and it will ultimately reach 25.2 percent in 2025. The costs of the RECs are recovered by PSNH through rates charged to customers.

Similarly, Connecticut's RPS statute requires increasing percentages of the electricity sold to retail customers to have direct ties to renewable sources. In 2018, the total RPS obligation was 25 percent and will ultimately reach 38 percent in 2020. CL&P is permitted to recover any costs incurred in complying with RPS from its customers through its GSC rate.

Massachusetts' RPS program also requires electricity suppliers to meet renewable energy standards. For 2018, the requirement was 23.365 percent, and will ultimately reach 37.75 percent in 2020. NSTAR Electric is permitted to recover any costs incurred in complying with RPS from its customers through rates. NSTAR Electric also owns renewable solar power facilities. The RECs generated from NSTAR Electric's solar power facilities are sold to other energy suppliers, and the proceeds from these sales are credited back to customers.

### **Hazardous Materials Regulations**

We have recorded a liability for what we believe, based upon currently available information, is our reasonably estimable environmental investigation, remediation, and/or Natural Resource Damages costs for waste disposal sites for which we have probable liability. Under federal and state law, government agencies and private parties can attempt to impose liability on us for recovery of investigation and remediation costs at hazardous waste sites. As of December 31, 2018, the liability recorded for our reasonably estimable and probable environmental remediation costs for known sites needing investigation and/or remediation, exclusive of recoveries from insurance or from third parties, was \$64.7 million, representing 60 sites. These costs could be significantly higher if additional remediation becomes necessary or when additional information as to the extent of contamination becomes available.

The most significant liabilities currently relate to future clean-up costs at former MGP facilities. These facilities were owned and operated by our predecessor companies from the mid-1800's to mid-1900's. By-products from the manufacture of gas using coal resulted in fuel oils, hydrocarbons, coal tar, purifier wastes, metals and other waste products that may pose a potential risk to human health and the environment. We currently have partial or full ownership responsibilities at former MGP sites that have a reserve balance of \$50.1 million of the total \$64.7 million as of December 31, 2018. MGP costs are recoverable through rates charged to our customers.

## **Electric and Magnetic Fields**

For more than twenty years, published reports have discussed the possibility of adverse health effects from electric and magnetic fields ("EMF") associated with electric transmission and distribution facilities and appliances and wiring in buildings and homes. Although weak health risk associations reported in some epidemiology studies remain unexplained, most researchers, as well as numerous scientific review panels, considering all significant EMF epidemiology and laboratory studies, have concluded that the available body of scientific information does not support the conclusion that EMF affects human health.

In accordance with recommendations of various regulatory bodies and public health organizations, we reduce EMF associated with new transmission lines by the use of designs that can be implemented without additional cost or at a modest cost. We do not believe that other capital expenditures are appropriate to minimize unsubstantiated risks.

## **Global Climate Change and Greenhouse Gas Emission Issues**

Global climate change and greenhouse gas emission issues have received an increased focus from state governments and the federal government. The EPA initiated a rulemaking addressing greenhouse gas emissions and, on December 7, 2009, issued a finding that concluded that greenhouse gas emissions are "air pollution" that endangers public health and welfare and should be regulated. The EPA has mandated greenhouse gas emission reporting beginning in 2011 for emissions for certain aspects of our business including volume of gas supplied to large customers and fugitive emissions of SF6 gas and methane.

We are continually evaluating the regulatory risks and regulatory uncertainty presented by climate change concerns. Such concerns could potentially lead to additional rules and regulations that impact how we operate our general utility business. These could include federal "cap and trade" laws, carbon taxes, and fuel and energy taxes. We expect that any costs of these rules and regulations would be recovered from customers.

## **EMPLOYEES**

As of December 31, 2018, Eversource Energy employed a total of 7,998 employees, excluding temporary employees, of which 1,307 were employed by CL&P, 1,618 were employed by NSTAR Electric, and 736 were employed by PSNH. Approximately 50 percent of our employees are members of the International Brotherhood of Electrical Workers, the Utility Workers Union of America or The United Steelworkers, and are covered by nine collective bargaining agreements.

## **INTERNET INFORMATION**

Our website address is [www.eversource.com](http://www.eversource.com). We make available through our website a link to the SEC's EDGAR website (<http://www.sec.gov/edgar/searchedgar/companysearch.html>), at which site Eversource's, CL&P's, NSTAR Electric's and PSNH's combined Annual Reports on Form 10-K, combined Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports may be reviewed. Information contained on the Company's website or that can be accessed through the website is not incorporated into and does not constitute a part of this Annual Report on Form 10-K. Printed copies of these reports may be obtained free of charge by writing to our Investor Relations Department at Eversource Energy, 107 Selden Street, Berlin, CT 06037.

## **Item 1A. Risk Factors**

In addition to the matters set forth under "Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995" included immediately prior to Item 1, *Business*, above, we are subject to a variety of significant risks. Our susceptibility to certain risks, including those discussed in detail below, could exacerbate other risks. These risk factors should be considered carefully in evaluating our risk profile.

### **Cyberattacks could severely impair operations, negatively impact our business, lead to the disclosure of confidential information and adversely affect our reputation.**

A successful cyberattack on the information technology systems that control our transmission and distribution systems or other assets could impair or prevent us from managing these systems and facilities, operating our systems effectively, or properly managing our data, networks and programs. The breach of certain information technology systems could adversely affect our ability to correctly record, process and report financial information. A major cyber incident could result in significant expenses to investigate and to repair system damage or security breaches and could lead to litigation, fines, other remedial action, heightened regulatory scrutiny and damage to our reputation.

We have instituted safeguards to protect our information technology systems and assets. We devote substantial resources to network and application security, encryption and other measures to protect our computer systems and infrastructure from unauthorized access or misuse and interface with numerous external entities to improve our cybersecurity situational awareness. The FERC, through the North American Electric Reliability Corporation, requires certain safeguards to be implemented to deter cyberattacks. These safeguards may not always be effective due to the evolving nature of cyberattacks. We maintain limited cyber insurance to cover damages and defense costs related to breaches of networks or operational technology.

Any such cyberattacks could result in loss of service to customers and a significant decrease in revenues, which could have a material adverse impact on our financial position, results of operations and cash flows.

### **Acts of war or terrorism, both threatened and actual, or physical attacks could adversely affect our ability to operate our systems and could adversely affect our financial results and liquidity.**

Acts of war or terrorism, both threatened and actual, or actual physical attacks that damage our transmission and distribution systems or other assets could negatively impact our ability to transmit or distribute energy, distribute water, or operate our systems efficiently or at all. Because our electric transmission systems are part of an interconnected regional grid, we face the risk of blackout due to grid disturbances or disruptions on a neighboring interconnected system. If our assets were physically damaged and were not recovered in a timely manner, it could result in a loss of service to customers and a significant decrease in revenues.

Any such acts of war or terrorism, physical attacks or grid disturbances could result in a significant decrease in revenues, significant expense to repair system damage, costs associated with governmental actions in response to such attacks, and liability claims, all of which could have a material adverse impact on our financial position, results of operations and cash flows.

### **Strategic development opportunities may not be successful and projects may not commence operation as scheduled or be completed, which could have a material adverse effect on our business prospects.**

We are pursuing broader strategic development investment opportunities that will benefit the New England region related to the construction of electric transmission facilities, off-shore wind electric generation facilities, interconnections to generating resources and other investment opportunities. The development of these activities involve numerous risks. Various factors could result in increased costs or result in delays or cancellation of these projects. Risks include regulatory approval processes, new legislation, economic events or factors, environmental and community concerns, design and siting issues, difficulties in obtaining required rights of way, competition from incumbent utilities and other entities, and actions of strategic partners. Should any of these factors result in such delays or cancellations, our financial position, results of operations, and cash flows could be adversely affected or our future growth opportunities may not be realized as anticipated.

As a result of legislative and regulatory changes, the states in which we provide service have implemented new selection procedures for new major electric transmission, natural gas pipeline, off-shore wind and other clean energy facilities. These procedures require the review of competing projects and permit the selection of only those projects that are expected to provide the greatest benefit to customers. If the projects in which we have invested are not selected for construction, or even if our projects are selected, then legislative or regulatory actions could result in our projects not being probable of entering the construction phase, which could have a material adverse effect on our future financial position, results of operations and cash flows.

### **The actions of regulators and legislators can significantly affect our earnings, liquidity and business activities.**

The rates that our electric, natural gas and water companies charge their customers are determined by their state regulatory commissions and by the FERC. These commissions also regulate the companies' accounting, operations, the issuance of certain securities and certain other matters. The FERC also regulates the transmission of electric energy, the sale of electric energy at wholesale, accounting, issuance of certain securities and certain other matters.

Under state and federal law, our electric, natural gas and water companies are entitled to charge rates that are sufficient to allow them an opportunity to recover their reasonable operating and capital costs and a reasonable ROE, to attract needed capital and maintain their financial integrity, while also protecting relevant public interests. Each of these companies prepares and submits periodic rate filings with their respective regulatory commissions for review and approval. As a result of a catastrophic event not involving Eversource, regulators and legislators could impose additional requirements resulting in additional costs to the Company.

The FERC has jurisdiction over our transmission costs recovery and our allowed ROEs. Certain outside parties have filed four complaints against all electric companies under the jurisdiction of ISO-NE alleging that our allowed ROEs are unjust and unreasonable. An adverse decision in any of these four complaints could adversely affect our financial position, results of operations and cash flows.

FERC's policy has encouraged competition for transmission projects, even within existing service territories of electric companies. Implementation of FERC's goals, including within our service territories, may expose us to competition for construction of transmission projects, additional regulatory considerations, and potential delay with respect to future transmission projects, which may adversely affect our results of operations.

There is no assurance that regulators will approve the recovery of all costs incurred by our electric, natural gas and water companies, including costs for construction, operation and maintenance, as well as a reasonable return on their respective regulated assets. The amount of costs incurred by the companies, coupled with increases in fuel and energy prices, could lead to consumer or regulatory resistance to the timely recovery of such costs, thereby adversely affecting our financial position, results of operations and cash flows.

**We outsource certain business functions to third-party suppliers and service providers, and substandard performance by those third parties could harm our business, reputation and results of operations.**

We outsource certain services to third parties in areas including information technology, transaction processing, human resources, payroll and payroll processing and other operational areas. Outsourcing of services to third parties could expose us to substandard quality of service delivery or substandard deliverables, which may result in missed deadlines or other timeliness issues, non-compliance (including with applicable legal requirements and industry standards) or reputational harm, which could negatively impact our results of operations. We also continue to pursue enhancements to standardize our systems and processes. If any difficulties in the operation of these systems were to occur, they could adversely affect our results of operations, or adversely affect our ability to work with regulators, unions, customers or employees.

**The effects of climate change, including severe storms, could cause significant damage to any of our facilities requiring extensive expenditures, the recovery for which is subject to approval by regulators.**

Climate change creates physical and financial risks. Physical risks from climate change may include an increase in sea levels and changes in weather conditions, such as changes in precipitation and extreme weather events including drought. Customers' energy needs vary with weather conditions, primarily temperature and humidity. For residential customers, heating and cooling represent their largest energy use. For water customers, conservation measures imposed by the communities we serve could impact water usage. To the extent weather conditions are affected by climate change, customers' energy and water usage could increase or decrease depending on the duration and magnitude of the changes.

Severe weather, such as ice and snow storms, hurricanes and other natural disasters, may cause outages and property damage, which may require us to incur additional costs that may not be recoverable from customers. The cost of repairing damage to our operating subsidiaries' facilities and the potential disruption of their operations due to storms, natural disasters or other catastrophic events could be substantial, particularly as regulators and customers demand better and quicker response times to outages. If, upon review, any of our state regulatory authorities finds that our actions were imprudent, some of those restoration costs may not be recoverable from customers. The inability to recover a significant amount of such costs could have an adverse effect on our financial position, results of operations and cash flows.

**Our transmission and distribution systems may not operate as expected, and could require unplanned expenditures, which could adversely affect our financial position, results of operations and cash flows.**

Our ability to properly operate our transmission and distribution systems is critical to the financial performance of our business. Our transmission and distribution businesses face several operational risks, including the breakdown, failure of, or damage to operating equipment, information technology systems, or processes, especially due to age; labor disputes; disruptions in the delivery of electricity, natural gas and water, including impacts on us or our customers; increased capital expenditure requirements, including those due to environmental regulation; catastrophic events such as fires, explosions, or other similar occurrences; extreme weather conditions beyond equipment and plant design capacity; other unanticipated operations and maintenance expenses and liabilities; and potential claims for property damage or personal injuries beyond the scope of our insurance coverage. Many of our transmission projects are expected to alleviate identified reliability issues and reduce customers' costs. However, if the in-service date for one or more of these projects is delayed due to economic events or factors, or regulatory or other delays, the risk of failures in the electricity transmission system may increase. Any failure of our transmission and distribution systems to operate as planned may result in increased capital costs, reduced earnings or unplanned increases in operation and maintenance costs. The inability to recover a significant amount of such costs could have an adverse effect on our financial position, results of operations and cash flows.

**New technology, conservation measures and alternative energy sources could adversely affect our operations and financial results.**

Advances in technology that reduce the costs of alternative methods of producing electric energy to a level that is competitive with that of current electric production methods, could result in loss of market share and customers, and may require us to make significant expenditures to remain competitive. These changes in technology could also alter the channels through which electric customers buy or utilize energy, which could reduce our revenues or increase our expenses. Economic downturns or periods of high energy supply costs typically can lead to the development of legislative and regulatory policy designed to promote reductions in energy consumption and increased energy efficiency and self-generation by customers. Customers' increased use of energy efficiency measures, distributed generation and energy storage technology could result in lower demand. Similarly, mandatory water conservation imposed by regulators due to drought conditions could result in lower demand for water. Reduced demand for electricity due to energy efficiency measures and the use of distributed generation, and reduced demand for water due to mandatory or voluntary conservation efforts, to the extent not substantially offset through ratemaking or decoupling mechanisms, could have a material adverse effect on our financial condition, results of operations and cash flows.

**The unauthorized access to and the misappropriation of confidential and proprietary customer, employee, financial or system operating information could adversely affect our business operations and adversely impact our reputation.**

In the regular course of business, we maintain sensitive customer, employee, financial and system operating information and are required by various federal and state laws to safeguard this information. Cyber intrusions, security breaches, theft or loss of this information by cybercrime or otherwise could lead to the release of critical operating information or confidential customer or employee information, which could adversely affect our business operations or adversely impact our reputation, and could result in significant costs, fines and litigation. We maintain limited privacy protection liability insurance to cover limited damages and defense costs arising from unauthorized disclosure of, or failure to protect, private information, as well as costs for notification to, or for credit card monitoring of, customers, employees and other persons in the event of a breach of private information. This insurance covers amounts paid to avert, prevent or stop a network attack or the disclosure of personal information, and costs of a qualified forensic firm to determine the cause, source and extent of a network attack or to investigate, examine and analyze our network to find the cause, source and extent of a data breach. While we have implemented measures designed to prevent network attacks and mitigate their effects should they occur, these measures may not be effective due to the continually evolving nature of efforts to access confidential information.

**Contamination of our water supplies, the failure of dams on reservoirs providing water to our customers, or requirements to repair, upgrade or dismantle any of these dams, may disrupt our ability to distribute water to our customers and result in substantial additional costs, which could adversely affect our financial condition, and results of operations.**

Our water supplies, including water provided to our customers, are subject to possible contamination from naturally occurring compounds or man-made substances.

Our water systems include impounding dams and reservoirs of various sizes. Although we believe our dams are structurally sound and well-maintained, significant damage to these facilities, or a significant decrease in the water in our reservoirs, could adversely affect our ability to provide water to our customers until the facilities and a sufficient amount of water in our reservoirs can be restored. A failure of a dam could result in personal injuries and downstream property damage for which we may be liable. The failure of a dam would also adversely affect our ability to supply water in sufficient quantities to our customers. Any losses or liabilities incurred due to a failure of one of our dams may not be covered by existing insurance, may exceed such insurance coverage limits, or may not be recoverable in rates. Any such losses may make it difficult for us to obtain insurance at acceptable rates in the future, and may have a material adverse effect on our financial condition, results of operations and cash flows.

**Our goodwill is valued and recorded at an amount that, if impaired and written down, could adversely affect our future operating results and total capitalization.**

We have a significant amount of goodwill on our consolidated balance sheet, which, as of December 31, 2018, totaled \$4.4 billion. The carrying value of goodwill represents the fair value of an acquired business in excess of the fair value of identifiable assets and liabilities as of the acquisition date. We test our goodwill balances for impairment on an annual basis or whenever events occur or circumstances change that would indicate a potential for impairment. A determination that goodwill is deemed to be impaired would result in a non-cash charge that could materially adversely affect our financial position, results of operations and total capitalization. The annual goodwill impairment test in 2018 resulted in a conclusion that our goodwill was not impaired.

**Eversource Energy and its utility subsidiaries are exposed to significant reputational risks, which make them vulnerable to increased regulatory oversight or other sanctions.**

Because utility companies, including our electric, natural gas and water utility subsidiaries, have large customer bases, they are subject to adverse publicity focused on the reliability of their distribution services and the speed with which they are able to respond to electric outages, natural gas leaks and similar interruptions caused by storm damage or other unanticipated events. Adverse publicity of this nature could harm the reputations of Eversource Energy and its subsidiaries; may make state legislatures, utility commissions and other regulatory authorities less likely to view them in a favorable light; and may cause them to be subject to less favorable legislative and regulatory outcomes or increased regulatory oversight. Unfavorable regulatory outcomes can include more stringent laws and regulations governing our operations, such as reliability and customer service quality standards or vegetation management requirements, as well as fines, penalties or other sanctions or requirements. The imposition of any of the foregoing could have a material adverse effect on the business, financial position, results of operations and cash flows of Eversource Energy and each of its utility subsidiaries.

**Limits on our access to and increases in the cost of capital may adversely impact our ability to execute our business plan.**

We use short-term debt and the long-term capital markets as a significant source of liquidity and funding for capital requirements not obtained from our operating cash flow. If access to these sources of liquidity becomes constrained, our ability to implement our business strategy could be adversely affected. In addition, higher interest rates would increase our cost of borrowing, which could adversely impact our results of operations. A downgrade of our credit ratings or events beyond our control, such as a disruption in global capital and credit markets, could increase our cost of borrowing and cost of capital or restrict our ability to access the capital markets and negatively affect our ability to maintain and to expand our businesses.

**Our counterparties may not meet their obligations to us or may elect to exercise their termination rights, which could adversely affect our earnings.**

We are exposed to the risk that counterparties to various arrangements who owe us money, have contracted to supply us with energy or other commodities or services, or who work with us as strategic partners, including on significant capital projects, will not be able to perform their obligations, will terminate such arrangements or, with respect to our credit facilities, fail to honor their commitments. Should any of these counterparties fail to perform their obligations or terminate such arrangements, we might be forced to replace the underlying commitment at higher market prices and/or have to delay the completion of, or cancel a capital project. Should any lenders under our credit facilities fail to perform, the level of borrowing capacity under those arrangements could decrease. In any such events, our financial position, results of operations, or cash flows could be adversely affected.

**Costs of compliance with environmental laws and regulations may increase and have an adverse effect on our business and results of operations.**

Our subsidiaries' operations are subject to extensive federal, state and local environmental statutes, rules and regulations that govern, among other things, water quality, water discharges, the management of hazardous and solid waste, and air emissions. Compliance with these requirements requires us to incur significant costs relating to environmental monitoring, maintenance and upgrading of facilities, remediation and permitting. The costs of compliance with existing legal requirements or legal requirements not yet adopted may increase in the future. An increase in such costs, unless promptly recovered, could have an adverse impact on our business and our financial position, results of operations and cash flows.

For further information, see Item 1, *Business - Other Regulatory and Environmental Matters*, included in this Annual Report on Form 10-K.

**Market performance or changes in assumptions may require us to make significant contributions to our pension and other postretirement benefit plans.**

We provide a defined benefit pension plan and other postretirement benefits for a substantial number of employees, former employees and retirees. Our future pension obligations, costs and liabilities are highly dependent on a variety of factors, many of which are beyond our control. These factors include estimated investment returns, interest rates, discount rates, health care cost trends, benefit changes, salary increases and the demographics of plan participants. If our assumptions prove to be inaccurate, our future costs could increase significantly. In addition, various factors, including underperformance of plan investments and changes in law or regulation, could increase the amount of contributions required to fund our pension plan in the future. Additional large funding requirements, when combined with the financing requirements of our construction program, could impact the timing and amount of future financings and negatively affect our financial position, results of operations and cash flows. For further information, see Note 10A, "Employee Benefits - Pensions and Postretirement Benefits Other Than Pension," to the financial statements.

**The loss of key personnel or the inability to hire and retain qualified employees could have an adverse effect on our business, financial position and results of operations.**

Our operations depend on the continued efforts of our employees. Retaining key employees and maintaining the ability to attract new employees are important to both our operational and financial performance. We cannot guarantee that any member of our management or any key employee at the Eversource parent or subsidiary level will continue to serve in any capacity for any particular period of time. In addition, a significant portion of our workforce in our subsidiaries, including many workers with specialized skills maintaining and servicing the electric, natural gas and water infrastructure, will be eligible to retire over the next five to ten years. Such highly skilled individuals cannot be quickly replaced due to the technically complex work they perform. We have developed strategic workforce plans to identify key functions and proactively implement plans to assure a ready and qualified workforce, but we cannot predict the impact of these plans on our ability to hire and retain key employees.

**As a holding company with no revenue-generating operations, Eversource parent's liquidity is dependent on dividends from its subsidiaries, its commercial paper program, and its ability to access the long-term debt and equity capital markets.**

Eversource parent is a holding company and as such, has no revenue-generating operations of its own. Its ability to meet its debt service obligations and to pay dividends on its common shares is largely dependent on the ability of its subsidiaries to pay dividends to or repay borrowings from Eversource parent, and/or Eversource parent's ability to access its commercial paper program or the long-term debt and equity capital markets. Prior to funding Eversource parent, the subsidiary companies have financial obligations that must be satisfied, including among others, their operating expenses, debt service, preferred dividends of certain subsidiaries, and obligations to trade creditors. Additionally, the

subsidiary companies could retain their free cash flow to fund their capital expenditures in lieu of receiving equity contributions from Eversource parent. Should the subsidiary companies not be able to pay dividends or repay funds due to Eversource parent, or if Eversource parent cannot access its commercial paper programs or the long-term debt and equity capital markets, Eversource parent's ability to pay interest, dividends and its own debt obligations would be restricted.

**Item 1B. Unresolved Staff Comments**

We do not have any unresolved SEC staff comments.

## Item 2. Properties

### Transmission and Distribution System

As of December 31, 2018, Eversource and our electric operating subsidiaries owned the following:

Eversource	Electric Distribution	Electric Transmission
Number of substations owned	495	74
Transformer capacity (in kVa)	43,632,000	16,149,000
Overhead lines (in circuit miles)	40,542	3,949
Capacity range of overhead transmission lines (in kV)	N/A	69 to 345
Underground lines (in circuit miles)	17,453	405
Capacity range of underground transmission lines (in kV)	N/A	69 to 345

	CL&P		NSTAR Electric		PSNH	
	Distribution	Transmission	Distribution	Transmission	Distribution	Transmission
Number of substations owned	181	20	174	34	140	20
Transformer capacity (in kVa)	21,752,000	3,633,000	17,568,000	7,465,000	4,312,000	5,051,000
Overhead lines (in circuit miles)	16,930	1,675	11,413	1,233	12,199	1,041
Capacity range of overhead transmission lines (in kV)	N/A	69 to 345	N/A	69 to 345	N/A	115 to 345
Underground lines (in circuit miles)	6,673	137	8,814	267	1,966	1
Capacity range of underground transmission lines (in kV)	N/A	69 to 345	N/A	115 to 345	N/A	115

	Eversource	CL&P	NSTAR Electric	PSNH
Underground and overhead line transformers in service	627,046	290,640	170,964	165,442
Aggregate capacity (in kVa)	36,601,452	15,855,590	14,157,211	6,588,651

### Electric Generating Plants

On January 10, 2018, Eversource and PSNH completed the sale of PSNH's thermal generation assets, including steam, internal combustion and biomass units. The sale of hydroelectric generation assets was completed on August 26, 2018. See Note 13, "Generation Asset Sale," in the accompanying Item 8, *Financial Statements and Supplementary Data* for further information.

As of December 31, 2018, NSTAR Electric owned the following solar power facilities:

Type of Plant	Number of Sites	Year Installed	Claimed Capability** (kilowatts)
Solar Fixed Tilt, Photovoltaic	20	2010 - 2018	58,100

\*\* Claimed capability represents the direct current nameplate capacity of the plants.

CL&P does not own any electric generating plants.

### Natural Gas Distribution System

As of December 31, 2018, Yankee Gas owned 28 active gate stations, 199 district regulator stations, and approximately 3,398 miles of natural gas main pipeline. Yankee Gas also owns a liquefaction and vaporization plant and above ground storage tank with a storage capacity equivalent of 1.2 Bcf of natural gas in Waterbury, Connecticut.

As of December 31, 2018, NSTAR Gas owned 21 active gate stations, 164 district regulator stations, and approximately 3,299 miles of natural gas main pipeline. Hopkinton, another subsidiary of Eversource, owns a satellite vaporization plant and above ground storage tanks in Acushnet, MA (0.5 Bcf of natural gas). In addition, Hopkinton owns a liquefaction and vaporization plant with above ground storage tanks in Hopkinton, MA (3.0 Bcf of natural gas). Combined, the two plants' tanks have an aggregate storage capacity equivalent to 3.5 Bcf of natural gas that is provided to NSTAR Gas under contract.

### Water Distribution System

Aquarion's properties consist of water transmission and distribution mains and associated valves, hydrants and service lines, water treatment plants, pumping facilities, wells, tanks, meters, dams, reservoirs, buildings, and other facilities and equipment used for the operation of our systems, including the collection, treatment, storage, and distribution of water.

As of December 31, 2018, Aquarion owned and operated sources of water supply with a combined yield of approximately 131 million gallons per day; 3,625 miles of transmission and distribution mains; 10 surface water treatment plants; 31 dams; and 107 wellfields.

## Franchises

**CL&P** Subject to the power of alteration, amendment or repeal by the General Assembly of Connecticut and subject to certain approvals, permits and consents of public authority and others prescribed by statute, CL&P has, subject to certain exceptions not deemed material, valid franchises free from burdensome restrictions to provide electric transmission and distribution services in the respective areas in which it is now supplying such service.

In addition to the right to provide electric transmission and distribution services as set forth above, the franchises of CL&P include, among others, limited rights and powers, as set forth under Connecticut law and the special acts of the General Assembly constituting its charter, to manufacture, generate, purchase and/or sell electricity at retail, including to provide Standard Service, Supplier of Last Resort service and backup service, to sell electricity at wholesale and to erect and maintain certain facilities on public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. The franchises of CL&P include the power of eminent domain. Connecticut law prohibits an electric distribution company from owning or operating generation assets. However, under "An Act Concerning Electricity and Energy Efficiency," enacted in 2007, an electric distribution company, such as CL&P, is permitted to purchase an existing electric generating plant located in Connecticut that is offered for sale, subject to prior approval from the PURA and a determination by the PURA that such purchase is in the public interest.

**NSTAR Electric** Through its charter, which is unlimited in time, NSTAR Electric has the right to engage in the business of delivering and selling electricity within its respective service territory, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon electric companies under Massachusetts laws. The locations in public ways for electric transmission and distribution lines are obtained from municipal and other state authorities who, in granting these locations, act as agents for the state. In some cases, the actions of these authorities are subject to appeal to the DPU. The rights to these locations are not limited in time and are subject to the action of these authorities and the legislature. Under Massachusetts law, no other entity may provide electric delivery service to retail customers within NSTAR Electric service territory without the written consent of NSTAR Electric. This consent must be filed with the DPU and the municipality so affected. The franchises of NSTAR Electric include the power of eminent domain, obtained through application to the DPU.

The Massachusetts restructuring legislation defines service territories as those territories actually served on July 1, 1997 and following municipal boundaries to the extent possible. The restructuring legislation further provides that until terminated by law or otherwise, distribution companies shall have the exclusive obligation to serve all retail customers within their service territories and no other person shall provide distribution service within such service territories without the written consent of such distribution companies.

**PSNH** The NHPUC, pursuant to statutory requirements, has issued orders granting PSNH exclusive franchises to distribute electricity in the respective areas in which it is now supplying such service.

In addition to the right to distribute electricity as set forth above, the franchises of PSNH include, among others, rights and powers to manufacture, generate, purchase, and transmit electricity, to sell electricity at wholesale to other utility companies and municipalities and to erect and maintain certain facilities on certain public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. PSNH's status as a public utility gives it the ability to petition the NHPUC for the right to exercise eminent domain for distribution services and for transmission eligible for regional cost allocation.

PSNH is also subject to certain regulatory oversight by the Maine Public Utilities Commission and the Vermont Public Utility Commission.

**NSTAR Gas** Through its charter, which is unlimited in time, NSTAR Gas has the right to engage in the business of delivering and selling natural gas within its respective service territory, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon natural gas companies under Massachusetts laws. The locations in public ways for natural gas distribution pipelines are obtained from municipal and other state authorities who, in granting these locations, act as agents for the state. In some cases, the actions of these authorities are subject to appeal to the DPU. The rights to these locations are not limited in time and are subject to the action of these authorities and the legislature. Under Massachusetts law, no other entity may provide natural gas delivery service to retail customers within the NSTAR Gas service territory without the written consent of NSTAR Gas. This consent must be filed with the DPU and the municipality so affected.

**Yankee Gas** Yankee Gas holds valid franchises to sell natural gas in the areas in which Yankee Gas supplies natural gas service, which it acquired either directly or from its predecessors in interest. Generally, Yankee Gas holds franchises to serve customers in areas designated by those franchises as well as in most other areas throughout Connecticut so long as those areas are not occupied and served by another natural gas utility under a valid franchise of its own or are not subject to an exclusive franchise of another natural gas utility or by consent. Yankee Gas' franchises are perpetual but remain subject to the power of alteration, amendment or repeal by the General Assembly of the State of Connecticut, the power of revocation by the PURA and certain approvals, permits and consents of public authorities and others prescribed by statute. Generally, Yankee Gas' franchises include, among other rights and powers, the right and power to manufacture, generate, purchase, transmit and distribute natural gas and to erect and maintain certain facilities on public highways and grounds, and the right of eminent domain, all subject to such consents and approvals of public authorities and others as may be required by law.

**Aquarion Water Company of Connecticut** AWC-CT derives its rights and franchises to operate from special acts of the Connecticut General Assembly and subject to certain approvals, permits and consents of public authority and others prescribed by statute and by its charter, AWC-CT has, with minor exceptions, solid franchises free from burdensome restrictions and unlimited as to time, and is authorized to sell potable water in the towns (or parts thereof) in which water is now being supplied by AWC-CT.

In addition to the right to sell water as set forth above, the franchises of AWC-CT include rights and powers to erect and maintain certain facilities on public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. Under the Connecticut General Statutes, AWC-CT may, upon payment of compensation, take and use such lands, springs, streams or ponds, or such rights or interests therein as the Connecticut Superior Court, upon application, may determine is necessary to enable AWC-CT to supply potable water for public or domestic use in its franchise areas.

**Aquarion Water Company of Massachusetts** Through its charters, which are unlimited in time, AWC-MA has the right to engage in the business of distributing and selling water within its service territories, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon water companies under Massachusetts laws. AWC-MA has the right to construct and maintain its mains and distribution pipes in and under any public ways and to take and hold water within its respective service territories. Subject to DPU regulation, AWC-MA has the right to establish and fix rates for use of the water distributed and to establish reasonable regulations regarding the same. Certain of the towns within our service area have the right, at any time, to purchase the corporate property and all rights and privileges of AWC-MA according to pricing formulas and procedures specifically described in AWC-MA's respective charters and in compliance with Massachusetts law.

**Aquarion Water Company of New Hampshire** The NHPUC, pursuant to statutory law, has issued orders granting and affirming AWC-NH's exclusive franchise to own, operate, and manage plant and equipment and any part of the same, for the conveyance of water for the public located within its franchise territory. That franchise territory encompasses the towns of Hampton, North Hampton and Rye. Subject to NHPUC's regulations, AWC-NH has the right to establish and fix rates for use of the water distributed and to establish reasonable regulations regarding the same.

In addition to the right to provide water supply, the franchise also allows AWC-NH to sell water at wholesale to other water utilities and municipalities and to construct plant and equipment and maintain such plant and equipment on certain public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law.

AWC-NH's status as a regulated public utility gives it the ability to petition the NHPUC for the right to exercise eminent domain for the establishment of plant and equipment. It can also petition the NHPUC for exemption from the operation of any local ordinance when certain utility structures are reasonably necessary for the convenience or welfare of the public and the local conditions, and, if the purpose of the structure relates to water supply withdrawal, the exemption is recommended by the New Hampshire Department of Environmental Services.

### **Item 3. Legal Proceedings**

#### **1. Yankee Companies v. U.S. Department of Energy**

*DOE Phase I Damages* - In 1998, the Yankee Companies filed separate complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal by January 31, 1998 pursuant to the terms of the 1983 spent fuel and high-level waste disposal contracts between the Yankee Companies and the DOE ("DOE Phase I Damages"). Phase I covered damages for the years 1998 through 2002. Following multiple appeals and cross-appeals in December 2012, the judgment awarding \$39.6 million, \$38.3 million and \$81.7 million to CYAPC, YAEC and MYAPC, respectively, became final.

In January 2013, the proceeds from the DOE Phase I Damages Claim were received by the Yankee Companies and transferred to each Yankee Company's respective decommissioning trust.

In June 2013, FERC approved CYAPC, YAEC and MYAPC to reduce rates in their wholesale power contracts through the application of the DOE proceeds for the benefit of customers. Changes to the terms of the wholesale power contracts became effective on July 1, 2013. In accordance with the FERC order, CL&P, NSTAR Electric and PSNH began receiving the benefit of the DOE proceeds, and the benefits have been passed on to customers.

On September 17, 2014, in accordance with the MYAPC refund plan, MYAPC returned a portion of the DOE Phase I Damages proceeds to the member companies, including CL&P, NSTAR Electric and PSNH, in the amount of \$3.2 million, \$1.9 million and \$1.4 million, respectively.

*DOE Phase II Damages* - In December 2007, the Yankee Companies each filed subsequent lawsuits against the DOE seeking recovery of actual damages incurred related to the alleged failure of the DOE to provide for a permanent facility to store spent nuclear fuel generated in years 2001 through 2008 for CYAPC and YAEC and from 2002 through 2008 for MYAPC ("DOE Phase II Damages"). In November 2013, the court issued a final judgment awarding \$126.3 million, \$73.3 million, and \$35.8 million to CYAPC, YAEC and MYAPC, respectively. On January 14, 2014, the Yankee Companies received a letter from the U.S. Department of Justice stating that the DOE will not appeal the court's final judgment.

In March and April 2014, CYAPC, YAEC and MYAPC received payment of \$126.3 million, \$73.3 million and \$35.8 million, respectively, of the DOE Phase II Damages proceeds and made the required informational filing with FERC in accordance with the process and methodology outlined in the 2013 FERC order. The Yankee Companies returned the DOE Phase II Damages proceeds to the member companies, including CL&P, NSTAR Electric and PSNH, for the benefit of their respective customers, on June 1, 2014. Refunds to CL&P's, NSTAR Electric's and PSNH's customers for these DOE proceeds began in the third quarter of 2014 and all refunds under these proceedings have been disbursed.

*DOE Phase III Damages* - In August 2013, the Yankee Companies each filed subsequent lawsuits against the DOE seeking recovery of actual damages incurred in the years 2009 through 2012 ("DOE Phase III"). The DOE Phase III trial concluded on July 1, 2015, followed by a post-trial briefing that concluded on October 4, 2015. On March 25, 2016, the court issued its decision and awarded CYAPC, YAEC and MYAPC damages of \$32.6 million, \$19.6 million and \$24.6 million, respectively. In total, the Yankee Companies were awarded \$76.8 million of the \$77.9 million in damages sought in the DOE Phase III. The decision became final on July 18, 2016, and the Yankee Companies received the awards from the DOE on October 14, 2016. The Yankee Companies received FERC approval of their proposed distribution of certain amounts of the awarded damages proceeds to member companies, including CL&P, NSTAR Electric and PSNH, which CYAPC and MYAPC made in December 2016. MYAPC also refunded \$56.5 million from its spent nuclear fuel trust, a portion of which was also refunded to the Eversource utility subsidiaries. In total, Eversource received \$26.1 million, of which CL&P, NSTAR Electric and PSNH received \$13.6 million, \$8.6 million and \$3.9 million, respectively. These amounts have been refunded to the customers of the respective Eversource utility subsidiaries.

*DOE Phase IV Damages* - On May 22, 2017, each of the Yankee Companies filed subsequent lawsuits against the DOE in the Court of Federal Claims seeking monetary damages totaling approximately \$100 million for CYAPC, YAEC and MYAPC, resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal covering the years from 2013 to 2016 ("DOE Phase IV"). On February 21, 2019, the Yankee Companies received a partial summary judgment and partial final judgment in their favor for the undisputed amount of monetary damages, which is the vast majority of the damages being sought. The DOE Phase IV trial for the remaining amount of damages is expected to begin in 2019.

## 2. Other Legal Proceedings

For further discussion of legal proceedings, see Item 1, *Business*: "- Electric Distribution Segment," "- Electric Transmission Segment," and "- Natural Gas Distribution Segment" for information about various state and federal regulatory and rate proceedings, civil lawsuits related thereto, and information about proceedings relating to power, transmission and pricing issues; "- Nuclear Fuel Storage" for information related to nuclear waste; and "- Other Regulatory and Environmental Matters" for information about proceedings involving toxic substances and hazardous waste, electric and magnetic fields, and other matters. In addition, see Item 1A, *Risk Factors*, for general information about several significant risks.

## Item 4. Mine Safety Disclosures

Not applicable.

## EXECUTIVE OFFICERS OF THE REGISTRANT

The following table sets forth the executive officers of Eversource Energy as of February 26, 2019. All of the Company's officers serve terms of one year and until their successors are elected and qualified:

Name	Age	Title
James J. Judge	63	President and Chief Executive Officer
Philip J. Lembo	63	Executive Vice President and Chief Financial Officer
Gregory B. Butler	61	Executive Vice President and General Counsel
Christine M. Carmody	56	Executive Vice President-Human Resources and Information Technology
Joseph R. Nolan, Jr.	55	Executive Vice President-Customer and Corporate Relations
Leon J. Olivier	71	Executive Vice President-Enterprise Energy Strategy and Business Development
Werner J. Schweiger	59	Executive Vice President and Chief Operating Officer
Jay S. Buth	49	Vice President, Controller and Chief Accounting Officer

*James J. Judge.* Mr. Judge has served as Chairman of the Board, President and Chief Executive Officer of Eversource Energy since May 3, 2017; as a Trustee of Eversource Energy and as Chairman of CL&P, NSTAR Electric and PSNH since May 4, 2016; and as Chairman, President and Chief Executive Officer of Eversource Service and Chairman of NSTAR Gas and Yankee Gas since May 9, 2016. Mr. Judge has served as a Director of CL&P, PSNH, Yankee Gas and Eversource Service since April 10, 2012; of NSTAR Electric and NSTAR Gas since September 27, 1999; and of Eversource Aquarion Holdings, Inc. Previously, Mr. Judge served as President and Chief Executive Officer of Eversource Energy from May 4, 2016 until May 3, 2017; and as Executive Vice President and Chief Financial Officer of Eversource Energy, CL&P, NSTAR Electric and PSNH from April 10, 2012 until May 4, 2016; of NSTAR Gas, Yankee Gas and Eversource Service from April 10, 2012 until May 9, 2016. Mr. Judge has served as Chairman of the Board of Eversource Energy Foundation, Inc. since May 9, 2016; and as a Director since April 10, 2012. He previously served as Treasurer of Eversource Energy Foundation, Inc. from April 10, 2012 until May 9, 2016. He has served as a Trustee of the NSTAR Foundation since December 12, 1995.

*Philip J. Lembo.* Mr. Lembo has served as Executive Vice President and Chief Financial Officer of Eversource Energy since May 3, 2017; and of CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since March 31, 2017. Mr. Lembo has served as a Director of CL&P, NSTAR Electric and PSNH since May 4, 2016; of NSTAR Gas, Yankee Gas and Eversource Service since May 9, 2016; and of Eversource Aquarion Holdings, Inc. Mr. Lembo previously served as Executive Vice President, Chief Financial Officer and Treasurer of Eversource Energy from August 8, 2016 until May 3, 2017; of CL&P, NSTAR Electric, PSNH, NSTAR Gas, Yankee Gas and Eversource Service from August 8, 2016 until March 31, 2017; as Senior Vice President, Chief Financial Officer and Treasurer of Eversource Energy, CL&P, NSTAR Electric and PSNH from May 4, 2016 until August 8, 2016; and of NSTAR Gas, Yankee Gas and Eversource Service from May 9, 2016 until August 8, 2016; as Vice President and Treasurer of Eversource Energy, CL&P and PSNH from April 10, 2012 until May 4, 2016; and of Yankee Gas and Eversource Service from April 10, 2012 until May 9, 2016. Mr. Lembo served as Vice President and Treasurer of NSTAR Electric and NSTAR Gas from

March 29, 2006 until May 4, 2016. Mr. Lembo has served as a Director of Eversource Energy Foundation, Inc. since May 9, 2016. He previously served as Treasurer of Eversource Energy Foundation, Inc. from May 9, 2016 until March 31, 2017. He has served as a Trustee of the NSTAR Foundation since May 9, 2016.

*Gregory B. Butler* . Mr. Butler has served as Executive Vice President and General Counsel of Eversource Energy, CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since August 8, 2016. Mr. Butler has served as a Director of NSTAR Electric and NSTAR Gas since April 10, 2012; of Eversource Service since November 27, 2012; of CL&P, PSNH and Yankee Gas since April 22, 2009; and of Eversource Aquarion Holdings, Inc. Mr. Butler previously served as Senior Vice President and General Counsel of Eversource Energy from May 1, 2014 until August 8, 2016; of NSTAR Electric and NSTAR Gas from April 10, 2012 until August 8, 2016; of CL&P, PSNH, Yankee Gas and Eversource Service from March 9, 2006 until August 8, 2016; and as Senior Vice President, General Counsel and Secretary of Eversource Energy from April 10, 2012 until May 1, 2014. He has served as a Director of Eversource Energy Foundation, Inc. since December 1, 2002. He has been a Trustee of the NSTAR Foundation since April 10, 2012.

*Christine M. Carmody*. Ms. Carmody has served as Executive Vice President-Human Resources and Information Technology of Eversource Energy and Eversource Service since August 8, 2016. Ms. Carmody has served as a Director of Eversource Service since November 27, 2012. Previously Ms. Carmody served as Senior Vice President-Human Resources of Eversource Energy from May 4, 2016 until August 8, 2016; of Eversource Service from April 10, 2012 until August 8, 2016; as Senior Vice President-Human Resources of CL&P, PSNH and Yankee Gas from November 27, 2012 until September 29, 2014; of NSTAR Electric and NSTAR Gas from August 1, 2008 until September 29, 2014; and as a Director of CL&P, PSNH and Yankee Gas from April 10, 2012 until September 29, 2014; and of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014. Ms. Carmody has served as a Director of Eversource Energy Foundation, Inc. since April 10, 2012. She has served as a Trustee of the NSTAR Foundation since August 1, 2008.

*Joseph R. Nolan, Jr.* Mr. Nolan has served as Executive Vice President-Customer and Corporate Relations of Eversource Energy and Eversource Service since August 8, 2016. Mr. Nolan has served as a Director of Eversource Service since November 27, 2012. Previously Mr. Nolan served as Senior Vice President-Corporate Relations of Eversource Energy from May 4, 2016 until August 8, 2016; of Eversource Service from April 10, 2012 to August 8, 2016; of NSTAR Electric and NSTAR Gas from April 10, 2012 until September 29, 2014; and of CL&P, PSNH and Yankee Gas from November 27, 2012 until September 29, 2014. Mr. Nolan previously served as a Director of CL&P, PSNH and Yankee Gas from April 10, 2012 until September 29, 2014; and of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014. Mr. Nolan has served as a Director of Eversource Energy Foundation, Inc. since April 10, 2012, and as Executive Director of Eversource Energy Foundation, Inc. since October 15, 2013. He has served as a Trustee of the NSTAR Foundation since October 1, 2000.

*Leon J. Olivier* . Mr. Olivier has served as Executive Vice President-Enterprise Energy Strategy and Business Development of Eversource Energy since September 2, 2014; and of Eversource Service since August 11, 2014. Mr. Olivier has served as a Director of Eversource Service since January 17, 2005. Mr. Olivier previously served as Executive Vice President and Chief Operating Officer of Eversource Energy from May 13, 2008 until September 2, 2014; of Eversource Service from May 13, 2008 until August 11, 2008; as Chief Executive Officer of NSTAR Electric and NSTAR Gas from April 10, 2012 until August 11, 2014; of CL&P, PSNH and Yankee Gas from January 15, 2007 until August 11, 2014; as a Director of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014; of PSNH and Yankee Gas from January 17, 2005 until September 29, 2014; and of CL&P from September 10, 2001 until September 29, 2014. He has served as a Director of Eversource Energy Foundation, Inc. since April 1, 2006. Mr. Olivier has served as a Trustee of the NSTAR Foundation since April 10, 2012.

*Werner J. Schweiger*. Mr. Schweiger has served as Executive Vice President and Chief Operating Officer of Eversource Energy since September 2, 2014; of Eversource Service since August 11, 2014; and as Chief Executive Officer of CL&P, NSTAR Electric, NSTAR Gas, PSNH and Yankee Gas since August 11, 2014. Mr. Schweiger has served as a Director of Eversource Service, NSTAR Gas and Yankee Gas since September 29, 2014; and of CL&P, PSNH and NSTAR Electric since May 28, 2013. He previously served as President of CL&P from June 2, 2015 until June 27, 2016; as President of NSTAR Gas and Yankee Gas from September 29, 2014 until November 10, 2014; as President-Electric Distribution of Eversource Service from January 16, 2013 until August 11, 2014; as President of NSTAR Electric from April 10, 2012 until January 16, 2013; and as a Director of NSTAR Electric from November 27, 2012 until January 16, 2013. Mr. Schweiger has served as a Director of Eversource Energy Foundation, Inc. since September 29, 2014. He has served as a Trustee of the NSTAR Foundation since September 29, 2014.

*Jay S. Buth*. Mr. Buth has served as Vice President, Controller and Chief Accounting Officer of Eversource Energy, CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since April 10, 2012.

**PART II**

**Item 5. Market for the Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

(a) Market Information

Our common shares are listed on the New York Stock Exchange. The ticker symbol is "ES." There is no established public trading market for the common stock of CL&P, NSTAR Electric and PSNH. All of the common stock of CL&P, NSTAR Electric and PSNH is held solely by Eversource.

(b) Holders

As of January 31, 2019, there were 35,874 registered common shareholders of our company on record. As of the same date, there were a total of 316,981,088 shares outstanding.

(c) Dividends

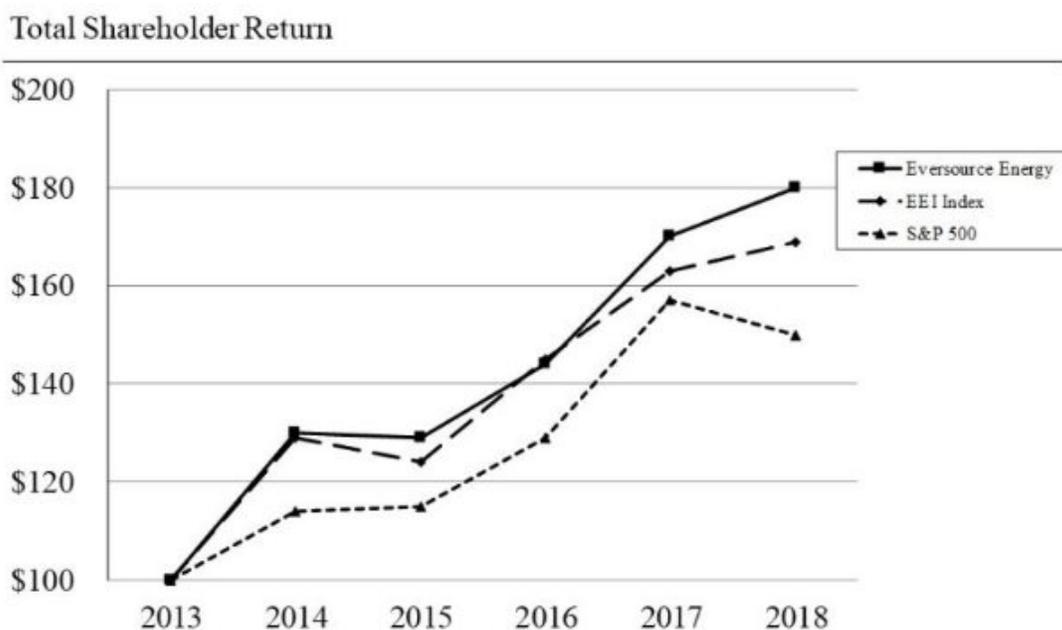

Information with respect to dividends and dividend restrictions for Eversource, CL&P, NSTAR Electric and PSNH is contained in Item 8, *Financial Statements and Supplementary Data*, in the *Combined Notes to Financial Statements*, within this Annual Report on Form 10-K.

(d) Securities Authorized for Issuance Under Equity Compensation Plans

For information regarding securities authorized for issuance under equity compensation plans, see Item 12, *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*, included in this Annual Report on Form 10-K.

(e) Performance Graph

The performance graph below illustrates a five-year comparison of cumulative total returns based on an initial investment of \$100 in 2013 in Eversource Energy common stock, as compared with the S&P 500 Stock Index and the EEI Index for the period 2013 through 2018, assuming all dividends are reinvested.

	December 31,					
	2013	2014	2015	2016	2017	2018
Eversource Energy	\$100	\$130	\$129	\$144	\$170	\$180
EEI Index	\$100	\$129	\$124	\$145	\$163	\$169
S&P 500	\$100	\$114	\$115	\$129	\$157	\$150

*Purchases of Equity Securities by the Issuer and Affiliated Purchasers*

The following table discloses purchases of our common shares made by us or on our behalf for the periods shown below. The common shares purchased consist of open market purchases made by the Company or an independent agent. These share transactions related to shares awarded under the company's incentive plan and dividend reinvestment plan and matching contributions under the Eversource 401k Plan.

<b>Period</b>	<b>Total Number of Shares Purchased</b>	<b>Average Price Paid per Share</b>	<b>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</b>	<b>Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans and Programs (at month end)</b>
October 1 - October 31, 2018	95,834	\$ 61.32	—	—
November 1 - November 30, 2018	2,248	64.62	—	—
December 1 - December 31, 2018	180,526	64.42	—	—
<b>Total</b>	<b>278,608</b>	<b>\$ 63.36</b>	<b>—</b>	<b>—</b>

## Item 6. Selected Consolidated Financial Data

### Eversource Selected Consolidated Financial Data (Unaudited)

<sup>(a)</sup> Includes portions due within one year.

<sup>(b)</sup> Market price information reflects closing prices as reflected by the New York Stock Exchange.

<sup>(c)</sup> Common Shareholders' Equity adjusted for goodwill and intangibles divided by total common shares outstanding.

<sup>(d)</sup> Net Income Attributable to Common Shareholders divided by average Common Shareholders' Equity.

<sup>(e)</sup> The closing market price divided by the book value per share.

See the *Combined Notes to Financial Statements* in this Annual Report on Form 10-K for a description of the sale of PSNH's thermal and hydroelectric generation assets in 2018 and the December 31, 2017 classification of these generation assets as held for sale, the acquisition of Aquarion on December 4, 2017, and any accounting changes materially affecting the comparability of the information reflected in the tables above.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

### EVERSOURCE ENERGY AND SUBSIDIARIES

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related combined notes included in this combined Annual Report on Form 10-K. References in this combined Annual Report on Form 10-K to "Eversource," the "Company," "we," "us," and "our" refer to Eversource Energy and its consolidated subsidiaries. All per-share amounts are reported on a diluted basis. The consolidated financial statements of Eversource, NSTAR Electric and PSNH and the financial statements of CL&P are herein collectively referred to as the "financial statements."

Refer to the Glossary of Terms included in this combined Annual Report on Form 10-K for abbreviations and acronyms used throughout this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

The only common equity securities that are publicly traded are common shares of Eversource. The earnings and EPS of each business discussed below do not represent a direct legal interest in the assets and liabilities of such business but rather represent a direct interest in our assets and liabilities as a whole. EPS by business is a financial measure not recognized under GAAP calculated by dividing the Net Income Attributable to Common Shareholders of each business by the weighted average diluted Eversource common shares outstanding for the period. We use this non-GAAP financial measure to evaluate and provide details of earnings results by business. We believe that the non-GAAP presentation is a meaningful representation of our financial performance and provides additional and useful information to readers of this report in analyzing historical and future performance by business. This non-GAAP financial measure should not be considered as an alternative to reported Net Income Attributable to Common Shareholders or EPS determined in accordance with GAAP as an indicator of operating performance.

The results of Aquarion and its subsidiaries, hereinafter referred to as "Aquarion," are included from the date of the acquisition, December 4, 2017, through December 31, 2018 throughout this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

#### Financial Condition and Business Analysis

##### Executive Summary

The following items in this executive summary are explained in more detail in this combined Annual Report on Form 10-K:

##### *Earnings Overview and Future Outlook:*

- We earned \$1.03 billion, or \$3.25 per share, in 2018, compared with \$988.0 million, or \$3.11 per share, in 2017.
- Our electric distribution segment earned \$455.4 million, or \$1.44 per share, in 2018, compared with \$497.4 million, or \$1.57 per share, in 2017. Our electric transmission segment earned \$427.2 million, or \$1.34 per share, in 2018, compared with \$391.9 million, or \$1.23 per share, in 2017. Our natural gas distribution segment earned \$93.2 million, or \$0.29 per share, in 2018, compared with \$74.6 million, or \$0.23 per share, in 2017. Our water distribution segment earned \$30.9 million, or \$0.10 per share, in 2018, compared with a net loss of \$1.2 million in 2017.
- Eversource parent and other companies earned \$26.3 million, or \$0.08 per share, in 2018, compared with \$25.3 million, or \$0.08 per share, in 2017.
- We currently project 2019 earnings of between \$3.40 per share and \$3.50 per share.

##### *Liquidity:*

- Cash flows provided by operating activities totaled \$1.78 billion in 2018, compared with \$2.00 billion in 2017. Investments in property, plant and equipment totaled \$2.52 billion in 2018 and \$2.35 billion in 2017. Cash and cash equivalents totaled \$108.1 million as of December 31, 2018, compared with \$38.2 million as of December 31, 2017.
- In 2018, we issued \$2.20 billion of new long-term debt, consisting of \$1.55 billion at Eversource parent, \$500 million at CL&P, \$50 million at Yankee Gas, and \$100 million at NSTAR Gas. Proceeds from these new issuances were used primarily to repay short-term borrowings and repay long-term debt at maturity. In 2018, PSNH issued \$635.7 million of securitized RRBs. In 2018, we repaid, at maturity, \$1.05 billion of previously issued long-term debt, consisting of \$450 million at Eversource parent, \$300 million at CL&P, \$199.3 million at PSNH and \$100 million at Yankee Gas.
- In 2018, we paid cash dividends of \$640.1 million, or \$2.02 per common share, compared with \$602.1 million, or \$1.90 per common share, in 2017. On February 6, 2019, our Board of Trustees approved a common share dividend payment of \$0.535 per share, payable on March 29, 2019 to shareholders of record as of March 5, 2019. The 2019 dividend represents an increase of 5.9 percent over the dividend paid in December 2018, and is the equivalent to dividends on common shares of approximately \$678 million on an annual basis.

- We project to make capital expenditures of \$12.75 billion from 2019 through 2023, of which we expect \$8.06 billion to be in our electric and natural gas distribution segments, \$3.35 billion to be in our electric transmission segment and \$0.62 billion to be in our water distribution segment. We also project to invest \$0.72 billion in information technology and facilities upgrades and enhancements. These projections do not include any expected investments related to NPT or offshore wind projects.
- In December 2018, CYAPC paid \$145 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation, which is classified as long-term debt on Eversource's consolidated balance sheet. CYAPC funded this payment from proceeds of its spent nuclear fuel trust, which is classified as marketable securities on Eversource's consolidated balance sheet. Eversource consolidates CYAPC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in CYAPC is 63 percent. As a result of consolidating CYAPC, CYAPC's payment to the DOE is included in operating cash flows on Eversource's 2018 consolidated statement of cash flows.

*Strategic, Legislative, Regulatory, Policy and Other Items:*

- On February 8, 2019, Eversource and Ørsted entered into a 50-50 partnership for key offshore wind assets in the Northeast. Eversource paid approximately \$225 million for a 50 percent interest in Ørsted's Revolution Wind and South Fork Wind power projects, as well as the 257-square-mile tract off the coasts of Massachusetts and Rhode Island. Revolution Wind is a 700 MW offshore wind power project located approximately 15 miles south of the Rhode Island coast, and South Fork Wind is approximately a 130 MW offshore wind power project located 35 miles east of Long Island. Subject to permitting, finalized power purchase agreements, where applicable, further development, and final investment decisions by Ørsted and Eversource, Revolution Wind is expected to be commissioned in 2023 and South Fork Wind is expected by the end of 2022.
- On December 12, 2018, PURA approved the Yankee Gas distribution rate case settlement agreement, which included, among other things, rate increases of \$1.4 million, \$15.8 million and \$13.0 million, for rate years beginning November 15, 2018, January 1, 2020, and January 1, 2021, respectively. As a result of this decision, we recognized an \$11.7 million pre-tax benefit to earnings in 2018 (\$4.0 million at the natural gas distribution segment and \$7.7 million at Eversource Parent and Other Companies).

Earnings Overview

*Consolidated:* Below is a summary of our earnings by business, which also reconciles the non-GAAP financial measure of EPS by business to the most directly comparable GAAP measure of diluted EPS.

	For the Years Ended December 31,					
	2018		2017 <sup>(1)</sup>		2016	
	Amount	Per Share	Amount	Per Share	Amount	Per Share
<i>(Millions of Dollars, Except Per Share Amounts)</i>						
Net Income Attributable to Common Shareholders (GAAP)	\$ 1,033.0	\$ 3.25	\$ 988.0	\$ 3.11	\$ 942.3	\$ 2.96
Regulated Companies	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03	\$ 911.3	\$ 2.86
Eversource Parent and Other Companies	26.3	0.08	25.3	0.08	31.0	0.10
Net Income Attributable to Common Shareholders (GAAP)	\$ 1,033.0	\$ 3.25	\$ 988.0	\$ 3.11	\$ 942.3	\$ 2.96

*Regulated Companies:* Our regulated companies comprise the electric distribution (including NSTAR Electric's solar power facilities and PSNH's generation facilities prior to sale in 2018), electric transmission, natural gas distribution and water distribution segments. A summary of our segment earnings and EPS is as follows:

	For the Years Ended December 31,					
	2018		2017 <sup>(1)</sup>		2016	
	Amount	Per Share	Amount	Per Share	Amount	Per Share
<i>(Millions of Dollars, Except Per Share Amounts)</i>						
Electric Distribution	\$ 455.4	\$ 1.44	\$ 497.4	\$ 1.57	\$ 462.8	\$ 1.46
Electric Transmission	427.2	1.34	391.9	1.23	370.8	1.16
Natural Gas Distribution	93.2	0.29	74.6	0.23	77.7	0.24
Water Distribution	30.9	0.10	(1.2)	—	N/A	N/A
Net Income - Regulated Companies	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03	\$ 911.3	\$ 2.86

<sup>(1)</sup> Our water distribution business was determined to be a reportable segment beginning in 2018. The 2017 segment information has been recast to conform to the current year presentation.

Our electric distribution segment earnings decreased \$42.0 million in 2018, as compared to 2017, due primarily to lower generation earnings of \$29.7 million at PSNH resulting from the sales of its thermal and hydroelectric generation assets in 2018, higher depreciation expense, higher operations and maintenance expense, higher interest expense, and higher property and other tax expense. The earnings decrease was partially offset by higher non-service income from our benefit plans, the impact of the CL&P base distribution rate increase effective May 1, 2018, and the recognition of carrying charges on PSNH storm costs approved for recovery. Earnings were also favorably impacted by lower income tax expense, net of lower distribution revenues resulting from the Tax Cuts and Jobs Act.

Our electric transmission segment earnings increased \$35.3 million in 2018, as compared to 2017, due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure, partially offset by a reduction in the benefits from tax reform as compared to 2017 and approximately \$6 million (after-tax) in tax-related regulatory assets that we concluded were not recoverable from customers.

Our natural gas distribution segment earnings increased \$18.6 million in 2018, as compared to 2017, due primarily to an increase in sales volumes and demand revenues driven by colder January, April, October and November weather in Connecticut in 2018, as compared to the same periods in 2017, as well as growth in new customer base, and an earnings benefit resulting from the Yankee Gas rate case settlement approved by PURA in December 2018. Earnings were also favorably impacted by lower income tax expense, net of lower distribution revenues resulting from the Tax Cuts and Jobs Act. The increase in earnings was partially offset by higher operations and maintenance expense and higher depreciation expense. Effective November 15, 2018, fluctuations in Connecticut natural gas sales volumes no longer impact earnings as a result of a decoupled rate structure at Yankee Gas approved in the 2018 rate case settlement.

Our 2018 and 2017 water distribution segment results reflect the earnings of the Aquarion water distribution business, which was acquired on December 4, 2017.

*Eversource Parent and Other Companies:* Eversource parent and other companies earned \$26.3 million in 2018, compared with \$25.3 million in 2017. Earnings were positively impacted by a lower effective tax rate due in part to an \$18 million aggregate after-tax benefit resulting from both federal and Connecticut tax law changes, unrealized gains on our investment in a renewable energy fund, and an income tax benefit associated with our investments. The increase in earnings was offset by a pre-tax \$32.9 million (\$26 million after-tax) other-than-temporary impairment to our equity method investment in the Access Northeast project, higher interest expense, and a lower earnings benefit in 2018, as compared to 2017, related to the allowed recovery of certain previously expensed merger-related costs in distribution rates. For further information on the impairment of our Access Northeast project, see "Business Development and Capital Expenditures - Natural Gas Transmission Project" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

*Electric, Natural Gas and Water Sales Volumes:* Weather, fluctuations in energy supply costs, conservation measures (including utility-sponsored energy efficiency programs), and economic conditions affect customer energy usage and water consumption. Industrial sales volumes are less sensitive to temperature variations than residential and commercial sales volumes. In our service territories, weather impacts both electric and water sales volumes during the summer and both electric and natural gas sales volumes during the winter; however, natural gas sales volumes are more sensitive to temperature variations than electric sales volumes. Customer heating or cooling usage may not directly correlate with historical levels or with the level of degree-days that occur.

Fluctuations in retail electric sales volumes at PSNH and natural gas sales volumes at Yankee Gas prior to November 15, 2018 impacted earnings ("Traditional" in the table below). For CL&P, NSTAR Electric (effective February 1, 2018 as a result of a DPU-approved rate case decision), Yankee Gas (effective November 15, 2018 as a result of a PURA-approved rate case settlement) and NSTAR Gas, fluctuations in retail sales volumes do not impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms ("Decoupled" in the table below). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized. Fluctuations in water sales volumes largely do not impact earnings as our Connecticut water distribution business is also decoupled.

A 2016 DPU-approved energy efficiency plan at NSTAR Electric authorized recovery of LBR in its eastern Massachusetts service territory until LBR was covered under a decoupled rate structure, which occurred on February 1, 2018. NSTAR Electric recognized LBR of \$7.0 million in 2018, compared to \$73.7 million in 2017, and no longer has an LBR recovery mechanism effective February 1, 2018.

A summary of our retail electric GWh sales volumes, our firm natural gas MMcf sales volumes, and our water MG sales volumes, and percentage changes, for the years ended December 31, 2018 and 2017, is as follows:

	Electric			Firm Natural Gas			Water		
	Sales Volumes (GWh)		Percentage Increase	Sales Volumes (MMcf)		Percentage Increase/(Decrease)	Sales Volumes (MG)		Percentage Increase/(Decrease)
	2018	2017 <sup>(1)</sup>		2018	2017 <sup>(2)</sup>		2018	2017 <sup>(3)</sup>	
Traditional	9,790	9,465	3.4%	44,715	39,455	13.3 %	2,252	2,202	2.3 %
Decoupled and Special Contracts <sup>(4)</sup>	43,591	42,781	1.9%	61,242	61,571	(0.5)%	21,479	22,565	(4.8)%
<b>Total Sales Volumes</b>	<b>53,381</b>	<b>52,246</b>	<b>2.2%</b>	<b>105,957</b>	<b>101,026</b>	<b>4.9 %</b>	<b>23,731</b>	<b>24,767</b>	<b>(4.2)%</b>

<sup>(1)</sup> In 2017 and in the month of January 2018, NSTAR Electric operated under two different rate structures (traditional and decoupled) based on its service territory geography. Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure. The 2017 sales volumes for NSTAR Electric have been recast to present February through December 2017 as decoupled, to conform to the current year presentation.

<sup>(2)</sup> In 2017 and until November 14, 2018, Yankee Gas operated under a traditional rate structure. Effective November 15, 2018, Yankee Gas operated under a decoupled rate structure. The 2017 sales volumes for Yankee Gas have been recast to present November 15th through December 2017 as decoupled, to conform to the current year presentation.

- (3) Eversource acquired its water distribution business on December 4, 2017. Full 2017 sales volumes have been presented for comparative purposes.
- (4) Special contracts are unique to Yankee Gas natural gas distribution customers who take service under such an arrangement and generally specify the amount of distribution revenue to be paid to Yankee Gas regardless of the customers' usage.

Traditional retail electric sales volumes were higher in 2018, as compared to 2017, due primarily to warmer summer weather in 2018 and colder weather in January 2018 at NSTAR Electric (prior to its decoupled rate structure). Cooling degree days in 2018 were 25.8 percent higher in New Hampshire, as compared to 2017. Heating degree days in January of 2018 were 21.7 percent higher in the Boston metropolitan area, as compared to January 2017.

Our firm natural gas sales volumes are subject to many of the same influences as our retail electric sales volumes. In addition, they have benefited from customer growth in our natural gas distribution segment. Traditional firm natural gas sales volumes were higher in 2018, as compared to 2017, due primarily to colder January, April, October and November weather in 2018. Heating degree days in January through November 2018 were 9.1 percent higher in Connecticut, as compared to the same period in 2017.

### Liquidity

Cash and cash equivalents totaled \$108.1 million as of December 31, 2018, compared with \$38.2 million as of December 31, 2017.

*Short Term Debt - Commercial Paper Programs and Credit Agreements* : Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas and Yankee Gas are also parties to a five-year \$1.45 billion revolving credit facility. Effective December 10, 2018, the revolving credit facility's termination date was extended for one additional year to December 8, 2023. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility. Effective December 10, 2018, the revolving credit facility's termination date was extended for one additional year to December 8, 2023. The revolving credit facility serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

	Borrowings Outstanding as of December 31,		Available Borrowing Capacity as of December 31,		Weighted-Average Interest Rate as of December 31,	
	2018	2017	2018	2017	2018	2017
<i>(Millions of Dollars)</i>						
Eversource Parent Commercial Paper Program	\$ 631.5	\$ 979.3	\$ 818.5	\$ 470.7	2.77%	1.86%
NSTAR Electric Commercial Paper Program	278.5	234.0	371.5	416.0	2.50%	1.55%

There were no borrowings outstanding on either the Eversource parent or NSTAR Electric revolving credit facilities as of December 31, 2018 or 2017. Eversource's water distribution segment has a \$100.0 million revolving credit facility, which expires on August 19, 2019, and there were no amounts outstanding as of December 31, 2018 and \$76.0 million outstanding as of December 31, 2017.

Amounts outstanding under the commercial paper programs and revolving credit facility are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets as all borrowings are outstanding for no more than 364 days at one time. As a result of the Eversource parent long-term debt issuances on January 8, 2018, the net proceeds of which were used to repay short-term borrowings outstanding under its commercial paper program, \$201.2 million of commercial paper borrowings under the Eversource parent commercial paper program were reclassified as Long-Term Debt as of December 31, 2017.

*Intercompany Borrowings*: Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. In addition, growth in Eversource's key business initiatives requires cash infusion to those subsidiaries. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2018, there were intercompany loans from Eversource parent to PSNH of \$57.0 million. As of December 31, 2017, there were intercompany loans from Eversource parent of \$69.5 million to CL&P and \$262.9 million to PSNH. Intercompany loans from Eversource parent are included in Notes Payable to Eversource Parent and are classified in current liabilities on the respective subsidiary's balance sheets.

*Long-Term Debt:* The following table summarizes long-term debt issuances and repayments:

<i>(Millions of Dollars)</i>	<u>Issue Date</u>	<u>Issuances/(Repayments)</u>	<u>Maturity Date</u>	<u>Use of Proceeds for Issuances/ Repayment Information</u>
<b>CL&amp;P:</b>				
4.00% 2018 Series A First Mortgage Bonds	March 2018	\$ 500.0	April 2048	Repaid long-term debt that matured in 2018 and repaid short-term borrowings
5.65% 2008 Series A First Mortgage Bonds	May 2008	(300.0)	May 2018	Repaid at maturity on May 1, 2018

<sup>(1)</sup> These notes are part of the same series issued by Eversource parent in March 2016. The aggregate outstanding principal amount of these notes is now \$450 million .

*Rate Reduction Bonds:* PSNH Funding LLC 3 (PSNH Funding) is a bankruptcy remote, special purpose, wholly-owned, consolidated subsidiary of PSNH. PSNH Funding was formed solely to issue RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs in multiple tranches with a weighted average interest rate of 3.66 percent, and final maturity dates ranging from 2026 to 2035. The RRBs are expected to be repaid by February 1, 2033. RRB payments consist of principal and interest and will be paid semi-annually, beginning on February 1, 2019. The RRBs were issued pursuant to a finance order issued by the NHPUC on January 30, 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets.

*Cash Flows:* Cash flows provided by operating activities totaled \$1.78 billion in 2018 , compared with \$2.00 billion in 2017 . The decrease in operating cash flows was due primarily to cash payments made in 2018 for storm restoration costs of approximately \$252 million, an increase of \$128 million in income tax payments made in 2018, as compared to 2017, and the unfavorable impacts related to the timing of payments of our working capital items, including accounts receivable and accounts payable. In addition, in December 2018, CYAPC paid \$145 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation, as described below. Partially offsetting these unfavorable impacts were the timing of cash collected for regulatory tracking mechanisms and a decrease of \$47.9 million in 2018 of pension and PBOP contributions.

CYAPC is obligated to pay the DOE for the costs to dispose of spent nuclear fuel and high-level radioactive waste generated from its nuclear fuel facility prior to April 7, 1983. Eversource consolidates CYAPC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in CYAPC is 63 percent. CYAPC's obligation to the DOE is classified as long-term debt on Eversource's consolidated balance sheet. In December 2018, CYAPC paid \$145 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation. CYAPC funded this payment from proceeds of its spent nuclear fuel trust, which is classified as marketable securities on Eversource's consolidated balance sheet. As a result of consolidating CYAPC, Eversource has reflected CYAPC's payment to the DOE within operating cash flows on its 2018 consolidated statement of cash flows.

In 2018 , we paid cash dividends of \$640.1 million , or \$2.02 per common share, compared with \$602.1 million , or \$1.90 per common share, in 2017 . Our quarterly common share dividend payment was \$0.505 per share in 2018 , as compared to \$0.475 per common share in 2017 . On February 6, 2019, our Board of Trustees approved a common share dividend payment of \$0.535 per share, payable on March 29, 2019 to shareholders of record as of March 5, 2019. The 2019 dividend represents an increase of 5.9 percent over the dividend paid in December 2018, and is the equivalent to dividends on common shares of approximately \$678 million on an annual basis.

In 2018 , CL&P, NSTAR Electric and PSNH paid \$60.0 million , \$228.0 million and \$150.0 million , respectively, in common stock dividends to Eversource parent.

Beginning in 2019, Eversource began using treasury stock to fund the payment of shares awarded under the company's incentive plan and dividend reinvestment plan and matching contributions under the Eversource 401k Plan.

Investments in Property, Plant and Equipment on the statements of cash flows do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized and deferred portions of pension and PBOP expense. In 2018, investments for Eversource, CL&P, NSTAR Electric and PSNH were \$2.52 billion, \$864.1 million, \$725.8 million and \$277.3 million, respectively.

Eversource, CL&P, NSTAR Electric and PSNH each uses its available capital resources to fund its respective construction expenditures, meet debt requirements, pay operating costs, including storm-related costs, pay dividends, and fund other corporate obligations, such as pension contributions. Eversource's regulated companies recover their electric, natural gas and water distribution construction expenditures as the related project costs are depreciated over the life of the assets. This impacts the timing of the revenue stream designed to fully recover the total investment plus a return on the equity and debt used to finance the investments. The current growth in Eversource's construction expenditures utilizes a significant amount of cash for projects that have a long-term return on investment and recovery period, totaling approximately \$2.52 billion in cash capital spend in 2018. In addition, growth in Eversource's key business initiatives in 2018 required cash contributions of \$205.2 million, which are recognized as long-term assets. These factors have resulted in current liabilities exceeding current assets by \$ 1.82 billion, \$ 188.7 million, \$ 430.8 million, and \$158.6 million at Eversource, CL&P, NSTAR Electric and PSNH, respectively, as of December 31, 2018.

As of December 31, 2018, \$801.1 million of Eversource's long-term debt, including \$350.0 million, \$250.0 million, \$150.0 million, \$50.0 million and \$1.1 million for Eversource parent, CL&P, PSNH, Yankee Gas and Aquarion, respectively, will mature within the next 12 months. Included in the current portion of long-term debt is \$36.2 million related to fair value adjustments from our business combinations that will be amortized within the next 12 months and have no cash flow impact. Eversource, with its strong credit ratings, has several options available in the financial markets to repay or refinance these maturities with the issuance of new long-term debt. Eversource, CL&P, NSTAR Electric and PSNH will reduce their short-term borrowings with operating cash flows or with the issuance of new long-term debt, determined by considering capital requirements and maintenance of Eversource's credit rating and profile.

We expect the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with the access to both debt and equity markets, will be sufficient to meet any future operating requirements and capital investment forecasted opportunities.

*Credit Ratings:* On February 12, 2019, S&P changed the outlook on all its credit ratings for Eversource, CL&P, NSTAR Electric and PSNH from stable to negative.

A summary of our corporate credit ratings and outlooks by Moody's, S&P and Fitch is as follows:

	Moody's		S&P		Fitch	
	Current	Outlook	Current	Outlook	Current	Outlook
Eversource Parent	Baa1	Stable	A+	Negative	BBB+	Positive
CL&P	A3	Stable	A+	Negative	A-	Stable
NSTAR Electric	A2	Positive	A+	Negative	A	Stable
PSNH	A3	Stable	A+	Negative	A-	Stable

A summary of the current credit ratings and outlooks by Moody's, S&P and Fitch for senior unsecured debt of Eversource parent and NSTAR Electric, and senior secured debt of CL&P and PSNH is as follows:

	Moody's		S&P		Fitch	
	Current	Outlook	Current	Outlook	Current	Outlook
Eversource Parent	Baa1	Stable	A	Negative	BBB+	Positive
CL&P	A1	Stable	AA-	Negative	A+	Stable
NSTAR Electric	A2	Positive	A+	Negative	A+	Stable
PSNH	A1	Stable	AA-	Negative	A+	Stable

#### Business Development and Capital Expenditures

Our consolidated capital expenditures, including amounts incurred but not paid, cost of removal, AFUDC, and the capitalized and deferred portions of pension and PBOP expense (all of which are non-cash factors), totaled \$2.86 billion in 2018, \$2.52 billion in 2017, and \$2.21 billion in 2016. These amounts included \$184.6 million in 2018, \$165.9 million in 2017, and \$137.7 million in 2016 related to information technology and facilities upgrades and enhancements, primarily at Eversource Service and The Rocky River Realty Company.

*Electric Transmission Business:* Our consolidated electric transmission business capital expenditures increased by \$91.1 million in 2018, as compared to 2017. A summary of electric transmission capital expenditures by company is as follows:

(Millions of Dollars)	For the Years Ended December 31,		
	2018	2017	2016
CL&P	\$ 465.5	\$ 431.5	\$ 338.3
NSTAR Electric	334.3	301.9	398.7
PSNH	194.2	155.6	119.0
NPT	29.4	43.3	40.9
Total Electric Transmission Segment	\$ 1,023.4	\$ 932.3	\$ 896.9

Northern Pass: Northern Pass is Eversource's planned 1,090 MW HVDC transmission line that will interconnect from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire.

Northern Pass has achieved several key milestones, including receiving the following major permits:

- National Energy Board of Canada permit issued, which authorizes the construction of the transmission line that will connect with Northern Pass at the Québec-New Hampshire border on March 6, 2018;
- NHPUC approval on February 12, 2018 for the proposed lease of certain land and easement rights from PSNH to NPT, concluding that the lease is in the public interest;
- U.S. Forest Service Record of Decision on January 5, 2018, which allows NPT to install approximately 11 miles of underground transmission lines along existing roads through the White Mountain National Forest;
- Province of Québec permit granted to HQ on December 21, 2017 to construct the hydroelectric transmission line that will connect at the border of New Hampshire;
- DOE Record of Decision and Presidential Permit on November 16, 2017, which will allow construction of transmission facilities at the Québec-New Hampshire border; and
- DOE final Environmental Impact Statement issued on August 10, 2017, which concluded that the proposed Northern Pass route is the preferred alternative, providing substantial benefits with only minimal impacts.

The following permits remain outstanding: the NHSEC Certificate of Site and Facility approving construction of the project in New Hampshire, the U.S. Forest Service Special Use Permit, as authorized by the January 5, 2018 Record of Decision, and the Army Corps of Engineers Permit allowing the discharge of dredging material or other fill into wetlands and other waters under Section 404 of the Clean Water Act and Section 10 of the River and Harbors Act.

On January 25, 2018, Northern Pass was selected from the 46 proposal packages submitted as the winning bidder in the Massachusetts clean energy request for proposal ("RFP"), which successfully positioned Northern Pass to provide a firm delivery of hydropower to Massachusetts. On February 1, 2018, the NHSEC voted to deny Northern Pass' siting application. On March 28, 2018, the Massachusetts EDCs, in coordination with the DOER and an independent evaluator, notified Northern Pass that the EDCs had terminated its selection and all contract negotiations.

On March 30, 2018, the NHSEC released its written decision confirming its denial. On April 27, 2018, NPT filed a motion for rehearing with the NHSEC, and on July 12, 2018, the NHSEC issued its written decision denying Northern Pass' motion for rehearing. On August 10, 2018, NPT filed an appeal to the New Hampshire Supreme Court, alleging that the NHSEC failed to follow applicable law in its review of the project. On October 12, 2018, the New Hampshire Supreme Court accepted this appeal. Subsequently, the NHSEC transmitted the record of its proceedings to the New Hampshire Supreme Court on December 11, 2018. Briefing of the appeal began on February 4, 2019. The New Hampshire Supreme Court has not set a date for oral argument. NPT intends to continue to pursue NHSEC approval to construct this project.

The March 2018 NHSEC decision denying Northern Pass' siting application caused us to review the recoverability of our Northern Pass project costs in the first quarter of 2018. In this recoverability review, we estimated undiscounted expected project cash flows and compared the result to our estimated project costs to determine whether the recorded amount was recoverable. Our undiscounted cash flows were substantially in excess of our estimated project costs. We completed this analysis and concluded that our project costs were recoverable as of March 31, 2018, based on our expectation that the Northern Pass project remains probable of being placed in service.

Consistent with Eversource's and HQ's long-term relationship to bring clean energy into New England, Eversource and HQ remain committed to Northern Pass and the many benefits this project will bring to our customers and the region. If, as a result of future events and changes in circumstances, a new recoverability review were to conclude that our project costs are not recoverable, then we would reduce Northern Pass' project costs to the estimated fair value, which could result in most of our \$307 million of capitalized project costs being impaired. Such an impairment could have a material adverse effect on our financial position and results of operations.

Greater Boston Reliability Solution: In February 2015, ISO-NE selected the Greater Boston and New Hampshire Solution (the "Solution"), proposed by Eversource and National Grid, to satisfy the requirements identified in the Greater Boston study. The Solution consists of a portfolio of electric transmission upgrades in southern New Hampshire and northern Massachusetts and continuing into the greater Boston metropolitan area, of which 28 upgrades are in Eversource's service territory. The NHSEC issued its written order approving the New Hampshire upgrades on October 4, 2016. All the New Hampshire upgrades, including the Merrimack Valley Reliability Project, have been completed and placed in

service. We are currently pursuing the necessary regulatory and siting application approvals in Massachusetts. To date, we have received approval for five of these projects from the Massachusetts Energy Facilities Siting Board and anticipate approval of two additional projects in the second quarter of 2019. Construction has also begun on numerous smaller projects, several of which have been placed in service. Most upgrades are expected to be completed by the end of 2019. Two projects are expected to be in service by the end of 2020 and another project by mid-2021. We estimate our portion of the investment in the Solution will be approximately \$560 million, of which \$357.3 million has been spent and capitalized through December 31, 2018.

**GHCC:** The Greater Hartford Central Connecticut ("GHCC") projects, which have been approved by ISO-NE, consist of 27 projects with an expected investment of approximately \$350 million that are expected to be placed in service through 2019. As of December 31, 2018, 23 projects have been placed in service, and four projects are in active construction. As of December 31, 2018, CL&P had spent and capitalized \$232.0 million in costs associated with GHCC.

**Seacoast Reliability Project:** On April 12, 2016, PSNH filed a siting application with the NHSEC for the Seacoast Reliability Project, a 13-mile, 115kV transmission line within several New Hampshire communities, which proposes to use a combination of overhead, underground and underwater line design to help meet the growing demand for electricity in the Seacoast region. On December 10, 2018, the NHSEC indicated its unanimous approval of the project, and subsequently issued its written decision on January 31, 2019. This project is scheduled to be completed by the end of 2019. We estimate the investment in this project to be approximately \$84 million, of which PSNH had spent and capitalized \$31.2 million in costs through December 31, 2018.

**Distribution Business:** A summary of distribution capital expenditures is as follows:

(Millions of Dollars)	For the Years Ended December 31,						
	CL&P	NSTAR Electric	PSNH	Total Electric	Natural Gas	Water <sup>(1)</sup>	Total
<b>2018</b>							
Basic Business	\$ 256.3	\$ 217.7	\$ 69.3	\$ 543.3	\$ 72.9	\$ 17.0	\$ 633.2

<sup>(1)</sup> Our water distribution business was acquired on December 4, 2017. Amounts are immaterial for the year ended December 31, 2017.

For the electric distribution business, basic business includes the purchase of meters, tools, vehicles, information technology, transformer replacements, equipment facilities, and the relocation of plant. Aging infrastructure relates to reliability and the replacement of overhead lines, plant substations, underground cable replacement, and equipment failures. Load growth and other includes requests for new business and capacity additions on distribution lines and substation additions and expansions.

For the natural gas distribution business, basic business addresses daily operational needs including meters, pipe relocations due to public works projects, vehicles, and tools. Aging infrastructure projects seek to improve the reliability of the system through enhancements related to cast iron and bare steel replacement of main and services, corrosion mediation, and station upgrades. Load growth and other reflects growth in existing service territories including new developments, installation of services, and expansion.

For the water distribution business, basic business addresses daily operational needs including periodic meter replacement, water main relocation, facility maintenance, and tools. Aging infrastructure relates to reliability and the replacement of water mains, regulators, storage tanks, pumping stations, wellfields, reservoirs, and treatment facilities. Load growth and other reflects growth in our territory including improvements to acquisitions, installation of new services, and interconnections of systems.

**Projected Capital Expenditures:** A summary of the projected capital expenditures for the regulated companies' electric transmission and for the total electric distribution, natural gas distribution and water distribution for 2019 through 2023, including information technology and facilities upgrades and enhancements on behalf of the regulated companies, is as follows:

(Millions of Dollars)	Years					2019 - 2023 Total
	2019	2020	2021	2022	2023	
CL&P Transmission	\$ 392	\$ 179	\$ 148	\$ 135	\$ 124	\$ 978
NSTAR Electric Transmission	431	434	309	293	244	1,711
PSNH Transmission	164	133	116	120	123	656
<i>Total Electric Transmission</i>	\$ 987	\$ 746	\$ 573	\$ 548	\$ 491	\$ 3,345
Electric Distribution	\$ 1,217	\$ 1,131	\$ 1,132	\$ 1,143	\$ 1,109	\$ 5,732
Natural Gas Distribution	459	473	439	483	476	2,330
<i>Total Electric and Natural Gas Distribution</i>	\$ 1,676	\$ 1,604	\$ 1,571	\$ 1,626	\$ 1,585	\$ 8,062
Water Distribution	\$ 109	\$ 112	\$ 126	\$ 133	\$ 143	\$ 623
Information Technology and All Other	\$ 199	\$ 137	\$ 131	\$ 128	\$ 127	\$ 722
Total	\$ 2,971	\$ 2,599	\$ 2,401	\$ 2,435	\$ 2,346	\$ 12,752

The projections do not include investments related to NPT or offshore wind projects. Actual capital expenditures could vary from the projected amounts for the companies and years above.

**Offshore Wind Projects:**

**Bay State Wind:** Bay State Wind is an offshore wind project being jointly developed by Eversource and Denmark-based Ørsted. Bay State Wind is located in a 300-square-mile area of the Atlantic Ocean approximately 25 miles south of the coast of Massachusetts and has the ultimate potential to generate at least 2,000 MW of clean, renewable energy. Eversource and Ørsted each hold a 50 percent ownership interest in Bay State Wind. Bay State Wind expects to participate, or has submitted proposals, in the following opportunities for future solicitations for offshore wind based on each state's clean energy requirements:

- The New York State Energy Research and Development Authority ("NYSERDA") issued an RFP for 800 MW in November 2018. NYSERDA has the authority to award more than 800 MW in the first solicitation if sufficient attractive offers are received. On February 14, 2019, Bay State Wind submitted proposals, called Sunrise Wind, in response to the RFP. Contracts are expected to be awarded in 2019.
- Massachusetts' second offshore wind RFP for 400 MW to 800 MW is expected to be issued no later than mid-2019.

Bay State Wind previously participated in certain other New England RFPs during 2018, but was not selected.

**Revolution Wind and South Fork Wind:** On February 8, 2019, Eversource and Ørsted entered into a 50-50 partnership for key offshore wind assets in the Northeast. Eversource paid approximately \$225 million for a 50 percent interest in Ørsted's Revolution Wind and South Fork Wind power projects, as well as the 257-square-mile tract off the coasts of Massachusetts and Rhode Island, owned by North East Offshore LLC. Ørsted acquired all three assets in November 2018 as part of its Deepwater Wind transaction.

This transaction builds upon the Eversource and Ørsted Bay State Wind partnership, which is on a separate 300-square-mile ocean tract adjacent to the North East Offshore area. Together, the Bay State Wind and the North East Offshore lease sites jointly owned by Eversource and Ørsted could eventually host at least 4,000 MW of offshore wind. The two companies will jointly manage permitting requirements for upcoming projects and will honor all planned local investments and agreements entered prior to this partnership.

Revolution Wind is a 700 MW offshore wind power project, located approximately 15 miles south of the Rhode Island coast, that will deliver power to Rhode Island (400 MW) and Connecticut (300 MW). South Fork Wind is approximately a 130 MW offshore wind power project, located 35 miles east of Long Island, that will interconnect into eastern Long Island where it will deliver power to households under a long-term power purchase agreement with the Long Island Power Authority. Subject to permitting, finalized power purchase agreements, where applicable, further development, and final investment decisions by Ørsted and Eversource, Revolution Wind is expected to be commissioned in 2023 and South Fork Wind is expected by the end of 2022.

**Natural Gas Transmission Project:** Access Northeast is a natural gas pipeline and storage project jointly owned by Eversource, Enbridge, Inc. ("Enbridge") and National Grid plc ("National Grid"), through Algonquin Gas Transmission, LLC ("AGT"). Eversource owns a 40 percent interest in the project, which is accounted for as an equity method investment.

In 2015 and 2016, AGT sought to secure long-term natural gas pipeline capacity contracts with EDCs in Massachusetts, Connecticut, New Hampshire, Maine, and Rhode Island. Subsequently, in 2016, the Massachusetts Supreme Judicial Court and the NHPUC each ruled that state statutes precluded the state regulatory agencies from approving those contracts in Massachusetts and New Hampshire, respectively. The New Hampshire Supreme Court overruled the NHPUC decision in May 2018. Legislative changes are needed in Massachusetts to allow the DPU to approve natural gas pipeline capacity contracts. No such changes have occurred during any legislative session to date.

In September 2018, a series of non-Eversource natural gas explosions in eastern Massachusetts resulted in widespread property and system damage, personal injuries, and a fatality. As a result of these events, compounded by the failure to secure Massachusetts legislation to date, we believe there is significant uncertainty around the future timing of, and ability to secure, needed legislative change affecting the natural gas industry and pipeline expansion, which may significantly delay the completion of the Access Northeast project.

Eversource identified the September 2018 natural gas series of explosions, compounded by the adverse legislative environment, as negative evidence that indicated potential impairment. Our impairment assessment used a discounted cash flow approach, including consideration of the severity and duration of any decline in fair value of our investment in the project, and involved significant management judgment and estimation, including projections of the project's discounted cash flows and assumptions about exit price. In the third quarter of 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. As a result, Eversource recorded an other-than-temporary impairment of \$32.9 million pre-tax within Other Income, Net on our statement of income in 2018, which represented the full carrying value of our equity method investment.

#### FERC Regulatory Matters

*FERC Transmission Rate Settlement:* On December 28, 2015, FERC initiated a proceeding to review the New England transmission owners' (NETOs) regional and local transmission rates due to a lack of transparency. The FERC also found that the formula rates generally lacked sufficient details to determine how costs are derived and recovered in rates. This proceeding was set for hearing but held in abeyance to provide time for settlement judge procedures. On August 17, 2018, a signed Settlement Agreement between twenty-eight parties, including all six New England state regulatory commissions, the NETOs (including CL&P, NSTAR Electric and PSNH) and other settling parties, was filed at the FERC. The Settlement Agreement includes, among other things, a new formula rate template, effective on January 1, 2020, in which all regional and local transmission revenue requirements will be determined through a single formula rate. The Settlement Agreement was contested by a group of municipal entities and the FERC Trial Staff. On November 5, 2018, the Settlement Administrative Law Judge reported the contested settlement to the FERC. The NETOs are awaiting an order from the FERC.

*FERC ROE Complaints :* Four separate complaints have been filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15 -month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive ("incentive cap") of 11.74 percent , asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent . On October 16, 2014, the FERC set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the "Court").

All amounts associated with the first complaint period have been refunded. Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of December 31, 2018 . This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of December 31, 2018 .

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. The parties to these proceedings were directed to submit briefs on this new proposed framework and how they would apply the proposed framework in each of the four complaint proceedings. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order providing the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results. Reply briefs will be filed on March 8, 2019.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those preliminary calculations indicated that for the first complaint period, for the NETOs that FERC concludes are of average financial risk, (1) a preliminary range of presumptively just and reasonable base ROEs is 9.60 percent to 10.99 percent ; (2) the pre-existing base ROE of 11.14 percent is therefore unjust and unreasonable; (3) the preliminary just and reasonable base ROE is 10.41 percent ; and (4) the preliminary incentive cap on total ROE is 13.08 percent .

If the results of these illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods.

Although the order provided illustrative calculations, FERC stated that these calculations are merely preliminary. The FERC's preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order, as changes to the methodology by FERC are possible as a result of the parties' arguments and calculations in the briefing process. Until FERC issues a final decision on each of these four complaints, there is significant uncertainty, and at this time, the Company cannot reasonably estimate a range of gain or loss for any of the four complaint proceedings. The October 16, 2018 FERC order or the January 11, 2019 briefs did not provide a reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods.

Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

The average impact of a 10 basis point change to the base ROE for each of the 15 -month complaint periods would affect Eversource's after-tax earnings by approximately \$3 million .

*U.S. Federal Corporate Income Taxes:* Effective January 1, 2018, the local transmission service rates were updated to reflect the lower U.S. federal corporate income tax rate that resulted from the Tax Cuts and Jobs Act. On June 28, 2018, FERC granted a one-time waiver of tariff provisions related to the federal corporate income tax rate so that, effective June 1, 2018, the regional transmission service rates also reflect the reduced federal corporate income tax rate of 21 percent. The local and regional transmission service rates do not currently reflect amortization of excess ADIT (EDIT) balances that resulted from the act. On November 15, 2018, FERC issued a Policy Statement and a separate Notice of Proposed Rulemaking addressing accounting and rate issues related to ADIT changes resulting from the act. After issuance of a final rule by FERC, Eversource expects to file a compliance filing and, after acceptance by FERC, begin the refund of any EDIT through local and regional transmission service rates.

#### Regulatory Developments and Rate Matters

*Electric, Natural Gas and Water Utility Base Distribution Rates:* Each Eversource utility subsidiary is subject to the regulatory jurisdiction of the state in which it operates: CL&P, Yankee Gas and Aquarion operate in Connecticut and are subject to PURA regulation; NSTAR Electric, NSTAR Gas and Aquarion operate in Massachusetts and are subject to DPU regulation; and PSNH and Aquarion operate in New Hampshire and are subject to NHPUC regulation. The regulated companies' distribution rates are set by their respective state regulatory commissions, and their tariffs include mechanisms for periodically adjusting their rates for the recovery of specific incurred costs.

In Connecticut, electric and natural gas utilities are required to file a distribution rate case, or for PURA to initiate a rate review, within four years of the last rate case. CL&P's distribution rates were established in an April 2018 PURA-approved rate case settlement agreement with rates effective May 1, 2018. Yankee Gas' distribution rates were established in a December 2018 PURA-approved rate case settlement agreement with rates effective November 15, 2018. See "Regulatory Developments and Rate Matters - Connecticut" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*, for more information. Aquarion is not required to initiate a rate review with the PURA. Aquarion rates were established in a 2013 PURA-approved rate case.

In Massachusetts, electric distribution companies are required to file at least one distribution rate case every five years, and natural gas local distribution companies to file at least one distribution rate case every 10 years, and those companies are limited to one settlement agreement in any 10-year period. NSTAR Electric's distribution rates were established in a 2017 DPU-approved rate case with rates effective February 1, 2018. See "Regulatory Developments and Rate Matters - Massachusetts" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*, for more information. NSTAR Gas' distribution rates were established in a 2015 DPU-approved rate case. Aquarion is not required to initiate a rate review with the DPU. Aquarion rates were established in an October 2018 DPU-approved rate case.

In New Hampshire, PSNH distribution rates were established in a settlement approved by the NHPUC in 2010. Prior to the expiration of that settlement, the NHPUC approved the continuation of those rates, and increased funding via rates, of PSNH's reliability enhancement program. Aquarion rates were established in a 2013 NHPUC-approved rate case, further revised in 2016.

*Electric, Natural Gas and Water Utility Retail Rates:* The Eversource electric distribution companies obtain and resell power to retail customers who choose not to buy energy from a competitive energy supplier. The natural gas distribution companies procure natural gas for firm and seasonal customers. These energy supply procurement costs are recovered from customers in energy supply rates that are approved by the respective state regulatory commission. The rates are reset periodically and are fully reconciled to their costs. Each electric and natural gas distribution company fully recovers its energy supply costs through approved regulatory rate mechanisms on a timely basis and, therefore, such costs have no impact on earnings.

The electric and natural gas distribution companies also recover certain other costs on a fully reconciling basis through regulatory commission-approved cost tracking mechanisms and, therefore, such costs have no impact on earnings. Costs recovered through cost tracking mechanisms include energy efficiency program costs, electric retail transmission charges, restructuring and stranded costs resulting from deregulation, and additionally for our Massachusetts companies, pension and PBOP benefits and net metering for distributed generation. The reconciliation filings compare the total actual costs allowed to revenue requirements related to these services and the difference between the costs incurred (or the rate recovery allowed) and the actual costs allowed is deferred and included, to be either recovered or refunded, in future customer rates. These cost tracking mechanisms also include certain incentives earned and carrying charges that are billed in rates to customers.

*U.S. Federal Corporate Income Taxes:* On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules to reduce the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which are estimated to be approximately \$2.9 billion and included in regulatory liabilities as of December 31, 2018. The refund of these EDIT regulatory liabilities to customers will generally be made over the same period as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities.

Eversource established a regulatory liability, recorded as a reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflect the lower federal tax rate. As of December 31, 2018, this liability, net of amounts refunded to customers, was \$24.6 million.

Eversource's regulated companies are in the process of, or will, refund the decrease in the income tax rate based on orders issued by applicable state regulatory commissions. A summary of the timing of refunds related to the change in the tax rate is as follows:

Eversource Utility and Jurisdiction	EDIT Refund Timing	Effective Date of New Tax Rate Reflected in Rates	January 1, 2018 Change in Tax Rate Prior to Effective Date of New Rates
<b>Connecticut</b>			
CL&P	Refunds will be incorporated into May 1, 2019 distribution rate change	May 1, 2018	January 1, 2018 through April 30, 2018 fully refunded to customers as of December 31, 2018
Yankee Gas	Refunds began to be reflected in rates effective November 15, 2018	November 15, 2018	January 1, 2018 through November 14, 2018 began to be refunded to customers, beginning November 15, 2018
<b>Massachusetts</b>			
NSTAR Electric	Refunds began to be reflected in rates effective January 1, 2019	February 1, 2018	Refunds not required for the period January 1, 2018 to January 31, 2018
NSTAR Gas	Refunds began to be reflected in rates effective February 1, 2019	July 1, 2018	Refunds not required for the period January 1, 2018 to June 30, 2018
<b>New Hampshire</b>			
PSNH	Refunds will be addressed as part of the next distribution rate case filing Refunds for EDIT related to PSNH's divested generation assets began to be reflected in rates effective August 1, 2018	No later than July 1, 2019 for distribution	January 1, 2018 through effective date of next distribution rate change will be refunded to customers
<b>Transmission</b>			
CL&P, NSTAR Electric and PSNH	Refunds will be made based on expected guidance from FERC	January 1, 2018	Effective January 1, 2018 for local transmission service, and effective June 1, 2018 for regional transmission service, rates reflected the reduced federal corporate income tax rate

For further information on filings with regulatory commissions and the impact to customer rates, see "Connecticut," "Massachusetts," and "New Hampshire" sections below and "FERC Regulatory Matters - U.S. Federal Corporate Income Taxes" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

*Connecticut:*

**CL&P Rate Case Settlement:** On April 18, 2018, PURA approved the distribution rate case settlement agreement that was reached by CL&P, the Prosecutorial Unit of PURA, and the Office of Consumer Counsel ("OCC") on December 15, 2017, as amended on March 23, 2018. The distribution rate case settlement agreement included, among other things, rate increases of \$64.3 million, \$31.1 million, and \$29.2 million, effective May 1, 2018, 2019, and 2020, respectively; an authorized regulatory ROE of 9.25 percent; 53 percent common equity in CL&P's capital structure; and a new capital tracker, effective July 1, 2018, for core capital additions in excess of \$270 million per rate year and for capital additions for system resiliency and grid modernization. The new capital tracker also included a provision to return to customers the impact of a lower federal corporate income tax rate from the Tax Cuts and Jobs Act from January through April 2018, offset by the impacts of rate base growth since the previous rate case for the same period. In addition, the base distribution rates charged to customers were adjusted to reflect the prospective impacts of a lower federal income tax rate resulting from the Tax Cuts and Jobs Act. Amounts related to the EDIT liabilities will be incorporated as refunds to customers in May 1, 2019 base distribution rates. The settlement agreement also incorporated \$18.6 million of rate base recovery for catastrophic storms occurring after December 31, 2016, subject to a storm filing. On November 16, 2018, CL&P filed for recovery of \$153 million of storm costs incurred from 2017 through 2018, with recovery incorporated into the May 1, 2019 distribution rate change. The storm filing is pending PURA approval.

Yankee Gas Rate Case Settlement : On December 12, 2018, PURA approved the distribution rate case settlement agreement that was reached by Yankee Gas, the prosecutorial division of the PURA, and the OCC on September 21, 2018. The distribution rate case settlement agreement included, among other things, rate increases of \$1.4 million, \$15.8 million and \$13.0 million, for rate years beginning November 15, 2018, January 1, 2020, and January 1, 2021, respectively, and for Yankee Gas to implement a Distribution Integrity Management Program ("DIMP") cost recovery mechanism to further invest capital to replace aging infrastructure. The DIMP mechanism allows for recovery of costs associated with capital additions of approximately \$26 million to \$37 million annually, which is incremental to the \$150 million included in base distribution rate base per year. The settlement agreement also provides Yankee Gas the opportunity to seek recovery of additional capital spending above these levels with PURA approval. PURA ordered an accelerated replacement program for Yankee Gas to fully replace its cast iron and bare steel facilities in 11 years and fully replace copper services and certain steel mains and services in 14 years. In addition, Yankee Gas was authorized to continue its ongoing natural gas system expansion program, implement a revenue decoupling rate mechanism, and recover merger costs. The settlement agreement included a regulatory ROE of 9.3 percent. In addition, the distribution rates charged to customers were adjusted to reflect the prospective impacts of the lower federal corporate income tax rate, the overcollection of the lower income tax rate from January 1, 2018, and the EDIT from the Tax Cuts and Jobs Act. Although new rates were effective January 1, 2019, the provisions of the settlement agreement took effect November 15, 2018. The settlement agreement resulted in an \$11.7 million pre-tax benefit to earnings in 2018 (\$4.0 million at the natural gas distribution segment primarily for DIMP costs allowed for recovery, and \$7.7 million at Eversource Parent and Other Companies for the allowed recovery of previously expensed merger-related costs).

Clean Energy RFP: On December 28, 2018, under Public Act 17-3, "An Act Concerning Zero Carbon Solicitation and Procurement," the DEEP selected the Millstone nuclear power generation facility, alongside smaller generation facilities, as the winner of the zero-carbon electricity-generating resource. CL&P was directed by DEEP to enter into a ten-year contract with Millstone for approximately 9 million MWh annually. DEEP requested negotiations among all parties conclude by March 31, 2019.

#### *Massachusetts:*

NSTAR Electric Distribution Rate Case Decision: On November 30, 2017, the DPU issued its decision in the NSTAR Electric distribution rate case, which approved an annual distribution rate increase of \$37 million, with rates effective February 1, 2018. On January 3, 2018, NSTAR Electric filed a motion to reflect a revenue requirement reduction of \$56 million due to the decrease in the federal corporate income tax rate, as part of the Tax Cuts and Jobs Act, resulting in an annual net decrease in rates of \$19 million. NSTAR Electric's new rates took effect on February 1, 2018, following approval of NSTAR Electric's compliance filing on February 2, 2018. The DPU also approved, in part, NSTAR Electric's request for recalculation, resulting in an increase of \$3.5 million in the approved revenue requirement, effective March 1, 2018. In addition to its decision regarding rates, the DPU approved an authorized regulatory ROE of 10 percent, the establishment of a revenue decoupling rate mechanism for the portion of the NSTAR Electric business that did not previously have a decoupling mechanism, and the implementation of an inflation-based adjustment mechanism with a five-year stay-out until January 1, 2023. As part of this inflation-based mechanism, NSTAR Electric submitted its first annual Performance Based Rate Adjustment (PBRA) filing on September 19, 2018 and the DPU approved a \$31.9 million increase to base distribution rates on December 27, 2018 for effect on January 1, 2019.

NSTAR Electric Grid Modernization Plan : On May 10, 2018, the DPU issued an order approving a grid modernization plan for NSTAR Electric. In the order, the DPU pre-authorized \$133 million in grid-facing investments over three years, adopted a regulatory review construct for pre-authorization of grid modernization investments, and allowed targeted cost recovery of eligible incremental grid-modernization capital and operations and maintenance expenses. The pre-authorized \$133 million is in addition to \$100 million associated with energy storage and electric vehicle infrastructure previously approved by the DPU in the November 30, 2017 order issued in the NSTAR Electric distribution rate case.

U.S. Federal Corporate Income Taxes : The DPU opened an investigation into the impact of the Tax Cuts and Jobs Act on Massachusetts regulated utilities. On June 29, 2018, the DPU issued a decision ordering NSTAR Gas to lower rates effective July 1, 2018 by an annualized \$7.3 million. For NSTAR Electric, lower rates due to the reduction in the federal corporate income tax rate were effective February 1, 2018.

A second phase of the investigation addressed the EDIT issue and any potential refunds for the periods January 1, 2018 to the effective dates of the rate changes that have occurred. On December 21, 2018, the DPU issued a decision ordering Massachusetts regulated utilities to refund the distribution related EDIT to customers through a new reconciling factor ("Tax Act Credit Factor"). The order also required these companies to include any EDIT that relates to existing reconciling tracking mechanisms to be refunded within those individual mechanisms. The DPU approved compliance filings for NSTAR Electric on December 27, 2018 and for NSTAR Gas on January 18, 2019 for the Tax Act Credit Factor to be included in rates effective January 1, 2019 for NSTAR Electric and effective February 1, 2019 for NSTAR Gas. Additionally, the December 21, 2018 DPU order indicated that the DPU will not require a revision to base rates for any potential refunds for the periods January 1, 2018 to the effective dates of the rate changes. Therefore, as of December 31, 2018, a reserve was not recorded for the reduction in the federal corporate income tax rate in customer billings from January 1, 2018 to the dates of the rate changes at NSTAR Electric (February 1, 2018) and NSTAR Gas (July 1, 2018).

Eversource and NSTAR Electric Boston Harbor Civil Action : On July 15, 2016, the United States Attorney on behalf of the United States Army Corps of Engineers filed a civil action in the United States District Court for the District of Massachusetts under provisions of the Rivers and Harbors Act of 1899 and the Clean Water Act against NSTAR Electric, Harbor Electric Energy Company, a wholly-owned subsidiary of NSTAR Electric ("HEEC"), and the Massachusetts Water Resources Authority (together with NSTAR Electric and HEEC, the "Defendants"). The action alleged that the Defendants failed to comply with certain permitting requirements related to the placement of the HEEC-owned electric distribution cable beneath Boston Harbor. The action sought an order to compel HEEC to comply with cable depth requirements in the United States Army Corps of Engineers' permit or alternatively to remove the electric distribution cable and cease unauthorized work in U.S. waterways. The action also sought civil penalties and other costs.

The parties reached a settlement pursuant to which HEEC agreed to install a new 115kV distribution cable across Boston Harbor to Deer Island, utilizing a different route, and remove portions of the existing cable. Upon the installation and completion of the new cable and the removal of the portions of the existing cable, all issues surrounding the current permit from the United States Army Corps of Engineers are expected to be resolved, and such litigation is expected to be dismissed with prejudice.

In 2017, as a result of the settlement, NSTAR Electric expensed \$4.9 million (pre-tax) of previously incurred capitalized costs associated with engineering work performed on the existing cable that will no longer be used. In addition, NSTAR Electric agreed to provide a rate base credit of \$17.5 million to the Massachusetts Water Resources Authority for the new cable. This negotiated credit resulted in the initial \$17.5 million of construction costs on the new cable being expensed as incurred, all of which was fully expensed in 2018. Construction of the new cable is underway and is expected to be completed in 2019.

#### *New Hampshire:*

**Generation Divestiture:** In June 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, pursuant to which PSNH agreed to divest its generation assets, subject to NHPUC approval. The NHPUC approved this agreement as well as the final divestiture plan and auction process in 2016. On October 11, 2017, PSNH entered into two Purchase and Sale Agreements with private investors, one to sell its thermal generation assets at a purchase price of \$175 million, subject to adjustment, (the "Thermal Agreement") and a second to sell its hydroelectric generation assets at a purchase price of \$83 million, subject to adjustment (the "Hydro Agreement"). The NHPUC approved these agreements in late November 2017, at which time the Company classified these assets as held for sale.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to the Thermal Agreement. In accordance with the Thermal Agreement, the original purchase price of \$175 million was adjusted to reflect working capital adjustments, closing date adjustments and proration of taxes and fees prior to closing, totaling \$40.9 million. In the second quarter of 2018, the purchase price was further adjusted by \$17.3 million relating to the valuation of certain allowances. As a result of these adjustments, net proceeds from the sale of the thermal assets totaled \$116.8 million.

On July 16, 2018, FERC issued its order approving the transfer of PSNH's six hydroelectric licenses to private investors. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to the Hydro Agreement. In accordance with the Hydro Agreement, the original purchase price of \$83 million was adjusted to reflect contractual adjustments totaling \$5.8 million, resulting in net proceeds of \$77.2 million. The difference between the carrying value of the hydroelectric generation assets and the sale proceeds resulted in a gain of \$17.3 million. An estimated gain from the sale of these assets was included as an offset to the total remaining costs associated with the sale of generation assets that were securitized on May 8, 2018.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs pursuant to a finance order issued by the NHPUC to recover remaining costs resulting from the divestiture of PSNH's generation assets. These RRBs are secured by a non-bypassable charge recoverable from PSNH customers. PSNH recorded regulatory assets and other deferred costs in connection with the generation asset divestiture and the securitization of remaining costs, which are probable of recovery through collection of the non-bypassable charge. For further information on the securitized RRB issuance, see "Liquidity - Rate Reduction Bonds" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

**U.S. Federal Corporate Income Taxes:** On September 27, 2018, the NHPUC issued a decision on the impact of the U.S. federal corporate income tax rate reduction from the Tax Cuts and Jobs Act. The NHPUC concluded that the tax law change qualified as an exogenous event, as defined in the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, and that the benefit of incurring the lower federal income tax expense would be passed back to customers with carrying charges. The next PSNH distribution rate case shall address the impacts of EDIT, the lower federal income tax rate, and the overcollection of the lower income tax rate from January 1, 2018 to the rate adjustment effective date of July 1, 2019, or earlier if a rate case is filed for rates effective prior to July 1, 2019. As of December 31, 2018, PSNH has recorded a reserve of \$12.6 million to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018. The EDIT balance related to PSNH's divested generation assets has been included as a component of the securitization of the stranded generation assets and has started to be refunded to customers via the Stranded Cost Recovery Charge effective August 1, 2018.

**2011 through 2013 Storm Costs:** On September 17, 2018, the NHPUC approved the recovery of \$49 million, plus carrying charges, in storm costs incurred from August 2011 through March 2013 and the transfer of funding from PSNH's major storm reserve to offset those costs. The costs of these storms (excluding the equity return component of the carrying charges) were deferred as regulatory assets, and the funding reserve collected from customers was accrued as a regulatory liability. The storm cost deferral is separate from the major storm funding reserve that is being collected from customers. As a result of the duration of time between incurring storm costs in August 2011 through March 2013 and final approval from the NHPUC in 2018, PSNH recognized \$8.7 million (pre-tax) for the equity return component of the carrying charges, which have been collected from customers, within Other Income, Net on our statement of income in 2018. Storm costs incurred from December 2013 through April 2016 have been audited by the NHPUC staff and are pending NHPUC approval. As of December 31, 2018, the pre-tax equity return component of the carrying charges related to storms incurred after March 2013 was \$7.9 million, which will be recognized to earnings upon NHPUC approval of those storm costs.

**Reliability Enhancement Program:** On December 28, 2018, the NHPUC approved PSNH's extension of the Reliability Enhancement Program for 2019. The extension included cost recovery associated with vegetation management costs. The vegetation management spending, which is consistent with prior years' spending, will be deferred and offset against amounts due to customers as a result of federal income tax reform.

## Legislative and Policy Matters

*New Hampshire:* On January 11, 2018, the New Hampshire Supreme Court issued a decision that affirmed the lower court's October 2016 decision that the Town of Bow, New Hampshire had over-assessed the value of the property owned by PSNH for the 2012 and 2013 property tax years. As a result of this decision, PSNH received \$7.4 million in property tax refunds and interest in 2018.

## Critical Accounting Policies

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and, at times, difficult, subjective or complex judgments. Changes in these estimates, assumptions and judgments, in and of themselves, could materially impact our financial position, results of operations or cash flows. Our management discusses with the Audit Committee of our Board of Trustees significant matters relating to critical accounting policies. Our critical accounting policies are discussed below. See the combined notes to our financial statements for further information concerning the accounting policies, estimates and assumptions used in the preparation of our financial statements.

*Regulatory Accounting:* Our regulated companies are subject to rate-regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, we record regulatory assets before approval for recovery has been received from the applicable regulatory commission. We must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. We base our conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

We use judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on our financial statements. We believe it is probable that each of the regulated companies will recover the regulatory assets that have been recorded. If we determine that we can no longer apply the accounting guidance applicable to rate-regulated enterprises to our operations, or that we cannot conclude it is probable that costs will be recovered from customers in future rates, the costs would be charged to earnings in the period in which the determination is made.

*Pension, SERP and PBOP:* We sponsor Pension, SERP and PBOP Plans to provide retirement benefits to our employees. For each of these plans, several significant assumptions are used to determine the projected benefit obligation, funded status and net periodic benefit cost. These assumptions include the expected long-term rate of return on plan assets, discount rate, compensation/progression rate and mortality and retirement assumptions. We evaluate these assumptions at least annually and adjust them as necessary. Changes in these assumptions could have a material impact on our financial position, results of operations or cash flows.

*Expected Long-Term Rate of Return on Plan Assets:* In developing the expected long-term rate of return, we consider historical and expected returns, as well as input from our consultants. Our expected long-term rate of return on assets is based on assumptions regarding target asset allocations and corresponding expected rates of return for each asset class. We routinely review the actual asset allocations and periodically rebalance the investments to the targeted asset allocations when appropriate. For the year ended December 31, 2018, our expected long-term rate-of-return assumption used to determine our pension and PBOP expense was 8.25 percent for the Eversource Service plans and 7 percent for the Aquarion plans. For the forecasted 2019 pension and PBOP expense, an expected long-term rate of return of 8.25 percent for the Eversource Service plans and 7 percent for the Aquarion plans will be used reflecting our target asset allocations.

*Discount Rate:* Payment obligations related to the Pension, SERP and PBOP Plans are discounted at interest rates applicable to the expected timing of each plan's cash flows.

The discount rate that was utilized in determining the 2018 pension, SERP and PBOP obligations was based on a yield-curve approach. This approach utilizes a population of bonds with an average rating of AA based on bond ratings by Moody's, S&P and Fitch, and uses bonds with above median yields within that population. As of December 31, 2018, the discount rates used to determine the funded status were within a range of 4.22 percent to 4.45 percent for the Pension and SERP Plans, and within a range of 4.38 percent to 4.41 percent for the PBOP Plans. As of December 31, 2017, the discount rates used were within a range of 3.43 percent to 3.75 percent for the Pension and SERP Plans, and within a range of 3.55 percent to 3.70 percent for the PBOP Plans. The increase in the discount rates used to calculate the funded status resulted in a decrease to the Pension and PBOP Plans' liability of approximately \$465 million and \$88 million, respectively, as of December 31, 2018.

The Company uses the spot rate methodology for the service and interest cost components of Pension, SERP and PBOP expense for the Eversource plans because it provides a more precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve. The discount rates used to estimate the 2018 expense were within a range of 3.85 percent to 4.62 percent for the Pension and SERP Plans, and within a range of 3.28 percent to 3.94 percent for the PBOP Plans.

*Mortality Assumptions:* Assumptions as to mortality of the participants in our Pension, SERP and PBOP Plans are a key estimate in measuring the expected payments a participant may receive over their lifetime and the corresponding plan liability we need to record. In 2018, a revised scale for the mortality table was released, and we utilized it in our measurements.

**Compensation/Progression Rate:** This assumption reflects the expected long-term salary growth rate, including consideration of the levels of increases built into collective bargaining agreements, and impacts the estimated benefits that Pension and SERP Plan participants receive in the future. As of December 31, 2018 and 2017, the compensation/progression rate used to determine the funded status was 3.50 percent for the Eversource Service plans and 4 percent for the Aquarion plans.

**Health Care Cost:** In August 2016, we amended the Eversource PBOP Plan to standardize benefit design and make benefit changes. As a result, this plan is no longer subject to health care cost trends. The Aquarion PBOP Plan is still subject to health care cost trends. For the Aquarion PBOP Plan, the health care trend rate is a range of 3.5 percent to 6.75 percent, with an ultimate rate of 3.5 percent to 5 percent in 2019 and 2023, for post-65 and pre-65 retirees, respectively.

**Actuarial Determination of Expense:** Pension, SERP and PBOP expense is determined by our actuaries and consists of service cost and prior service cost, interest cost based on the discounting of the obligations, and amortization of actuarial gains and losses, offset by the expected return on plan assets. Actuarial gains and losses represent the amortization of differences between assumptions and actual information or updated assumptions. Pre-tax net periodic benefit expense for the Pension and SERP Plans was \$39.6 million, \$64.9 million and \$71.9 million for the years ended December 31, 2018, 2017 and 2016, respectively. For the PBOP Plans, there was net periodic PBOP income of \$45.0 million, \$39.6 million and \$17.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The expected return on plan assets is determined by applying the assumed long-term rate of return to the Pension and PBOP Plan asset balances. This calculated expected return is compared to the actual return or loss on plan assets at the end of each year to determine the investment gains or losses to be immediately reflected in unamortized actuarial gains and losses.

**Forecasted Expenses and Expected Contributions:** We estimate that expense in 2019 for the Pension and SERP Plans will be approximately \$72 million and income in 2019 for the PBOP Plans will be approximately \$38 million. Pension, SERP and PBOP expense for subsequent years will depend on future investment performance, changes in future discount rates and other assumptions, and various other factors related to the populations participating in the plans.

Our policy is to fund the Pension Plans annually in an amount at least equal to the amount that will satisfy all federal funding requirements. We contributed \$185.6 million to the Pension Plans in 2018. We currently estimate contributing approximately \$112 million to the Pension Plans in 2019.

For the PBOP Plans, it is our policy to fund the PBOP Plans annually through tax deductible contributions to external trusts. We contributed \$9.3 million to the PBOP Plans in 2018. We currently estimate contributing \$11 million to the PBOP Plans in 2019.

**Sensitivity Analysis:** The following represents the hypothetical increase to the Pension Plans' (excluding the SERP Plans) reported annual cost and a decrease to the PBOP Plans' reported annual income as a result of a change in the following assumptions by 50 basis points:

Assumption Change	Increase in Pension Plan Cost				Decrease in PBOP Plan Income			
	As of December 31,				As of December 31,			
	2018		2017		2018		2017	
Eversource								
Lower expected long-term rate of return	\$	23.7	\$	20.4	\$	4.5	\$	4.1
Lower discount rate		25.5		19.7		2.9		3.6
Higher compensation rate		6.8		9.3		N/A		N/A

**Goodwill:** We recorded goodwill on our balance sheet associated with previous mergers and acquisitions. On December 4, 2017, we completed the acquisition of Aquarion, resulting in the addition of \$0.9 billion of goodwill. As of December 31, 2018, a total of \$4.4 billion of goodwill is recorded on our balance sheet. We have identified our reporting units for purposes of allocating and testing goodwill as Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. Electric Distribution and Electric Transmission reporting units include carrying values for the respective components of CL&P, NSTAR Electric and PSNH. The Natural Gas Distribution reporting unit includes the carrying values of NSTAR Gas and Yankee Gas. The Water Distribution reporting unit was created upon completion of the acquisition of Aquarion and includes the water utility businesses. As of December 31, 2018, goodwill was allocated to the reporting units as follows: \$2.5 billion to Electric Distribution, \$0.6 billion to Electric Transmission, \$0.4 billion to Natural Gas Distribution and \$0.9 billion to Water Distribution.

We are required to test goodwill balances for impairment at least annually by considering the fair values of the reporting units, which requires us to use estimates and judgments. We have selected October 1st of each year as the annual goodwill impairment testing date. Goodwill impairment is deemed to exist if the carrying amount of a reporting unit exceeds its estimated fair value and if the implied fair value of goodwill based on the estimated fair values of the reporting units' assets and liabilities is less than the carrying amount of the goodwill. If goodwill were deemed to be impaired, it would be written down in the current period to the extent of the impairment.

We performed an impairment test of goodwill as of October 1, 2018 for the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units. This evaluation required the consideration of several factors that impact the fair value of the reporting units, including conditions and assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, and internal estimates of future cash flows and net income.

The 2018 goodwill impairment test resulted in a conclusion that goodwill is not impaired and no reporting unit is at risk of a goodwill impairment. The fair value of the reporting units was substantially in excess of carrying value.

*Long-Lived Assets:* Impairment evaluations of long-lived assets, including property, plant and equipment and strategic, infrastructure and other investments, involve a significant degree of estimation and judgment, including identifying circumstances that indicate an impairment may exist. Impairment analysis is required when events or changes in circumstances indicate that the carrying value of a long-lived asset may not be recoverable. Indicators of potential impairment include a deteriorating business climate, unfavorable regulatory action, decline in value that is other than temporary in nature, plans to dispose of a long-lived asset significantly before the end of its useful life, and accumulation of costs that are in excess of amounts allowed for recovery. The review of long-lived assets for impairment utilizes significant assumptions about operating strategies and external developments, including assessment of current and projected market conditions that can impact future cash flows.

Access Northeast: Eversource recorded an other-than-temporary impairment of \$32.9 million within Other Income, Net on our statement of income in 2018, related to Access Northeast, an equity method investment. In September 2018, a series of non-Eversource natural gas explosions in eastern Massachusetts resulted in widespread property and system damage, personal injuries, and a fatality. Eversource identified the September 2018 natural gas series of explosions, compounded by the adverse legislative environment, as negative evidence that indicated potential impairment of our investment in Access Northeast. Our impairment assessment used a discounted cash flow approach, including consideration of the severity and duration of any decline in fair value of our investment in the project, and involved significant management judgment and estimation, including projections of the project's discounted cash flows and assumptions about exit price. In the third quarter of 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. For further information, see Note 1K, "Investments," to the financial statements.

NPT: In March 2018, the New Hampshire Site Evaluation Committee ("NHSEC") issued a written decision denying Northern Pass' siting application after which the Massachusetts EDCs terminated the selection of, and subsequent contract negotiations with, Northern Pass under the Massachusetts Clean Energy RFP. The March 2018 NHSEC decision denying Northern Pass' siting application caused us to review the recoverability of our Northern Pass project costs in the first quarter of 2018. In this recoverability review, we estimated undiscounted expected project cash flows and compared the result to our estimated project costs to determine whether the recorded amount was recoverable. Our undiscounted cash flows were substantially in excess of our estimated project costs. We completed this analysis and concluded that our project costs were recoverable as of March 31, 2018, based on our expectation that the Northern Pass project remains probable of being placed in service. If as a result of future events and changes in circumstances a new recoverability review were to conclude that our project costs are not recoverable, then we would reduce Northern Pass' project costs to the estimated fair value, which could result in most of our \$307 million of capitalized project costs being impaired. Such an impairment could have a material adverse effect on our financial position and results of operations.

As of December 31, 2018, we did not identify any other impairment indicators for our long-lived assets. If events or changes in circumstances indicate the carrying value of a long-lived asset may not be recoverable, we would perform an impairment analysis. An impairment analysis would consist of two steps: first, the estimated undiscounted future cash flows attributable to the asset would be compared with the carrying value of the asset, and second, if the carrying value is greater than the undiscounted future cash flows, an impairment charge would be recognized equal to the amount by which the carrying value of the asset exceeds its estimated fair value.

*Income Taxes:* Income tax expense is estimated for each of the jurisdictions in which we operate and is recorded each quarter using an estimated annualized effective tax rate. This process to record income tax expense involves estimating current and deferred income tax expense or benefit and the impact of temporary differences resulting from differing treatment of items for financial reporting and income tax return reporting purposes. Such differences are the result of timing of the deduction for expenses, as well as any impact of permanent differences, non-tax deductible expenses, or other items that directly impact income tax expense as a result of regulatory activity (flow-through items). The temporary differences and flow-through items result in deferred tax assets and liabilities that are included in the balance sheets.

We also account for uncertainty in income taxes, which applies to all income tax positions previously filed in a tax return and income tax positions expected to be taken in a future tax return that have been reflected on our balance sheets. The determination of whether a tax position meets the recognition threshold under applicable accounting guidance is based on facts and circumstances available to us.

On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules and included numerous provisions that impacted corporations. In particular, the act reduced the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which are estimated to be approximately \$2.9 billion and included in regulatory liabilities as of December 31, 2018. The refund of these regulatory liabilities to customers will generally be made over the same period as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities.

We have completed our evaluation of the impacts of the act as of December 31, 2018. The ultimate outcome was not materially different from the provisional estimates recorded as of December 31, 2017. While we have recorded the impacts of the act based on interpretation of the provisions as enacted, it is expected the U.S. Department of Treasury and the IRS will issue additional interpretative guidance in the future that could result in changes to previously finalized provisions. At this time, some of the states in which we do business have issued guidance regarding the act and the impact was not material. Amortization of the EDIT liabilities began in 2018 at our PSNH and Yankee Gas subsidiaries. The total amortization for 2018 was \$4.4 million and \$0.6 million for PSNH and Yankee Gas, respectively.

**Accounting for Environmental Reserves:** Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. Increases to estimates of environmental liabilities could have an adverse impact on earnings. We estimate these liabilities based on findings through various phases of the assessment, considering the most likely action plan from a variety of available remediation options (ranging from no action required to full site remediation and long-term monitoring), current site information from our site assessments, remediation estimates from third party engineering and remediation contractors, and our prior experience in remediating contaminated sites. If a most likely action plan cannot yet be determined, we estimate the liability based on the low end of a range of possible action plans. A significant portion of our environmental sites and reserve amounts relate to former MGP sites that were operated several decades ago and manufactured gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which we may have potential liability. Estimates are based on the expected remediation plan. Our estimates are subject to revision in future periods based on actual costs or new information from other sources, including the level of contamination at the site, the extent of our responsibility or the extent of remediation required, recently enacted laws and regulations or a change in cost estimates due to certain economic factors.

**Fair Value Measurements:** We follow fair value measurement guidance that defines fair value as the price that would be received for the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). We have applied this guidance to our Company's derivative contracts that are not elected or designated as "normal purchases or normal sales" (normal), to marketable securities held in trusts, to our investments in our Pension and PBOP Plans, and to nonfinancial assets such as goodwill and AROs. This guidance was also applied in estimating the fair value of preferred stock, long-term debt and RRBs.

Changes in fair value of the derivative contracts are recorded as Regulatory Assets or Liabilities, as we recover the costs of these contracts in rates charged to customers. These valuations are sensitive to the prices of energy and energy-related products in future years for which markets have not yet developed and assumptions are made.

We use quoted market prices when available to determine the fair value of financial instruments. If quoted market prices are not available, fair value is determined using quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments that are not active and model-derived valuations. When quoted prices in active markets for the same or similar instruments are not available, we value derivative contracts using models that incorporate both observable and unobservable inputs. Significant unobservable inputs utilized in the models include energy and energy-related product prices for future years for long-dated derivative contracts and market volatilities.

Discounted cash flow valuations incorporate estimates of premiums or discounts, reflecting risk-adjusted profit that would be required by a market participant to arrive at an exit price, using available historical market transaction information. Valuations of derivative contracts also reflect our estimates of nonperformance risk, including credit risk.

#### Other Matters

**Accounting Standards:** For information regarding new accounting standards, see Note 1C, "Summary of Significant Accounting Policies - Accounting Standards," to the financial statements.

**Contractual Obligations and Commercial Commitments:** Information regarding our contractual obligations and commercial commitments as of December 31, 2018, is summarized annually through 2023 and thereafter as follows:

#### **Eversource**

<i>(Millions of Dollars)</i>	2019	2020	2021	2022	2023	Thereafter	Total
Long-term debt maturities <sup>(a)</sup>	\$ 801.1	\$ 296.1	\$ 1,033.5	\$ 1,188.9	\$ 1,665.2	\$ 7,977.7	\$ 12,962.5
Rate reduction bond maturities	52.3	43.2	43.2	43.2	43.2	410.6	635.7
Estimated interest payments on existing debt <sup>(b)</sup>	498.0	459.5	440.7	406.4	373.4	3,526.1	5,704.1
Capital leases <sup>(c)</sup>	3.4	3.4	2.9	1.5	0.7	13.9	25.8
Operating leases <sup>(d)</sup>	11.5	9.8	8.7	7.2	4.7	32.7	74.6
Funding of pension obligations <sup>(d)(e)</sup>	112.0	—	—	—	—	—	112.0
Funding of PBOP obligations <sup>(d)(e)</sup>	11.0	—	—	—	—	—	11.0
Estimated future annual long-term contractual costs <sup>(f)</sup>	609.2	607.9	528.7	494.1	461.7	2,905.9	5,607.5
<b>Total <sup>(g)</sup></b>	<b>\$ 2,098.5</b>	<b>\$ 1,419.9</b>	<b>\$ 2,057.7</b>	<b>\$ 2,141.3</b>	<b>\$ 2,548.9</b>	<b>\$ 14,866.9</b>	<b>\$ 25,133.2</b>

#### **CL&P**

<i>(Millions of Dollars)</i>	2019	2020	2021	2022	2023	Thereafter	Total
Long-term debt maturities <sup>(a)</sup>	\$ 250.0	\$ —	\$ —	\$ —	\$ 400.0	\$ 2,615.3	\$ 3,265.3
Estimated interest payments on existing debt <sup>(b)</sup>	141.7	134.8	134.8	134.8	129.8	1,843.0	2,518.9
Capital leases <sup>(c)</sup>	2.0	2.0	1.5	—	—	—	5.5
Operating leases <sup>(d)</sup>	1.5	1.4	1.2	1.1	0.5	0.2	5.9
Funding of pension obligations <sup>(d)(e)</sup>	44.0	—	—	—	—	—	44.0
Estimated future annual long-term contractual costs <sup>(f)</sup>	179.9	205.2	197.2	195.7	200.4	959.7	1,938.1
<b>Total <sup>(g)</sup></b>	<b>\$ 619.1</b>	<b>\$ 343.4</b>	<b>\$ 334.7</b>	<b>\$ 331.6</b>	<b>\$ 730.7</b>	<b>\$ 5,418.2</b>	<b>\$ 7,777.7</b>

- (a) Long-term debt maturities exclude the CYAPC pre-1983 spent nuclear fuel obligation, net unamortized premiums, discounts and debt issuance costs, and other fair value adjustments.
- (b) Estimated interest payments on fixed-rate debt are calculated by multiplying the coupon rate on the debt by its scheduled notional amount outstanding for the period of measurement.
- (c) The capital lease obligations include interest.
- (d) Amounts are not included on our balance sheets.
- (e) These amounts represent expected pension and PBOP contributions for 2019 . Future contributions will vary depending on many factors, including the performance of existing plan assets, valuation of the plans' liabilities and long-term discount rates.
- (f) Other than certain derivative contracts held by the regulated companies, these obligations are not included on our balance sheets.
- (g) Does not include other long-term liabilities recorded on our balance sheet, such as environmental reserves, employee medical insurance, workers compensation and long-term disability insurance reserves, ARO liability reserves and other reserves, as we cannot make reasonable estimates of the timing of payments. Also, does not include amounts not included on our balance sheets for future funding of Eversource's equity method investments, as we cannot make reasonable estimates of the periods or the investment contributions.

For further information regarding our contractual obligations and commercial commitments, see Note 6, "Asset Retirement Obligations," Note 7, "Short-Term Debt," Note 8, "Long-Term Debt," Note 9, "Rate Reduction Bonds and Variable Interest Entities," Note 10A, "Employee Benefits - Pension Benefits and Postretirement Benefits Other Than Pension," Note 12, "Commitments and Contingencies," and Note 14, "Leases," to the financial statements.

## RESULTS OF OPERATIONS – EVERSOURCE ENERGY AND SUBSIDIARIES

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for Eversource for the years ended December 31, 2018 and 2017 included in this Annual Report on Form 10-K:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2018	2017	Increase/(Decrease)
Operating Revenues	\$ 8,448.2	\$ 7,752.0	\$ 696.2
Operating Expenses:			
Purchased Power, Fuel and Transmission	3,139.0	2,535.3	603.7
Operations and Maintenance	1,335.2	1,307.0	28.2
Depreciation	819.9	773.8	46.1
Amortization	252.0	90.0	162.0
Energy Efficiency Programs	472.4	480.8	(8.4)
Taxes Other Than Income Taxes	729.8	676.8	53.0
Total Operating Expenses	6,748.3	5,863.7	884.6
Operating Income	1,699.9	1,888.3	(188.4)
Interest Expense	498.8	421.8	77.0
Other Income, Net	128.4	107.9	20.5
Income Before Income Tax Expense	1,329.5	1,574.4	(244.9)
Income Tax Expense	289.0	578.9	(289.9)
Net Income	1,040.5	995.5	45.0
Net Income Attributable to Noncontrolling Interests	7.5	7.5	—
Net Income Attributable to Common Shareholders	\$ 1,033.0	\$ 988.0	\$ 45.0

### Operating Revenues

**Sales Volumes:** A summary of our retail electric GWh sales volumes, our firm natural gas sales volumes in MMcf, and our water MG sales volumes, and percentage changes, for the years ended December 31, 2018 and 2017, is as follows:

	Electric			Firm Natural Gas			Water		
	Sales Volumes (GWh)		Percentage Increase	Sales Volumes (MMcf)		Percentage Increase/(Decrease)	Sales Volumes (MG)		Percentage Increase/(Decrease)
	2018	2017 <sup>(1)</sup>		2018	2017 <sup>(2)</sup>		2018	2017 <sup>(3)</sup>	
Traditional	9,790	9,465	3.4%	44,715	39,455	13.3 %	2,252	2,202	2.3 %
Decoupled and Special Contracts <sup>(4)</sup>	43,591	42,781	1.9%	61,242	61,571	(0.5)%	21,479	22,565	(4.8)%
Total Sales Volumes	53,381	52,246	2.2%	105,957	101,026	4.9 %	23,731	24,767	(4.2)%

<sup>(1)</sup> In 2017 and in the month of January 2018, NSTAR Electric operated under two different rate structures (traditional and decoupled) based on its service territory geography. Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure. The 2017 sales volumes for NSTAR Electric have been recast to present February through December 2017 as decoupled, to conform to the current year presentation.

<sup>(2)</sup> In 2017 and until November 14, 2018, Yankee Gas operated under a traditional rate structure. Effective November 15, 2018, Yankee Gas operated under a decoupled rate structure. The 2017 sales volumes for Yankee Gas have been recast to present November 15th through December 2017 as decoupled, to conform to the current year presentation.

<sup>(3)</sup> Eversource acquired its water distribution business on December 4, 2017. Full 2017 sales volumes have been presented for comparative purposes.

<sup>(4)</sup> Special contracts are unique to Yankee Gas natural gas distribution customers who take service under such an arrangement and generally specify the amount of distribution revenue to be paid to Yankee Gas regardless of the customers' usage.

Fluctuations in retail electric sales volumes at PSNH and natural gas sales volumes at Yankee Gas prior to November 15, 2018 impacted earnings ("Traditional" in the table above). For CL&P, NSTAR Electric (effective February 1, 2018 as a result of a DPU-approved rate case decision), Yankee Gas (effective November 15, 2018 as a result of a PURA-approved rate case settlement) and NSTAR Gas, fluctuations in retail sales volumes do not impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms ("Decoupled" in the table above). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized. Fluctuations in water sales volumes largely do not impact earnings as our Connecticut water distribution business is decoupled.

**Operating Revenues:** Operating Revenues by segment increased/(decreased) in 2018, as compared to 2017, as follows (the variance in electric distribution revenues reflects intercompany transmission billings in both periods):

<i>(Millions of Dollars)</i>	<b>Increase/(Decrease)</b>	
Electric Distribution	\$	405.6
Natural Gas Distribution		74.9
Electric Transmission		(15.4)
Water Distribution		196.1
Other		5.3
Eliminations		29.7
<b>Total Operating Revenues</b>	<b>\$</b>	<b>696.2</b>

*Electric Distribution Revenues :*

- Base electric distribution revenues decreased \$49.3 million due primarily to lower base distribution rates at NSTAR Electric, as per the DPU-approved rate case decision that became effective February 1, 2018. NSTAR Electric's rates were adjusted to reflect the new lower federal corporate income tax rate and the movement of certain costs from base distribution rates to fully-reconciled cost tracking mechanisms (most of which did not impact earnings). The decrease in revenues was partially offset by CL&P's base distribution rate increase as a result of the PURA-approved rate case settlement that became effective May 1, 2018 (a portion of which did not impact earnings), and an increase in non-decoupled sales volumes primarily driven by colder weather in January 2018 at NSTAR Electric (prior to its decoupled rate structure) and warmer summer weather in 2018 at PSNH. Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure.
- Electric distribution revenues also decreased \$28.9 million due to the liability established to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act. Effective February 1, 2018 for NSTAR Electric and May 1, 2018 for CL&P, rates charged to customers have been adjusted to reflect the new federal corporate income tax rate. PSNH will refund the overcollection in rates from January 1, 2018 to customers in a future period.
- Tracked revenues consist of certain costs that are recovered from customers in retail rates through regulatory commission-approved cost tracking mechanisms and therefore, have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs, restructuring and stranded cost recovery revenues (including securitized RRB charges), and additionally for NSTAR Electric, pension and PBOP benefits and net metering for distributed generation. In addition, tracked revenues include certain incentives earned and carrying charges that are billed in rates to customers. Tracked retail electric distribution revenues increased as a result of an increase in electric energy supply costs (\$219.1 million), an increase in stranded cost recovery revenues (\$80.5 million), an increase in retail electric transmission charges (\$39.3 million), and an increase in other distribution tracking mechanisms (\$84.0 million). Tracked revenues also include wholesale market sales transactions, such as sales of energy and energy-related products into the ISO-NE wholesale electricity market and the sale of RECs to various counterparties, which increased \$48.7 million.

*Natural Gas Distribution Revenues :*

- Base natural gas distribution revenues increased \$17.8 million due primarily to an increase in sales volumes and demand revenues driven by colder January, April, October and November weather in Connecticut in 2018, as well as growth in new customer base. Effective November 15, 2018, fluctuations in Connecticut sales volumes no longer impact earnings as a result of a decoupled rate structure at Yankee Gas approved in the 2018 rate case settlement.
- Natural gas distribution revenues decreased \$8.3 million due to the liability established to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act. Effective July 1, 2018 for NSTAR Gas and November 15, 2018 for Yankee Gas, rates charged to customers have been adjusted to reflect the new federal corporate income tax rate.
- Tracked natural gas distribution revenues increased as a result of an increase in natural gas supply costs (\$42.8 million), an increase in energy efficiency program revenues (\$7.9 million), and an increase in wholesale sales of natural gas to third party marketers (\$14.6 million).

*Water Distribution:* Water distribution revenues increased \$196.1 million for the year ended December 31, 2018 as a result of the acquisition of Aquarion on December 4, 2017.

*Electric Transmission Revenues:* The electric transmission segment revenues decreased by \$15.4 million due primarily to lower revenue requirements primarily related to the lower federal corporate income tax rate that was reflected in 2018 transmission revenues, partially offset by an increase related to ongoing investments in our transmission infrastructure.

**Purchased Power, Fuel and Transmission** expense includes costs associated with purchasing electricity, natural gas and water, on behalf of our customers. These supply costs are recovered from customers in rates through commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Purchased Power, Fuel and Transmission expense increased in 2018, as compared to 2017, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>Increase</b>
Electric Distribution	\$ 436.9
Natural Gas Distribution	48.8
Transmission	73.6
Water Distribution	1.6
Eliminations	42.8
Total Purchased Power, Fuel and Transmission	\$ 603.7

The variance in electric distribution reflects intercompany transmission charges in both periods. The increase in purchased power expense at the electric distribution business in 2018, as compared to 2017, was driven primarily by higher prices associated with the procurement of energy supply. As a result of the sale of PSNH's thermal generation assets on January 10, 2018, and the sale of PSNH's hydroelectric assets on August 26, 2018, PSNH purchased power in place of its self-generation output in 2018. The increase in natural gas supply costs at our natural gas distribution business was due to higher average prices and sales volumes.

The increase in transmission costs in 2018, as compared to 2017, was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment and an increase in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers. This was partially offset by a decrease in Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base electric, natural gas and water distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense increased in 2018, as compared to 2017, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>Increase/(Decrease)</b>
Base Electric Distribution (Non-Tracked Costs):	
Employee-related expenses, including labor and benefits	\$ 8.5
Bad debt expense	11.2
HEEC Boston Harbor distribution cable costs	(12.5)
Storm restoration costs	(6.3)
Other non-tracked operations and maintenance	13.0
Total Base Electric Distribution (Non-Tracked Costs)	13.9
Base Natural Gas Distribution (Non-Tracked Costs) - Increase due primarily to higher employee-related expenses of \$4.5 million and higher bad debt expense of \$4.3 million	9.8
Water Distribution - Increase of Aquarion operations and maintenance expenses due to acquisition on December 4, 2017	73.3
Tracked Costs (Electric Distribution, Electric Transmission and Natural Gas Distribution) - Decrease due primarily to lower PSNH generation operations expenses of \$53.3 million due to the 2018 sales of thermal and hydroelectric generation assets and lower transmission expenses of \$18.5 million	(83.3)
Other and eliminations:	
Absence of merger-related costs allowed for recovery through NSTAR Electric distribution rates as a result of the 2017 DPU distribution rate case decision (absence of 2017 earnings benefit)	30.5
Merger-related costs allowed for recovery through Yankee Gas distribution rates as a result of the 2018 PURA distribution rate case settlement agreement (earnings benefit)	(7.7)
Eversource Parent and Other Companies - other operations and maintenance	0.8
Eliminations	(9.1)
Total Operations and Maintenance	\$ 28.2

**Depreciation** expense increased in 2018, as compared to 2017, due primarily to higher utility plant in service balances and new depreciation rates effective with the CL&P distribution rate case settlement agreement. Partially offsetting these increases was lower depreciation expense at PSNH as a result of the sale of the thermal and hydroelectric generation assets in 2018.

**Amortization** expense includes the deferral of energy supply and energy-related costs included in certain regulatory commission-approved cost tracking mechanisms, and the amortization of certain costs. This deferral adjusts expense to match the corresponding revenues. Amortization increased in 2018, as compared to 2017, due primarily to the deferral of energy supply and energy-related costs which can fluctuate from period to period based on the timing of costs incurred and the related rate changes to recover these costs. Energy supply and energy-related costs are recovered from customers in rates and have no impact on earnings. In addition, the increase includes amortization of PSNH's securitized regulatory asset of \$27.3 million related to the 2018 RRB issuance.

**Energy Efficiency Programs** expense decreased in 2018, as compared to 2017, due primarily to a State of Connecticut policy change requiring CL&P to remit 2018 energy efficiency funds to the State of Connecticut, which totaled \$46.8 million in 2018, as compared to \$25.4 million in 2017. These costs were collected from CL&P's customers and remitted to the State of Connecticut; as such we have classified these amounts as Taxes Other than Income Taxes. The costs for the majority of the state energy policy initiatives and expanded energy efficiency programs are recovered from customers in rates and have no impact on earnings. Partially offsetting this decrease was an increase in allowed distribution revenue at PSNH that funded a higher level of expenditures, and higher spending for our natural gas energy efficiency programs.

**Taxes Other Than Income Taxes** expense increased in 2018, as compared to 2017, due primarily to a State of Connecticut policy change requiring CL&P to remit 2018 energy efficiency funds to the State of Connecticut (which totaled \$46.8 million in 2018, as compared to \$25.4 million in 2017), as well as higher property taxes due to higher utility plant in service balances and higher gross earnings taxes (the costs of which are tracked). Partially offsetting these increases was the absence of property taxes as a result of the sale of the PSNH thermal and hydroelectric generation assets in 2018, and a 2018 refund of disputed property taxes for prior years at PSNH.

**Interest Expense** increased in 2018, as compared to 2017, due primarily to an increase in interest on long-term debt (\$30.7 million) as a result of new debt issuances, the addition of Aquarion interest expense in 2018 (\$23.0 million), interest expense on the 2018 PSNH RRB issuance (\$14.4 million), an increase in interest on notes payable (\$11.2 million) and an increase in regulatory deferrals, which increased interest expense (\$7.1 million) driven primarily by the absence in 2018 of a benefit to interest expense at NSTAR Electric due to the 2017 DPU distribution rate case decision regarding carrying charges for past storms. Partially offsetting these increases was an increase in AFUDC related to debt funds (\$7.2 million).

**Other Income, Net** increased in 2018, as compared to 2017, due primarily to an increase related to Pension, SERP and PBOP non-service income components (\$30.9 million), higher AFUDC related to equity funds (\$9.6 million), the recognition of \$8.7 million of the equity return component of carrying charges related to storms incurred from August 2011 through March 2013 at PSNH recorded in interest income, and gains on the sale of property (\$5.1 million). Partially offsetting these increases was a decrease in equity in earnings of unconsolidated affiliates related to Eversource's equity method investments (\$23.6 million), which was driven by a \$32.9 million other-than-temporary impairment to our equity method investment in the Access Northeast project, partially offset by increased unrealized gains on our investment in a renewable energy fund. Other Income, Net was further decreased by investment loss in 2018 compared to investment income in 2017 (\$11.5 million) primarily related to unrealized losses on equity marketable securities.

**Income Tax Expense** decreased in 2018, as compared to 2017, due primarily to the new federal tax law enacted December 22, 2017, the Tax Cuts and Jobs Act, reducing the federal corporate income tax rate from 35 percent to 21 percent and lower pre-tax earnings (\$265.2 million), further reduced by state taxes (\$3.6 million), which includes a valuation allowance against state tax credits. Income tax expense further decreased by the write-off of Access Northeast (\$6.9 million), an aggregate benefit relating to both federal tax reform impacts on the tax return compared to the provision estimate and remeasurement of a tax reserve (\$18 million), and partially offset by items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$3.8 million).

**RESULTS OF OPERATIONS –  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for CL&P, NSTAR Electric and PSNH for the years ended December 31, 2018 and 2017 included in this Annual Report on Form 10-K:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,								
	CL&P			NSTAR Electric			PSNH		
	2018	2017	Increase/(Decrease)	2018	2017	Increase/(Decrease)	2018	2017	Increase/(Decrease)
Operating Revenues	\$ 3,096.2	\$ 2,887.4	\$ 208.8	\$ 3,112.9	\$ 2,980.6	\$ 132.3	\$ 1,047.6	\$ 981.6	\$ 66.0
Operating Expenses:									
Purchased Power, Fuel and Transmission	1,095.2	930.8	164.4	1,257.1	1,025.4	231.7	370.2	237.5	132.7
Operations and Maintenance	506.4	502.2	4.2	462.1	482.9	(20.8)	210.5	263.1	(52.6)
Depreciation	278.6	249.4	29.2	276.4	274.0	2.4	92.1	128.2	(36.1)
Amortization of Regulatory Assets/ (Liabilities), Net	129.0	83.2	45.8	46.7	33.8	12.9	81.0	(16.6)	97.6
Energy Efficiency Programs	94.0	114.7	(20.7)	292.3	294.1	(1.8)	20.1	13.8	6.3
Taxes Other Than Income Taxes	357.2	323.8	33.4	194.2	182.0	12.2	77.3	89.7	(12.4)
Total Operating Expenses	2,460.4	2,204.1	256.3	2,528.8	2,292.2	236.6	851.2	715.7	135.5
Operating Income	635.8	683.3	(47.5)	584.1	688.4	(104.3)	196.4	265.9	(69.5)
Interest Expense	151.7	143.0	8.7	105.2	105.7	(0.5)	60.6	51.0	9.6
Other Income, Net	22.7	23.0	(0.3)	53.1	34.1	19.0	27.7	9.8	17.9
Income Before Income Tax Expense	506.8	563.3	(56.5)	532.0	616.8	(84.8)	163.5	224.7	(61.2)
Income Tax Expense	129.1	186.6	(57.5)	148.9	242.1	(93.2)	47.6	88.7	(41.1)
Net Income	\$ 377.7	\$ 376.7	\$ 1.0	\$ 383.1	\$ 374.7	\$ 8.4	\$ 115.9	\$ 136.0	\$ (20.1)

**Operating Revenues**

Sales Volumes: A summary of our retail electric GWh sales volumes was as follows:

	For the Years Ended December 31,			
	2018	2017	Increase	Percent
CL&P	21,467	20,950	517	2.5%
NSTAR Electric	23,999	23,538	461	2.0%
PSNH	7,915	7,758	157	2.0%

Fluctuations in retail electric sales volumes at PSNH impact earnings. For CL&P and NSTAR Electric (effective February 1, 2018, as a result of the DPU-approved rate case decision), fluctuations in retail electric sales volumes do not impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms.

Operating Revenues: Operating Revenues, which consist of base distribution revenues and tracked revenues further described below, increased in 2018, as compared to 2017, as follows:

<i>(Millions of Dollars)</i>	CL&P	NSTAR Electric	PSNH
Operating Revenues	\$ 208.8	\$ 132.3	\$ 66.0

*Base Distribution Revenues:*

- CL&P's distribution revenues increased \$25.4 million due primarily to the impact of its base distribution rate increase as a result of the PURA-approved rate case settlement that became effective May 1, 2018 (a portion of which did not impact earnings).
- NSTAR Electric's distribution revenues decreased \$79.3 million due primarily to lower base distribution rates at NSTAR Electric, as per the DPU-approved rate case decision that became effective February 1, 2018. NSTAR Electric's rates were adjusted to reflect the new lower federal corporate income tax rate and the movement of certain costs from base distribution rates to fully-reconciled cost tracking mechanisms (most of which did not impact earnings). The decrease in revenues was partially offset by an increase in January 2018 sales volumes, as compared to January 2017, primarily driven by the colder weather. Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure, and changes in sales volumes no longer impact earnings.
- PSNH's base distribution revenues increased \$4.6 million primarily as a result of an increase in sales volumes in 2018, partially offset by a rate change due to the completion of the full recovery of certain costs in revenues. The rate change did not impact earnings.

- Distribution revenues decreased \$16.6 million at CL&P and \$12.3 million at PSNH due to the liability established to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act. Effective February 1, 2018 for NSTAR Electric and May 1, 2018 for CL&P, rates charged to customers have been adjusted to reflect the new federal corporate income tax rate. PSNH will refund the overcollection in rates from January 1, 2018 to customers in a future period.

*Tracked Revenues:* Tracked revenues consist of certain costs that are recovered from customers in retail rates through commission-approved cost tracking mechanisms and therefore have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs, net metering for distributed generation and restructuring and stranded cost recovery revenues (including securitized RRB charges). In addition, tracked revenues include certain incentives earned and carrying charges that are billed in rates to customers. Tracked revenues also include wholesale market sales transactions, such as sales of energy and energy-related products into the ISO-NE wholesale electricity market and the sale of RECs to various counterparties. Tracked revenues increased/(decreased) in 2018, as compared to 2017, due primarily to the following:

<i>(Millions of Dollars)</i>	<u>CL&amp;P</u>	<u>NSTAR Electric</u>	<u>PSNH</u>
Retail Tariff Tracked Revenues:			
Energy supply procurement <sup>(1)</sup>	\$ 172.8	\$ 100.7	\$ (54.4)
Retail transmission	(26.7)	75.1	(9.1)
Stranded cost recovery	3.4	(21.5)	98.6
Other distribution tracking mechanisms	17.0	58.5	8.5
Wholesale Market Sales Revenue	24.4	(4.0)	28.3

<sup>(1)</sup> The decrease at PSNH includes the absence in 2018 of the recovery of generation rate base return due to the sales of its thermal and hydroelectric generation assets in 2018.

*Transmission Revenues:* Transmission revenues decreased \$6.4 million and \$15.3 million at CL&P and NSTAR Electric, respectively, due to lower revenue requirements primarily related to the lower federal corporate income tax rate that was reflected in 2018 transmission revenues, partially offset by an increase related to ongoing investments in our transmission infrastructure. Transmission revenues increased \$6.3 million at PSNH due to an increase related to ongoing investments in our transmission infrastructure, partially offset by the reduction in the federal corporate income tax rate.

**Purchased Power, Fuel and Transmission** expense includes costs associated with purchasing electricity on behalf of CL&P, NSTAR Electric and PSNH's customers. These energy supply costs are recovered from customers in commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Purchased Power, Fuel and Transmission expense increased/(decreased) in 2018, as compared to 2017, due primarily to the following:

<i>(Millions of Dollars)</i>	<u>CL&amp;P</u>	<u>NSTAR Electric</u>	<u>PSNH</u>
Purchased Power Costs	\$ 162.9	\$ 141.1	\$ 132.9
Transmission Costs	(3.7)	75.7	1.6
Eliminations	5.2	14.9	(1.8)
Total Purchased Power, Fuel and Transmission	\$ 164.4	\$ 231.7	\$ 132.7

*Purchased Power Costs :* Included in purchased power costs are the costs associated with providing electric generation service supply to all customers who have not migrated to third party suppliers.

- The increase at CL&P was due primarily to an increase in the price and volume of power procured on behalf of our customers.
- The increase at NSTAR Electric was due primarily to an increase in the price of power procured on behalf of our customers.
- The increase at PSNH was due primarily to higher purchased power energy expenses that are recovered as a component of the Energy Service tracking mechanism. As a result of the sale of its thermal generation assets on January 10, 2018 and its hydroelectric generation assets on August 26, 2018, PSNH purchased power in place of its self-generation output in 2018.

*Transmission Costs :* Included in transmission costs are charges that recover the cost of transporting electricity over high-voltage lines from generation facilities to substations, including costs allocated by ISO-NE to maintain the wholesale electric market.

- The decrease in transmission costs at CL&P was primarily a result of a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers, and a decrease in Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network. This was partially offset by an increase in costs billed by ISO-NE that support regional grid investment.
- The increase in transmission costs at NSTAR Electric and PSNH was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment and an increase in the retail transmission cost deferral. This was partially offset by a decrease in Local Network Service charges.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense increased/(decreased) in 2018, as compared to 2017, due primarily to the following:

(Millions of Dollars)

	CL&P	NSTAR Electric	PSNH
Base Electric Distribution (Non-Tracked Costs):			
Employee-related expenses, including labor and benefits	\$ 14.5	\$ (8.3)	\$ 2.3
Bad debt expense	6.9	4.4	(0.1)
HEEC Boston Harbor distribution cable costs	—	(12.5)	—
Storm restoration costs	(7.4)	1.4	(0.3)
Operations-related expenses, including vegetation management, vehicles, and outside services (excluding storm restoration costs)	(3.9)	3.1	(0.8)
Other non-tracked operations and maintenance	2.1	8.9	3.6
<b>Total Base Electric Distribution (Non-Tracked Costs)</b>	<b>12.2</b>	<b>(3.0)</b>	<b>4.7</b>
Tracked Costs:			
Decrease of PSNH generation operations expenses due to the 2018 sales of thermal and hydroelectric generation assets	—	—	(53.3)
Transmission expenses	(7.4)	(12.0)	0.9
Other tracked operations and maintenance	(0.6)	(5.8)	(4.9)
<b>Total Tracked Costs</b>	<b>(8.0)</b>	<b>(17.8)</b>	<b>(57.3)</b>
<b>Total Operations and Maintenance</b>	<b>\$ 4.2</b>	<b>\$ (20.8)</b>	<b>\$ (52.6)</b>

**Depreciation** increased/(decreased) at CL&P, NSTAR Electric and PSNH in 2018, as compared to 2017, due primarily to the following:

- The increase at CL&P was due primarily to higher net plant in service balances and the implementation of new depreciation rates effective with the CL&P distribution rate case settlement agreement.
- The increase at NSTAR Electric was due primarily to higher net plant in service balances, offset by lower distribution depreciation composite rates.
- The decrease at PSNH was due primarily to the sale of the thermal and hydroelectric generation assets in 2018, partially offset by higher distribution depreciation expense.

**Amortization of Regulatory Assets/(Liabilities), Net** expense includes the deferral of energy supply and energy-related costs included in certain regulatory-approved costs tracking mechanisms, and the amortization of certain costs. This deferral adjusts expense to match the corresponding revenues. Amortization of Regulatory Assets/(Liabilities), Net increased at CL&P, NSTAR Electric and PSNH in 2018, as compared to 2017, due primarily to the deferral adjustment of energy supply and energy-related costs, which can fluctuate from period to period based on the timing of costs incurred and related rate changes to recover these costs. In addition, the increase at PSNH includes amortization of its securitized regulatory asset of \$27.3 million related to the 2018 RRB issuance. Energy supply and energy-related costs, which are the primary drivers of amortization, are recovered from customers in rates and have no impact on earnings.

**Energy Efficiency Programs** expense includes costs for various state energy policy initiatives and expanded energy efficiency programs, the majority of which are recovered from customers in rates and have no impact on earnings. Energy Efficiency Programs expense increased/(decreased) in 2018, as compared to 2017, due primarily to the following:

- The decrease at CL&P was due primarily to a State of Connecticut policy change requiring CL&P to remit 2018 energy efficiency funds to the State of Connecticut (which totaled \$46.8 million in 2018, as compared to \$25.4 million in 2017). These costs were collected from CL&P's customers and remitted to the State of Connecticut; as such we have classified this amount as Taxes Other than Income Taxes.
- The increase at PSNH was primarily due to an increase in allowed distribution revenue that funded a higher level of expenditures.

**Taxes Other Than Income Taxes** increased/(decreased) in 2018, as compared to 2017, due primarily to the following:

- The increase at CL&P was due primarily to a State of Connecticut policy change requiring CL&P to remit 2018 energy efficiency funds to the State of Connecticut (which totaled \$46.8 million in 2018, as compared to \$25.4 million in 2017), as well as higher property taxes due to higher utility plant balances and higher gross earnings taxes (the costs of which are tracked).
- The increase at NSTAR Electric was due primarily to higher property taxes due to higher utility plant balances.
- The decrease at PSNH was due primarily to the absence of property taxes as a result of the sales of its thermal and hydroelectric generation assets in 2018, and a 2018 refund of disputed property taxes for prior years from the Town of Bow, New Hampshire, partially offset by higher property taxes due to higher utility distribution plant balances.

**Interest Expense** increased in 2018, as compared to 2017, due primarily to the following:

- The increase at CL&P was due primarily to higher interest on long-term debt as a result of new debt issuances (\$6.7 million) and an increase in regulatory deferrals, which increased interest expense (\$3.8 million), partially offset by an increase in AFUDC related to debt funds (\$1.2 million).
- The increase at PSNH was due primarily to interest on the 2018 RRB issuance (\$14.4 million), partially offset by lower interest on long-term debt (\$6.4 million).

**Other Income, Net** increased in 2018, as compared to 2017, due primarily to the following:

- The increase at NSTAR Electric was due to an increase related to pension, SERP and PBOP non-service income components (\$16.8 million) and higher AFUDC related to equity funds (\$5.4 million), partially offset by investment loss in 2018 compared to investment income in 2017 (\$3.1 million), primarily related to officer's life insurance policies.
- The increase at PSNH was due to the recognition of \$8.7 million of the equity return component of the carrying charges related to storms incurred from August 2011 through March 2013 recorded in interest income, a gain on the sale of property (\$4.4 million), interest income primarily related to the 2018 refund of disputed property taxes for prior years (\$2.6 million), and an increase related to pension, SERP and PBOP non-service income components (\$4.0 million).

**Income Tax Expense** decreased in 2018, as compared to 2017, due primarily to the following:

- The decrease at CL&P was due primarily to the new federal tax law enacted December 22, 2017, the Tax Cuts and Jobs Act, reducing the federal corporate income tax rate from 35 percent to 21 percent and lower pre-tax earnings (\$90.8 million), partially offset by state taxes (\$3.4 million), which includes an increase in a valuation allowance of \$2.5 million. Income tax expense increased by return to provision items (\$10.9 million), federal tax effect of state reserves and credits (\$10.6 million) and by items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$8.4 million).
- The decrease at NSTAR Electric was due primarily to the reduction in the federal corporate income tax rate and lower pre-tax earnings (\$104.2 million), partially offset by return to provision items (\$1.2 million), state taxes (\$2.8 million), and items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$7.0 million).
- The decrease at PSNH was due primarily to the reduction in the federal corporate income tax rate and lower pre-tax earnings (\$44.2 million), items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$1.3 million), partially offset by state taxes (\$4.4 million).

## EARNINGS SUMMARY

CL&P's earnings increased \$1.0 million in 2018, as compared to 2017, due primarily to the impact of the CL&P base distribution rate increase effective May 1, 2018, higher non-service income from our benefit plans, and an increase in transmission earnings driven by a higher transmission rate base. Earnings were also favorably impacted by lower income tax expense, net of lower distribution revenues resulting from the Tax Cuts and Jobs Act. The earnings increase was partially offset by higher depreciation expense, higher operations and maintenance expense, higher property and other tax expense, and higher interest expense.

NSTAR Electric's earnings increased \$8.4 million in 2018, as compared to 2017, due primarily to an increase in transmission earnings driven by a higher transmission rate base, higher non-service income from our benefit plans, and lower distribution depreciation expense. Earnings were also favorably impacted by lower income tax expense, net of lower distribution revenues resulting from the Tax Cuts and Jobs Act. The earnings increase was partially offset by higher property tax expense and higher interest expense.

PSNH's earnings decreased \$20.1 million in 2018, as compared to 2017, due primarily to lower generation earnings of \$29.7 million as a result of thermal and hydroelectric generation asset sales in 2018, higher operations and maintenance expense, and higher distribution depreciation expense. The earnings decrease was partially offset by an increase in transmission earnings driven by a higher transmission rate base, the recognition of carrying charges on storm costs approved for recovery, a gain on the sale of property, lower property tax expense due to the 2018 refund of disputed property taxes for prior tax years, and higher sales volumes. Earnings were also favorably impacted by lower income tax expense, net of lower distribution revenues resulting from the Tax Cuts and Jobs Act.

## LIQUIDITY

*Cash Flows:* CL&P had cash flows provided by operating activities of \$588.1 million in 2018, as compared to \$ 806.3 million in 2017. The decrease in operating cash flows was due primarily to cash payments made in 2018 for storm restoration costs of approximately \$142 million, an increase in Pension contributions of \$38.7 million, and the timing of collections and payments related to our working capital items, including accounts receivable and accounts payable. Partially offsetting these unfavorable impacts was an increase related to the timing of cash collected for regulatory tracking mechanisms.

NSTAR Electric had cash flows provided by operating activities of \$ 780.5 million in 2018, as compared to \$ 639.3 million in 2017. The increase in operating cash flows was due primarily to the timing of cash collected for regulatory tracking mechanisms, a decrease of \$29.0 million in Pension and PBOP contributions, and the timing of payments related to our working capital items, including accounts receivable and accounts payable. Partially offsetting these favorable impacts were cash payments made for storm restoration costs of approximately \$90 million, and income tax payments of \$120.0 million made in 2018, compared to income tax payments of \$95.5 million made in 2017.

PSNH had cash flows provided by operating activities of \$ 213.3 million in 2018, as compared to \$ 300.9 million in 2017. The decrease in operating cash flows was due primarily to the absence of generation operations as a result of the generation asset sales in 2018, and the timing of payments of our working capital items, including accounts payable.

For further information on CL&P's, NSTAR Electric's and PSNH's liquidity and capital resources, see "Liquidity" and "Business Development and Capital Expenditures" included in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

## RESULTS OF OPERATIONS – EVERSOURCE ENERGY AND SUBSIDIARIES

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for Eversource for the years ended December 31, 2017 and 2016 included in this Annual Report on Form 10-K:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2017	2016	Increase/(Decrease)
Operating Revenues	\$ 7,752.0	\$ 7,639.1	\$ 112.9
Operating Expenses:			
Purchased Power, Fuel and Transmission	2,535.3	2,500.8	34.5
Operations and Maintenance	1,307.0	1,342.1	(35.1)
Depreciation	773.8	715.5	58.3
Amortization of Regulatory Assets, Net	90.0	71.7	18.3
Energy Efficiency Programs	480.8	533.7	(52.9)
Taxes Other Than Income Taxes	676.8	634.0	42.8
Total Operating Expenses	5,863.7	5,797.8	65.9
Operating Income	1,888.3	1,841.3	47.0
Interest Expense	421.8	401.0	20.8
Other Income, Net	107.9	64.5	43.4
Income Before Income Tax Expense	1,574.4	1,504.8	69.6
Income Tax Expense	578.9	555.0	23.9
Net Income	995.5	949.8	45.7
Net Income Attributable to Noncontrolling Interests	7.5	7.5	—
Net Income Attributable to Common Shareholders	\$ 988.0	\$ 942.3	\$ 45.7

### Operating Revenues

A summary of our Operating Revenues by segment was as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2017	2016	Increase/(Decrease)
Electric Distribution	\$ 5,542.9	\$ 5,594.3	\$ (51.4)
Natural Gas Distribution	947.3	857.7	89.6
Electric Transmission	1,301.7	1,210.0	91.7
Other and Eliminations	(39.9)	(22.9)	(17.0)
Total Operating Revenues	\$ 7,752.0	\$ 7,639.1	\$ 112.9

A summary of our retail electric GWh sales volumes and our firm natural gas sales volumes in MMcf and percentage changes was as follows:

	Electric				Firm Natural Gas			
	For the Years Ended December 31,				For the Years Ended December 31,			
	2017 <sup>(1)</sup>	2016	Decrease	Percent	2017 <sup>(1)</sup>	2016	Increase	Percent
Traditional	27,855	28,479	(624)	(2.2)%	46,957	45,314	1,643	3.6%
Decoupled and Natural Gas Special Contracts	24,391	25,163	(772)	(3.1)%	54,069	52,728	1,341	2.5%
Total Sales Volumes	52,246	53,642	(1,396)	(2.6)%	101,026	98,042	2,984	3.0%

<sup>(1)</sup> The 2017 sales volumes have not been recast in this presentation for comparability between the prior years.

Fluctuations in sales volumes at certain of the electric and natural gas utilities impact earnings ("Traditional" in the table above). Fluctuations in CL&P's, NSTAR Electric's (for a portion of its sales volumes as of December 31, 2017) and NSTAR Gas' sales volumes do not impact the level of base distribution revenue realized or earnings due to the commission-approved revenue decoupling mechanisms ("Decoupled and Natural Gas Special Contracts" in the table above). The revenue decoupling mechanisms permit recovery of a base amount of distribution revenues and breaks the relationship between sales volumes and revenues recognized. Effective February 1, 2018, all of NSTAR Electric's distribution revenues were decoupled as a result of the DPU-approved rate case decision.

Operating Revenues, which primarily consist of base electric and natural gas distribution revenues and tracked revenues further described below, increased by \$112.9 million in 2017, as compared to 2016.

*Base electric and natural gas distribution revenues* : Base electric distribution segment revenues, excluding LBR, decreased \$12.3 million in 2017, as compared to 2016, due primarily to a decrease in sales volumes driven by the mild summer weather in 2017 at our non-decoupled electric companies. LBR increased \$13.0 million in 2017, as compared to 2016. Effective February 1, 2018, NSTAR Electric no longer has an LBR recovery mechanism. Base natural gas distribution revenues increased \$2.9 million in 2017, as compared to 2016. The impact of higher firm natural gas sales volumes, which was driven by colder winter weather in the fourth quarter of 2017, was partially offset by lower demand revenues in Connecticut driven by lower peak usage in 2017, as compared to 2016.

*Tracked distribution revenues*: Tracked revenues consist of certain costs that are recovered from customers in rates through regulatory commission-approved cost tracking mechanisms and therefore, have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs for our electric and natural gas customers, retail transmission charges, energy efficiency program costs, net metering for distributed generation and restructuring and stranded cost recovery revenues. In addition, certain tracked revenues include incentives earned and carrying charges that are billed in rates to customers.

Tracked natural gas distribution segment revenues increased as a result of an increase in natural gas supply costs (\$68.7 million) and an increase in energy efficiency program revenues (\$18.1 million). Tracked electric distribution revenues decreased as a result of a decrease in electric energy supply costs (\$21.7 million), driven by decreased average retail prices and lower sales volumes, a decrease in retail electric transmission charges (\$14.8 million), a decrease in transition and stranded cost recovery revenues (\$46.2 million), a decrease in pension rate adjustment mechanisms (\$21.6 million), a decrease in revenues related to the timing of the sale of PSNH's RECs (\$16.3 million), and a decrease in energy efficiency program revenues (\$10.4 million). Partially offsetting these decreases were increases in tracked electric distribution revenues related to federally-mandated congestion charges (\$30.1 million), net metering revenues (\$29.8 million) and revenues related to renewable energy requirements (\$41.9 million).

*Electric transmission revenues*: The electric transmission segment revenues increased by \$91.7 million due primarily to the recovery of higher revenue requirements associated with ongoing investments in our transmission infrastructure.

*Other*: Other revenues decreased due primarily to the sale of Eversource's unregulated telecommunication business on December 31, 2016 (\$20.0 million), partially offset by the addition of Aquarion revenues due to the acquisition on December 4, 2017 (\$15.9 million).

**Purchased Power, Fuel and Transmission** expense includes costs associated with purchasing electricity and natural gas on behalf of our customers. These energy supply costs are recovered from customers in rates through commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Purchased Power, Fuel and Transmission expense increased in 2017, as compared to 2016, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>(Decrease)/Increase</b>	
Electric Distribution	\$	(68.9)
Natural Gas Distribution		59.5
Transmission		43.9
Total Purchased Power, Fuel and Transmission	\$	34.5

The decrease in purchased power expense at the electric distribution business in 2017, as compared to 2016, was driven primarily by lower prices associated with the procurement of energy supply and lower sales volumes. The increase in purchased power expense at the natural gas distribution business was due to higher average natural gas prices and higher sales volumes. The increase in transmission costs in 2017, as compared to 2016, was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment, and Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network. This was partially offset by a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base electric and natural gas distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense decreased in 2017, as compared to 2016, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>Increase/(Decrease)</b>
<b>Base Electric Distribution:</b>	
Employee-related expenses, including labor and benefits	\$ (46.8)
Bad debt expense	(14.5)
Shared corporate costs (including computer software depreciation at Eversource Service)	24.2
HEEC Boston Harbor distribution cable costs	16.0
Other non-tracked operations and maintenance	7.4
<b>Total Base Electric Distribution</b>	<b>(13.7)</b>
<b>Base Natural Gas Distribution</b>	
	4.3
<b>Tracked costs (Electric Distribution, Electric Transmission and Natural Gas Distribution):</b>	
Absence in 2017 of earnings benefit related to merger-related costs allowed for recovery through transmission rates	27.5
Other tracked operations and maintenance	(4.4)
<b>Total Tracked costs (Electric Distribution, Electric Transmission and Natural Gas Distribution)</b>	<b>23.1</b>
<b>Other and eliminations:</b>	
Merger-related costs allowed for recovery through NSTAR Electric distribution rates as a result of the November 30, 2017 DPU distribution rate case decision (earnings benefit)	(30.5)
Addition of Aquarion operations and maintenance expenses due to acquisition on December 4, 2017	6.9
Eversource Parent and Other Companies - other operations and maintenance	7.6
Eliminations	(32.8)
<b>Total Operations and Maintenance</b>	<b>\$ (35.1)</b>

**Depreciation** expense increased in 2017, as compared to 2016, due primarily to higher utility plant in service balances.

**Amortization of Regulatory Assets, Net** expense includes the deferral of energy supply and energy-related costs included in certain regulatory-approved tracking mechanisms, and the amortization of certain costs. The deferral adjusts expense to match the corresponding revenues. Amortization of Regulatory Assets, Net increased in 2017, as compared to 2016, due primarily to the deferral of energy supply and energy-related costs which can fluctuate from period to period based on the timing of costs incurred and the related rate changes to recover these costs. Energy supply and energy-related costs at the electric and natural gas companies are recovered from customers in rates and have no impact on earnings.

**Energy Efficiency Programs** expense decreased in 2017, as compared to 2016, due primarily to a State of Connecticut policy change impacting CL&P requiring the remittance of \$25.4 million of 2017 energy efficiency funds to the State (resulting in these costs being classified as Taxes Other than Income Taxes), and the deferral adjustment at NSTAR Electric. The deferral adjustment reflects the actual costs of energy efficiency programs compared to the estimated amounts billed to customers. The deferral adjusts costs incurred to match energy efficiency revenue billed to customers and the timing of the recovery of energy efficiency costs. The costs for various state energy policy initiatives and expanded energy efficiency programs are recovered from customers in rates and have no impact on earnings.

**Taxes Other Than Income Taxes** expense increased in 2017, as compared to 2016, due primarily to a State of Connecticut policy change requiring \$25.4 million of 2017 CL&P energy efficiency costs to be remitted to the State of Connecticut that is included in Taxes Other than Income Taxes, an increase in property taxes as a result of higher utility plant balances, partially offset by a decrease in gross earnings taxes. Gross earnings taxes are recovered from customers in rates and have no impact on earnings.

**Interest Expense** increased in 2017, as compared to 2016, due primarily to an increase in interest on long-term debt (\$30.3 million) as a result of new debt issuances and an increase in interest on notes payable (\$5.1 million), partially offset by a decrease in regulatory deferrals, primarily at NSTAR Electric, which decreased interest expense (\$14.7 million) due primarily to the November 30, 2017 NSTAR Electric DPU distribution rate case decision which allowed for a higher rate on carrying charges for past storm costs.

**Other Income, Net** increased in 2017, as compared to 2016, due primarily to increased gains on investments (\$27.2 million), primarily related to Eversource's investment in a renewable energy fund, an increase related to pension, SERP and PBOP non-service income components (\$11.3 million), changes in the market value related to deferred compensation plans (\$8.3 million) and higher AFUDC related to equity funds (\$8.2 million). Partially offsetting these favorable impacts was the absence in 2017 of a gain on the sale of an unregulated business in 2016 (\$11.8 million) and lower interest income (\$3.3 million).

**Income Tax Expense** increased in 2017, as compared to 2016, due primarily to higher pre-tax earnings (\$29.1 million), lower excess tax benefit (\$16.2 million), the absence of tax credits in 2017 (\$3.5 million), and the impact from federal tax rate change (\$0.5 million), partially offset by items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$11.4 million), the sale of an unregulated business in 2016 (\$10.2 million), and lower state taxes (\$3.8 million).

## EARNINGS SUMMARY

*Regulated Companies:* Our electric distribution segment earnings increased \$34.6 million in 2017, as compared to 2016, due primarily to a lower effective tax rate, lower non-tracked operations and maintenance expense, higher lost base revenues at NSTAR Electric and higher distribution revenues at CL&P due in part to a higher rate base for the system resiliency program, partially offset by higher depreciation expense, lower sales volumes primarily driven by the mild summer weather in 2017, as compared to 2016 (primarily at NSTAR Electric), and higher property tax expense.

Our electric transmission segment earnings increased \$21.1 million in 2017, as compared to 2016, due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure, partially offset by the absence in 2017 of the FERC-allowed recovery of certain previously expensed merger-related costs in 2016, and a lower benefit in the second quarter of 2017 related to the annual billing and cost reconciliation filing with the FERC.

Our natural gas distribution segment earnings decreased \$3.1 million in 2017, as compared to 2016, due primarily to higher depreciation expense, lower demand revenues in Connecticut driven by lower peak usage in 2017, as compared to 2016, higher non-tracked operations and maintenance expense, and higher property tax expense, partially offset by higher sales volumes driven by colder winter weather in the fourth quarter of 2017, as compared to 2016.

*Eversource Parent and Other Companies:* Eversource parent and other companies, including our water business, earned \$25.3 million in 2017, compared with \$31.0 million in 2016. The decrease in earnings was due primarily to a higher effective tax rate, higher interest expense and the absence in 2017 of the earnings and gain on the sale of an unregulated business in 2016. These decreases were partially offset by the 2017 DPU-allowed recovery of certain previously expensed merger-related costs in NSTAR Electric's distribution rates, and increased gains on investments recorded in 2017.

## LIQUIDITY

Cash flows provided by operating activities totaled \$2.0 billion in 2017, compared with \$2.2 billion in 2016. The decrease in operating cash flows was due primarily to the \$166.3 million net unfavorable impact as a result of the change in income tax payments made, or refunds received, in 2017 when compared to 2016. This unfavorable impact was primarily the result of the December 2015 legislation, which extended the accelerated deduction of depreciation from 2015 to 2019. The legislation resulted in a significant refund of approximately \$275 million, which we received in the first quarter of 2016. Additionally, there was an increase of \$84.1 million in Pension and PBOP Plan cash contributions made in 2017, as compared to 2016, a decrease of \$59.8 million related to the absence in 2017 of the Yankee Companies' DOE Damages received in 2016, and the unfavorable impact related to the timing of regulatory recoveries, which were significantly impacted by NSTAR Electric's timing of collections of purchased power and transmission costs. Partially offsetting these unfavorable impacts was the benefit related to the timing of collections and payments of our working capital items, including accounts payable.

**RESULTS OF OPERATIONS –  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for CL&P, NSTAR Electric and PSNH for the years ended December 31, 2017 and 2016 included in this Annual Report on Form 10-K:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,								
	CL&P			NSTAR Electric			PSNH		
	2017	2016	Increase/(Decrease)	2017	2016	Increase/(Decrease)	2017	2016	Increase/(Decrease)
Operating Revenues	\$ 2,887.4	\$ 2,806.0	\$ 81.4	\$ 2,980.6	\$ 3,041.6	\$ (61.0)	\$ 981.6	\$ 959.5	\$ 22.1
Operating Expenses:									
Purchased Power, Fuel and Transmission	930.8	919.7	11.1	1,025.4	1,084.3	(58.9)	237.5	210.8	26.7
Operations and Maintenance	502.2	490.8	11.4	482.9	500.4	(17.5)	263.1	267.1	(4.0)
Depreciation	249.4	230.5	18.9	274.0	259.3	14.7	128.2	116.5	11.7
Amortization of Regulatory Assets/ (Liabilities), Net	83.2	38.8	44.4	33.8	34.3	(0.5)	(16.6)	11.2	(27.8)
Energy Efficiency Programs	114.7	154.0	(39.3)	294.1	321.8	(27.7)	13.8	14.2	(0.4)
Taxes Other Than Income Taxes	323.8	299.7	24.1	182.0	177.8	4.2	89.7	82.9	6.8
Total Operating Expenses	2,204.1	2,133.5	70.6	2,292.2	2,377.9	(85.7)	715.7	702.7	13.0
Operating Income	683.3	672.5	10.8	688.4	663.7	24.7	265.9	256.8	9.1
Interest Expense	143.0	144.1	(1.1)	105.7	108.4	(2.7)	51.0	50.0	1.0
Other Income, Net	23.0	14.2	8.8	34.1	21.3	12.8	9.8	7.5	2.3
Income Before Income Tax Expense	563.3	542.6	20.7	616.8	576.6	40.2	224.7	214.3	10.4
Income Tax Expense	186.6	208.3	(21.7)	242.1	225.8	16.3	88.7	82.3	6.4
Net Income	\$ 376.7	\$ 334.3	\$ 42.4	\$ 374.7	\$ 350.8	\$ 23.9	\$ 136.0	\$ 132.0	\$ 4.0

**Operating Revenues**

A summary of our retail electric GWh sales volumes was as follows:

	Rate Structure	For the Years Ended December 31,			
		2017	2016	Decrease	Percent
CL&P	Decoupled	20,950	21,617	(667)	(3.1)%
NSTAR Electric (eastern Massachusetts)	Traditional	20,097	20,619	(522)	(2.5)%
NSTAR Electric (western Massachusetts)	Decoupled	3,441	3,546	(105)	(3.0)%
PSNH	Traditional	7,758	7,860	(102)	(1.3)%

Fluctuations in retail electric sales volumes at certain of the electric utilities impact earnings ("Traditional" in the table above). For others, fluctuations in retail electric sales volumes do not impact earnings due to their regulatory commission-approved distribution revenue decoupling mechanisms ("Decoupled" in the table above). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized.

In 2017 and 2016, NSTAR Electric operated under two different rate structures based on its service territory geography. For customers that were served in eastern Massachusetts, including metropolitan Boston, Cape Cod and Martha's Vineyard, NSTAR Electric operated using traditional rates. For customers that were served in western Massachusetts, including the metropolitan Springfield region, NSTAR Electric operated using decoupled rates. Effective February 1, 2018, all of NSTAR Electric's distribution revenues were decoupled as a result of the DPU-approved rate decision. See "Regulatory Developments and Rate Matters - Massachusetts - NSTAR Electric Distribution Rate Case Decision" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

CL&P and NSTAR Electric (for its western Massachusetts customer rates) reconcile their annual base distribution rate recovery amounts to their pre-established levels of baseline distribution delivery service revenues of \$1.059 billion and \$132.4 million, respectively, through December 31, 2017. Effective February 1, 2018, NSTAR Electric, operating entirely under decoupled rates, will reconcile its annual base distribution rate recovery to its new baseline of \$974.8 million. Any difference between the allowed level of distribution revenue and the actual amount realized during a 12-month period is adjusted through rates in the following period.

Operating Revenues, which consist of base distribution revenues and tracked revenues further described below, increased/(decreased) in 2017, as compared to 2016 as follows:

<i>(Millions of Dollars)</i>	CL&P	NSTAR Electric	PSNH
Operating Revenues	\$ 81.4	\$ (61.0)	\$ 22.1

*Base Distribution Revenues, with changes that impact earnings:*

- NSTAR Electric's base distribution revenues, excluding LBR, decreased \$10.8 million in 2017, as compared to 2016, as a result of lower sales volumes driven by the mild summer weather in 2017. LBR increased \$13.0 million in 2017, as compared to 2016. Effective February 1, 2018, NSTAR Electric no longer has an LBR mechanism.
- PSNH's base distribution revenues decreased \$1.5 million in 2017, as compared to 2016, as a result of lower sales volumes driven by the mild summer weather in 2017.

*Tracked Revenues:* Fluctuations in the overall level of operating revenues are primarily related to tracked revenues. Tracked revenues consist of certain costs that are recovered from customers in rates through commission-approved cost tracking mechanisms and therefore have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs, net metering for distributed generation and restructuring and stranded cost recovery revenues. In addition, tracked revenues include certain incentives earned and carrying charges. Tracked revenues increased/(decreased) in 2017, as compared to 2016, due primarily to the following:

<i>(Millions of Dollars)</i>	CL&P	NSTAR Electric	PSNH
Energy supply procurement	\$ 18.8	\$ (50.8)	\$ 10.3
All other distribution tracking mechanisms	35.0	(33.7)	(12.7)

*Transmission Revenues:* Transmission revenues increased by \$34.2 million, \$31.0 million and \$26.5 million at CL&P, NSTAR Electric and PSNH, respectively, due primarily to higher revenue requirements associated with ongoing investments in our transmission infrastructure.

**Purchased Power, Fuel and Transmission** expense includes costs associated with purchasing electricity on behalf of CL&P, NSTAR Electric and PSNH's customers. For PSNH, these costs also include PSNH's generation of electricity. These energy supply costs are recovered from customers in commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Purchased Power, Fuel and Transmission expense increased/(decreased) in 2017, as compared to 2016, due primarily to the following:

<i>(Millions of Dollars)</i>	CL&P	NSTAR Electric	PSNH
Purchased Power Costs	\$ (41.4)	\$ (27.9)	\$ 3.7
Transmission Costs	52.5	(31.0)	23.0
Total Purchased Power, Fuel and Transmission	\$ 11.1	\$ (58.9)	\$ 26.7

*Purchased Power Costs :* Included in purchased power costs are the costs associated with certain energy supply tracking mechanisms and deferred energy supply costs. Energy supply tracking mechanisms recover energy-related costs incurred as a result of providing electric generation service supply to all customers who have not migrated to third party suppliers. In order to meet the demand of customers who have not migrated to third party suppliers, PSNH procures power through power supply contracts and spot purchases in the competitive New England wholesale power market and/or produces power through its own generation. The increase/(decrease) in purchased power costs in 2017, as compared to 2016, was due primarily to the following:

- The decrease at CL&P was due primarily to a decrease in the price of standard offer supply associated with the GSC.
- The decrease at NSTAR Electric was due primarily to lower prices associated with the procurement of energy supply, lower sales volumes and the expiration of certain purchase power agreements.
- The increase at PSNH was due primarily to higher purchased power energy expenses that are recovered as a component of the Energy Service rate, and Regional Greenhouse Gas Initiative related expenses recovered in the SCRC.

*Transmission Costs :* Included in transmission costs are charges that recover the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market. The increase/(decrease) in transmission costs in 2017, as compared to 2016, was due primarily to the following:

- The increase at CL&P was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment, Local Network Service charges, which reflect the cost of transmission service, and the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers.
- The decrease at NSTAR Electric was primarily the result of a decrease in the retail transmission cost deferral. This was partially offset by an increase in costs billed by ISO-NE.
- The increase at PSNH was primarily the result of increases in costs billed by ISO-NE, Local Network Service charges, and the retail transmission cost deferral.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense increased/(decreased) in 2017, as compared to 2016, due primarily to the following:

(Millions of Dollars)

	CL&P	NSTAR Electric	PSNH
Base Electric Distribution (Non-Tracked Costs):			
Employee-related expenses, including labor and benefits	\$ (4.0)	\$ (36.6)	\$ (6.2)
Bad debt expense	(6.8)	(7.5)	(0.2)
Shared corporate costs (including computer software depreciation at Eversource Service)	7.8	12.6	3.8
HEEC Boston Harbor distribution cable costs	—	16.0	—
Other non-tracked operations and maintenance	8.8	0.6	(2.0)
Total Base Electric Distribution (Non-Tracked Costs)	5.8	(14.9)	(4.6)
Tracked Costs:			
Employee-related expenses, including labor and benefits	1.9	(7.5)	(1.0)
Other tracked operations and maintenance	3.7	4.9	1.6
Total Tracked Costs	5.6	(2.6)	0.6
Total Operations and Maintenance	\$ 11.4	\$ (17.5)	\$ (4.0)

**Depreciation** increased at CL&P, NSTAR Electric and PSNH in 2017, as compared to 2016, due primarily to higher utility plant in service balances.

**Amortization of Regulatory Assets/(Liabilities), Net** expense includes the deferral of energy supply and energy-related costs and the amortization of storm and other costs. Amortization of Regulatory Assets/(Liabilities), Net increased at CL&P and decreased for both NSTAR Electric and PSNH in 2017, as compared to 2016, due primarily to the deferral adjustment of energy supply and energy-related costs, which can fluctuate from period to period based on the timing of costs incurred and related rate changes to recover these costs. The deferral adjusts expense to match the corresponding revenues. Energy supply and energy-related costs, which are the primary drivers of amortization, are recovered from customers in rates and have no impact on earnings.

**Energy Efficiency Programs** expense includes costs for various state policy initiatives and are recovered from customers in rates and have no impact on earnings. Energy Efficiency Programs expense decreased in 2017, as compared to 2016, due primarily to the following:

- The decrease at CL&P is due primarily to a State of Connecticut policy change requiring the remittance of \$25.4 million of 2017 energy efficiency funds to the State. These amounts collected from customers were reclassified to Taxes Other than Income Taxes.
- The decrease at NSTAR Electric is due to the deferral adjustment, which reflects the actual cost of energy efficiency programs compared to the estimated amounts billed to customers and the timing of the recovery of energy efficiency costs. The deferral adjusts costs to match energy efficiency revenue billed to customers.

**Taxes Other Than Income Taxes** increased in 2017, as compared to 2016, due primarily to the following:

- The increase at CL&P is due primarily to a State of Connecticut policy change requiring the remittance of \$25.4 million of 2017 energy efficiency funds to the State and higher utility plant balances, partially offset by a decrease in gross earnings taxes. Gross earnings taxes are recovered from customers in rates and have no impact on earnings.
- The increase at NSTAR Electric is due primarily to higher property taxes resulting from disallowed costs in the November 30, 2017 NSTAR Electric DPU distribution rate case decision and higher employee-related payroll taxes, partially offset by a decrease in property tax rates in Boston.
- The increase at PSNH is due to an increase in property taxes as a result of higher utility plant balances.

**Interest Expense** at NSTAR Electric decreased in 2017, as compared to 2016, due primarily to lower deferred regulatory interest expense (\$14.0 million), primarily as a result of the November 30, 2017 NSTAR Electric DPU distribution rate case decision, which allowed for a higher interest rate on carrying charges for past storm costs, partially offset by an increase in interest on long-term debt (\$9.6 million).

**Other Income, Net** increased in 2017, as compared to 2016, due primarily to the following:

- The increase at CL&P is due to higher AFUDC related to equity funds (\$5.9 million) and market value changes related to the deferred compensation plans (\$6.3 million), partially offset by lower interest income (\$4.4 million).
- The increase at NSTAR Electric is due to an increase related to pension, SERP and PBOP non-service income components (\$8.7 million), market value changes related to the deferred compensation plans (\$1.6 million), an increase in amounts related to officer life insurance policies (\$1.3 million) and an increase in interest income (\$1.2 million).
- The increase at PSNH is due to market value changes related to the deferred compensation plans (\$1.5 million).

**Income Tax Expense** increased/(decreased) in 2017, as compared to 2016, due primarily to the following:

- The decrease at CL&P is due primarily to the tax reform impacts on the federal tax effect of state reserves and credits (\$10.7 million), items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$10.1 million), the true up of the return to provision impacts (\$2.6 million), and lower state taxes (\$5.5 million), partially offset by higher pre-tax earnings (\$7.2 million).
- The increase at NSTAR Electric is due primarily to higher pre-tax earnings (\$14.5 million), higher state taxes (\$2.4 million), partially offset by items that impact our tax rate as a result of flow-through items and permanent differences (\$0.6 million).
- The increase at PSNH is due primarily to higher pre-tax earnings (\$3.6 million) and the absence of tax credits in 2017 (\$3.5 million), partially offset by items that impact our tax rate as a result of flow-through items and permanent differences (\$0.7 million).

## **EARNINGS SUMMARY**

CL&P's earnings increased \$42.4 million in 2017, as compared to 2016, due primarily to a lower effective tax rate, an increase in transmission earnings driven by a higher transmission rate base, and higher distribution revenues due in part to a higher rate base for the system resiliency program. These favorable earnings impacts were partially offset by higher depreciation expense, higher operations and maintenance expense, and higher property tax expense.

NSTAR Electric's earnings increased \$23.9 million in 2017, as compared to 2016, due primarily to higher distribution revenues related to lost base revenues, net metering and the PAM, lower operations and maintenance expense, lower interest expense as a result of the November 30, 2017 NSTAR Electric distribution rate case decision, and an increase in transmission earnings driven by a higher transmission rate base. These favorable earnings impacts were partially offset by lower sales volumes driven by the mild summer weather in 2017, higher depreciation expense, and higher property tax expense.

PSNH's earnings increased \$4.0 million in 2017, as compared to 2016, due primarily to an increase in transmission earnings driven by a higher transmission rate base and lower operations and maintenance expense. These favorable earnings impacts were partially offset by lower generation earnings, higher depreciation expense, higher property tax expense, lower sales volumes driven by the mild summer weather in 2017, and a higher effective tax rate.

## **LIQUIDITY**

*Cash Flows:* CL&P had cash flows provided by operating activities of \$806.3 million in 2017, compared with \$812.2 million in 2016. The decrease in operating cash flows was due primarily to income tax payments of \$68.8 million made in 2017, compared to the income tax refunds of \$73.9 million received in 2016. Partially offsetting this decrease was the timing of regulatory recoveries, an increase in distribution rates due to higher rate base, and the timing of collections and payments related to our working capital items.

NSTAR Electric had cash flows provided by operating activities of \$639.3 million in 2017, as compared to \$812.1 million in 2016. The decrease in operating cash flows was due primarily to a decrease in regulatory recoveries, which were significantly impacted by the timing of collections of purchased power and transmission costs, an increase of \$53.4 million in Pension and PBOP Plan cash contributions and an increase of \$29.5 million in income tax payments made in 2017, compared to 2016. Also contributing to the decrease was the timing of working capital items, including accounts payable and inventory.

PSNH had cash flows provided by operating activities of \$300.9 million in 2017, as compared to \$360.7 million in 2016. The decrease in operating cash flows was due primarily to the income tax payments of \$26.1 million made in 2017, compared to the income tax refunds of \$36.0 million received in 2016 and the unfavorable impacts related to the timing of regulatory recoveries. Partially offsetting these decreases were the timing of collections and payments of our working capital items, including accounts payable and inventory, and a \$16.3 million decrease in Pension Plan cash contributions.

## Item 7A. Quantitative and Qualitative Disclosures about Market Risk

### Market Risk Information

*Commodity Price Risk Management:* Our regulated companies enter into energy contracts to serve our customers and the economic impacts of those contracts are passed on to our customers. Accordingly, the regulated companies have no exposure to loss of future earnings or fair values due to these market risk-sensitive instruments. Eversource's Energy Supply Risk Committee, comprised of senior officers, reviews and approves all large-scale energy related transactions entered into by its regulated companies.

### Other Risk Management Activities

We have an Enterprise Risk Management (ERM) program for identifying the principal risks of the Company. Our ERM program involves the application of a well-defined, enterprise-wide methodology designed to allow our Risk Committee, comprised of our senior officers and directors of the Company, to identify, categorize, prioritize, and mitigate the principal risks to the Company. The ERM program is integrated with other assurance functions throughout the Company including Compliance, Auditing, and Insurance to ensure appropriate coverage of risks that could impact the Company. In addition to known risks, ERM identifies emerging risks to the Company, through participation in industry groups, discussions with management and in consultation with outside advisers. Our management then analyzes risks to determine materiality, likelihood and impact, and develops mitigation strategies. Management broadly considers our business model, the utility industry, the global economy and the current environment to identify risks. The Finance Committee of the Board of Trustees is responsible for oversight of the Company's ERM program and enterprise-wide risks as well as specific risks associated with insurance, credit, financing, investments, pensions and overall system security including cyber security. The findings of the ERM process are periodically discussed with the Finance Committee of our Board of Trustees, as well as with other Board Committees or the full Board of Trustees, as appropriate, including reporting on how these issues are being measured and managed. However, there can be no assurances that the ERM process will identify or manage every risk or event that could impact our financial position, results of operations or cash flows.

*Interest Rate Risk Management:* We manage our interest rate risk exposure in accordance with our written policies and procedures by maintaining a mix of fixed and variable rate long-term debt. As of December 31, 2018, all of our long-term debt except for \$ 39.5 million of fees and interest due for CYAPC's spent nuclear fuel disposal costs, was at a fixed interest rate.

*Credit Risk Management:* Credit risk relates to the risk of loss that we would incur as a result of non-performance by counterparties pursuant to the terms of our contractual obligations. We serve a wide variety of customers and transact with suppliers that include IPPs, industrial companies, natural gas and electric utilities, oil and gas producers, financial institutions, and other energy marketers. Margin accounts exist within this diverse group, and we realize interest receipts and payments related to balances outstanding in these margin accounts. This wide customer and supplier mix generates a need for a variety of contractual structures, products and terms that, in turn, require us to manage the portfolio of market risk inherent in those transactions in a manner consistent with the parameters established by our risk management process.

Our regulated companies are subject to credit risk from certain long-term or high-volume supply contracts with energy marketing companies. Our regulated companies manage the credit risk with these counterparties in accordance with established credit risk practices and monitor contracting risks, including credit risk. As of December 31, 2018, our regulated companies did not hold collateral (letters of credit) from counterparties related to our standard service contracts. As of December 31, 2018, Eversource had \$24.8 million of cash posted with ISO-NE related to energy transactions.

For further information on cash collateral deposited and posted with counterparties, see Note 1P, "Summary of Significant Accounting Policies - Supplemental Cash Flow Information," to the financial statements.

If the respective unsecured debt ratings of Eversource or its subsidiaries were reduced to below investment grade by either Moody's or S&P, certain of Eversource's contracts would require additional collateral in the form of cash to be provided to counterparties and independent system operators. Eversource would have been and remains able to provide that collateral.

## **Company Report on Internal Controls Over Financial Reporting**

### **Eversource Energy**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of Eversource Energy and subsidiaries (Eversource or the Company) and of other sections of this annual report. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, Eversource conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2018 .

February 26, 2019

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of Eversource Energy:

### Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Eversource Energy and subsidiaries (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, common shareholders’ equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the schedules listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by COSO.

### Basis for Opinions

The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Company Report on Internal Controls Over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

### Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **Company Report on Internal Controls Over Financial Reporting**

### **The Connecticut Light and Power Company**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying financial statements of The Connecticut Light and Power Company (CL&P or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, CL&P conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2018 .

February 26, 2019

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of The Connecticut Light and Power Company:

### Opinion on the Financial Statements

We have audited the accompanying balance sheets of The Connecticut Light and Power Company (the “Company”) as of December 31, 2018 and 2017, the related statements of income, comprehensive income, common stockholder’s equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

Hartford, Connecticut  
February 26, 2019

We have served as the Company’s auditor since 2002.

## **Company Report on Internal Controls Over Financial Reporting**

### **NSTAR Electric Company**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of NSTAR Electric Company and subsidiary (NSTAR Electric or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, NSTAR Electric conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2018 .

February 26, 2019

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of NSTAR Electric Company:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of NSTAR Electric Company and subsidiary (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, common stockholder’s equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

## **Company Report on Internal Controls Over Financial Reporting**

### **Public Service Company of New Hampshire**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of Public Service Company of New Hampshire and subsidiaries (PSNH or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, PSNH conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2018 .

February 26, 2019

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of Public Service Company of New Hampshire:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Public Service Company of New Hampshire and subsidiaries (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, common stockholder’s equity, and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

Hartford, Connecticut  
February 26, 2019

We have served as the Company’s auditor since 2002.

**EVERSOURCE ENERGY AND SUBSIDIARIES  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

**COMBINED NOTES TO FINANCIAL STATEMENTS**

Refer to the Glossary of Terms included in this combined Annual Report on Form 10-K for abbreviations and acronyms used throughout the combined notes to the financial statements.

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. About Eversource, CL&P, NSTAR Electric and PSNH**

Eversource Energy is a public utility holding company primarily engaged, through its wholly-owned regulated utility subsidiaries, in the energy delivery business. Eversource Energy's wholly-owned regulated utility subsidiaries consist of CL&P, NSTAR Electric and PSNH (electric utilities), Yankee Gas and NSTAR Gas (natural gas utilities) and Aquarion (water utilities). Eversource provides energy delivery and/or water service to approximately four million electric, natural gas and water customers through eight regulated utilities in Connecticut, Massachusetts and New Hampshire.

Eversource, CL&P, NSTAR Electric and PSNH are reporting companies under the Securities Exchange Act of 1934. Eversource Energy is a public utility holding company under the Public Utility Holding Company Act of 2005. Arrangements among the regulated electric companies and other Eversource companies, outside agencies and other utilities covering interconnections, interchange of electric power and sales of utility property are subject to regulation by the FERC. Eversource's regulated companies are subject to regulation of rates, accounting and other matters by the FERC and/or applicable state regulatory commissions (the PURA for CL&P, Yankee Gas and Aquarion, the DPU for NSTAR Electric, NSTAR Gas and Aquarion, and the NHPUC for PSNH and Aquarion).

CL&P, NSTAR Electric and PSNH furnish franchised retail electric service in Connecticut, Massachusetts and New Hampshire. Yankee Gas and NSTAR Gas are engaged in the distribution and sale of natural gas to customers within Connecticut and Massachusetts, respectively. Aquarion is engaged in the collection, treatment and distribution of water in Connecticut, Massachusetts and New Hampshire. CL&P, NSTAR Electric and PSNH's results include the operations of their respective distribution and transmission businesses. The distribution business also includes the results of NSTAR Electric's solar power facilities and PSNH's generation facilities prior to sale in 2018. PSNH completed the sales of its thermal generation assets on January 10, 2018 and its hydroelectric generation assets on August 26, 2018. As of December 31, 2018, PSNH does not own any electric generation facilities. See Note 13, "Generation Asset Sale," for further information.

Eversource also has a regulated subsidiary, NPT, which was formed to construct, own and operate the Northern Pass line, a HVDC transmission line from Québec to New Hampshire under development that will interconnect with a new HVDC transmission line being developed by a transmission subsidiary of HQ.

Eversource Service, Eversource's service company, and several wholly-owned real estate subsidiaries of Eversource, provide support services to Eversource, including its regulated companies. Eversource holds several equity ownership interests, which are accounted for under the equity method. Eversource also consolidates the operations of CYAPC and YAEC, both of which are inactive regional nuclear generation companies engaged in the long-term storage of their spent nuclear fuel.

**B. Basis of Presentation**

The consolidated financial statements of Eversource, NSTAR Electric and PSNH include the accounts of each of their respective subsidiaries. Intercompany transactions have been eliminated in consolidation. The accompanying consolidated financial statements of Eversource, NSTAR Electric and PSNH and the financial statements of CL&P are herein collectively referred to as the "financial statements."

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Eversource consolidates CYAPC and YAEC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in each of these entities is greater than 50 percent. Intercompany transactions between CL&P, NSTAR Electric, PSNH and the CYAPC and YAEC companies have been eliminated in consolidation of the Eversource financial statements.

Eversource's utility subsidiaries' electric, natural gas and water distribution and transmission businesses, are subject to rate-regulation that is based on cost recovery and meets the criteria for application of accounting guidance for entities with rate-regulated operations, which considers the effect of regulation on the differences in the timing of the recognition of certain revenues and expenses from those of other businesses and industries. See Note 2, "Regulatory Accounting," for further information.

Eversource's consolidated financial information includes the results of Aquarion and its subsidiaries beginning from the date of the acquisition on December 4, 2017.

Certain reclassifications of prior year data were made in the accompanying financial statements to conform to the current year presentation.

In accordance with accounting guidance on noncontrolling interests in consolidated financial statements, the Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric, which are not owned by Eversource or its consolidated subsidiaries and are not subject to mandatory redemption, have been presented as noncontrolling interests in the financial statements of Eversource. The Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric are considered to be temporary equity and have been classified between liabilities and permanent shareholders' equity on the balance sheets of Eversource, CL&P and NSTAR Electric due to a provision in the preferred stock agreements of both CL&P and NSTAR Electric that grant preferred stockholders the right to elect a majority of the CL&P and NSTAR Electric Boards of Directors, respectively, should certain conditions exist, such as if preferred dividends are in arrears for a specified amount of time. The Net Income reported in the statements of income and cash flows represents net income prior to apportionment to noncontrolling interests, which is represented by dividends on preferred stock of CL&P and NSTAR Electric.

As of both December 31, 2018 and 2017, Eversource's carrying amount of goodwill was approximately \$ 4.4 billion. Eversource performs an assessment for possible impairment of its goodwill at least annually. Eversource completed its annual goodwill impairment test for each of its reporting units as of October 1, 2018 and determined that no impairment exists. See Note 24B, "Acquisition of Aquarion and Goodwill - Goodwill," for further information.

### C. Accounting Standards

*Accounting Standards Issued but Not Yet Effective:* In February 2016, the FASB issued Accounting Standards Update ("ASU") 2016-02, *Leases (Topic 842)*, which changes existing lease accounting guidance and is required to be applied in the first quarter of 2019. The requirements of the new leases standard include balance sheet recognition of leases deemed to be operating leases and additional disclosure requirements. The recognition, measurement and presentation of expenses and cash flows are not significantly changed. The Company implemented the new leases standard in the first quarter of 2019 and applied the Topic 842 lease criteria to new leases and lease renewals entered into effective on or after January 1, 2019.

In July 2018, the FASB issued ASU 2018-11, *Leases (Topic 842) - Targeted Improvements*, allowing a transition method to adopt the new leases standard on a prospective basis as of the adoption date, with prior periods presented in the financial statements continuing to follow existing lease accounting guidance under Topic 840 (Leases) in the accounting literature. The Company adopted the prospective transition method allowed in ASU 2018-11.

The Company has decided to elect the practical expedient package whereby it does not need to reassess whether or not an existing contract is or contains a lease or whether a lease is an operating or capital lease, and it does not need to reassess initial direct costs for leases. The Company has also elected the practical expedient to not reevaluate land easements existing at adoption if they were not previously accounted for as leases.

The Company determined the impact the ASUs will have on its financial statements by reviewing its lease population and identifying lease data needed for the disclosure requirements. The Company implemented a new lease accounting system in 2019 to ensure ongoing compliance with the ASU's requirements. Eversource recognized approximately \$60 million, which includes approximately \$25 million at NSTAR Electric, approximately \$1 million at CL&P and approximately \$1 million at PSNH, of operating lease liabilities and right-of-use assets on their respective balance sheets upon transition at January 1, 2019. Implementation of the new guidance will not have an impact on each company's results of operations and cash flows.

*Accounting Standards Recently Adopted:* On January 1, 2018, Eversource, CL&P, NSTAR Electric and PSNH adopted ASU 2014-09, *Revenue from Contracts with Customers*, which amended existing revenue recognition guidance, using the modified retrospective method (cumulatively at the date of initial application) applying it only to contracts that were not complete at January 1, 2018. Under this method of adoption, prior year reported results were not restated. Implementation of the ASU did not have a material effect on the results of operations, financial position or cash flows of Eversource, CL&P, NSTAR Electric or PSNH. See Note 22, "Revenues," for further information.

The Company identified an item that was accounted for differently under the new revenue guidance, as compared to the previously existing guidance. As a result of applying guidance on the unit of account under the new standard, purchases of power from and sales of power to ISO-New England are now accounted for net by the hour, rather than net by the month. This change increased Operating Revenues and Purchased Power, Fuel and Transmission by \$22.8 million for the year ended December 31, 2018, with no impact on net income.

On January 1, 2018, Eversource adopted ASU 2016-01, *Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Liabilities*. The ASU removed the available-for-sale designation for equity securities, whereby changes in fair value were previously recorded in accumulated other comprehensive income within shareholders' equity, and required changes in fair value of all equity securities to be recorded in earnings effective January 1, 2018. There was no cumulative effect of adoption. Unrealized losses recorded in Other Income, Net were \$4.3 million for the year ended December 31, 2018. For further information, see Note 5, "Marketable Securities," to the financial statements.

On January 1, 2018, Eversource, CL&P, NSTAR Electric and PSNH adopted ASU 2017-07, *Compensation - Retirement Benefits: Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*. The ASU required separate presentation of service cost from other components of net pension, SERP and PBOP costs, with the other components presented as non-operating income and not subject to capitalization. The ASU has been applied retrospectively for the separate presentation in the income statement of service costs and other components and prospectively in the balance sheet for the capitalization of only the service cost component. As of December 31, 2018, the non-service cost components of net pension, SERP and PBOP costs that were not capitalized in plant were recorded as an increase to regulatory liabilities of \$39.8 million, as these amounts continue to be included in rates. See Note 1N, "Summary of Significant Accounting Policies - Other Income, Net," to the financial statements for the portion of pension, SERP and PBOP costs that are presented as non-operating income for the years

ended December 31, 2018, 2017 and 2016. For the year ended December 31, 2017, the amounts, which were previously presented within Operations and Maintenance expense on the statements of income, totaled \$29.9 million at Eversource, \$1.8 million at CL&P, \$19.2 million at NSTAR Electric and \$5.9 million at PSNH, and have been retrospectively presented within Other Income, Net. For the year ended December 31, 2016, these amounts were \$18.6 million at Eversource, \$0.7 million at CL&P, \$10.5 million at NSTAR Electric and \$6.2 million at PSNH.

On January 1, 2018, Eversource, CL&P, NSTAR Electric and PSNH adopted two accounting standards relating to the statement of cash flows; ASU 2016-15, *Classification of Certain Cash Receipts and Cash Payments*, and ASU 2016-18, *Restricted Cash*. As a result of implementing ASU 2016-15, dividends from equity method investments of \$19.1 million, \$20.0 million, and \$0.7 million for the years ended December 31, 2018, 2017, and 2016, respectively, are presented in operating activities at Eversource, for which the 2017 and 2016 amounts were previously classified in investing activities. ASU 2016-18 required that the statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash and restricted cash equivalents. Both standards were applied retrospectively, as required, and neither had a material impact on Eversource's, CL&P's, NSTAR Electric's or PSNH's statements of cash flows. See Note 1P, "Summary of Significant Accounting Policies - Supplemental Cash Flow Information," to the financial statements for a reconciliation of cash and cash equivalents as reported on the balance sheet to the statement of cash flows, which includes amounts described as restricted cash and restricted cash equivalents.

#### **D. Northern Pass**

Northern Pass is Eversource's planned 1,090 MW HVDC transmission line that will interconnect from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire. As of December 31, 2018, our capitalized Northern Pass project costs were approximately \$307 million.

In March 2018, the New Hampshire Site Evaluation Committee ("NHSEC") issued a written decision denying Northern Pass' siting application after which the Massachusetts EDCs terminated the selection of, and subsequent contract negotiations with, Northern Pass under the Massachusetts Clean Energy RFP. On April 27, 2018, NPT filed a motion for rehearing with the NHSEC, and on July 12, 2018, the NHSEC issued its written decision denying Northern Pass' motion for rehearing. On August 10, 2018, NPT filed an appeal to the New Hampshire Supreme Court, alleging that the NHSEC failed to follow applicable law in its review of the project. On October 12, 2018, the New Hampshire Supreme Court accepted this appeal. Subsequently, the NHSEC transmitted the record of its proceedings to the New Hampshire Supreme Court on December 11, 2018. Briefing of the appeal began on February 4, 2019. The New Hampshire Supreme Court has not set a date for oral argument. NPT intends to continue to pursue NHSEC approval to construct this project.

The March 2018 NHSEC decision denying Northern Pass' siting application caused us to review the recoverability of our Northern Pass project costs in the first quarter of 2018. In this recoverability review, we estimated undiscounted expected project cash flows and compared the result to our estimated project costs to determine whether the recorded amount was recoverable. Our undiscounted cash flows were substantially in excess of our estimated project costs. We completed this analysis and concluded that our project costs were recoverable as of March 31, 2018, based on our expectation that the Northern Pass project remains probable of being placed in service.

Consistent with Eversource's and HQ's long-term relationship to bring clean energy into New England, Eversource and HQ remain committed to Northern Pass and the many benefits this project will bring to our customers and the region. If as a result of future events and changes in circumstances a new recoverability review were to conclude that our project costs are not recoverable, then we would reduce Northern Pass' project costs to the estimated fair value, which could result in most of our \$307 million of capitalized project costs being impaired. Such an impairment could have a material adverse effect on our financial position and results of operations.

#### **E. Cash and Cash Equivalents**

Cash and cash equivalents include cash on hand and short-term cash investments that are highly liquid in nature and have original maturities of three months or less. At the end of each reporting period, any overdraft amounts are reclassified from Cash and Cash Equivalents to Accounts Payable on the balance sheets.

#### **F. Provision for Uncollectible Accounts**

Eversource, including CL&P, NSTAR Electric and PSNH, presents its receivables at estimated net realizable value by maintaining a provision for uncollectible accounts. This provision is determined based upon a variety of judgments and factors, including the application of an estimated uncollectible percentage to each receivable aging category. The estimate is based upon historical collection and write-off experience and management's assessment of collectability from customers. Management continuously assesses the collectability of receivables and adjusts collectability estimates based on actual experience. Receivable balances are written off against the provision for uncollectible accounts when the customer accounts are terminated and these balances are deemed to be uncollectible.

The PURA allows CL&P and Yankee Gas to accelerate the recovery of accounts receivable balances attributable to qualified customers under financial or medical duress (uncollectible hardship accounts receivable) outstanding for greater than 180 days and 90 days, respectively. The DPU allows NSTAR Electric and NSTAR Gas to recover in rates, amounts associated with certain uncollectible hardship accounts receivable. These uncollectible hardship customer account balances are included in Regulatory Assets or Other Long-Term Assets on the balance sheets.

The total provision for both uncollectible accounts and for uncollectible hardship accounts (the uncollectible hardship balance is included in the total provision) is included in Receivables, Net on the balance sheets, and is as follows:

(Millions of Dollars)	Total Provision for Uncollectible Accounts		Uncollectible Hardship	
	As of December 31,		As of December 31,	
	2018	2017	2018	2017
Eversource	\$ 212.7	\$ 195.7	\$ 131.5	\$ 122.5
CL&P	88.0	78.9	71.9	65.5
NSTAR Electric	74.5	69.7	42.5	40.3
PSNH	11.1	10.5	—	—

In accordance with new revenue accounting guidance, uncollectible expense associated with customers' accounts receivable included in Operations and Maintenance expense on the statements of income is as follows:

(Millions of Dollars)	For the Years Ended December 31,		
	2018	2017	2016
Eversource	\$ 61.3	\$ 44.5	\$ 69.5
CL&P	15.8	5.3	17.6
NSTAR Electric	22.3	21.3	31.7
PSNH	6.4	6.7	7.3

### G. CL&P Energy Efficiency Loans

In December 2018, CL&P transferred \$41.3 million of its energy efficiency customer loan portfolio to two outside lenders in order to make additional loans to customers. CL&P remains the servicer of the loans and will transmit customer payments to the lenders. Under a three-year agreement with the lenders, additional energy efficiency loans will also be transferred with a maximum amount outstanding under this program of \$55 million. The transaction did not qualify as a sale for accounting purposes, and the amounts of the loans (\$18.5 million and \$22.8 million as of December 31, 2018 in current and long-term, respectively), included in Accounts Receivable, Net and Other Long-Term Assets, are offset by Other Current Liabilities and Other Long-Term Liabilities on CL&P's balance sheet.

### H. Fuel, Materials, Supplies and Inventory

Fuel, Materials, Supplies and Inventory include natural gas inventory, materials and supplies purchased primarily for construction or operation and maintenance purposes, and RECs. Inventory is valued at the lower of cost or net realizable value. RECs are purchased from suppliers of renewable sources of generation and are used to meet state mandated Renewable Portfolio Standards requirements. The carrying amounts of fuel, materials and supplies, and RECs, which are included in Current Assets on the balance sheets, were as follows:

(Millions of Dollars)	As of December 31,							
	2018				2017			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Fuel	\$ 33.1	\$ —	\$ —	\$ —	\$ 29.7	\$ —	\$ —	\$ —
Materials and Supplies	126.1	44.5	48.6	24.3	117.1	44.4	45.1	18.5
RECs	78.8	—	65.6	13.2	76.3	4.0	50.4	21.8
Total - Current	\$ 238.0	\$ 44.5	\$ 114.2	\$ 37.5	\$ 223.1	\$ 48.4	\$ 95.5	\$ 40.3

### I. Fair Value Measurements

Fair value measurement guidance is applied to derivative contracts that are not elected or designated as "normal purchases" or "normal sales" ("normal") and to the marketable securities held in trusts. Fair value measurement guidance is also applied to valuations of the investments used to calculate the funded status of pension and PBOP plans, the nonrecurring fair value measurements of nonfinancial assets such as goodwill and AROs, and the estimated fair value of preferred stock, long-term debt and RRBs.

*Fair Value Hierarchy:* In measuring fair value, Eversource uses observable market data when available in order to minimize the use of unobservable inputs. Inputs used in fair value measurements are categorized into three fair value hierarchy levels for disclosure purposes. The entire fair value measurement is categorized based on the lowest level of input that is significant to the fair value measurement. Eversource evaluates the classification of assets and liabilities measured at fair value on a quarterly basis, and Eversource's policy is to recognize transfers between levels of the fair value hierarchy as of the end of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Inputs are quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs are observable.

Level 3 - Quoted market prices are not available. Fair value is derived from valuation techniques in which one or more significant inputs or assumptions are unobservable. Where possible, valuation techniques incorporate observable market inputs that can be validated to external sources such as industry exchanges, including prices of energy and energy-related products.

Uncategorized - Investments that are measured at net asset value are not categorized within the fair value hierarchy.

*Determination of Fair Value:* The valuation techniques and inputs used in Eversource's fair value measurements are described in Note 4, "Derivative Instruments," Note 5, "Marketable Securities," Note 6, "Asset Retirement Obligations," Note 10A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," Note 15, "Fair Value of Financial Instruments" and Note 24B, "Acquisition of Aquarion and Goodwill - Goodwill" to the financial statements.

#### **J. Derivative Accounting**

Many of the electric and natural gas companies' contracts for the purchase and sale of energy or energy-related products are derivatives. The accounting treatment for energy contracts entered into varies and depends on the intended use of the particular contract and on whether or not the contract is a derivative. For the regulated companies, regulatory assets or regulatory liabilities are recorded to offset the fair values of derivative contracts related to energy and energy-related products, as contract settlements are recovered from, or refunded to, customers in future rates.

The application of derivative accounting is complex and requires management judgment in the following respects: identification of derivatives and embedded derivatives, election and designation of a contract as normal, and determination of the fair value of derivative contracts. All of these judgments can have a significant impact on the financial statements.

The judgment applied in the election of a contract as normal (and resulting accrual accounting) includes the conclusion that it is probable at the inception of the contract and throughout its term that it will result in physical delivery of the underlying product and that the quantities will be used or sold by the business in the normal course of business. If facts and circumstances change and management can no longer support this conclusion, then a contract cannot be considered normal, accrual accounting is terminated, and fair value accounting is applied prospectively.

The fair value of derivative contracts is based upon the contract terms and conditions and the underlying market price or fair value per unit. When quantities are not specified in the contract, the Company determines whether the contract has a determinable quantity by using amounts referenced in default provisions and other relevant sections of the contract. The fair value of derivative assets and liabilities with the same counterparty are offset and recorded as a net derivative asset or liability on the balance sheets.

All changes in the fair value of derivative contracts are recorded as regulatory assets or liabilities and do not impact net income.

For further information regarding derivative contracts, see Note 4, "Derivative Instruments," to the financial statements.

#### **K. Investments**

Investments are included in Other Long-Term Assets on the balance sheets and earnings impacts from these equity investments are included in Other Income, Net on the statements of income.

*Strategic, Infrastructure and Other Investments:* As of December 31, 2018 and 2017, Eversource had investments totaling \$463.7 million and \$277.6 million, respectively. As of December 31, 2018 and 2017, Eversource's investments included a 50 percent ownership in Bay State Wind, an offshore wind project of \$234.3 million and \$30.2 million, respectively, a 15 percent ownership interest in a FERC-regulated natural gas transmission business of \$155.0 million and \$159.6 million, respectively, a 37.2 percent (14.5 percent of which related to NSTAR Electric) ownership interest in two companies that transmit hydro-electricity imported from the Hydro-Quebec system in Canada of \$19.5 million and \$17.7 million, respectively, other investments totaling \$54.9 million and \$38.8 million, respectively, and a 40 percent ownership interest in Access Northeast of \$31.3 million as of December 31, 2017. NSTAR Electric's investments totaled \$7.6 million and \$6.9 million, respectively, as of December 31, 2018 and 2017.

Impairment of Access Northeast: Access Northeast is a natural gas pipeline and storage project jointly owned by Eversource, Enbridge, Inc. ("Enbridge") and National Grid plc ("National Grid"), through Algonquin Gas Transmission, LLC ("AGT"). Equity method investments are assessed for impairment when conditions exist that indicate that the fair value of the investment is less than book value. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist and developing undiscounted future cash flows.

In 2015 and 2016, AGT sought to secure long-term natural gas pipeline capacity contracts with EDCs in Massachusetts, Connecticut, New Hampshire, Maine, and Rhode Island. Subsequently, in 2016, the Massachusetts Supreme Judicial Court and the NHPUC each ruled that state statutes precluded the state regulatory agencies from approving those contracts in Massachusetts and New Hampshire, respectively. The New Hampshire Supreme Court overruled the NHPUC decision in May 2018. Legislative changes are needed in Massachusetts to allow the DPU to approve natural gas pipeline capacity contracts. No such changes have occurred during any legislative session to date.

In September 2018, a series of non-Eversource natural gas explosions in eastern Massachusetts resulted in widespread property and system damage, personal injuries, and a fatality. As a result of these events, compounded by the failure to secure Massachusetts legislation to date, we believe there is significant uncertainty around the future timing of, and ability to secure, needed legislative change affecting the natural gas industry and pipeline expansion, which may significantly delay the completion of the Access Northeast project.

Eversource identified the September 2018 natural gas series of explosions, compounded by the adverse legislative environment, as negative evidence that indicated potential impairment. Our impairment assessment used a discounted cash flow approach, including consideration of the severity and duration of any decline in fair value of our investment in the project, and involved significant management judgment and estimation, including projections of the project's discounted cash flows and assumptions about exit price. In the third quarter of 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. As a result, Eversource recorded an other-than-temporary impairment of \$32.9 million within Other Income, Net on our statement of income in 2018, which represented the full carrying value of our equity method investment.

*Regional Decommissioned Nuclear Companies* : CL&P, NSTAR Electric and PSNH own common stock in three regional nuclear generation companies (CYAPC, YAEC and MYAPC, collectively referred to as the "Yankee Companies"), each of which owned a single nuclear generating facility that has been decommissioned. For CL&P, NSTAR Electric and PSNH, the respective investments in CYAPC, YAEC and MYAPC are accounted for under the equity method and are included in Other Long-Term Assets on their respective balance sheets. For CL&P, NSTAR Electric and PSNH, these investments totaled \$1.3 million, \$0.9 million and \$0.3 million as of both December 31, 2018 and 2017. Eversource consolidates CYAPC and YAEC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in each of these entities is greater than 50 percent. For further information on the Yankee Companies, see Note 12C, "Commitments and Contingencies – Spent Nuclear Fuel Obligations – Yankee Companies," to the financial statements.

*Equity in Earnings and Dividends from Equity Method Investments*: For the years ended December 31, 2018, 2017 and 2016, Eversource had equity in earnings, net of impairment, of unconsolidated affiliates of \$3.8 million, \$27.4 million, and \$0.2 million, respectively. Eversource received dividends from its equity method investees of \$22.3 million, \$20.0 million and \$0.1 million, respectively, for the years ended December 31, 2018, 2017 and 2016.

*2019 Investment - Revolution Wind and South Fork Wind*: On February 8, 2019, Eversource and Ørsted entered into a 50-50 partnership for key offshore wind assets in the Northeast. Eversource paid approximately \$ 225 million for a 50 percent interest in Ørsted's Revolution Wind and South Fork Wind power projects, as well as the 257-square-mile tract off the coasts of Massachusetts and Rhode Island, owned by North East Offshore LLC. Upon execution of the transaction, Eversource parent issued a guaranty on behalf of its subsidiary, Eversource Investment LLC. Eversource parent will guarantee, as a primary obligor, the financial obligations, primarily all post-Closing payment obligations of Eversource Investment LLC, under the Sale and Purchase Agreement and an Irrevocable Equity Commitment Letter with Ørsted in an amount not to exceed \$ 127.6 million. Eversource parent's obligations under the guaranty expire upon the full, final and indefeasible payment of the guaranteed obligations.

#### L. Operating Expenses

Costs related to fuel and natural gas included in Purchased Power, Fuel and Transmission on the statements of income were as follows:

(Millions of Dollars)	For the Years Ended December 31,		
	2018	2017	2016
Eversource - Natural Gas and Fuel	\$ 442.6	\$ 432.5	\$ 372.2
PSNH - Fuel	7.9	43.4	45.0

PSNH completed the sale of its generation assets in 2018.

#### M. Allowance for Funds Used During Construction

AFUDC represents the cost of borrowed and equity funds used to finance construction and is included in the cost of the electric, natural gas and water companies' utility plant on the balance sheet. The portion of AFUDC attributable to borrowed funds is recorded as a reduction of Interest Expense, and the AFUDC related to equity funds is recorded as Other Income, Net on the statements of income. AFUDC costs are recovered from customers over the service life of the related plant in the form of increased revenue collected as a result of higher depreciation expense.

The average AFUDC rate is based on a FERC-prescribed formula using the cost of a company's short-term financings and capitalization (preferred stock, long-term debt and common equity), as appropriate. The average rate is applied to average eligible CWIP amounts to calculate AFUDC.

AFUDC costs and the weighted-average AFUDC rates were as follows:

Eversource	For the Years Ended December 31,		
	2018	2017	2016
(Millions of Dollars, except percentages)			
Borrowed Funds	\$ 19.7	\$ 12.5	\$ 10.8
Equity Funds	44.0	34.4	26.2
Total AFUDC	\$ 63.7	\$ 46.9	\$ 37.0
Average AFUDC Rate	4.9%	5.1%	4.4%

<i>(Millions of Dollars, except percentages)</i>	For the Years Ended December 31,								
	2018			2017			2016		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Borrowed Funds	\$ 6.3	\$ 7.8	\$ 1.3	\$ 5.1	\$ 4.8	\$ 0.7	\$ 3.3	\$ 5.3	\$ 0.8
Equity Funds	12.2	15.6	—	12.1	10.2	—	6.3	10.2	0.3
Total AFUDC	\$ 18.5	\$ 23.4	\$ 1.3	\$ 17.2	\$ 15.0	\$ 0.7	\$ 9.6	\$ 15.5	\$ 1.1
Average AFUDC Rate	5.8%	5.0%	0.7%	6.2%	5.0%	0.7%	4.7%	3.2%	1.0%

## N. Other Income, Net

The components of Other Income, Net on the statements of income were as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2018	2017	2016
Pension, SERP and PBOP Non-Service Income Components <sup>(1)</sup>	\$ 60.8	\$ 29.9	\$ 18.6
AFUDC Equity	44.0	34.4	26.2
Equity in Earnings, Net of Impairment <sup>(2)</sup>	3.8	27.4	0.2
Investment Income/(Loss)	(4.0)	7.5	8.5
Interest Income <sup>(3)</sup>	18.1	8.3	11.0

Other	0.2	—	0.1	—	—	0.1	—	—	—
Total Other Income, Net <sup>(1)</sup>	\$ 22.7	\$ 53.1	\$ 27.7	\$ 23.0	\$ 34.1	\$ 9.8	\$ 14.2	\$ 21.3	\$ 7.6

<sup>(1)</sup> As a result of the adoption of new accounting guidance, the non-service related components of pension, SERP and PBOP benefit costs are presented as non-operating income and recorded in Other Income, Net on the statements of income. The 2017 and 2016 amounts, which were previously presented within Operations and Maintenance expense on the statements of income, have been retrospectively presented within Other Income, Net for the years ended December 31, 2017 and 2016. Eversource elected the practical expedient in the accounting guidance that allows the Company to use the amounts disclosed in its Pension Benefits and Postretirement Benefits Other Than Pension footnote for the prior period presentations as the estimation basis for applying the retrospective presentation requirements.

<sup>(2)</sup> For the year ended December 31, 2018, equity in earnings, net of impairment, of unconsolidated affiliates includes an other-than-temporary impairment of \$32.9 million in the Access Northeast project investment. See Note 1K, "Summary of Significant Accounting Policies - Investments," for further information. Equity in earnings includes \$17.6 million and \$9.7 million of unrealized gains in 2018 and 2017, respectively, and \$1.7 million of unrealized losses in 2016 associated with an equity method investment in a renewable energy fund.

<sup>(3)</sup> See Note 2, "Regulatory Accounting," for interest income recognized in 2018 for the equity return component of carrying charges on storm costs at PSNH.

## O. Other Taxes

Eversource's companies that serve customers in Connecticut collect gross receipts taxes levied by the state of Connecticut from their customers. These gross receipts taxes are recorded separately with collections in Operating Revenues and with payments in Taxes Other Than Income Taxes on the statements of income as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2018	2017	2016
Eversource	\$ 161.9	\$ 157.4	\$ 162.7
CL&P	141.4	137.5	145.2

As agents for state and local governments, Eversource's companies that serve customers in Connecticut and Massachusetts collect certain sales taxes that are recorded on a net basis with no impact on the statements of income.

Separate from the amounts above are \$46.8 million and \$25.4 million of amounts recorded as Taxes Other than Income Taxes in 2018 and 2017, respectively, related to the future remittance to the State of Connecticut of energy efficiency funds collected from customers in Operating Revenues. These amounts are recorded separately with collections in Operating Revenues and expenses in Taxes Other than Income Taxes on the Eversource and CL&P statements of income.

## P. Supplemental Cash Flow Information

Eversource (Millions of Dollars)	As of and For the Years Ended December 31,		
	2018	2017	2016
Cash Paid/(Received) During the Year for:			
Interest, Net of Amounts Capitalized	\$ 503.2	\$ 419.1	\$ 398.1
Income Taxes	158.8	30.8	(135.5)
Non-Cash Investing Activities:			
Plant Additions Included in Accounts Payable (As of)	435.9	379.5	301.5

(Millions of Dollars)	As of and For the Years Ended December 31,								
	2018			2017			2016		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Cash Paid/(Received) During the Year for:									
Interest, Net of Amounts Capitalized	\$ 149.7	\$ 122.1	\$ 40.5	\$ 144.6	\$ 124.6	\$ 45.9	\$ 143.3	\$ 112.9	\$ 46.5
Income Taxes	66.1	120.0	27.3	68.8	95.5	26.1	(73.9)	66.0	(36.0)
Non-Cash Investing Activities:									
Plant Additions Included in Accounts Payable (As of)	106.1	116.5	81.7	132.5	116.5	44.4	116.2	87.0	37.9

In December 2018, CYAPC paid \$145 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation. In 2016, as a result of damages awarded to the Yankee Companies for spent nuclear fuel lawsuits against the DOE described in Note 12C, "Commitments and Contingencies – Spent Nuclear Fuel Obligations – Yankee Companies," CYAPC and YAEC received total proceeds of \$52.2 million, which were classified as operating activities on the Eversource consolidated statements of cash flows. CYAPC returned \$6.8 million of these proceeds to its non-affiliated member companies. In addition, CL&P, NSTAR Electric and PSNH received a total distribution of \$14.4 million from MYAPC as a result of DOE Phase III proceeds and a distribution from its spent nuclear fuel trust.

The following table reconciles cash and cash equivalents as reported on the balance sheets to the cash, cash equivalents, and restricted cash as reported on the statements of cash flows:

(Millions of Dollars)	As of December 31,							
	2018				2017			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Cash and Cash Equivalents as reported on the Balance Sheets	\$ 108.1	\$ 87.7	\$ 1.6	\$ 1.4	\$ 38.2	\$ 6.0	\$ 1.8	\$ 0.9
Restricted cash included in:								
Prepayments and Other Current Assets	72.1	3.5	13.0	47.5	24.4	3.1	12.8	0.5
Marketable Securities	25.9	0.4	0.1	0.6	23.3	0.5	0.1	0.8
Other Long-Term Assets	3.2	—	—	3.2	—	—	—	—
Cash, Cash Equivalents, and Restricted Cash reported on the Statements of Cash Flows	\$ 209.3	\$ 91.6	\$ 14.7	\$ 52.7	\$ 85.9	\$ 9.6	\$ 14.7	\$ 2.2

Restricted cash included in Prepayments and Other Current Assets and Other Long-Term Assets, shown above, primarily represents cash collections related to the PSNH RRB customer charges that are held in trust and required ISO-NE cash deposits. Restricted cash included in Marketable Securities, shown above, represents money market funds held in trusts to fund certain non-qualified executive benefits and restricted trusts to fund CYAPC and YAEC's spent nuclear fuel storage facilities obligations.

As a result of implementing new accounting guidance for the statement of cash flows, the reclassification of the change in restricted cash balances, which was previously classified as operating activities, resulted in a decrease of \$28.8 million in the total cash and restricted cash change for the year ended December 31, 2017 and an increase of \$32.4 million in the total cash and restricted cash change for the year ended December 31, 2016.

## Q. Related Parties

Eversource Service, Eversource's service company, provides centralized accounting, administrative, engineering, financial, information technology, legal, operational, planning, purchasing, and other services to Eversource's companies. The Rocky River Realty Company, Renewable Properties, Inc. and Properties, Inc., three other Eversource subsidiaries, construct, acquire or lease some of the property and facilities used by Eversource's companies.

As of both December 31, 2018 and 2017, CL&P, NSTAR Electric and PSNH had long-term receivables from Eversource Service in the amounts of \$25.0 million, \$5.5 million and \$3.8 million, respectively, which were included in Other Long-Term Assets on the balance sheets. These amounts related to the funding of investments held in trust by Eversource Service in connection with certain postretirement benefits for CL&P, NSTAR Electric and PSNH employees and have been eliminated in consolidation on the Eversource financial statements.

Included in the CL&P, NSTAR Electric and PSNH balance sheets as of December 31, 2018 and 2017 were Accounts Receivable from Affiliated Companies and Accounts Payable to Affiliated Companies relating to transactions between CL&P, NSTAR Electric and PSNH and other subsidiaries that are wholly-owned by Eversource. These amounts have been eliminated in consolidation on the Eversource financial statements.

## 2. REGULATORY ACCOUNTING

Eversource's utility companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of Eversource's regulated companies are designed to collect each company's costs to provide service, including a return on investment.

Management believes it is probable that each of the regulated companies will recover its respective investments in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to any of the regulated companies' operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

*Regulatory Assets:* The components of regulatory assets were as follows:

(Millions of Dollars)	As of December 31,							
	2018				2017			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Benefit Costs	\$ 1,914.8	\$ 424.7	\$ 544.4	\$ 169.6	\$ 2,068.8	\$ 469.2	\$ 560.7	\$ 212.3
Income Taxes, Net	728.6	454.4	105.9	8.3	768.9	453.8	113.2	21.7
Securitized Stranded Costs	608.4	—	—	608.4	—	—	—	—
Deferred Costs from Generation Asset Sale	—	—	—	—	516.1	—	—	516.1
Storm Restoration Costs, Net	576.0	302.6	212.9	60.5	404.8	216.7	146.6	41.5
Regulatory Tracker Mechanisms	316.0	33.2	169.1	67.3	509.9	85.3	273.0	116.4
Derivative Liabilities	356.5	356.5	—	—	367.2	362.3	—	—
Goodwill-related	348.4	—	299.1	—	365.2	—	313.6	—
Asset Retirement Obligations	89.2	32.3	42.2	3.3	101.0	30.3	39.0	17.0
Other Regulatory Assets	208.0	27.0	64.6	12.1	137.4	27.6	78.4	15.8
<b>Total Regulatory Assets</b>	<b>5,145.9</b>	<b>1,630.7</b>	<b>1,438.2</b>	<b>929.5</b>	<b>5,239.3</b>	<b>1,645.2</b>	<b>1,524.5</b>	<b>940.8</b>
Less: Current Portion	514.8	125.2	241.7	67.2	741.9	200.3	333.9	130.1
<b>Total Long-Term Regulatory Assets</b>	<b>\$ 4,631.1</b>	<b>\$ 1,505.5</b>	<b>\$ 1,196.5</b>	<b>\$ 862.3</b>	<b>\$ 4,497.4</b>	<b>\$ 1,444.9</b>	<b>\$ 1,190.6</b>	<b>\$ 810.7</b>

**Benefit Costs:** Eversource's Pension, SERP and PBOP Plans are accounted for in accordance with accounting guidance on defined benefit pension and other PBOP plans. The liability (or asset) recorded by the regulated companies to recognize the funded status of their retiree benefit plans is offset by a regulatory asset (or offset by a regulatory liability in the case of a benefit plan asset) in lieu of a charge to Accumulated Other Comprehensive Income/(Loss), reflecting ultimate recovery from customers through rates. The regulatory asset (or regulatory liability) is amortized as the actuarial gains and losses and prior service cost are amortized to net periodic benefit cost for the pension and PBOP plans. All amounts are remeasured annually. Regulatory accounting is also applied to the portions of Eversource's service company costs that support the regulated companies, as these amounts are also recoverable. As these regulatory assets or regulatory liabilities do not represent a cash outlay for the regulated companies, no carrying charge is recovered from customers. The decrease in the regulatory asset balance at PSNH as of December 31, 2018 was due in part to the generation divestiture and the securitization of remaining generation costs.

CL&P, NSTAR Electric and PSNH recover benefit costs related to their distribution and transmission operations from customers in rates as allowed by their applicable regulatory commissions. NSTAR Electric recovers qualified pension and PBOP expenses related to its distribution operations through a rate reconciling mechanism that fully tracks the change in net pension and PBOP expenses each year.

**Income Taxes, Net:** The tax effect of temporary book-tax differences (differences between the periods in which transactions affect income in the financial statements and the periods in which they affect the determination of taxable income, including those differences relating to uncertain tax positions) is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and accounting guidance for income taxes. Differences in income taxes between the accounting guidance and the rate-making treatment of the applicable regulatory commissions are recorded as regulatory assets. As these assets are offset by deferred income tax liabilities, no carrying charge is collected. The amortization period of these assets varies depending on the nature and/or remaining life of the underlying assets and liabilities. For further information regarding income taxes, see Note 11, "Income Taxes," to the financial statements.

**Securitized Stranded Costs and Deferred Costs from Generation Asset Sale:** On May 8, 2018, a subsidiary of PSNH issued \$635.7 million of securitized RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets. Securitized regulatory assets, which are not earning an equity return, are being recovered over the amortization period of the associated RRBs. The PSNH RRBs are expected to be repaid by February 1, 2033. The unrecovered costs related to the difference between the carrying value and the fair value less costs to sell PSNH's thermal generation assets, and were reflected as Deferred Costs from Generation Asset Sale in the table above as of December 31, 2017. As of December 31, 2018, these costs are reflected in the Securitized Stranded Costs balance. For further information, see Note 13, "Generation Asset Sale."

**Storm Restoration Costs, Net:** The storm restoration cost deferrals relate to costs incurred for storm events at CL&P, NSTAR Electric and PSNH that each company expects to recover from customers. A storm must meet certain criteria to qualify for deferral and recovery with the criteria specific to each state jurisdiction and utility company. Once a storm qualifies for recovery, all qualifying expenses incurred during storm restoration efforts are deferred and recovered from customers. Costs for storms that do not meet the specific criteria are expensed as incurred. In addition to storm restoration costs, CL&P and PSNH are each allowed to recover pre-staging storm costs. Management believes storm restoration costs deferred were prudently incurred and meet the criteria for specific cost recovery in Connecticut, Massachusetts and New Hampshire, and that recovery from customers is probable through the applicable regulatory recovery processes. Each electric utility company either recovers a carrying charge on its deferred storm restoration cost regulatory asset balance or the regulatory asset balance is included in rate base.

In 2018, several significant storms caused extensive damage to our electric distribution systems and significant customer outages across all three states. These storms resulted in deferred storm restoration costs of approximately \$266 million ( \$148 million for CL&P, \$94 million for NSTAR Electric, and \$24 million for PSNH), which were reflected in Storm Restoration Costs, Net in the table above as of December 31, 2018 .

On September 17, 2018, the NHPUC approved the recovery of \$49 million , plus carrying charges, in storm costs incurred from August 2011 through March 2013 and the transfer of funding from PSNH's major storm reserve to offset those costs. The costs of these storms (excluding the equity return component of the carrying charges) were deferred as regulatory assets, and the funding reserve collected from customers was accrued as a regulatory liability. The storm cost deferral is separate from the major storm funding reserve that is being collected from customers. As a result of the duration of time between incurring storm costs in August 2011 through March 2013 and final approval from the NHPUC in 2018, PSNH recognized \$8.7 million (pre-tax) for the equity return component of the carrying charges, which have been collected from customers, within Other Income, Net on our statement of income in 2018. Storm costs incurred from December 2013 through April 2016 have been audited by the NHPUC staff and are pending NHPUC approval.

**Regulatory Tracker Mechanisms:** The regulated companies' approved rates are designed to recover costs incurred to provide service to customers. The regulated companies recover certain of their costs on a fully-reconciling basis through regulatory commission-approved tracking mechanisms. The differences between the costs incurred (or the rate recovery allowed) and the actual revenues are recorded as regulatory assets (for undercollections) or as regulatory liabilities (for overcollections) to be included in future customer rates each year. Carrying charges are recovered in rates on all material regulatory tracker mechanisms.

CL&P, NSTAR Electric and PSNH each recover, on a fully reconciling basis, the costs associated with the procurement of energy, transmission related costs from FERC-approved transmission tariffs, energy efficiency programs, low income assistance programs, certain uncollectible accounts receivable for hardship customers, and restructuring and stranded costs as a result of deregulation, and additionally for the Massachusetts utilities, pension and PBOP benefits and net metering for distributed generation. Energy procurement costs at NSTAR Electric include the costs related to its solar power facilities.

CL&P, NSTAR Electric (effective February 1, 2018 as a result of a DPU-approved rate case decision), Yankee Gas (effective November 15, 2018 as a result of a PURA-approved rate case settlement agreement) and NSTAR Gas each have a regulatory commission approved revenue decoupling mechanism. Distribution revenues are decoupled from customer sales volumes, where applicable, which breaks the relationship between sales volumes and revenues recognized. Each company reconciles its annual base distribution rate recovery amount to the pre-established levels of baseline distribution delivery service revenues. Any difference between the allowed level of distribution revenue and the actual amount realized during a 12-month period is adjusted through rates in the following period.

**Derivative Liabilities:** Regulatory assets are recorded as an offset to derivative liabilities and relate to the fair value of contracts used to purchase energy and energy-related products that will be recovered from customers in future rates. These assets are excluded from rate base and are being recovered as the actual settlements occur over the duration of the contracts. See Note 4, "Derivative Instruments," to the financial statements for further information on these contracts.

**Goodwill-related:** The goodwill regulatory asset originated from a 1999 transaction, and the DPU allowed its recovery in NSTAR Electric and NSTAR Gas rates. This regulatory asset is currently being amortized and recovered from customers in rates without a carrying charge over a 40 -year period, and as of December 31, 2018 , there were 21 years of amortization remaining.

**Asset Retirement Obligations:** The costs associated with the depreciation of the regulated companies' ARO assets and accretion of the ARO liabilities are recorded as regulatory assets in accordance with regulatory accounting guidance. The regulated companies' ARO assets, regulatory assets and liabilities offset and are excluded from rate base. These costs are being recovered over the life of the underlying property, plant and equipment.

**Other Regulatory Assets:** Other Regulatory Assets primarily include contractual obligations associated with the remaining nuclear fuel storage costs of the CYAPC, YAEC and MYAPC nuclear facilities, environmental remediation costs, losses associated with the reacquisition or redemption of long-term debt, certain uncollectible accounts receivable for hardship customers, certain merger-related costs allowed for recovery, water tank painting costs, and various other items.

**Regulatory Costs in Long-Term Assets:** Eversource's regulated companies had \$122.9 million (including \$42.1 million for CL&P, \$49.3 million for NSTAR Electric and \$12.2 million for PSNH) and \$105.8 million (including \$18.2 million for CL&P, \$42.7 million for NSTAR Electric and \$27.2 million for PSNH) of additional regulatory costs as of December 31, 2018 and 2017, respectively, that were included in long-term assets on the balance sheets. These amounts represent incurred costs for which recovery has not yet been specifically approved by the applicable regulatory agency. However, based on regulatory policies or past precedent on similar costs, management believes it is probable that these costs will ultimately be approved and recovered from customers in rates.

**Equity Return on Regulatory Assets:** For rate-making purposes, the regulated companies recover the carrying costs related to their regulatory assets. For certain regulatory assets, the carrying cost recovered includes an equity return component. This equity return, which is not recorded on the balance sheets, totaled \$0.7 million and \$1.0 million for CL&P as of December 31, 2018 and 2017, respectively. These carrying costs will be recovered from customers in future rates. As of December 31, 2018 and 2017, this equity return, which is not recorded on the balance sheets, totaled \$12.0 million and \$42.0 million, respectively, for PSNH. The 2017 amount included \$25 million of equity return on the Clean Air Project costs that PSNH had agreed not to bill customers as part of the generation divestiture settlement agreement. PSNH sold its generation assets in 2018.

**Regulatory Liabilities:** The components of regulatory liabilities were as follows:

(Millions of Dollars)	As of December 31,							
	2018				2017			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
EDIT due to Tax Cuts and Jobs Act	\$ 2,883.0	\$ 1,031.0	\$ 1,103.7	\$ 396.4	\$ 2,882.0	\$ 1,031.6	\$ 1,087.9	\$ 405.1
Cost of Removal	521.0	39.9	307.1	22.1	502.1	23.2	293.8	37.9
Benefit Costs	91.2	—	76.9	—	132.3	—	112.6	—
Regulatory Tracker Mechanisms	309.0	89.5	163.7	48.3	136.7	34.6	77.8	5.0
AFUDC - Transmission	70.7	47.4	23.3	—	67.1	48.8	18.3	—
Revenue Subject to Refund due to Tax Cuts and Jobs Act	24.6	—	—	12.6	—	—	—	—
Other Regulatory Liabilities	80.2	24.0	29.2	4.2	45.2	12.9	3.7	2.7
Total Regulatory Liabilities	3,979.7	1,231.8	1,703.9	483.6	3,765.4	1,151.1	1,594.1	450.7
Less: Current Portion	370.2	109.6	190.6	55.5	128.1	39.0	79.6	6.3
Total Long-Term Regulatory Liabilities	\$ 3,609.5	\$ 1,122.2	\$ 1,513.3	\$ 428.1	\$ 3,637.3	\$ 1,112.1	\$ 1,514.5	\$ 444.4

**EDIT due to Tax Cuts and Jobs Act:** Pursuant to the "Tax Cuts and Jobs Act" (the "Act"), which became law on December 22, 2017, Eversource remeasured its existing deferred federal income tax balances as of December 31, 2017 to reflect the decrease in the U.S. federal corporate income tax rate from 35 percent to 21 percent. The remeasurement resulted in provisional regulated excess accumulated deferred income tax (excess ADIT or EDIT) liabilities that will benefit our customers in future periods and were recognized as regulatory liabilities on the balance sheet. We estimate that approximately 85 percent of the provisional regulated EDIT liabilities relate to property, plant, and equipment with remaining useful lives estimated to be in excess of 35 years. These amounts are subject to IRS normalization rules and will be returned to customers using the same timing as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities.

Eversource's regulated companies are in the process of, or will be, refunding the EDIT liabilities to customers based on orders issued by applicable state regulatory commissions. For CL&P, amounts related to the EDIT liabilities will be incorporated as refunds to customers in May 1, 2019 base distribution rates. For NSTAR Electric (effective January 1, 2019) and NSTAR Gas (effective February 1, 2019), refunds related to EDIT will occur in rates through a new reconciling factor. Effective November 15, 2018, Yankee Gas' distribution rates charged to customers began to reflect the refund of EDIT. For PSNH, EDIT refunds will be addressed as part of the next distribution rate case filing. The EDIT balance related to PSNH's divested generation assets has been included as a component of the securitization of the stranded generation assets and has started to be refunded to customers via the Stranded Cost Recovery Charge effective August 1, 2018. For our transmission companies, the refund of excess ADIT to customers will be made based on future guidance from FERC.

**Cost of Removal:** Eversource's regulated companies currently recover amounts in rates for future costs of removal of plant assets over the lives of the assets. The estimated cost to remove utility assets from service is recognized as a component of depreciation expense, and the cumulative amount collected from customers but not yet expended is recognized as a regulatory liability.

**AFUDC - Transmission:** Regulatory liabilities were recorded by CL&P and NSTAR Electric for AFUDC accrued on certain reliability-related transmission projects to reflect local rate base recovery. These regulatory liabilities will be amortized over the depreciable life of the related transmission assets.

**Revenue Subject to Refund due to Tax Cuts and Jobs Act:** Eversource established a regulatory liability, recorded as a reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflect the lower federal tax rate. Effective May 1, 2018, CL&P adjusted rates billed to customers to reflect the lower federal income tax rate prospectively and, as of December 31, 2018, fully refunded its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through April 30, 2018. Effective November 15, 2018, Yankee Gas adjusted distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through November 14, 2018. Although Yankee Gas' new rates were effective January 1, 2019, the provisions of the settlement agreement took effect November 15, 2018. For NSTAR Electric and NSTAR Gas, a December 2018 DPU order indicated that the DPU will not require a revision to base rates for any potential refunds associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 to the effective dates of each company's rate changes (effective February 1, 2018 for NSTAR Electric and July 1, 2018 for NSTAR Gas). PSNH and Aquarion will refund the overcollection in distribution rates from January 1, 2018 to customers in a future period. PSNH will adjust distribution rates to reflect the prospective lower federal income tax rate effective July 1, 2019, or earlier if a rate case is filed for rates effective prior to July 1, 2019.

Effective January 1, 2018, local transmission service rates were updated to reflect the lower U.S. federal corporate income tax rate that resulted from the act. On June 28, 2018, FERC granted a one-time tariff waiver related to the federal corporate income tax rate so that effective June 1, 2018, the regional transmission service rates reflect the reduced federal corporate income tax rate at 21 percent. The refund of excess ADIT to customers will be made based on future guidance from FERC.

**FERC ROE Complaints:** As of December 31, 2018, Eversource has a reserve established for the second ROE complaint in the pending FERC ROE complaint proceedings, which was recorded as a regulatory liability and is reflected within Regulatory Tracker Mechanisms in the table above. The cumulative pre-tax reserve (excluding interest) as of December 31, 2018 totaled \$39.1 million for Eversource (including \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH). See Note 12E, "Commitments and Contingencies – FERC ROE Complaints," for further information on developments in the pending ROE complaint proceedings.

### 3. PROPERTY, PLANT AND EQUIPMENT AND ACCUMULATED DEPRECIATION

Utility property, plant and equipment is recorded at original cost. Original cost includes materials, labor, construction overheads and AFUDC for regulated property. The cost of repairs and maintenance is charged to Operations and Maintenance expense as incurred.

The following tables summarize property, plant and equipment by asset category:

Eversource (Millions of Dollars)	As of December 31,	
	2018	2017
Distribution - Electric	\$ 15,071.1	\$ 14,410.5
Distribution - Natural Gas	3,546.2	3,244.2

Construction Work in Progress	335.4	510.3	135.7	381.8	460.3	149.4
Total Property, Plant and Equipment, Net	\$ 8,909.7	\$ 8,794.7	\$ 2,880.1	\$ 8,271.0	\$ 8,246.5	\$ 2,642.3

<sup>(1)</sup> These assets are primarily comprised of building improvements, computer software, hardware and equipment at Eversource Service.

Depreciation of utility assets is calculated on a straight-line basis using composite rates based on the estimated remaining useful lives of the various classes of property (estimated useful life for PSNH distribution and the water utilities). The composite rates, which are subject to approval by the appropriate state regulatory agency, include a cost of removal component, which is collected from customers over the lives of the plant assets and is recognized as a regulatory liability. Depreciation rates are applied to property from the time it is placed in service.

Upon retirement from service, the cost of the utility asset is charged to the accumulated provision for depreciation. The actual incurred removal costs are applied against the related regulatory liability.

The depreciation rates for the various classes of utility property, plant and equipment aggregate to composite rates as follows:

(Percent)	2018	2017	2016
Eversource	2.9%	3.0%	3.0%
CL&P	2.8%	2.8%	2.7%
NSTAR Electric	2.8%	2.9%	2.9%
PSNH	2.8%	3.1%	3.1%

The following table summarizes average remaining useful lives of depreciable assets:

(Years)	As of December 31, 2018			
	Eversource	CL&P	NSTAR Electric	PSNH
Distribution - Electric	34.1	35.4	33.7	32.3
Distribution - Natural Gas	43.8	—	—	—
Transmission - Electric	41.3	38.0	45.3	42.9
Distribution - Water	33.3	—	—	—
Solar	24.9	—	24.9	—
Other	12.9	—	—	—

#### 4. DERIVATIVE INSTRUMENTS

The electric and natural gas companies purchase and procure energy and energy-related products, which are subject to price volatility, for their customers. The costs associated with supplying energy to customers are recoverable from customers in future rates. These regulated companies manage the risks associated with the price volatility of energy and energy-related products through the use of derivative and non-derivative contracts.

Many of the derivative contracts meet the definition of, and are designated as, normal and qualify for accrual accounting under the applicable accounting guidance. The costs and benefits of derivative contracts that meet the definition of normal are recognized in Operating Expenses on the statements of income, as applicable, as electricity or natural gas is delivered.

Derivative contracts that are not designated as normal are recorded at fair value as current or long-term Derivative Assets or Derivative Liabilities on the balance sheets. For the electric and natural gas companies, regulatory assets or regulatory liabilities are recorded to offset the fair values of derivatives, as contract settlement amounts are recovered from, or refunded to, customers in their respective energy supply rates.

The gross fair values of derivative assets and liabilities with the same counterparty are offset and reported as net Derivative Assets or Derivative Liabilities, with current and long-term portions, on the balance sheets. The following table presents the gross fair values of contracts, categorized by risk type, and the net amounts recorded as current or long-term derivative assets or liabilities:

		As of December 31,						
		2018			2017			
(Millions of Dollars)	Fair Value Hierarchy	Commodity Supply and Price Risk Management	Netting <sup>(1)</sup>	Net Amount Recorded as a Derivative	Commodity Supply and Price Risk Management	Netting <sup>(1)</sup>	Net Amount Recorded as a Derivative	
<b>Current Derivative Assets:</b>								
	CL&P	Level 3	9.6	(3.4)	6.2	9.5	(7.1)	2.4
	Other	Level 2	\$ 1.5	\$ (0.9)	\$ 0.6	\$ —	\$ —	\$ —
<b>Long-Term Derivative Assets:</b>								
	CL&P	Level 3	74.2	(2.3)	71.9	71.9	(5.3)	66.6
<b>Current Derivative Liabilities:</b>								
	CL&P	Level 3	(55.1)	—	(55.1)	(54.4)	—	(54.4)
	Other	Level 2	—	—	—	(4.5)	—	(4.5)
<b>Long-Term Derivative Liabilities:</b>								
	CL&P	Level 3	(379.5)	—	(379.5)	(376.9)	—	(376.9)
	Other	Level 2	—	—	—	(0.4)	—	(0.4)

<sup>(1)</sup> Amounts represent derivative assets and liabilities that Eversource elected to record net on the balance sheets. These amounts are subject to master netting agreements or similar agreements for which the right of offset exists.

The business activities that result in the recognition of derivative assets also create exposure to various counterparties. As of December 31, 2018, Eversource's and CL&P's derivative assets were exposed to counterparty credit risk and contracted with investment grade entities.

For further information on the fair value of derivative contracts, see Note 11, "Summary of Significant Accounting Policies – Fair Value Measurements," and Note 1J, "Summary of Significant Accounting Policies – Derivative Accounting," to the financial statements.

#### Derivative Contracts at Fair Value with Offsetting Regulatory Amounts

*Commodity Supply and Price Risk Management* : As required by regulation, CL&P, along with UI, has capacity-related contracts with generation facilities. CL&P has a sharing agreement with UI, with 80 percent of the costs or benefits of each contract borne by or allocated to CL&P and 20 percent borne by or allocated to UI. The combined capacity of these contracts is 787 MW. The capacity contracts extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set capacity price and the capacity market price received in the ISO-NE capacity markets. In addition, CL&P has a contract to purchase 0.1 million MWh of energy per year through 2020.

As of December 31, 2018 and 2017, Eversource had New York Mercantile Exchange ("NYMEX") financial contracts for natural gas futures in order to reduce variability associated with the price of 12.5 million and 9.5 million MMBtu of natural gas, respectively.

For the years ended December 31, 2018, 2017 and 2016, there were losses of \$25.0 million, \$29.0 million and \$125.5 million, respectively, deferred as regulatory costs, which reflect the change in fair value associated with Eversource's derivative contracts.

#### Fair Value Measurements of Derivative Instruments

Derivative contracts classified as Level 2 in the fair value hierarchy relate to the financial contracts for natural gas futures. Prices are obtained from broker quotes and are based on actual market activity. The contracts are valued using NYMEX natural gas prices. Valuations of these contracts also incorporate discount rates using the yield curve approach.

The fair value of derivative contracts classified as Level 3 utilizes significant unobservable inputs. The fair value is modeled using income techniques, such as discounted cash flow valuations adjusted for assumptions related to exit price. Significant observable inputs for valuations of these contracts include energy and energy-related product prices in future years for which quoted prices in an active market exist. Fair value measurements categorized in Level 3 of the fair value hierarchy are prepared by individuals with expertise in valuation techniques, pricing of energy and energy-related products, and accounting requirements. The future power and capacity prices for periods that are not quoted in an active market or established at auction are based on available market data and are escalated based on estimates of inflation in order to address the full term of the contract.

Valuations of derivative contracts using a discounted cash flow methodology include assumptions regarding the timing and likelihood of scheduled payments and also reflect non-performance risk, including credit, using the default probability approach based on the counterparty's credit rating for assets and the Company's credit rating for liabilities. Valuations incorporate estimates of premiums or discounts that would be required by a market participant to arrive at an exit price, using historical market transactions adjusted for the terms of the contract.

The following is a summary of CL&P's Level 3 derivative contracts and the range of the significant unobservable inputs utilized in the valuations over the duration of the contracts:

CL&P	As of December 31,											
	2018					2017						
	Range			Period Covered		Range			Period Covered			
Capacity Prices	\$	4.30	—	7.44	per kW-Month	2022 - 2026	\$	5.00	—	8.70	per kW-Month	2021 - 2026
Forward Reserve		0.75	—	1.78	per kW-Month	2019 - 2024		1.00	—	2.00	per kW-Month	2018 - 2024

Exit price premiums of 4.2 percent through 15.7 percent are also applied to these contracts and reflect the uncertainty and illiquidity premiums that would be required based on the most recent market activity available for similar type contracts.

Significant increases or decreases in future capacity or forward reserve prices in isolation would decrease or increase, respectively, the fair value of the derivative liability. Any increases in risk premiums would increase the fair value of the derivative liability. Changes in these fair values are recorded as a regulatory asset or liability and do not impact net income.

*Valuations using significant unobservable inputs:* The following table presents changes in the Level 3 category of derivative assets and derivative liabilities measured at fair value on a recurring basis. The derivative assets and liabilities are presented on a net basis.

CL&P (Millions of Dollars)	For the Years Ended December 31,	
	2018	2017
<u>Derivatives, Net:</u>		
Fair Value as of Beginning of Period	\$ (362.3)	\$ (420.5)
Net Realized/Unrealized Losses Included in Regulatory Assets and Liabilities	(32.0)	(9.5)
Settlements	37.8	67.7
Fair Value as of End of Period	\$ (356.5)	\$ (362.3)

## 5. MARKETABLE SECURITIES

Eversource holds marketable securities that are primarily used to fund certain non-qualified executive benefits. The trusts that hold marketable securities are not subject to regulatory oversight by state or federal agencies. CYAPC and YAEC maintain legally restricted trusts, each of which holds marketable securities, to fund the spent nuclear fuel removal obligations of their nuclear fuel storage facilities. In December 2018, CYAPC paid \$145 million from its trust to the DOE to partially settle the pre-1983 spent nuclear fuel obligation.

*Equity Securities:* In accordance with new accounting guidance, unrealized gains and losses on equity securities are recorded in Other Income, Net on the statements of income. The fair value of equity securities subject to this guidance as of December 31, 2018 and 2017 was \$ 44.0 million and \$52.5 million, respectively. For the year ended December 31, 2018, there were unrealized losses of \$4.3 million recorded in Other Income, Net related to these equity securities. For the year ended December 31, 2017, the unrealized gains and losses on these equity securities were recorded in Accumulated Other Comprehensive Income on the balance sheet. Dividend income is recorded in Other Income, Net when dividends are declared.

Eversource's equity securities also include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts, which had fair values of \$ 200.0 million and \$261.3 million as of December 31, 2018 and 2017, respectively. Unrealized gains and losses for these spent nuclear fuel trusts are subject to regulatory accounting treatment and are recorded in Marketable Securities with the corresponding offset to Other Long-Term Liabilities on the balance sheets, with no impact on the statements of income.

*Available-for-Sale Debt Securities:* The following is a summary of the available-for-sale debt securities, which are recorded at fair value and are included in current and long-term Marketable Securities on the balance sheets.

Eversource (Millions of Dollars)	As of December 31,							
	2018				2017			
	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value
Debt Securities	\$ 190.0	\$ 0.4	\$ (4.0)	\$ 186.4	\$ 284.9	\$ 3.2	\$ (1.1)	\$ 287.0

Eversource's debt securities include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts in the amounts of \$143.9 million and \$242.3 million as of December 31, 2018 and 2017, respectively.

Unrealized gains and losses on available-for-sale debt securities held in Eversource's non-qualified benefit trust are recorded in Accumulated Other Comprehensive Income. There have been no significant unrealized losses, other-than-temporary impairments, or credit losses for the years ended December 31, 2018 or 2017. Factors considered in determining whether a credit loss exists include the duration and severity of the impairment, adverse conditions specifically affecting the issuer, and the payment history, ratings and rating changes of the security. For asset-backed debt securities, underlying collateral and expected future cash flows are also evaluated.

As of December 31, 2018, the contractual maturities of available-for-sale debt securities were as follows:

Eversource (Millions of Dollars)	Amortized Cost	Fair Value
Less than one year <sup>(1)</sup>	\$ 30.5	\$ 30.3
One to five years	29.2	28.9
Six to ten years	43.6	42.9
Greater than ten years	86.7	84.3
<b>Total Debt Securities</b>	<b>\$ 190.0</b>	<b>\$ 186.4</b>

<sup>(1)</sup> Amounts in the Less than one year category include securities in the CYAPC and YAEC spent nuclear fuel trusts, which are restricted and are classified in long-term Marketable Securities on the balance sheets.

**Realized Gains and Losses:** Realized gains and losses are recorded in Other Income, Net for Eversource's benefit trust and are offset in Other Long-Term Liabilities for CYAPC and YAEC. Eversource utilizes the specific identification basis method for the Eversource non-qualified benefit trust, and the average cost basis method for the CYAPC and YAEC spent nuclear fuel trusts to compute the realized gains and losses on the sale of marketable securities. For the year ended December 31, 2017, Eversource recognized net realized gains of \$9.8 million on the sales of available-for-sale securities held in the benefit trust. The proceeds of the sales were re-invested in the Eversource benefit trust. There were no similar sales for the year ended December 31, 2018.

**Fair Value Measurements:** The following table presents the marketable securities recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

Eversource (Millions of Dollars)	As of December 31,	
	2018	2017
<b>Level 1:</b>		
Mutual Funds and Equities	\$ 244.0	\$ 313.8
Money Market Funds	25.9	23.3
<b>Total Level 1</b>	<b>\$ 269.9</b>	<b>\$ 337.1</b>
<b>Level 2:</b>		
U.S. Government Issued Debt Securities (Agency and Treasury)	\$ 79.6	\$ 70.2
Corporate Debt Securities	39.5	50.9
Asset-Backed Debt Securities	14.0	21.2
Municipal Bonds	19.2	110.7
Other Fixed Income Securities	8.2	10.7
<b>Total Level 2</b>	<b>\$ 160.5</b>	<b>\$ 263.7</b>
<b>Total Marketable Securities</b>	<b>\$ 430.4</b>	<b>\$ 600.8</b>

U.S. government issued debt securities are valued using market approaches that incorporate transactions for the same or similar bonds and adjustments for yields and maturity dates. Corporate debt securities are valued using a market approach, utilizing recent trades of the same or similar instruments and also incorporating yield curves, credit spreads and specific bond terms and conditions. Asset-backed debt securities include collateralized mortgage obligations, commercial mortgage backed securities, and securities collateralized by auto loans, credit card loans or receivables. Asset-backed debt securities are valued using recent trades of similar instruments, prepayment assumptions, yield curves, issuance and maturity dates, and tranche information. Municipal bonds are valued using a market approach that incorporates reported trades and benchmark yields. Other fixed income securities are valued using pricing models, quoted prices of securities with similar characteristics, and discounted cash flows.

## 6. ASSET RETIREMENT OBLIGATIONS

Eversource, including CL&P, NSTAR Electric and PSNH, recognizes a liability for the fair value of an ARO on the obligation date if the liability's fair value can be reasonably estimated, even if it is conditional on a future event. Settlement dates and future costs are reasonably estimated when sufficient information becomes available. Management has identified various categories of AROs, primarily CYAPC's and YAEC's obligation to dispose of spent nuclear fuel and high level waste, and also certain assets containing asbestos and hazardous contamination. Management has performed fair value calculations reflecting expected probabilities for settlement scenarios.

The fair value of an ARO is recorded as a liability in Other Long-Term Liabilities with a corresponding amount included in Property, Plant and Equipment, Net on the balance sheets. The ARO assets are depreciated, and the ARO liabilities are accreted over the estimated life of the obligation and the corresponding credits are recorded as accumulated depreciation and ARO liabilities, respectively. As the electric and natural gas companies are rate-regulated on a cost-of-service basis, these companies apply regulatory accounting guidance and both the depreciation and accretion costs associated with these companies' AROs are recorded as increases to Regulatory Assets on the balance sheets.

A reconciliation of the beginning and ending carrying amounts of ARO liabilities is as follows:

(Millions of Dollars)	As of December 31,							
	2018				2017			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Balance as of Beginning of Year	\$ 419.1	\$ 31.5	\$ 44.6	\$ 25.0	\$ 426.4	\$ 36.0	\$ 42.6	\$ 23.5
Liabilities Incurred During the Year	11.3	—	11.3	—	0.2	0.1	0.1	—
Liabilities Settled During the Year	(36.6)	—	—	(21.5)	(19.3)	(1.0)	(0.2)	—
Accretion	25.5	2.0	2.2	0.5	26.3	2.3	2.1	1.5
Revisions in Estimated Cash Flows	46.9	—	14.3	—	(14.5)	(5.9)	—	—
Balance as of End of Year	\$ 466.2	\$ 33.5	\$ 72.4	\$ 4.0	\$ 419.1	\$ 31.5	\$ 44.6	\$ 25.0

Eversource's amounts include CYAPC and YAEC's AROs of \$339.9 million and \$301.5 million as of December 31, 2018 and 2017, respectively. The fair value of the ARO for CYAPC and YAEC includes uncertainties of the fuel off-load dates related to the DOE's timing of performance regarding its obligation to dispose of the spent nuclear fuel and high level waste and other assumptions, including discount rates. The incremental asset recorded as an offset to the ARO liability was fully depreciated since the plants have no remaining useful life. Any changes in the ARO liability are recorded with a corresponding offset to the related regulatory asset. The assets held in the CYAPC and YAEC spent nuclear fuel trusts are restricted for settling the ARO and all other nuclear fuel storage obligations. For further information on the assets held in the spent nuclear fuel trusts, see Note 5, "Marketable Securities," to the financial statements.

The increase in the ARO balance at NSTAR Electric for the year ended December 31, 2018 was due to the recording of new liabilities associated with new solar sites placed into service and the replacement of certain distribution cables, and revised remediation costs for existing AROs related to asbestos and hazardous contamination. The decrease in the ARO balance at PSNH for the year ended December 31, 2018 was a result of the generation divestiture and the securitization of remaining generation costs. See Note 13, "Generation Asset Sale," to the financial statements for further information on the PSNH generation divestiture.

## 7. SHORT-TERM DEBT

*Short-Term Debt Borrowing Limits:* The amount of short-term borrowings that may be incurred by CL&P, NSTAR Electric and NPT is subject to periodic approval by the FERC. Because the NHPUC has jurisdiction over PSNH's short-term debt, PSNH is not currently required to obtain FERC approval for its short-term borrowings. On November 30, 2017, the FERC granted authorization that allows CL&P to issue total short-term borrowings in an aggregate principal amount not to exceed \$600 million outstanding at any one time, through December 31, 2019. On November 30, 2017, the FERC granted authorization that allows NSTAR Electric to issue total short-term borrowings in an aggregate principal amount not to exceed \$655 million outstanding at any one time, through December 30, 2019. On December 3, 2018, FERC authorized NPT to issue up to an aggregate of \$800 million in short-term debt and long-term debt through December 31, 2020.

PSNH is authorized by regulation of the NHPUC to incur short-term borrowings up to 10 percent of net fixed plant plus an additional \$60 million until further ordered by the NHPUC. As of December 31, 2018, PSNH's short-term debt authorization under the 10 percent of net fixed plant test plus \$60 million totaled approximately \$331 million.

CL&P's certificate of incorporation contains preferred stock provisions restricting the amount of unsecured debt that CL&P may incur, including limiting unsecured indebtedness with a maturity of less than 10 years to 10 percent of total capitalization. As of December 31, 2018, CL&P had \$758.1 million of unsecured debt capacity available under this authorization.

Yankee Gas and NSTAR Gas are not required to obtain approval from any state or federal authority to incur short-term debt.

*Commercial Paper Programs and Credit Agreements:* Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas and Yankee Gas are also parties to a five-year \$1.45 billion revolving credit facility. Effective December 10, 2018, the revolving credit facility's termination date was extended for one additional year to December 8, 2023. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility. Effective December 10, 2018, the revolving credit facility's termination date was extended for one additional year to December 8, 2023. The revolving credit facility serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

(Millions of Dollars)	Borrowings Outstanding as of December 31,		Available Borrowing Capacity as of December 31,		Weighted-Average Interest Rate as of December 31,	
	2018	2017	2018	2017	2018	2017
	Eversource Parent Commercial Paper Program	\$ 631.5	\$ 979.3	\$ 818.5	\$ 470.7	2.77%
NSTAR Electric Commercial Paper Program	278.5	234.0	371.5	416.0	2.50%	1.55%

There were no borrowings outstanding on either the Eversource parent or NSTAR Electric revolving credit facilities as of December 31, 2018 or 2017. Eversource's water distribution segment has a \$100.0 million revolving credit facility, which expires on August 19, 2019, and there were no amounts outstanding as of December 31, 2018 and \$76.0 million outstanding as of December 31, 2017.

Amounts outstanding under the commercial paper programs and revolving credit facility are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets as all borrowings are outstanding for no more than 364 days at one time. As a result of the Eversource parent long-term debt issuances on January 8, 2018, the net proceeds of which were used to repay short-term borrowings outstanding under its commercial paper program, \$201.2 million of commercial paper borrowings under the Eversource parent commercial paper program were reclassified as Long-Term Debt as of December 31, 2017.

Under the credit facilities described above, Eversource and its subsidiaries must comply with certain financial and non-financial covenants, including a consolidated debt to total capitalization ratio. As of December 31, 2018 and 2017, Eversource and its subsidiaries were in compliance with these covenants. If Eversource or its subsidiaries were not in compliance with these covenants, an event of default would occur requiring all outstanding borrowings by such borrower to be repaid, and additional borrowings by such borrower would not be permitted under its respective credit facility.

We believe the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with our existing borrowing availability and access to financial markets for the issuance of new long-term debt, will be sufficient to meet any working capital and future operating requirements, and capital investment forecast opportunities.

*Intercompany Borrowings:* Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. In addition, growth in Eversource's key business initiatives requires cash infusion to those subsidiaries. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2018, there were intercompany loans from Eversource parent to PSNH of \$57.0 million. As of December 31, 2017, there were intercompany loans from Eversource parent of \$69.5 million to CL&P and \$262.9 million to PSNH. Intercompany loans from Eversource parent are included in Notes Payable to Eversource Parent and are classified in current liabilities on the respective subsidiary's balance sheets.

## 8. LONG-TERM DEBT

Details of long-term debt outstanding are as follows:

CL&P (Millions of Dollars)	As of December 31,	
	2018	2017
First Mortgage Bonds:		
7.875% 1994 Series D due 2024	\$ 139.8	\$ 139.8
5.750% 2004 Series B due 2034	130.0	130.0

NSTAR Gas 4.09% Series P First Mortgage Bonds	September 2018	100.0	October 2048	Repaid short-term borrowings

- <sup>(1)</sup> These notes are part of the same series issued by Eversource parent in March 2016. The aggregate outstanding principal amount of these notes is now \$450 million .

As a result of the Eversource parent debt issuances in January 2018, \$446.8 million of current portion of long-term debt related to two Eversource parent issuances maturing in 2018 and \$201.2 million of commercial paper borrowings were reclassified to Long-Term Debt as of December 31, 2017.

*Long-Term Debt Issuance Authorizations:* On August 1, 2018, the DPU approved NSTAR Gas' request for authorization to issue up to \$200 million in long-term debt through December 31, 2019. On December 3, 2018, FERC authorized NPT to issue up to an aggregate of \$800 million in short-term debt and long-term debt through December 31, 2020.

*Long-Term Debt Provisions:* The utility plant of CL&P, PSNH, Yankee Gas, NSTAR Gas and a portion of Aquarion is subject to the lien of each company's respective first mortgage bond indenture. The Eversource parent, NSTAR Electric and certain Aquarion debt is unsecured. Additionally, the long-term debt agreements provide that Eversource and certain of its subsidiaries must comply with certain covenants as are customarily included in such agreements, including equity requirements for NSTAR Electric and NSTAR Gas. Under the equity requirements, NSTAR Electric's and Aquarion's senior notes must maintain a certain consolidated indebtedness to capitalization ratio as of the end of any fiscal quarter and NSTAR Gas' outstanding long-term debt must not exceed equity.

CL&P's obligation to repay the PCRBs is secured by first mortgage bonds. The first mortgage bonds contain similar terms and provisions as the applicable series of PCRBs. If CL&P fails to meet its obligations under the first mortgage bonds, then the holder of the first mortgage bonds (the issuer of the PCRBs) would have rights under the first mortgage bonds. CL&P's tax-exempt PCRBs will be subject to redemption at par on or after September 1, 2021.

Certain secured and unsecured long-term debt securities are callable at redemption price or are subject to make-whole provisions.

Eversource, NSTAR Electric, Yankee Gas and Aquarion have certain long-term debt agreements that contain cross-default provisions. No other debt issuances contain cross-default provisions as of December 31, 2018 .

*Pre-1983 Spent Nuclear Fuel Obligation:* Under the Nuclear Waste Policy Act of 1982, the DOE is responsible for the selection and development of repositories for, and the disposal of, spent nuclear fuel and high-level radioactive waste. CYAPC is obligated to pay the DOE for the costs to dispose of spent nuclear fuel and high-level radioactive waste generated prior to April 7, 1983 (pre-1983 Spent Nuclear Fuel) and recorded an accrual for the full liability thereof to the DOE. This liability accrues interest costs at the 3-month Treasury bill yield rate. For nuclear fuel used to generate electricity prior to April 7, 1983, payment may be made any time prior to the first delivery of spent fuel to the DOE. Fees for disposal of nuclear fuel burned on or after April 7, 1983 were billed to member companies and paid to the DOE.

As of December 31, 2018 and 2017, as a result of consolidating CYAPC, Eversource has consolidated \$ 39.5 million and \$181.4 million, respectively, in pre-1983 spent nuclear fuel obligations to the DOE. In December 2018, CYAPC paid \$145 million to the DOE to partially settle this obligation. The obligation includes accumulated interest costs of \$29.0 million and \$132.6 million as of December 31, 2018 and 2017, respectively. CYAPC maintains a trust to fund amounts due to the DOE for the disposal of pre-1983 spent nuclear fuel. For further information, see Note 5, "Marketable Securities," to the financial statements.

*Long-Term Debt Maturities:* Long-term debt maturities on debt outstanding for the years 2019 through 2023 and thereafter are shown below. These amounts exclude the CYAPC pre-1983 spent nuclear fuel obligation, net unamortized premiums, discounts and debt issuance costs, and other fair value adjustments as of December 31, 2018:

(Millions of Dollars)	Eversource	CL&P	NSTAR Electric	PSNH
2019	\$ 801.1	\$ 250.0	\$ —	\$ 150.0
2020	296.1	—	95.0	—
2021	1,033.5	—	250.0	282.0
2022	1,188.9	—	400.0	—
2023	1,665.2	400.0	80.0	325.0
Thereafter	7,977.7	2,615.3	2,140.0	50.0
Total	\$ 12,962.5	\$ 3,265.3	\$ 2,965.0	\$ 807.0

## 9. RATE REDUCTION BONDS AND VARIABLE INTEREST ENTITIES

*Rate Reduction Bonds:* PSNH Funding LLC 3 (PSNH Funding) is a bankruptcy remote, special purpose, wholly-owned subsidiary of PSNH. PSNH Funding was formed solely to issue rate reduction bonds (RRBs) to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs in multiple tranches with a weighted average interest rate of 3.66 percent, and final maturity dates ranging from 2026 to 2035. The RRBs are expected to be repaid by February 1, 2033. RRB payments consist of principal and interest and will be paid semi-annually, beginning on February 1, 2019. The RRBs were issued pursuant to a finance order issued by the NHPUC on January 30, 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets.

The proceeds were used by PSNH Funding to purchase PSNH's stranded cost asset-recovery property, including its vested property right to bill, collect and adjust a non-bypassable stranded cost recovery charge from PSNH's retail customers. The collections will be used to pay principal, interest and other costs in connection with the RRBs. The RRBs are secured by the stranded cost asset-recovery property. Cash collections from the stranded cost recovery charges and funds on deposit in trust accounts are the sole source of funds to satisfy the debt obligation. PSNH is not the owner of the RRBs, and PSNH Funding's assets and revenues are not available to pay PSNH's creditors. The RRBs are non-recourse senior secured obligations of PSNH Funding and are not insured or guaranteed by PSNH or Eversource Energy.

PSNH Funding is considered a variable interest entity (VIE) primarily because the equity capitalization is insufficient to support its operations. PSNH has the power to direct the significant activities of the VIE and is most closely associated with the VIE as compared to other interest holders. Therefore, PSNH is considered the primary beneficiary and consolidates PSNH Funding in its consolidated financial statements. The following tables summarize the impact of PSNH Funding on PSNH's balance sheet and income statement:

(Millions of Dollars)	As of December 31, 2018	
<b>Balance Sheet:</b>		
Restricted Cash - Current Portion (included in Prepayments and Other Current Assets)	\$	47.5
Restricted Cash - Long-Term Portion (included in Other Long-Term Assets)		3.2
Securitized Stranded Cost (included in Regulatory Assets)		608.4
Other Regulatory Liabilities (included in Regulatory Liabilities)		5.8
Accrued Interest (included in Other Current Liabilities)		14.4
Rate Reduction Bonds - Current Portion		52.3
Rate Reduction Bonds - Long-Term Portion		583.3
<b>Income Statement:</b>		
For the Year Ended December 31, 2018		
Amortization of RRB Principal (included in Amortization of Regulatory Assets, Net)	\$	27.3
Interest Expense on RRB Principal (included in Interest Expense)		14.4

*Variable Interest Entities - Other:* The Company's variable interests outside of the consolidated group include contracts that are required by regulation and provide for regulatory recovery of contract costs and benefits through customer rates. Eversource, CL&P and NSTAR Electric hold variable interests in VIEs through agreements with certain entities that own single renewable energy or peaking generation power plants, with other independent power producers and with transmission businesses. Eversource, CL&P and NSTAR Electric do not control the activities that are economically significant to these VIEs or provide financial or other support to these VIEs. Therefore, Eversource, CL&P and NSTAR Electric do not consolidate these VIEs.

## 10. EMPLOYEE BENEFITS

### A. Pension Benefits and Postretirement Benefits Other Than Pension

Eversource provides defined benefit retirement plans ("Pension Plans") that cover eligible employees and are subject to the provisions of ERISA, as amended by the PPA of 2006. Eversource's policy is to annually fund the Pension Plans in an amount at least equal to an amount that will satisfy all federal funding requirements. In addition to the Pension Plans, Eversource maintains non-qualified defined benefit retirement plans ("SERP Plans") which provide benefits in excess of Internal Revenue Code limitations to eligible participants consisting of current and retired employees.

Eversource also provides defined benefit postretirement plans ("PBOP Plans") that provide life insurance and a health reimbursement arrangement created for the purpose of reimbursing retirees and dependents for health insurance premiums and certain medical expenses to eligible employees that met certain age and service eligibility requirements. The benefits provided under the PBOP Plans are not vested, and the Company has the right to modify any benefit provision subject to applicable laws at that time. Eversource annually funds postretirement costs through tax deductible contributions to external trusts.

The Pension, SERP and PBOP Plans cover eligible employees, including, among others, employees of the regulated companies. Because the regulated companies recover retiree benefit costs from customers through rates, regulatory assets are recorded in lieu of recording an adjustment to Accumulated Other Comprehensive Income/(Loss) for the funded status of the Pension, SERP and PBOP Plans. Regulatory accounting is also applied to the portions of the Eversource Service retiree benefit costs that support the regulated companies, as these costs are also recovered from customers. Adjustments to the Pension and PBOP Plans funded status for the unregulated companies are recorded on an after-tax basis to Accumulated Other Comprehensive Income/(Loss). For further information, see Note 2, "Regulatory Accounting," and Note 16, "Accumulated Other Comprehensive Income/(Loss)," to the financial statements.

The difference between the actual return and calculated expected return on plan assets for the Pension and PBOP Plans is reflected as a component of unamortized actuarial gains or losses, which are recorded in Regulatory Assets or Accumulated Other Comprehensive Income/(Loss). Unamortized actuarial gains or losses are amortized as a component of pension and PBOP expense over the estimated average future employee service period.

*Pension and SERP Plans:* The Pension and SERP Plans are accounted for under the multiple-employer approach, with each operating company's balance sheet reflecting its share of the funded status of the plans. Although Eversource maintains marketable securities in a benefit trust, the SERP Plans do not contain any assets. For further information, see Note 5, "Marketable Securities," to the financial statements. The following table provides information on the Pension and SERP Plan benefit obligations, fair values of Pension Plan assets, and funded status:

	Pension and SERP							
	As of December 31, 2018				As of December 31, 2017

Increase due to acquisition of Aquarion	—	—	—	—	100.7	—	—	—
Fair Value of Pension Plan Assets as of End of Year	\$ 4,573.9	\$ 918.4	\$ 1,222.1	\$ 506.6	\$ 4,739.5	\$ 963.0	\$ 1,260.8	\$ 539.5
Funded Status as of December 31st	\$ (946.1)	\$ (242.0)	\$ (14.4)	\$ (104.1)	\$ (1,197.0)	\$ (312.2)	\$ (90.2)	\$ (102.7)

In 2018, there was an increase to the discount rate used to calculate the funded status of the Eversource pension liability, which resulted in a decrease to Eversource's pension liability of approximately \$465 million as of December 31, 2018, which was partially offset by changes in actual plan experience and changes in other assumptions.

In 2017, there was a decrease to the discount rate used to calculate the funded status of the Eversource pension liability, which resulted in an increase to Eversource's pension liability of approximately \$390 million as of December 31, 2017.

The pension and SERP Plans' funded status includes the current portion of the SERP liability totaling \$8.9 million and \$8.4 million as of December 31, 2018 and 2017, respectively, which is included in Other Current Liabilities on the balance sheets.

As of December 31, 2018 and 2017, the accumulated benefit obligation for the Pension and SERP Plans is as follows:

(Millions of Dollars)	Eversource	CL&P	NSTAR Electric	PSNH
2018	\$ 5,070.8	\$ 1,031.0	\$ 1,144.7	\$ 543.1
2017	5,583.6	1,179.2	1,260.1	597.2

The following actuarial assumptions were used in calculating the Pension and SERP Plans' year end funded status:

	Pension and SERP			
	As of December 31,			
	2018		2017	
Discount Rate	4.22%	— 4.45%	3.43%	— 3.75%
Compensation/Progression Rate	3.50%		3.50%	

The compensation rate for the Aquarion Plans was 4 percent as of December 31, 2018 and 2017.

*Pension and SERP Expense:* Eversource charges net periodic pension expense to its subsidiaries based on the actual participant demographic data for each subsidiary's participants. The actual investment return in the trust is allocated to each of the subsidiaries annually in proportion to the investment return expected to be earned during the year. The Company utilizes the spot rate methodology to estimate the discount rate for the service and interest cost components of pension expense, which provides a more precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve.

The components of net periodic benefit expense for the Pension and SERP Plans, prior to amounts capitalized as Property, Plant and Equipment or deferred as regulatory assets for future recovery, are shown below. The service cost component of net periodic benefit expense and the intercompany allocations, less the capitalized portions, are included in Operations and Maintenance expense on the statements of income. The remaining components of net periodic benefit costs are included in Other Income, Net on the statements of income. Pension and SERP expense reflected in the statements of cash flows for CL&P, NSTAR Electric and PSNH does not include the intercompany allocations or the corresponding capitalized and deferred portion, as these amounts are cash settled on a short-term basis.

(Millions of Dollars)	Pension and SERP			
	For the Year Ended December 31, 2018			
	Eversource	CL&P	NSTAR Electric	PSNH
Service Cost	\$ 84.8	\$ 21.4	\$ 17.4	\$ 11.2
Interest Cost	196.4	41.8	43.5	22.0
Expected Return on Pension Plan Assets	(391.6)	(79.1)	(104.9)	(43.6)
Actuarial Loss	145.7	29.1	41.1	11.6
Prior Service Cost	4.3	1.1	0.2	0.4
Total Net Periodic Benefit Expense/(Income)	\$ 39.6	\$ 14.3	\$ (2.7)	\$ 1.6
Intercompany Allocations	N/A	\$ 6.1	\$ 6.5	\$ 1.9

(Millions of Dollars)	Pension and SERP			
	For the Year Ended December 31, 2017			
	Eversource	CL&P	NSTAR Electric	PSNH
Service Cost	\$ 71.3	\$ 18.5	\$ 15.5	\$ 9.7
Interest Cost	188.0	41.6	42.7	21.2
Expected Return on Pension Plan Assets	(334.1)	(71.7)	(87.6)	(40.0)
Actuarial Loss	135.2	27.7	41.1	11.6
Prior Service Cost	4.5	1.5	0.6	0.5
Total Net Periodic Benefit Expense	\$ 64.9	\$ 17.6	\$ 12.3	\$ 3.0
Intercompany Allocations	N/A	\$ 9.8	\$ 9.1	\$ 3.3

<i>(Millions of Dollars)</i>	<b>Pension and SERP</b>			
	<b>For the Year Ended December 31, 2016</b>			
	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
Service Cost	\$ 75.0	\$ 18.8	\$ 16.3	\$ 9.9
Interest Cost	185.5	41.6	42.2	20.7
Expected Return on Pension Plan Assets	(317.9)	(72.1)	(85.1)	(38.6)
Actuarial Loss	125.7	25.4	39.9	9.9
Prior Service Cost	3.6	1.5	0.3	0.5
Total Net Periodic Benefit Expense	\$ 71.9	\$ 15.2	\$ 13.6	\$ 2.4
Intercompany Allocations	N/A	\$ 13.8	\$ 11.4	\$ 4.0

The following actuarial assumptions were used to calculate Pension and SERP expense amounts:

	<b>Pension and SERP</b>								
	<b>For the Years Ended December 31,</b>								
	<b>2018</b>			<b>2017</b>			<b>2016</b>		
Discount Rate	3.85%	—	4.62%	3.20%	—	3.90%	3.27%	—	4.89%
Expected Long-Term Rate of Return	8.25%			8.25%			8.25%		
Compensation/Progression Rate	3.50%			3.50%			3.50%		

For the Aquarion Plans, the long-term expected rate of return was 7 percent and the compensation rate was 4 percent for the year ended December 31, 2018.

The following is a summary of the changes in plan assets and benefit obligations recognized in Regulatory Assets and Other Comprehensive Income ("OCI") as well as amounts in Regulatory Assets and OCI that were reclassified as net periodic benefit expense during the years presented:

<i>(Millions of Dollars)</i>	<b>Regulatory Assets</b>				<b>OCI</b>	
	<b>For the Years Ended December 31,</b>				<b>For the Years Ended December 31,</b>	
	<b>2018</b>		<b>2017</b>		<b>2018</b>	<b>2017</b>
Actuarial Losses Arising During the Year	\$ 48.6	\$ 333.0	\$ 0.7	\$ 9.3		
Actuarial Losses Reclassified as Net Periodic Benefit Expense	(140.1)	(129.5)	(5.6)	(5.7)		
Actuarial Losses Securitized as Stranded Costs <sup>(1)</sup>	(36.7)	—	—	—

Prior Service Cost Reclassified as Net Periodic Benefit Expense	(3.9)	(4.1)	(0.4)	(0.4)		
Prior Service Cost Securitized as Stranded Costs <sup>(1)</sup>	(0.1)	—	—	—		

<sup>(1)</sup> These amounts were reclassified to securitized regulatory assets in connection with the divestiture of PSNH's generation business. For further information see Note 2, "Regulatory Accounting" to the financial statements.

The following is a summary of the remaining Regulatory Assets and Accumulated Other Comprehensive Income amounts that have not been recognized as components of net periodic benefit expense as of December 31, 2018 and 2017, as well as the amounts that are expected to be recognized as components in 2019:

<i>(Millions of Dollars)</i>	<b>Regulatory Assets as of December 31,</b>			<b>AOCI as of December 31,</b>		
	<b>2018</b>	<b>2017</b>	<b>Expected 2019 Expense</b>	<b>2018</b>	<b>2017</b>	<b>Expected 2019 Expense</b>
Actuarial Loss	\$ 1,807.6	\$ 1,935.8	\$ 140.6	\$ 80.8	\$ 85.7	\$ 5.6
Prior Service Cost	6.3	10.3	0.9	1.1	1.5	0.2

*PBOP Plans:* The PBOP Plans are accounted for under the multiple-employer approach, with each operating company's balance sheet reflecting its share of the funded status of the plans. The following table provides information on the PBOP Plan benefit obligations, fair values of plan assets, and funded status:

	<b>PBOP</b>							
	<b>As of December 31,</b>							
	<b>2018</b>				<b>2017</b>			
<i>(Millions of Dollars)</i>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
<b>Change in Benefit Obligation:</b>

Actuarial Gain/(Loss)	102.5	14.4	28.4	8.6	(81.8)	(18.5)	(13.2)	(11.9)
Benefits Paid	45.3	10.1	14.5	4.9	41.5	9.9	13.5	4.6
Employee Transfers	—	(0.1)	0.1	0.2	—	2.4	1.5	0.2
Increase due to acquisition of Aquarion	—	—	—	—	(61.7)	—	—	—
Benefit Obligation as of End of Year	\$ (841.5)	\$ (161.7)	\$ (246.3)	\$ (91.9)	\$ (948.6)	\$ (178.4)	\$ (278.6)	\$ (101.1)
<b>Change in Plan Assets:</b>								
Fair Value of Plan Assets as of Beginning of Year	\$ 922.2	\$ 135.9	\$ 405.5	\$ 79.0	\$ 815.8	\$ 129.2	\$ 361.6	\$ 73.2
Actual Return on Plan Assets	(36.6)	(5.2)	(17.4)	(2.9)	118.0	18.1	52.9	10.4
Employer Contributions	9.3	—	5.2	—	7.6	—	5.3	—
Benefits Paid	(45.3)	(10.1)	(14.5)	(4.9)	(41.5)	(9.9)	(13.5)	(4.6)
Employee Transfers	—	—	0.3	—	—	(1.5)	(0.8)	—
Increase due to acquisition of Aquarion	—	—	—	—	22.3	—	—	—
Fair Value of Plan Assets as of End of Year	\$ 849.6	\$ 120.6	\$ 379.1	\$ 71.2	\$ 922.2	\$ 135.9	\$ 405.5	\$ 79.0
Funded Status as of December 31st	\$ 8.1	\$ (41.1)	\$ 132.8	\$ (20.7)	\$ (26.4)	\$ (42.5)	\$ 126.9	\$ (22.1)

The Eversource funded status includes prepaid assets of \$33.4 million and \$13.1 million recorded in Other Long-Term Assets and liabilities of \$25.3 million and \$39.5 million included in Accrued Pension, SERP and PBOP on the balance sheets as of December 31, 2018 and 2017, respectively.

As of December 31, 2018, there was an increase in the discount rate used to calculate the funded status, resulting in a decrease in the Eversource PBOP liability of approximately \$88 million .

As of December 31, 2017, there was a decrease in the discount rate used to calculate the funded status, as compared to the discount rate as of December 31, 2016, resulting in an increase to the Eversource PBOP liability of approximately \$64 million .

The following actuarial assumptions were used in calculating the PBOP Plans' year end funded status:

	<b>PBOP</b>					
	<b>As of December 31,</b>					
	<b>2018</b>			<b>2017</b>		
Discount Rate	4.38%	—	4.41%	3.55%	—	3.70%

For the Eversource Service PBOP Plan, effective with the plan amendment that standardized plan designs and made benefit changes in August 2016, the health care cost trend rate is no longer applicable. For the Aquarion PBOP Plan, the health care trend rate is a range of 3.5 percent to 6.75 percent, with an ultimate rate of 3.5 percent to 5 percent in 2019 and 2023, for post-65 and pre-65 retirees, respectively.

*PBOP Expense:* Eversource charges net periodic postretirement benefits expense to its subsidiaries based on the actual participant demographic data for each subsidiary's participants. The actual investment return in the trust each year is allocated to each of the subsidiaries annually in proportion to the investment return expected to be earned during the year. The Company utilizes the spot rate methodology to estimate the discount rate for the service and interest cost components of PBOP expense, which provides a more precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve.

The components of net periodic benefit expense for the PBOP Plans, prior to amounts capitalized as Property, Plant and Equipment or deferred as regulatory assets on the balance sheets, are shown below. The service cost component of net periodic benefit expense and the intercompany allocations, less the capitalized portions, are included in Operations and Maintenance expense on the statements of income. The remaining components of net periodic benefit costs are included in Other Income, Net on the statements of income. PBOP expense reflected in the statements of cash flows for CL&P, NSTAR Electric and PSNH does not include the intercompany allocations or the corresponding capitalized portion, as these amounts are cash settled on a short-term basis.

<i>(Millions of Dollars)</i>	<b>PBOP</b>			
	<b>For the Year Ended December 31, 2018</b>			
	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>

The following actuarial assumptions were used to calculate PBOP expense amounts:

	<b>PBOP</b>								
	<b>For the Years Ended December 31,</b>								
	<b>2018</b>		<b>2017</b>		<b>2016</b>				
Discount Rate	3.28%	—	3.94%	3.48%	—	4.64%	2.88%	—	4.09%
Expected Long-Term Rate of Return	8.25%		8.25%		8.25%				

For the Aquarion Plan, the expected long-term rate of return was 7 percent and the health care trend rate was 7 percent for the year ended December 31, 2018.

The following is a summary of the changes in plan assets and benefit obligations recognized in Regulatory Assets and OCI as well as amounts recognized in Regulatory Assets and OCI that were reclassified as net periodic benefit (expense)/income during the years presented:

(Millions of Dollars)	Regulatory Assets		OCI	
	For the Years Ended December 31,		For the Years Ended December 31,	
	2018	2017	2018	2017
Actuarial Losses/(Gains) Arising During the Year	\$ 6.4	\$ 44.8	\$ (1.2)	\$ 2.6
Actuarial Losses Reclassified as Net Periodic Benefit Expense	(9.9)	(8.6)	(0.4)	(0.5)
Actuarial Losses Securitized as Stranded Costs <sup>(1)</sup>	(0.8)	—	—	—
Prior Service (Credit)/Cost Arising During the Year	1.3	(4.0)	—	(0.1)
Prior Service Credit/(Cost) Reclassified as Net Periodic Benefit Income/(Expense)	23.6	22.3	—	(0.7)
Prior Service Cost Securitized as Stranded Costs <sup>(1)</sup>	(1.3)	—	—	—

<sup>(1)</sup> These amounts were reclassified to securitized regulatory assets in connection with the divestiture of PSNH's generation business. For further information see Note 2, "Regulatory Accounting" to the financial statements.

The following is a summary of the remaining Regulatory Assets and Accumulated Other Comprehensive Income amounts that have not been recognized as components of net periodic benefit expense as of December 31, 2018 and 2017, as well as the amounts that are expected to be recognized as components in 2019:

(Millions of Dollars)	Regulatory Assets as of December 31,			AOCI as of December 31,		
	2018	2017	Expected 2019 Expense	2018	2017	Expected 2019 Expense
Actuarial Loss	\$ 207.3	\$ 211.6	\$ 9.9	\$ 5.0	\$ 6.6	\$ 0.3
Prior Service (Credit)/Cost	(197.6)	(221.2)	(23.6)	2.6	2.6	0.2

*Estimated Future Benefit Payments:* The following benefit payments, which reflect expected future service, are expected to be paid by the Pension, SERP and PBOP Plans:

(Millions of Dollars)	2019	2020	2021	2022	2023	2024 - 2028
Pension and SERP	\$ 308.5	\$ 310.4	\$ 318.8	\$ 326.6	\$ 335.6	\$ 1,764.1
PBOP	58.4	58.5	58.6	58.3	57.8	277.4

*Eversource Contributions:* Based on the current status of the Pension Plans and federal pension funding requirements, Eversource currently expects to make contributions of approximately \$112 million in 2019, of which approximately \$44 million and \$10 million will be contributed by CL&P and PSNH, respectively. The remaining \$46 million is expected to be contributed by other Eversource subsidiaries, primarily Eversource Service. Eversource expects to make approximately \$11 million in contributions to the PBOP Plan in 2019, of which approximately \$6 million will be contributed by NSTAR Electric.

*Fair Value of Pension and PBOP Plan Assets:* Pension and PBOP funds are held in external trusts. Trust assets, including accumulated earnings, must be used exclusively for Pension and PBOP payments. Eversource's investment strategy for its Pension and PBOP Plans is to maximize the long-term rates of return on these plans' assets within an acceptable level of risk. The investment strategy for each asset category includes a diversification of asset types, fund strategies and fund managers and it establishes target asset allocations that are routinely reviewed and periodically rebalanced. PBOP assets are comprised of assets held in the PBOP Plan trust, as well as specific assets within the Pension Plan trust (401(h) assets). The investment policy and strategy of the 401(h) assets is consistent with that of the defined benefit pension plan. Eversource's expected long-term rates of return on Pension and PBOP Plan assets are based on target asset allocation assumptions and related expected long-term rates of return. In developing its expected long-term rate of return assumptions for the Pension and PBOP Plans, Eversource evaluated input from consultants, as well as long-term inflation assumptions and historical returns. For the year ended December 31, 2018, management has assumed long-term rates of return of 8.25 percent for the Eversource Service Pension and PBOP Plan assets. Management has assumed a 7 percent long-term rate of return for the Aquarion Plans.

These long-term rates of return are based on the assumed rates of return for the target asset allocations as follows:

	As of December 31,			
	2018		2017	
	Eversource Pension Plan and Tax-Exempt Assets Within PBOP Plan		Eversource Pension Plan and Tax-Exempt Assets Within PBOP Plan	
	Target Asset Allocation	Assumed Rate of Return	Target Asset Allocation	Assumed Rate of Return
Equity Securities:				
United States	15.0%	8.5%	21.5%	8.5%
Global	10.0%	8.75%	—%	—%
Non-United States	8.0%	8.5%	11.0%	8.5%
Emerging Markets	4.0%	10.0%	4.5%	10.0%
Debt Securities:				
Fixed Income	13.0%	4.0%	11.0%	4.0%
Public High Yield Fixed Income	4.0%	6.5%	4.0%	6.5%
Private Debt	15.0%	9.0%	15.0%	9.0%
Emerging Markets Debt	—%	—%	2.0%	6.5%
Private Equity	15.0%	12.0%	15.0%	12.0%
Real Assets	16.0%	7.5%	12.0%	7.5%
Hedge Funds	—%	—%	4.0%	6.0%

The taxable assets within the Eversource PBOP Plan have a target asset allocation of 70 percent equity securities and 30 percent fixed income securities. The target asset allocation for the Aquarion Pension Plans is 59 percent equity, 36 percent debt and 5 percent other. The target asset allocation for the Aquarion PBOP Plan is 59 percent equity and 41 percent debt.

The following table presents, by asset category, the Pension and PBOP Plan assets recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

(Millions of Dollars)	Pension Plan							
	Fair Value Measurements as of December 31,							
	2018				2017

Total	\$ 141.4	\$ 40.3	\$ 436.7	\$ 618.4	\$ 161.1	\$ 44.0	\$ 482.6	\$ 687.7
Add: 401(h) PBOP Assets <sup>(4)</sup>				231.2				234.5
Total PBOP Assets				\$ 849.6				\$ 922.2

<sup>(1)</sup> United States, Global, Non-United States and Emerging Markets equity securities that are uncategorized include investments in commingled funds and hedge funds that are overlaid with equity index swaps and futures contracts.

<sup>(2)</sup> Fixed Income investments that are uncategorized include investments in commingled funds, fixed income funds that invest in a variety of opportunistic and fixed income strategies, and hedge funds that are overlaid with fixed income futures.

<sup>(3)</sup> Real assets include real estate funds and hedge funds.

(4) The assets of the Pension Plan include a 401(h) account that has been allocated to provide health and welfare postretirement benefits under the PBOP Plan.

The Company values assets based on observable inputs when available. Equity securities, exchange traded funds and futures contracts classified as Level 1 in the fair value hierarchy are priced based on the closing price on the primary exchange as of the balance sheet date.

Fixed income securities, such as government issued securities, corporate bonds and high yield bond funds, are included in Level 2 and are valued using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. The pricing models utilize observable inputs such as recent trades for the same or similar instruments, yield curves, discount margins and bond structures. Swaps are valued using pricing models that incorporate interest rates and equity and fixed income index closing prices to determine a net present value of the cash flows.

Certain investments, such as commingled funds, private equity investments, real estate funds and hedge funds are valued using the NAV as a practical expedient. These investments are structured as investment companies offering shares or units to multiple investors for the purpose of providing a return. Commingled funds are recorded at NAV provided by the asset manager, which is based on the market prices of the underlying equity securities. Private Equity investments, Fixed Income partnership funds and Real Assets are valued using the NAV provided by the partnerships, which are based on discounted cash flows of the underlying investments, real estate appraisals or public market comparables of the underlying investments, or the NAV of underlying assets held in hedge funds. Assets valued at NAV are uncategorized in the fair value hierarchy.

## B. Defined Contribution Plans

Eversource maintains defined contribution plans on behalf of eligible participants. The Eversource 401k Plan provides for employee and employer contributions up to statutory limits. For eligible employees, the Eversource 401k Plan provides employer matching contributions of either 100 percent up to a maximum of three percent of eligible compensation or 50 percent up to a maximum of eight percent of eligible compensation. The Eversource 401k Plan also contains a K-Vantage feature for the benefit of eligible participants, which provides an additional annual employer contribution based on age and years of service. K-Vantage participants are not eligible to actively participate in the Eversource Pension Plan.

The total Eversource 401k Plan employer matching contributions, including the K-Vantage contributions, were as follows:

<i>(Millions of Dollars)</i>	Eversource		CL&P		NSTAR Electric		PSNH	
2018	\$	38.4	\$	5.0	\$	9.7	\$	3.3
2017		34.5		4.6		8.5		3.7
2016		31.8		4.5		8.1		3.4

## C. Share-Based Payments

Share-based compensation awards are recorded using a fair-value based method at the date of grant. Eversource, CL&P, NSTAR Electric and PSNH record compensation expense related to these awards, as applicable, for shares issued or sold to their respective employees and officers, as well as for the allocation of costs associated with shares issued or sold to Eversource's service company employees and officers that support CL&P, NSTAR Electric and PSNH.

*Eversource Incentive Plans:* Eversource maintains long-term equity-based incentive plans in which Eversource, CL&P, NSTAR Electric and PSNH employees, officers and board members are eligible to participate. The incentive plans authorize Eversource to grant up to 6,700,000 new shares for various types of awards, including RSUs and performance shares, to eligible employees, officers, and board members. As of December 31, 2018 and 2017, Eversource had 3,720,650 and 2,445,110 common shares, respectively, available for issuance under these plans.

Eversource accounts for its various share-based plans as follows:

- RSUs - Eversource records compensation expense, net of estimated forfeitures, on a straight-line basis over the requisite service period based upon the fair value of Eversource's common shares at the date of grant. The par value of RSUs is reclassified to Common Stock from APIC as RSUs become issued as common shares.
- Performance Shares - Eversource records compensation expense, net of estimated forfeitures, on a straight-line basis over the requisite service period. Performance shares vest based upon the extent to which Company goals are achieved. Vesting of outstanding performance shares is based upon both the Company's EPS growth over the requisite service period and the total shareholder return as compared to the Edison Electric Institute ("EEI") Index during the requisite service period. The fair value of performance shares is determined at the date of grant using a lattice model.

RSUs: Eversource granted RSUs under the annual long-term incentive programs that are subject to three -year graded vesting schedules for employees, and one -year graded vesting schedules, or immediate vesting, for board members. RSUs are paid in shares, reduced by amounts sufficient to satisfy withholdings for income taxes, subsequent to vesting. A summary of RSU transactions is as follows:

	RSUs (Units)	Weighted Average Grant-Date Fair Value
Outstanding as of December 31, 2017	717,039	\$ 49.29
Granted	286,315	\$ 56.69
Shares Issued	(201,386)	\$ 55.35
Forfeited	(19,603)	\$ 56.78
Outstanding as of December 31, 2018	782,365	\$ 50.25

The weighted average grant-date fair value of RSUs granted for the years ended December 31, 2018, 2017 and 2016 was \$56.69, \$55.97 and \$54.67, respectively. As of December 31, 2018 and 2017, the number and weighted average grant-date fair value of unvested RSUs was 424,119 and \$56.57 per share, and 388,269 and \$56.15 per share, respectively. During 2018, there were 216,572 RSUs at a weighted average grant-date fair value of \$56.72 per share that vested during the year and were either paid or deferred. As of December 31, 2018, 358,246 RSUs were fully vested and deferred and an additional 402,913 are expected to vest.

Performance Shares: Eversource granted performance shares under the annual long-term incentive programs that vest based upon the extent to which Company goals are achieved at the end of three-year performance measurement periods. Performance shares are paid in shares, after the performance measurement period. A summary of performance share transactions is as follows:

	Performance Shares (Units)	Weighted Average Grant-Date Fair Value
Outstanding as of December 31, 2017	510,565	\$ 55.45
Granted	184,355	\$ 56.77
Shares Issued	(178,258)	\$ 54.98
Forfeited	(17,098)	\$ 56.18
Outstanding as of December 31, 2018	499,564	\$ 56.08

The weighted average grant-date fair value of performance shares granted for the years ended December 31, 2018, 2017 and 2016 was \$56.77, \$55.70 and \$53.64, respectively. As of December 31, 2018 and 2017, the number and weighted average grant-date fair value of unvested performance shares was 366,995 and \$56.17 per share, and 331,207 and \$55.79 per share, respectively. During 2018, there were 131,349 performance shares at a weighted average grant-date fair value of \$56.08 per share that vested during the year and were either paid or deferred. As of December 31, 2018, 132,569 performance shares were fully vested and deferred.

Compensation Expense: The total compensation expense and associated future income tax benefits recognized by Eversource, CL&P, NSTAR Electric and PSNH for share-based compensation awards were as follows:

Eversource (Millions of Dollars)	For the Years Ended December 31,		
	2018	2017	2016
Compensation Expense	\$ 21.4	\$ 19.7	\$ 23.6
Future Income Tax Benefit	5.4	8.0	9.6

	For the Years Ended December 31,								
	2018			2017			2016		
(Millions of Dollars)	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Compensation Expense	\$ 7.8	\$ 7.7	\$ 2.9	\$ 7.0	\$ 7.0	\$ 3.2	\$ 9.1	\$ 8.2	\$ 3.5
Future Income Tax Benefit	2.0	1.9	0.7	2.9	2.8	1.3	3.7	3.3	1.4

As of December 31, 2018, there was \$22.3 million of total unrecognized compensation expense related to nonvested share-based awards for Eversource, including \$8.1 million for CL&P, \$8.0 million for NSTAR Electric and \$2.8 million for PSNH. This cost is expected to be recognized ratably over a weighted-average period of 1.73 years for Eversource and CL&P, and 1.72 years for NSTAR Electric and PSNH.

An income tax rate of 25 percent was used to estimate the tax effect on total share-based payments determined under the fair-value based method for all awards. During both 2018 and 2017, the Company generally settled fully vested RSUs and performance shares with the issuance of common shares purchased in the open market.

For the years ended December 31, 2018, 2017 and 2016, excess tax benefits associated with the distribution of stock compensation awards reduced income tax expense by \$1.5 million, \$2.9 million, and \$19.1 million, respectively, which increased cash flows from operating activities on the statements of cash flows.

## D. Other Retirement Benefits

Eversource provides retirement and other benefits for certain current and past company officers. These benefits are accounted for on an accrual basis and expensed over a period equal to the service lives of the employees. The actuarially-determined liability for these benefits, which is included in Other Long-Term Liabilities on the balance sheets, as well as the related expense included in Operations and Maintenance Expense on the income statements, are as follows:

Eversource (Millions of Dollars)	As of and For the Years Ended December 31,		
	2018	2017	2016
Actuarially-Determined Liability	\$ 49.1	\$ 53.4	\$ 54.2
Other Retirement Benefits Expense	2.7	2.8	2.9

(Millions of Dollars)	As of and For the Years Ended December 31,								
	2018			2017			2016

Eversource, CL&P, NSTAR Electric and PSNH file a consolidated federal income tax return and unitary, combined and separate state income tax returns. These entities are also parties to a tax allocation agreement under which taxable subsidiaries do not pay any more taxes than they would have otherwise paid had they filed a separate company tax return, and subsidiaries generating tax losses, if any, are paid for their losses when utilized.

Deferred tax assets and liabilities are recognized for the future tax effects of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The tax effect of temporary differences is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and relevant accounting authoritative literature. The tax effects of temporary differences that give rise to the net accumulated deferred income tax obligations are as follows:

(Millions of Dollars)	As of December 31,

**2017 Federal Legislation:** On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules and included numerous provisions that impacted corporations. In particular, the act reduced the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which were estimated to be approximately \$2.9 billion and included in regulatory liabilities as of December 31, 2018. In 2018, Eversource refunded \$ 5.0 million (\$ 4.4 million at PSNH and \$ 0.6 million at Yankee Gas) to customers. See Note 2, "Regulatory Accounting," to the financial statements for further information.

The Company assessed the applicable provisions in the act and recorded the associated impacts as of December 31, 2017. The Company recorded the provisional income tax amounts as of December 31, 2017 in accordance with SEC Staff Accounting Bulletin No. 118 ("SAB 118") issued by the SEC in December 2017, for changes pursuant to the act because the impacts could not be finalized upon issuance of the financial statements, but for which reasonable estimates could be determined. The Company has completed its evaluation of the impacts of the act as of December 31, 2018. The ultimate outcome was not materially different from the provisional estimates recorded as of December 31, 2017. While the Company has recorded the impacts of the act based on interpretation of the provisions as enacted, it is expected the U.S. Department of Treasury and the IRS will issue additional interpretative guidance in the future that could result in changes to previously finalized provisions. At this time, some of the states in which the Company does business have issued guidance regarding the act and the impact was not material.

*Carryforwards:* The following tables provide the amounts and expiration dates of state tax credit and loss carryforwards and federal tax credit and net operating loss carryforwards:

(Millions of Dollars)	As of December 31,									
	2018					2017				
	Eversource	CL&P	NSTAR Electric	PSNH	Expiration Range	Eversource	CL&P	NSTAR Electric	PSNH	Expiration Range
Federal Net Operating Loss	\$ 103.6	\$ —	\$ —	\$ —	2033 - 2037	\$ 197.3	\$ —	\$ —	\$ —	2027 - 2037
Federal Charitable Contribution	2.2	—	—	—	2020 - 2022	18.7	—	—	—	2017 - 2022
State Net Operating Loss	80.7	—	—	—	2019 - 2038	82.8	—	—	—	2028 - 2037
State Tax Credit	148.9	107.0	—	—	2018 - 2023	139.0	94.5	—	—	2017 - 2022
State Charitable Contribution	9.6	—	—	—	2019 - 2023	31.4	—	—	—	2017 - 2022

In 2018, the company increased its valuation allowance reserve for state credits by \$5.2 million ( \$4.4 million for CL&P), net of tax, to reflect an update for expired tax credits. In 2017, the Company increased its valuation allowance reserve for state credits by \$9.9 million ( \$1.8 million for CL&P), net of tax, to reflect an update for expired tax credits.

For 2018 and 2017, state credit and state loss carryforwards have been partially reserved by a valuation allowance of \$19.5 million and \$14.4 million (net of tax), respectively.

*Unrecognized Tax Benefits:* A reconciliation of the activity in unrecognized tax benefits, all of which would impact the effective tax rate if recognized, is as follows:

(Millions of Dollars)	Eversource	CL&P
Balance as of January 1, 2016	\$ 48.0	\$ 13.5
Gross Increases - Current Year	9.9	3.9
Gross Increases - Prior Year	0.2	0.2
Lapse of Statute of Limitations	(9.7)	(2.3)
Balance as of December 31, 2016	48.4	15.3
Gross Increases - Current Year	11.4	4.7
Gross Decreases - Prior Year	(0.9)	(0.5)
Lapse of Statute of Limitations	(7.2)	(1.4)
Balance as of December 31, 2017	51.7	18.1
Gross Increases - Current Year	9.2	3.2
Gross Decreases - Prior Year	(6.5)	(0.9)
Lapse of Statute of Limitations	(8.5)	(2.2)
Balance as of December 31, 2018	\$ 45.9	\$ 18.2

*Interest and Penalties:* Interest on uncertain tax positions is recorded and generally classified as a component of Other Interest Expense on the statements of income. However, when resolution of uncertainties results in the Company receiving interest income, any related interest benefit is recorded in Other Income, Net on the statements of income. No penalties have been recorded. The amount of interest expense/(income) on uncertain tax positions recognized and the related accrued interest payable/(receivable) are as follows:

(Millions of Dollars)	Other Interest Expense/(Income)			Accrued Interest Expense	
	For the Years Ended December 31,			As of December 31,	
	2018	2017	2016	2018	2017
Eversource	\$ (1.7)	\$ —	\$ (0.2)	\$ 0.1	\$ 1.8

*Tax Positions:* During 2018 and 2017, Eversource did not resolve any of its uncertain tax positions.

*Open Tax Years:* The following table summarizes Eversource, CL&P, NSTAR Electric and PSNH's tax years that remain subject to examination by major tax jurisdictions as of December 31, 2018 :

Description	Tax Years
Federal	2018
Connecticut	2015 - 2018
Massachusetts	2015 - 2018
New Hampshire	2016 - 2018

Eversource does not estimate to have an earnings impact related to unrecognized tax benefits during the next twelve months.

## 12. COMMITMENTS AND CONTINGENCIES

### A. Environmental Matters

*General:* Eversource, CL&P, NSTAR Electric and PSNH are subject to environmental laws and regulations intended to mitigate or remove the effect of past operations and improve or maintain the quality of the environment. These laws and regulations require the removal or the remedy of the effect on the environment of the disposal or release of certain specified hazardous substances at current and former operating sites. Eversource, CL&P, NSTAR Electric and PSNH have an active environmental auditing and training program and each believes it is substantially in compliance with all enacted laws and regulations.

Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. The approach used estimates the liability based on the most likely action plan from a variety of available remediation options, including no action required or several different remedies ranging from establishing institutional controls to full site remediation and monitoring. These liabilities are estimated on an undiscounted basis and do not assume that the amounts are recoverable from insurance companies or other third parties. The environmental reserves include sites at different stages of discovery and remediation and do not include any unasserted claims.

These reserve estimates are subjective in nature as they take into consideration several different remediation options at each specific site. The reliability and precision of these estimates can be affected by several factors, including new information concerning either the level of contamination at the site, the extent of Eversource's, CL&P's, NSTAR Electric's and PSNH's responsibility for remediation or the extent of remediation required, recently enacted laws and regulations or changes in cost estimates due to certain economic factors. It is possible that new information or future developments could require a reassessment of the potential exposure to required environmental remediation. As this information becomes available, management will continue to assess the potential exposure and adjust the reserves accordingly.

The amounts recorded as environmental reserves are included in Other Current Liabilities and Other Long-Term Liabilities on the balance sheets and represent management's best estimate of the liability for environmental costs, and take into consideration site assessment, remediation and long-term monitoring costs. The environmental reserves also take into account recurring costs of managing hazardous substances and pollutants, mandated expenditures to remediate contaminated sites and any other infrequent and non-recurring clean-up costs. A reconciliation of the activity in the environmental reserves is as follows:

<i>(Millions of Dollars)</i>	Eversource	CL&P	NSTAR Electric	PSNH
Balance as of January 1, 2017	\$ 65.8	\$ 4.9	\$ 3.8	\$ 5.3
Additions	6.2	0.5	1.8	1.0
Payments/Reductions	(17.1)	(0.7)	(2.9)	(0.6)
Balance as of December 31, 2017	54.9	4.7	2.7	5.7
Additions	23.5	1.9	9.7	—
Payments/Reductions	(13.7)	(1.2)	(1.5)	(0.3)
Balance as of December 31, 2018	\$ 64.7	\$ 5.4	\$ 10.9	\$ 5.4

The number of environmental sites for which remediation or long-term monitoring, preliminary site work or site assessment is being performed are as follows:

	Eversource	CL&P	NSTAR Electric	PSNH
2018	60	15	16	9
2017	59	14	15	10

The increase in the reserve balance was due primarily to the addition of environmental sites at NSTAR Electric and changes in cost estimates at certain MGP sites at our natural gas companies under investigation for which additional remediation will be required.

Included in the Eversource number of sites and reserve amounts above are former MGP sites that were operated several decades ago and manufactured gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which Eversource may have potential liability. The reserve balances related to these former MGP sites were \$50.1 million and \$49.0 million as of December 31, 2018 and 2017, respectively, and related primarily to the natural gas business segment.

As of December 31, 2018, for 7 environmental sites (2 for CL&P) that are included in the Company's reserve for environmental costs, the information known and the nature of the remediation options allow for the Company to estimate the range of losses for environmental costs. As of December 31, 2018, \$23.8 million (including \$0.7 million for CL&P) had been accrued as a liability for these sites, which represents the low end of the range of the liabilities for environmental costs. Management believes that additional losses of up to approximately \$20 million (\$1 million at CL&P) may be incurred in executing current remediation plans for these sites.

As of December 31, 2018, for 12 environmental sites (4 for CL&P and 3 for NSTAR Electric) that are included in the Company's reserve for environmental costs, management cannot reasonably estimate the exposure to loss in excess of the reserve, or range of loss, as these sites are under investigation and/or there is significant uncertainty as to what remedial actions, if any, the Company may be required to undertake. As of December 31, 2018, \$11.1 million (including \$1.9 million for CL&P and \$1.9 million for NSTAR Electric) had been accrued as a liability for these sites. As of December 31, 2018, for the remaining 41 environmental sites (including 9 for CL&P, 13 for NSTAR Electric and 9 for PSNH) that are included in the Company's reserve for environmental costs, the \$29.8 million accrual (including \$2.8 million for CL&P, \$9.0 million for NSTAR Electric and \$5.4 million for PSNH) represents management's best estimate of the probable liability and no additional loss is anticipated at this time.

*Environmental Rate Recovery:* PSNH, NSTAR Gas and Yankee Gas have rate recovery mechanisms for MGP related environmental costs, therefore, changes in their respective environmental reserves do not impact Net Income. Effective with the May 2018 distribution rate case settlement, CL&P is allowed to defer certain environmental costs for future recovery. NSTAR Electric does not have a separate environmental cost recovery regulatory mechanism.

## B. Long-Term Contractual Arrangements

*Estimated Future Annual Costs:* The estimated future annual costs of significant executed, non-cancelable, long-term contractual arrangements in effect as of December 31, 2018 are as follows:

### Eversource

(Millions of Dollars)	2019	2020	2021	2022	2023	Thereafter	Total

Transmission Support Commitments	4.8	4.9	3.2	3.5	3.8	3.8	24.0
Total	\$ 76.3	\$ 69.7	\$ 50.2	\$ 51.0	\$ 52.3	\$ 445.4	\$ 744.9

*Purchased Power and Capacity:* CL&P, NSTAR Electric and PSNH have various IPP contracts or purchase obligations for electricity. Such contracts extend through 2024 for CL&P, 2031 for NSTAR Electric and 2023 for PSNH.

In addition, CL&P, along with UI, has four capacity CfDs for a total of approximately 787 MW of capacity consisting of three generation units and one demand response project. The capacity CfDs extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set contractual capacity price and the capacity market prices received by the generation facilities in the ISO-NE capacity markets. CL&P has a sharing agreement with UI, whereby UI shares 20 percent of the costs and benefits of these contracts. CL&P's portion of the costs and benefits of these contracts will be paid by, or refunded to, CL&P's customers.

The contractual obligations table above does not include CL&P's, NSTAR Electric's or PSNH's standard/basic service contracts, the amounts of which vary with customers' energy needs.

*Renewable Energy:* Renewable energy contracts include non-cancellable commitments under contracts of CL&P, NSTAR Electric and PSNH for the purchase of energy and capacity from renewable energy facilities. Such contracts extend through 2039 for CL&P, 2038 for NSTAR Electric and 2033 for PSNH.

The contractual obligations table above does not include long-term commitments signed by CL&P and NSTAR Electric, as required by the PURA and DPU, respectively, for the purchase of renewable energy and related products that are contingent on the future construction of energy facilities. The table also excludes certain CL&P long-term commitments required by regulation that have not yet been executed such as the selection of certain nuclear power-generating facilities awarded under the Act Concerning Zero Carbon Solicitation and Procurement.

**Peaker CfDs:** In 2008, CL&P entered into three CfDs with developers of peaking generation units approved by PURA (Peaker CfDs). These units have a total of approximately 500 MW of peaking capacity. As directed by PURA, CL&P and UI have entered into a sharing agreement, whereby CL&P is responsible for 80 percent and UI for 20 percent of the net costs or benefits of these CfDs. The Peaker CfDs pay the generation facility owner the difference between capacity, forward reserve and energy market revenues and a cost-of-service payment stream for 30 years. The ultimate cost or benefit to CL&P under these contracts will depend on the costs of plant operation and the prices that the projects receive for capacity and other products in the ISO-NE markets. CL&P's portion of the amounts paid or received under the Peaker CfDs will be recoverable from, or refunded to, CL&P's customers.

**Natural Gas Procurement:** In the normal course of business, Eversource's natural gas distribution businesses have long-term contracts for the purchase, transportation and storage of natural gas as part of its portfolio of supplies. These contracts extend through 2034.

**Transmission Support Commitments:** Along with other New England utilities, CL&P, NSTAR Electric and PSNH entered into agreements in 1985 to support transmission and terminal facilities that were built to import electricity from the Hydro-Québec system in Canada. CL&P, NSTAR Electric and PSNH are obligated to pay, over a 30-year period ending in 2020, their proportionate shares of the annual operation and maintenance expenses and capital costs of those facilities.

The total costs incurred under these agreements were as follows:

Eversource (Millions of Dollars)	For the Years Ended December 31,		
	2018	2017	2016
Purchased Power and Capacity	\$ 72.0	\$ 103.9	\$ 152.5
Renewable Energy	218.5	235.5	210.9
Peaker CfDs	20.9	38.7	47.7
Natural Gas Procurement	432.4	377.0	323.9
Transmission Support Commitments	23.4	19.8	15.9
Coal, Wood and Other <sup>(1)</sup>	—	47.7	55.7

(Millions of Dollars)	For the Years Ended December 31,								
	2018			2017			2016		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Purchased Power and Capacity	\$ 49.4	\$ 4.4	\$ 18.2	\$ 81.0	\$ 4.0	\$ 18.9	\$ 132.7	\$ 0.7	\$ 19.1
Renewable Energy	63.2	89.8	65.5	51.0	123.7	60.8	42.1	101.1	67.7
Peaker CfDs	20.9	—	—	38.7	—	—	47.7	—	—
Transmission Support Commitments	9.2	9.2	5.0	7.8	7.8	4.2	6.3	6.2	3.4
Coal, Wood and Other <sup>(1)</sup>	—	—	—	—	—	47.7	—	—	55.7

<sup>(1)</sup> PSNH previously entered into various arrangements for the purchase of coal, wood and the transportation services for fuel supply for its electric generating assets. On January 10, 2018, Eversource and PSNH completed the sale of PSNH's thermal generation assets. On August 26, 2018, Eversource and PSNH completed the sale of PSNH's hydroelectric generation assets. Upon sale, the remaining future contractual obligations were transferred to the respective buyers. See Note 13, "Generation Asset Sale," for further information.

### C. Spent Nuclear Fuel Obligations - Yankee Companies

CL&P, NSTAR Electric and PSNH have plant closure and fuel storage cost obligations to the Yankee Companies, which have each completed the physical decommissioning of their respective nuclear facilities and are now engaged in the long-term storage of their spent fuel. The Yankee Companies have collected these costs through wholesale, FERC-approved rates charged under power purchase agreements with several New England utilities, including CL&P, NSTAR Electric and PSNH. These companies in turn recover these costs from their customers through state regulatory commission-approved retail rates. The Yankee Companies have collected amounts that management believes are adequate to recover the remaining plant closure and fuel storage cost estimates for the respective plants. Management believes CL&P and NSTAR Electric will recover their shares of these obligations from their customers. PSNH has recovered its total share of these costs from its customers.

#### Spent Nuclear Fuel Litigation:

The Yankee Companies have filed complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to provide for a permanent facility to store spent nuclear fuel pursuant to the terms of the 1983 spent fuel and high level waste disposal contracts between the Yankee Companies and the DOE. The court had previously awarded the Yankee Companies damages for Phase I, II and III of litigation resulting from the DOE's failure to meet its contractual obligations. These Phases covered damages incurred in the years 1998 through 2012, and the awarded damages have been received by the Yankee Companies with certain amounts of the damages refunded to their customers.

*DOE Phase III Damages* - In August 2013, the Yankee Companies each filed subsequent lawsuits against the DOE seeking recovery of actual damages incurred in the years 2009 through 2012 ("DOE Phase III"). On March 25, 2016, the court issued its decision and awarded CYAPC, YAEC and MYAPC damages of \$32.6 million, \$19.6 million and \$24.6 million, respectively. The decision became final on July 18, 2016, and the Yankee Companies received the awards from the DOE on October 14, 2016. The Yankee Companies received FERC approval of their proposed distribution of certain amounts of the awarded damages proceeds to member companies, including CL&P, NSTAR Electric and PSNH, which CYAPC and MYAPC made in December 2016. MYAPC also refunded \$56.5 million from its spent nuclear fuel trust, a portion of which was also refunded to the Eversource utility subsidiaries. In total, Eversource received \$26.1 million, of which CL&P, NSTAR Electric and PSNH received \$13.6 million, \$8.6 million and \$3.9 million, respectively. These amounts have been refunded to the customers of the respective Eversource utility subsidiaries.

*DOE Phase IV Damages* - On May 22, 2017, each of the Yankee Companies filed subsequent lawsuits against the DOE in the Court of Federal Claims seeking monetary damages totaling approximately \$100 million for CYAPC, YAEC and MYAPC, resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal covering the years from 2013 to 2016 ("DOE Phase IV"). On February 21, 2019, the Yankee Companies received a partial summary judgment and partial final judgment in their favor for the undisputed amount of monetary damages, which is the vast majority of the damages being sought. The DOE Phase IV trial for the remaining amount of damages is expected to begin in 2019.

#### D. Guarantees and Indemnifications

In the normal course of business, Eversource parent provides credit assurances on behalf of its subsidiaries, including CL&P, NSTAR Electric and PSNH, in the form of guarantees.

Eversource parent issued a guaranty on behalf of its subsidiary, NPT, under which, beginning at the time the Northern Pass Transmission line goes into commercial operation, Eversource parent will guarantee the financial obligations of NPT under the TSA with HQ in an amount not to exceed \$25 million. Eversource parent's obligations under the guaranty expire upon the full, final and indefeasible payment of the guaranteed obligations. Eversource parent has also entered into a guaranty on behalf of NPT under which Eversource parent will guarantee NPT's obligations under a facility with a financial institution pursuant to which NPT may request letters of credit in an aggregate amount of up to approximately \$14 million.

Management does not anticipate a material impact to net income or cash flows as a result of these various guarantees and indemnifications. The following table summarizes Eversource parent's exposure to guarantees and indemnifications of its subsidiaries to external parties, as of December 31, 2018:

Company	Description	Maximum Exposure (in millions)	Expiration Dates
<u>On behalf of subsidiaries:</u>			
Eversource Gas Transmission LLC	Access Northeast Project Capital Contributions Guaranty <sup>(1)</sup>	\$ 184.9	2021
Various	Surety Bonds <sup>(2)</sup>	41.9	2019 - 2021
Rocky River Realty Company and Eversource Service	Lease Payments for Real Estate	6.3	2019 - 2024
Bay State Wind LLC	Real Estate Purchase	2.5	2019

<sup>(1)</sup> Eversource parent issued a declining balance guaranty on behalf of its subsidiary, Eversource Gas Transmission LLC, to guarantee the payment of the subsidiary's authorized capital contributions for its investment in the Access Northeast project. The guaranty decreases as authorized capital contributions are made. The guaranty will expire upon the earlier of the full performance of the guaranteed obligations or December 31, 2021.

<sup>(2)</sup> Surety bond expiration dates reflect termination dates, the majority of which will be renewed or extended. Certain surety bonds contain credit ratings triggers that would require Eversource parent to post collateral in the event that the unsecured debt credit ratings of Eversource parent are downgraded.

As described in Note 1K, "Investments," Eversource parent issued a guaranty on behalf of its subsidiary, Eversource Investment LLC. Eversource parent will guarantee, as a primary obligor, the financial obligations, primarily all post-Closing payment obligations of Eversource Investment LLC, under the Sale and Purchase Agreement and an Irrevocable Equity Commitment Letter with Ørsted in an amount not to exceed \$ 127.6 million. Eversource parent's obligations under the guaranty expire upon the full, final and indefeasible payment of the guaranteed obligations.

#### E. FERC ROE Complaints

Four separate complaints have been filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15 -month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive ("incentive cap") of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent . On October 16, 2014, the FERC set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the "Court").

All amounts associated with the first complaint period have been refunded, which totaled \$38.9 million (pre-tax and excluding interest) at Eversource and reflected both the base ROE and incentive cap prescribed by the FERC order. The refund consisted of \$22.4 million for CL&P, \$13.7 million for NSTAR Electric and \$2.8 million for PSNH.

Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of December 31, 2018 . This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of December 31, 2018 .

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. The parties to these proceedings were directed to submit briefs on this new proposed framework and how they would apply the proposed framework in each of the four complaint proceedings. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order providing the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results. Reply briefs will be filed on March 8, 2019.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those preliminary calculations indicated that for the first complaint period, for the NETOs that FERC concludes are of average financial risk, (1) a preliminary range of presumptively just and reasonable base ROEs is 9.60 percent to 10.99 percent ; (2) the pre-existing base ROE of 11.14 percent is therefore unjust and unreasonable; (3) the preliminary just and reasonable base ROE is 10.41 percent ; and (4) the preliminary incentive cap on total ROE is 13.08 percent .

If the results of these illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods.

Although the order provided illustrative calculations, FERC stated that these calculations are merely preliminary. The FERC's preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order, as changes to the methodology by FERC are possible as a result of the parties' arguments and calculations in the briefing process. Until FERC issues a final decision on each of these four complaints, there is significant uncertainty, and at this time, the Company cannot reasonably estimate a range of gain or loss for any of the four complaint proceedings. The October 16, 2018 FERC order or the January 11, 2019 briefs did not provide a reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods.

Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

The average impact of a 10 basis point change to the base ROE for each of the 15 -month complaint periods would affect Eversource's after-tax earnings by approximately \$3 million .

#### **F. Eversource and NSTAR Electric Boston Harbor Civil Action**

On July 15, 2016, the United States Attorney on behalf of the United States Army Corps of Engineers filed a civil action in the United States District Court for the District of Massachusetts under provisions of the Rivers and Harbors Act of 1899 and the Clean Water Act against NSTAR Electric, Harbor Electric Energy Company, a wholly-owned subsidiary of NSTAR Electric ("HEEC"), and the Massachusetts Water Resources Authority (together with NSTAR Electric and HEEC, the "Defendants"). The action alleged that the Defendants failed to comply with certain permitting requirements related to the placement of the HEEC-owned electric distribution cable beneath Boston Harbor. The action sought an order to compel HEEC to comply with cable depth requirements in the United States Army Corps of Engineers' permit or alternatively to remove the electric distribution cable and cease unauthorized work in U.S. waterways. The action also sought civil penalties and other costs.

The parties reached a settlement pursuant to which HEEC agreed to install a new 115kV distribution cable across Boston Harbor to Deer Island, utilizing a different route, and remove portions of the existing cable. Upon the installation and completion of the new cable and the removal of the portions of the existing cable, all issues surrounding the current permit from the United States Army Corps of Engineers are expected to be resolved, and such litigation is expected to be dismissed with prejudice.

In 2017, as a result of the settlement, NSTAR Electric expensed \$4.9 million (pre-tax) of previously incurred capitalized costs associated with engineering work performed on the existing cable that will no longer be used. In addition, NSTAR Electric agreed to provide a rate base credit of \$17.5 million to the Massachusetts Water Resources Authority for the new cable. This negotiated credit resulted in the initial \$17.5 million of construction costs on the new cable being expensed as incurred, all of which was fully expensed by the end of 2018. Construction of the new cable is underway and is expected to be completed in 2019.

### G. Litigation and Legal Proceedings

Eversource, including CL&P, NSTAR Electric and PSNH, are involved in legal, tax and regulatory proceedings regarding matters arising in the ordinary course of business, which involve management's assessment to determine the probability of whether a loss will occur and, if probable, its best estimate of probable loss. The Company records and discloses losses when these losses are probable and reasonably estimable, and discloses matters when losses are probable but not estimable or when losses are reasonably possible. Legal costs related to the defense of loss contingencies are expensed as incurred.

### 13. GENERATION ASSET SALE

In June 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, pursuant to which PSNH agreed to divest its generation assets, subject to NHPUC approval. The NHPUC approved this agreement as well as the final divestiture plan and auction process in 2016. On October 11, 2017, PSNH entered into two Purchase and Sale Agreements with private investors, one to sell its thermal generation assets at a purchase price of \$175 million, subject to adjustment, (the "Thermal Agreement") and a second to sell its hydroelectric generation assets at a purchase price of \$83 million, subject to adjustment (the "Hydro Agreement"). The NHPUC approved these agreements in late November 2017, at which time the Company classified these assets as held for sale.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to the Thermal Agreement. In accordance with the Thermal Agreement, the original purchase price of \$175 million was adjusted to reflect working capital adjustments, closing date adjustments and proration of taxes and fees prior to closing, totaling \$40.9 million. In the second quarter of 2018, the purchase price was further adjusted by \$17.3 million relating to the valuation of certain allowances. As a result of these adjustments, net proceeds from the sale of the thermal assets totaled \$116.8 million.

On July 16, 2018, FERC issued its order approving the transfer of PSNH's six hydroelectric licenses to private investors. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to the Hydro Agreement. In accordance with the Hydro Agreement, the original purchase price of \$83 million was adjusted to reflect contractual adjustments totaling \$5.8 million, resulting in net proceeds of \$77.2 million. The difference between the carrying value of the hydroelectric generation assets and the sale proceeds resulted in a gain of \$17.3 million. An estimated gain from the sale of these assets was included as an offset to the total remaining costs associated with the sale of generation assets that were securitized on May 8, 2018.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets, which included the deferred costs resulting from the sale of the thermal generation assets. These RRBs are secured by a non-bypassable charge recoverable from PSNH customers. As of December 31, 2018, unamortized securitized stranded costs totaled \$608.4 million and are included in Regulatory Assets on the Eversource and PSNH balance sheets. As of December 31, 2017, the deferred costs resulting from the thermal generation asset sale of \$516.1 million represented the difference between the carrying value and the fair value less cost to sell the thermal generation assets. For further information on the securitized RRB issuance, see Note 9, "Rate Reduction Bonds and Variable Interest Entities."

For the year ended December 31, 2018, pre-tax income associated with the hydroelectric assets prior to the sale on August 26, 2018 was \$9.9 million. For the years ended December 31, 2017 and 2016, pre-tax income associated with PSNH's generation assets was \$60.0 million, and \$65.3 million, respectively.

As of December 31, 2018, all generation assets had been sold and as a result, no generation assets were classified as held for sale. As of December 31, 2017, PSNH's generation assets held for sale, which were included in current assets on the Eversource and PSNH balance sheets, and were part of the Electric Distribution reportable segment, were as follows:

<i>(Millions of Dollars)</i>	<b>As of December 31, 2017</b>
Thermal Gross Plant	\$ 1,091.4
Hydroelectric Gross Plant	83.0
Accumulated Depreciation	<u>(575.4)</u>
Net Plant	599.0
Fuel and Inventory	87.7
Materials and Supplies	27.3
Emission Allowances	19.1
Other Assets	2.6
Deferred Costs from Thermal Generation Asset Sale	<u>(516.1)</u>
Total Generation Assets Held for Sale	<u>\$ 219.6</u>

#### 14. LEASES

Eversource, including CL&P, NSTAR Electric and PSNH, has entered into lease agreements, some of which are capital leases, for the use of land, office space, service centers, vehicles, information technology, and office equipment. In addition, CL&P, NSTAR Electric and PSNH incur costs associated with leases entered into by affiliated Eversource subsidiaries, including Eversource Service and Rocky River Realty Company, and are included below in their respective operating lease rental expenses and future minimum rental payments. These intercompany lease amounts are eliminated on an Eversource consolidated basis. The provisions of the Eversource, CL&P, NSTAR Electric and PSNH lease agreements generally contain renewal options. One lease agreement contains payments impacted by the consumer price index.

Operating lease rental payments charged to expense are as follows:

<i>(Millions of Dollars)</i>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
2018	\$ 10.8	\$ 10.9	\$ 11.8	\$ 2.5
2017	10.5	11.7	11.3	3.3
2016	12.1	12.5	11.4	2.9

Future minimum rental payments, excluding executory costs, such as property taxes, state use taxes, insurance, and maintenance, under long-term non-cancelable leases, as of December 31, 2018 are as follows:

<b>Operating Leases</b> <i>(Millions of Dollars)</i>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
2019	\$ 11.5	\$ 1.5	\$ 7.2	\$ 0.5
2020	9.8	1.4	6.0	0.4
2021	8.7	1.2	5.3	0.4
2022	7.2	1.1	4.4	0.4
2023	4.7	0.5	3.1	0.2
Thereafter	32.7	0.2	29.5	0.3
Future minimum lease payments	\$ 74.6	\$ 5.9	\$ 55.5	\$ 2.2

<b>Capital Leases</b> <i>(Millions of Dollars)</i>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
2019	\$ 3.4	\$ 2.0	\$ 0.5	\$ 0.1
2020	3.4	2.0	0.5	0.1
2021	2.9	1.5	0.5	0.1
2022	1.5	—	0.6	0.1
2023	0.7	—	0.6	0.1
Thereafter	13.9	—	13.4	0.5
Future minimum lease payments	25.8	5.5	16.1	1.0
Less amount to arrive at present value	13.8	1.0	12.4	0.1
Present value of future minimum lease payments	\$ 12.0	\$ 4.5	\$ 3.7	\$ 0.9

CL&P and PSNH entered into certain contracts for the purchase of energy that qualify as leases. These contracts do not have minimum lease payments and therefore are not included in the tables above. However, such contracts and corresponding expense have been included in the contractual obligations tables in Note 12B, "Commitments and Contingencies - Long-Term Contractual Arrangements," to the financial statements.

## 15. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of each of the following financial instruments:

*Preferred Stock, Long-Term Debt and Rate Reduction Bonds:* The fair value of CL&P's and NSTAR Electric's preferred stock is based upon pricing models that incorporate interest rates and other market factors, valuations or trades of similar securities and cash flow projections. The fair value of long-term debt and RRB debt securities is based upon pricing models that incorporate quoted market prices for those issues or similar issues adjusted for market conditions, credit ratings of the respective companies and treasury benchmark yields. The fair values provided in the table below are classified as Level 2 within the fair value hierarchy. Carrying amounts and estimated fair values are as follows:

(Millions of Dollars)	Eversource		CL&P		NSTAR Electric		PSNH	
	Carrying Amount	Fair Value						
<b>As of December 31, 2018:</b>								
Preferred Stock Not Subject to Mandatory Redemption	\$ 155.6	\$ 156.8	\$ 116.2	\$ 113.8	\$ 43.0	\$ 43.0	\$ —	\$ —
Long-Term Debt	13,086.1	13,154.9	3,254.0	3,429.2	2,944.8	3,024.1	805.2	819.5
Rate Reduction Bonds	635.7	645.8	—	—	—	—	635.7	645.8
<b>As of December 31, 2017:</b>								
Preferred Stock Not Subject to Mandatory Redemption	\$ 155.6	\$ 160.8	\$ 116.2	\$ 116.5	\$ 43.0	\$ 44.3	\$ —	\$ —
Long-Term Debt	12,325.5	12,877.1	3,059.1	3,430.5	2,943.8	3,156.5	1,002.4	1,038.2

*Derivative Instruments and Marketable Securities:* Derivative instruments and investments in marketable securities are carried at fair value. For further information, see Note 4, "Derivative Instruments," and Note 5, "Marketable Securities," to the financial statements.

See Note 11, "Summary of Significant Accounting Policies – Fair Value Measurements," for the fair value measurement policy and the fair value hierarchy.

## 16. ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

The changes in accumulated other comprehensive income/(loss) by component, net of tax, are as follows:

Eversource (Millions of Dollars)	For the Year Ended December 31, 2018				For the Year Ended December 31, 2017			
	Qualified Cash Flow Hedging Instruments	Unrealized Losses on Marketable Securities	Defined Benefit Plans	Total	Qualified Cash Flow Hedging Instruments	Unrealized Gains/(Losses) on Marketable Securities	Defined Benefit Plans	Total
Balance as of January 1st	\$ (6.2)	\$ —	\$ (60.2)	\$ (66.4)	\$ (8.2)	\$ 0.4	\$ (57.5)	\$ (65.3)
OCI Before Reclassifications	—	(0.5)	0.3	(0.2)	—	(0.4)	(7.2)	(7.6)
Amounts Reclassified from AOCI	1.8	—	4.8	6.6	2.0	—	4.5	6.5
Net OCI	1.8	(0.5)	5.1	6.4	2.0	(0.4)	(2.7)	(1.1)
Balance as of December 31st	\$ (4.4)	\$ (0.5)	\$ (55.1)	\$ (60.0)	\$ (6.2)	\$ —	\$ (60.2)	\$ (66.4)

Eversource's qualified cash flow hedging instruments represent interest rate swap agreements on debt issuances that were settled in prior years. The settlement amount was recorded in AOCI and is being amortized into Net Income over the term of the underlying debt instrument. CL&P, NSTAR Electric and PSNH continue to amortize interest rate swaps settled in prior years from AOCI into Interest Expense over the remaining life of the associated long-term debt. Such interest rate swaps are not material to their respective financial statements.

Defined benefit plan OCI amounts before reclassifications relate to actuarial gains and losses that arose during the year and were recognized in AOCI. The unamortized actuarial gains and losses and prior service costs on the defined benefit plans are amortized from AOCI into Other Income, Net over the average future employee service period, and are reflected in amounts reclassified from AOCI. The related tax effects recognized in AOCI were net deferred tax liabilities of \$0.2 million in 2018, and deferred tax assets of \$4.1 million and \$ 4.0 million in 2017 and 2016, respectively.

The following table sets forth the amounts reclassified from AOCI by component and the impacted line item on the statements of income:

Eversource (Millions of Dollars)	Amounts Reclassified from AOCI			Statements of Income Line Item Impacted
	For the Years Ended December 31,			
	2018	2017	2016	
Qualified Cash Flow Hedging Instruments	\$ (2.8)	\$ (3.3)	\$ (3.5)	Interest Expense
Tax Effect	1.0	1.3	1.4	Income Tax Expense
Qualified Cash Flow Hedging Instruments, Net of Tax	\$ (1.8)	\$ (2.0)	\$ (2.1)	
Defined Benefit Plan Costs:				
Amortization of Actuarial Losses	\$ (6.0)	\$ (6.2)	\$ (5.6)	Other Income, Net <sup>(1)</sup>
Amortization of Prior Service Cost	(0.4)	(1.1)	(0.8)	Other Income, Net <sup>(1)</sup>
Total Defined Benefit Plan Costs	(6.4)	(7.3)	(6.4)	
Tax Effect	1.6	2.8	2.5	Income Tax Expense
Defined Benefit Plan Costs, Net of Tax	\$ (4.8)	\$ (4.5)	\$ (3.9)	
Total Amounts Reclassified from AOCI, Net of Tax	\$ (6.6)	\$ (6.5)	\$ (6.0)	

<sup>(1)</sup> These amounts are included in the computation of net periodic Pension, SERP and PBOP costs. See Note 1N, "Summary of Significant Accounting Policies – Other Income, Net" and Note 10A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," for further information.

As of December 31, 2018, it is estimated that a pre-tax amount of \$2.5 million (\$0.7 million for NSTAR Electric and \$1.8 million for PSNH) will be reclassified from AOCI as a decrease to Net Income over the next 12 months as a result of the amortization of the interest rate swap agreements which have been settled. In addition, it is estimated that a pre-tax amount of \$6.3 million will be reclassified from AOCI as a decrease to Net Income over the next 12 months as a result of the amortization of Pension, SERP and PBOP costs.

## 17. DIVIDEND RESTRICTIONS

Eversource parent's ability to pay dividends may be affected by certain state statutes, the ability of its subsidiaries to pay common dividends and the leverage restriction tied to its consolidated total debt to total capitalization ratio requirement in its revolving credit agreement. Pursuant to the joint revolving credit agreement of Eversource, CL&P, PSNH, Yankee Gas and NSTAR Gas, and to the NSTAR Electric revolving credit agreement, each company is required to maintain consolidated total indebtedness to total capitalization ratio of no greater than 65 percent at the end of each fiscal quarter. As of December 31, 2018, all companies were in compliance with such covenant. Eversource, CL&P, NSTAR Electric, PSNH, Yankee Gas and NSTAR Gas were in compliance with all such provisions of the revolving credit agreements that may restrict the payment of dividends as of December 31, 2018.

The Retained Earnings balances subject to dividend restrictions were \$4.0 billion for Eversource, \$1.7 billion for CL&P, \$2.1 billion for NSTAR Electric and \$627.3 million for PSNH as of December 31, 2018.

CL&P, NSTAR Electric and PSNH are subject to Section 305 of the Federal Power Act that makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in its capital account." Management believes that this Federal Power Act restriction, as applied to CL&P, NSTAR Electric and PSNH, would not be construed or applied by the FERC to prohibit the payment of dividends from retained earnings for lawful and legitimate business purposes. In addition, certain state statutes may impose additional limitations on such companies and on Yankee Gas and NSTAR Gas. Such state law restrictions do not restrict the payment of dividends from retained earnings or net income.

## 18. COMMON SHARES

The following table sets forth the Eversource parent common shares and the shares of common stock of CL&P, NSTAR Electric and PSNH that were authorized and issued, as well as the respective per share par values:

	Par Value	Shares		
		Authorized as of December 31, 2018 and 2017	Issued as of December 31,	
			2018	2017
Eversource	\$ 5	380,000,000	333,878,402	333,878,402
CL&P	\$ 10	24,500,000	6,035,205	6,035,205
NSTAR Electric	\$ 1	100,000,000	200	200
PSNH	\$ 1	100,000,000	301	301

As of both December 31, 2018 and 2017, there were 16,992,594 Eversource common shares held as treasury shares. As of both December 31, 2018 and 2017, there were 316,885,808 Eversource common shares outstanding.

## 19. PREFERRED STOCK NOT SUBJECT TO MANDATORY REDEMPTION

The CL&P and NSTAR Electric preferred stock is not subject to mandatory redemption and is presented as a noncontrolling interest of a subsidiary in Eversource's financial statements.

CL&P is authorized to issue up to 9,000,000 shares of preferred stock, par value \$50 per share, and NSTAR Electric is authorized to issue 2,890,000 shares of preferred stock, par value \$100 per share. Holders of preferred stock of CL&P and NSTAR Electric are entitled to receive cumulative dividends in preference to any payment of dividends on the common stock. Upon liquidation, holders of preferred stock of CL&P and NSTAR Electric are entitled to receive a liquidation preference before any distribution to holders of common stock in an amount equal to the par value of the preferred stock plus accrued and unpaid dividends. If the net assets were to be insufficient to pay the liquidation preference in full, then the net assets would be distributed ratably to all holders of preferred stock. The preferred stock of CL&P and NSTAR Electric is subject to optional redemption by the CL&P and NSTAR Electric Board of Directors at any time.

Details of preferred stock not subject to mandatory redemption are as follows (in millions, except in redemption price and shares):

Series	Redemption Price Per Share	Shares Outstanding as of December 31,		As of December 31,	
		2018	2017	2018	2017
<b>CL&amp;P</b>					
\$1.90 Series of 1947	\$ 52.50	163,912	163,912	\$ 8.2	\$ 8.2

<b>Total Eversource - Preferred Stock of Subsidiaries</b>				<b>\$ 155.6</b>	<b>\$ 155.6</b>

## 20. COMMON SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS

Dividends on the preferred stock of CL&P and NSTAR Electric totaled \$7.5 million for each of the years ended December 31, 2018, 2017 and 2016. These dividends were presented as Net Income Attributable to Noncontrolling Interests on the Eversource statements of income. Noncontrolling Interest – Preferred Stock of Subsidiaries on the Eversource balance sheets totaled \$155.6 million as of December 31, 2018 and 2017. On the Eversource balance sheets, Common Shareholders' Equity was fully attributable to Eversource parent and Noncontrolling Interest – Preferred Stock of Subsidiaries was fully attributable to the noncontrolling interest.

For the years ended December 31, 2018, 2017 and 2016, there was no change in ownership of the common equity of CL&P and NSTAR Electric.

## 21. EARNINGS PER SHARE

Basic EPS is computed based upon the weighted average number of common shares outstanding during each period. Diluted EPS is computed on the basis of the weighted average number of common shares outstanding plus the potential dilutive effect of certain share-based compensation awards as if they were converted into common shares. The dilutive effect of unvested RSU and performance share awards is calculated using the treasury stock method. RSU and performance share awards are included in basic weighted average common shares outstanding as of the date that all necessary vesting conditions have been satisfied.

The following table sets forth the components of basic and diluted EPS:

Eversource (Millions of Dollars, except share information)	For the Years Ended December 31,		
	2018	2017	2016
Net Income Attributable to Common Shareholders	\$ 1,033.0	\$ 988.0	\$ 942.3
Weighted Average Common Shares Outstanding:			
Basic	317,370,369	317,411,097	317,650,180
Dilutive Effect	623,565	620,483	804,059
Diluted	317,993,934	318,031,580	318,454,239
Basic EPS	\$ 3.25	\$ 3.11	\$ 2.97
Diluted EPS	\$ 3.25	\$ 3.11	\$ 2.96

## 22. REVENUES

On January 1, 2018, Eversource, including CL&P, NSTAR Electric and PSNH, adopted ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" using the modified retrospective approach. The core principle of this accounting guidance is that revenue is recognized when promised goods or services (referred to as performance obligations) are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard uses a five-step model for recognizing and measuring revenue from contracts with customers, which includes identifying the contract with the customer, identifying the performance obligations promised within the contract, determining the transaction price (the amount of consideration to which the company expects to be entitled), allocating the transaction price to the performance obligations and recognizing revenue when (or as) the performance obligation is satisfied.

The following table presents operating revenues disaggregated by revenue source:

Eversource (Millions of Dollars)	For the Year Ended December 31, 2018						
	Electric Distribution	Natural Gas Distribution	Electric Transmission	Water Distribution	Other	Eliminations	Total
Revenue from Contracts with Customers							
Retail Tariff Sales							
Residential	\$ 3,766.6	\$ 542.5	\$ —	\$ 130.7	\$ —	\$ —	\$ 4,439.8
Commercial	2,634.7	334.8	—	63.3	—	(4.5)	3,028.3
Industrial	351.9	96.0	—	4.4	—	(10.0)	442.3
Total Retail Tariff Sales Revenue	6,753.2	973.3	—	198.4	—	(14.5)	7,910.4
Wholesale Transmission Revenue	—	—	1,308.9	—	47.3	(1,092.2)	264.0
Wholesale Market Sales Revenue	179.5	57.5	—	4.1	—	—	241.1
Other Revenue from Contracts with Customers	65.9	(2.2)	12.6	7.2	889.0	(891.0)	81.5
Reserve for Revenue Subject to Refund	(12.3)	(8.3)	—	(3.7)	—	—	(24.3)
Total Revenue from Contracts with Customers	6,986.3	1,020.3	1,321.5	206.0	936.3	(1,997.7)	8,472.7
Alternative Revenue Programs	(47.0)	(1.2)	(35.2)	5.4	—	31.9	(46.1)
Other Revenue	17.9	3.1	—	0.6	—	—	21.6
Total Operating Revenues	\$ 6,957.2	\$ 1,022.2	\$ 1,286.3	\$ 212.0	\$ 936.3	\$ (1,965.8)	\$ 8,448.2

	For the Year Ended December 31, 2018		
(Millions of Dollars)	CL&P	NSTAR Electric	PSNH
Revenue from Contracts with Customers			
Retail Tariff Sales			
Residential	\$ 1,828.2	\$ 1,380.9	\$ 557.5
Commercial	928.1	1,391.5	316.9
Industrial	147.7	124.9	79.3

Other Revenue	8.5	8.3	1.1
Eliminations	(454.3)	(387.4)	(149.2)
Total Operating Revenues	\$ 3,096.2	\$ 3,112.9	\$ 1,047.6

*Retail Tariff Sales:* Regulated utilities provide products and services to their regulated customers under rates, pricing, payment terms and conditions of service, regulated by each state regulatory agency. The arrangement whereby a utility provides commodity service to a customer for a price approved by the respective state regulatory commission is referred to as a tariff sale contract, and the tariff governs all aspects of the provision of regulated services by utilities. The majority of revenue for Eversource, CL&P, NSTAR Electric and PSNH is derived from regulated retail tariff sales for the sale and distribution of electricity, natural gas and water to residential, commercial and industrial retail customers.

The utility's performance obligation for the regulated tariff sales is to provide electricity, natural gas or water to the customer as demanded. The promise to provide the commodity represents a single performance obligation, as it is a promise to transfer a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. Revenue is recognized over time as the customer simultaneously receives and consumes the benefits provided by the utility, and the utility satisfies its performance obligation. Revenue is recognized based on the output method as there is a directly observable output to the customer (electricity, natural gas or water units delivered to the customer and immediately consumed). Each Eversource utility is entitled to be compensated for performance completed to date (service taken by the customer) until service is terminated.

In regulated tariff sales, the transaction prices are the rates approved by the respective state regulatory commissions. In general, rates can only be changed through formal proceedings with the state regulatory commissions. These rates are designed to recover the costs to provide service to customers and include a return on investment. Regulatory commission-approved tracking mechanisms are included in these rates and are also used to recover, on a fully-reconciling basis, certain costs, such as the procurement of energy supply, retail transmission charges, energy efficiency program costs, net metering for distributed generation, and restructuring and stranded costs. These tracking mechanisms result in rates being changed periodically to ensure recovery of actual costs incurred.

Customers may elect to purchase electricity from each Eversource electric utility or may contract separately with a competitive third party supplier. Revenue is not recorded for the sale of the electricity commodity to customers who have contracted separately with these suppliers, only the delivery to a customer, as the utility is acting as an agent on behalf of the third party supplier.

*Wholesale Transmission Revenues:* The Eversource electric transmission-owning companies (CL&P, NSTAR Electric and PSNH) each own and maintain transmission facilities that are part of an interstate power transmission grid over which electricity is transmitted throughout New England. CL&P, NSTAR Electric and PSNH, as well as most other New England utilities, are parties to a series of agreements that provide for coordinated planning and operation of the region's transmission facilities and the rules by which they acquire transmission services. The Eversource electric transmission-owning companies have a combination of FERC-approved regional and local formula rates that work in tandem to recover all their transmission costs. These rates are part of the ISO-NE Tariff. Regional rates recover the costs of higher voltage transmission facilities that benefit the region and are collected from all New England transmission customers, including the Eversource distribution businesses. Eversource's local rates recover the companies' total transmission revenue requirements, less revenues received from regional rates and other sources, and are collected from Eversource's distribution businesses and other transmission customers. The distribution businesses of Eversource, in turn, recover the FERC approved charges from retail customers through annual or semiannual tracking mechanisms, which are retail tariff sales.

The utility's performance obligation for regulated wholesale transmission sales is to provide transmission services to the customer as demanded. The promise to provide transmission service represents a single performance obligation. The transaction prices are the transmission rate formulas as defined by the ISO-NE Tariff and are regulated and established by FERC. Wholesale transmission revenue is recognized over time as the performance obligation is completed, which occurs as transmission services are provided to customers. The revenue is recognized based on the output method. Each Eversource utility is entitled to be compensated for performance completed to date (e.g., use of the transmission system by the customer).

*Wholesale Market Sales Revenues:* Wholesale market sales transactions include sales of energy and energy-related products into the ISO-NE wholesale electricity market, sales of natural gas to third party marketers, and also the sale of RECs to various counterparties. ISO-NE oversees the region's wholesale electricity market and administers the transactions and terms and conditions, including payment terms, which are established in the ISO-NE tariff, between the buyers and sellers in the market. Pricing is set by the wholesale market. The wholesale transactions in the ISO-NE market occur on a day-ahead basis or a real-time basis (daily) and are, therefore, short-term. Transactions are tracked and reported by ISO-NE net by the hour, which is the net hourly position of energy sales and purchases by each market participant. Beginning in the first quarter of 2018, the performance obligation for ISO-NE energy transactions is defined to be the net by hour transaction. Revenue is recognized when the performance obligation for these energy sales transactions is satisfied, when the sale occurs and the energy is transferred to the customer. For sales of natural gas, transportation, and natural gas pipeline capacity to third party marketers, revenue is recognized when the performance obligation is satisfied at the point in time the sale occurs and the natural gas or related product is transferred to the marketer. RECs are sold to various counterparties, and revenue is recognized when the performance obligation is satisfied upon transfer of title to the customer through the New England Power Pool Generation Information System.

*Other Revenue from Contracts with Customers:* Other revenue from contracts with customers primarily includes property rentals that are not deemed leases. These revenues are generally recognized on a straight-line basis over time as the service is provided to the customer.

*Reserve for Revenue Subject to Refund:* Current base rates include an estimate of income taxes, which was based on the U.S. federal corporate income tax rate in effect at the time of the rate proceeding. Eversource established a regulatory liability, recorded as a reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflect the lower federal tax rate. Effective May 1, 2018, CL&P adjusted rates billed to customers to reflect the lower federal income tax rate prospectively and, as of December 31, 2018, fully refunded its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through April 30, 2018. Effective November 15, 2018, Yankee Gas adjusted distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through November 14, 2018. Although Yankee Gas' new rates were effective January 1, 2019, the provisions of the settlement agreement took effect November 15, 2018. For NSTAR Electric and NSTAR Gas, a December 2018 DPU order indicated that the DPU will not require a revision to base rates for any potential refunds associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 to the effective dates of each company's rate changes (effective February 1, 2018 for NSTAR Electric and July 1, 2018 for NSTAR Gas). PSNH and Aquarion will refund the overcollection in distribution rates from January 1, 2018 to customers in a future period. PSNH will adjust distribution rates to reflect the prospective lower federal income tax rate effective July 1, 2019, or earlier if a rate case is filed for rates effective prior to July 1, 2019.

*Alternative Revenue Programs:* In accordance with accounting guidance for rate-regulated operations, certain of Eversource's utilities' rate making mechanisms qualify as alternative revenue programs ("ARPs") if they meet specified criteria, in which case revenues may be recognized prior to billing based on allowed levels of collection in rates. Eversource's utility companies recognize revenue and record a regulatory asset or liability once the condition or event allowing for the automatic adjustment of future rates occurs. ARP revenues include both the recognition of the deferral adjustment to ARP revenues, when the regulator-specified condition or event allowing for additional billing or refund has occurred, and an equal and offsetting reversal of the ARP deferral to revenues as those amounts are reflected in the price of service in subsequent periods.

Eversource's ARPs include the revenue decoupling mechanism and the annual reconciliation adjustment to transmission formula rates, described below.

- Certain Eversource electric, natural gas and water companies, including CL&P and NSTAR Electric, have revenue decoupling mechanisms approved by a regulatory commission ("decoupled companies"). Decoupled companies' distribution revenues are not directly based on sales volumes. The decoupled companies reconcile their annual base distribution rate recovery to pre-established levels of baseline distribution delivery service revenues, with any difference between the allowed level of distribution revenue and the actual amount realized adjusted through subsequent rates.
- The transmission formula rates provide for the annual reconciliation and recovery or refund of estimated costs to actual costs. The financial impacts of differences between actual and estimated costs are deferred for future recovery from, or refund to, transmission customers. This transmission deferral reconciles billed transmission revenues to the revenue requirement for our transmission businesses.

*Other Revenues:* Other Revenues include certain fees charged to customers and lease revenue that are not considered revenue from contracts with customers.

*Intercompany Eliminations:* Intercompany eliminations are primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business, and revenues from Eversource's service company. Intercompany revenues and expenses between the Eversource wholesale transmission businesses and the Eversource distribution businesses and from Eversource's service company are eliminated in consolidation and included in "Eliminations" in the table above.

*Receivables:* Receivables, Net on the balance sheet include trade receivables from our retail customers and receivables arising from ISO-NE billing related to wholesale transmission contracts and wholesale market transactions, sales of natural gas and capacity to marketers, sales of RECs, and property rentals. In general, retail tariff customers and wholesale transmission customers are billed monthly and the payment terms are generally due and payable upon receipt of the bill.

*Unbilled Revenues:* Unbilled Revenues on the balance sheet represent estimated amounts due from retail customers for electricity, natural gas or water delivered to customers but not yet billed. The utility company has satisfied its performance obligation and the customer has received and consumed the commodity as of the balance sheet date, and therefore, the utility company records revenue for those services in the period the services were provided. Only the passage of time is required before the company is entitled to payment for the satisfaction of the performance obligation. Payment from customers is due monthly as services are rendered and amounts are billed. Actual amounts billed to customers when meter readings become available may vary from the estimated amount.

Unbilled revenues are recognized by allocating estimated unbilled sales volumes to the respective customer classes, and then applying an estimated rate by customer class to those sales volumes. Unbilled revenue estimates reflect seasonality, weather, customer usage patterns, customer rates in effect for customer classes, and the timing of customer billing. The companies that have a decoupling mechanism record a regulatory deferral to reflect the actual allowed amount of revenue associated with their respective decoupled distribution rate design.

*Practical Expedients:* Eversource has elected practical expedients in the accounting guidance that allow the company to record revenue in the amount that the company has a right to invoice, if that amount corresponds directly with the value to the customer of the company's performance to date, and not to disclose related unsatisfied performance obligations. Retail and wholesale transmission tariff sales fall into this category, as these sales are recognized as revenue in the period the utility provides the service and completes the performance obligation, which is the same as the monthly amount billed to customers. There are no other material revenue streams for which Eversource has unsatisfied performance obligations.

### **23. SEGMENT INFORMATION**

Eversource is organized among the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reportable segments and Other based on a combination of factors, including the characteristics of each segments' services, the sources of operating revenues and expenses and the regulatory environment in which each segment operates. These reportable segments represent substantially all of Eversource's total consolidated revenues. Revenues from the sale of electricity, natural gas and water primarily are derived from residential, commercial and industrial customers and are not dependent on any single customer. The Electric Distribution reportable segment includes the results of PSNH's generation facilities prior to sales in January and August 2018, and NSTAR Electric's solar power facilities. Eversource's reportable segments are determined based upon the level at which Eversource's chief operating decision maker assesses performance and makes decisions about the allocation of company resources. On December 4, 2017, Eversource acquired Aquarion, which was considered to be a new operating segment, Water Distribution. Though the water distribution segment does not meet quantitative thresholds under the segment reporting accounting guidance, based on qualitative factors including the nature of the water distribution business, Water Distribution was deemed a reportable segment beginning in 2018.

The remainder of Eversource's operations is presented as Other in the tables below and primarily consists of 1) the equity in earnings of Eversource parent from its subsidiaries and intercompany interest income, both of which are eliminated in consolidation, and interest expense related to the debt of Eversource parent, 2) the revenues and expenses of Eversource Service, most of which are eliminated in consolidation, 3) the operations of CYAPC and YAEC, 4) Eversource Water Ventures, Inc., parent company of Aquarion, and 5) the results of other unregulated subsidiaries, which are not part of its core business. In addition, Other in the tables below includes Eversource parent's equity ownership interests in certain natural gas pipeline projects owned by Enbridge, Inc., the Bay State Wind project, a renewable energy investment fund, and two companies that transmit hydroelectricity imported from the Hydro-Quebec system in Canada. In the ordinary course of business, Yankee Gas and NSTAR Gas purchase natural gas transmission services from the Enbridge, Inc. natural gas pipeline projects described above. These affiliate transaction costs total approximately \$62.5 million annually and are classified as Purchased Power, Fuel and Transmission on the Eversource statements of income.

Each of Eversource's subsidiaries, including CL&P, NSTAR Electric and PSNH, has one reportable segment.

The Electric Transmission segment includes a reduction to Operations and Maintenance expense of \$27.5 million in 2016 for costs incurred in previous years that was recovered in transmission rates over the period June 1, 2016 through May 31, 2017. These costs were associated with the merger of Northeast Utilities and NSTAR.

Cash flows used for investments in plant included in the segment information below are cash capital expenditures that do not include amounts incurred but not paid, cost of removal, AFUDC related to equity funds, and the capitalized portions of pension and PBOP expense.

Eversource's segment information is as follows:

For the Year Ended December 31, 2018 <sup>(1)</sup>							
Eversource (Millions of Dollars)	Electric Distribution	Natural Gas Distribution	Electric Transmission	Water Distribution	Other	Eliminations	Total

- (1) Effective January 1, 2018, upon implementation of the new revenue accounting guidance, the electric distribution segment is presented gross and intercompany transmission billings are presented in the eliminations column, as Eversource believes that the electric distribution segment acts as a principal, rather than an agent, in its contracts with retail customers. Retail customers contract directly with the electric distribution utility and do not differentiate between distribution and transmission services. Therefore, the electric distribution segment revenues, which are derived from retail customer billings, are presented gross of the eliminations. Prior to 2018, the electric distribution segment presented intercompany electric transmission billings net, based on indicators of net presentation prior to the new revenue guidance. See Note 22 "Revenues," to the financial statements regarding accounting for revenues.
- (2) As a result of the adoption of new accounting guidance, the non-service related components of pension, SERP and PBOP benefit costs are presented as non-operating income and recorded in Other Income, Net on the statements of income. The 2017 and 2016 amounts, which were previously presented within Operations and Maintenance expense on the statements of income, have been retrospectively presented within Other Income, Net for the years ended December 31, 2017 and 2016. See Note 1C, "Summary of Significant Accounting Policies - Accounting Standards" and Note 1N, "Summary of Significant Accounting Policies - Other Income, Net," to the financial statements for further information.
- (3) The water distribution business was determined to be a reportable segment beginning in 2018. The 2017 segment information has been recast to conform to the current segment reporting structure.

## 24. ACQUISITION OF AQUARION AND GOODWILL

### A. Acquisition of Aquarion

On December 4, 2017, Eversource acquired Aquarion for a purchase price of \$1.675 billion, consisting of approximately \$880 million in cash and \$795 million of assumed Aquarion debt. Aquarion is a holding company that owns three separate regulated water utility subsidiaries engaged in the water collection, treatment and distribution business that operate in Connecticut, Massachusetts and New Hampshire. These regulated utilities collect, treat and distribute water to residential, commercial and industrial customers, to other utilities for resale, and for private and municipal fire protection. Aquarion and its subsidiaries became wholly-owned subsidiaries of Eversource, and Eversource's consolidated financial information includes Aquarion and its subsidiaries' activity beginning December 4, 2017. The approximate \$880 million cash purchase price included the \$745 million equity purchase price plus a \$135 million shareholder loan that was repaid at closing.

*Purchase Price Allocation*: The purchase price allocation reflects a measurement period adjustment recorded in the first quarter of 2018 to revise the fair value of Aquarion's regulated debt. The \$7.9 million increase to the fair value of Long-Term Debt (including the current portion) and corresponding increase to Regulatory Assets, included within Other Noncurrent Assets, excluding Goodwill in the table below, will be amortized over the life of the related debt. The allocation of the cash purchase price was as follows:

(Millions of Dollars)

Current Assets	\$	41.2
PP&E		1,034.9
Goodwill		907.9
Other Noncurrent Assets, excluding Goodwill		215.5
Current Liabilities		(121.9)
Noncurrent Liabilities		(421.6)
Long-Term Debt		(778.3)
Total Cash Purchase Price	\$	877.7

*Pro Forma Financial Information*: The following unaudited pro forma financial information reflects the pro forma combined results of operations of Eversource and Aquarion and reflects the amortization of purchase price adjustments assuming the acquisition had taken place on January 1, 2016. The unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of the consolidated results of operations that would have been achieved or the future consolidated results of operations of Eversource.

	For the Years Ended December 31,			
	2017		2016	
(Pro forma amounts in millions, except share amounts)				
Operating Revenues	\$	7,947.7	\$	7,849.0
Net Income Attributable to Common Shareholders		1,019.1		969.3
Basic EPS		3.21		3.05
Diluted EPS		3.20		3.04

*Aquarion Revenues and Pre-Tax Income*: The impact of Aquarion on Eversource's accompanying consolidated statement of income included operating revenues of \$15.9 million and pre-tax income of \$1.1 million for the year ended December 31, 2017.

## B. Goodwill

In a business combination, the excess of the purchase price over the estimated fair values of the assets acquired and liabilities assumed is recognized as goodwill. Goodwill is evaluated for impairment at least annually and more frequently if indicators of impairment arise. In accordance with the accounting standards, if the fair value of a reporting unit is less than its carrying value (including goodwill), the goodwill is tested for impairment. Goodwill is not subject to amortization, however is subject to a fair value based assessment for impairment at least annually and whenever facts or circumstances indicate that there may be an impairment. A resulting write-down, if any, would be charged to Operating Expenses.

Eversource completed the acquisition of Aquarion on December 4, 2017, resulting in the addition of \$0.9 billion of goodwill. Upon completion of the acquisition, Eversource determined that the reporting units for the purpose of testing goodwill are Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. The goodwill resulting from the Aquarion acquisition has been entirely allocated to the Water Distribution reporting unit. These reporting units are consistent with the operating segments underlying the reportable segments identified in Note 23, "Segment Information," to the financial statements.

Eversource completed its annual goodwill impairment test for Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units as of October 1, 2018 and determined that no impairment existed. There were no events subsequent to October 1, 2018 that indicated impairment of goodwill. The annual goodwill assessment included an evaluation of the Company's share price and credit ratings, analyst reports, financial performance, cost and risk factors, long-term strategy, growth and future projections, as well as macroeconomic, industry and market conditions. This evaluation required the consideration of several factors that impact the fair value of the reporting units, including conditions and assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, and internal estimates of future cash flows and net income.

The following table presents goodwill by reportable segment as of December 31, 2018 and 2017:

<i>(Billions of Dollars)</i>	Electric Distribution	Electric Transmission	Natural Gas Distribution	Water Distribution	Total
Goodwill	\$ 2.5	\$ 0.6	\$ 0.4	\$ 0.9	\$ 4.4

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

No events that would be described in response to this item have occurred with respect to Eversource, CL&P, NSTAR Electric or PSNH.

**Item 9A. Controls and Procedures**

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for the preparation, integrity, and fair presentation of the accompanying Financial Statements and other sections of this combined Annual Report on Form 10-K. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for establishing and maintaining adequate internal controls over financial reporting. The internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment. Under the supervision and with the participation of the principal executive officer and principal financial officer, an evaluation of the effectiveness of internal controls over financial reporting was conducted based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting at Eversource, CL&P, NSTAR Electric and PSNH were effective as of December 31, 2018 .

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, evaluated the design and operation of the disclosure controls and procedures as of December 31, 2018 to determine whether they are effective in ensuring that the disclosure of required information is made timely and in accordance with the Securities Exchange Act of 1934 and the rules and regulations of the SEC. This evaluation was made under management's supervision and with management's participation, including the principal executive officer and principal financial officer as of the end of the period covered by this Annual Report on Form 10-K. There are inherent limitations of disclosure controls and procedures, including the possibility of human error and the circumventing or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. The principal executive officer and principal financial officer have concluded, based on their review, that the disclosure controls and procedures of Eversource, CL&P, NSTAR Electric and PSNH are effective to ensure that information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 (i) is recorded, processed, summarized, and reported within the time periods specified in SEC rules and regulations and (ii) is accumulated and communicated to management, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

There have been no changes in internal controls over financial reporting for Eversource, CL&P, NSTAR Electric and PSNH during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

**Item 9B. Other Information**

No information is required to be disclosed under this item as of December 31, 2018 , as this information has been previously disclosed in applicable reports on Form 8-K during the fourth quarter of 2018 .

### PART III

#### Item 10. Directors, Executive Officers and Corporate Governance

The information in Item 10 is provided as of February 26, 2019, except where otherwise indicated.

Certain information required by this Item 10 is omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly Owned Subsidiaries.

#### Eversource Energy

In addition to the information provided below concerning the executive officers of Eversource Energy, incorporated herein by reference is the information to be contained in the sections captioned “Election of Trustees,” “Governance of Eversource Energy” and the related subsections, “Selection of Trustees,” and “Section 16(a) Beneficial Ownership Reporting Compliance” of Eversource Energy’s definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2019.

#### Eversource Energy and CL&P

Each member of CL&P’s Board of Directors is an employee of Eversource Service. Directors are elected annually to serve for one year until their successors are elected and qualified.

Set forth below is certain information concerning CL&P’s Directors and Eversource Energy’s and CL&P’s executive officers:

Name	Age	Title
James J. Judge	63	Chairman of the Board, President and Chief Executive Officer and a Trustee of Eversource Energy; Chairman, President and Chief Executive Officer and a Director of Eversource Service; Chairman and a Director of the electric and natural gas regulated companies, including CL&P
Philip J. Lembo	63	Executive Vice President and Chief Financial Officer of Eversource Energy; Executive Vice President and Chief Financial Officer; a Director of Eversource Service and the electric and natural gas regulated companies, including CL&P
Gregory B. Butler	61	Executive Vice President and General Counsel of Eversource Energy; Executive Vice President and General Counsel and a Director of Eversource Service and the electric and natural gas regulated companies, including CL&P
Christine M. Carmody <sup>1</sup>	56	Executive Vice President-Human Resources and Information Technology of Eversource Energy and Eversource Service; a Director of Eversource Service
Joseph R. Nolan, Jr. <sup>1</sup>	55	Executive Vice President-Customer and Corporate Relations of Eversource Energy and Eversource Service; a Director of Eversource Service
Leon J. Olivier	71	Executive Vice President-Enterprise Energy Strategy and Business Development of Eversource Energy and Eversource Service; a Director of Eversource Service
Werner J. Schweiger	59	Executive Vice President and Chief Operating Officer of Eversource Energy; Executive Vice President and Chief Operating Officer and a Director of Eversource Service; Chief Executive Officer and a Director of the electric and natural gas regulated companies, including CL&P
Jay S. Buth	49	Vice President, Controller and Chief Accounting Officer of Eversource Energy, Eversource Service and the electric and natural gas regulated companies, including CL&P

<sup>1</sup> Deemed an executive officer of CL&P pursuant to Rule 3b-7 under the Securities Exchange Act of 1934.

*James J. Judge.* Mr. Judge has served as Chairman of the Board, President and Chief Executive Officer of Eversource Energy since May 3, 2017; as a Trustee of Eversource Energy and as Chairman of CL&P, NSTAR Electric and PSNH since May 4, 2016; and as Chairman, President and Chief Executive Officer of Eversource Service and Chairman of NSTAR Gas and Yankee Gas since May 9, 2016. Mr. Judge has served as a Director of CL&P, PSNH, Yankee Gas and Eversource Service since April 10, 2012; of NSTAR Electric and NSTAR Gas since September 27, 1999; and of Eversource Aquarion Holdings, Inc. Previously, Mr. Judge served as President and Chief Executive Officer of Eversource Energy from May 4, 2016 until May 3, 2017; and as Executive Vice President and Chief Financial Officer of Eversource Energy, CL&P, NSTAR Electric and PSNH from April 10, 2012 until May 4, 2016; of NSTAR Gas, Yankee Gas and Eversource Service from April 10, 2012 until May 9, 2016. Mr. Judge has served as Chairman of the Board of Eversource Energy Foundation, Inc. since May 9, 2016; and as a Director since April 10, 2012. He previously served as Treasurer of Eversource Energy Foundation, Inc. from April 10, 2012 until May 9, 2016. He has served as a Trustee of the NSTAR Foundation since December 12, 1995.

*Philip J. Lembo.* Mr. Lembo has served as Executive Vice President and Chief Financial Officer of Eversource Energy since May 3, 2017; and of CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since March 31, 2017. Mr. Lembo has served as a Director of CL&P, NSTAR Electric and PSNH since May 4, 2016; of NSTAR Gas, Yankee Gas and Eversource Service since May 9, 2016 and of Eversource Aquarion Holdings, Inc. Mr. Lembo previously served as Executive Vice President, Chief Financial Officer and Treasurer of Eversource Energy from August 8, 2016 until May 3, 2017; of CL&P, NSTAR Electric, PSNH, NSTAR Gas, Yankee Gas and Eversource Service from August 8, 2016 until March 31, 2017; as Senior Vice President, Chief Financial Officer and Treasurer of Eversource Energy, CL&P, NSTAR Electric and PSNH

from May 4, 2016 until August 8, 2016; and of NSTAR Gas, Yankee Gas and Eversource Service from May 9, 2016 until August 8, 2016; as Vice President and Treasurer of Eversource Energy, CL&P and PSNH from April 10, 2012 until May 4, 2016; and of Yankee Gas and Eversource Service from April 10, 2012 until May 9, 2016. Mr. Lembo served as Vice President and Treasurer of NSTAR Electric and NSTAR Gas from March 29, 2006 until May 4, 2016. Mr. Lembo has served as a Director of Eversource Energy Foundation, Inc. since May 9, 2016. He previously served as Treasurer of Eversource Energy Foundation, Inc. from May 9, 2016 until March 31, 2017. He has served as a Trustee of the NSTAR Foundation since May 9, 2016.

*Gregory B. Butler* . Mr. Butler has served as Executive Vice President and General Counsel of Eversource Energy, CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since August 8, 2016. Mr. Butler has served as a Director of NSTAR Electric and NSTAR Gas since April 10, 2012; of Eversource Service since November 27, 2012; of CL&P, PSNH and Yankee Gas since April 22, 2009 and of Eversource Aquarion Holdings, Inc. Mr. Butler previously served as Senior Vice President and General Counsel of Eversource Energy from May 1, 2014 until August 8, 2016; of NSTAR Electric and NSTAR Gas from April 10, 2012 until August 8, 2016; of CL&P, PSNH, Yankee Gas and Eversource Service from March 9, 2006 until August 8, 2016; and as Senior Vice President, General Counsel and Secretary of Eversource Energy from April 10, 2012 until May 1, 2014. He has served as a Director of Eversource Energy Foundation, Inc. since December 1, 2002. He has been a Trustee of the NSTAR Foundation since April 10, 2012.

*Christine M. Carmody*. Ms. Carmody has served as Executive Vice President-Human Resources and Information Technology of Eversource Energy and Eversource Service since August 8, 2016. Ms. Carmody has served as a Director of Eversource Service since November 27, 2012. Previously Ms. Carmody served as Senior Vice President-Human Resources of Eversource Energy from May 4, 2016 until August 8, 2016; of Eversource Service from April 10, 2012 until August 8, 2016; as Senior Vice President-Human Resources of CL&P, PSNH and Yankee Gas from November 27, 2012 until September 29, 2014; of NSTAR Electric and NSTAR Gas from August 1, 2008 until September 29, 2014; and as a Director of CL&P, PSNH and Yankee Gas from April 10, 2012 until September 29, 2014; and of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014. Ms. Carmody has served as a Director of Eversource Energy Foundation, Inc. since April 10, 2012. She has served as a Trustee of the NSTAR Foundation since August 1, 2008.

*Joseph R. Nolan, Jr.* Mr. Nolan has served as Executive Vice President-Customer and Corporate Relations of Eversource Energy and Eversource Service since August 8, 2016. Mr. Nolan has served as a Director of Eversource Service since November 27, 2012. Previously Mr. Nolan served as Senior Vice President-Corporate Relations of Eversource Energy from May 4, 2016 until August 8, 2016; of Eversource Service from April 10, 2012 until August 8, 2016; of NSTAR Electric and NSTAR Gas from April 10, 2012 until September 29, 2014; and of CL&P, PSNH and Yankee Gas from November 27, 2012 until September 29, 2014. Mr. Nolan previously served as a Director of CL&P, PSNH and Yankee Gas from April 10, 2012 until September 29, 2014; and of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014. Mr. Nolan has served as a Director of Eversource Energy Foundation, Inc. since April 10, 2012, and as Executive Director of Eversource Energy Foundation, Inc. since October 15, 2013. He has served as a Trustee of the NSTAR Foundation since October 1, 2000.

*Leon J. Olivier* . Mr. Olivier has served as Executive Vice President-Enterprise Energy Strategy and Business Development of Eversource Energy since September 2, 2014; and of Eversource Service since August 11, 2014. Mr. Olivier has served as a Director of Eversource Service since January 17, 2005. Mr. Olivier previously served as Executive Vice President and Chief Operating Officer of Eversource Energy from May 13, 2008 until September 2, 2014; of Eversource Service from May 13, 2008 until August 11, 2008; as Chief Executive Officer of NSTAR Electric and NSTAR Gas from April 10, 2012 until August 11, 2014; of CL&P, PSNH and Yankee Gas from January 15, 2007 until August 11, 2014; as a Director of NSTAR Electric and NSTAR Gas from November 27, 2012 until September 29, 2014; of PSNH and Yankee Gas from January 17, 2005 until September 29, 2014; and of CL&P from September 10, 2001 until September 29, 2014. He has served as a Director of Eversource Energy Foundation, Inc. since April 1, 2006. Mr. Olivier has served as a Trustee of the NSTAR Foundation since April 10, 2012.

*Werner J. Schweiger*. Mr. Schweiger has served as Executive Vice President and Chief Operating Officer of Eversource Energy since September 2, 2014; of Eversource Service since August 11, 2014; and as Chief Executive Officer of CL&P, NSTAR Electric, NSTAR Gas, PSNH and Yankee Gas since August 11, 2014. Mr. Schweiger has served as a Director of Eversource Service, NSTAR Gas and Yankee Gas since September 29, 2014; and of CL&P, PSNH and NSTAR Electric since May 28, 2013. He previously served as President of CL&P from June 2, 2015 until June 27, 2016; as President of NSTAR Gas and Yankee Gas from September 29, 2014 until November 10, 2014; as President-Electric Distribution of Eversource Service from January 16, 2013 until August 11, 2014; as President of NSTAR Electric from April 10, 2012 until January 16, 2013; and as a Director of NSTAR Electric from November 27, 2012 until January 16, 2013. Mr. Schweiger has served as a Director of Eversource Energy Foundation, Inc. since September 29, 2014. He has served as a Trustee of the NSTAR Foundation since September 29, 2014.

*Jay S. Buth*. Mr. Buth has served as Vice President, Controller and Chief Accounting Officer of Eversource Energy, CL&P, NSTAR Electric, NSTAR Gas, PSNH, Yankee Gas and Eversource Service since April 10, 2012.

There are no family relationships between any director or executive officer and any other trustee, director or executive officer of Eversource Energy or CL&P and none of the above executive officers or directors serves as an executive officer or director pursuant to any agreement or understanding with any other person. Our executive officers hold the offices set forth opposite their names until the next annual meeting of the Board of Trustees, in the case of Eversource Energy, and the Board of Directors, in the case of CL&P, and until their successors have been elected and qualified.

CL&P obtains audit services from the independent registered public accounting firm engaged by the Audit Committee of Eversource Energy's Board of Trustees. CL&P does not have its own audit committee or, accordingly, an audit committee financial expert. CL&P relies on Eversource Energy's audit committee and the audit committee financial expert.

## CODE OF ETHICS AND CODE OF BUSINESS CONDUCT

Each of Eversource Energy, CL&P, NSTAR Electric, and PSNH has adopted a Code of Ethics for Senior Financial Officers (Chief Executive Officer, Chief Financial Officer and Controller) and the Code of Business Conduct, which are applicable to all Trustees, directors, officers, employees, contractors and agents of Eversource Energy, CL&P, NSTAR Electric and PSNH. The Code of Ethics and the Code of Business Conduct have both been posted on the Eversource Energy web site and are available at [www.eversource.com/Content/general/about/investors/corporate-governance](http://www.eversource.com/Content/general/about/investors/corporate-governance) on the Internet. Any amendments to or waivers from the Code of Ethics and Code of Business Conduct for executive officers, directors or Trustees will be posted on the website. Any such amendment or waiver would require the prior consent of the Board of Trustees or an applicable committee thereof.

Printed copies of the Code of Ethics and the Code of Business Conduct are also available to any shareholder without charge upon written request mailed to:

Richard J. Morrison  
Secretary  
Eversource Energy

Boston, Massachusetts 02199-7050

## Item 11. Executive Compensation

### Eversource Energy

The information required by this Item 11 for Eversource Energy is incorporated herein by reference to certain information contained in Eversource Energy's definitive proxy statement for solicitation of proxies, which is expected to be filed with the SEC on or about March 22, 2019, under the sections captioned "Compensation Discussion and Analysis," plus related subsections, and "Compensation Committee Report," plus related subsections following such Report.

### NSTAR ELECTRIC and PSNH

Certain information required by this Item 11 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

### CL&P

The information in this Item 11 relates solely to CL&P.

## COMPENSATION DISCUSSION AND ANALYSIS

CL&P is a wholly-owned subsidiary of Eversource Energy. Its board of directors consists entirely of executive officers of Eversource Energy system companies. CL&P does not have a compensation committee, and the Compensation Committee of Eversource Energy's Board of Trustees determines compensation for the executive officers of CL&P, including their salaries, annual incentive awards and long-term incentive awards. All of CL&P's "Named Executive Officers," as defined below, also serve as officers of Eversource Energy and one or more other subsidiaries of Eversource Energy. Compensation set by the Compensation Committee of Eversource Energy (the "Committee") and set forth herein is for services rendered to Eversource Energy and its subsidiaries by such officers in all capacities.

This Compensation Discussion and Analysis ("CD&A") provides information about the principles behind Eversource Energy's compensation objectives, plans, policies and actions for the Named Executive Officers. The discussion describes the specific components of Eversource Energy's compensation programs, how Eversource Energy measures performance, and how Eversource Energy's compensation principles were applied to compensation awards and decisions that were made by the Compensation Committee for the Named Executive Officers, as presented in the tables and narratives that follow. While this discussion focuses primarily on 2018 information, it also addresses decisions that were made in prior periods to the extent that these decisions are relevant to the full understanding of Eversource Energy's compensation programs and the specific awards that were made for performance through 2018. The CD&A also contains an assessment of performance measured against the established 2018 goals, the compensation awards made by the Compensation Committee, and other information relating to Eversource Energy's compensation programs, including:

- Summary of 2018 Accomplishments
- Pay for Performance Philosophy
- Executive Compensation Governance
- Named Executive Officers
- Overview of the Compensation Program
- Market Analysis
- Elements of 2018 Compensation
- 2018 Annual Incentive Program
- 2018 Assessment of Financial and Operational Performance
- Performance Goal Assessment Matrix
- Description of the Long-Term Incentive Program, Grants and Performance Plan Results
- Disclosure of the:
  - Clawbacks and No Hedging and No Pledging Policies
  - Share Ownership Guidelines
  - Other Benefits
- Contractual Agreements
- Tax and Accounting Considerations
- Equity Grant Practices

### *Summary of 2018 Accomplishments*

In 2018, Eversource Energy achieved very positive overall financial, operational and related results. The following is a summary of some of the most important accomplishments in 2018:

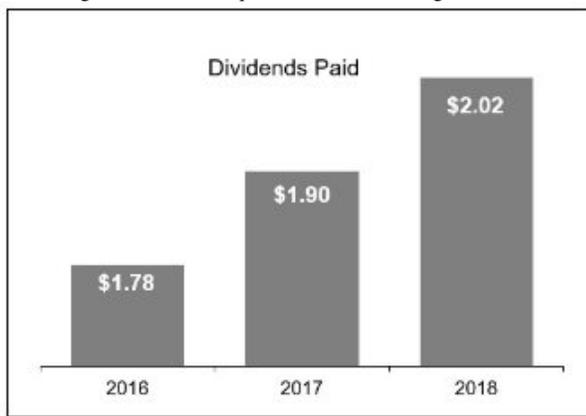

#### *2018 Financial Accomplishments*

- Eversource Energy expanded its 50-50 partnership with Ørsted, the world's leading offshore wind developer, by purchasing, along with Ørsted, the Northeast assets of Deepwater Wind, which include the Revolution Wind and South Fork Wind Farm projects, as well as a 257 square mile lease tract off the New England coast. The two existing projects will deliver 830 MW of contracted clean power to Rhode Island, Connecticut and Long Island, and the newly acquired tract, combined with the existing lease area previously purchased by the partnership's Bay State Wind project, could eventually host approximately 4,000 MW of offshore wind power. The completion of this acquisition, which the partnership began negotiating in 2018 and which was finalized in February 2019, is a significant step in fulfilling Eversource Energy's vision of being a key catalyst for clean energy in the region.

- Through effective management of its corporate operating plan, Eversource Energy's 2018 earnings exceeded the established goal. 2018 earnings were \$3.25 per share.

- Eversource Energy's Board of Trustees increased the annual dividend rate by 6.3 percent for 2018 to \$2.02 per share, which exceeds the EEI index companies' median dividend growth rate of 5.1 percent. The dividend growth rate for the period 2016 - 2018 has averaged 6.5 percent, well ahead of the utility industry.

- Eversource Energy's Total Shareholder Return in 2018 was 6.4 percent, compared to the 3.7 percent growth of the EEI Index companies and a 4.4 percent decline for the S&P 500. Eversource Energy has outperformed the EEI Index companies and the S&P 500 over one-, three-, five- and 10-year periods. An investment of \$1,000 in Eversource Energy common shares for the five-year period beginning January 1, 2014 was worth \$1,804 on December 31, 2018. The following chart represents the comparative one- and five-year total shareholder returns for the periods ending December 31, 2018, respectively:

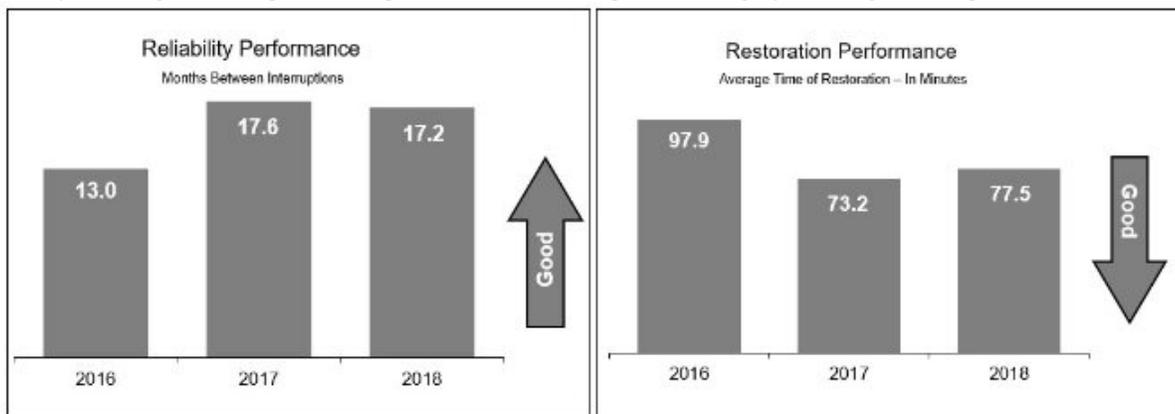

Total Shareholder Return	2018	5-Year
<b>Eversource</b>	<b>6.4%</b>	<b>80.4%</b>
EEI Index	3.7%	68.5%
S&P 500	-4.4%	50.3%

- Eversource Energy's Standard & Poor's ("S&P") Credit Rating remained at A+, the highest utility holding company S&P credit rating in the industry, two notches higher than any other company.

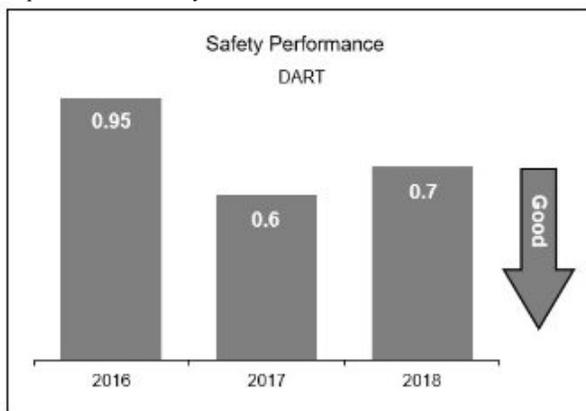

#### 2018 Operational Accomplishments

- Eversource's Electric System Reliability, measured by months between interruptions and average outage minutes per customer, was in the first quartile of the industry. Eversource's overall electric system reliability performance in 2018 continued to outpace the

industry; on average, customer power interruptions were 17.2 months apart, and average system outage duration per customer was 77.5 minutes.

- Eversource's safety performance, measured by days away, restricted or transferred ("DART") per 100 workers, has improved significantly since 2016 and continued to outperform the industry.

- Eversource's Massachusetts electric and gas distribution companies each met or exceeded Service Quality Index performance targets established by regulators in Massachusetts, which is the only state in Eversource's service territory that has such targets, and Eversource exceeded its response time for gas service calls goal.
- Eversource exceeded its goal of having 37 percent of new hires and promotions within the supervisor and above management group be women or persons of color by achieving 42 percent of these positions.
- Eversource achieved very constructive regulatory outcomes, including rate reviews of Yankee Gas, CL&P and Aquarion Water Company of Massachusetts; completed the sale of Eversource's remaining PSNH generation assets; and implemented a constructive rate order for NSTAR Electric.
- Eversource Energy led the response to a series of catastrophic natural gas explosions that occurred in another company's service territory at the request of the Massachusetts Governor and successfully completed initial phase of the incident response.
- Eversource's program of transforming the customer experience achieved significant milestones, including the introduction of a new customer outage map, further increases in timely estimates for service restoration, and increased online customer engagement.

**2018 Clean Energy/ESG Accomplishments**

- Eversource Energy continues to be recognized as the leading energy efficiency program provider in the nation and was recognized by the American Council for an Energy-Efficient Economy with two awards in January of 2019, and by the U. S. Environmental Protection Agency in April of 2018 with the Partner of the Year Sustained Excellence Award for New Hampshire.
- As previously noted, Eversource completed, with its offshore wind partner Ørsted, the acquisition of offshore wind assets that are currently contracted to deliver 830 MW of clean energy, along with offshore lease tracts that in the future may host some 4,000 MW of clean, low cost energy.

- NSTAR Electric is investing \$55 million in battery storage initiatives and \$45 million in electric vehicle infrastructure.
- Eversource completed construction of 62 MW of solar generation across 19 sites, bringing its total solar ownership to 70 MW.
- Independent sustainability rating agencies consistently rank Eversource in the top quartile or top decile of the industry.
- Eversource's commitment to Diversity and Inclusion and Eversource's programs and practices were recognized as exemplary by the Associated Industries of Massachusetts and the Bloomberg Gender Equality Index.
- Eversource continued to make a significant impact in its communities through its corporate philanthropy programs and extensive employee community volunteer programs, with 30,000 employee hours devoted to volunteerism in 2018.

Achievement of the 2018 performance goals, additional accomplishments and the Compensation Committee's assessment of Eversource and executive performance are more fully described in the section below titled "2018 Annual Incentive Program." Specific decisions regarding executive compensation based upon the Committee's assessment of Eversource and executive performance and market data are also described below.

### ***Pay for Performance Philosophy***

The Committee links the compensation of the executive officers, including the Named Executive Officers, to performance that will ultimately benefit Eversource's customers and shareholders. Eversource's compensation program is intended to attract and retain the best executive talent in the industry, motivate its executives to meet or exceed specific stretch financial and operational goals each year, and compensate its executives in a manner that aligns compensation directly with performance. Eversource strives to provide executives with base salary, performance-based annual incentive compensation, and performance-based long-term incentive compensation opportunities that are competitive with market practices and that reward excellent performance.

### ***Executive Compensation Governance***

#### ***What Eversource DOES:***

- ✓ Pay for Performance
- ✓ Share ownership and holding guidelines
- ✓ Broad clawback policy relating to incentive compensation
- ✓ Double-trigger change in control vesting provisions
- ✓ 100 percent of long-term incentive compensation paid in stock
- ✓ Independent compensation consultant
- ✓ Annual Say-on-Pay vote
- ✓ Payout limitations on incentive awards
- ✓ Limited executive trading window

#### ***What Eversource DOESN'T do:***

- ✗ No tax gross-ups in any new or materially amended executive compensation agreements
- ✗ No hedging, pledging or similar transactions by Eversource executives and Trustees
- ✗ No liberal share recycling
- ✗ No dividends on equity awards before vesting
- ✗ No discounts or repricing of options or SARs

- Eversource's executive share ownership and holding guidelines noted in this CD&A emphasize the importance of aligning management with shareholders. Under the share ownership guidelines, which require Eversource's Chief Executive Officer to hold shares equal to six times base salary, Eversource requires its executives to hold 100 percent of the shares awarded under the stock compensation program until the share ownership guidelines have been met.
- Eversource's 2018 Incentive Plan includes a clawback provision that requires its executives and other participants to reimburse Eversource for incentive compensation received, not only if earnings are subsequently required to be restated as a result of noncompliance with accounting rules caused by fraud or misconduct, but also for a material violation of Eversource's Code of Business Conduct or material breach of a covenant in an employment agreement. The Plan also imposes limits on awards and on Trustee compensation and prohibits repricing of awards and liberal share recycling.
- Eversource prohibits gross-ups in all new or materially amended executive compensation agreements.
- Eversource has a "no hedging and no pledging" policy that prohibits all Eversource Trustees and executives from purchasing financial instruments or otherwise entering into any transactions that are designed to have the effect of hedging or offsetting any decrease in the market value of Eversource common shares. This policy also prohibits all pledges, derivative transactions or short sales involving Eversource common shares or the holding of any Eversource common shares in a margin account by Eversource Trustees and

executives. This policy is under review and will be supplemented as appropriate to comply with the SEC's new rules governing disclosure of hedging policies affecting all employees.

- Eversource's employment agreements and incentive plan provide for "double-trigger" change in control acceleration of compensation.
- Eversource's Compensation Committee annually assesses the independence of its compensation consultant, Pay Governance LLC ("Pay Governance"), which is retained directly by the Committee. Pay Governance performs no other consulting nor provides services for Eversource and has no relationship with Eversource that could result in a conflict of interest. At its February 6, 2019 meeting, the Committee concluded that Pay Governance is independent and that no conflict of interest exists between Pay Governance and Eversource.

### **Named Executive Officers**

The executive officers of CL&P listed in the Summary Compensation Table and whose compensation is discussed in this Item 11 are referred to as the "Named Executive Officers" or "NEOs" under SEC regulations. For 2018, CL&P's Named Executive Officers were:

- James J. Judge, Chairman, President and Chief Executive Officer of Eversource Energy and Chairman of the Board of CL&P
- Philip J. Lembo, Executive Vice President and Chief Financial Officer of Eversource Energy and CL&P
- Werner J. Schweiger, Executive Vice President and Chief Operating Officer of Eversource Energy and Chief Executive Officer of CL&P
- Gregory B. Butler, Executive Vice President and General Counsel of Eversource Energy and CL&P
- Joseph R. Nolan, Jr., Executive Vice President - Customer and Corporate Relations of Eversource Energy and Eversource Service

### **Overview of the Compensation Program**

***The Role of the Compensation Committee.*** The Eversource Board of Trustees has delegated to the Compensation Committee overall responsibility for establishing the compensation program for those senior executive officers, whom are referred to in this CD&A as "executives" and whom are deemed to be "officers" under the SEC's regulations that determine the persons whose compensation is subject to disclosure. In this role, the Committee sets compensation policy and compensation levels, reviews and approves performance goals and evaluates executive performance. Although this discussion and analysis refers principally to compensation for the Named Executive Officers, the same compensation principles and practices apply to all executives. The compensation of Eversource's Chief Executive Officer is subject to the further review and approval of all of the independent Eversource Trustees.

***Elements of Compensation .*** Total direct compensation consists of three elements: base salary, annual cash incentive awards and long-term equity-based incentive awards. Indirect compensation is provided through certain retirement, perquisite, severance, and health and welfare benefit programs.

***Eversource's Compensation Objectives .*** The objectives of Eversource's compensation program are to attract and retain superior executive talent, motivate executives to achieve annual and long-term performance goals set each year, and provide total compensation opportunities that are competitive with market practices. With respect to incentive compensation, the Committee believes it is important to balance short-term goals, such as producing earnings, with longer-term goals, such as long-term value creation for shareholders and maintaining a strong balance sheet. The Committee also places great emphasis on system reliability and customer service. Eversource's compensation program utilizes performance-based incentive compensation to reward individual and corporate performance and to align the interests of executives with Eversource Energy's customers and shareholders. The Committee continually increases expectations to motivate executives and employees to achieve continuous improvement in carrying out their responsibilities to customers to deliver energy reliably, safely, with respect for the environment and Eversource employees, and at a reasonable cost, while providing an above-average total return to Eversource shareholders.

***Setting Compensation Levels .*** To ensure that Eversource achieves its goal of providing market-based compensation levels to attract and retain top quality management, the Committee provides executives with target compensation opportunities approximately equal to median compensation levels for executive officers of companies in the utility industry comparable to Eversource in size. To achieve that goal, the Committee and its independent compensation consultant work together to determine the market values of executive direct compensation elements (base salaries, annual incentives and long-term incentives), as well as total compensation, by using competitive market compensation data. The Committee reviews competitive compensation data obtained from utility and general industry surveys and a specific group of peer utility companies. Levels may be lower than median for those executives who are new to their roles, while long-tenured, high performing executives may be compensated above median. The review by Pay Governance performed in late 2018 indicated that Eversource's aggregate executive compensation levels were aligned with median market rates.

***Role of the Compensation Consultant.*** The Committee has retained Pay Governance as its independent compensation consultant. Pay Governance reports directly to the Committee and does not provide any other services to Eversource. With the consent of the Committee, Pay Governance works cooperatively with Eversource's management to develop analyses and proposals for presentation to the Committee. The Committee generally relies on Pay Governance for peer group market data and information as to market practices and trends to assess the competitiveness of the compensation Eversource pays to its executives and to review the Committee's proposed compensation decisions.

**Pay Governance Independence.** In February 2019, the Committee assessed the independence of Pay Governance pursuant to SEC and NYSE rules, and concluded that it is independent and that no conflict of interest exists that would prevent Pay Governance from independently advising the Committee. In making this assessment, the Committee considered the independence factors enumerated in Rule 10C-1(b) under the Securities Exchange Act of 1934, as well as the written representations of Pay Governance that Pay Governance does not provide any other services to Eversource, the level of fees received from Eversource as a percentage of Pay Governance's total revenues, the policies and procedures employed by Pay Governance to prevent conflicts of interest, and whether the individual Pay Governance advisers with whom the Committee consulted own any Eversource Energy common shares or have any business or personal relationships with members of the Committee or the Eversource executives.

**Role of Management.** The role of Eversource's management, and specifically the roles of Eversource's Chief Executive Officer and the Executive Vice President of Human Resources and Information Technology, are to provide current compensation information to the compensation consultant and analyses and recommendations on executive compensation to the Committee based on the market value of the position, individual performance, experience and internal pay equity. Eversource's Chief Executive Officer also provides recommendations on the compensation for the other Eversource Named Executive Officers. None of the executives makes recommendations that affect his or her individual compensation.

## MARKET ANALYSIS

The Compensation Committee seeks to provide executives with target compensation opportunities using a range that is approximately equal to the median compensation levels for executive officers of utility companies comparable to Eversource. Set forth below is a description of the sources of the compensation data used by the Committee when reviewing 2018 compensation:

- **Competitive compensation survey data .** The Committee reviews compensation information obtained from surveys of diverse groups of utility and general industry companies that represent Eversource's market for executive officer talent. Utility industry data serve as the primary reference point for benchmarking officer compensation and are based on a defined peer set, as discussed below, while general industry data is derived from compensation consultant surveys and serves as a secondary reference point. General industry data are used for staff positions and are size-adjusted to ensure a close correlation between the market data and Eversource's scope of operations. The Committee references this information, which it obtains from Pay Governance, to evaluate and determine base salaries and incentive opportunities.
- **Peer group data.** In support of executive pay decisions during 2018 and early 2019, the Committee consulted with Pay Governance, which provided the Committee with a competitive assessment analysis of Eversource's executive compensation levels as compared to the 20 peer group companies listed in the table below. This peer group was chosen because these companies are and continue to be similar to Eversource Energy in terms of size, business model and long-term strategies. The group was reduced in January 2019 upon the merger of SCANA and Dominion Energy, and it will be reviewed by the Committee again in 2019.

Alliant Energy Corporation	DTE Energy Company	PPL Corporation
Ameren Corporation	Edison International	Public Service Enterprise Group, Inc.
American Electric Power Co., Inc.	Entergy Corporation	SCANA Corp. (2018)
CenterPoint Energy, Inc.	FirstEnergy Corp.	Sempra Energy
CMS Energy Corp.	NiSource Inc.	WEC Energy Group, Inc.
Consolidated Edison, Inc.	PG&E Corporation	Xcel Energy Inc.
Dominion Energy, Inc.	Pinnacle West Capital Corporation	

The Committee reviews the appropriateness of the peer group periodically and adjusts the target percentages of annual and long-term incentives based on the survey data and recommendations from Eversource's CEO, after discussion with the compensation consultant, to ensure that they are approximately equal to competitive median levels.

The Committee also determines perquisites to the extent they serve business purposes and sets supplemental benefits at levels that provide appropriate compensation opportunities to the executives. The Committee periodically reviews the general market for supplemental benefits and perquisites using utility and general industry survey data, including data obtained from companies in the peer group.

## MIX OF COMPENSATION ELEMENTS

Eversource targets the mix of compensation for its Chief Executive Officer and its other Named Executive Officers so that the percentages of each compensation element are approximately equal to the competitive median market mix. The mix is heavily weighted toward incentive compensation, and incentive compensation is heavily weighted toward long-term compensation. Since the most senior positions have the greatest responsibility for implementing the long-term business plans and strategies, a greater proportion of total compensation is based on performance with a long-term focus.

The Committee determines the compensation for each executive based on the relative authority, duties and responsibilities of the executive. Eversource's Chief Executive Officer's responsibilities for the strategic direction and daily operations and management of Eversource are greater than the duties and responsibilities of the other executives. As a result, Eversource's Chief Executive Officer's compensation is higher than the

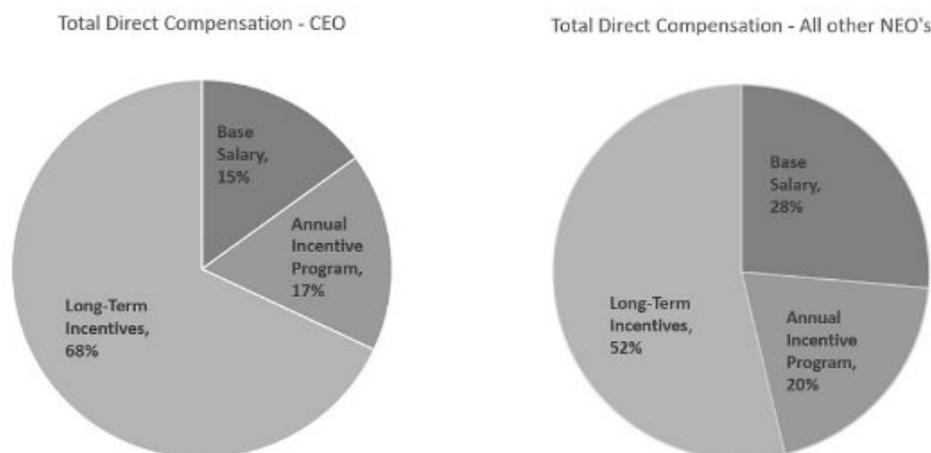

compensation of those other executives. Assisted by the compensation consultant, the Committee regularly reviews market compensation data for executive officer positions similar to those held by Eversource's executives, including its Chief Executive Officer.

The following table sets forth the contribution to 2018 Total Direct Compensation ("TDC") of each element of compensation at target, reflected as a percentage of TDC, for the Named Executive Officers. The percentages shown in this table are at target and therefore do not correspond to the amounts appearing in the Summary Compensation Table.

Named Executive Officer	Percentage of TDC at Target				
	Base Salary	Annual Incentive <sup>(1)</sup>	Performance Shares <sup>(1)</sup>	RSUs <sup>(2)</sup>	TDC
James J. Judge	15	17	34	34	100
Philip J. Lembo	26	20	27	27	100
Werner J. Schweiger	26	20	27	27	100
Gregory B. Butler	30	20	25	25	100
Joseph R. Nolan, Jr.	30	20	25	25	100
NEO average, excluding CEO	28	20	26	26	100

(1) The annual incentive compensation element and performance shares under the long-term incentive compensation element are performance-based.

(2) Restricted Share Units (RSUs) vest over three years contingent upon continued employment.

## RISK ANALYSIS OF EXECUTIVE COMPENSATION PROGRAM

The overall compensation program includes a mix of compensation elements ranging from a fixed base salary that is not at risk to annual and long-term incentive compensation programs intended to motivate executives and eligible employees to achieve individual and corporate performance goals that reflect an appropriate level of risk. The fundamental objective of the compensation program is to foster the continued growth and success of Eversource's business. The design and implementation of the overall compensation program provides the Committee with opportunities throughout the year to assess risks within the compensation program that may have a material effect on Eversource and its shareholders.

The Compensation Committee assesses the risks associated with the executive compensation program on an on-going basis by reviewing the various elements of incentive compensation. The annual incentive program was designed to ensure an appropriate balance between individual and corporate goals, which were deemed appropriate and supportive of Eversource's annual business plan. Similarly, the long-term incentive program was designed to ensure that the performance metrics were properly weighted and supportive of Eversource's strategy. The Committee reviewed the overall compensation program in the context of risks identified in the annual operating plan. The annual and long-term incentive programs were designed to include mechanisms to mitigate risk. These mechanisms include realistic goal setting and discretion with respect to actual payments, in addition to:

- A mix of annual and long-term performance awards to provide an appropriate balance of short- and long-term risk and reward horizon;

- A variety of performance metrics, including financial, operational, customer service, diversity and safety goals and other strategic initiatives for annual performance awards to avoid excessive focus on a single measure of performance;
- Metrics in Eversource's long-term incentive compensation program that use earnings per share growth and relative total shareholder return, which are both robust measures of shareholder value and which reduce the risk that employees might be encouraged to pursue other objectives that increase risk or reduce financial performance;
- The provisions of Eversource's annual and long-term incentive programs, which cap awards at 200 percent of target;
- Expansive clawback provisions on incentive compensation, including clawback for material violations of the Eversource Code of Conduct; and
- Stock ownership requirements for all executives, including the Named Executive Officers, and prohibitions on hedging, pledging and other derivative transactions related to Eversource common shares.

Based on these factors, the Compensation Committee and Eversource's Board of Trustees believe the overall compensation program risks are mitigated to reduce overall compensation risk.

**Results of Eversource's 2018 Say-on-Pay Vote** . Eversource provides its shareholders with the required opportunity to cast the annual advisory vote on executive compensation (a "Say-on-Pay" proposal).

At Eversource's Annual Meeting of Shareholders held on May 2, 2018, 90 percent of the votes cast on the Say-on-Pay proposal were voted to approve the 2017 compensation of the Named Executive Officers, as described in Eversource's 2018 proxy statement. Eversource's Say-on-Pay results, along with utility and general industry peers, are reviewed by the Committee annually to help assess whether Eversource shareholders continue to deem the executives' compensation to be appropriate. The Committee has and will continue to consider the outcome of Eversource's Say-on-Pay votes when making future compensation decisions for the Named Executive Officers.

## **ELEMENTS OF 2018 COMPENSATION**

### **Base Salary**

Base salary is designed to attract and retain key executives by providing an element of total compensation at levels competitive with those of other executives employed by companies of similar size and complexity in the utility and general industries. In establishing base salary, the Compensation Committee relies on compensation data obtained from independent third-party surveys of companies and from an industry peer group to ensure that the compensation opportunities Eversource offers are capable of attracting and retaining executives with the experience and talent required to achieve its strategic objectives. Adjustments to base salaries are made on an annual basis except in instances of promotions.

When setting or adjusting base salaries, the Committee considers annual executive performance appraisals; market pay movement across industries (determined through market analysis); targeted market pay positioning for each executive; individual experience; strategic importance of a position; recommendations of Eversource's Chief Executive Officer; and internal pay equity.

### **Incentive Compensation**

Annual incentive and long-term incentive compensation are provided under Eversource's 2018 Incentive Plan. The annual incentive program provides cash compensation intended to reward performance under Eversource's annual operating plan. The long-term stock-based incentive program is designed to reward demonstrated performance and leadership, motivate future performance, align the interests of the executives with those of shareholders, and retain executives during the term of grants. The annual and long-term programs are designed to strike a balance between Eversource's short- and long-term objectives so that the programs work in tandem.

In addition to the specific performance goals, the Committee assesses other factors, as well as the executives' roles and individual performance and then makes annual incentive program awards at the levels and amounts disclosed in this Item 11.

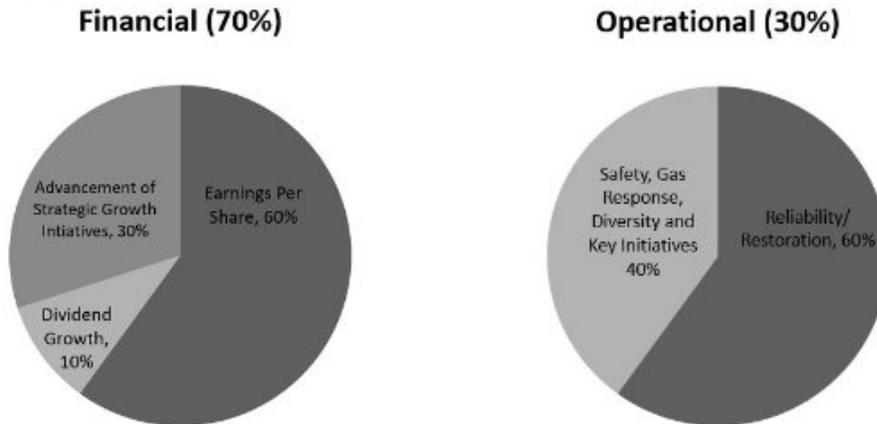

### **2018 ANNUAL INCENTIVE PROGRAM**

In February 2018, the Committee established the terms of the 2018 Annual Incentive Program. As part of the overall program, and after consulting with Pay Governance, the Committee set target award levels for each of the Named Executive Officers that ranged from 65 percent to 120 percent of base salary.

At the February 2018 meeting, the Committee determined that for 2018 it would continue to base 70 percent of the annual incentive performance goals on Eversource's overall financial performance and 30 percent of the annual performance goals on Eversource's overall operational performance. The Committee also determined the specific goals that would be used to assess performance, with potential ratings on each goal ranging from 0 percent to 200 percent of target. The Committee assigned weightings to each of these specific goals. For the financial component, the following goals were used: earnings per share, weighted at 60 percent, dividend growth, weighted at 10 percent, and

advancement of strategic growth initiatives, weighted at 30 percent. For the operational component, the Committee used the following goals: combined service reliability and restoration goals, weighted at 60 percent, and combined safety ratings, gas service response, diversity promotions and hires of leadership employee positions goals and key initiatives, weighted at 40 percent.

**2018 Performance Goals**

At the December 2018 meeting of the Committee, management provided an initial review of Eversource's 2018 performance, followed in February 2019 by a full assessment of the performance goals, the additional accomplishments noted below under the caption "Additional Factors" and the overall performance of Eversource and the executives. In addition to these meetings, the Committee and the Eversource Board were continuously provided updates during 2018 on corporate performance. At the February 6, 2019 meeting, the Committee determined, based on its assessment of the financial and operational performance goals, to set the level of achievement of combined financial and operational performance goals results at 157 percent of target, reflecting the overall strong performance of Eversource and the executive team. In arriving at this determination, the Committee determined that the financial performance goals result was 151 percent of target and the operational performance goals result was 171 percent of target. In particular, the Committee discussed its assessment of the Strategic Growth Initiative goal, and in determining the assessment of 150 percent of a possible 200 percent, it considered the success of Eversource in establishing itself as a leader in clean energy through the greatly expanded Ørsted offshore wind partnership; Eversource's best in industry ranking in energy efficiency; the completed construction of 62 MW in utility scale solar; and the advancement of Eversource's battery storage and electric vehicle infrastructure initiatives. Eversource's Chief Executive Officer recommended to the Committee awards for the executives (other than himself) based on his assessment of each executive's individual performance towards achievement of the performance goals and the additional accomplishments of Eversource, together with each executive's contributions to the overall performance of Eversource. The actual awards determined by the Committee were also based on the same criteria.

**Financial Performance Goals Assessment**

- Eversource Energy's earnings per share in 2018 increased by 4.5 percent over 2017 and exceeded the established goal of a 3.5 percent increase; 2018 earnings equaled \$3.25 per share. Eversource accomplished this by effectively managing its Operating Plan, overcoming several challenges. The Committee determined the earnings per share goal to have attained a 150 percent performance result.
- Eversource Energy increased its dividend to \$2.02 per share, a 6.3 percent increase from the prior year, significantly above the utility industry's median dividend growth of 5.1 percent. The Committee determined this goal to have attained a 155 percent performance.
- Eversource Energy significantly advanced its clean energy leadership through the expansion of its offshore wind energy partnership with Ørsted. Completing a project in February 2019 that commenced in 2018, the partnership purchased two projects that have contract commitments of 830 MW, along with a 257 square mile lease tract off the New England coast. Eversource also completed construction of 62 MW of large scale solar in Massachusetts, and achieved solid progress on existing grid modernization projects, including battery storage and electric vehicle infrastructure. In addition, the Committee also recognized advancements made to continue to expand solar and electric vehicle infrastructure in other jurisdictions. Eversource's appeal of the denial of the single final permit for the Northern Pass hydro power transmission project was accepted by the New Hampshire Supreme Court. The totality of these strategic accomplishments was considered by the Committee to have significantly advanced Eversource Energy's long-term strategy of being a clean energy leader. The Committee determined this goal to have attained a 150 percent performance.

**Operational Performance Goals Assessment**

- Eversource Energy's total electric system reliability performance exceeded that of its peers significantly. Average months between interruptions equaled 17.2 months, near the highest end of the performance zone established by the Committee of 15.5 to 18.5 months and in the first quartile of industry peers. System average restoration duration time equaled 77.5 minutes, within the performance zone

established by the Committee of 80 to 67 minutes and also exceeding peers. The Committee determined these goals to have each attained a 175 percent performance result.

- Eversource Energy achieved the safety performance goal of between 0.5 - 0.9 DART per 1,000 employees; DART equaled 0.7 in 2018, within the established performance zone and better than peers. The Committee determined this goal to have attained a 130 percent performance result.
- On-time response to gas customer emergency calls was 99.5 percent, which was at the high end of the performance zone of 99.2 percent to 99.6 percent. The Committee determined this goal to have attained a 150 percent performance result.
- In 2018, 42 percent of new hires and promotions into leadership roles were women or people of color, substantially exceeding the goal of 37 percent. The Committee determined this goal to have attained a 200 percent performance result.
- Eversource Energy successfully completed important efforts to improve the customer experience, including enhanced web/digital capabilities with a new web-based outage map and improved outage communications. Key customer metrics finished above target. Estimated Time to Restoration calls were well-managed 89 percent of the time, exceeding the goal of 85 percent, and digital customer engagement finished above target at 83.2 percent. In addition, Eversource maintained its best in industry ranking in energy efficiency program effectiveness. The Committee determined this goal to have attained a 150 percent performance result.
- Eversource Energy achieved several constructive regulatory outcomes. These included the settlement agreement approved by the PURA for CL&P, a settlement agreement also approved by the PURA on Yankee Gas' rate review, a positive rate outcome for Aquarion Water Company of Massachusetts, and a settlement with FERC in an important docket on transparency, along with progress on the critical docket relating to return on equity for transmission assets. The Committee determined this goal to have attained a 200 percent performance result.

### Financial Performance Goals

Category	2018 Goal	Eversource Performance	Assessment
Earnings Per Share	Increase earnings by 3.5 percent	Exceeded: \$3.25 per share, a 4.5% increase over 2017 and exceeding goal	150%
Dividend Growth	Increase dividend beyond industry average	Exceeded: Increased to \$2.02 per share, a \$0.12 increase and 6.3% growth, exceeding the industry median of 5.1%	155%
Strategic Growth Initiatives	Advancement of Key Strategic Projects	Achieved: Significantly advanced Eversource's status as a clean energy leader through the major expansion of Eversource's offshore wind partnership with Ørsted; the Northern Pass project appeal was accepted by New Hampshire Supreme Court; and Eversource completed construction of 62MW of solar in Massachusetts and advanced battery storage and electric vehicle infrastructure initiatives	150%
Weightings = Earnings Per Share: 60%; Dividend Growth: 10%; Strategic Growth Initiatives: 30%			

## Operational Performance Goals

Category	2018 Goal	Eversource Performance	Assessment
Reliability - Average Months Between Interruptions (MBI)	Achieve MBI of within 15.5 to 18.5 months	Exceeded: MBI = 17.2 months. At upper level of targeted performance zone, exceeding industry peers	175%
Average Restoration Duration (SAIDI)	Achieve SAIDI of 80 to 67 minutes	Exceeded: SAIDI = 77.5 minutes. Within targeted performance and significantly exceeding industry peers	175%
Safety Rate	0.5 - 0.9 days away/restricted	Achieved: 0.7 DART - Within targeted performance and exceeding industry peers	130%
Gas Service Response	99.2% - 99.6%	Achieved: 99.5%; Upper level of performance range and ahead of industry average. Exceeded all internal and regulatory pipeline safety requirements	150%
Diverse Leadership	37% hires or promotions of leadership level to be women or people of color	Exceeded: 42% - Performed well above target, with 83 of 200 leadership positions filled with diverse candidates. Recognized by industry organizations for diversity leadership	200%
Transform the Customer Experience	Successfully complete new customer outage map, increase accuracy of estimate time to restoration of 85% and achieve digital customer engagement participation at 83%	Achieved: Enhanced web/digital capabilities with new outage map and improved outage communications. Key customer metrics finished above target. Estimated Times for Restoration given to customers were well managed 89% of the time and digital customer engagement finished above target at 83.2%	150%
Positive Regulatory Outcomes	Obtain constructive rate case outcomes	Exceeded: Successfully completed constructive settlements on CL&P and Yankee Gas with PURA. Constructive rate outcome in MA for Aquarion. Reached settlement on FERC Transparency docket with 30 intervenors, and progress made on 4 open FERC ROE complaints, including dismissal of one	200%
Weightings = Reliability and Restoration: 60%; Safety, Gas Response, Diversity and Key Initiatives: 40%			

## Performance Goals Assessment

Financial Performance at 151% (weighted 70%)	106%
Operational Performance at 171% (weighted 30%)	51%
Overall Performance	157%

## Additional Factors

The following key financial, strategic, environmental and customer-focused results were also considered significant by the Committee in making an assessment of overall financial and operational performance, but were not given specific weightings or assigned a specific performance assessment score:

- At the request of the Massachusetts Governor, Eversource led the emergency response effort to a major natural gas incident that occurred in another company's franchise territory and received widespread recognition for leadership in the major restoration efforts that followed.
- Eversource responded extremely well to major weather events affecting its natural gas, electric and water systems, including three back-to-back major March blizzards, May tornadoes and July heatwaves, and were awarded two industry awards for very effective storm response and recovery from EEI.
- Eversource received awards from industry groups for performance in ERM, Sustainability, Diversity, Energy Efficiency, and Investor Relations. Eversource's ESG ratings for sustainability are top quartile by several major sustainability ratings providers.
- Eversource maintained its standing of having the best credit rating in the industry of "A+", completing \$2 billion of long term debt issuances at very competitive rates.
- Eversource completed the sale of its remaining New Hampshire generation assets.
- Eversource's employee engagement initiatives delivered positive results in many areas; the results of Eversource's company-wide employee engagement survey showed significantly higher overall favorability; Eversource's training programs and online employee

community have helped Eversource to deliver better customer service; Eversource advanced Diversity & Inclusion through leadership commitment and active D&I councils and business resource groups; and Eversource continued to foster positive union management relationships, including reaching early contract agreements with two of the largest unions in Massachusetts and Connecticut.

### ***Individual Executives' Performance Factors Considered by the Committee***

It is the Committee's philosophy to provide incentives for Eversource executives to work together as a highly effective, integrated team to achieve or exceed the financial, operational, safety, customer, strategic and diversity goals and objectives. The Committee also reviews and assesses individual executive performance. The Committee based the annual incentive payments on team performance and also on the Committee's assessment of each executive's individual performance in supporting the performance goals, additional achievements and Eversource's overall performance. With respect to Eversource's Chief Executive Officer, the Committee and all other independent Eversource Trustees assessed the performance of the Chief Executive Officer and, based on the recommendations of the Chief Executive Officer as to executives other than himself, the Committee assessed the performance of the Named Executive Officers to determine the individual incentive payments as disclosed in the Summary Compensation Table. Based on the Committee's review, which included its assessment of the performance goals, the significant other accomplishments of Eversource and the Named Executive Officers, and the overall performance of Eversource and each of the Named Executive Officers, considered in its totality by the Committee to have been excellent, the Committee approved annual incentive program payments for the Named Executive Officers at levels that ranged from 156 percent to 193 percent of target. These payments reflected the individual and team contributions of the Named Executive Officers in achieving the goals and the additional accomplishments and Eversource's overall performance.

In determining Mr. Judge's annual incentive payment of \$2,430,000, which was 157 percent of target and which reflects his and Eversource's continued strong performance, the Committee and the Board considered the totality of Eversource's success in accomplishing the goals set by the Committee, the additional accomplishments of Eversource, and the superior leadership of Mr. Judge in every part of the business, significantly advancing Eversource towards its goal of being recognized as the best energy company in the country by 2020.

#### **2018 Annual Incentive Program Awards**

<b>Named Executive Officer</b>	<b>Award</b>
James J. Judge	\$ 2,430,000
Philip J. Lembo	765,000
Werner J. Schweiger	815,000
Gregory B. Butler	645,000
Joseph R. Nolan, Jr.	720,000

### **Long-Term Incentive Program**

#### *General*

Eversource's long-term incentive program is intended to focus on Eversource's longer-term strategic goals and to help retain its executives. A new three-year program commences every year. For the three programs described below, each executive's target long-term incentive opportunity consisted of 50 percent Performance Shares and 50 percent RSUs. Performance Shares are designed to reward long-term achievements as measured against pre-established performance measures. RSUs are designed to provide executives with an incentive to increase the value of Eversource common shares in alignment with shareholder interests, while also serving as a retention component for executive talent. Eversource believes these compensation elements create a focus on continued Eversource and share price growth to further align the interests of Eversource's executives with the interests of Eversource's shareholders.

### **Performance Share Grants**

#### *General*

Performance Shares are designed to reward future financial performance, measured by long-term earnings growth and shareholder returns over a three-year performance period, therefore aligning management compensation with performance. Performance Shares are granted as a target number of Eversource common shares. The number of Performance Shares is determined by dividing the target grant value in dollars by the average daily closing prices of Eversource common shares on the New York Stock Exchange for the ten business days preceding the grant date and rounding to the nearest whole share. Until the end of the performance period, the value of dividends that would have been paid with respect to the Performance Shares had the Performance Shares been actual common shares will be deemed to be invested in additional Performance Shares, which remain at risk and do not vest until actual performance for the period is determined.

*Performance Shares under the 2017 - 2019 and 2018 - 2020 Programs*

For the 2018 - 2020 Program, the Committee determined it would continue to measure performance using: (i) average diluted earnings per share growth ("EPSG"); and (ii) relative total shareholder return ("TSR") measured against the performance of companies that comprise the EEI Index. As in 2017 and 2016, the Committee selected EPSG and TSR as performance measures because the Committee continues to believe that they are generally recognized as the best indicators of overall corporate performance. Further, the Committee considers it a best practice to use a combination of relative and absolute metrics, with EPS growth serving as a key input to shareholder value and TSR serving as the output.

The number of Performance Shares awarded at the end of the three-year period ranges from 0 percent to 200 percent of target, depending on EPSG and relative TSR performance as set forth in the performance matrix below. Performance Share grants are based on a percentage of annualized base salary at the time of the grant and measured in dollars. The target number of shares under the 2018 - 2020 Program ranged from 35 percent to 233 percent of base salary. For the 2018 - 2020 Program, EPSG ranges from 0 percent to 9 percent, while TSR ranges from below the 10th percentile to above the 90th percentile. The TSR target is 100 percent, which the Committee determined is challenging but achievable. As a result, vesting at 100 percent of target occurs at various combinations of EPSG and TSR performance. In addition, the value of any performance shares that actually vest may increase or decrease over the vesting period based on Eversource's share price performance. The number of performance shares granted at target were approved as set forth in the table below. The Committee and the independent Members of the Eversource Board determined the Performance Share grants for Eversource's Chief Executive Officer. Based on input from the Chief Executive Officer, the Committee determined the Performance Share grants for each of the other executive officers, including the other Named Executive Officers.

For the 2017 - 2019 Program, the Committee used the same performance measures of EPSG and TSR and the same criteria used in the 2018 - 2020 Program described above.

The performance matrix set forth below describes how the Performance Share payout will be determined under the 2017 - 2019 and 2018 - 2020 Long-Term Incentive Programs and how the Performance Share payout was determined under the 2016 - 2018 Program. Three-year average EPSG is cross-referenced with the actual three-year TSR percentile to determine actual performance share payout as a percentage of target:

**2016 - 2018, 2017 - 2019 and 2018 - 2020 Long-Term Incentive Programs Performance Share Potential Payout**

Three-Year Average EPS Growth	Three-Year Relative Total Shareholder Return Percentiles									
	Below 10th	20th	30th	40th	50th	60th	70th	80th	90th	Above 90th
9%	110%	120%	130%	140%	150%	160%	170%	180%	190%	200%
8%	100%	110%	120%	130%	140%	150%	160%	170%	180%	190%
7%	90%	100%	110%	120%	130%	140%	150%	160%	170%	180%
6%	80%	90%	100%	110%	120%	130%	140%	150%	160%	170%
5%	70%	80%	90%	100%	110%	120%	130%	140%	150%	160%
4%	60%	70%	80%	90%	100%	110%	120%	130%	140%	150%
3%	40%	50%	70%	80%	90%	100%	110%	120%	130%	140%
2%	20%	40%	60%	70%	80%	90%	100%	110%	120%	130%
1%	—	10%	40%	60%	70%	80%	90%	100%	110%	120%
0%	—	—	20%	30%	50%	70%	80%	90%	100%	110%
Below 0%	—	—	—	—	10%	20%	30%	40%	50%	60%

**Long-Term Incentive Program Performance Share Grants at Target**

Named Executive Officer	2017 - 2019 Performance Share Grant	2018 - 2020 Performance Share Grant
James J. Judge	48,259	48,912
Philip J. Lembo	11,520	10,682
Werner J. Schweiger	11,703	10,845
Gregory B. Butler	9,052	8,410
Joseph R. Nolan, Jr.	7,920	7,737

*Results of the 2016 - 2018 Performance Share Program*

The 2016 - 2018 Program, which used the same criteria used in the 2018 - 2020 Program described above, was completed on December 31, 2018. The actual performance level achieved under the Program was a three-year average adjusted EPS growth of 5.0 percent and a three-year total shareholder return at the 34th percentile, which when interpolated in accordance with the criteria established by the Committee in 2016 resulted in vesting performance share units at 94 percent of target. At its February 6, 2019 meeting, the Committee confirmed that the actual results achieved were calculated in accordance with established performance criteria. The number of Performance Shares awarded to the Named Executive Officers were approved as set forth in the table below.

**2016 – 2018 Long-Term Incentive Program  
Performance Share Awards**

<b>Named Executive Officer</b>	<b>Performance Share Award</b>
James J. Judge	13,206
Philip J. Lembo *	2,029
Werner J. Schweiger	12,987
Gregory B. Butler	8,571
Joseph R. Nolan, Jr.	4,954

\* Reflects award in 2016 to Mr. Lembo made prior to his election as Chief Financial Officer.

**Restricted Share Units (RSUs)**

*General*

Each RSU granted under the long-term incentive program entitles the holder to receive one Eversource common share at the time of vesting. All RSUs granted under the long-term incentive program vest in equal annual installments over three years. RSU holders are eligible to receive reinvested dividend units on outstanding RSUs held by them to the same extent that dividends are declared and paid on Eversource common shares. Reinvested dividend equivalents are accounted for as additional RSUs that accrue and are distributed with the common shares issued upon vesting of the underlying RSUs. Common shares, including any additional common shares in respect of reinvested dividend equivalents, are not issued for any RSUs that do not vest.

The Committee determined RSU grants for each executive officer participating in the long-term incentive program. RSU grants are based on a percentage of annualized base salary at the time of the grant and measured in dollars. In 2018, the percentage used for each executive officer was based on the executive officer's position in Eversource and ranged from 35 percent to 233 percent of base salary. The Committee reserves the right to increase or decrease the RSU grant from target for each officer under special circumstances. The Committee and all other independent members of the Eversource Board determined the RSU grants for Eversource's Chief Executive Officer. Based on input from the Chief Executive Officer, the Committee determined the RSU grants for each of the other executive officers, including the other Named Executive Officers.

All RSUs are granted on the date of the Committee meeting at which they are approved. RSU grants are subsequently converted from dollars into Eversource common share equivalents by dividing the value of each grant by the average closing price for Eversource common shares over the ten trading days prior to the date of the grant. RSU grants at 100 percent of target were approved as set forth in the table below.

<b>Named Executive Officer</b>	<b>RSUs Granted</b>		
	<b>2016</b>	<b>2017</b>	<b>2018</b>
James J. Judge	12,004	48,259	48,912
Philip J. Lembo *	1,844 *	11,520	10,682
Werner J. Schweiger	11,805	11,703	10,845
Gregory B. Butler	7,791	9,052	8,410
Joseph R. Nolan, Jr.	4,503	7,920	7,737

\* Reflects grant to Mr. Lembo made prior to his election as Chief Financial Officer.

**Clawbacks**

If Eversource's earnings were to be restated as a result of noncompliance with accounting rules caused by fraud or misconduct, or if a plan participant engages in a willful material violation of Eversource's Code of Business Conduct or material corporate policy, or the breach of a material covenant in an employment agreement, as determined by the Eversource Board of Trustees, the participant will be required by the Eversource 2018 Incentive Plan to reimburse Eversource for incentive compensation awards received by them just for that year.

**No Hedging and No Pledging Policy**

Eversource has adopted a policy prohibiting the purchase of financial instruments or otherwise entering into transactions designed to have the effect of hedging or offsetting any decrease in the value of Eversource common shares by Eversource's Trustees and executives. This policy also prohibits all pledging, forward sale contracts, zero cost collars, short sales, the holding of any Company common shares in a margin account, or otherwise pledging Eversource common shares. This policy will be reviewed and amended as appropriate to comply with the SEC's new rules governing disclosure of hedging policies affecting all employees.

**Share Ownership Guidelines and Retention Requirements**

The Committee has approved share ownership guidelines to further emphasize the importance of share ownership by Eversource officers. As indicated in the table below, the guidelines call for Eversource's Chief Executive Officer to own common shares equal to six times base salary, executive vice presidents to own a number of common shares equal to three times base salary, senior vice presidents to own common shares equal to two times base salary, and all other officers to own a number of common shares equal to one to one and one half times base salary.

Officers and Eversource Trustees may only transact in Eversource common shares during approved trading windows and subject to continuing compliance with these share ownership guidelines.

<b>Executive Officer</b>	<b>Base Salary Multiple</b>
Chief Executive Officer	6
Executive Vice Presidents	3
Operating Company Presidents / Senior Vice Presidents	2
Vice Presidents	1 – 1.5

Eversource requires that its officers attain these ownership levels within five years. All Eversource officers, including Eversource's Named Executive Officers, have satisfied the share ownership guidelines or are expected to satisfy them within the applicable timeframe. Common shares, whether held of record, in street name, or in individual 401(k) accounts, and RSUs satisfy the guideline requirements to hold 100 percent of the net shares. Unvested performance shares do not count toward the ownership guidelines. In addition to the share ownership guidelines noted above, all officers must hold all the shares awarded under Eversource's incentive compensation plan until the share ownership guidelines have been met.

#### **Other Benefits**

##### **Retirement Benefits**

Eversource provides a qualified defined benefit pension program for certain officers, which is a final average pay program subject to tax code limits. Because of such limits, Eversource also maintain a supplemental non-qualified pension program. Benefits are based on base salary and certain incentive payments, which is consistent with the goal of providing a retirement benefit that replaces a percentage of pre-retirement income. The supplemental program compensates for benefits barred by tax code limits, and generally provides (together with the qualified pension program) benefits equal to approximately 60 percent of pre-retirement compensation (subject to certain reductions) for Messrs. Judge, Lembo, Schweiger and Nolan, and approximately 50 percent of such compensation for Mr. Butler. The supplemental program has been discontinued for newly-elected officers.

As set forth in this CD&A, Mr. Judge and Mr. Lembo were elected to the positions of President and Chief Executive Officer of Eversource and Executive Vice President and Chief Financial Officer of Eversource, respectively, in 2016, such that 2017 was the first year that each served in his new position. Each had a resulting substantial increase in the actuarial, formula-based present values of their pension benefit due to the increase in their base pay and annual bonus. These increases are disclosed in the Change in Pension Value and Non-Qualified Deferred Earnings column of the Summary Compensation Table. These accounting-based increases for Mr. Judge and Mr. Lembo, while representing a substantial portion of their 2017 and 2018 total compensation disclosed in the SEC Total column of the Summary Compensation Table, resulted in no actual 2017 or 2018 W-2 earnings for either of them.

For certain participants, the benefits payable under the Supplemental Non-Qualified Pension Program differ from those described above. The program benefit payable to Mr. Schweiger is fully vested and is further reduced by benefits he is entitled to receive under previous employers' retirement plans.

Also see the narrative accompanying the "Pension Benefits" table and accompanying notes for more detail on the above program.

##### **401(k) Benefits**

Eversource offers a qualified 401(k) program for all employees, including executives, subject to tax code limits. After applying these limits, the program provides a match of 50 percent of the first 8 percent of eligible base salary, up to a maximum of \$11,000 per year for Messrs. Judge, Lembo, Schweiger and Nolan. For Mr. Butler, the program provides a match of 100 percent of the first 3 percent of eligible base salary, up to a maximum of \$8,250 per year.

##### **Deferred Compensation**

Eversource offers a non-qualified deferred compensation program for its executives. In 2018, the program allowed deferral of up to 100 percent of base salary, annual incentives and long-term incentive awards. The program allows participants to select investment measures for deferrals based on an array of deemed investment options (including certain mutual funds and publicly traded securities).

See the Non-Qualified Deferred Compensation Table and accompanying notes for additional details on the above program.

##### **Perquisites**

Eversource provides executives with limited financial planning benefits, vehicle leasing and access to tickets to sporting events. The current level of perquisites does not factor into decisions on total compensation.

## **Contractual Agreements**

Eversource maintains contractual agreements with all of its Named Executive Officers that provide for potential compensation in the event of certain terminations, including termination following a Change in Control. Eversource believes these agreements are necessary to attract and retain high quality executives and to ensure executive focus on Eversource business during the period leading up to a potential Change in Control. The agreements are "double-trigger" agreements that provide executives with compensation in the event of a Change in Control followed by termination of employment due to one or more of the events set forth in the agreements, while still providing an incentive to remain employed with Eversource for the transition period that follows.

Under the agreements, certain compensation is generally payable if, during the applicable change in control period, the executive is involuntarily terminated (other than for cause) or terminates employment for "good reason." These agreements are described more fully in the tables following this CD&A under "Payments Upon Termination."

## **Tax and Accounting Considerations**

Section 162(m) of the Internal Revenue Code precludes a public corporation from taking an income tax deduction in any one year for compensation in excess of \$1 million payable to its Named Executive Officers (excluding the Chief Financial Officer) who are employed on the last day of the fiscal year, unless certain specific performance goals are satisfied. Until January 1, 2018, there was an exception to the \$1 million limitation for performance-based compensation meeting certain requirements. This exception was repealed, effective for taxable years beginning after December 31, 2017, and the limitation on deductibility generally was expanded to include all Named Executive Officers. As a result, compensation paid to the Named Executive Officers in excess of \$1 million per officer will not be deductible unless it qualifies for transition relief applicable to certain arrangements in place as of and not modified after November 2, 2017.

The Committee believes that the availability of a tax deduction for forms of compensation should be one of many factors taken into consideration of providing market-based compensation to attract and retain highly qualified executives. The Committee believes it is in Eversource's best interests to retain discretion to make compensation awards, whether or not deductible.

Eversource has adopted the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 718, *Compensation-Stock Compensation*. In general, Eversource and the Committee do not consider accounting considerations in structuring compensation arrangements.

## **Equity Grant Practices**

Equity awards noted in the compensation tables are made annually at the February meeting of the Compensation Committee (subject to further approval by all of the independent members of Eversource's Board of Trustees of Eversource's Chief Executive Officer's award) when the Committee also determines base salary, annual and long-term incentive compensation targets and annual incentive awards. The date of this meeting is chosen at least a year in advance, and therefore awards are not coordinated with the release of material non-public information.

## SUMMARY COMPENSATION TABLE

The table below summarizes the total compensation paid or earned by CL&P's principal executive officer (Mr. Judge), principal financial officer (Mr. Lembo) and the three other most highly compensated executive officers in 2018, determined in accordance with the applicable SEC disclosure rules (collectively, the Named Executive Officers). As explained in the footnotes below, the amounts reflect the economic benefit to each Named Executive Officer of the compensation item paid or accrued on behalf of the Named Executive Officers for the fiscal year ended December 31, 2018 in accordance with such rules. All salaries, annual incentive amounts and long-term incentive amounts shown for each Named Executive Officer were paid for all services rendered to Eversource Energy and its subsidiaries, including CL&P, in all capacities.

Name and Principal Position	Year	Salary	Stock Awards <sup>(1)</sup>	Non-Equity Incentive Plan <sup>(2)</sup>	Change in Pension Value and Non-Qualified Deferred Earnings <sup>(3)</sup>	All Other Compensation <sup>(4)</sup>	SEC Total	Adjusted SEC Total <sup>(5)</sup>
<b>James J. Judge</b>	2018	\$ 1,277,078	\$ 5,632,217	\$ 2,430,000	\$ 5,560,877	\$ 25,209	\$ 14,925,381	\$ 9,364,504
Chairman, President and Chief Executive Officer of Eversource Energy; Chairman of CL&P	2017	1,230,694	5,504,904	2,285,000	6,869,854	25,009	15,915,461	9,045,607
	2016	959,690	1,382,021	2,200,000	1,616,742	24,809	6,183,262	4,566,520
<b>Philip J. Lembo</b>	2018	648,271	1,230,032	765,000	1,535,216	21,685	4,200,204	2,664,988
Executive Vice President and Chief Financial Officer of Eversource Energy and CL&P	2017	613,847	1,314,086	700,000	1,246,325	21,485	3,895,743	2,649,418
	2016	439,208	212,300	600,000	543,133	21,285	1,815,926	1,272,793
<b>Werner J. Schweiger</b>	2018	658,271	1,248,802	815,000	538,978	53,896	3,314,947	2,775,969
Executive Vice President and Chief Operating Officer of Eversource Energy and CL&P	2017	634,078	1,334,961	775,000	1,225,581	21,418	3,991,038	2,765,457

Executive Vice President and General Counsel of Eversource Energy and CL&P	2017	597,886	1,032,562	625,000	1,670,745	15,361	3,941,554	2,270,809
	2016	514,494	896,978	575,000	539,638	12,886	2,538,996	1,999,358
<b>Joseph R. Nolan, Jr.</b>	2018	561,540	890,916	720,000	1,193,350	56,084	3,421,890	2,228,540
Executive Vice President-Customer and Corporate Relations of Eversource Energy and Eversource Service	2017	515,578	903,434	680,000	1,486,025	16,076	3,601,113	2,115,088
	2016	419,364	518,430	550,000	826,729	15,876	2,330,399	1,503,670

(1) Reflects the aggregate grant date fair value of restricted share units (RSUs) and performance shares granted in each fiscal year, calculated in accordance with FASB ASC Topic 718.

RSUs were granted to each Named Executive Officer as long-term compensation, which vest in equal annual installments over three years.

RSUs were granted to each Named Executive Officer in 2018 as long-term compensation, which vest in equal annual installments over three years. In 2018, each of the Named Executive Officers was also granted performance shares as long-term incentive compensation. These performance shares will vest based on the extent to which the two performance conditions described in the CD&A are achieved as of December 31, 2020. The grant date fair values for the performance shares, assuming achievement of the highest level of both performance conditions, are as follows: Mr. Judge: \$4,309,636; Mr. Lembo: \$941,191; Mr. Schweiger: \$955,553; Mr. Butler: \$741,005; and Mr. Nolan: \$681,707.

Holders of RSUs and performance shares are eligible to receive dividend equivalent units on outstanding awards to the same extent that dividends are declared and paid on Eversource common shares. Dividend equivalent units are accounted for as additional common shares that accrue and are distributed simultaneously with those common shares that are issued upon vesting of the underlying RSUs and performance shares.

Mr. Judge was elected President and Chief Executive Officer of Eversource Energy on April 6, 2016, upon the retirement of Thomas J. May. Mr. Judge had previously served as Executive Vice President and Chief Financial Officer of Eversource Energy until his election as President and Chief Executive Officer. Mr. Lembo was elected Executive Vice President and Chief Financial Officer of Eversource Energy on May 4, 2016, having previously served as Vice President and Treasurer. Thus, 2017 was the first year during which the Committee made long term incentive program stock awards to Mr. Judge and Mr. Lembo in their then-new positions of President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, respectively.

(2) Includes payments to the Named Executive Officers under the 2018 Annual Incentive Program: Mr. Judge: \$2,430,000; Mr. Lembo: \$765,000; Mr. Schweiger: \$815,000; Mr. Butler: \$645,000 and Mr. Nolan: \$720,000.

(3) Includes the actuarial increase in the present value from December 31, 2017 to December 31, 2018 of the Named Executive Officers' accumulated benefits under all defined benefit pension programs and agreements, determined using interest rate and mortality rate assumptions consistent with those appearing in the footnotes to this Annual Report on Form 10-K for the fiscal year ended December 31, 2018. The Named Executive Officer may not be fully vested in such amounts. More information on this topic is set forth in the Pension Benefits table. There were no above-market earnings in deferred compensation value during 2018, as the terms of the Deferred Compensation Plan provide for market-based investments, including Eversource common shares. Mr. Judge and Mr. Lembo were elected to the positions of President and Chief Executive Officer of Eversource Energy and Executive Vice President and Chief Financial Officer of Eversource Energy, respectively, in 2016, such that 2017 was the first year that each served in his new position. Each had a resulting substantial increase in the actuarial, formula-based present value of his pension benefit due to the increase in his base pay and annual

bonus and the effect of interest rates. These accounting-based increases, while representing for Mr. Judge and Mr. Lembo a substantial portion of their 2017 and 2018 total compensation disclosed in the SEC Total above, resulted in no actual 2017 W-2 earnings for either of them.

- (4) Includes matching contributions allocated by us to the accounts of Named Executive Officers under the 401k Plan as follows: \$11,000 for each of Messrs. Judge, Lembo, Schweiger and Nolan, and \$8,250 for Mr. Butler. For Mr. Judge, the value shown includes financial planning services valued at \$5,000 and \$9,209 paid by Eversource for a company-leased vehicle. For Mr. Lembo, the value shown includes financial planning services valued at \$5,000 and \$5,685 paid by Eversource for a company-leased vehicle. For Mr. Schweiger, the value shown includes financial planning services valued at \$5,000 and \$5,646 paid by Eversource for a company-leased vehicle. For Mr. Nolan, the value shown includes \$5,276 paid by Eversource for a company-leased vehicle. For Messrs. Schweiger and Nolan, the value includes additional compensation of \$32,250 and 39,808, respectively, for their efforts in leading the initial response, as directed by the Massachusetts Department of Public Utilities, to a very substantial series of natural gas explosions that occurred in September 2018 in a non-Eversource natural gas company's service territory. None of the other Named Executive Officers received perquisites valued in the aggregate in excess of \$10,000.
- (5) The amounts in the Adjusted SEC Total column reflect an adjustment to the total compensation reported in the column marked SEC Total. The Adjusted SEC Total subtracts the actuarial change in pension value disclosed in the column titled "Change in Pension Value and Non-Qualified Deferred Earnings" as further described in footnote 3 above in order to reflect compensation earned during the year by the executive without consideration of pension benefit impacts. The amounts in this column differ substantially from, and are not a substitute for, the amounts noted in the SEC Total.

#### GRANTS OF PLAN-BASED AWARDS DURING 2018

The Grants of Plan-Based Awards Table provides information on the range of potential payouts under all incentive plan awards during the fiscal year ended December 31, 2018. The table also discloses the underlying equity awards and the grant date for equity-based awards. Eversource has not granted any stock options since 2002.

Name	Grant Date	Estimated Future Payouts Under Non-Equity Incentive Plan Awards			Estimated Future Payouts Under Equity Incentive Plan Awards <sup>(1)</sup>			All Other Stock Awards: Number of Shares of Stock or Units <sup>(2)</sup>	Grant Date Fair Value of Stock and Option Awards <sup>(3)</sup>

Long-Term Incentive <sup>(5)</sup>	02/07/18	—	—	—	—	7,737	15,474	7,737	890,916

- (1) Reflects the number of performance shares granted to each of the Named Executive Officers on February 7, 2018 under the 2018 - 2020 Long-Term Incentive Program. Performance shares were granted subject to a three-year Performance Period that ends on December 31, 2020. At the end of the Performance Period, Eversource common shares will be awarded based on actual performance results as a percentage of target, subject to reduction for applicable payroll withholding taxes. Holders of performance shares are eligible to receive dividend equivalent units on outstanding performance shares awarded to them to the same extent that dividends are declared and paid on Eversource common shares. Dividend equivalent units are accounted for as additional common shares that accrue and are distributed simultaneously with the number of common shares underlying the performance shares that are actually awarded. The Annual Incentive Program did not include an equity component.
- (2) Reflects the number of RSUs granted to each of the Named Executive Officers on February 7, 2018 under the 2018 - 2020 Long-Term Incentive Program. RSUs vest in equal installments on February 7, 2019, 2020 and 2021. Common shares will be distributed with respect to vested RSUs on a one-for-one basis following vesting, after reduction for applicable payroll withholding taxes. Holders of RSUs are eligible to receive dividend equivalent units on outstanding RSUs awarded to them to the same extent that dividends are declared and paid on Eversource common shares. Dividend equivalent units are accounted for as additional common shares that accrue and are distributed simultaneously with those common shares actually distributed in respect of the underlying RSUs.
- (3) Reflects the grant date fair value, determined in accordance with FASB ASC Topic 718, of RSUs and performance shares granted to the Named Executive Officers on February 7, 2018 under the 2018 - 2020 Long-Term Incentive Program.
- (4) The threshold payment under the Annual Incentive Program is 50 percent of target. The actual payments in 2019 for performance in 2018 are set forth in the Non-Equity Incentive Plan column of the Summary Compensation Table.

- (5) Reflects the range of potential payouts, if any, pursuant to performance share awards under the 2018 - 2020 Long-Term Incentive Program, as described in the CD&A.

### OUTSTANDING EQUITY GRANTS AT DECEMBER 31, 2018

The following table sets forth RSU and performance share grants outstanding at the end of the fiscal year ended December 31, 2018 for each of the Named Executive Officers. There are no outstanding options.

Name	Stock Awards <sup>(1)</sup>			
	Number of Shares or Units of Stock That Have Not Vested (#) <sup>(2)</sup>	Market Value of Shares or Units of Stock That Have Not Vested (\$) <sup>(3)</sup>	Equity Incentive Plan Awards: Number of Unearned Shares, Units or Other Rights That Have Not Vested (#) <sup>(4)</sup>	Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested (\$) <sup>(5)</sup>
<b>James J. Judge</b>	89,263	\$ 5,805,692	115,219	\$ 7,493,837
<b>Philip J. Lembo</b>	19,907	1,294,719	25,353	1,648,967
<b>Werner J. Schweiger</b>	23,857	1,551,685	36,675	2,385,329
<b>Gregory B. Butler</b>	17,985	1,169,714	26,915	1,750,582
<b>Joseph R. Nolan, Jr.</b>	15,278	993,692	21,396	1,391,576

- (1) Awards and market values of awards appearing in the table and the accompanying notes have been rounded to whole units.
- (2) A total of 75,187 unvested RSUs will vest on February 7, 2019 (Mr. Judge: 38,407; Mr. Lembo: 8,451; Mr. Schweiger: 12,225; Mr. Butler: 8,972 and Mr. Nolan: 7,132). A total of 61,271 unvested RSUs will vest on February 7, 2020 (Mr. Judge: 34,004; Mr. Lembo: 7,775; Mr. Schweiger: 7,896; Mr. Butler: 6,115; and Mr. Nolan: 5,481). A total of 29,831 unvested RSUs will vest on February 8, 2021 (Mr. Judge: 16,852; Mr. Lembo: 3,680; Mr. Schweiger: 3,736; Mr. Butler: 2,897; and Mr. Nolan: 2,666).
- (3) The market value of RSUs is determined by multiplying the number of RSUs by \$65.04, the closing price per common share on December 31, 2018, the last trading day of the year.
- (4) Reflects the target payout level for performance shares granted under the 2016 - 2018 Program, the 2017 - 2019 Program and the 2018 - 2020 Program.

The performance period for the 2016 - 2018 Program ended on December 31, 2018. Awards under that program are set forth in the CD&A under the "Results of the 2016 - 2018 Performance Share Program."

The performance share award for 2017 - 2019 Program and the 2018 - 2020 Program will be based on actual performance results as a percentage of target, subject to reduction for applicable payroll withholding taxes. As described more fully under "Performance Shares" in the CD&A and footnote (1) to the Grants of Plan-Based Awards table, performance shares will vest following a three-year performance period based on the extent to which the two performance conditions are achieved. Under the 2017 - 2019 Program, a total of 94,319 unearned performance shares (including accrued dividend equivalents) will vest based on the extent to which the two performance conditions described in the CD&A are achieved as of December 31, 2019, assuming achievement of these conditions at a target level of performance: Mr. Judge: 51,459; Mr. Lembo: 12,284; Mr. Schweiger: 12,479; Mr. Butler: 9,652 and Mr. Nolan: 8,445. Under the 2018 - 2020 Program, a total of 89,494 unearned performance shares (including accrued dividend equivalents) will vest based on the extent to which the two performance conditions described in the CD&A are achieved as of December 31, 2020. Assuming achievement of these conditions at a target level of performance, the amount of the awards would be as follows: Mr. Judge: 50,555; Mr. Lembo: 11,041; Mr. Schweiger: 11,209; Mr. Butler: 8,692; and Mr. Nolan: 7,997.

- (5) The market value is determined by multiplying the number of performance shares in the adjacent column by \$65.04, the closing price of Eversource Energy common shares on December 31, 2018, the last trading day of the year.

### OPTION EXERCISES AND STOCK VESTED IN 2018

The following table reports amounts realized on equity compensation during the fiscal year ended December 31, 2018. The Stock Awards columns report the vesting of RSU and performance share grants to the Named Executive Officers in 2018.

Name	Stock Awards	
	Number of Shares Acquired on Vesting (#) <sup>(1)</sup>	Value Realized on Vesting <sup>(2)</sup>
<b>James J. Judge</b>	35,886	\$ 2,073,063
<b>Philip J. Lembo</b>	7,225	417,186
<b>Werner J. Schweiger</b>	23,091	1,336,258
<b>Gregory B. Butler</b>	16,460	952,517
<b>Joseph R. Nolan, Jr.</b>	10,151	587,111

- (1) Includes RSUs and performance shares granted to the Named Executive Officers under the long-term incentive programs, including dividend reinvestments, as follows:

Name	2015 Program	2016 Program	2017 Program	2018 Program
<b>James J. Judge</b>	15,033	4,258	16,595	—
<b>Philip J. Lembo</b>	2,608	655	3,962	—
<b>Werner J. Schweiger</b>	14,879	4,188	4,024	—
<b>Gregory B. Butler</b>	10,584	2,764	3,112	—
<b>Joseph R. Nolan, Jr.</b>	5,829	1,598	2,724	—

In all cases, the distribution of common shares is reduced by that number of shares valued in an amount sufficient to satisfy tax withholding obligations.

- (2) Values realized on vesting of RSUs granted under the 2015 - 2017, 2016 - 2018 and 2017 - 2019 Programs were based on \$57.58 per share, the closing price of Eversource Energy common shares on February 14, 2018. Values realized on vesting of performance shares granted under the 2015 - 2017 Program were based on \$58.17 per share, the closing price of Eversource Energy common shares on February 20, 2018.

#### PENSION BENEFITS IN 2018

The Pension Benefits Table shows the estimated present value of accumulated retirement benefits payable to each Named Executive Officer upon retirement based on the assumptions described below. The table distinguishes between benefits available under the qualified pension program, the supplemental pension program, and any additional benefits available under contractual agreements. See the narrative above in the CD&A under the caption "Other - Retirement Benefits" and "Contractual Agreements" for more detail on benefits under these plans and agreements.

The values shown in the Pension Benefits Table for Messrs. Judge, Lembo, Schweiger and Nolan were calculated as of December 31, 2018, based on benefit payments in the form of a lump sum. For Mr. Butler, a payment of benefits was assumed in the form of a contingent annuitant option. Such earned pension program benefit value could otherwise have changed because of the reduction in mortality factors and potentially rising interest rates.

The values shown in this Table for the Named Executive Officers were based on benefit payments commencing at the earliest possible ages for retirement with unreduced benefits: Mr. Judge: age 60; Mr. Lembo: age 62; Mr. Schweiger: age 55; Mr. Butler: age 62; and Mr. Nolan: age 62.

In addition, benefits were determined under the qualified pension program using tax code limits in effect on December 31, 2018. For Messrs. Judge, Lembo, Schweiger and Nolan, the values shown reflect actual 2018 salary and annual incentives earned in 2017 but paid in 2018 (per applicable supplemental program rules). For Mr. Butler, the values shown reflect actual 2018 salary and annual incentives earned in 2018 but paid in 2019 (per applicable supplemental program rules).

We determined the present value of benefits at retirement age using the discount rate within a range of 4.22 percent to 4.37 percent under ASC 715-30 pension accounting for the 2018 fiscal year end measurement as of December 31, 2018. This present value assumes no pre-retirement mortality, turnover or disability. However, for postretirement period beginning at retirement age, the 2018 IRS lump sum mortality table was used for Mr. Judge, Mr. Lembo, Mr. Schweiger and Mr. Nolan. The RP2014 Employee Table Projected Generationally with Scale MP2018 was used for Mr. Butler. This new mortality table (as published by the Society of Actuaries in 2014) and projection scale were used by the Eversource Pension Plan for year-end 2018 financial disclosure. Additional assumptions appear in the footnotes to this Annual Report on Form 10-K for the fiscal year ended December 31, 2018.

## Pension Benefits

Name	Plan Name	Number of Years Credited Service (#)	Present Value of Accumulated Benefit	During Last Fiscal Year
James J. Judge	Retirement Plan	41.33	\$ 2,714,417	\$ —
	Supplemental Plan	21.00	9,738,848	—
	Supplemental Plan	41.33	12,150,475	—
Philip J. Lembo	Retirement Plan	9.75	1,263,600	—
	Supplemental Plan	9.75	3,962,402	—
Werner J. Schweiger	Retirement Plan	16.83	547,641	—
	Supplemental Plan	16.83	2,209,494	—
	Supplemental Plan	16.00	6,267,490	—
Gregory B. Butler	Retirement Plan	22.00	1,135,545	—
	Supplemental Plan	22.00	4,239,418	—
	Target	22.00	3,335,777	—
Joseph R. Nolan, Jr.	Retirement Plan	19.33	896,939	—
	Supplemental Plan	19.33	2,696,355	—
	Supplemental Plan	19.00	3,092,797	—

## NONQUALIFIED DEFERRED COMPENSATION IN 2018

The following table reports amounts contributed in 2018, together with aggregate earnings on contributions and withdrawals or distributions on contributions in 2018, under Eversource's deferred compensation program, along with aggregate balances on contributions. Named Executive Officers who participate in this program are provided with a variety of investment opportunities, which the individual can modify and reallocate under the program terms. See the narrative above in the CD&A under the caption "Elements of 2018 Compensation - Other - Deferred Compensation" for more detail on the non-qualified deferred compensation program.

Name	Executive Contributions in Last FY	Registrant Contributions in Last FY	Aggregate Earnings in Last FY	Aggregate Withdrawals/Distributions	Aggregate Balance at Last FYE <sup>(1)</sup>
James J. Judge	\$ —	\$ —	\$ 350,351	\$ —	\$ 6,043,699
Philip J. Lembo	—	—	(61,055)	—	1,309,411
Werner J. Schweiger	—	—	(1,036,872)	701,236	16,191,292
Gregory B. Butler	—	—	586	—	21,193
Joseph R. Nolan, Jr.	—	—	166,121	—	5,016,295

(1) Includes the total market value of deferred compensation program balances at December 31, 2018, plus the value of vested RSUs or other awards for which the distribution of common shares is currently deferred, based on \$65.04, the closing price of Eversource common shares on December 31, 2018, the last trading day of the year. The aggregate balances reflect a significant level of earnings on previously earned and deferred compensation.

## POTENTIAL PAYMENTS UPON TERMINATION OR CHANGE IN CONTROL

The discussion and tables below show compensation payable to each Named Executive Officer who is still an employee of Eversource, in the event of: (i) voluntary termination; (ii) involuntary not-for-cause termination; (iii) termination in the event of death or disability; and (iv) termination following a change in control. No amounts are payable in the event of a termination for cause. The amounts shown assume that each termination was effective as of December 31, 2018, the last business day of the fiscal year.

Generally, a "change in control" means a change in ownership or control effected through (i) the acquisition of 30 percent or more of the combined voting power of common shares or other voting securities (20 percent for Mr. Butler, excluding certain defined transactions); (ii) the acquisition of more than 50 percent of Eversource common shares, excluding certain defined transactions (for Messrs. Judge, Lembo, Schweiger and Nolan); (iii) a change in the majority of the Eversource Board of Trustees, unless approved by a majority of the incumbent Trustees; (iv) certain reorganizations, mergers or consolidations where substantially all of the persons who were the beneficial owners of the outstanding common shares immediately prior to such business combination do not beneficially own more than 50 percent of the voting power of the resulting business entity (excluding in certain cases defined transactions); and (v) complete liquidation or dissolution of Eversource, or a sale or disposition of all or substantially all of the assets of Eversource other than, for Mr. Butler, to an entity with respect to which following completion of the transaction more than 50 percent of common shares or other voting securities is then owned by all or substantially all of the persons who were the beneficial owners of common shares and other voting securities immediately prior to such transaction.

In the event of a change in control, the Named Executive Officers are generally entitled to receive compensation and benefits following either involuntary termination of employment without "cause" or voluntary termination of employment for "good reason" within the applicable period (generally two years following a change in control). The Committee believes that termination for good reason is conceptually the same as termination "without cause" and, in the absence of this provision, potential acquirers would have an incentive to constructively terminate executives to avoid paying severance. Termination for "cause" generally means termination due to a felony or certain other convictions; fraud, embezzlement, or theft in the course of employment; intentional, wrongful damage to Eversource property; gross misconduct or gross

negligence in the course of employment or gross neglect of duties harmful to Eversource; or a material breach of obligations under the agreement. "Good reason" for termination generally exists after assignment of duties inconsistent with executive's position, a material reduction in compensation or benefits, a transfer more than 50 miles from the executive's pre-change in control principal business location (or for Messrs. Judge, Lembo, Schweiger and Nolan, an involuntary transfer outside the Greater Boston Metropolitan Area), or requiring business travel to a substantially greater extent than required prior to the change in control.

The summaries above do not purport to be complete and are qualified in their entirety by the actual terms and provisions of the agreements and plans, copies of which have been filed as exhibits to this Annual Report on Form 10-K for the year ended December 31, 2018.

### **Payments Upon Termination**

Regardless of the manner in which the employment of a Named Executive Officer terminates, the executive is entitled to receive certain amounts earned during the executive's term of employment. Such amounts include:

- Vested RSUs and certain other vested awards;
- Amounts contributed and any vested matching contributions under the deferred compensation program;
- Pay for unused vacation; and
- Amounts accrued and vested under the pension/supplemental and 401k programs (except in the event of a termination for cause under the supplemental program).

The following table describes additional compensation payable to the Named Executive Officers in the event of voluntary termination, involuntary termination not for cause, termination in the event of death or disability and termination following a change in control. No benefits are provided in the event of termination for cause. See the section above captioned "Pension Benefits in 2018" for information about the pension program, supplemental program and other benefits, and the section captioned "Nonqualified Deferred Compensation in 2018."

**POST-EMPLOYMENT COMPENSATION PAYMENTS UPON TERMINATION**

- (1) For Termination Following a Change in Control: Represents target 2018 annual incentive awards as described in the Grants of Plan Based Awards Table.
- (2) For Voluntary Termination and Termination Not For Cause and Termination Upon Death or Disability: Represents 100 percent of the performance share awards under the 2016 - 2018 Long-Term Incentive Program, 67 percent of the performance share awards under the 2017 - 2019 Long-Term Incentive Program and 33 percent of the performance share awards under the 2018 - 2020 Long-Term Incentive Program. For all of the Named Executive Officers, the values were calculated by multiplying the number of RSUs by \$65.04, the closing price of Eversource common shares on December 31, 2018, the last trading day of the year. For Termination Following a Change in Control: Represents 100 percent of the performance share awards under each of the three Programs noted in the previous two sentences.
- (3) For Voluntary Termination and Termination Not For Cause and Termination Upon Death or Disability: Represents values of RSUs granted under long-term incentive programs that, at year-end 2018, were unvested under applicable vesting schedules. Under these programs, RSUs vest pro rata based on credited service years and age at termination, and time

worked during the vesting period. For all, the values were calculated by multiplying the number of RSUs by \$65.04, the closing price of Eversource common shares on December 31, 2018, the last trading day of the year. For Termination Following a Change in Control: Represents values of all RSUs granted under long-term incentive programs that, at year-end 2018, were unvested under applicable vesting schedules, all of which vest in full.

- (4) The amount noted in the Involuntary Termination, Not for Cause column, represents for Mr. Butler actuarial present values at year-end 2018 of amounts payable (two years of service) solely under an employment agreement upon termination, which are in addition to amounts due under the pension plan. For Termination Following a Change in Control: represents actuarial present values at year-end 2018 of amounts payable solely under employment agreements upon termination (which are in addition to amounts due under the pension program). For Messrs. Judge, Schweiger, Butler and Nolan, pension benefits were calculated by adding three years of service (two years for Mr. Lembo). A lump sum of this benefit value is payable to Messrs. Judge, Lembo and Schweiger. Pension amounts shown in the table are present values at year-end 2018 of benefits payable upon termination as described with respect to the Pension Benefits Table above.
- (5) The amount noted in the Involuntary Termination, Not for Cause column, represents for Mr. Butler the value of two years' employer contributions toward active health, long-term disability, and life insurance benefits, plus a payment to offset any taxes thereon. For Termination Following a Change in Control: represents estimated cost to Eversource at year-end 2018 (estimated by consultants) of providing post-employment health and welfare benefits beyond those available to non-executives upon involuntary termination. The amounts shown in the table for Messrs. Judge, Schweiger and Nolan represent the value of three years (two years for Mr. Lembo) continued health and welfare plan participation. The amounts shown in the table for Mr. Butler represent the value of three years' employer contributions toward active health, long-term disability, and life insurance benefits, plus a payment to offset any taxes on the value of these benefits, less the value of one year of retiree health coverage at retiree rates.
- (6) The amount noted in the Involuntary Termination, Not for Cause column, represents for Mr. Butler the cost of reimbursing Mr. Butler for two years financial planning and tax preparation fees. For Termination Following a Change in Control: represents the cost to Eversource of reimbursing for financial planning and tax preparation fees for three years (two years for Mr. Lembo).
- (7) For Termination Following a Change in Control: Represents payments made to offset costs associated with certain excise taxes under Section 280G of the Internal Revenue Code. Executives may be subject to certain excise taxes under Section 280G if they receive payments and benefits related to a Termination Following a Change in Control that exceed specified Internal Revenue Service limits. Contractual agreements with the above executives provide for a grossed-up reimbursement of these excise taxes. The amounts in the table are based on the Section 280G excise tax rate of 20 percent, the statutory federal income tax withholding rate of 35 percent, the applicable state income tax rate, and the Medicare tax rate of 1.45 percent.
- (8) For Involuntary Termination, Not for Cause: Represents for Mr. Butler a severance payment (two-times the sum of base salary plus relevant annual incentive award) in addition to any non-compete agreement payment described above. For Termination Following a Change in Control: Represents severance payments in addition to any non-compete agreement payments described in the prior note. For Messrs. Judge, Schweiger and Nolan, this payment equals three-times the sum of base salary plus relevant annual incentive award (two-times the sum for Messrs. Lembo and Butler). These payments do not replace, offset or otherwise affect the calculation or payment of the annual incentive awards.
- (9) For Involuntary Termination, Not For Cause and Termination Following a Change in Control: Represents payments made under an agreement with Mr. Butler as consideration for agreement not to compete with Eversource following termination of employment, equal to the sum of base salary plus relevant annual incentive award. These payments do not replace, offset or otherwise affect the calculation or payment of the annual incentive awards.

#### PAY RATIO

Eversource's CEO to median employee pay ratio is calculated pursuant to the requirements of Item 402(u) of Regulation S-K. Eversource identified the median employee by reviewing the 2018 total cash compensation of all full-time employees, excluding Eversource's CEO, who were employed by Eversource and its subsidiaries on December 31, 2018. In Eversource's assessment of median employee compensation, pay was annualized for those employees who commenced work during 2018. Otherwise, no assumptions, adjustments, or estimates were made with respect to total cash compensation, and the compensation for any full-time employees who were not employed by Eversource at the end of 2018 was not annualized. Eversource believes the use of total cash compensation for all employees is a consistently applied compensation measure, as Eversource does not widely distribute annual equity awards to employees.

After identifying the median employee based on total cash compensation, Eversource calculated the annual total compensation for such employee using the same methodology it uses for its named executive officers as set forth in the 2018 Summary Compensation Table.

Mr. Judge had 2018 annual total compensation of \$14,925,381, as reflected in the Summary Compensation Table. Eversource's median employee's annual total compensation for 2018 was \$129,401. Eversource's 2018 CEO to median employee pay ratio is 115 to 1.

## Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

### Eversource Energy

In addition to the information below under "Securities Authorized for Issuance Under Equity Compensation Plans," incorporated herein by reference is the information contained in the sections "Common Share Ownership of Certain Beneficial Owners" and "Common Share Ownership of Trustees and Management" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2019.

### NSTAR ELECTRIC and PSNH

Certain information required by this Item 12 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

### CL&P

#### COMMON SHARE OWNERSHIP OF DIRECTORS AND MANAGEMENT

Eversource Energy owns 100 percent of the outstanding common stock of CL&P. The table below shows the number of Eversource Energy common shares beneficially owned as of February 22, 2019, by each of CL&P's directors and each Named Executive Officer of CL&P, as well as the number of Eversource Energy common shares beneficially owned by all of CL&P's directors and executive officers as a group. The table also includes information about restricted share units and deferred shares credited to the accounts of CL&P's directors and executive officers under certain compensation and benefit plans. No equity securities of CL&P are owned by any of the Trustees, directors or executive officers of Eversource Energy or CL&P. The address for the shareholders listed below is c/o Eversource Energy, Prudential Center, 800 Boylston Street, Boston, Massachusetts 02199 for Messrs. Judge, Lembo, Nolan and Schweiger; c/o Eversource Energy, 56 Prospect Street, Hartford, Connecticut 06103-2818 for Mr. Butler.

Name of Beneficial Owner	Amount and Nature of Beneficial Ownership <sup>(1)(2)</sup> (3)	Percent of Class
James J. Judge, Chairman of CL&P	300,849	*
Philip J. Lembo, Executive Vice President and Chief Financial Officer, Director of CL&P	48,697 <sup>(4)</sup>	*
Werner J. Schweiger, Chief Executive Officer, Director of CL&P	242,942	*
Gregory B. Butler, Executive Vice President and General Counsel, Director of CL&P	96,569	*
Joseph R. Nolan, Jr., Executive Vice President-Customer and Corporate Relations of Eversource Service	92,197	*
All directors and executive officers as a group (7 persons)	840,596 <sup>(5)</sup>	*

\* Less than 1% of Eversource Energy common shares outstanding.

- The persons named in the table have sole voting and investment power with respect to all shares beneficially owned by each of them, except as noted below.
- Also includes restricted share units, deferred restricted share units and/or deferred shares, including dividend equivalents, as to which none of the individuals has voting or investment power, and phantom shares held by executive officers who participate in a deferred compensation plan as follows: Mr. Judge: 187,891 shares; Mr. Lembo: 25,580 shares; Mr. Schweiger: 157,829 shares; Mr. Butler: 17,574 shares; and Mr. Nolan: 73,377 shares.
- Includes Eversource Energy common shares held as units in the 401(k) Plan invested in the Eversource Energy Common Shares Fund over which the holder has sole voting and investment power (Mr. Judge: 26,415 shares; Mr. Lembo: 3,055 shares; Mr. Schweiger: 500 shares; Mr. Butler: 6,062 shares; and Mr. Nolan: 18,819 shares).
- Includes 524 common shares held by Mr. Lembo in a custodial account over which Mr. Lembo has sole voting and investment power.
- Includes 485,144 unissued Eversource Energy common shares (see Note 2) and 59,326 common shares held as units in the 401(k) Plan (see Note 3).

## SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table sets forth the number of Eversource Energy common shares issuable under Eversource Energy equity compensation plans, as well as their weighted exercise price, as of December 31, 2018, in accordance with the rules of the SEC:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights <sup>(1)</sup>	Weighted-average exercise price of outstanding options, warrants and rights <sup>(2)</sup>	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column <sup>(1)</sup> )
Equity compensation plans approved by security holders	1,281,929	\$—	3,720,650
Equity compensation plans not approved by security holders <sup>(3)</sup>	—	—	—
<b>Total</b>	<b>1,281,929</b>	<b>\$—</b>	<b>3,720,650</b>

- (1) Includes 782,365 common shares for distribution in respect of restricted share units, and 499,564 performance shares issuable at target, all pursuant to the terms of our Incentive Plan.
- (2) The weighted-average exercise price does not take into account restricted share units or performance shares, which have no exercise price.
- (3) Securities set forth in this table are authorized for issuance under compensation plans that have been approved by shareholders of Eversource Energy or the former shareholders of NSTAR.

### Item 13. Certain Relationships and Related Transactions, and Director Independence

#### Eversource Energy

Incorporated herein by reference is the information contained in the sections captioned "Trustee Independence" and "Related Person Transactions" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2019.

#### NSTAR ELECTRIC and PSNH

Certain information required by this Item 13 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries .

#### CL&P

Eversource Energy's Code of Ethics for Senior Financial Officers applies to the Senior Financial Officers (Chief Executive Officer, Chief Financial Officer and Controller) of Eversource Energy, CL&P and certain other Eversource Energy subsidiaries. Under the Code, one's position as a Senior Financial Officer in the company may not be used to improperly benefit such officer or his or her family or friends. Under the Code, specific activities that may be considered conflicts of interest include, but are not limited to, directly or indirectly acquiring or retaining a significant financial interest in an organization that is a customer, vendor or competitor, or that seeks to do business with the company; serving, without proper safeguards, as an officer or director of, or working or rendering services for an organization that is a customer, vendor or competitor, or that seeks to do business with the company. Waivers of the provisions of the Code of Ethics for Trustees, executive officers or directors must be approved by Eversource Energy's Board of Trustees. Any such waivers will be disclosed pursuant to legal requirements.

Eversource Energy's Code of Conduct, which applies to all Trustees, directors, officers and employees of Eversource Energy and its subsidiaries, including CL&P, contains a Conflict of Interest Policy that requires all such individuals to disclose any potential conflicts of interest. Such individuals are expected to discuss their particular situations with management to ensure appropriate steps are in place to avoid a conflict of interest. All disclosures must be reviewed and approved by management to ensure a particular situation does not adversely impact the individual's primary job and role.

Eversource Energy's Related Persons Transactions Policy is administered by the Corporate Governance Committee of Eversource Energy's Board of Trustees. The Policy generally defines a "Related Persons Transaction" as any transaction or series of transactions in which (i) Eversource Energy or a subsidiary is a participant, (ii) the aggregate amount involved exceeds \$120,000 and (iii) any "Related Persons" has a direct or indirect material interest. A "Related Persons" is defined as any Trustee or nominee for Trustee, any executive officer, any shareholder owning more than 5 percent of Eversource Energy's total outstanding shares, and any immediate family member of any such person. Management submits to the Corporate Governance Committee for consideration any Related Persons Transaction into which Eversource Energy or a subsidiary proposes to enter. The Corporate Governance Committee recommends to the Eversource Energy Board of Trustees for approval only those transactions that are in Eversource Energy's best interests. If management causes the company to enter into a Related Persons Transaction prior to approval by the Corporate Governance Committee, the transaction will be subject to ratification by the Eversource Energy Board of Trustees. If the Eversource Energy Board of Trustees determines not to ratify the transaction, then management will make all reasonable efforts to cancel or annul such transaction.

The directors of CL&P are employees of CL&P and/or other subsidiaries of Eversource Energy, and thus are not considered independent.

## **Item 14. Principal Accountant Fees and Services**

### **Eversource Energy**

Incorporated herein by reference is the information contained in the section "Relationship with Independent Auditors" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2019.

### **CL&P, NSTAR ELECTRIC and PSNH**

#### **Pre-Approval of Services Provided by Principal Auditors**

None of CL&P, NSTAR Electric and PSNH is subject to the audit committee requirements of the SEC, the national securities exchanges or the national securities associations. CL&P, NSTAR Electric and PSNH obtain audit services from the independent auditor engaged by the Audit Committee of Eversource Energy's Board of Trustees. Eversource Energy's Audit Committee has established policies and procedures regarding the pre-approval of services provided by the principal auditors. Those policies and procedures delegate pre-approval of services to the Eversource Energy Audit Committee Chair provided that such offices are held by Trustees who are "independent" within the meaning of the Sarbanes-Oxley Act of 2002 and that all such pre-approvals are presented to the Eversource Energy Audit Committee at the next regularly scheduled meeting of the Committee.

The following relates to fees and services for the entire Eversource Energy system, including Eversource Energy, CL&P, NSTAR Electric and PSNH.

#### **Fees Billed By Principal Independent Registered Public Accounting Firm**

The aggregate fees billed to the Company and its subsidiaries by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, the Deloitte Entities), for the years ended December 31, 2018 and 2017 totaled \$5,076,922 and \$4,533,922, respectively. In addition, affiliates of Deloitte & Touche LLP, as noted below, provide other accounting services to the Company. Fees consisted of the following:

##### **1. Audit Fees**

The aggregate fees billed to the Company and its subsidiaries by Deloitte & Touche LLP for audit services rendered for the years ended December 31, 2018 and 2017 totaled \$4,464,500 and \$4,243,000, respectively. The audit fees were incurred for audits of consolidated financial statements of Eversource Energy and its subsidiaries, reviews of financial statements included in the Combined Quarterly Reports on Form 10-Q of Eversource Energy and its subsidiaries and other costs. The fees also included audits of internal controls over financial reporting as of December 31, 2018 and 2017.

##### **2. Audit-Related Fees**

The aggregate fees billed to the Company and its subsidiaries by the Deloitte Entities for audit-related services rendered for the years ended December 31, 2018 and 2017 totaled \$597,500 and \$283,000, respectively. The audit-related fees were incurred for procedures performed in the ordinary course of business in support of certain regulatory filings, comfort letters, and consents and other costs related to registration statements and financings.

##### **3. Tax Fees**

The aggregate fees billed to the Company and its subsidiaries by the Deloitte Entities for tax services rendered for the year ended December 31, 2018 totaled \$7,500. The tax service fees were incurred for procedures performed in the ordinary course of business in support of certain employee benefit plan federal filings. There were no tax fees for the year ended December 31, 2017.

##### **4. All Other Fees**

The aggregate fees billed to the Company and its subsidiaries by the Deloitte Entities for services, other than the services described above, for the years ended December 31, 2018 and 2017 totaled \$57,422 and \$7,922, respectively. These fees were for the review of benefit payment calculations and a license for access to an accounting standards research tool.

The Audit Committee pre-approves all auditing services and permitted audit-related or other services (including the fees and terms thereof) to be performed for us by our independent registered public accounting firm, subject to the de minimis exceptions for non-audit services described in Section 10A(i)(1)(B) of the Securities Exchange Act of 1934, which are approved by the Audit Committee prior to the completion of the audit. The Audit Committee may form and delegate its authority to subcommittees consisting of one or more members when appropriate, including the authority to grant pre-approvals of audit and permitted non-audit services, provided that decisions of such subcommittee to grant pre-approvals are presented to the full Audit Committee at its next scheduled meeting. During 2018, all services described above were pre-approved by the Audit Committee or its Chair.

The Audit Committee has considered whether the provision by the Deloitte Entities of the non-audit services described above was allowed under Rule 2-01(c)(4) of Regulation S-X and was compatible with maintaining the independence of the registered public accountants and has concluded that the Deloitte Entities were and are independent of us in all respects.

**PART IV**

**Item 15. Exhibits and Financial Statement Schedules**

(a) 1. Financial Statements:

The financial statements filed as part of this Annual Report on Form 10-K are set forth under Item 8, "Financial Statements and Supplementary Data."

2. Schedules

I. Financial Information of Registrant:

Eversource Energy (Parent) Balance Sheets as of December 31, 2018 and 2017 S-1

Eversource Energy (Parent) Statements of Income for the Years Ended  
December 31, 2018, 2017 and 2016 S-2

Eversource Energy (Parent) Statements of Comprehensive Income for the Years Ended  
December 31, 2018, 2017 and 2016 S-2

Eversource Energy (Parent) Statements of Cash Flows for the Years Ended  
December 31, 2018, 2017 and 2016 S-3

II. Valuation and Qualifying Accounts and Reserves for Eversource, CL&P, NSTAR Electric and PSNH  
for 2018, 2017 and 2016 S-4

All other schedules of the companies for which inclusion is required in the applicable regulations of the SEC are permitted to be omitted under the related instructions or are not applicable, and therefore have been omitted.

3. Exhibit Index E-1

**Item 16. Form 10-K Summary**

Not applicable.

2016	66,676	31,728	11,253	39,373	70,284
<u>PSNH :</u>					
Reserves Deducted from Assets -					
Reserves for Uncollectible Accounts:					
2018	\$ 10,481	\$ 6,383	\$ 953	\$ 6,752	\$ 11,065
2017	9,941	6,917	464	6,841	10,481
2016	8,733	7,288	498	6,578	9,941

(a) Amounts relate to uncollectible accounts receivables reserved for that are not charged to bad debt expense. The PURA allows CL&P and Yankee Gas to accelerate the recovery of accounts receivable balances attributable to qualified customers under financial or medical duress (uncollectible hardship accounts receivable) outstanding for greater than 180 days and 90 days, respectively. The DPU allows NSTAR Electric and NSTAR Gas to recover in rates, amounts associated with certain uncollectible hardship accounts receivable.

(b) Amounts written off, net of recoveries.

## EXHIBIT INDEX

Each document described below is incorporated by reference by the registrant(s) listed to the files identified, unless designated with a (\*), which exhibits are filed herewith. Management contracts and compensation plans or arrangements are designated with a (+).

<b>Exhibit Number</b>	<b>Description</b>
3.	Articles of Incorporation and By-Laws
(A)	Eversource Energy
3.1	Declaration of Trust of Eversource Energy, as amended through May 3, 2017 ( <a href="#">Exhibit 3.1, Eversource Form 10-Q filed on May 5, 2017</a> )
(B)	The Connecticut Light and Power Company
3.1	Certificate of Incorporation of CL&P, restated to March 22, 1994 (Exhibit 3.2.1, 1993 CL&P Form 10-K, File No. 000-00404) ( <a href="#">Exhibit 3.2.1, 1993 CL&amp;P Form 10-K, File No. 000-00404</a> )
3.1.1	Certificate of Amendment to Certificate of Incorporation of CL&P, dated December 26, 1996 ( <a href="#">Exhibit 3.2.2, 1996 CL&amp;P Form 10-K filed March 25, 1997, File No. 001-11419</a> )
3.1.2	Certificate of Amendment to Certificate of Incorporation of CL&P, dated April 27, 1998 ( <a href="#">Exhibit 3.2.3, 1998 CL&amp;P Form 10-K filed March 23, 1999, File No. 000-00404</a> )
3.1.3	Amended and Restated Certificate of Incorporation of CL&P, dated effective January 3, 2012 ( <a href="#">Exhibit 3(i), CL&amp;P Current Report on Form 8-K filed January 9, 2012, File No. 000-00404</a> )
3.2	By-laws of CL&P, as amended and restated effective September 29, 2014 ( <a href="#">Exhibit 3.1, CL&amp;P Current Report on Form 8-K filed October 2, 2014, File No. 000-00404</a> )
(C)	NSTAR Electric Company
3.1	Restated Articles of Organization of NSTAR Electric Company, fka Boston Edison Company ( <a href="#">Exhibit 3.1, NSTAR Electric Form 10-Q for the Quarter Ended June 30, 1994 filed August 12, 1994, File No. 001-02301</a> )
3.2	Bylaws of NSTAR Electric Company, as amended and restated effective September 29, 2014 ( <a href="#">Exhibit 3.1, NSTAR Electric Current Report on Form 8-K filed October 2, 2014, File No. 000-02301</a> )
(D)	Public Service Company of New Hampshire
3.1	Articles of Incorporation, as amended to May 16, 1991 ( <a href="#">Exhibit 3.3.1, 1993 PSNH Form 10-K filed March 25, 1994, File No. 001-06392</a> )
3.2	By-laws of PSNH, as in effect June 27, 2008 ( <a href="#">Exhibit 3, PSNH Form 10-Q for the Quarter Ended June 30, 2008 filed August 7, 2008, File No. 001-06392</a> )
4.	Instruments defining the rights of security holders, including indentures
(A)	Eversource Energy
4.1	Indenture between Eversource Energy and The Bank of New York as Trustee dated as of April 1, 2002 ( <a href="#">Exhibit A-3, Eversource Energy 35-CERT filed April 16, 2002, File No. 070-09535</a> )
4.1.1	Fifth Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of May 1, 2013, relating to \$450 million of Senior Notes, Series F, due 2023 ( <a href="#">Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed May 16, 2013, File No. 001-05324</a> )

- 4.1.2 Sixth Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of January 1, 2015, relating to \$300 million of Senior Notes, Series H, due 2025 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed January 21, 2015, File No. 001-05324](#))
- 4.1.3 Seventh Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of March 7, 2016, relating to \$250 million of Senior Notes, Series I, due 2021 and \$250 million of Senior Notes, Series J, due 2026 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed March 15, 2016, File No. 001-05324](#))
- 4.1.4 Eighth Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of March 10, 2017, relating to \$300 million of Senior Notes, Series K, Due 2022 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed March 16, 2017, File No. 001-05324](#))
- 4.1.5 Ninth Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of October 1, 2017, relating to \$450 million of Senior Notes, Series K, due 2022 and \$450 million of Senior Notes, Series L, due 2024 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed October 12, 2017, File No. 001-05324](#))
- 4.1.6 Tenth Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of January 1, 2018, relating to \$200 million of Senior Notes, Series I, Due 2021 and \$450 million of Senior Notes, Series M, Due 2028 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed January 12, 2018, File No. 001-05324](#))
- 4.1.7 Eleventh Supplemental Indenture between Eversource Energy and The Bank of New York Trust Company N.A., as Trustee, dated as of December 1, 2018, relating to 400 million of Senior Notes, Series N, Due 2023 and \$500 million of Senior Notes, Series O, Due 2029 ([Exhibit 4.1, Eversource Energy Current Report on Form 8-K filed December 18, 2018, File No. 001-05324](#))
- 4.2 Indenture dated as of January 12, 2000, between Eversource Energy, as successor to NSTAR LLC, as successor to NSTAR, and Bank One Trust Company N.A. ([Exhibit 4.1 to NSTAR Registration Statement on Form S-3, filed January 14, 2000, on File No. 333-94735](#))
- 4.2.1 Form of 4.50% Debenture Due 2019 ([Exhibit 99.2, NSTAR Form 8-K filed November 16, 2009, File No. 001-14768](#))

(B) The Connecticut Light and Power Company

- 4.1 Indenture of Mortgage and Deed of Trust between CL&P and Bankers Trust Company, Trustee, dated as of May 1, 1921 (Composite including all twenty-four amendments to May 1, 1967) ([Exhibit 4.1, 2017 Eversource 10-K filed on February 26, 2018](#))
- 4.1.1 Series D Supplemental Indentures to the Composite May 1, 1921 Indenture of Mortgage and Deed of Trust between CL&P and Bankers Trust Company, dated as of October 1, 1994 ([Exhibit 4.2.16, 1994 CL&P Form 10-K filed March 27, 1995, File No. 001-11419](#))
- 4.1.2 Series B Supplemental Indenture between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of September 1, 2004 ([Exhibit 99.5, CL&P Current Report on Form 8-K filed September 22, 2004, File No. 000-00404](#))
- 4.2 Composite Indenture of Mortgage and Deed of Trust between CL&P and Deutsche Bank Trust Company Americas f/k/a Bankers Trust Company, dated as of May 1, 1921, as amended and supplemented by seventy-three supplemental mortgages to and including Supplemental Mortgage dated as of April 1, 2005 ([Exhibit 99.5, CL&P Current Report on Form 8-K filed April 13, 2005, File No. 000-00404](#))
- 4.2.1 Supplemental Indenture (2005 Series B Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of April 1, 2005 ([Exhibit 99.2, CL&P Current Report on Form 8-K filed April 13, 2005, File No. 000-00404](#))

- 4.2.2 Supplemental Indenture (2006 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of June 1, 2006 ([Exhibit 99.2, CL&P Current Report on Form 8-K filed June 7, 2006, File No. 000-00404](#))
- 4.2.3 Supplemental Indenture (2007 Series B Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of March 1, 2007 ([Exhibit 99.2, CL&P Current Report on Form 8-K filed March 29, 2007, File No. 000-00404](#))
- 4.2.4 Supplemental Indenture (2007 Series D Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of September 1, 2007 ([Exhibit 4, CL&P Current Report on Form 8-K filed September 19, 2007, File No. 000-00404](#))
- 4.2.5 Supplemental Indenture (2009 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of February 1, 2009 ([Exhibit 4, CL&P Current Report on Form 8-K filed February 19, 2009, File No. 000-00404](#))
- 4.2.6 Supplemental Indenture (2013 Series A Bond) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of January 1, 2013 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed January 22, 2013, File No. 000-00404](#))
- 4.2.7 Supplemental Indenture (2014 Series A Bond) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of April 1, 2014 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed April 29, 2014, File No. 000-00404](#))
- 4.2.8 Supplemental Indenture (2015 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of May 1, 2015 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed May 26, 2015, File No. 000-00404](#))
- 4.2.9 Supplemental Indenture (2015 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of November 1, 2015 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed December 4, 2015, File No. 000-00404](#))
- 4.2.10 Supplemental Indenture (2017 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of March 1, 2017 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed on March 16, 2017, File No. 000-00404](#))
- 4.2.11 Supplemental Indenture (2014 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of August 1, 2017 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed August 23, 2017, File No. 000-00404](#))
- 4.2.12 Supplemental Indenture (2018 Series A Bonds) between CL&P and Deutsche Bank Trust Company Americas, as Trustee dated as of March 1, 2018 ([Exhibit 4.1, CL&P Current Report on Form 8-K filed April 2, 2018, File No. 000-00404](#))
- 4.3 Loan Agreement between Connecticut Development Authority and CL&P (Pollution Control Revenue Refunding Bonds - 2011A Series) dated as of October 1, 2011 ([Exhibit 1.1, CL&P Current Report on Form 8-K filed October 28, 2011, File No. 000-00404](#))

(C) NSTAR Electric Company

- 4.1 Indenture between Boston Edison Company and the Bank of New York (as successor to Bank of Montreal Trust Company) ([Exhibit 4.1, 2017 Eversource Form 10-K filed February 26, 2018](#))
  - 4.1.1 A Form of 5.75% Debenture Due March 15, 2036 ([Exhibit 99.2, Boston Edison Company Current Report on Form 8-K filed March 17, 2006, File No. 001-02301](#))
  - 4.1.2 A Form of 5.50% Debenture Due March 15, 2040 ([Exhibit 99.2, NSTAR Electric Company Current Report on Form 8-K filed March 15, 2010, File No. 001-02301](#))
  - 4.1.3 A Form of 2.375% Debenture Due 2022 ([Exhibit 4, NSTAR Electric Company Current Report on Form 8-K filed October 18, 2012, File No. 001-02301](#))

- 4.1.4 A Form of 4.40% Debenture Due 2044 ([Exhibit 4, NSTAR Electric Company Current Report on Form 8-K filed March 13, 2014, File No. 001-02301](#))
- 4.1.5 A Form of 3.25% Debenture due 2025 ([Exhibit 4, NSTAR Electric Company Current Report on Form 8-K filed on November 20, 2015, File No. 001-02301](#))
- 4.1.6 A Form of 2.70% Debenture due 2026 ([Exhibit 4, NSTAR Electric Company Current Report on Form 8-K filed on May, 31, 2016, File No. 001-02301](#))
- 4.1.7 Form of 3.20% Debenture due May 15, 2027 ([Exhibit 4, NSTAR Electric Company Current Report on Form 8-K/A filed on October 12, 2017 File No. 001-02301](#))
- 4.2 Amended and Restated Credit Agreement, dated December 8, 2017, by and between NSTAR Electric Company and the Banks named therein, pursuant to which Barclays Bank PLC serves as Administrative Agent and Swing Line Lender ([Exhibit 4.2, 2017 Eversource Form 10-K filed on February 26, 2018](#))
- 4.3 Indenture between NSTAR Electric Company, as successor to Western Massachusetts Electric Company ("WMECO"), and The Bank of New York, as Trustee, dated as of September 1, 2003 ([Exhibit 99.2, WMECO Current Report on Form 8-K filed October 8, 2003, File No. 000-07624](#))
  - 4.3.1 Second Supplemental Indenture between NSTAR Electric Company, as successor to WMECO, and The Bank of New York, as Trustee dated as of September 1, 2004 ([Exhibit 4.1, WMECO Current Report on Form 8-K filed September 27, 2004, File No. 000-07624](#))
  - 4.3.2 Fourth Supplemental Indenture between NSTAR Electric Company, as successor to WMECO, and The Bank of New York Trust, as Trustee, dated as of August 1, 2007 ([Exhibit 4.1, WMECO Current Report on Form 8-K filed August 20, 2007, File No. 000-07624](#))

## SUMMARY OF TRUSTEE COMPENSATION ARRANGEMENTS

The Compensation Committee periodically reviews the compensation of our non-employee Trustees and, when it deems appropriate and upon consultation with the Committee's independent compensation consultant, recommends adjustments to be approved by the Board of Trustees. The Compensation Committee recommends to the Board compensation for the Trustees based on competitive market practices for both the total value of compensation and the allocation of cash and equity. The Committee uses data obtained from similarly sized utility and general industry companies as guidelines for setting Trustee compensation. The level of Trustee compensation recommended by the Committee and approved by the Board enables us to attract Trustees who have a broad range of backgrounds and experiences.

Each non-employee Trustee serving on January 1 receives a grant under the Company's Incentive Plan, generally effective on the tenth business day of each such year, consisting of the number of restricted stock units (RSUs) resulting from dividing \$135,000 by the average closing price of our common shares as reported on the NYSE for the 10 trading days immediately preceding such date and rounding the resulting amount to the nearest whole RSU. RSUs generally vest on the next business day following the grant. In 2018, these RSU grants were made subject to shareholder approval of the Company's 2018 Incentive Plan, which was received on May 2, 2018. As a result, RSUs granted in January 2018 vested on May 2, 2018. Beginning with grants made in 2019, each non-employee Trustee was entitled to elect distribution of up to 50 percent of the common shares issuable in respect of such RSUs immediately upon vesting of their RSU grant, subject to satisfaction of applicable share ownership guidelines. The distribution of all common shares entitled to be received upon vesting, but not distributed immediately, will be deferred until the tenth business day of January of the year following retirement from Board service. Any individual who is elected to serve as a Trustee after January 1 of any calendar year receives an RSU grant prorated from the date of such election and granted on the first business day of the month following such election.

### 2018 Trustee Compensation

<u>Compensation Element</u>	<u>Amount</u>
Annual Cash Retainer	\$115,000
Annual Stock Retainer	\$135,000
Board and Committee Attendance Fees	None
Annual Lead Trustee Retainer	\$30,000
	\$20,000 Audit Committee
	\$15,000 Compensation Committee
	\$15,000 Corporate Governance Committee
Annual Committee Chair Retainer	\$15,000 Finance Committee

Annual cash retainers of \$115,000 per Trustee, additional Committee Chair and Lead Trustee cash retainers and annual RSU grants for service on the Board for 2018 based on the amounts above were paid as described in this section.

The share ownership guidelines set forth in the Company's Corporate Governance Guidelines require each Trustee to attain and hold 7,500 common shares and/or RSUs of the Company within five years from January 1 of the year succeeding their date of election to the Board. All of the current Trustees exceed the required share ownership threshold except for Mr. Kim and Ms. Forry, each of whom was elected as a Trustee in 2018.

Pursuant to the Company's Deferred Compensation Plan, prior to the year earned, each Trustee may irrevocably elect to defer receipt of all or a portion of their cash compensation. Deferred funds are credited with deemed earnings on various deemed investments as permitted by the Deferred Compensation Plan. Deferred cash compensation is payable either in a lump sum or in installments in accordance with the Trustee's prior election. There were no above-market earnings in deferred compensation value during 2018, as the terms of the Deferred Compensation Plan provide for market-based investments, including Company common shares.

Our 2018 Incentive Plan places a limit on the amount of total annual compensation that can be paid to any Trustee. When applicable, we pay travel-related expenses for spouses of Trustees who attend Board functions, but we do not pay tax gross-up payments in connection with such expenses, nor do we pay pension benefits to our non-employee Trustees.

**Amendment Number 1 to the  
Eversource Deferred Compensation Plan**

Effective February 7, 2018, the Eversource Deferred Compensation Plan is amended as follows:

1. The definition of “Eligible Trustee” in Article 2 is hereby amended to remove “an” and add “a non-Employee” and shall read as follows:  
““ **Eligible Trustee** ” means any person serving as a non-employee Eversource Energy Trustee for a particular Plan Year.”
2. Article 4.5 (A) is hereby amended to add the percentage amount of any annual Equity Award granted to be automatically deferred and shall read as follows:  
“(A) **Trustee Equity Award** . An Eligible Trustee automatically shall be deemed to elect deferral of fifty percent of any annual Equity Award granted as part of the retainer for Board service for any Plan Year, and may, subject to such rules as the Trustees may adopt from time to time, elect to defer or not defer part or all of the remaining fifty percent of such annual Equity Award.”
3. Article 4.6 (B) is hereby amended to add reference to Equity with respect to deferral elections and shall read as follows:  
“(B) **Trustee Participants** . A Trustee Participant’s Cash and Equity Award Deferral elections for a Particular Year shall terminate as to further deferrals for such Plan Year if such Participant (i) becomes Disabled during such Plan Year, or (ii) receives an Emergency Benefit under the Plan during such Plan Year.”
4. Article 6.2 (A) is hereby amended to clarify the distribution time of a properly deferred Trustee Participant Equity Award and shall read as follows:  
“(A) **Affirmative Elections by Participants** . All distributions from all Employee Participant Accounts and Trustee Participant Cash Retainer Deferral Accounts hereunder shall be made within 60 days of the Participant’s End Termination Date unless other permitted by the Plan Administrator and properly elected in the Participant’s Enrollment Agreement. Distributions from Trustee Participant Equity Deferral Accounts shall be made on the tenth day of January in the year following the Trustee’s Termination Date unless otherwise permitted by the Plan Administrator and properly elected in the Trustee Participant’s Enrollment Agreement. No Enrollment Agreement shall elect a distribution date sooner than 3 years after the Plan Year for which the deferral is to occur (or earlier termination of Service).”
5. Article 6.2 (B) is hereby deleted in its entirety and Article 6.2 (C) is renamed Article 6.2 (B).
6. Article 7.2 is hereby amended by deleting the words “within 90 days” and substituting therein “at the election of the Participant’s beneficiary, but in no event later than December 31 of the year following the Participant’s death”.

CERTIFICATION PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, James J. Judge, certify that:

1. I have reviewed this Annual Report on Form 10-K of Eversource Energy (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Electric Customers (As of Year End)	3,223,951	3,202,992
Natural Gas Customers (As of Year End)	539,860	533,295
Water Customers (As of Year End)	228,523	227,632
Investments in Property, Plant and Equipment	\$ 2,911,489	\$ 2,569,936
Property, Plant and Equipment, Net (As of Year End)	\$ 27,585,470	\$ 25,610,428
Market Capitalization (As of Year End)	\$ 28,062,946	\$ 20,610,253
Share Price (As of Year End)	\$ 85.07	\$ 65.04

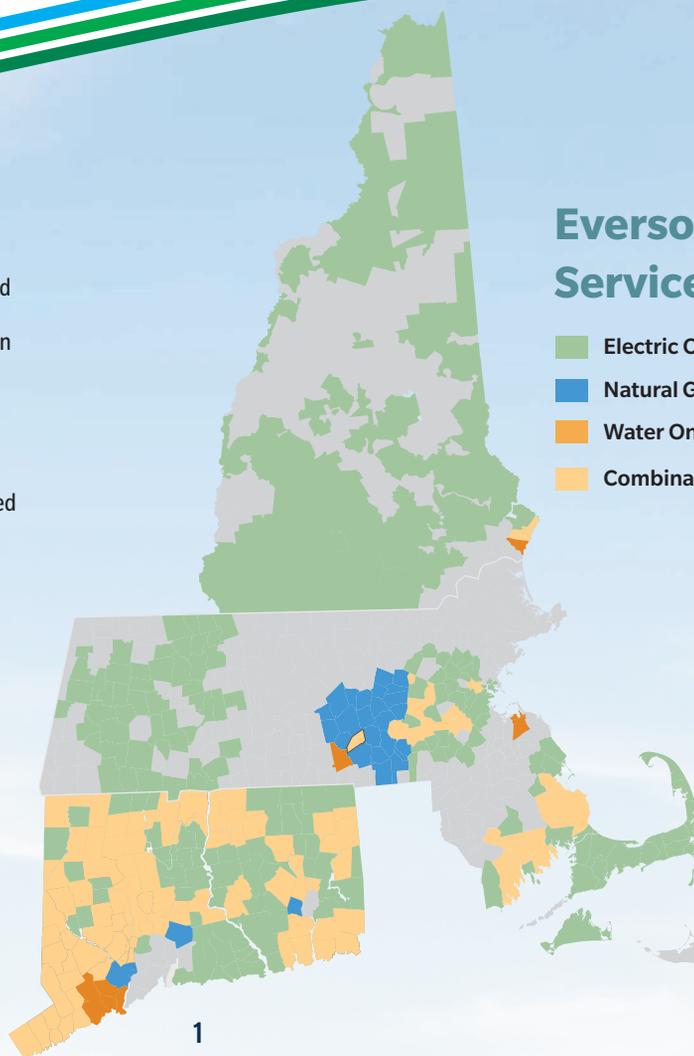

<sup>(1)</sup> Diluted Earnings per Common Share (Non-GAAP) for 2019 was adjusted to exclude an after-tax impairment charge of \$0.64 per share related to the Northern Pass Transmission Project. See Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the accompanying Form 10-K for a reconciliation to GAAP.

## Company Profile

Eversource Energy (NYSE:ES), a Fortune 500 and Standard & Poor's 500 energy company based in Connecticut, Massachusetts and New Hampshire, operates New England's largest energy delivery system. Eversource is committed to safety, reliability, environmental leadership and stewardship for its 4 million electricity, natural gas and water customers.

## Eversource Service Territory

- Electric Only
- Natural Gas Only
- Water Only
- Combination

## Letter from Chairman Jim Judge

2019 was Eversource Energy's best year in our history. We posted strong operational and financial performance and excellent returns for investors, while embracing and defining our growing role as a catalyst for clean energy.

We made significant progress on initiatives that support the clean energy vision that our customers, investors, regulators and legislators have identified as a priority. Our 50-50 partnership with Ørsted is now the nation's leading offshore wind developer, with approved contracts for about 1,700 megawatts, including a contract signed in 2019 to provide 880 megawatts to New York electric customers for 25 years.

We are advancing innovative energy storage projects for our customers. Our utility-owned solar installations are in service and producing renewable energy for the region. And we are tripling the number of electric vehicle charging stations in Massachusetts through a \$45 million investment in infrastructure.

We unveiled our plan to be carbon neutral by 2030, the only US energy utility with such an ambitious goal. It is consistent with our strategy of being the catalyst for clean energy development in New England and another way we can lead by example on climate action.

Our ability to shape our region's energy future is based on a bedrock of strong financial performance. We had a total return for shareholders of 34.4 percent in 2019, compared with 25.8 percent for the EEI index and 31.5 percent for the S&P 500. This continues a trend of outperforming our peers on a short-, medium-, and long-term basis.

We reported recurring earnings per share of \$3.45, an increase of 6.2 percent from 2018 excluding a one-time impairment charge of \$0.64 per share related to our decision to cancel our Northern Pass Transmission project. While we felt Northern Pass offered clear economic and environmental benefits to customers, resistance to siting of the project in New Hampshire proved insurmountable. We continue to project long-term EPS growth of 5 percent to 7 percent, accompanied by similar dividend growth. In 2019, we raised the common dividend to \$2.14 per share on an annualized basis from \$2.02, and in February 2020, we announced a 6.1 percent increase to \$2.27 per share.

We successfully completed our first issuance of "green bonds," issuing \$400 million to support low-carbon clean energy initiatives. Also, we successfully sold approximately \$1.3 billion of new equity to support our projected \$17 billion of investments from 2019 through

## Eversource's #1 honors

#1

utility on the **Forbes/JUST Capital** Most Just Companies list, honoring our combination of corporate social responsibility and business success.

#1

energy efficiency provider in the nation, according to **ACEEE**. We invest more than \$500 million a year to help customers save energy and money.

#1

developer of offshore wind in North America, with **Ørsted**. We're a catalyst for clean energy, helping to shape our region's energy future.

#1

energy company on **Newsweek's** list of Most Responsible Companies, recognizing our commitment to corporate social responsibility.

2024 in our core business, while also helping to finance our offshore wind partnership. The utility investments will enable our customers to continue to receive the safe and reliable electricity, natural gas and water service they expect.

Those core utility operations performed very well in 2019. We continue to deliver top-decile electric reliability, reducing the frequency and length of electric outages. We are consistently working to improve customer experience, with new offerings like a mobile app, expanded outage-related communications, and upgrades to the process to start, stop, or transfer service. Our safety record remained strong, with performance in the top tier of the industry. Aquarion, our water delivery company, continues to deliver very good service and solid financial performance, justifying our decision to enter the water business.

We remain the nation's #1 provider of energy efficiency programs, investing more than \$500 million in 2019 alone to help customers save about 1 billion kilowatt-hours and over 10 million therms per year and reduce their energy costs by nearly \$200 million per year. We announced new energy efficiency partnerships with many organizations and communities that will benefit from our proven and innovative energy-saving solutions.

Our natural gas operations focused on safe, reliable service, including our ongoing program of gas line replacement. Our NSTAR Gas operations in Massachusetts filed for a rate review to recover \$38 million in costs primarily associated with distribution system improvements and increases in labor and health care costs and property taxes. Our request also included innovative pilot projects that explore opportunities to develop geothermal energy, incorporate renewable and more responsibly produced natural gas into our supply, and establish a demand response program.

Our many community partners again benefited from the generous support of Eversource and its employees. Our signature community events were well-attended and successful, benefiting both charitable organizations and communities. We provided \$18 million in donations and other support to community agencies, as well as more than 37,000 volunteer hours. Our United Way campaign again raised more than \$1 million in employee donations, and with matching funds our total impact was \$2.2 million.

Diversity & Inclusion remains a key focus, with our D&I Councils and Business Resource Groups working throughout the company to build and maintain a supportive culture where all employees feel welcome and engaged. We were chosen for the 2019 Bloomberg Gender-Equality Index, which distinguishes companies committed to transparency in gender reporting and advancing women's equality.

## Our Total Return to Shareholders

	2019	3-Year	5-Year	10-Year
<b>Eversource</b>	<b>34.4%</b>	<b>68.7%</b>	<b>85.8%</b>	<b>356.7%</b>
EEI 40-Company Index	25.8%	45.7%	64.4%	214.0%
S&P 500	31.5%	53.2%	73.9%	256.7%

As an organization, we are focused on what’s next for 2020 and beyond. We continue to advance our ambitious carbon neutral goal. In offshore wind, we’ll be working through the permitting review process for existing project commitments and participating in additional requests for proposals as states work to fulfill and expand their offshore wind capacity demands. And, we will continue with our grid modernization efforts and the core capital investment that keeps our delivery systems so reliable.

The national awards and honors we received this year are a testament to our employees’ hard work and our commitment to excellence. In addition to the Gender-Equality Index previously mentioned, we were recognized with the following honors:

- **JUST Capital and Forbes** magazine’s Most JUST Companies list – #1 utility company.
- **Newsweek** magazine’s Most Responsible Companies list – #1 Energy & Utilities company.
- **American Council for an Energy-Efficient Economy** – Massachusetts ranked first on the organization’s energy efficiency scorecard for the ninth straight year.
- We received the **ENERGY STAR** Partner of the Year Sustained Excellence Award in all three states for our energy efficiency programs.
- We achieved top-decile **environmental, social, and governance (ESG)** performance among utilities nationally, as assessed by the two leading sustainability rating firms.
- We were one of only 15 companies selected nationwide for the **2019 Secretary of Defense Employer Support Freedom Award**, the military’s highest employer honor, which recognizes companies’ support for employees on military duty.
- We earned the **Edison Electric Institute’s Emergency Recovery Award**, recognizing our response to the July 2019 Cape Cod tornadoes.

In February 2020, we announced an agreement to acquire Columbia Gas’ natural gas assets in Massachusetts for \$1.1 billion in cash. Following state and federal regulatory reviews, we expect to close on the transaction by the end of the third quarter of 2020. We expect this transaction to be accretive in the first year after closing. It would also benefit customers and support the state’s greenhouse gas reduction goals through accelerated pipe replacement and access to our best-in-class energy efficiency programs.

Eversource Energy is paving the way to a sustainable and prosperous future in the states we serve. We are proud to be a catalyst for clean energy, and I thank our 8,300 employees for their hard work and commitment to our customers and communities.

Chairman, President and Chief Executive Officer

NSTAR Electric Company and Public Service Company of New Hampshire each meet the conditions set forth in General Instruction I(1)(a) and (b) of Form 10-K, and each is therefore filing this Form 10-K with the reduced disclosure format specified in General Instruction I(2) of Form 10-K.

Indicate by check mark if the registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act.

Yes  No

Indicate by check mark if the registrants are not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes  No

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrants have submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrants were required to submit such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Eversource Energy	Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>	Emerging growth company	<input type="checkbox"/>
The Connecticut Light and Power Company	Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>	Emerging growth company	<input type="checkbox"/>
NSTAR Electric Company	Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>	Emerging growth company	<input type="checkbox"/>
Public Service Company of New Hampshire	Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>	Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Act):

	<u>Yes</u>	<u>No</u>
Eversource Energy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
The Connecticut Light and Power Company	<input type="checkbox"/>	<input checked="" type="checkbox"/>
NSTAR Electric Company	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Public Service Company of New Hampshire	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The aggregate market value of Eversource Energy's Common Shares, \$5.00 par value, held by non-affiliates, computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of Eversource Energy's most recently completed second fiscal quarter (June 30, 2019) was \$24,486,439,602 based on a closing market price of \$75.76 per share for the 323,210,660 common shares outstanding held by non-affiliates on June 30, 2019.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

<u>Company - Class of Stock</u>	<u>Outstanding as of January 31, 2020</u>
Eversource Energy Common Shares, \$5.00 par value	329,952,663 shares
The Connecticut Light and Power Company Common Stock, \$10.00 par value	6,035,205 shares
NSTAR Electric Company Common Stock, \$1.00 par value	200 shares
Public Service Company of New Hampshire Common Stock, \$1.00 par value	301 shares

Eversource Energy holds all of the 6,035,205 shares, 200 shares and 301 shares of the outstanding common stock of The Connecticut Light and Power Company, NSTAR Electric Company and Public Service Company of New Hampshire, respectively.

Eversource Energy, The Connecticut Light and Power Company, NSTAR Electric Company and Public Service Company of New Hampshire each separately file this combined Form 10-K. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants.

## GLOSSARY OF TERMS

The following is a glossary of abbreviations and acronyms that are found in this report:

### **Current or former Eversource Energy companies, segments or investments:**

Eversource, ES or the Company	Eversource Energy and subsidiaries
Eversource parent or ES parent	Eversource Energy, a public utility holding company
ES parent and other companies	ES parent and other companies are comprised of Eversource parent, Eversource Service, Eversource Water Ventures, Inc. (parent company of Aquarion), and other subsidiaries, which primarily includes our unregulated businesses, HWP Company, The Rocky River Realty Company (a real estate subsidiary), the consolidated operations of CYAPC and YAEC, and Eversource parent's equity ownership interests that are not consolidated
CL&P	The Connecticut Light and Power Company
NSTAR Electric	NSTAR Electric Company
PSNH	Public Service Company of New Hampshire
PSNH Funding	PSNH Funding LLC 3, a bankruptcy remote, special purpose, wholly-owned subsidiary of PSNH
NSTAR Gas	NSTAR Gas Company
Yankee Gas	Yankee Gas Services Company
Aquarion	Eversource Aquarion Holdings, Inc. and its subsidiaries
NPT	Northern Pass Transmission LLC
Northern Pass	The HVDC and associated alternating-current transmission line project from Canada into New Hampshire
Eversource Service	Eversource Energy Service Company
Bay State Wind	Bay State Wind LLC, an offshore wind business being developed jointly by Eversource and Denmark-based
North East Offshore	North East Offshore, LLC, an offshore wind business holding company being developed jointly by Eversource and Denmark-based Ørsted, which holds the Revolution Wind and South Fork Wind projects
CYAPC	Connecticut Yankee Atomic Power Company
MYAPC	Maine Yankee Atomic Power Company
YAEC	Yankee Atomic Electric Company
Yankee Companies	CYAPC, YAEC and MYAPC
Regulated companies	The Eversource regulated companies are comprised of the electric distribution and transmission businesses of CL&P, NSTAR Electric and PSNH, the natural gas distribution businesses of Yankee Gas and NSTAR Gas, NPT, Aquarion, and the solar power facilities of NSTAR Electric

### **Regulators:**

DEEP	Connecticut Department of Energy and Environmental Protection
DOE	U.S. Department of Energy
DOER	Massachusetts Department of Energy Resources
DPU	Massachusetts Department of Public Utilities
EPA	U.S. Environmental Protection Agency
FERC	Federal Energy Regulatory Commission
ISO-NE	ISO New England, Inc., the New England Independent System Operator
MA DEP	Massachusetts Department of Environmental Protection
NHPUC	New Hampshire Public Utilities Commission
PURA	Connecticut Public Utilities Regulatory Authority
SEC	U.S. Securities and Exchange Commission
SJC	Supreme Judicial Court of Massachusetts

### **Other Terms and Abbreviations:**

ADIT	Accumulated Deferred Income Taxes
AFUDC	Allowance For Funds Used During Construction
AOCI	Accumulated Other Comprehensive Income
ARO	Asset Retirement Obligation
Bcf	Billion cubic feet
C&LM	Conservation and Load Management
CfD	Contract for Differences
CTA	Competitive Transition Assessment
CWIP	Construction Work in Progress
EDC	Electric distribution company
EDIT	Excess Deferred Income Taxes
EPS	Earnings Per Share

ERISA	Employee Retirement Income Security Act of 1974
ESOP	Employee Stock Ownership Plan
Eversource 2018 Form 10-K	The Eversource Energy and Subsidiaries 2018 combined Annual Report on Form 10-K as filed with the SEC
Fitch	Fitch Ratings
FMCC	Federally Mandated Congestion Charge
FTR	Financial Transmission Rights
GAAP	Accounting principles generally accepted in the United States of America
GSC	Generation Service Charge
GSRP	Greater Springfield Reliability Project
GWh	Gigawatt-Hours
HQ	Hydro-Québec, a corporation wholly-owned by the Québec government, including its divisions that produce, transmit and distribute electricity in Québec, Canada
HVDC	High-voltage direct current
Hydro Renewable Energy	Hydro Renewable Energy, Inc., a wholly-owned subsidiary of Hydro-Québec
IPP	Independent Power Producers
ISO-NE Tariff	ISO-NE FERC Transmission, Markets and Services Tariff
kV	Kilovolt
kVa	Kilovolt-ampere
kW	Kilowatt (equal to one thousand watts)
LBR	Lost Base Revenue
LNG	Liquefied natural gas
LRS	Supplier of last resort service
MG	Million gallons
MGP	Manufactured Gas Plant
MMBtu	One million British thermal units
MMcf	Million cubic feet
Moody's	Moody's Investors Services, Inc.
MW	Megawatt
MWh	Megawatt-Hours
NEEWS	New England East-West Solution
NETOs	New England Transmission Owners (including Eversource, National Grid and Avangrid)
OCI	Other Comprehensive Income/(Loss)
PAM	Pension and PBOP Rate Adjustment Mechanism
PBOP	Postretirement Benefits Other Than Pension
PBOP Plan	Postretirement Benefits Other Than Pension Plan
Pension Plan	Single uniform noncontributory defined benefit retirement plan
PPA	Power purchase agreement
RECs	Renewable Energy Certificates
Regulatory ROE	The average cost of capital method for calculating the return on equity related to the distribution business segment excluding the wholesale transmission segment
ROE	Return on Equity
RRBs	Rate Reduction Bonds or Rate Reduction Certificates
RSUs	Restricted share units
S&P	Standard & Poor's Financial Services LLC
SBC	Systems Benefits Charge
SCRC	Stranded Cost Recovery Charge
SERP	Supplemental Executive Retirement Plans and non-qualified defined benefit retirement plans
SS	Standard service
TCAM	Transmission Cost Adjustment Mechanism
TSA	Transmission Service Agreement
UI	The United Illuminating Company

**EVERSOURCE ENERGY AND SUBSIDIARIES  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

**SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES  
LITIGATION REFORM ACT OF 1995**

References in this Annual Report on Form 10-K to "Eversource," the "Company," "we," "our," and "us" refer to Eversource Energy and its consolidated subsidiaries. CL&P, NSTAR Electric, and PSNH are each doing business as Eversource Energy.

From time to time, we make statements concerning our expectations, beliefs, plans, objectives, goals, strategies, assumptions of future events, future financial performance or growth and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. You can generally identify our forward-looking statements through the use of words or phrases such as "estimate," "expect," "anticipate," "intend," "plan," "project," "believe," "forecast," "should," "could," and other similar expressions. Forward-looking statements are based on the current expectations, estimates, assumptions or projections of management and are not guarantees of future performance. These expectations, estimates, assumptions or projections may vary materially from actual results. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors that could cause our actual results to differ materially from those contained in our forward-looking statements, including, but not limited to:

- cyberattacks or breaches, including those resulting in the compromise of the confidentiality of our proprietary information and the personal information of our customers,
- ability or inability to commence and complete our major strategic development projects and opportunities,
- acts of war or terrorism, physical attacks or grid disturbances that may damage and disrupt our electric transmission and electric, natural gas, and water distribution systems,
- actions or inaction of local, state and federal regulatory, public policy and taxing bodies,
- substandard performance of third-party suppliers and service providers,
- fluctuations in weather patterns, including extreme weather due to climate change,
- changes in business conditions, which could include disruptive technology or development of alternative energy sources related to our current or future business model,
- contamination of, or disruption in, our water supplies,
- changes in economic conditions, including impact on interest rates, tax policies, and customer demand and payment ability,
- changes in levels or timing of capital expenditures,
- disruptions in the capital markets or other events that make our access to necessary capital more difficult or costly,
- changes in laws, regulations or regulatory policy, including compliance with environmental laws and regulations,
- changes in accounting standards and financial reporting regulations,
- actions of rating agencies, and
- other presently unknown or unforeseen factors.

Other risk factors are detailed in our reports filed with the SEC and updated as necessary, and we encourage you to consult such disclosures.

All such factors are difficult to predict and contain uncertainties that may materially affect our actual results, many of which are beyond our control. You should not place undue reliance on the forward-looking statements, as each speaks only as of the date on which such statement is made, and, except as required by federal securities laws, we undertake no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for us to predict all of such factors, nor can we assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. For more information, see Item 1A, *Risk Factors*, included in this combined Annual Report on Form 10-K. This Annual Report on Form 10-K also describes material contingencies and critical accounting policies in the accompanying *Management's Discussion and Analysis of Financial Condition and Results of Operations* and *Combined Notes to Financial Statements*. We encourage you to review these items.

**EVERSOURCE ENERGY AND SUBSIDIARIES  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

**PART I**

**Item 1. Business**

Please refer to the Glossary of Terms for definitions of defined terms and abbreviations used in this combined Annual Report on Form 10-K.

Eversource Energy, headquartered in Boston, Massachusetts and Hartford, Connecticut, is a public utility holding company subject to regulation by the FERC under the Public Utility Holding Company Act of 2005. We are engaged primarily in the energy delivery business through the following wholly-owned utility subsidiaries:

- The Connecticut Light and Power Company (CL&P), a regulated electric utility that serves residential, commercial and industrial customers in parts of Connecticut;
- NSTAR Electric Company (NSTAR Electric), a regulated electric utility that serves residential, commercial and industrial customers in parts of eastern and western Massachusetts and owns solar power facilities;
- Public Service Company of New Hampshire (PSNH), a regulated electric utility that serves residential, commercial and industrial customers in parts of New Hampshire;
- NSTAR Gas Company (NSTAR Gas), a regulated natural gas utility that serves residential, commercial and industrial customers in parts of Massachusetts;
- Yankee Gas Services Company (Yankee Gas), a regulated natural gas utility that serves residential, commercial and industrial customers in parts of Connecticut; and
- Eversource Aquarion Holdings, Inc. (Aquarion), a utility holding company that owns three separate regulated water utility subsidiaries and collectively serves residential, commercial, industrial, and municipal and fire protection customers in parts of Connecticut, Massachusetts and New Hampshire.

CL&P, NSTAR Electric and PSNH also serve New England customers through Eversource Energy's electric transmission business. Along with NSTAR Gas and Yankee Gas, each is doing business as Eversource Energy in its respective service territory.

Eversource Energy, CL&P, NSTAR Electric and PSNH each report their financial results separately. We also include information in this report on a segment basis for Eversource Energy. Eversource Energy has four reportable segments: electric distribution, electric transmission, natural gas distribution and water distribution. These segments represent substantially all of Eversource Energy's total consolidated revenues. CL&P, NSTAR Electric and PSNH do not report separate business segments.

**ELECTRIC DISTRIBUTION SEGMENT**

Eversource Energy's electric distribution segment consists of the distribution businesses of CL&P, NSTAR Electric and PSNH, which are engaged in the distribution of electricity to retail customers in Connecticut, Massachusetts and New Hampshire, respectively, and the solar power facilities of NSTAR Electric, and the generation facilities of PSNH before such facilities were sold in January and August 2018.

**ELECTRIC DISTRIBUTION – CONNECTICUT – THE CONNECTICUT LIGHT AND POWER COMPANY**

CL&P's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2019, CL&P furnished retail franchise electric service to approximately 1.26 million customers in 149 cities and towns in Connecticut, covering an area of approximately 4,400 square miles. CL&P does not own any electric generation facilities.

**Rates**

CL&P is subject to regulation by the PURA, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities. CL&P's present general rate structure consists of various rate and service classifications covering residential, commercial and industrial services. CL&P's retail rates include a delivery service component, which includes distribution, transmission, conservation, renewable energy programs and other charges that are assessed on all customers.

Under Connecticut law, all of CL&P's customers are entitled to choose their energy suppliers, while CL&P remains their electric distribution company. For those customers who do not choose a competitive energy supplier, under SS rates for customers with less than 500 kilowatts of demand (residential customers and small and medium commercial and industrial customers), and LRS rates for customers with 500 kilowatts or more of demand (larger commercial and industrial customers), CL&P purchases power under standard offer contracts and passes the cost of the purchased power to customers through a combined charge on customers' bills.

The rates established by the PURA for CL&P are comprised of the following:

- An electric GSC, which recovers energy-related costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers. The GSC is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- A revenue decoupling adjustment that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the PURA of \$1.099 billion effective May 1, 2018, \$1.127 billion effective May 1, 2019, and \$1.158 billion effective May 1, 2020. These pre-established levels of baseline distribution delivery service revenue requirement are also subject to adjustment at each of these dates in accordance with provisions of the April 2018 rate case settlement agreement.
- A distribution charge, which includes a fixed customer charge and a demand and/or energy charge to collect the costs of building and expanding the infrastructure to deliver electricity to customers, as well as ongoing operating costs to maintain the infrastructure.
- An Electric System Improvements (ESI) charge, which collects the costs of building and expanding the infrastructure to deliver electricity to customers above the level recovered through the distribution charge. The ESI also recovers costs associated with CL&P's system resiliency program. The ESI is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- An FMCC, which recovers any costs imposed by the FERC as part of the New England Standard Market Design, including locational marginal pricing, locational installed capacity payments, and any costs approved by the PURA to reduce these charges. The FMCC has both a bypassable component and a non-bypassable component, and is adjusted periodically and reconciled annually in accordance with the policies and procedures of the PURA, with any differences refunded to, or recovered from, customers.
- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market. The transmission charge is adjusted periodically and reconciled annually to actual costs incurred, and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- A CTA charge, assessed to recover stranded costs associated with electric industry restructuring such as various IPP contracts. The CTA is reconciled annually to actual costs incurred and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- An SBC, established to fund expenses associated with various hardship and low-income programs. The SBC is reconciled annually to actual costs incurred and reviewed by the PURA, with any difference refunded to, or recovered from, customers.
- A Renewable Energy Investment Charge, which is used to promote investment in renewable energy sources. Amounts collected by this charge are deposited into the Connecticut Clean Energy Fund and administered by the Connecticut Green Bank.
- A conservation charge, comprised of both a statutory rate and Conservation Adjustment Mechanism (CAM) established to implement cost-effective energy conservation programs and market transformation initiatives. The conservation charge is reconciled annually to actual costs incurred, and reviewed by the PURA, with any difference refunded to, or recovered from, customers through an approved adjustment to the following year's energy conservation spending plan budget.

As required by regulation, CL&P has entered into long-term contracts for the purchase of (i) products from renewable energy facilities, which may include energy, renewable energy certificates, or capacity, (ii) capacity-related contracts with generation facilities, and (iii) contracts for peaking capacity. Some of these contracts are subject to sharing agreements with UI, whereby CL&P is responsible for 80 percent and UI for 20 percent of the net costs or benefits. CL&P's portion of the costs and benefits of these contracts will be paid by, or refunded to, CL&P's customers.

Distribution Rate Case: CL&P's distribution rates were established in an April 2018 PURA-approved rate case settlement agreement with rates effective May 1, 2018.

### **Sources and Availability of Electric Power Supply**

As noted above, CL&P does not own any generation assets and purchases energy supply to serve its SS and LRS loads from a variety of competitive sources through requests for proposals. During 2019, CL&P supplied approximately 46 percent of its customer load at SS or LRS rates while the other 54 percent of its customer load had migrated to competitive energy suppliers. In terms of the total number of CL&P customers, this equates to 25 percent being on competitive supply, while 75 percent remain with SS or LRS. Because this customer migration is only for energy supply service, it has no impact on CL&P's electric distribution business or its operating income.

CL&P periodically enters into full requirements contracts for SS loads for periods of up to one year. CL&P typically enters into full requirements contracts for LRS loads every three months. Currently, CL&P has full requirements contracts in place for 100 percent of its SS loads for the first half of 2020. For the second half of 2020, CL&P has 70 percent of its SS load under full requirements contracts and intends to purchase an additional 30 percent of full requirements. None of the SS load for 2021 has been procured. CL&P has full requirements contracts in place for its LRS loads through June 2020 and intends to purchase 100 percent of full requirements for the remainder of 2020.

## **ELECTRIC DISTRIBUTION – MASSACHUSETTS – NSTAR ELECTRIC COMPANY**

NSTAR Electric's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2019, NSTAR Electric furnished retail franchise electric service to approximately 1.44 million customers in Boston and 139 cities and towns in eastern and western Massachusetts, including Cape Cod, Martha's Vineyard and the greater Springfield metropolitan area, covering an aggregate area of approximately 3,200 square miles.

NSTAR Electric does not own any generating facilities that are used to supply customers and purchases its energy requirements from competitive energy suppliers.

NSTAR Electric installed and completed nineteen new solar power facilities for a total of 62 MW by the end of 2019. These solar sites are in addition to the 8 MW of solar power facilities constructed between 2010 and 2014. NSTAR Electric now owns, operates and maintains a total of 70 MW of solar power facilities on twenty-two sites in Massachusetts. NSTAR Electric will sell energy from the new facilities into the ISO-NE market, with proceeds credited to customers.

### **Rates**

NSTAR Electric is subject to regulation by the DPU, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, acquisition of securities, standards of service and construction and operation of facilities. The present general rate structure for NSTAR Electric consists of various rate and service classifications covering residential, commercial and industrial services.

Under Massachusetts law, all customers of NSTAR Electric are entitled to choose their energy suppliers, while NSTAR Electric remains their electric distribution company. NSTAR Electric purchases power from competitive suppliers on behalf of, and passes the related cost through to, its customers who do not choose a competitive energy supplier (basic service). Electric distribution companies in Massachusetts are required to obtain and resell power to retail customers through basic service for those who choose not to buy energy from a competitive energy supplier. Most of the residential customers of NSTAR Electric have continued to buy their power from NSTAR Electric at basic service rates. Most commercial and industrial customers have switched to a competitive energy supplier.

The Cape Light Compact, an inter-governmental organization consisting of the 21 towns and two counties on Cape Cod and Martha's Vineyard, serves 200,000 customers through the delivery of energy efficiency programs, consumer advocacy, competitive electricity supply and green power options. NSTAR Electric continues to provide electric service to these customers including the delivery of power, maintenance of infrastructure, capital investment, meter reading, billing, and customer service.

The rates established by the DPU for NSTAR Electric are comprised of the following:

- A basic service charge that represents the collection of energy costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers, including costs related to charge-offs of uncollectible energy costs from customers. Basic service rates are reset every six months (every three months for large commercial and industrial customers). Additionally, the DPU has authorized NSTAR Electric to recover the cost of its NSTAR Green wind contracts through the basic service charge. Basic service costs are reconciled annually, with any differences refunded to, or recovered from, customers.
- A distribution charge, which includes a fixed customer charge and a demand and/or energy charge to collect the costs of building and expanding the distribution infrastructure to deliver electricity to its destination, as well as ongoing operating costs.
- A revenue decoupling adjustment that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the DPU of \$956 million on an annualized basis for 2018 and \$988 million for 2019. Annual base distribution amounts are adjusted for inflation and filed for approval by the DPU on an annual basis, until the next rate case.
- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market. The transmission charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- A transition charge that represents costs to be collected primarily from previously held investments in generating plants, costs related to existing above-market power contracts, and contract costs related to long-term power contract buy-outs. The transition charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- A renewable energy charge that represents a legislatively-mandated charge to support the Massachusetts Renewable Energy Trust Fund.

- An energy efficiency charge that represents a legislatively-mandated charge to collect costs for energy efficiency programs. The energy efficiency charge is reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.
- Reconciling adjustment charges that recover certain DPU-approved costs, including pension and PBOP benefits, low income customer discounts, credits issued to net-metering facilities installed by customers, payments to solar facilities qualified under the state solar renewable energy target program, attorney general consultant expenses, long-term renewable contracts, company-owned solar facilities, vegetation management costs, credits related to the Tax Cuts and Jobs Act of 2017, grid modernization costs, and storm restoration. These charges are reconciled annually to actual costs incurred and reviewed by the DPU, with any difference refunded to, or recovered from, customers.

NSTAR Electric has signed long-term commitments for the purchase of energy from renewable energy facilities.

Distribution Rate Case: NSTAR Electric's distribution rates were established in a 2017 DPU-approved rate case with rates effective February 1, 2018.

Service Quality Metrics: NSTAR Electric is subject to service quality (SQ) metrics that measure safety, reliability and customer service, and could be required to pay to customers a SQ charge of up to 2.5 percent of annual transmission and distribution revenues for failing to meet such metrics. NSTAR Electric will not be required to pay a SQ charge for its 2019 performance as the company achieved results at or above target for all of its SQ metrics in 2019.

### **Sources and Availability of Electric Power Supply**

As noted above, NSTAR Electric does not own any generation assets (other than 70 MW of solar power facilities that produce energy that is sold into the ISO-NE market) and purchases its energy requirements from a variety of competitive sources through requests for proposals issued periodically, consistent with DPU regulations. NSTAR Electric enters into supply contracts for basic service for approximately 45 percent of its residential and small commercial and industrial (C&I) customers twice per year for twelve-month terms. NSTAR Electric enters into supply contracts for basic service for 18 percent of large C&I customers every three months.

During 2019, NSTAR Electric supplied approximately 44 percent of its residential customer load, 31 percent of its small C&I customer load, and 8 percent of its large C&I customer load at basic service rates. The remainder of its customer load was distributed between municipal aggregation and competitive supply. Because customer migration is limited to energy supply service, it has no impact on the delivery business or operating income of NSTAR Electric.

### **ELECTRIC DISTRIBUTION – NEW HAMPSHIRE – PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE**

PSNH's distribution business consists primarily of the purchase, delivery and sale of electricity to its residential, commercial and industrial customers. As of December 31, 2019, PSNH furnished retail franchise electric service to approximately 523,000 retail customers in 211 cities and towns in New Hampshire, covering an area of approximately 5,630 square miles.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to a 2017 purchase and sale agreement. The thermal generation facilities included approximately 1,100 MW of coal, natural gas, biomass and oil-fired electricity generation facilities. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to a separate 2017 purchase and sale agreement. For further information, see "Generation Divestiture" below. As of December 31, 2019, PSNH does not own any electric generation facilities.

### **Rates**

PSNH is subject to regulation by the NHPUC, which, among other things, has jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of securities, standards of service and construction and operation of facilities.

Under New Hampshire law, all of PSNH's customers are entitled to choose competitive energy suppliers. During 2019, approximately 23 percent of all of PSNH's customers (approximately 56 percent of load) were taking service from competitive energy suppliers.

The rates established by the NHPUC for PSNH are comprised of the following:

- A default energy service charge recovers energy-related costs incurred as a result of providing electric generation service supply to all customers that have not migrated to competitive energy suppliers. Through March 31, 2018, the default energy service charge recovered the costs of PSNH's generation, as well as purchased power, and included an allowed ROE of 9.81 percent. Effective April 1, 2018, as a result of the completion of the divestiture of its non-hydro generation assets, PSNH purchased power for retail customers who had not chosen a competitive supplier through a periodic market solicitation with the rate set to recover the cost of that power, statutorily mandated renewable portfolio standard costs and the continued cost associated with the ownership of the Hydro generation units until the completion of the divestiture of the hydro units in August 2018. Effective September 1, 2018, any remaining costs from ownership of generation are recovered as part of the SCRC described below.
- A distribution charge, which includes kilowatt-hour and/or demand-based charges to recover costs related to the maintenance and operation of PSNH's infrastructure to deliver power to its destination, as well as power restoration and service costs. It also includes a customer charge to collect the cost of providing service to a customer; such as the installation, maintenance, reading and replacement of meters and maintaining accounts and records.

- A transmission charge that recovers the cost of transporting electricity over high-voltage lines from generating plants to substations, including costs allocated by ISO-NE to maintain the wholesale electric market.
- An SCRC, which allows PSNH to recover its stranded costs, including above-market expenses incurred under mandated power purchase obligations, other long-term investments and obligations, and the remaining costs associated with the 2018 sales of its generation facilities.
- An SBC, which funds energy efficiency programs for all customers, as well as assistance programs for residential customers within certain income guidelines.

PSNH has signed long-term commitments for the purchase of energy from renewable energy facilities.

The default energy service charge and SCRC rates change semi-annually and the transmission and SBC rates change annually. These rates are reconciled annually in accordance with the policies and procedures of the NHPUC, with any differences refunded to, or recovered from, customers.

Distribution Rate Case: PSNH distribution rates were last established in a settlement approved by the NHPUC in 2010. Prior to the expiration of that settlement on June 30, 2015, the NHPUC approved the continuation of those rates, and increased funding via rates, of PSNH's reliability enhancement program.

On April 26, 2019, PSNH filed an application with the NHPUC for approval of a temporary annual base distribution rate increase of approximately \$33 million, effective July 1, 2019. On June 27, 2019, the NHPUC approved a settlement agreement that was reached by PSNH, the NHPUC Staff, the Office of the Consumer Advocate, and another settling party, to implement a temporary annual base distribution rate increase of \$28.3 million. Although new rates were implemented on August 1, 2019 to customers, the provisions of the temporary base distribution rate increase were effective July 1, 2019. The settlement agreement also permits PSNH to recover approximately \$68.5 million in unrecovered storm costs over a five-year period beginning August 1, 2019, with debt carrying charges, which is included in the temporary rate increase.

On May 28, 2019, PSNH filed an application with the NHPUC for a permanent increase in base distribution rates of approximately \$70 million, effective July 1, 2020, which includes the temporary rate increase request. The temporary rates are subject to reconciliation based on the outcome of the permanent rate case now before the NHPUC. The NHPUC is permitted up to twelve months to adjudicate the permanent rate application from the date of filing. A decision by the NHPUC is expected in the second quarter of 2020.

### **Generation Divestiture**

In June 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement, pursuant to which PSNH agreed to divest its generation assets, subject to NHPUC approval. The NHPUC approved this agreement as well as the final divestiture plan and auction process in 2016. On October 11, 2017, PSNH entered into two Purchase and Sale Agreements with private investors, one to sell its thermal generation assets at a purchase price of \$175 million, subject to adjustment, (the "Thermal Agreement") and a second to sell its hydroelectric generation assets at a purchase price of \$83 million, subject to adjustment (the "Hydro Agreement"). The NHPUC approved these agreements in late November 2017.

On January 10, 2018, PSNH completed the sale of its thermal generation assets pursuant to the Thermal Agreement. In accordance with the Thermal Agreement, the original purchase price of \$175 million was adjusted to reflect working capital adjustments, closing date adjustments and proration of taxes and fees prior to closing, totaling \$40.9 million. In the second quarter of 2018, the purchase price was further adjusted by \$17.3 million relating to the valuation of certain allowances. As a result of these adjustments, net proceeds from the sale of the thermal assets totaled \$116.8 million.

On July 16, 2018, FERC issued its order approving the transfer of PSNH's six hydroelectric licenses to private investors. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets pursuant to the Hydro Agreement. In accordance with the Hydro Agreement, the original purchase price of \$83 million was adjusted to reflect contractual adjustments totaling \$5.8 million, resulting in net proceeds of \$77.2 million. The difference between the carrying value of the hydroelectric generation assets and the sale proceeds resulted in a gain of \$17.3 million. An estimated gain from the sale of these assets was included as an offset to the total remaining costs associated with the sale of generation assets that were securitized on May 8, 2018.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs pursuant to a finance order issued by the NHPUC on January 30, 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets, which included the deferred costs resulting from the sale of the thermal generation assets. These RRBs are secured by a non-bypassable charge recoverable from PSNH customers. PSNH recorded regulatory assets and other deferred costs in connection with the generation asset divestiture and the securitization of remaining costs, which are probable of recovery through collection of the non-bypassable charge.

On November 27, 2019, PSNH filed a motion for the commencement of audit of divestiture-related costs. PSNH's actual balance of costs eligible for recovery as divestiture-related costs is \$654.0 million, which is above the \$635.7 million amount securitized in May 2018. PSNH proposed to recover this balance through the SCRC tracker mechanism and believes the amount deferred is probable of recovery.

## Sources and Availability of Electric Power Supply

PSNH does not own any generation assets and purchases energy supply from a variety of competitive suppliers for its energy service customers through requests for proposals issued twice per year, for six-month terms, for approximately 78 percent of its residential and small C&I customers and for 14 percent of its large C&I customers.

During 2019, PSNH supplied approximately 43 percent of its customer load at default energy service rates while the other 57 percent of its customer load had migrated to competitive energy suppliers. Because this customer migration is only for energy supply service, it has no impact on PSNH's electric distribution business or its operating income.

## ELECTRIC TRANSMISSION SEGMENT

Each of CL&P, NSTAR Electric and PSNH owns and maintains transmission facilities that are part of an interstate power transmission grid over which electricity is transmitted throughout New England. Each of CL&P, NSTAR Electric and PSNH, and most other New England utilities, are parties to a series of agreements that provide for coordinated planning and operation of the region's transmission facilities and the rules by which they acquire transmission services. Under these arrangements, ISO-NE, a non-profit corporation whose board of directors and staff are independent of all market participants, serves as the regional transmission organization of the New England transmission system.

### Wholesale Transmission Rates

Wholesale transmission revenues are recovered through FERC-approved formula rates. Annual transmission revenue requirements include recovery of transmission costs and include a return on equity applied to transmission rate base. Transmission revenues are collected from New England customers, including distribution customers of CL&P, NSTAR Electric and PSNH. The transmission rates provide for an annual true-up of estimated to actual costs. The financial impacts of differences between actual and estimated costs are deferred for future recovery from, or refund to, transmission customers.

### FERC ROE Complaints

Four separate complaints were filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive (incentive cap) of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

In response to appeals of the FERC decision in the first complaint filed by the NETOs and the Complainants, the U.S. Court of Appeals for the D.C. Circuit (the Court) issued a decision on April 14, 2017 vacating and remanding the FERC's decision. On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE.

On November 21, 2019, FERC issued an order concerning the transmission ROEs for the Midcontinent ISO transmission owners (MISO). In that order, FERC adopted another new methodology for determining base ROEs for MISO, which differed significantly from the methodology and framework set forth in its October 16, 2018 FERC order on the NETOs' ROE dockets. On December 23, 2019, the NETOs filed a Supplemental Paper Hearing Brief and a Motion to supplement the record in the NETO ROE dockets to respond to the new methodology proposed in the MISO order, as there is uncertainty to whether it may be applied to the NETOs' cases. On January 21, 2020, the FERC issued an order granting rehearing for further consideration to give the FERC more time to act on the substantive issues of the MISO ROE proceedings. Further changes to the methodology by FERC are possible as a result of the arguments in both the MISO and NETO proceedings. Given the significant uncertainty relating to the October 2018 FERC order, the November 2019 FERC order to MISO, and the FERC's rehearing of the MISO order, the Company is unable to predict the potential effect of the MISO order on the NETO complaints or the outcome of the four complaints and concluded that there is no reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods at this time. Further, the Company cannot reasonably estimate a range of gain or loss for any of the four complaint proceedings.

For further information, see "FERC Regulatory Matters - FERC ROE Complaints" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### Transmission Projects

During 2019, we were involved in the planning, development and construction of a series of electric transmission projects that will be built within the next two years and that will enhance system reliability and improve capacity. For more information on transmission projects, see "Business Development and Capital Expenditures – Electric Transmission Business" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Northern Pass was Eversource's planned 1,090 MW HVDC transmission line that would have interconnected from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire. As a result of a final decision received on July 19, 2019 from the New Hampshire Supreme Court, whereby the court denied Northern Pass' appeal and affirmed the NHSEC's denial of Northern Pass' siting application on NPT, Eversource concluded that construction of NPT was no longer probable and that there was no constructive path forward for the project. Eversource terminated the project and permanently abandoned any further development. As a result, substantially all of the capitalized project costs, which totaled \$318 million, certain of which are subject to cost

reimbursement agreements, were impaired. For further information, see "Critical Accounting Policies - Impairment of Northern Pass Transmission" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **Transmission Rate Base**

Transmission rate base under our FERC-approved tariff primarily consists of our investment in transmission net utility plant less accumulated deferred income taxes.

Under our FERC-approved tariff, and with the exception of transmission projects that received specific FERC approval to include CWIP in rate base, transmission projects generally enter rate base after they are placed in commercial operation. At the end of 2019, our estimated transmission rate base was approximately \$7.3 billion, including approximately \$3.3 billion at CL&P, \$2.9 billion at NSTAR Electric, and \$1.1 billion at PSNH.

### **NATURAL GAS DISTRIBUTION SEGMENT**

NSTAR Gas distributes natural gas to approximately 300,000 customers in 51 communities in central and eastern Massachusetts covering 1,067 square miles, and Yankee Gas distributes natural gas to approximately 241,000 customers in 72 cities and towns in Connecticut covering 2,187 square miles. Total throughput (sales and transportation) in 2019 was approximately 73.5 Bcf for NSTAR Gas and 58.4 Bcf for Yankee Gas. Our natural gas businesses provide firm natural gas sales and transportation service to eligible retail customers who require a continuous natural gas supply throughout the year, such as residential customers who rely on natural gas for heating, hot water and cooking needs, as well as commercial and industrial customers that rely on natural gas for space heating, hot water, cooking and commercial and industrial applications.

A portion of the storage of natural gas supply for NSTAR Gas during the winter heating season is provided by Hopkinton LNG Corp., an indirect, wholly-owned subsidiary of Eversource Energy. NSTAR Gas has access to Hopkinton LNG Corp. facilities in Hopkinton, Massachusetts consisting of a LNG liquefaction and vaporization plant and three above-ground cryogenic storage tanks having an aggregate capacity of 3.0 Bcf of liquefied natural gas. NSTAR Gas also has access to Hopkinton LNG Corp. facilities in Acushnet, Massachusetts that include additional storage capacity of 0.5 Bcf. Total vaporization capacity of these facilities is 0.21 Bcf per day. Yankee Gas owns a 1.2 Bcf LNG facility in Waterbury, Connecticut, which also has the ability to liquefy and vaporize up to 0.1 Bcf per day. This facility is used primarily to assist Yankee Gas in meeting its supplier-of-last-resort obligations and also enables it to provide economic supply and make economic refill of natural gas, typically during periods of low demand.

NSTAR Gas and Yankee Gas generate revenues primarily through the sale and/or transportation of natural gas. While all NSTAR Gas customers have the ability to choose to transport natural gas, in the past year, transportation represented only approximately three percent of the total residential load, while transportation represented approximately 58 percent of the total commercial and industrial load. Retail natural gas service in Connecticut is partially unbundled: residential customers in Yankee Gas' service territory buy natural gas supply and delivery only from Yankee Gas while commercial and industrial customers may choose their natural gas suppliers. Firm transportation service is offered to customers who purchase natural gas from sources other than NSTAR Gas or Yankee Gas. NSTAR Gas has the ability to offer interruptible transportation and interruptible natural gas sales service to high volume commercial and industrial customers. Yankee Gas offers interruptible transportation and interruptible natural gas sales service to commercial and industrial customers that have the ability to switch from natural gas to an alternate fuel on short notice. NSTAR Gas and Yankee Gas can interrupt service to these customers during peak demand periods or at any other time to maintain distribution system integrity.

### **Rates**

NSTAR Gas and Yankee Gas are subject to regulation by the DPU and the PURA, respectively, which, among other things, have jurisdiction over rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities.

Retail natural gas delivery and supply rates are established by the DPU and the PURA and are comprised of:

- A distribution charge consisting of a fixed customer charge and a demand and/or energy charge that collects the costs of building, maintaining, and expanding the natural gas infrastructure to deliver natural gas supply to its customers. This also includes collection of ongoing operating costs.
- A seasonal cost of gas adjustment clause (CGAC) at NSTAR Gas that collects natural gas supply costs, pipeline and storage capacity costs, costs related to charge-offs of uncollected energy costs and working capital related costs. The CGAC is reset semi-annually with any difference being recovered from, or refunded to, customers during the following corresponding season. In addition, NSTAR Gas files interim changes to its CGAC factor when the actual costs of natural gas supply vary from projections by more than five percent.
- A local distribution adjustment clause (LDAC) at NSTAR Gas that collects all energy efficiency and related program costs, environmental costs, pension and PBOP related costs, attorney general consultant costs, credits related to the Tax Cuts and Jobs Act of 2017, gas system enhancement program (GSEP) costs and costs associated with low income customers. The LDAC is reset annually with any difference being recovered from, or refunded to, customers during the following period and provides for the recovery of certain costs applicable to both sales and transportation customers.
- A Revenue Decoupling Mechanism (RDM) at NSTAR Gas that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the DPU in

2015. The pre-established level of baseline distribution delivery service revenue requirement is also subject to adjustment in accordance with provisions of the November 2015 NSTAR Gas distribution rate case.

- A Purchased Gas Adjustment (PGA) clause, which is evaluated monthly and allows Yankee Gas to recover the costs of the procurement of natural gas for its firm and seasonal customers. Differences between actual natural gas costs and collection amounts on August 31st of each year are deferred and then recovered from, or refunded to, customers during the following year. Carrying charges on outstanding balances are calculated using Yankee Gas' weighted average cost of capital in accordance with the directives of the PURA.
- A Conservation Adjustment Mechanism (CAM) at Yankee Gas, which allows 100 percent recovery of conservation costs through this mechanism including program incentives to promote energy efficiency, as well as recovery of any lost revenues associated with implementation of energy conservation measures. A reconciliation of CAM revenues to expenses is performed annually with any difference being recovered from, or refunded to, customers with carrying charges during the following year.
- A Gas System Improvement (GSI) reconciliation mechanism at Yankee Gas, which collects the costs of certain Distribution Integrity Management Program (DIMP) and core capital plant in service above and beyond the level that is recovered through the distribution charge. The GSI is adjusted and reconciled annually, with any differences refunded to, or recovered from, customers.
- A RDM at Yankee Gas that reconciles annual base distribution rate recovery amounts recovered from customers to the pre-established level of baseline distribution delivery service revenue requirement approved by the PURA effective January 1, 2019, January 1, 2020 and January 1, 2021. The pre-established level of baseline distribution delivery service revenue requirement is also subject to adjustment at each of these dates in accordance with provisions of the 2018 rate case settlement agreement.
- A System Expansion Rate (SER) Reconciliation Mechanism at Yankee Gas, which compares distribution system expansion investment costs and revenues for new customers, with the level projected in current distribution customer rates. This reconciliation is performed annually and customer rates are adjusted accordingly.

NSTAR Gas purchases financial contracts based on the New York Mercantile Exchange (NYMEX) natural gas futures in order to reduce cash flow variability associated with the price for approximately one-third of its normal winter season natural gas supplies. These purchases are made under a program approved by the DPU in 2006. This practice attempts to minimize the impact of fluctuations in natural gas prices to NSTAR Gas' firm natural gas customers. These financial contracts do not procure natural gas supply. All costs incurred or benefits realized when these contracts are settled are included in the CGAC.

NSTAR Gas is subject to SQ metrics that measure safety, reliability and customer service and could be required to pay to customers a SQ charge of up to 2.5 percent of annual distribution revenues for failing to meet such metrics. NSTAR Gas will not be required to pay a SQ charge for its 2019 performance as it achieved results at or above target for all of its SQ metrics in 2019.

Distribution Rate Case: On November 8, 2019, NSTAR Gas filed its application with the DPU, which sought a distribution rate increase of \$38.0 million effective October 1, 2020. As part of this filing, NSTAR Gas also proposed to continue its ongoing Gas System Enhancement Program (GSEP), include the GSEP investments since 2015 into base rates, and implement a performance-based ratemaking plan. A final decision from the DPU is expected by September 30, 2020.

Yankee Gas distribution rates were set in a December 2018 PURA approved rate case settlement agreement, with rates effective November 15, 2018. The 2018 Yankee Gas settlement agreement required Yankee Gas to implement a Distribution Integrity Management Program (DIMP) cost recovery mechanism to further invest capital to replace aging infrastructure. The DIMP mechanism allows for recovery of costs associated with capital additions of approximately \$26 million to \$37 million annually, which is incremental to the \$150 million included in base distribution rate base per year. The settlement agreement also provides Yankee Gas the opportunity to seek recovery of additional capital spending above these levels with PURA approval. PURA ordered an accelerated replacement program for Yankee Gas to fully replace its cast iron and bare steel facilities in 11 years and fully replace copper services and certain steel mains and services in 14 years. Yankee Gas was also authorized to continue its ongoing natural gas system expansion program, implement a revenue decoupling rate mechanism, and recover merger costs. The settlement agreement included a regulatory ROE of 9.3 percent. In addition, the distribution rates charged to customers were adjusted to reflect the prospective impacts of the lower federal corporate income tax rate, the overcollection of the lower income tax rate from January 1, 2018, and the EDIT from the Tax Cuts and Jobs Act. Although new rates were effective January 1, 2019, the provisions of the settlement agreement took effect November 15, 2018.

### **Natural Gas Replacement and Expansion**

Massachusetts: Pursuant to Massachusetts legislation, in October of each year, NSTAR Gas files the GSEP with the DPU for the following construction year. NSTAR Gas' program accelerates the replacement of certain natural gas distribution facilities in the system to less than 25 years. The GSEP includes a tariff that provides NSTAR Gas an opportunity to collect the costs for the program on an annual basis through a reconciling factor. On April 30th each year, the DPU approves the GSEP rate recovery factor that goes into effect on May 1st.

NSTAR Gas' distribution rate case application filed on November 8, 2019 included a proposal to include GSEP additions through 2018 into base distribution rates and to continue the operation of the GSEP mechanism for GSEP investments made after 2018. In addition, the filing included a proposal for a customer connection surcharge, which would be used to reduce up-front contribution in aid of construction (CIAC) costs for customers seeking to connect to the company's distribution system. A final decision from the DPU is expected by September 30, 2020.

Connecticut: Yankee Gas' December 2018 PURA approved rate case settlement agreement included an accelerated pipeline replacement cost recovery program. The Gas System Improvement ("GSI") rate recovers accelerated pipeline replacement as well as other capital investment through an annual reconciliation. The Company filed its first GSI reconciliation on March 1, 2019 for rates effective April 1, 2019 and will continue to file annually on March 1 for rates effective April 1.

In 2013, in accordance with Connecticut law and regulations, the PURA approved a comprehensive joint natural gas infrastructure expansion plan (the "Expansion Plan") filed by Yankee Gas and other Connecticut natural gas distribution companies. In January 2015, the PURA approved a joint settlement agreement proposed by Yankee Gas and other Connecticut natural gas distribution companies and regulatory agencies that clarified the procedures and oversight criteria applicable to the Expansion Plan. Yankee Gas received approval from PURA for its 2014, 2015 and 2016 System Expansion Reconciliations. Yankee Gas filed its 2017 and 2018 System Expansion Reconciliations in March 2018 and March 2019, respectively. Yankee Gas is now awaiting an order and does not anticipate any material changes to its 2017 and 2018 Reconciliations.

### **Sources and Availability of Natural Gas Supply**

NSTAR Gas maintains a flexible resource portfolio consisting of natural gas supply contracts, transportation contracts on interstate pipelines, market area storage and peaking services. NSTAR Gas purchases transportation, storage, and balancing services from Tennessee Gas Pipeline Company and Algonquin Gas Transmission Company, as well as other upstream pipelines that transport natural gas from major natural gas producing regions in the U.S., including the Gulf Coast, Mid-continent region, and Appalachian Shale supplies to the final delivery points in the NSTAR Gas service area. NSTAR Gas purchases all of its natural gas supply under a firm, competitively bid annual portfolio management contract. In addition to the firm transportation and natural gas storage supplies discussed above, NSTAR Gas utilizes on-system LNG facilities to meet its winter peaking demands. These LNG facilities are located within NSTAR Gas' distribution system and are used to liquefy and store pipeline natural gas during the warmer months for vaporization and use during the heating season. During the summer injection season, excess pipeline capacity and supplies are used to deliver and store natural gas in market area underground storage facilities located in Maryland and Pennsylvania. Stored natural gas is withdrawn during the winter season to supplement flowing pipeline supplies in order to meet firm heating demand. NSTAR Gas has firm underground storage contracts and total storage capacity entitlements of approximately 6.6 Bcf, of which 3.5 Bcf LNG storage is provided by Hopkinton LNG Corp. in facilities located in Hopkinton and Acushnet, Massachusetts.

The PURA requires Yankee Gas to meet the needs of its firm customers under all weather conditions. Specifically, Yankee Gas must structure its supply portfolio to meet firm customer needs under a design day scenario (defined as the coldest day in 30 years) and under a design year scenario (defined as the average of the four coldest years in the last 30 years). Yankee Gas also maintains a flexible resource portfolio consisting of natural gas supply contracts, transportation contracts on interstate pipelines, off-system storage and its on-system 1.2 Bcf LNG storage facility to meet consumption needs during the coldest days of winter. Yankee Gas obtains its interstate capacity from the three interstate pipelines that directly serve Connecticut: the Algonquin, Tennessee and Iroquois Pipelines, which connect to other upstream pipelines that transport natural gas from major natural gas producing regions, including the Gulf Coast, Mid-continent, Canadian regions and Appalachian Shale supplies.

Based on information currently available regarding projected growth in demand and estimates of availability of future supplies of pipeline natural gas, each of NSTAR Gas and Yankee Gas believes that in order to meet the long-term firm customer requirements in a reliable manner will necessitate a combination of pipeline, storage, and non-pipeline solutions.

### **WATER DISTRIBUTION SEGMENT**

Eversource Water Ventures, Inc., a Connecticut corporation, through its wholly-owned subsidiary, Eversource Aquarion Holdings, Inc. (Aquarion), operates three separate regulated water utilities in Connecticut (Aquarion Water Company of Connecticut, or "AWC-CT"), Massachusetts (Aquarion Water Company of Massachusetts, or "AWC-MA") and New Hampshire (Aquarion Water Company of New Hampshire, or "AWC-NH"). These regulated companies provide water services to approximately 229,000 residential, commercial, industrial, municipal and fire protection and other customers, in 60 towns and cities in Connecticut, Massachusetts and New Hampshire. As of December 31, 2019, approximately 87 percent of Aquarion's customers were based in Connecticut.

#### **Rates**

Aquarion's water utilities are subject to regulation by the PURA, the DPU and the NHPUC in Connecticut, Massachusetts and New Hampshire, respectively. These regulatory agencies have jurisdiction over, among other things, rates, certain dispositions of property and plant, mergers and consolidations, issuances of long-term securities, standards of service and construction and operation of facilities.

Aquarion's general rate structure consists of various rate and service classifications covering residential, commercial, industrial, and municipal and fire protection services.

The rates established by the PURA, DPU and NHPUC are comprised of the following:

- A base rate, which is comprised of fixed charges based on meter/fire connection sizes, as well as volumetric charges based on the amount of water sold. Together these charges are designed to recover the full cost of service resulting from a general rate proceeding.
- In Connecticut, a revenue adjustment mechanism ("RAM") that reconciles earned revenues, with certain allowed adjustments, on an annual basis, to the revenue requirement approved by the PURA in AWC-CT's last rate case (2013), which is an annual amount of \$178.0 million.
- In Connecticut and New Hampshire, a water infrastructure conservation adjustment ("WICA") charge, and in Massachusetts an annual main replacement adjustment mechanism ("MRAM") charge, which is applied between rate case proceedings and seeks recovery of

allowed costs associated with eligible infrastructure improvement projects placed in-service. The WICA is updated semi-annually in Connecticut and annually in New Hampshire, with any differences refunded to, or recovered from, customers.

- In Massachusetts, treatment plant surcharges, which are a series of three surcharges (one fixed and two volumetric in nature) that are designed to recover certain operating costs and the costs of the lease of the treatment plant located in Hingham. These surcharges are applicable only to customers in Hingham, Hull and Cohasset.

### **Sources and Availability of Water Supply**

Our water utilities obtain their water supplies from owned surface water sources (reservoirs) and groundwater supplies (wells) with a total supply yield of approximately 131 million gallons per day, as well as water purchased from other water suppliers. Approximately 99 percent of our annual production is self-supplied and processed at 10 surface water treatment plants and numerous well stations, which are all located in Connecticut, Massachusetts, and New Hampshire.

The capacities of Aquarion's sources of supply, and water treatment, pumping and distribution facilities, are considered sufficient to meet the present requirements of Aquarion's customers under normal conditions. On occasion, drought declarations are issued for portions of Aquarion's service territories in response to extended periods of dry weather conditions.

### **OFFSHORE WIND PROJECTS**

Eversource's offshore wind business includes ownership interests in North East Offshore and Bay State Wind, which together hold power purchase agreements (PPAs) and contracts for the Revolution Wind, South Fork Wind and Sunrise Wind projects, as well as offshore leases through the U.S. Bureau of Ocean Energy Management (BOEM). Our offshore wind projects are being developed and constructed through a joint and equal partnership with Ørsted. This partnership also participates in opportunities for solicitations for offshore wind energy in the Northeast U.S.

On February 8, 2019, Eversource and Ørsted entered into an equal partnership to acquire key offshore wind assets in the Northeast. Eversource has a 50 percent ownership interest in North East Offshore, which holds the Revolution Wind and South Fork Wind projects, as well as a 257 square-mile lease off the coasts of Massachusetts and Rhode Island. Eversource also has a 50 percent ownership interest in Bay State Wind, which holds the Sunrise Wind project. Bay State Wind's separate 300-square-mile ocean lease is located approximately 25 miles south of the coast of Massachusetts adjacent to the North East Offshore area. In aggregate, the Bay State Wind and the North East Offshore lease sites jointly-owned by Eversource and Ørsted could eventually develop at least 4,000 MW of clean, renewable offshore wind energy.

Revolution Wind is a 704 MW offshore wind power project located approximately 15 miles south of the Rhode Island coast, and South Fork Wind is a 130 MW offshore wind power project located approximately 35 miles east of Long Island. Sunrise Wind is an 880 MW offshore wind facility, which will be developed 35 miles east of Montauk Point, Long Island. The completion dates for these projects are subject to federal permitting through BOEM, engineering, state siting and permitting in New York and Rhode Island, and finalizing a PPA amendment in New York. For more information on these projects, see "Business Development and Capital Expenditures – Offshore Wind Business" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **NATURAL GAS TRANSMISSION PROJECT**

Access Northeast was a natural gas pipeline and storage project jointly owned by Eversource, Enbridge, Inc. (Enbridge) and National Grid plc (National Grid), through Algonquin Gas Transmission, LLC (AGT). In 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. As a result, Eversource recorded an other-than-temporary impairment of \$32.9 million pre-tax within Other Income, Net on our statement of income in 2018, which represented the full carrying value of our equity method investment. On April 1, 2019, in accordance with a provision of the AGT LLC operating agreement, the Access Northeast project was terminated. For further information, see "Critical Accounting Policies - Access Northeast" in the accompanying Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

### **PROJECTED CAPITAL EXPENDITURES**

We project to make capital expenditures of \$14.19 billion from 2020 through 2024, of which we expect \$8.63 billion to be in our electric and natural gas distribution segments, \$3.98 billion to be in our electric transmission segment and \$0.69 billion to be in our water distribution segment. We also project to invest \$0.90 billion in information technology and facilities upgrades and enhancements. These projections do not include any expected investments related to our offshore wind partnership.

### **FINANCING**

Our credit facilities and indentures require that Eversource parent and certain of its subsidiaries, including CL&P, NSTAR Electric, PSNH, NSTAR Gas, Yankee Gas, and Aquarion, comply with certain financial and non-financial covenants as are customarily included in such agreements, including maintaining a ratio of consolidated debt to total capitalization of no more than 65 percent. All of these companies currently are, and expect to remain, in compliance with these covenants.

As of December 31, 2019, \$296.1 million of Eversource's long-term debt, including \$95.0 million, \$50.0 million, \$150.0 million, and \$1.1 million for NSTAR Electric, Yankee Gas, NSTAR Gas and Aquarion, respectively, will mature within the next 12 months.

## **NUCLEAR FUEL STORAGE**

CL&P, NSTAR Electric, PSNH, and several other New England electric utilities are stockholders in three inactive regional nuclear generation companies, CYAPC, MYAPC and YAEC (collectively, the Yankee Companies). The Yankee Companies have completed the physical decommissioning of their respective nuclear power facilities and are now engaged in the long-term storage of their spent nuclear fuel. The Yankee Companies fund these costs through litigation proceeds received from the DOE and, to the extent necessary, through wholesale, FERC-approved rates charged under power purchase agreements with several New England utilities, including CL&P, NSTAR Electric and PSNH. CL&P, NSTAR Electric and PSNH, in turn recover these costs from their customers through state regulatory commission-approved retail rates. The Yankee Companies collect amounts that we believe are adequate to recover the remaining plant closure and fuel storage cost estimates for the respective plants. We believe CL&P and NSTAR Electric will recover their shares of these obligations from their customers. PSNH has recovered its total share of these costs from its customers.

We consolidate the assets and obligations of CYAPC and YAEC on our consolidated balance sheet because our ownership and voting interests are more than 50 percent of each of these companies.

## **OTHER REGULATORY AND ENVIRONMENTAL MATTERS**

### **General**

We are regulated in virtually all aspects of our business by various federal and state agencies, including FERC, the SEC, and various state and/or local regulatory authorities with jurisdiction over the industry and the service areas in which each of our companies operates, including the PURA, which has jurisdiction over CL&P, Yankee Gas, and Aquarion, the NHPUC, which has jurisdiction over PSNH and Aquarion, and the DPU, which has jurisdiction over NSTAR Electric, NSTAR Gas, and Aquarion.

### **Environmental Regulation**

We are subject to various federal, state and local requirements with respect to water quality, air quality, toxic substances, hazardous waste and other environmental matters. Additionally, major generation and transmission facilities may not be constructed or significantly modified without a review of the environmental impact of the proposed construction or modification by the applicable federal or state agencies.

### **Renewable Portfolio Standards**

Each of the states in which we do business also has Renewable Portfolio Standards (RPS) requirements, which generally require fixed percentages of our energy supply to come from renewable energy sources such as solar, wind, hydropower, landfill gas, fuel cells and other similar sources.

New Hampshire's RPS provision requires increasing percentages of the electricity sold to retail customers to have direct ties to renewable sources. In 2019, the total RPS obligation was 19.7 percent and it will ultimately reach 25.2 percent in 2025. The costs of the RECs are recovered by PSNH through rates charged to customers.

Similarly, Connecticut's RPS statute requires increasing percentages of the electricity sold to retail customers to have direct ties to renewable sources. In 2019, the total RPS obligation was 27.5 percent and will ultimately reach 48 percent in 2030. CL&P is permitted to recover any costs incurred in complying with RPS from its customers through its GSC rate.

Massachusetts' RPS program also requires electricity suppliers to meet renewable energy standards. For 2019, the requirement was 24.94 percent, and will ultimately reach 38.96 percent in 2025. NSTAR Electric is permitted to recover any costs incurred in complying with RPS from its customers through rates. NSTAR Electric also owns renewable solar power facilities. The RECs generated from NSTAR Electric's solar power facilities are sold to other energy suppliers, and the proceeds from these sales are credited back to customers.

### **Hazardous Materials Regulations**

We have recorded a liability for what we believe, based upon currently available information, is our reasonably estimable environmental investigation, remediation, and/or Natural Resource Damages costs for waste disposal sites for which we have probable liability. Under federal and state law, government agencies and private parties can attempt to impose liability on us for recovery of investigation and remediation costs at hazardous waste sites. As of December 31, 2019, the liability recorded for our reasonably estimable and probable environmental remediation costs for known sites needing investigation and/or remediation, exclusive of recoveries from insurance or from third parties, was \$81.0 million, representing 57 sites. These costs could be significantly higher if additional remediation becomes necessary or when additional information as to the extent of contamination becomes available.

The most significant liabilities currently relate to future clean-up costs at former MGP facilities. These facilities were owned and operated by our predecessor companies from the mid-1800's to mid-1900's. By-products from the manufacture of natural gas using coal resulted in fuel oils, hydrocarbons, coal tar, purifier wastes, metals and other waste products that may pose a potential risk to human health and the environment. We currently have partial or full ownership responsibilities at former MGP sites that have a reserve balance of \$67.9 million of the total \$81.0 million as of December 31, 2019. MGP costs are recoverable through rates charged to our customers.

## Electric and Magnetic Fields

For more than twenty years, published reports have discussed the possibility of adverse health effects from electric and magnetic fields (EMF) associated with electric transmission and distribution facilities and appliances and wiring in buildings and homes. Although weak health risk associations reported in some epidemiology studies remain unexplained, most researchers, as well as numerous scientific review panels, considering all significant EMF epidemiology and laboratory studies, have concluded that the available body of scientific information does not support the conclusion that EMF affects human health.

In accordance with recommendations of various regulatory bodies and public health organizations, we reduce EMF associated with new transmission lines by the use of designs that can be implemented without additional cost or at a modest cost. We do not believe that other capital expenditures are appropriate to minimize unsubstantiated risks.

## Global Climate Change and Greenhouse Gas Emission Issues

Global climate change and greenhouse gas emission issues have received an increased focus from state governments and the federal government. The EPA initiated a rulemaking addressing greenhouse gas emissions and, on December 7, 2009, issued a finding that concluded that greenhouse gas emissions are "air pollution" that endangers public health and welfare and should be regulated. The EPA has mandated greenhouse gas emission reporting beginning in 2011 for emissions for certain aspects of our business including volume of gas supplied to large customers and fugitive emissions of SF<sub>6</sub> gas and methane.

We are continually evaluating the regulatory risks and regulatory uncertainty presented by climate change concerns. Such concerns could potentially lead to additional rules and regulations that impact how we operate our general utility business. These could include federal "cap and trade" laws, carbon taxes, and fuel and energy taxes. We expect that any costs of these rules and regulations would be recovered from customers.

## INFORMATION ABOUT OUR EXECUTIVE OFFICERS

For information about Eversource Energy's executive officers, see Item 10, *Directors, Executive Officers and Corporate Governance*, included in this Annual Report on Form 10-K.

## EMPLOYEES

As of December 31, 2019, Eversource Energy employed a total of 8,234 employees, excluding temporary employees, of which 1,343 were employed by CL&P, 1,604 were employed by NSTAR Electric, and 742 were employed by PSNH. Approximately 50 percent of our employees are members of the International Brotherhood of Electrical Workers, the Utility Workers Union of America or The United Steelworkers, and are covered by nine collective bargaining agreements.

## INTERNET INFORMATION

Our website address is [www.eversource.com](http://www.eversource.com). We make available through our website a link to the SEC's EDGAR website (<http://www.sec.gov/edgar/searchedgar/companysearch.html>), at which site Eversource's, CL&P's, NSTAR Electric's and PSNH's combined Annual Reports on Form 10-K, combined Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports may be reviewed. Information contained on the Company's website or that can be accessed through the website is not incorporated into and does not constitute a part of this Annual Report on Form 10-K. Printed copies of these reports may be obtained free of charge by writing to our Investor Relations Department at Eversource Energy, 107 Selden Street, Berlin, CT 06037.

## Item 1A. Risk Factors

In addition to the matters set forth under "Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995" included immediately prior to Item 1, *Business*, above, we are subject to a variety of significant risks. Our susceptibility to certain risks, including those discussed in detail below, could exacerbate other risks. These risk factors should be considered carefully in evaluating our risk profile.

**Cyberattacks, including acts of war or terrorism, targeted directly on or indirectly affecting our systems or the systems of third parties on which we rely, could severely impair operations, negatively impact our business, lead to the disclosure of confidential information and adversely affect our reputation.**

A successful cyberattack on the information technology systems that control our transmission and distribution systems or other assets could impair or prevent us from managing these systems and facilities, operating our systems effectively, or properly managing our data, networks and programs. The breach of certain information technology systems could adversely affect our ability to correctly record, process and report financial information. A major cyber incident could result in significant expenses to investigate and to repair system damage or security breaches and could lead to litigation, fines, other remedial action, heightened regulatory scrutiny and damage to our reputation.

We have instituted safeguards to protect our information technology systems and assets. We devote substantial resources to network and application security, encryption and other measures to protect our computer systems and infrastructure from unauthorized access or misuse and interface with numerous external entities to improve our cybersecurity situational awareness. The FERC, through the North American Electric Reliability Corporation (NERC), requires certain safeguards to be implemented to deter cyberattacks. These safeguards may not always be effective due to the evolving nature of cyberattacks. We maintain cyber insurance to cover damages and defense costs related to breaches of networks or operational technology, but it may be insufficient to cover all losses.

Any such cyberattacks could result in loss of service to customers and a significant decrease in revenues, which could have a material adverse impact on our financial position, results of operations and cash flows.

**Strategic development opportunities associated with offshore wind or investment opportunities in electric transmission or clean-energy opportunities may not be successful, and projects may not commence operation as scheduled or be completed, which could have a material adverse effect on our business prospects.**

We are pursuing broader strategic development investment opportunities that will benefit the Northeast region related to the construction of offshore wind electric generation facilities, and investment opportunities in electric transmission facilities and other clean-energy infrastructure. The development of these activities involves numerous significant risks around schedule, cost, capacity factors, tax strategies and permitting (both on and offshore). Various external factors could result in increased costs or result in delays or cancellation of these projects. Risks include both federal and state regulatory approval processes, new legislation impacting the industry, changes to federal income tax laws, economic events or factors, environmental and community concerns, design and siting issues, difficulties in obtaining required rights of way, competition from incumbent utilities and other entities, and actions of our strategic partners. Should any of these factors result in significant delays or cancellations, our financial position, results of operations, and cash flows could be materially adversely affected, or our future growth opportunities may not be realized as anticipated.

Eversource has a joint and equal partnership with Ørsted for the development and operation of three offshore wind projects. Offshore wind is currently an emerging industry in the U.S., but it has a very robust operational and construction history in Europe. As such, siting, permitting, tax legislation, and supply chain are currently being addressed for the first time in the U.S. The projects currently being developed by our partnership may not achieve the results we anticipate. The partnership's ability to generate revenue from offshore wind projects depends on meeting our construction schedules, controlling cost overruns, maintaining continuing interconnection arrangements, power purchase agreements, or other market mechanisms as well as interconnecting utility and Regional Transmission Organizations rules, policies, procedures and FERC tariffs that permit future offshore wind project operations. After projects are placed in operation, capacity factors will directly affect revenues generated from these investments. Other factors that may have an adverse impact on our anticipated project returns include significant schedule delays resulting from federal, state or local permitting processes. Specifically, the approval from the Bureau of Ocean Energy Management (BOEM) is a critical path item in the projects' timeline. Any changes to tax laws or to Eversource's ability to monetize tax attributes associated with these projects could also have a material adverse effect on cash flows and project returns.

As a result of legislative and regulatory changes, the states in which we provide service have implemented new selection procedures for new major electric transmission, offshore wind and other clean energy facilities. These procedures require the review of competing projects and permit the selection of only those projects that are expected to provide the greatest benefit to customers. If the projects in which we have invested are not selected for construction, or even if our projects are selected, then legislative or regulatory actions could result in our projects not being probable of entering the construction phase, which could have a material adverse effect on our future financial position, results of operations and cash flows.

**Physical attacks, including acts of war or terrorism, both threatened and actual, could adversely affect our ability to operate our systems and could adversely affect our financial results and liquidity.**

Physical attacks, including acts of war or terrorism, both threatened and actual, that damage our transmission and distribution systems or other assets could negatively impact our ability to transmit or distribute energy, water, natural gas, or operate our systems efficiently or at all. Because our electric transmission systems are part of an interconnected regional grid, we face the risk of widespread blackouts due to grid disturbances or disruptions on a neighboring interconnected system. Similarly, our natural gas distribution system is connected to transmission pipelines, not owned by Eversource, if there was an attack on the transmission pipelines, it could impact our ability to deliver natural gas. If our assets were physically damaged and were not recovered in a timely manner, it could result in a loss of service to customers, a significant decrease in revenues, significant expense to repair system damage, costs associated with governmental actions in response to such attacks, and liability claims, all of which could have a material adverse impact on our financial position, results of operations and cash flows. We maintain property and liability insurance, but it may be insufficient to cover all losses.

**The actions of regulators and legislators can significantly affect our earnings, liquidity and business activities.**

The rates that our electric, natural gas and water companies charge their customers are determined by their state regulatory commissions and by the FERC. These commissions also regulate the companies' accounting, operations, the issuance of certain securities and certain other matters. The FERC also regulates the transmission of electric energy, the sale of electric energy at wholesale, accounting, issuance of certain securities and certain other matters, including reliability standards through NERC.

Under state and federal law, our electric, natural gas and water companies are entitled to charge rates that are sufficient to allow them an opportunity to recover their prudently incurred operating and capital costs and a reasonable rate of return on invested capital, to attract needed capital and maintain their financial integrity, while also protecting relevant public interests. Each of these companies prepares and submits periodic rate filings with their respective regulatory commissions for review and approval, which allows for various entities to challenge our current or future rates, structures or mechanisms and could alter or limit the rates we are allowed to charge our customers and may not match the timing of when costs are incurred. Additionally, a catastrophic event not involving Eversource could result in our regulators and legislators imposing additional requirements that may lead to additional costs for the Company.

There is no assurance that regulators will approve the recovery of all costs incurred by our electric, natural gas and water companies, including costs for construction, operation and maintenance, as well as a reasonable return on their respective regulated assets. The amount of costs incurred by the companies, coupled with increases in fuel and energy prices, could lead to consumer or regulatory resistance to the timely recovery of such costs, thereby adversely affecting our financial position, results of operations and cash flows.

The FERC has jurisdiction over our transmission costs recovery and our allowed ROEs. Certain outside parties have filed four complaints against all electric companies under the jurisdiction of ISO-NE alleging that our allowed ROEs are unjust and unreasonable. An adverse decision in any of these four complaints could adversely affect our financial position, results of operations and cash flows.

FERC's policy has encouraged competition for transmission projects, even within existing service territories of electric companies. Implementation of FERC's goals, including within our service territories, may expose us to competition for construction of transmission projects, additional regulatory considerations, and potential delay with respect to future transmission projects, which may adversely affect our results of operations and lower rate base growth.

Changes in tax laws, as well as the potential tax effects of business decisions could negatively impact our business, results of operations (including our expected project returns from our planned offshore wind facilities), financial condition and cash flows.

**We outsource certain business functions to third-party suppliers and service providers, and substandard performance by those third parties could harm our business, reputation and results of operations.**

We outsource certain services to third parties in areas including information technology, transaction processing, human resources, payroll and payroll processing and other operational areas. Outsourcing of services to third parties could expose us to substandard quality of service delivery or substandard deliverables, which may result in missed deadlines or other timeliness issues, non-compliance (including with applicable legal requirements and industry standards) or reputational harm, which could negatively impact our results of operations. We also continue to pursue enhancements to standardize our systems and processes. If any difficulties in the operation of these systems were to occur, they could adversely affect our results of operations, or adversely affect our ability to work with regulators, unions, customers or employees.

**The effects of climate change, including severe storms, could cause significant damage to any of our facilities requiring extensive expenditures, the recovery for which is subject to approval by regulators.**

Climate change creates physical and financial risks to our operations. Physical risks from climate change may include an increase in sea levels and changes in weather conditions, such as changes in precipitation and extreme weather events including drought. Customers' energy needs vary with weather conditions, primarily temperature and humidity. For residential customers, heating and cooling represent their largest energy use. For water customers, conservation measures imposed by the communities we serve could impact water usage. To the extent weather conditions are affected by climate change, customers' energy and water usage could increase or decrease depending on the duration and magnitude of the changes.

Severe weather, such as ice and snow storms, hurricanes, droughts, and other natural disasters, may cause outages and property damage, which may require us to incur additional costs that may not be recoverable from customers. The cost of repairing damage to our operating subsidiaries' facilities and the potential disruption of their operations due to storms, natural disasters or other catastrophic events could be substantial, particularly as regulators and customers demand better and quicker response times to outages. If, upon review, any of our state regulatory authorities finds that our actions were imprudent, some of those restoration costs may not be recoverable from customers. The inability to recover a significant amount of such costs could have an adverse effect on our financial position, results of operations and cash flows. We maintain property insurance, but it may be insufficient to cover all losses.

**Our transmission and distribution systems may not operate as expected, and could require unplanned expenditures, which could adversely affect our financial position, results of operations and cash flows.**

Our ability to properly operate our transmission and distribution systems is critical to the financial performance of our business. Our transmission and distribution businesses face several operational risks, including the breakdown, failure of, or damage to operating equipment, information technology systems, or processes, especially due to age; labor disputes; disruptions in the delivery of electricity, natural gas and water; increased capital expenditure requirements, including those due to environmental regulation; catastrophic events such as fires, explosions, a solar event, an electromagnetic event, or other similar occurrences; extreme weather conditions beyond equipment and plant design capacity; human error; and potential claims for property damage or personal injuries beyond the scope of our insurance coverage. Many of our transmission projects are expected to alleviate identified reliability issues and reduce customers' costs. However, if the in-service date for one or more of these projects is delayed due to economic events or factors, or regulatory or other delays, the risk of failures in the electricity transmission system may increase. Any failure of our transmission and distribution systems to operate as planned may result in increased capital costs, reduced earnings or unplanned increases in operation and maintenance costs. The inability to recover a significant amount of such costs could have an adverse effect on our financial position, results of operations and cash flows.

**New technology and alternative energy sources could adversely affect our operations and financial results.**

Advances in technology that reduce the costs of alternative methods of producing electric energy to a level that is competitive with that of current electric production methods, could result in loss of market share and customers, and may require us to make significant expenditures to remain competitive. These changes in technology could also alter the channels through which electric customers buy or utilize energy, which could reduce our revenues or increase our expenses. Economic downturns or periods of high energy supply costs typically can lead to the development of legislative and regulatory policy designed to promote reductions in energy consumption and increased energy efficiency and self-generation by customers.

**Contamination of our water supplies, the failure of dams on reservoirs providing water to our customers, or requirements to repair, upgrade or dismantle any of these dams, may disrupt our ability to distribute water to our customers and result in substantial additional costs, which could adversely affect our financial condition, and results of operations.**

Our water supplies, including water provided to our customers, are subject to possible contamination from naturally occurring compounds or man-made substances.

Our water systems include impounding dams and reservoirs of various sizes. Although we believe our dams are structurally sound and well-maintained, significant damage to these facilities, or a significant decrease in the water in our reservoirs, could adversely affect our ability to provide water to our customers until the facilities and a sufficient amount of water in our reservoirs can be restored. A failure of a dam could result in personal injuries and downstream property damage for which we may be liable. The failure of a dam would also adversely affect our ability to supply water in sufficient quantities to our customers. Any losses or liabilities incurred due to a failure of one of our dams may not be recoverable in rates and may have a material adverse effect on our financial condition, results of operations and cash flows. We maintain liability insurance, but it may be insufficient to cover all losses.

**The unauthorized access to and the misappropriation of confidential and proprietary customer, employee, financial or system operating information could adversely affect our business operations and adversely impact our reputation.**

In the regular course of business, we, and our third-party suppliers, maintain sensitive customer, employee, financial and system operating information. We are required by various federal and state laws to safeguard this information. Cyber intrusions, security breaches, theft or loss of this information by cybercrime or otherwise could lead to the release of critical operating information or confidential customer or employee information, which could adversely affect our business operations or adversely impact our reputation, and could result in significant costs, fines and litigation. We maintain cyber insurance to cover damages and defense costs arising from unauthorized disclosure of, or failure to protect, private information, as well as costs for notification to, or for credit monitoring of, customers, employees and other persons in the event of a breach of private information. This insurance covers amounts paid to avert, prevent or stop a network attack or the disclosure of personal information, and costs of a qualified forensics firm to determine the cause, source and extent of a network attack or to investigate, examine and analyze our network to find the cause, source and extent of a data breach, but it may be insufficient to cover all losses. While we have implemented measures designed to prevent network attacks and mitigate their effects should they occur, these measures may not be effective due to the continually evolving nature of efforts to access confidential information.

**Our counterparties may not meet their obligations to us or may elect to exercise their termination rights, which could adversely affect our earnings.**

We are exposed to the risk that counterparties to various arrangements that owe us money, have contracted to supply us with energy or other commodities or services, or that work with us as strategic partners, including on significant capital projects, will not be able to perform their obligations, will terminate such arrangements or, with respect to our credit facilities, fail to honor their commitments. Should any of these counterparties fail to perform their obligations or terminate such arrangements, we might be forced to replace the underlying commitment at higher market prices and/or have to delay the completion of, or cancel, a capital project. Should any lenders under our credit facilities fail to perform, the level of borrowing capacity under those arrangements could decrease. In any such events, our financial position, results of operations, or cash flows could be adversely affected.

**Our goodwill is recorded at an amount that, if impaired and written down, could adversely affect our future operating results and total capitalization.**

We have a significant amount of goodwill on our consolidated balance sheet, which, as of December 31, 2019, totaled \$4.4 billion. The carrying value of goodwill represents the fair value of an acquired business in excess of the fair value of identifiable assets and liabilities as of the acquisition date. We test our goodwill balances for impairment on an annual basis or whenever events occur, or circumstances change that would indicate a potential for impairment. A determination that goodwill is deemed to be impaired would result in a non-cash charge that could materially adversely affect our financial position, results of operations and total capitalization. The annual goodwill impairment test in 2019 resulted in a conclusion that our goodwill was not impaired.

**We are exposed to significant reputational risks, which make us vulnerable to increased regulatory oversight or other sanctions.**

Because utility companies, including our electric, natural gas and water utility subsidiaries, have large customer bases, they are subject to adverse publicity focused on the reliability of their distribution services and the speed with which they are able to respond to electric outages, natural gas leaks and similar interruptions caused by storm damage or other unanticipated events. Adverse publicity of this nature could harm our reputation and the reputation of our subsidiaries; may make state legislatures, utility commissions and other regulatory authorities less likely to view us in a favorable light; and may cause us to be subject to less favorable legislative and regulatory outcomes or increased regulatory oversight. Unfavorable regulatory outcomes can include more stringent laws and regulations governing our operations, such as reliability and customer service quality standards or vegetation management requirements, as well as fines, penalties or other sanctions or requirements.

**Limits on our access to, and increases in, the cost of capital may adversely impact our ability to execute our business plan.**

We use short-term debt and the long-term capital markets as a significant source of liquidity and funding for capital requirements not obtained from our operating cash flow. If access to these sources of liquidity becomes constrained, our ability to implement our business strategy could be adversely affected. In addition, higher interest rates would increase our cost of borrowing, which could adversely impact our results of operations. A downgrade of our credit ratings or events beyond our control, such as a disruption in global capital and credit markets, could increase our cost of

borrowing and cost of capital or restrict our ability to access the capital markets and negatively affect our ability to maintain and to expand our businesses.

**Costs of compliance with environmental laws and regulations, including those related to climate change, may increase and have an adverse effect on our business and results of operations.**

Our subsidiaries' operations are subject to extensive federal, state and local environmental statutes, rules and regulations that govern, among other things, water quality, water discharges, the management of hazardous and solid waste, and air emissions. Compliance with these requirements requires us to incur significant costs relating to environmental monitoring, maintenance and upgrading of facilities, remediation and permitting. The costs of compliance with existing legal requirements or legal requirements not yet adopted may increase in the future. An increase in such costs, unless promptly recovered, could have an adverse impact on our business and our financial position, results of operations and cash flows.

For further information, see Item 1, *Business - Other Regulatory and Environmental Matters*, included in this Annual Report on Form 10-K.

**The loss of key personnel, the inability to hire and retain qualified employees, or the failure to maintain a positive relationship with our workforce could have an adverse effect on our business, financial position and results of operations.**

Our operations depend on the continued efforts of our employees. Retaining key employees and maintaining the ability to attract new employees are important to both our operational and financial performance. We cannot guarantee that any member of our management or any key employee at the Eversource parent or subsidiary level will continue to serve in any capacity for any particular period of time. In addition, a significant portion of our workforce in our subsidiaries, including many workers with specialized skills maintaining and servicing the electric, natural gas and water infrastructure, will be eligible to retire over the next five to ten years. Such highly skilled individuals cannot be quickly replaced due to the technically complex work they perform. We have developed strategic workforce plans to identify key functions and proactively implement plans to assure a ready and qualified workforce, but we cannot predict the impact of these plans on our ability to hire and retain key employees. Labor disputes, work stoppages or an inability to negotiate future collective bargaining agreements on commercially reasonable terms, as well as the intentional misconduct of employees or contractors, may also have an adverse effect on our business, financial position and results of operations.

**Market performance or changes in assumptions may require us to make significant contributions to our pension and other postretirement benefit plans.**

We provide a defined benefit pension plan and other postretirement benefits for a substantial number of employees, former employees and retirees. Our future pension obligations, costs and liabilities are highly dependent on a variety of factors, many of which are beyond our control. These factors include estimated investment returns, interest rates, discount rates, health care cost trends, benefit changes, salary increases and the demographics of plan participants. If our assumptions prove to be inaccurate, our future costs could increase significantly. In addition, various factors, including underperformance of plan investments and changes in law or regulation, could increase the amount of contributions required to fund our pension plan in the future. Additional large funding requirements, when combined with the financing requirements of our construction program, could impact the timing, amounts, and number of future financings and negatively affect our financial position, results of operations and cash flows.

**As a holding company with no revenue-generating operations, Eversource parent's liquidity is dependent on dividends from its subsidiaries, its commercial paper program, and its ability to access the long-term debt and equity capital markets.**

Eversource parent is a holding company and as such, has no revenue-generating operations of its own. Its ability to meet its debt service obligations and to pay dividends on its common shares is largely dependent on the ability of its subsidiaries to pay dividends to, or repay borrowings from, Eversource parent, and/or Eversource parent's ability to access its commercial paper program or the long-term debt and equity capital markets. Prior to funding Eversource parent, the subsidiary companies have financial obligations that must be satisfied, including among others, their operating expenses, debt service, preferred dividends of certain subsidiaries, and obligations to trade creditors. Should the subsidiary companies not be able to pay dividends or repay funds due to Eversource parent, or if Eversource parent cannot access its commercial paper programs or the long-term debt and equity capital markets, Eversource parent's ability to pay interest, dividends and its own debt obligations would be restricted.

**Item 1B. Unresolved Staff Comments**

We do not have any unresolved SEC staff comments.

## Item 2. Properties

### Transmission and Distribution System

As of December 31, 2019, Eversource and our electric operating subsidiaries owned the following:

Eversource	Electric Distribution		Electric Transmission	
Number of substations owned		486		77
Transformer capacity (in kVa)		42,891,000		16,149,000
Overhead lines (in circuit miles)		40,568		3,963
Capacity range of overhead transmission lines (in kV)		N/A		69 to 345
Underground lines (in circuit miles)		17,764		406
Capacity range of underground transmission lines (in kV)		N/A		69 to 345

	CL&P		NSTAR Electric		PSNH	
	Distribution	Transmission	Distribution	Transmission	Distribution	Transmission
Number of substations owned	181	20	169	35	136	22
Transformer capacity (in kVa)	21,618,000	3,633,000	16,937,000	7,465,000	4,336,000	5,051,000
Overhead lines (in circuit miles)	16,942	1,675	11,427	1,247	12,199	1,041
Capacity range of overhead transmission lines (in kV)	N/A	69 to 345	N/A	69 to 345	N/A	115 to 345
Underground lines (in circuit miles)	6,722	137	9,076	268	1,966	1
Capacity range of underground transmission lines (in kV)	N/A	69 to 345	N/A	115 to 345	N/A	115

	Eversource	CL&P	NSTAR Electric	PSNH
Underground and overhead line transformers in service	628,219	291,415	171,362	165,442
Aggregate capacity (in kVa)	37,019,694	16,092,291	14,338,752	6,588,651

### Electric Generating Plants

On January 10, 2018, Eversource and PSNH completed the sale of PSNH's thermal generation assets, including steam, internal combustion and biomass units. The sale of hydroelectric generation assets was completed on August 26, 2018. See Note 14, "Generation Asset Sale," in the accompanying Item 8, *Financial Statements and Supplementary Data* for further information.

As of December 31, 2019, NSTAR Electric owned the following solar power facilities:

Type of Plant	Number of Sites	Year Installed	Claimed Capability** (kilowatts)
Solar Fixed Tilt, Photovoltaic	22	2010 - 2019	70,000

\*\* Claimed capability represents the direct current nameplate capacity of the plants.

CL&P does not own any electric generating plants.

### Natural Gas Distribution System

As of December 31, 2019, Yankee Gas owned 28 active gate stations, 206 district regulator stations, and approximately 3,445 miles of natural gas main pipeline. Yankee Gas also owns a liquefaction and vaporization plant and above ground storage tank with a storage capacity equivalent of 1.2 Bcf of natural gas in Waterbury, Connecticut.

As of December 31, 2019, NSTAR Gas owned 21 active gate stations, 164 district regulator stations, and approximately 3,302 miles of natural gas main pipeline. Hopkinton, another subsidiary of Eversource, owns a satellite vaporization plant and above ground storage tanks in Acushnet, Massachusetts (0.5 Bcf of natural gas). In addition, Hopkinton owns a liquefaction and vaporization plant with above ground storage tanks in Hopkinton, Massachusetts (3.0 Bcf of natural gas). Combined, the two plants' tanks have an aggregate storage capacity equivalent to 3.5 Bcf of natural gas that is provided to NSTAR Gas under contract.

### Water Distribution System

Aquarion's properties consist of water transmission and distribution mains and associated valves, hydrants and service lines, water treatment plants, pumping facilities, wells, tanks, meters, dams, reservoirs, buildings, and other facilities and equipment used for the operation of our systems, including the collection, treatment, storage, and distribution of water.

As of December 31, 2019, Aquarion owned and operated sources of water supply with a combined yield of approximately 131 million gallons per day; 3,639 miles of transmission and distribution mains; 10 surface water treatment plants; 31 dams; and 112 wellfields.

## Franchises

**CL&P** Subject to the power of alteration, amendment or repeal by the General Assembly of Connecticut and subject to certain approvals, permits and consents of public authority and others prescribed by statute, CL&P has, subject to certain exceptions not deemed material, valid franchises free from burdensome restrictions to provide electric transmission and distribution services in the respective areas in which it is now supplying such service.

In addition to the right to provide electric transmission and distribution services as set forth above, the franchises of CL&P include, among others, limited rights and powers, as set forth under Connecticut law and the special acts of the General Assembly constituting its charter, to manufacture, generate, purchase and/or sell electricity at retail, including to provide Standard Service, Supplier of Last Resort service and backup service, to sell electricity at wholesale and to erect and maintain certain facilities on public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. The franchises of CL&P include the power of eminent domain. Connecticut law prohibits an electric distribution company from owning or operating generation assets. However, under "An Act Concerning Electricity and Energy Efficiency," enacted in 2007, an electric distribution company, such as CL&P, is permitted to purchase an existing electric generating plant located in Connecticut that is offered for sale, subject to prior approval from the PURA and a determination by the PURA that such purchase is in the public interest.

**NSTAR Electric** Through its charter, which is unlimited in time, NSTAR Electric has the right to engage in the business of delivering and selling electricity within its respective service territory, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon electric companies under Massachusetts laws. The locations in public ways for electric transmission and distribution lines are obtained from municipal and other state authorities who, in granting these locations, act as agents for the state. In some cases, the actions of these authorities are subject to appeal to the DPU. The rights to these locations are not limited in time and are subject to the action of these authorities and the legislature. Under Massachusetts law, no other entity may provide electric delivery service to retail customers within NSTAR Electric service territory without the written consent of NSTAR Electric. This consent must be filed with the DPU and the municipality so affected. The franchises of NSTAR Electric include the power of eminent domain, obtained through application to the DPU.

The Massachusetts restructuring legislation defines service territories as those territories actually served on July 1, 1997 and following municipal boundaries to the extent possible. The restructuring legislation further provides that until terminated by law or otherwise, distribution companies shall have the exclusive obligation to serve all retail customers within their service territories and no other person shall provide distribution service within such service territories without the written consent of such distribution companies.

**PSNH** The NHPUC, pursuant to statutory requirements, has issued orders granting PSNH exclusive franchises to distribute electricity in the respective areas in which it is now supplying such service.

In addition to the right to distribute electricity as set forth above, the franchises of PSNH include, among others, rights and powers to manufacture, generate, purchase, and transmit electricity, to sell electricity at wholesale to other utility companies and municipalities and to erect and maintain certain facilities on certain public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. PSNH's status as a public utility gives it the ability to petition the NHPUC for the right to exercise eminent domain for distribution services and for transmission eligible for regional cost allocation.

PSNH is also subject to certain regulatory oversight by the Maine Public Utilities Commission and the Vermont Public Utility Commission.

**NSTAR Gas** Through its charter, which is unlimited in time, NSTAR Gas has the right to engage in the business of delivering and selling natural gas within its respective service territory, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon natural gas companies under Massachusetts laws. The locations in public ways for natural gas distribution pipelines are obtained from municipal and other state authorities who, in granting these locations, act as agents for the state. In some cases, the actions of these authorities are subject to appeal to the DPU. The rights to these locations are not limited in time and are subject to the action of these authorities and the legislature. Under Massachusetts law, no other entity may provide natural gas delivery service to retail customers within the NSTAR Gas service territory without the written consent of NSTAR Gas. This consent must be filed with the DPU and the municipality so affected.

**Yankee Gas** Yankee Gas holds valid franchises to sell natural gas in the areas in which Yankee Gas supplies natural gas service, which it acquired either directly or from its predecessors in interest. Generally, Yankee Gas holds franchises to serve customers in areas designated by those franchises as well as in most other areas throughout Connecticut so long as those areas are not occupied and served by another natural gas utility under a valid franchise of its own or are not subject to an exclusive franchise of another natural gas utility or by consent. Yankee Gas' franchises are perpetual but remain subject to the power of alteration, amendment or repeal by the General Assembly of the State of Connecticut, the power of revocation by the PURA and certain approvals, permits and consents of public authorities and others prescribed by statute. Generally, Yankee Gas' franchises include, among other rights and powers, the right and power to manufacture, generate, purchase, transmit and distribute natural gas and to erect and maintain certain facilities on public highways and grounds, and the right of eminent domain, all subject to such consents and approvals of public authorities and others as may be required by law.

**Aquarion Water Company of Connecticut** AWC-CT derives its rights and franchises to operate from special acts of the Connecticut General Assembly and subject to certain approvals, permits and consents of public authority and others prescribed by statute and by its charter, AWC-CT has, with minor exceptions, solid franchises free from burdensome restrictions and unlimited as to time, and is authorized to sell potable water in the towns (or parts thereof) in which water is now being supplied by AWC-CT.

In addition to the right to sell water as set forth above, the franchises of AWC-CT include rights and powers to erect and maintain certain facilities on public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law. Under the Connecticut General Statutes, AWC-CT may, upon payment of compensation, take and use such lands, springs, streams or ponds, or such rights or

interests therein as the Connecticut Superior Court, upon application, may determine is necessary to enable AWC-CT to supply potable water for public or domestic use in its franchise areas.

**Aquarion Water Company of Massachusetts** Through its charters, which are unlimited in time, AWC-MA has the right to engage in the business of distributing and selling water within its service territories, and has the power incidental thereto and is entitled to all the rights and privileges of and subject to the duties imposed upon water companies under Massachusetts laws. AWC-MA has the right to construct and maintain its mains and distribution pipes in and under any public ways and to take and hold water within its respective service territories. Subject to DPU regulation, AWC-MA has the right to establish and fix rates for use of the water distributed and to establish reasonable regulations regarding the same. Certain of the towns within our service area have the right, at any time, to purchase the corporate property and all rights and privileges of AWC-MA according to pricing formulas and procedures specifically described in AWC-MA's respective charters and in compliance with Massachusetts law.

**Aquarion Water Company of New Hampshire** The NHPUC, pursuant to statutory law, has issued orders granting and affirming AWC-NH's exclusive franchise to own, operate, and manage plant and equipment and any part of the same, for the conveyance of water for the public located within its franchise territory. That franchise territory encompasses the towns of Hampton, North Hampton and Rye. Subject to NHPUC's regulations, AWC-NH has the right to establish and fix rates for use of the water distributed and to establish reasonable regulations regarding the same.

In addition to the right to provide water supply, the franchise also allows AWC-NH to sell water at wholesale to other water utilities and municipalities and to construct plant and equipment and maintain such plant and equipment on certain public highways and grounds, all subject to such consents and approvals of public authority and others as may be required by law.

AWC-NH's status as a regulated public utility gives it the ability to petition the NHPUC for the right to exercise eminent domain for the establishment of plant and equipment. It can also petition the NHPUC for exemption from the operation of any local ordinance when certain utility structures are reasonably necessary for the convenience or welfare of the public and the local conditions, and, if the purpose of the structure relates to water supply withdrawal, the exemption is recommended by the New Hampshire Department of Environmental Services.

### **Item 3. Legal Proceedings**

#### **1. Yankee Companies v. U.S. Department of Energy**

The Yankee Companies have filed complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to accept delivery of, and provide for a permanent facility to store, spent nuclear fuel pursuant to the terms of the 1983 spent fuel and high-level waste disposal contracts between the Yankee Companies and the DOE. The court previously awarded the Yankee Companies damages for Phases I, II and III of litigation resulting from the DOE's failure to meet its contractual obligations. These Phases covered damages incurred in the years 1998 through 2012, and the awarded damages have been received by the Yankee Companies with certain amounts of the damages refunded to their customers.

*DOE Phase IV Damages* - On May 22, 2017, each of the Yankee Companies filed a fourth set of lawsuits against the DOE in the Court of Federal Claims. The Yankee Companies sought monetary damages totaling \$104.4 million for CYAPC, YAEC and MYAPC, resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal covering the years from 2013 to 2016 ("DOE Phase IV"). On February 21, 2019, the Yankee Companies received a partial summary judgment and partial final judgment in their favor for the undisputed amount of monetary damages of \$103.2 million. The court awarded CYAPC, YAEC, and MYAPC damages of \$40.7 million, \$28.1 million and \$34.4 million, respectively. The DOE did not appeal the court's judgment and the decision became final on April 23, 2019. On June 12, 2019, each of the Yankee Companies received the damages proceeds. On June 12, 2019, the court accepted an offer of judgment in the amount of \$0.5 million to settle the disputed amount of approximately \$1 million in Phase IV contested damages. The Yankee Companies received the \$0.5 million payment in July 2019. CYAPC's and YAEC's proceeds received were classified as operating activities on the Eversource consolidated statement of cash flows.

In September 2019, the Yankee Companies made a required informational filing with FERC as to the use of proceeds, for which approval was received in the fourth quarter of 2019. In December 2019, YAEC and MYAPC returned proceeds of \$5.4 million and \$21.0 million, respectively, to its member companies, of which the Eversource utilities (CL&P, NSTAR Electric and PSNH) received a total of \$2.8 million from YAEC and \$5.0 million from MYAPC. The Eversource utilities will ultimately refund these proceeds to utility customers. Also, in December 2019, CYAPC paid \$29.0 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation.

#### **2. Other Legal Proceedings**

For further discussion of legal proceedings, see Item 1, *Business*: "- Electric Distribution Segment," "- Electric Transmission Segment," and "- Natural Gas Distribution Segment" for information about various state and federal regulatory and rate proceedings, civil lawsuits related thereto, and information about proceedings relating to power, transmission and pricing issues; "- Nuclear Fuel Storage" for information related to nuclear waste; and "- Other Regulatory and Environmental Matters" for information about toxic substances and hazardous waste, electric and magnetic fields, and other matters. In addition, see Item 1A, *Risk Factors*, for general information about several significant risks.

### **Item 4. Mine Safety Disclosures**

Not applicable.

**PART II**

**Item 5. Market for the Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

(a) Market Information

Our common shares are listed on the New York Stock Exchange. The ticker symbol is "ES." There is no established public trading market for the common stock of CL&P, NSTAR Electric and PSNH. All of the common stock of CL&P, NSTAR Electric and PSNH is held solely by Eversource.

(b) Holders

As of January 31, 2020, there were 33,508 registered common shareholders of our company on record. As of the same date, there were a total of 329,952,663 shares outstanding.

(c) Dividends

Information with respect to dividends and dividend restrictions for Eversource, CL&P, NSTAR Electric and PSNH is contained in Item 8, *Financial Statements and Supplementary Data*, in the *Combined Notes to Financial Statements*, within this Annual Report on Form 10-K.

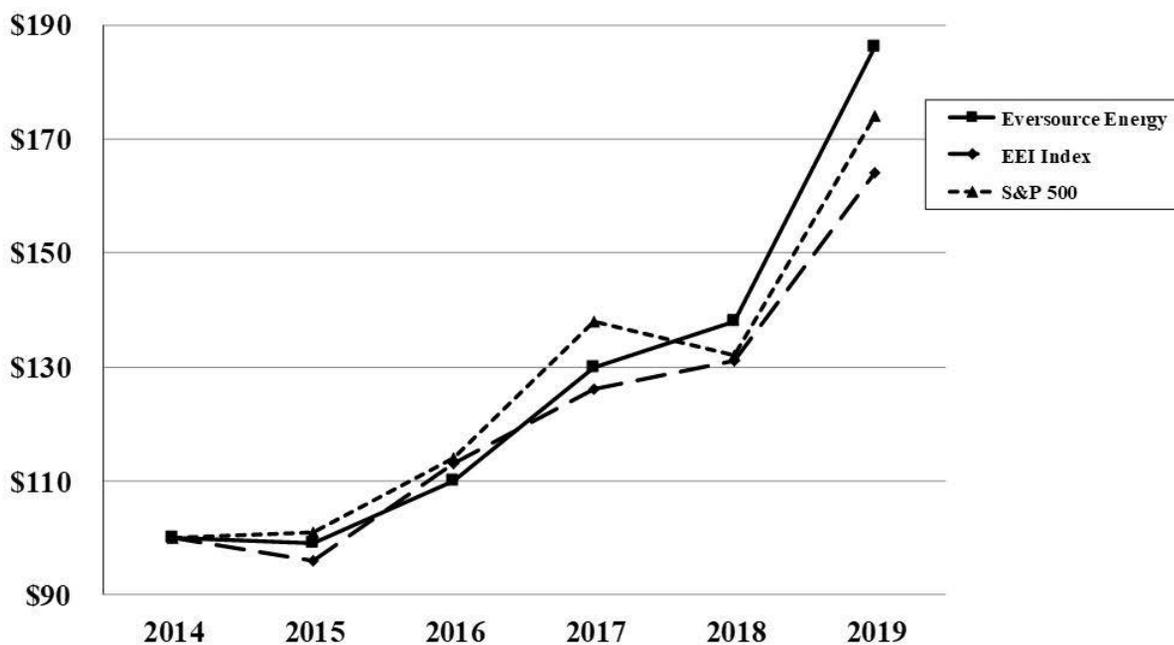

(d) Securities Authorized for Issuance Under Equity Compensation Plans

For information regarding securities authorized for issuance under equity compensation plans, see Item 12, *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*, included in this Annual Report on Form 10-K.

(e) Performance Graph

The performance graph below illustrates a five-year comparison of cumulative total returns based on an initial investment of \$100 in 2014 in Eversource Energy common stock, as compared with the S&P 500 Stock Index and the EEI Index for the period 2014 through 2019, assuming all dividends are reinvested.

**Total Shareholder Return**

	December 31,					
	2014	2015	2016	2017	2018	2019
Eversource Energy	\$100	\$99	\$110	\$130	\$138	\$186
EEI Index	\$100	\$96	\$113	\$126	\$131	\$164
S&P 500	\$100	\$101	\$114	\$138	\$132	\$174

## Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table discloses purchases of our common shares made by us or on our behalf for the periods shown below. The common shares purchased consist of open market purchases made by the Company or an independent agent. These share transactions related to matching contributions under the Eversource 401k Plan.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans and Programs (at month end)
October 1 - October 31, 2019	—	\$ —	—	—
November 1 - November 30, 2019	20	82.94	—	—
December 1 - December 31, 2019	2,169	84.78	—	—
Total	2,189	\$ 84.76	—	—

## Recent Sales of Unregistered Securities

In January 2020, we determined that during 2019 and early 2020, the Savings Plan for Employees of Aquarion Water Company, a 401(k) retirement plan (Plan), offered Eversource common shares (Shares) as an investment alternative for participants. The Plan trustee purchased Shares in the open market and allocated the Shares to participants' Plan accounts at the election of participants. During this period, the Plan sold 5,990 Shares to 35 participants, which Shares were not registered on Form S-8. The investment alternative to purchase Shares under the Plan has been terminated, and we did not receive any proceeds from such sales, which were funded with participants' contributions to the Plan.

## Item 6. Selected Consolidated Financial Data

### Eversource Selected Consolidated Financial Data (Unaudited)

See the *Combined Notes to Financial Statements* in this Annual Report on Form 10-K for a description of the sale of PSNH's thermal and hydroelectric generation assets in 2018 and the December 31, 2017 classification of these generation assets as held for sale, the acquisition of Aquarion on December 4, 2017, and any accounting changes materially affecting the comparability of the information reflected in the tables above. As a result of the adoption of new accounting guidance on January 1, 2019, we recognized lease assets and liabilities for operating leases on the balance sheet. Prior period amounts were not adjusted and continue to be reported in accordance with our historic accounting policies.

**CL&P Selected Financial Data (Unaudited) have been omitted from this report but are set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).**

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

### EVERSOURCE ENERGY AND SUBSIDIARIES

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related combined notes included in this combined Annual Report on Form 10-K. References in this combined Annual Report on Form 10-K to "Eversource," the "Company," "we," "us," and "our" refer to Eversource Energy and its consolidated subsidiaries. All per-share amounts are reported on a diluted basis. The consolidated financial statements of Eversource, NSTAR Electric and PSNH and the financial statements of CL&P are herein collectively referred to as the "financial statements." Our discussion of fiscal year 2019 compared to fiscal year 2018 is included herein. Unless expressly stated otherwise, for discussion and analysis of fiscal year 2017 items and fiscal year 2018 compared to fiscal year 2017, please refer to Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*, in our combined 2018 Annual Report on Form 10-K, which is incorporated herein by reference.

Refer to the Glossary of Terms included in this combined Annual Report on Form 10-K for abbreviations and acronyms used throughout this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

The only common equity securities that are publicly traded are common shares of Eversource. The earnings and EPS of each business discussed below do not represent a direct legal interest in the assets and liabilities of such business but rather represent a direct interest in our assets and liabilities as a whole. EPS by business is a financial measure not recognized under GAAP, calculated by dividing the Net Income Attributable to Common Shareholders of each business by the weighted average diluted Eversource common shares outstanding for the period. Our earnings discussion also includes a non-GAAP financial measure referencing our 2019 earnings and EPS excluding the impairment charge for the NPT project.

We use these non-GAAP financial measures to evaluate and provide details of earnings results by business and to more fully compare and explain our 2019 results without including the impact of the NPT impairment charge. We believe the NPT impairment charge is not indicative of our ongoing performance. Due to the nature and significance of the impairment charge on Net Income Attributable to Common Shareholders, we believe that the non-GAAP presentation is a more meaningful representation of our financial performance and provides additional and useful information to readers of this report in analyzing historical and future performance of our business. These non-GAAP financial measures should not be considered as an alternative to reported Net Income Attributable to Common Shareholders or EPS determined in accordance with GAAP as an indicator of operating performance.

The results of Aquarion and its subsidiaries, hereinafter referred to as "Aquarion," are included from the date of the acquisition, December 4, 2017, through December 31, 2019 throughout this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

#### Financial Condition and Business Analysis

##### Executive Summary

The following items in this executive summary are explained in more detail in this combined Annual Report on Form 10-K:

##### *Earnings Overview and Future Outlook:*

- We earned \$909.1 million, or \$2.81 per share, in 2019, compared with \$1.03 billion, or \$3.25 per share, in 2018. Results for 2019 include an after-tax impairment charge of \$204.4 million, or \$0.64 per share, related to our investment in the NPT project. Excluding that impairment charge, we earned \$1.11 billion, or \$3.45 per share, in 2019.
- Our electric distribution segment earned \$513.3 million, or \$1.59 per share, in 2019, compared with \$455.4 million, or \$1.44 per share, in 2018. Our electric transmission segment earned \$256.5 million, or \$0.79 per share, in 2019, compared with \$427.2 million, or \$1.34 per share, in 2018. Excluding the after-tax NPT impairment charge of \$204.4 million, or \$0.64 per share, our electric transmission segment earned \$460.9 million, or \$1.43 per share, in 2019. Our natural gas distribution segment earned \$96.2 million, or \$0.30 per share, in 2019, compared with \$93.2 million, or \$0.29 per share, in 2018. Our water distribution segment earned \$34.9 million, or \$0.11 per share, in 2019, compared with \$30.9 million, or \$0.10 per share in 2018.
- Eversource parent and other companies earned \$8.2 million, or \$0.02 per share, in 2019, compared with \$26.3 million, or \$0.08 per share, in 2018.
- We currently project 2020 earnings of between \$3.60 per share and \$3.70 per share.

##### *Liquidity:*

- Cash flows provided by operating activities totaled \$2.01 billion in 2019, compared with \$1.83 billion in 2018. Investments in property, plant and equipment totaled \$2.91 billion in 2019 and \$2.57 billion in 2018. Cash totaled \$15.4 million as of December 31, 2019, compared with \$108.1 million as of December 31, 2018.
- In 2019, we issued 11,980,000 common shares, which resulted in proceeds of \$852.3 million, net of issuance costs.

- In 2019, we issued \$1.52 billion of new long-term debt, consisting of \$500 million by CL&P, \$400 million by NSTAR Electric, \$300 million by PSNH, \$200 million by Yankee Gas, \$75 million by NSTAR Gas and \$45 million by Aquarion. Proceeds from these new issuances were used primarily to repay short-term borrowings, repay long-term debt at maturity and fund capital expenditures and working capital. In 2019, we repaid, at maturity, \$801.1 million of previously issued long-term debt, consisting of \$350 million by Eversource parent, \$250 million by CL&P, \$150 million by PSNH, \$50 million by Yankee Gas and \$1.1 million by Aquarion.
- In 2019, we paid cash dividends of \$663.2 million and issued non-cash dividends of \$22.8 million in the form of treasury shares, totaling dividends of \$2.14 per common share, compared with cash dividends of \$640.1 million, or \$2.02 per common share, in 2018. On February 5, 2020, our Board of Trustees approved a common share dividend payment of \$0.5675 per share, payable on March 31, 2020 to shareholders of record as of March 4, 2020. The 2020 dividend represents an increase of 6.1 percent over the dividend paid in December 2019.
- We project to make capital expenditures of \$14.19 billion from 2020 through 2024, of which we expect \$8.63 billion to be in our electric and natural gas distribution segments, \$3.98 billion to be in our electric transmission segment and \$0.69 billion to be in our water distribution segment. We also project to invest \$0.90 billion in information technology and facilities upgrades and enhancements. These projections do not include any expected investments related to offshore wind projects.

#### Strategic:

- On February 26, 2020, Eversource and NiSource entered into an asset purchase agreement where Eversource would acquire the assets that comprise NiSource's local gas distribution business in Massachusetts for a purchase price of \$1.1 billion. The liabilities to be assumed by Eversource specifically exclude any liabilities (past or future) arising out of or related to the fires and explosions that occurred on September 13, 2018 in Lawrence, Andover and North Andover, Massachusetts. The acquisition and resulting rate plan both require DPU and other approvals. Eversource and NiSource expect to close this transaction later this year.

#### Earnings Overview

*Consolidated:* Below is a summary of our earnings by business, which also reconciles the non-GAAP financial measures of consolidated non-GAAP earnings and EPS, as well as EPS by business, to the most directly comparable GAAP measures of consolidated Net Income Attributable to Common Shareholders and diluted EPS.

	For the Years Ended December 31,					
	2019		2018		2017	
	Amount	Per Share	Amount	Per Share	Amount	Per Share
<i>(Millions of Dollars, Except Per Share Amounts)</i>						
Net Income Attributable to Common Shareholders (GAAP)	\$ 909.1	\$ 2.81	\$ 1,033.0	\$ 3.25	\$ 988.0	\$ 3.11
Regulated Companies	\$ 1,105.3	\$ 3.43	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03
Eversource Parent and Other Companies	8.2	0.02	26.3	0.08	25.3	0.08
Non-GAAP Earnings	\$ 1,113.5	\$ 3.45	\$ 1,033.0	\$ 3.25	\$ 988.0	\$ 3.11
Impairment of Northern Pass Transmission (after-tax)	(204.4)	(0.64)	—	—	—	—
Net Income Attributable to Common Shareholders (GAAP)	\$ 909.1	\$ 2.81	\$ 1,033.0	\$ 3.25	\$ 988.0	\$ 3.11

*Regulated Companies:* Our regulated companies comprise the electric distribution, electric transmission, natural gas distribution and water distribution segments. A summary of our segment earnings and EPS is as follows:

	For the Years Ended December 31,					
	2019		2018		2017	
	Amount	Per Share	Amount	Per Share	Amount	Per Share
<i>(Millions of Dollars, Except Per Share Amounts)</i>						
Net Income - Regulated Companies (GAAP)	\$ 900.9	\$ 2.79	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03
Electric Distribution	\$ 513.3	\$ 1.59	\$ 455.4	\$ 1.44	\$ 497.4	\$ 1.57
Electric Transmission, excluding Northern Pass Transmission impairment (Non-GAAP)	460.9	1.43	427.2	1.34	391.9	1.23
Natural Gas Distribution	96.2	0.30	93.2	0.29	74.6	0.23
Water Distribution	34.9	0.11	30.9	0.10	(1.2)	—
Net Income - Regulated Companies (Non-GAAP)	\$ 1,105.3	\$ 3.43	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03
Impairment of Northern Pass Transmission (after-tax)	(204.4)	(0.64)	—	—	—	—
Net Income - Regulated Companies (GAAP)	\$ 900.9	\$ 2.79	\$ 1,006.7	\$ 3.17	\$ 962.7	\$ 3.03

Our electric distribution segment earnings increased \$57.9 million in 2019, as compared to 2018, due primarily to the CL&P, NSTAR Electric and PSNH base distribution rate increases, higher earnings from CL&P's capital tracker mechanism, effective July 1, 2018, due to increased electric system improvements, and higher earnings from NSTAR Electric's solar generation capital tracker mechanism. The earnings increase was partially offset by higher depreciation expense, lower non-service income from our benefit plans, higher operations and maintenance expense, the absence in 2019 of generation earnings at PSNH due to the sale of its generation assets in 2018, and the absence in 2019 of a gain on the sale of property at PSNH in 2018.

Our electric transmission segment earnings decreased \$170.7 million in 2019, as compared to 2018, due primarily to the impairment of NPT, which resulted in an after-tax charge of \$204.4 million, or \$0.64 per share in 2019. Excluding the NPT impairment charge, earnings increased \$33.7 million in 2019, as compared to 2018, due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure and the absence in 2019 of approximately \$6 million (after-tax) in tax-related regulatory assets that we concluded were not recoverable from customers in 2018. The earnings increase was partially offset by a lower benefit from the annual billing and cost reconciliation filing with FERC and the absence of the NPT AFUDC equity income.

Our natural gas distribution segment earnings increased \$3.0 million in 2019, as compared to 2018, due primarily to the impact of the Yankee Gas base distribution rate increase effective November 15, 2018 and higher earnings from capital tracker mechanisms due to continued investments in natural gas infrastructure. The earnings increase was partially offset by higher operations and maintenance expense, higher depreciation expense, higher property and other tax expense, and higher interest expense.

Our water distribution segment earnings increased \$4.0 million in 2019, as compared to 2018, due primarily to a lower effective tax rate driven by the elimination of a tax-related regulatory liability.

*Eversource Parent and Other Companies:* Eversource parent and other companies earnings decreased \$18.1 million in 2019, as compared to 2018, due primarily to a higher effective tax rate due in part to higher income tax reserves in 2019 and the absence in 2019 of income tax benefits recognized in 2018, higher interest expense, and the absence in 2019 of a 2018 benefit related to the allowed recovery of certain previously expensed merger-related costs in distribution rates. The earnings decrease was partially offset by the absence of the 2018 impairment of our investment in the Access Northeast project, and a higher return at Eversource Service as a result of increased investments in property, plant and equipment.

### Liquidity

Cash totaled \$15.4 million as of December 31, 2019, compared with \$108.1 million as of December 31, 2018.

*Short-Term Debt - Commercial Paper Programs and Credit Agreements:* Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas, Yankee Gas and Aquarion Water Company of Connecticut are also parties to a five-year \$1.45 billion revolving credit facility. Effective December 9, 2019, the revolving credit facility's termination date was extended for one additional year to December 6, 2024. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility. Effective December 9, 2019, the revolving credit facility's termination date was extended for one additional year to December 6, 2024. The revolving credit facility serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

<i>(Millions of Dollars)</i>	<b>Borrowings Outstanding as of December 31,</b>		<b>Available Borrowing Capacity as of December 31,</b>		<b>Weighted-Average Interest Rate as of December 31,</b>	
	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>
Eversource Parent Commercial Paper Program	\$ 1,224.9	\$ 631.5	\$ 225.1	\$ 818.5	1.98%	2.77%
NSTAR Electric Commercial Paper Program	10.5	278.5	639.5	371.5	1.63%	2.50%

There were no borrowings outstanding on either the Eversource parent or NSTAR Electric revolving credit facilities as of December 31, 2019 or 2018.

Amounts outstanding under the commercial paper programs and revolving credit facilities are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets, as all borrowings are outstanding for no more than 364 days at one time. As a result of the Eversource parent long-term debt issuance on January 10, 2020, the net proceeds of which were used to repay short-term borrowings outstanding under its commercial paper program, \$346.3 million of commercial paper borrowings under the Eversource parent commercial paper program were classified as Long-Term Debt as of December 31, 2019.

*Intercompany Borrowings:* Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2019, there were intercompany loans from Eversource parent to CL&P of \$63.8 million, to PSNH of \$27.0 million, and to a subsidiary of NSTAR Electric of \$30.3 million. As of December 31, 2018, there were intercompany loans from Eversource parent to PSNH of \$57.0 million. Intercompany loans from Eversource parent are included in Notes Payable to Eversource Parent and classified in current liabilities on the respective subsidiary's balance sheets.

*Long-Term Debt:* The following table summarizes long-term debt issuances and repayments:

<i>(Millions of Dollars)</i>	<b>Issue Date</b>	<b>Issuance/ (Repayment)</b>	<b>Maturity Date</b>	<b>Use of Proceeds for Issuance/ Repayment Information</b>
<b>CL&amp;P:</b>

<sup>(1)</sup> These bonds are part of the same series issued by CL&P in March 2018. The aggregate outstanding principal amount of these bonds is now \$800 million.

<sup>(2)</sup> These bonds are part of the same series issued by CL&P in March 2017. The aggregate outstanding principal amount of these bonds is now \$500 million.

*Long-Term Debt Issuance Authorizations:* On February 27, 2019, the DPU approved NSTAR Electric's request for authorization to issue up to \$800 million in long-term debt through December 31, 2020. On April 26, 2019, the NHPUC approved PSNH's request for authorization to issue up to \$300 million in long-term debt through December 31, 2019. On August 14, 2019, PURA approved CL&P's request for authorization to issue up to \$675 million in long-term debt through December 31, 2022. On December 11, 2019, PURA approved Aquarion Water Company of Connecticut's request for authorization to issue up to \$45 million of long-term debt. On January 27, 2020, the DPU approved NSTAR Gas' request for authorization to issue up to \$270 million in long-term debt through December 31, 2021.

*Rate Reduction Bonds:* PSNH's RRB payments consist of principal and interest and are paid semi-annually, beginning on February 1, 2019. PSNH paid \$52.3 million of RRB principal payments and \$26.8 million of interest payments in 2019.

*Common Share Issuance and Forward Sale Agreement:* On June 4, 2019, Eversource completed an equity offering of 17,940,000 common shares, consisting of 5,980,000 common shares issued directly by the Company and 11,960,000 common shares issuable pursuant to a forward sale agreement with an investment bank. The issuance of 5,980,000 common shares resulted in proceeds of \$426.9 million, net of issuance costs.

Under the forward sale agreement, a total of 11,960,000 common shares were borrowed from third parties and sold by the underwriters. The forward sale agreement allows Eversource, at its election and prior to May 29, 2020, to physically settle the forward sale agreement by issuing common shares in exchange for net proceeds at the then-applicable forward sale price specified by the agreement (initially, \$71.48 per share) or, alternatively, to settle the forward sale agreement in whole or in part through the delivery or receipt of shares or cash. The forward sale price is subject to adjustment daily based on a floating interest rate factor and will decrease in respect of certain fixed amounts specified in the agreement, such as dividends.

On December 30, 2019, Eversource physically settled a portion of the forward sale agreement by delivering 6,000,000 common shares in exchange for net proceeds of \$425.4 million. The forward sale price used to determine the cash proceeds received by Eversource was calculated based on the initial forward sale price of \$71.48 per share, as adjusted in accordance with the forward sale agreement.

The 2019 issuances of 11,980,000 common shares resulted in proceeds of \$852.3 million, net of issuance costs, and were reflected in shareholders' equity and as financing activities on the statement of cash flows.

Eversource's intent is to physically settle the forward sale agreement by issuing common shares. As of December 31, 2019, if Eversource had elected to net settle the forward sale agreement, Eversource would have been required to pay \$84.4 million under a cash settlement or would have been required to deliver 992,189 common shares under a net share settlement.

Issuances of shares under the forward sale agreement are classified as equity transactions. Accordingly, no amounts relating to the forward sale agreement have or will be recorded in the financial statements until settlements take place. Prior to any settlements, the only impact to the financial statements is the inclusion of incremental shares within the calculation of diluted EPS using the treasury stock method. See Note 22, "Earnings Per Share," to the financial statements for information on the forward sale agreement's impact on the calculation of diluted EPS.

Eversource used the net proceeds received upon the direct issuance of common shares and the net proceeds received upon partial settlement of the forward sale agreement to repay short-term debt under the commercial paper program, to fund capital spending and clean energy initiatives, and for general corporate purposes.

*Cash Flows:* Cash flows provided by operating activities totaled \$2.01 billion in 2019, compared with \$1.83 billion in 2018. The increase in operating cash flows was due primarily to a decrease in 2019 of approximately \$148 million of major storm restoration cost payments, \$116 million in lower payments made in 2019 to the DOE by CYAPC to partially settle its pre-1983 spent nuclear fuel obligation, and a \$73.2 million decrease in pension and PBOP cash contributions made in 2019, as compared to 2018. Also contributing to the increase were \$102.8 million of lower income tax payments made in 2019, as compared to 2018, \$68.8 million in DOE Phase IV litigation proceeds received by CYAPC and YAEC in 2019, and the timing of cash collections on our accounts receivables. Partially offsetting these favorable impacts were the timing of collections for regulatory tracking mechanisms, which were significantly impacted by the timing of collections of purchased power and transmission costs at NSTAR Electric, and the timing of accounts payable cash payments and other working capital items.

Cash flows provided by operating activities totaled \$1.83 billion in 2018, compared with \$2.00 billion in 2017. The decrease in operating cash flows was due primarily to cash payments made in 2018 for storm restoration costs of approximately \$252 million, an increase of \$128 million in income tax payments made in 2018, as compared to 2017, and the unfavorable impacts related to the timing of payments of our working capital items, including accounts receivable and accounts payable. In addition, in December 2018, CYAPC paid \$145 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation. Partially offsetting these unfavorable impacts were the timing of cash collected for regulatory tracking mechanisms and a decrease of \$47.9 million in 2018 of pension and PBOP contributions.

In 2019, we paid cash dividends of \$663.2 million and issued non-cash dividends of \$22.8 million in the form of treasury shares, totaling dividends of \$2.14 per common share, compared with cash dividends of \$640.1 million, or \$2.02 per common share, in 2018. Our quarterly common share dividend payment was \$0.535 per share in 2019, as compared to \$0.505 per share in 2018. On February 5, 2020, our Board of Trustees approved a common share dividend payment of \$0.5675 per share, payable on March 31, 2020 to shareholders of record as of March 4, 2020. The 2020 dividend represents an increase of 6.1 percent over the dividend paid in December 2019.

Beginning in 2019, Eversource began issuing treasury shares to satisfy awards under the Company's incentive plans, shares issued under the dividend reinvestment and share purchase plan, and matching contributions under the Eversource 401k Plan.

In 2019, CL&P, NSTAR Electric and PSNH paid \$341.8 million, \$181.8 million and \$271.0 million, respectively, in common stock dividends to Eversource parent.

Investments in Property, Plant and Equipment on the statements of cash flows do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized and deferred portions of pension and PBOP expense. In 2019, investments for Eversource, CL&P, NSTAR Electric and PSNH were \$2.91 billion, \$917.5 million, \$861.4 million and \$309.0 million, respectively.

Eversource, CL&P, NSTAR Electric and PSNH each uses its available capital resources to fund its respective construction expenditures, meet debt requirements, pay operating costs, including storm-related costs, pay dividends, and fund other corporate obligations, such as pension contributions. Eversource's regulated companies recover their electric, natural gas and water distribution construction expenditures as the related project costs are depreciated over the life of the assets. This impacts the timing of the revenue stream designed to fully recover the total investment plus a return on the equity and debt used to finance the investments. The current growth in Eversource's construction expenditures utilizes a significant amount of cash for projects that have a long-term return on investment and recovery period, totaling approximately \$2.91 billion in cash capital spend in 2019. In addition, Eversource's investments in its offshore wind business totaled \$415.0 million in 2019, which are recognized as long-term assets. These factors have resulted in current liabilities exceeding current assets by \$1.19 billion, \$91.7 million, \$280.5 million, and \$36.7 million at Eversource, CL&P, NSTAR Electric and PSNH, respectively, as of December 31, 2019.

As of December 31, 2019, \$296.1 million of Eversource's long-term debt, including \$95.0 million, \$50.0 million, \$150.0 million, and \$1.1 million for NSTAR Electric, Yankee Gas, NSTAR Gas and Aquarion, respectively, will mature within the next 12 months. Included in the current portion of long-term debt on the Eversource balance sheet is \$31.3 million related to fair value adjustments from our various business combinations that will be amortized within the next 12 months and have no cash flow impact. Eversource, with its strong credit ratings, has several options available in the financial markets to repay or refinance these maturities with the issuance of new long-term debt. Eversource, CL&P, NSTAR Electric and PSNH will reduce their short-term borrowings with operating cash flows or with the issuance of new long-term debt, determined by considering capital requirements and maintenance of Eversource's credit rating and profile.

We expect the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with our existing borrowing availability and access to both debt and equity markets, will be sufficient to meet any working capital and future operating requirements, and capital investment forecasted opportunities.

*Credit Ratings:* A summary of our corporate credit ratings and outlooks by Moody's, S&P and Fitch is as follows:

	Moody's		S&P		Fitch	
	Current	Outlook	Current	Outlook	Current	Outlook
Eversource Parent	Baa1	Stable	A-	Stable	BBB+	Stable
CL&P	A3	Stable	A	Stable	A-	Stable
NSTAR Electric	A1	Stable	A	Stable	A	Stable
PSNH	A3	Stable	A	Stable	A-	Stable

A summary of the current credit ratings and outlooks by Moody's, S&P and Fitch for senior unsecured debt of Eversource parent and NSTAR Electric, and senior secured debt of CL&P and PSNH is as follows:

	Moody's		S&P		Fitch	
	Current	Outlook	Current	Outlook	Current	Outlook
Eversource Parent	Baa1	Stable	BBB+	Stable	BBB+	Stable
CL&P	A1	Stable	A+	Stable	A+	Stable
NSTAR Electric	A1	Stable	A	Stable	A+	Stable
PSNH	A1	Stable	A+	Stable	A+	Stable

### Business Development and Capital Expenditures

Our consolidated capital expenditures, including amounts incurred but not paid, cost of removal, AFUDC, and the capitalized and deferred portions of pension and PBOP expense (all of which are non-cash factors), totaled \$3.06 billion in 2019, \$2.86 billion in 2018, and \$2.52 billion in 2017. These amounts included \$239.0 million in 2019, \$184.6 million in 2018, and \$165.9 million in 2017 related to information technology and facilities upgrades and enhancements, primarily at Eversource Service and The Rocky River Realty Company.

*Electric Transmission Business:* Our consolidated electric transmission business capital expenditures increased by \$16.0 million in 2019, as compared to 2018. A summary of electric transmission capital expenditures by company is as follows:

(Millions of Dollars)	For the Years Ended December 31,		
	2019	2018	2017
CL&P	\$ 459.5	\$ 465.5	\$ 431.5
NSTAR Electric	379.7	334.3	301.9
PSNH	190.4	194.2	155.6
NPT	9.8	29.4	43.3
Total Electric Transmission Segment	\$ 1,039.4	\$ 1,023.4	\$ 932.3

Eastern Massachusetts Transmission Projects: These projects consist of a portfolio of electric transmission upgrades in southern New Hampshire, northern Massachusetts and continuing into the greater Boston metropolitan area, of which 28 upgrades are in Eversource's service territory (two in New Hampshire and 26 in Massachusetts). The two New Hampshire upgrades, including the Merrimack Valley Reliability Project, have been placed in service, and 20 Massachusetts upgrades have been placed in service. On December 17, 2019, the Massachusetts Siting Board issued a favorable decision on the Sudbury-Hudson Reliability Project, the last project requiring such approval. On January 17, 2020, the Town of Sudbury and Protect Sudbury, a community group, appealed the decision to the Massachusetts Supreme Judicial Court. The majority of the remaining upgrades are under construction and are expected to be placed in service in 2021. We estimate our portion of the investment will be approximately \$750 million, of which \$442.2 million has been spent and capitalized through December 31, 2019.

Hartford-Area Transmission Projects: These projects consist of 27 projects in the Hartford, Connecticut area with an expected investment of approximately \$350 million. As of December 31, 2019, 24 projects have been placed in service, and three projects are in active construction and are expected to be placed in service through mid-2020. As of December 31, 2019, CL&P had spent and capitalized \$275.9 million in costs associated with these projects.

Seacoast Reliability Project: The Seacoast Reliability Project consists of a 13-mile, 115kV transmission line within several New Hampshire communities, using a combination of overhead, underground and underwater line designs to help meet the growing demand for electricity in the Seacoast region. On December 10, 2018, the NHSEC indicated its unanimous approval of the project, and subsequently issued its written decision on January 31, 2019. On May 13, 2019, two appeals of the NHSEC's approval orders were filed with the New Hampshire Supreme Court. On December 17, 2019, the Conservation Law Foundation requested the Court to withdraw its appeal, and the Court granted the request on December 20, 2019. The other appeal remains pending. This project is under construction and is scheduled to be completed in the second quarter of 2020. We estimate the investment will be approximately \$125 million, of which PSNH had spent and capitalized \$89.0 million in costs through December 31, 2019.

All project costs are anticipated to be fully recoverable through transmission rates.

*Distribution Business:* A summary of distribution capital expenditures is as follows:

(Millions of Dollars)	For the Years Ended December 31,						
	CL&P	NSTAR Electric	PSNH	Total Electric	Natural Gas	Water <sup>(1)</sup>	Total
<b>2019</b>							
Basic Business	\$ 228.7	\$ 201.0	\$ 47.3	\$ 477.0	\$ 71.2	\$ 15.0	\$ 563.2

<sup>(1)</sup> Our water distribution business was acquired on December 4, 2017. Amounts are immaterial for the year ended December 31, 2017.

For the electric distribution business, basic business includes the purchase of meters, tools, vehicles, information technology, transformer replacements, equipment facilities, and the relocation of plant. Aging infrastructure relates to reliability and the replacement of overhead lines, plant substations, underground cable replacement, and equipment failures. Load growth and other includes requests for new business and capacity additions on distribution lines and substation additions and expansions.

For the natural gas distribution business, basic business addresses daily operational needs including meters, pipe relocations due to public works projects, vehicles, and tools. Aging infrastructure projects seek to improve the reliability of the system through enhancements related to cast iron and bare steel replacement of main and services, corrosion mediation, and station upgrades. Load growth and other reflects growth in existing service territories including new developments, installation of services, and expansion.

For the water distribution business, basic business addresses daily operational needs including periodic meter replacement, water main relocation, facility maintenance, and tools. Aging infrastructure relates to reliability and the replacement of water mains, regulators, storage tanks, pumping stations, wellfields, reservoirs, and treatment facilities. Load growth and other reflects growth in our service territory, including improvements to acquisitions, installation of new services, and interconnections of systems.

*Acquisition of Assets of Columbia Gas of Massachusetts:* On February 26, 2020, Eversource and NiSource entered into an asset purchase agreement (the Agreement) pursuant to which Eversource would acquire the assets that comprise NiSource's local gas distribution business, currently doing business as Columbia Gas of Massachusetts (CMA). The purchase price of \$1.1 billion includes a target working capital amount that would be adjusted to reflect actual working capital as of the closing date. Eversource would acquire approximately 330,000 residential, commercial, and industrial natural gas customers, as well as over 5,000 miles of natural gas distribution pipeline across more than 60 communities in Massachusetts.

The liabilities to be assumed by Eversource under the Agreement specifically exclude any liabilities (past and future) arising out of or related to the fires and explosions that occurred on September 13, 2018 in Lawrence, Andover and North Andover, Massachusetts related to the delivery of natural gas by CMA, including certain subsequent events, all as described in the DPU's Order on Scope dated December 23, 2019 (D.P.U. 19-141) (the Greater Lawrence Incident or GLI), and any further emergency events prior to the closing of the acquisition related to the restoration and reconstruction with respect to the GLI, including any losses arising out of or related to any litigation, demand, cause of action, claim, suit, investigation, proceeding, indemnification agreements or rights.

The acquisition and resulting rate plan both require DPU and other approvals. Eversource and NiSource expect to close this transaction later this year.

*Projected Capital Expenditures:* A summary of the projected capital expenditures for the regulated companies' electric transmission and for the total electric distribution, natural gas distribution and water distribution for 2020 through 2024, including information technology and facilities upgrades and enhancements on behalf of the regulated companies, is as follows:

(Millions of Dollars)	Years					
	2020	2021	2022	2023	2024	2020 - 2024 Total
CL&P Transmission	\$ 384	\$ 209	\$ 184	\$ 182	\$ 141	\$ 1,100
NSTAR Electric Transmission	366	478	436	296	284	1,860
PSNH Transmission	160	145	235	233	243	1,016
<i>Total Electric Transmission</i>	<i>\$ 910</i>	<i>\$ 832</i>	<i>\$ 855</i>	<i>\$ 711</i>	<i>\$ 668</i>	<i>\$ 3,976</i>
Electric Distribution	\$ 1,347	\$ 1,208	\$ 1,162	\$ 1,170	\$ 1,234	\$ 6,121
Natural Gas Distribution	470	498	501	507	537	2,513
<i>Total Electric and Natural Gas Distribution</i>	<i>\$ 1,817</i>	<i>\$ 1,706</i>	<i>\$ 1,663</i>	<i>\$ 1,677</i>	<i>\$ 1,771</i>	<i>\$ 8,634</i>
Water Distribution	\$ 124	\$ 127	\$ 134	\$ 147	\$ 153	\$ 685
Information Technology and All Other	\$ 220	\$ 169	\$ 165	\$ 171	\$ 171	\$ 896
Total	\$ 3,071	\$ 2,834	\$ 2,817	\$ 2,706	\$ 2,763	\$ 14,191

The projections do not include investments related to offshore wind projects. Actual capital expenditures could vary from the projected amounts for the companies and years above.

*Offshore Wind Business:* Our offshore wind business includes ownership interests in North East Offshore and Bay State Wind, which together hold PPAs and contracts for the Revolution Wind, South Fork Wind and Sunrise Wind projects, as well as offshore leases through BOEM. Our offshore wind projects are being developed and constructed through a joint and equal partnership with Ørsted. This partnership also participates in opportunities for solicitations for offshore wind energy in the Northeast U.S.

On February 8, 2019, Eversource and Ørsted entered into an equal partnership to acquire key offshore wind assets in the Northeast. Eversource has a 50 percent ownership interest in North East Offshore, which holds the Revolution Wind and South Fork Wind projects, as well as a 257 square-mile lease off the coasts of Massachusetts and Rhode Island. Eversource also has a 50 percent ownership interest in Bay State Wind, which holds the Sunrise Wind project. Bay State Wind's separate 300-square-mile ocean lease is located approximately 25 miles south of the coast of Massachusetts adjacent to the North East Offshore area. In aggregate, the Bay State Wind and the North East Offshore lease sites jointly-owned by Eversource and Ørsted could eventually develop at least 4,000 MW of clean, renewable offshore wind energy. As of December 31, 2019, Eversource's total equity investment balance in its offshore wind business was \$649.3 million.

Currently we are developing our construction and operations plans, concluding on final offshore and onshore project designs and working through our siting and permitting processes, all of which is competitively sensitive. Subject to finalization of these plans, designs and processes, all of which are subject to change and modification as a result of our investment decisions, permit approval timelines and final design decisions, we currently expect to make additional investments in our offshore wind business of approximately \$300 million to \$400 million over the course of 2020.

The following table provides a summary of the Eversource and Ørsted major projects with announced contracts:

Wind Project	State Servicing	Size (MW)	Term (Years)	Price per MWh	Pricing Terms	Projected In-Service Date	Contract Status
Revolution Wind	Rhode Island	400	20	\$98.43	Fixed price contract; no price escalation	End of 2023	Approved
Revolution Wind	Connecticut	304	20	<sup>(1)</sup>	Fixed price contracts; no price escalation	End of 2023	Approved
South Fork Wind	New York (LIPA)	90	20	\$160.33	2 percent average price escalation	End of 2022	Approved
South Fork Wind	New York (LIPA)	40	20	\$86.25	2 percent average price escalation	End of 2022	<sup>(3)</sup>
Sunrise Wind	New York (NYSERDA)	880	25	\$110.37 <sup>(2)</sup>	Fixed price contract; no price escalation	End of 2024	Approved

<sup>(1)</sup> The pricing for the Revolution Wind contracts in Connecticut has not yet been publicly disclosed.

<sup>(2)</sup> Index OREC strike price.

<sup>(3)</sup> The Long Island Power Authority (LIPA) agreed to expand the original 20-year PPA from 90 MW to 130 MW through an amendment to the original agreement. Negotiations are currently underway, and a final amendment is expected in the first half of 2020.

On October 23, 2019, the New York State Energy Research and Development Authority (NYSERDA) announced the execution of a 25-year agreement with the Sunrise Wind project to purchase Offshore Wind Renewable Energy Certificates (ORECs) from an 880 MW offshore wind facility. The Sunrise Wind project is held by Bay State Wind and will use a combination of lease areas from Bay State Wind and North East Offshore. Sunrise Wind will be developed 35 miles east of Montauk Point, Long Island.

The completion dates for these projects are subject to federal permitting through BOEM, engineering, state siting and permitting in New York and Rhode Island, and finalizing a PPA amendment in New York. Significant delays in the siting and permitting process, including the timing of obtaining BOEM approval, could adversely impact the timing of these projects' in-service dates. Currently, BOEM has indicated it will complete its Cumulative Impact Study as part of the Draft Supplemental Environmental Impact Statement (EIS) for a non-affiliated offshore wind project during the second quarter of 2020. The study is designed to assess the overall environmental impact of all offshore wind projects. Federal siting and permitting have commenced for the South Fork Wind project, as it has filed its Construction Operations Plan (COP) application with BOEM.

South Fork Wind is designated as "FAST-41" by the U.S. Federal Permitting Improvement Council's FAST-41 infrastructure projects, which provides greater federal assistance associated with program timelines. Revolution Wind and Sunrise Wind COP filings are planned in 2020. South Fork Wind previously filed federal and state applications in 2018. State agencies also will review siting applications for Revolution Wind and Sunrise Wind in New York and Rhode Island, with application filings planned in 2020.

#### FERC Regulatory Matters

*FERC ROE Complaints:* Four separate complaints were filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively, the Complainants). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive (incentive cap) of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent. On October 16, 2014, the FERC set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the Court).

All amounts associated with the first complaint period have been refunded. Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of December 31, 2019. This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of December 31, 2019.

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019 and reply briefs were filed on March 8, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order provided the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those illustrative calculations indicated that for the first complaint period, for the NETOs, which FERC concludes are of average financial risk, the preliminary just and reasonable base ROE is 10.41 percent and the preliminary incentive cap on total ROE is 13.08 percent.

If the results of the illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods. These preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order.

On November 21, 2019, FERC issued an order concerning the transmission ROEs for the Midcontinent ISO transmission owners (MISO). In that order, FERC adopted another new methodology for determining base ROEs for MISO, which differed significantly from the methodology and framework set forth in its October 16, 2018 FERC order on the NETOs' ROE dockets. On December 23, 2019, the NETOs filed a Supplemental Paper Hearing Brief and a Motion to supplement the record in the NETO ROE dockets to respond to the new methodology proposed in the MISO order, as there is uncertainty to whether it may be applied to the NETOs' cases. On January 21, 2020, the FERC issued an order granting rehearing for further consideration to give the FERC more time to act on the substantive issues of the MISO ROE proceedings. Further changes to the methodology by FERC are possible as a result of the arguments in both the MISO and NETO proceedings. Given the significant uncertainty relating to the October 2018 FERC order, the November 2019 FERC order to MISO, and the FERC's rehearing of the MISO order, the Company is unable to predict the potential effect of the MISO order on the NETO complaints or the outcome of the four complaints and concluded that there is no reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods at this time. Further, the Company cannot reasonably estimate a range of gain or loss for any of the four complaint proceedings.

Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

A change of 10 basis points to the base ROE used to establish the reserves would impact Eversource's after-tax earnings by an average of approximately \$3 million for each of the four 15-month complaint periods.

*FERC Notices of Inquiry:* On March 21, 2019, FERC issued two Notices of Inquiry (NOI) that may affect Eversource transmission ROEs and incentives. One NOI (the "FERC ROE NOI") seeks comments from all stakeholders on FERC's policies for evaluating ROEs for electric public utilities, and interstate natural gas and oil pipelines. The other NOI (the FERC transmission incentives NOI) seeks comments on FERC's policies for implementing electric transmission incentives. On June 26, 2019, the NETOs jointly filed comments in the FERC ROE NOI, supporting the methodology established in the FERC's October 16, 2018 order with minor enhancements going forward. Also, on June 26, 2019, Eversource filed comments in the FERC transmission incentives NOI, requesting that FERC retain policies that have been effective in encouraging new transmission investment and remain flexible enough to attract investment in new and emerging transmission technologies. The NETOs jointly filed reply comments in the FERC ROE NOI on July 26, 2019. Eversource filed reply comments in the FERC transmission incentives NOI on August 26, 2019. At this time, Eversource cannot predict how these NOIs will affect its ROEs or incentives.

*FERC Transmission Rate Settlement:* On December 28, 2015, FERC initiated a proceeding to review the NETOs' regional and local transmission formula rates due to a lack of transparency, finding that the formula rates appeared to lack sufficient details to determine how costs are derived and recovered in rates. This proceeding was set for hearing but held in abeyance to provide time for settlement judge procedures. On August 17, 2018, a signed Settlement Agreement between twenty-eight parties, including all six New England state regulatory commissions, the NETOs (including CL&P, NSTAR Electric and PSNH) and other settling parties, was filed at the FERC. The Settlement Agreement included, among other things, a new formula rate template in which all regional and local transmission revenue requirements will be determined through a single formula rate. The Settlement Agreement was contested by a group of municipal entities and the FERC Trial Staff. On May 22, 2019, FERC rejected the Settlement Agreement and remanded the proceeding for hearings. The parties have been engaged in further settlement negotiations and reached an agreement in principle on October 22, 2019. The FERC Chief Administrative Law Judge has approved two suspensions of the schedule for ninety days each for the NETOs to review the terms with other active parties and finalize the settlement. The procedural schedule has been suspended to April 22, 2020.

*U.S. Federal Corporate Income Taxes:* Effective January 1, 2018, the local transmission service rates were updated to reflect the lower U.S. federal corporate income tax rate that resulted from the Tax Cuts and Jobs Act. On June 28, 2018, FERC granted a one-time waiver of tariff provisions related to the federal corporate income tax rate so that, effective June 1, 2018, the regional transmission service rates also reflect the reduced federal corporate income tax rate of 21 percent. The local and regional transmission service rates do not currently reflect amortization of excess ADIT (EDIT) balances that resulted from the Act. On November 15, 2018, FERC issued a Policy Statement and a separate Notice of Proposed Rulemaking addressing accounting and rate issues related to ADIT changes resulting from the Act. On November 21, 2019, FERC issued its final rule requiring public utilities with transmission formula rates to make adjustments to ADIT and EDIT. Eversource expects to submit a filing demonstrating its compliance with the final rule in the second half of 2020.

### Regulatory Developments and Rate Matters

*Electric, Natural Gas and Water Utility Base Distribution Rates:* Each Eversource utility subsidiary is subject to the regulatory jurisdiction of the state in which it operates: CL&P, Yankee Gas and Aquarion operate in Connecticut and are subject to PURA regulation; NSTAR Electric, NSTAR Gas and Aquarion operate in Massachusetts and are subject to DPU regulation; and PSNH and Aquarion operate in New Hampshire and are subject to NHPUC regulation. The regulated companies' distribution rates are set by their respective state regulatory commissions, and their tariffs include mechanisms for periodically adjusting their rates for the recovery of specific incurred costs.

In Connecticut, electric and natural gas utilities are required to file a distribution rate case, or for PURA to initiate a rate review, within four years of the last rate case. CL&P's distribution rates were established in an April 2018 PURA-approved rate case settlement agreement with rates effective May 1, 2018. Yankee Gas' distribution rates were established in a December 2018 PURA-approved rate case settlement agreement with rates effective November 15, 2018. Aquarion is not required to initiate a rate review with the PURA. Aquarion rates were established in a 2013 PURA-approved rate case.

In Massachusetts, electric distribution companies are required to file at least one distribution rate case every five years, and natural gas local distribution companies to file at least one distribution rate case every 10 years, and those companies are limited to one settlement agreement in any 10-year period. NSTAR Electric's distribution rates were established in a 2017 DPU-approved rate case with rates effective February 1, 2018. NSTAR Gas' distribution rates were established in a 2015 DPU-approved rate case. See "Regulatory Developments and Rate Matters - Massachusetts" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*, for NSTAR Gas' November 2019 rate case application with the DPU. Aquarion is not required to initiate a rate review with the DPU. Aquarion rates were established in an October 2018 DPU-approved rate case.

In New Hampshire, PSNH's temporary distribution rates were established in a settlement agreement approved by the NHPUC on June 27, 2019, with temporary rates effective July 1, 2019. On May 28, 2019, PSNH filed an application with the NHPUC for a permanent increase in base distribution rates, effective July 1, 2020. See "Regulatory Developments and Rate Matters - New Hampshire" in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*, for more information. Aquarion rates were established in a 2013 NHPUC-approved rate case, further revised in 2016. In a 2019 settlement approved by the NHPUC, Aquarion was ordered to file its next full rate proceeding no later than 2020.

*Electric, Natural Gas and Water Utility Retail Rates:* The Eversource electric distribution companies obtain and resell power to retail customers who choose not to buy energy from a competitive energy supplier. The natural gas distribution companies procure natural gas for firm and seasonal customers. These energy supply procurement costs are recovered from customers in energy supply rates that are approved by the respective state regulatory commission. The rates are reset periodically and are fully reconciled to their costs. Each electric and natural gas distribution company fully recovers its energy supply costs through approved regulatory rate mechanisms on a timely basis and, therefore, such costs have no impact on earnings.

The electric and natural gas distribution companies also recover certain other costs on a fully reconciling basis through regulatory commission-approved cost tracking mechanisms and, therefore, recovery of these costs have no impact on earnings. Costs recovered through cost tracking mechanisms include, among others, energy efficiency program costs, electric retail transmission charges, electric restructuring and stranded costs (including securitized RRB charges), and additionally for our Massachusetts companies, pension and PBOP benefits and net metering for distributed generation. The reconciliation filings compare the total actual costs allowed to revenue requirements related to these services and the difference between the costs incurred (or the rate recovery allowed) and the actual costs allowed is deferred and included, to be either recovered or refunded, in future customer rates. These cost tracking mechanisms also include certain incentives earned, return on rate base, and carrying charges that are billed in rates to customers, which do impact earnings.

*U.S. Federal Corporate Income Taxes:* On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules to reduce the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which are estimated to be approximately \$2.8 billion and are included in regulatory liabilities as of December 31, 2019. The refund of these EDIT regulatory liabilities to customers will generally be made over the same period as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities. The refund of EDIT has begun at most of our distribution companies and is reflected in rates. The refund to customers and resulting amortization of the EDIT regulatory liabilities results in lower Revenues on the statements of income and lower current tax expense. This is offset by the reduction to Income Tax Expense due to the amortization of the EDIT. The refund of EDIT results in a lower effective tax rate and no impact on net income.

Eversource established a regulatory liability, recorded as a reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflected the lower federal tax rate. As of December 31, 2019, this liability, net of amounts refunded to customers, was \$14.6 million.

Eversource's regulated companies are in the process of, or will, refund the decrease in the income tax rate based on orders issued by applicable state and federal regulatory commissions. A summary of the timing of refunds related to the change in the tax rate is as follows:

Eversource Utility and Jurisdiction	EDIT Refund Timing	Effective Date of January 1, 2018 Tax Rate Reflected in Rates
<b>Connecticut</b>		
CL&P	Reflected in rates effective May 1, 2019	May 1, 2018
Yankee Gas	Reflected in rates effective November 15, 2018	November 15, 2018
<b>Massachusetts</b>		
NSTAR Electric	Reflected in rates effective January 1, 2019	February 1, 2018
NSTAR Gas	Reflected in rates effective February 1, 2019	July 1, 2018
<b>New Hampshire</b>		
PSNH	Refunds for EDIT are being addressed in permanent distribution rate case filing	July 1, 2019 for distribution
	Refunds for EDIT related to PSNH's divested generation assets reflected in rates effective August 1, 2018	
<b>Transmission</b>		
CL&P, NSTAR Electric and PSNH	Refunds for EDIT will be made based on November 2019 final ruling from FERC. Eversource expects to submit a filing demonstrating its compliance with the final rule in the second half of 2020.	January 1, 2018 for local transmission service and June 1, 2018 for regional transmission service

*Connecticut:*

**CL&P Storm Filing:** CL&P's approved rate case settlement in 2018 incorporated \$18.6 million of rate base recovery for catastrophic storms occurring after December 31, 2016, subject to a future storm filing. On November 16, 2018, CL&P filed for recovery of \$153 million of storm costs incurred from October 2017 through May 2018, with recovery over six years to begin May 1, 2019. Through the course of the proceeding, CL&P updated its request to \$145.5 million to reflect final invoicing and capitalization amounts. On April 17, 2019, PURA authorized recovery of \$141.0 million as part of storm cost recovery and the remainder to be recorded to plant or other balance sheet accounts.

*Massachusetts:*

**NSTAR Electric Distribution Rates:** As part of an inflation-based mechanism, NSTAR Electric submitted its second annual Performance Based Rate Adjustment filing on September 16, 2019 and the DPU approved a \$33.6 million increase to base distribution rates on December 19, 2019 for effect on January 1, 2020.

**NSTAR Gas Rate Case:** On November 8, 2019, NSTAR Gas filed its application with the DPU, which sought a distribution rate increase of \$38.0 million effective October 1, 2020. As part of this filing, NSTAR Gas also proposed to continue its ongoing Gas System Enhancement Program (GSEP), include the GSEP investments since 2015 into base rates, and implement a performance-based ratemaking plan. A final decision from the DPU is expected by September 30, 2020.

**Hingham Vote to Acquire Water System:** On April 22, 2019, the town of Hingham, Massachusetts voted to acquire the water system and treatment plant that supplies water to the towns of Hingham, Hull and North Cohasset. The acquisition price is currently estimated to be more than \$100 million, subject to adjustment based on actual capital investments as legally required and other future closing adjustments. Aquarion will continue to operate the water system consistent in all material respects with its obligations under applicable law during the transition period, until the sale closes. The Company is evaluating the impact of the sale on its financial statements, which will be recorded when the sale transaction closes. No loss is expected upon the ultimate conclusion of this transaction. The transaction is expected to close in the second half of 2020. As of December 31, 2019, these water distribution assets were included within Property, Plant and Equipment, Net and goodwill on the balance sheet and were also reflected in the Water Distribution segment and reporting unit.

## *New Hampshire:*

**Distribution Rates:** On April 26, 2019, PSNH filed an application with the NHPUC for approval of a temporary annual base distribution rate increase of approximately \$33 million, effective July 1, 2019. On June 27, 2019, the NHPUC approved a settlement agreement that was reached by PSNH, the NHPUC Staff, the Office of the Consumer Advocate, and another settling party, to implement a temporary annual base distribution rate increase of \$28.3 million. Although new rates were implemented on August 1, 2019 to customers, the provisions of the temporary base distribution rate increase were effective July 1, 2019. The settlement agreement also permits PSNH to recover approximately \$68.5 million in unrecovered storm costs over a five-year period beginning August 1, 2019, with debt carrying charges, which is included in the temporary rate increase.

On May 28, 2019, PSNH filed an application with the NHPUC for a permanent increase in base distribution rates of approximately \$70 million, effective July 1, 2020, which includes the temporary rate increase request. The temporary rates are subject to reconciliation based on the outcome of the permanent rate case now before the NHPUC. The NHPUC is permitted up to twelve months to adjudicate the permanent rate application from the date of filing. A decision by the NHPUC is expected in the second quarter of 2020.

**2013 through 2016 Storm Costs:** On March 26, 2019, the NHPUC approved the recovery of \$38.1 million, plus carrying charges, of storm costs incurred from December 2013 through April 2016 and the transfer of funding from PSNH's major storm reserve to recover those costs. The costs of these storms (excluding the equity return component of the carrying charges) were deferred as regulatory assets, and the funding reserve collected from customers was accrued as a regulatory liability. As a result of the duration of time between incurring storm costs in December 2013 through April 2016 and final approval from the NHPUC in 2019, PSNH recognized \$5.2 million (pre-tax) for the equity return component of the carrying charges within Other Income, Net on the statement of income in 2019, which has been collected from customers. Also included in the March 26, 2019 NHPUC approval is a prospective requirement for PSNH to annually net its storm funding reserve collected from customers against deferred storm costs.

## **Legislative and Policy Matters**

*New Hampshire:* On July 8, 2019, the New Hampshire Superior Court approved a settlement between PSNH and the Town of Bow, New Hampshire, where the town had over-assessed the value of the property owned by PSNH for the 2014 through 2018 property tax years. The result of this settlement was \$10.0 million in over-paid property taxes, of which PSNH has received \$4.25 million in cash through December 31, 2019. PSNH will receive the balance thereafter to be credited against future property taxes payable, annually through 2023.

In addition, PSNH reached a collective resolution with an additional 61 municipalities for an aggregate total of approximately \$7 million, where the towns had over-assessed the value of the property owned by PSNH for the 2015 through 2017 property tax years.

*Federal:* On December 20, 2019, the "Further Consolidated Appropriations Act, 2020," became law, which provided a one-year extension of the production tax credit or the investment tax credit for renewable wind projects under Section 45 of the Internal Revenue Code of 1986 on which construction begins before January 1, 2021. If construction begins on a qualifying wind project in 2020, the project will qualify for a production tax credit of \$15 per MWh or an 18 percent investment tax credit.

## **Critical Accounting Policies**

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and, at times, difficult, subjective or complex judgments. Changes in these estimates, assumptions and judgments, in and of themselves, could materially impact our financial position, results of operations or cash flows. Our management discusses with the Audit Committee of our Board of Trustees significant matters relating to critical accounting policies. Our critical accounting policies are discussed below. See the combined notes to our financial statements for further information concerning the accounting policies, estimates and assumptions used in the preparation of our financial statements.

*Regulatory Accounting:* Our regulated companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of our regulated companies are designed to collect each company's costs to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, we record regulatory assets before approval for recovery has been received from the applicable regulatory commission. We must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. We base our conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

We use judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on our financial statements. We believe it is probable that each of the regulated companies will recover the regulatory assets that have been recorded. If we determine that we can no longer apply the accounting guidance applicable to rate-regulated enterprises to our operations, or that we cannot conclude it is probable that costs will be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

*Pension, SERP and PBOP:* We sponsor Pension, SERP and PBOP Plans to provide retirement benefits to our employees. For each of these plans, several significant assumptions are used to determine the projected benefit obligation, funded status and net periodic benefit cost. These

assumptions include the expected long-term rate of return on plan assets, discount rate, compensation/progression rate and mortality and retirement assumptions. We evaluate these assumptions at least annually and adjust them as necessary. Changes in these assumptions could have a material impact on our financial position, results of operations or cash flows.

**Expected Long-Term Rate of Return on Plan Assets:** In developing the expected long-term rate of return, we consider historical and expected returns, as well as input from our consultants. Our expected long-term rate of return on assets is based on assumptions regarding target asset allocations and corresponding expected rates of return for each asset class. We routinely review the actual asset allocations and periodically rebalance the investments to the targeted asset allocations when appropriate. For the year ended December 31, 2019, our expected long-term rate-of-return assumption used to determine our pension and PBOP expense was 8.25 percent for the Eversource Service plans and 7 percent for the Aquarion plans. For the forecasted 2020 pension and PBOP expense, an expected long-term rate of return of 8.25 percent for the Eversource Service plans and 7 percent for the Aquarion plans will be used reflecting our target asset allocations.

**Discount Rate:** Payment obligations related to the Pension, SERP and PBOP Plans are discounted at interest rates applicable to the expected timing of each plan's cash flows. The discount rate that was utilized in determining the pension, SERP and PBOP obligations was based on a yield-curve approach. This approach utilizes a population of bonds with an average rating of AA based on bond ratings by Moody's, S&P and Fitch, and uses bonds with above median yields within that population. As of December 31, 2019, the discount rates used to determine the funded status were within a range of 3.04 percent to 3.35 percent for the Pension and SERP Plans, and within a range of 3.26 percent to 3.28 percent for the PBOP Plans. As of December 31, 2018, the discount rates used were within a range of 4.22 percent to 4.45 percent for the Pension and SERP Plans, and within a range of 4.38 percent to 4.41 percent for the PBOP Plans. The decrease in the discount rates used to calculate the funded status resulted in an increase to the Pension and PBOP Plans' liability of \$813.1 million and \$88.6 million, respectively, as of December 31, 2019.

The Company uses the spot rate methodology for the service and interest cost components of Pension, SERP and PBOP expense because it provides a more precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve. The discount rates used to estimate the 2019 expense were within a range of 2.63 percent to 3.55 percent for the Pension and SERP Plans, and within a range of 3.85 percent to 4.65 percent for the PBOP Plans.

**Mortality Assumptions:** Assumptions as to mortality of the participants in our Pension, SERP and PBOP Plans are a key estimate in measuring the expected payments a participant may receive over their lifetime and the corresponding plan liability we need to record. In 2019, a revised scale for the mortality table was released, and we utilized it in our measurements.

**Compensation/Progression Rate:** This assumption reflects the expected long-term salary growth rate, including consideration of the levels of increases built into collective bargaining agreements, and impacts the estimated benefits that Pension and SERP Plan participants receive in the future. As of December 31, 2019 and 2018, the compensation/progression rate used to determine the funded status was 3.50 percent for the Eversource Service plans and 4 percent for the Aquarion plans.

**Health Care Cost:** The Eversource Service PBOP Plan is not subject to health care cost trends. As of December 31, 2019, for the Aquarion PBOP Plan, the health care cost trend rate is a range of 3.5 percent to 6.5 percent, with an ultimate rate of 3.5 percent to 5 percent in 2019 and 2023, for post-65 and pre-65 retirees, respectively.

**Actuarial Determination of Expense:** Pension, SERP and PBOP expense is determined by our actuaries and consists of service cost and prior service cost, interest cost based on the discounting of the obligations, and amortization of actuarial gains and losses, offset by the expected return on plan assets. Actuarial gains and losses represent the amortization of differences between assumptions and actual information or updated assumptions. Pre-tax net periodic benefit expense for the Pension and SERP Plans was \$63.7 million, \$39.6 million and \$64.9 million for the years ended December 31, 2019, 2018 and 2017, respectively. For the PBOP Plans, there was net periodic PBOP income of \$41.5 million, \$45.0 million and \$39.6 million for the years ended December 31, 2019, 2018 and 2017, respectively.

The expected return on plan assets is determined by applying the assumed long-term rate of return to the Pension and PBOP Plan asset balances. This calculated expected return is compared to the actual return or loss on plan assets at the end of each year to determine the investment gains or losses to be immediately reflected in unamortized actuarial gains and losses.

**Forecasted Expenses and Expected Contributions:** We estimate that expense in 2020 for the Pension and SERP Plans will be approximately \$53 million and income in 2020 for the PBOP Plans will be approximately \$52 million. Pension, SERP and PBOP expense for subsequent years will depend on future investment performance, changes in future discount rates and other assumptions, and various other factors related to the populations participating in the plans.

Our policy is to fund the Pension Plans annually in an amount at least equal to the amount that will satisfy all federal funding requirements. We contributed \$112.5 million to the Pension Plans in 2019. We currently estimate contributing \$105.0 million to the Pension Plans in 2020.

It is our policy to fund the PBOP Plans annually through tax deductible contributions to external trusts. We contributed \$9.3 million to the PBOP Plans in 2019. We currently estimate contributing \$2.9 million to the PBOP Plans in 2020.

**Sensitivity Analysis:** The following represents the hypothetical increase to the Pension Plans' (excluding the SERP Plans) reported annual cost and a decrease to the PBOP Plans' reported annual income as a result of a change in the following assumptions by 50 basis points:

Assumption Change	Increase in Pension Plan Cost		Decrease in PBOP Plan Income	
	As of December 31,		As of December 31,	
	2019	2018	2019	2018
Eversource				
Lower expected long-term rate of return	\$ 22.9	\$ 23.7	\$ 4.1	\$ 4.5
Lower discount rate	21.7	25.5	1.7	2.9
Higher compensation rate	8.7	6.8	N/A	N/A

**Goodwill:** We recorded goodwill on our balance sheet associated with previous mergers and acquisitions, which totaled \$4.4 billion as of December 31, 2019. We have identified our reporting units for purposes of allocating and testing goodwill as Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. Electric Distribution and Electric Transmission reporting units include carrying values for the respective components of CL&P, NSTAR Electric and PSNH. The Natural Gas Distribution reporting unit includes the carrying values of NSTAR Gas and Yankee Gas. The Water Distribution reporting unit includes the Aquarion water utility businesses. As of December 31, 2019, goodwill was allocated to the reporting units as follows: \$2.5 billion to Electric Distribution, \$0.6 billion to Electric Transmission, \$0.4 billion to Natural Gas Distribution and \$0.9 billion to Water Distribution.

We are required to test goodwill balances for impairment at least annually by considering the fair values of the reporting units, which requires us to use estimates and judgments. We have selected October 1st of each year as the annual goodwill impairment testing date. Goodwill impairment is deemed to exist if the carrying amount of a reporting unit exceeds its estimated fair value and if the implied fair value of goodwill based on the estimated fair values of the reporting units' assets and liabilities is less than the carrying amount of the goodwill. If goodwill were deemed to be impaired, it would be written down in the current period to the extent of the impairment.

We performed an impairment test of goodwill as of October 1, 2019 for the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units. This evaluation required the consideration of several factors that impact the fair value of the reporting units, including conditions and assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, and internal estimates of future cash flows and net income.

The 2019 goodwill impairment test resulted in a conclusion that goodwill is not impaired and no reporting unit is at risk of a goodwill impairment. The fair value of the reporting units was substantially in excess of carrying value.

**Long-Lived Assets:** Impairment evaluations of long-lived assets, including property, plant and equipment and other assets, involve a significant degree of estimation and judgment, including identifying circumstances that indicate an impairment may exist. Impairment analysis is required when events or changes in circumstances indicate that the carrying value of a long-lived asset may not be recoverable. Indicators of potential impairment include a deteriorating business climate, unfavorable regulatory action, decline in value that is other than temporary in nature, plans to dispose of a long-lived asset significantly before the end of its useful life, and accumulation of costs that are in excess of amounts allowed for recovery. The review of long-lived assets for impairment utilizes significant assumptions about operating strategies and external developments, including assessment of current and projected market conditions that can impact future cash flows.

**Impairment of Northern Pass Transmission:** Northern Pass was Eversource's planned 1,090 MW HVDC transmission line that would have interconnected from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire. As a result of a final decision received on July 19, 2019 from the New Hampshire Supreme Court, whereby the court denied Northern Pass' appeal and affirmed the NHSEC's denial of Northern Pass' siting application on NPT, Eversource concluded that construction of NPT was no longer probable and that there was no constructive path forward for the project. Eversource terminated the project and permanently abandoned any further development. As a result, substantially all of the capitalized project costs, which totaled \$318 million, certain of which are subject to cost reimbursement agreements, were impaired.

Based on the conclusion that the construction of Northern Pass was no longer probable, Eversource recorded an impairment charge in 2019 for all of the project costs associated with Northern Pass, which were primarily engineering design, siting, permitting and legal costs, along with appropriate allowances for funds used during construction, and recognized a receivable for certain cost reimbursement agreements. Additionally, Eversource recorded an impairment charge associated with the land acquired to construct Northern Pass in order to recognize the land at its estimated fair value based on assessed values and transaction costs. In total, this resulted in a pre-tax impairment charge of \$239.6 million within Operating Income on the statement of income for the year ended December 31, 2019, and was reflected in the Electric Transmission segment. The after-tax impact of the impairment charge was \$204.4 million, or \$0.64 per share, after giving effect to the estimated fair value of the related land, reimbursement agreements, and the impact of expected income tax benefits associated with the impairment charge. As a result of the decision to terminate the NPT project and permanently abandon any further development, Eversource does not expect any future cash expenditures associated with this project.

**Equity Method Investments:** Investments in affiliates where we have the ability to exercise significant influence, but not control, over an investee are initially recognized as an equity method investment at cost. Any differences between the cost of an investment and the amount of underlying equity in net assets of an investee are considered basis differences, and are determined based upon the estimated fair values of the investee's identifiable assets and liabilities. For our offshore wind equity method investment, basis differences are related to intangible assets for PPAs that will be amortized over the term of the PPAs, and equity method goodwill that are not amortized. Capitalized interest associated with our offshore wind equity method investment is included in the investment balance.

Equity method investments are assessed for impairment when conditions exist that indicate that the fair value of the investment is less than book value. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist and developing an estimate of undiscounted future cash flows.

Eversource recorded an other-than-temporary impairment of \$32.9 million within Other Income, Net on our statement of income in 2018, related to Access Northeast, an equity method investment. In September 2018, a series of non-Eversource natural gas explosions in eastern Massachusetts resulted in widespread property and system damage, personal injuries, and a fatality. Eversource identified the September 2018 natural gas series of explosions, compounded by the adverse legislative environment, as negative evidence that indicated potential impairment of our investment in Access Northeast. Our impairment assessment used a discounted cash flow approach, including consideration of the severity and duration of any decline in fair value of our investment in the project, and involved significant management judgment and estimation, including projections of the project's discounted cash flows and assumptions about exit price. In the third quarter of 2018, management determined that the future cash flows of the Access Northeast project were uncertain and could no longer be reasonably estimated and that the book value of our equity method investment was not recoverable. On April 1, 2019, pursuant to a provision in the partnership agreement jointly entered into by Eversource, Enbridge, Inc. and National Grid plc, through Algonquin Gas Transmission, LLC, the Access Northeast project was terminated.

*Income Taxes:* Income tax expense is estimated for each of the jurisdictions in which we operate and is recorded each quarter using an estimated annualized effective tax rate. This process to record income tax expense involves estimating current and deferred income tax expense or benefit and the impact of temporary differences resulting from differing treatment of items for financial reporting and income tax return reporting purposes. Such differences are the result of timing of the deduction for expenses, as well as any impact of permanent differences, non-tax deductible expenses, or other items that directly impact income tax expense as a result of regulatory activity (flow-through items). The temporary differences and flow-through items result in deferred tax assets and liabilities that are included in the balance sheets.

We also account for uncertainty in income taxes, which applies to all income tax positions previously filed in a tax return and income tax positions expected to be taken in a future tax return that have been reflected on our balance sheets. The determination of whether a tax position meets the recognition threshold under applicable accounting guidance is based on facts and circumstances available to us.

On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules and included numerous provisions that impacted corporations. In particular, the act reduced the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which are estimated to be approximately \$2.8 billion and are included in regulatory liabilities as of December 31, 2019. Eversource's regulated companies are in the process of, or will be, refunding the EDIT liabilities to customers based on orders issued by applicable state regulatory commissions. The refund of these regulatory liabilities to customers will generally be made over the same period as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities.

*Accounting for Environmental Reserves:* Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. Increases to estimates of environmental liabilities could have an adverse impact on earnings. We estimate these liabilities based on findings through various phases of the assessment, considering the most likely action plan from a variety of available remediation options (ranging from no action required to full site remediation and long-term monitoring), current site information from our site assessments, remediation estimates from third party engineering and remediation contractors, and our prior experience in remediating contaminated sites. If a most likely action plan cannot yet be determined, we estimate the liability based on the low end of a range of possible action plans. A significant portion of our environmental sites and reserve amounts relate to former MGP sites that were operated several decades ago and manufactured natural gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which we may have potential liability. Estimates are based on the expected remediation plan. Our estimates are subject to revision in future periods based on actual costs or new information from other sources, including the level of contamination at the site, the extent of our responsibility or the extent of remediation required, recently enacted laws and regulations or a change in cost estimates due to certain economic factors.

*Fair Value Measurements:* We follow fair value measurement guidance that defines fair value as the price that would be received for the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). We have applied this guidance to our Company's derivative contracts that are not elected or designated as "normal purchases or normal sales" (normal), to marketable securities held in trusts, and to our investments in our Pension and PBOP Plans. Fair value measurements are also incorporated into the accounting for goodwill, long-lived assets and AROs. We also applied this guidance in the valuation of our basis differences in our equity method offshore wind investments. The fair value measurement guidance was also applied in estimating the fair value of preferred stock, long-term debt and RRBs.

Changes in fair value of the derivative contracts are recorded as Regulatory Assets or Liabilities, as we recover the costs of these contracts in rates charged to customers. These valuations are sensitive to the prices of energy and energy-related products in future years for which markets have not yet developed and assumptions are made.

We use quoted market prices when available to determine the fair value of financial instruments. If quoted market prices are not available, fair value is determined using quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments that are not active and model-derived valuations. When quoted prices in active markets for the same or similar instruments are not available, we value derivative contracts using models that incorporate both observable and unobservable inputs. Significant unobservable inputs utilized in the models include energy and energy-related product prices for future years for long-dated derivative contracts and market volatilities. Discounted cash flow valuations incorporate estimates of premiums or discounts, reflecting risk-adjusted profit that would be required by a market participant to arrive at an exit price, using available historical market transaction information. Valuations of derivative contracts also reflect our estimates of nonperformance risk, including credit risk.

## Other Matters

**Accounting Standards:** For information regarding new accounting standards, see Note 1C, "Summary of Significant Accounting Policies - Accounting Standards," to the financial statements.

**Contractual Obligations and Commercial Commitments:** Information regarding our contractual obligations and commercial commitments as of December 31, 2019, is summarized annually through 2024 and thereafter as follows:

<b>Eversource</b> (Millions of Dollars)	2020	2021	2022	2023	2024	Thereafter	Total
Long-term debt maturities <sup>(a)</sup>	\$ 296.1	\$ 1,033.6	\$ 1,188.9	\$ 1,665.2	\$ 1,049.8	\$ 8,447.8	\$ 13,681.4
Rate reduction bond maturities	43.2	43.2	43.2	43.2	43.2	367.3	583.3
Estimated interest payments on existing debt <sup>(b)</sup>	511.5	493.4	458.4	425.5	384.1	4,020.3	6,293.2
Operating leases <sup>(c)</sup>	10.2	9.0	7.4	4.9	2.8	28.9	63.2
Finance leases <sup>(c)</sup>	3.4	2.9	1.5	0.8	0.8	13.1	22.5
Funding of pension obligations <sup>(d) (e)</sup>	105.0	—	—	—	—	—	105.0
Funding of PBOP obligations <sup>(d) (e)</sup>	2.9	—	—	—	—	—	2.9
Estimated future annual long-term contractual costs <sup>(f)</sup>	998.8	941.6	946.5	897.5	881.9	4,785.2	9,451.5
Total <sup>(g)</sup>	\$ 1,971.1	\$ 2,523.7	\$ 2,645.9	\$ 3,037.1	\$ 2,362.6	\$ 17,662.6	\$ 30,203.0

<b>CL&amp;P</b> (Millions of Dollars)	2020	2021	2022	2023	2024	Thereafter	Total
Long-term debt maturities <sup>(a)</sup>	\$ —	\$ —	\$ —	\$ 400.0	\$ 139.8	\$ 2,975.5	\$ 3,515.3
Estimated interest payments on existing debt <sup>(b)</sup>	153.2	153.2	153.2	148.2	143.2	2,016.2	2,767.2
Operating leases <sup>(c)</sup>	0.5	0.2	—	—	—	0.1	0.8
Finance leases <sup>(c)</sup>	2.0	1.5	—	—	—	—	3.5
Funding of pension obligations <sup>(d) (e)</sup>	23.2	—	—	—	—	—	23.2
Estimated future annual long-term contractual costs <sup>(f)</sup>	558.2	547.9	602.7	614.3	605.8	2,875.9	5,804.8
Total <sup>(g)</sup>	\$ 737.1	\$ 702.8	\$ 755.9	\$ 1,162.5	\$ 888.8	\$ 7,867.7	\$ 12,114.8

- (a) Long-term debt maturities exclude the CYAPC pre-1983 spent nuclear fuel obligation, net unamortized premiums, discounts and debt issuance costs, and other fair value adjustments.
- (b) Estimated interest payments on fixed-rate debt are calculated by multiplying the coupon rate on the debt by its scheduled notional amount outstanding for the period of measurement.
- (c) The operating and finance lease obligations include interest.
- (d) Amounts are not included on our balance sheets.
- (e) These amounts represent expected pension and PBOP contributions for 2020. Future contributions will vary depending on many factors, including the performance of existing plan assets, valuation of the plans' liabilities and long-term discount rates.
- (f) Other than certain derivative contracts held by the regulated companies, these obligations are not included on our balance sheets.
- (g) Does not include other long-term liabilities recorded on our balance sheet, such as environmental reserves, employee medical insurance, workers compensation and long-term disability insurance reserves, ARO liability reserves and other reserves, as we cannot make reasonable estimates of the timing of payments. Also, does not include amounts not included on our balance sheets for future funding of Eversource's equity method investments, as we cannot make reasonable estimates of the periods or the investment contributions.

For further information regarding our contractual obligations and commercial commitments, see Note 7, "Asset Retirement Obligations," Note 8, "Short-Term Debt," Note 9, "Long-Term Debt," Note 10, "Rate Reduction Bonds and Variable Interest Entities," Note 11A, "Employee Benefits - Pension Benefits and Postretirement Benefits Other Than Pension," Note 13, "Commitments and Contingencies," and Note 15, "Leases," to the financial statements.

## RESULTS OF OPERATIONS – EVERSOURCE ENERGY AND SUBSIDIARIES

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for Eversource for the years ended December 31, 2019 and 2018 included in this Annual Report on Form 10-K:

(Millions of Dollars)	For the Years Ended December 31,		
	2019	2018	Increase/(Decrease)
Operating Revenues	\$ 8,526.5	\$ 8,448.2	\$ 78.3
Operating Expenses:			
Purchased Power, Fuel and Transmission	3,040.2	3,139.0	(98.8)
Operations and Maintenance	1,363.1	1,335.2	27.9
Depreciation	885.3	819.9	65.4
Amortization	195.4	252.0	(56.6)
Energy Efficiency Programs	501.4	472.4	29.0
Taxes Other Than Income Taxes	711.0	729.8	(18.8)
Impairment of Northern Pass Transmission	239.6	—	239.6
Total Operating Expenses	6,936.0	6,748.3	187.7
Operating Income	1,590.5	1,699.9	(109.4)
Interest Expense	533.2	498.8	34.4
Other Income, Net	132.8	128.4	4.4
Income Before Income Tax Expense	1,190.1	1,329.5	(139.4)
Income Tax Expense	273.5	289.0	(15.5)
Net Income	916.6	1,040.5	(123.9)
Net Income Attributable to Noncontrolling Interests	7.5	7.5	—
Net Income Attributable to Common Shareholders	\$ 909.1	\$ 1,033.0	\$ (123.9)

### Operating Revenues

**Sales Volumes:** A summary of our retail electric GWh sales volumes, our firm natural gas MMcf sales volumes, and our water MG sales volumes, and percentage changes, is as follows:

	Electric			Firm Natural Gas			Water		
	Sales Volumes (GWh)		Percentage Decrease	Sales Volumes (MMcf)		Percentage Increase	Sales Volumes (MG)		Percentage Decrease
	2019	2018 <sup>(1)</sup>		2019	2018 <sup>(2)</sup>		2019	2018	
Traditional	7,685	7,915	(2.9)%	—	—	—%	2,161	2,252	(4.0)%
Decoupled and Special Contracts <sup>(3)</sup>	43,934	45,466	(3.4)%	107,806	105,957	1.7%	21,370	21,479	(0.5)%
Total Sales Volumes	51,619	53,381	(3.3)%	107,806	105,957	1.7%	23,531	23,731	(0.8)%

<sup>(1)</sup> Effective February 1, 2018, NSTAR Electric operated entirely under a decoupled rate structure. The 2018 sales volumes for NSTAR Electric have been recast to present January 2018 as decoupled to conform to the current year presentation.

<sup>(2)</sup> Effective November 15, 2018, Yankee Gas operated under a decoupled rate structure. The 2018 sales volumes for Yankee Gas have been recast to present 2018 as decoupled to conform to the current year presentation.

<sup>(3)</sup> Special contracts are unique to Yankee Gas natural gas distribution customers who take service under such an arrangement and generally specify the amount of distribution revenue to be paid to Yankee Gas regardless of the customers' usage.

Weather, fluctuations in energy supply costs, conservation measures (including utility-sponsored energy efficiency programs), and economic conditions affect customer energy usage and water consumption. Industrial sales volumes are less sensitive to temperature variations than residential and commercial sales volumes. In our service territories, weather impacts both electric and water sales volumes during the summer and both electric and natural gas sales volumes during the winter; however, natural gas sales volumes are more sensitive to temperature variations than electric sales volumes. Customer heating or cooling usage may not directly correlate with historical levels or with the level of degree-days that occur.

Fluctuations in retail electric sales volumes at PSNH impact earnings ("Traditional" in the table above). For CL&P, NSTAR Electric, Yankee Gas, and NSTAR Gas, fluctuations in retail sales volumes do not impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms ("Decoupled" in the table above). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized. Fluctuations in water sales volumes largely do not impact earnings as our Connecticut water distribution business is also decoupled.

**Operating Revenues:** Operating Revenues by segment increased/(decreased) in 2019, as compared to 2018, as follows:

<i>(Millions of Dollars)</i>	<b>Increase/(Decrease)</b>	
Electric Distribution	\$	19.3
Natural Gas Distribution		40.0
Electric Transmission		102.7
Water Distribution		2.6
Other		92.2
Eliminations		(178.5)
<b>Total Operating Revenues</b>	<b>\$</b>	<b>78.3</b>

*Electric and Natural Gas Distribution Revenues:*

**Base Distribution Revenues:**

- Base electric distribution revenues increased \$107.7 million in 2019, as compared to 2018, due primarily to the impact of CL&P's base distribution rate increases effective May 1, 2019 and May 1, 2018, which include recovery of storm costs and certain other items that do not impact earnings, an NSTAR Electric base distribution rate increase effective January 1, 2019, and a PSNH temporary base distribution rate increase effective July 1, 2019.
- Base natural gas distribution revenues increased \$7.6 million in 2019, as compared to 2018, due primarily to the impact of the Yankee Gas base distribution rate increase effective November 15, 2018.

**Tracked Distribution Revenues:** Tracked distribution revenues consist of certain costs that are recovered from customers in retail rates through regulatory commission-approved cost tracking mechanisms and therefore, recovery of these costs has no impact on earnings. Costs recovered through cost tracking mechanisms include, among others, energy supply and natural gas supply procurement and other energy-related costs, and electric retail transmission charges, which decreased significantly due primarily to the lower federal corporate income tax rate that was reflected effective January 1, 2019. In addition, cost tracking mechanisms include energy efficiency program costs, electric restructuring and stranded cost recovery revenues (including securitized RRB charges), and additionally for NSTAR Electric, pension and PBOP benefits and net metering for distributed generation. Tracked revenues also include wholesale market sales transactions, such as sales of energy and energy-related products into the ISO-NE wholesale electricity market and the sale of RECs to various counterparties. However, tracked revenues do include certain incentives earned, return on rate base, and carrying charges that are billed in rates to customers, which do impact earnings.

Tracked distribution revenues increased/(decreased) in 2019, as compared to 2018, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>Electric Distribution</b>	<b>Natural Gas Distribution</b>
Retail Tariff Tracked Revenues		
Energy supply procurement	\$ —	\$ 24.2
Retail transmission <sup>(1)</sup>	(123.3)	N/A
Other distribution tracking mechanisms	18.7	13.8
Wholesale Market Sales Revenue	36.2	(2.1)

<sup>(1)</sup> The decrease reflects a decrease in the retail transmission rate billed to customers that was adjusted on January 1, 2019 to reflect the lower federal corporate income tax rate.

**Electric Transmission Revenues:** Electric transmission revenues increased \$102.7 million in 2019, as compared to 2018, due primarily to continued investment in our transmission infrastructure and a higher recovery of tracked costs.

**Other Revenues and Eliminations:** Other revenues primarily include the revenues of Eversource's service company, most of which are eliminated in consolidation. Eliminations are also primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business.

**Purchased Power, Fuel and Transmission** expense includes costs associated with purchasing electricity and natural gas on behalf of our customers. These electric and natural gas supply costs are recovered from customers in rates through commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Purchased Power, Fuel and Transmission expense increased/(decreased) in 2019, as compared to 2018, due primarily to the following:

<i>(Millions of Dollars)</i>	<b>Increase/(Decrease)</b>	
Electric Distribution	\$	88.1
Natural Gas Distribution		21.8
Transmission		(124.4)
Eliminations		(84.3)
<b>Total Purchased Power, Fuel and Transmission</b>	<b>\$</b>	<b>(98.8)</b>

The increase in purchased power expense at the electric distribution business in 2019 as compared to 2018, was driven primarily by a new zero-carbon power purchase agreement entered into in 2019, as required by regulation in Connecticut, from which the energy purchased from Millstone Nuclear Power Station is sold into the market. Additionally, as a result of the sale of PSNH's thermal generation assets on January 10, 2018, and the sale of PSNH's hydroelectric assets on August 26, 2018, PSNH purchased power in place of its self-generation output. The increase in natural gas supply costs at our natural gas distribution business was due primarily to higher average sales volumes.

The decrease in transmission costs in 2019, as compared to 2018, was primarily the result of a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers, and a decrease in costs billed by ISO-NE that support regional grid investments. The retail transmission rate was adjusted on January 1, 2019 to reflect the lower federal corporate income tax rate, resulting in a decrease in the cost of retail transmission service. This was partially offset by an increase in Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base electric, natural gas and water distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense increased/(decreased) in 2019, as compared to 2018, due primarily to the following:

<i>(Millions of Dollars)</i>	<u>Increase/(Decrease)</u>
<b>Base Electric Distribution (Non-Tracked Costs):</b>	
Employee-related expenses, including labor and benefits	\$ (27.6)
Storm restoration costs	8.8
Shared corporate costs (including computer software depreciation at Eversource Service)	22.3
Operations-related expenses, including vegetation management, vehicles, and outside services	14.6
Other non-tracked operations and maintenance	<u>(2.9)</u>
Total Base Electric Distribution (Non-Tracked Costs)	15.2
Base Natural Gas Distribution (Non-Tracked Costs) - Increase due primarily to higher shared corporate costs of \$10.8 million	16.6
Water Distribution	0.1
Tracked Costs (Electric Distribution, Electric Transmission and Natural Gas Distribution) - Increase due to higher transmission and vegetation management expenses, partially offset by the absence in 2019 of PSNH generation operations expenses due to the sale of its generation assets in 2018, and a decrease in employee-related benefit costs	29.2
Other and eliminations:	
Eversource Parent and Other Companies - other operations and maintenance	59.8
Eliminations	<u>(93.0)</u>
Total Operations and Maintenance	<u>\$ 27.9</u>

**Depreciation** expense increased in 2019, as compared to 2018, due primarily to higher utility plant in service balances and new depreciation rates effective with the CL&P distribution rate case settlement agreement.

**Amortization** expense includes the deferral of energy supply and energy-related costs included in certain regulatory commission-approved cost tracking mechanisms, and the amortization of certain costs. This deferral adjusts expense to match the corresponding revenues. Energy supply and energy-related costs are recovered from customers in rates and have no impact on earnings. Amortization decreased in 2019, as compared to 2018, due primarily to the deferral of energy supply and energy-related costs at CL&P and PSNH, partially offset by an increase in storm cost recovery at CL&P, NSTAR Electric and PSNH, and by increased amortization of PSNH's securitized regulatory asset related to the May 2018 RRB issuance of \$15.7 million.

**Energy Efficiency Programs** expense increased in 2019, as compared to 2018, due primarily to an increase in spending for CL&P's and PSNH's energy efficiency programs. The costs for the majority of the state energy policy initiatives and expanded energy efficiency programs are recovered from customers in rates and have no impact on earnings. CL&P, NSTAR Electric and PSNH energy efficiency programs will include additional authorized spending totaling approximately \$60 million in 2020, as compared to 2019.

**Taxes Other Than Income Taxes** expense decreased in 2019, as compared to 2018, due primarily to a decrease of \$25.4 million related to CL&P's remittance of energy efficiency funds to the State of Connecticut. Energy efficiency funds collected from CL&P's customers after July 1, 2019 are no longer subject to remittance to the State of Connecticut. The decrease is also due to amounts received by PSNH in the third quarter of 2019 relating to a refund of property taxes as a result of a settlement with the town of Bow, New Hampshire (\$8.3 million).

**Impairment of Northern Pass Transmission** reflects an impairment charge of \$239.6 million that was recorded in the second quarter of 2019 as a result of the July 19, 2019 New Hampshire Supreme Court decision. The after-tax impact of this impairment charge was \$204.4 million.

**Interest Expense** increased in 2019, as compared to 2018, due primarily to an increase in interest on long-term debt as a result of new debt issuances (\$38.9 million), an increase in interest due to the May 2018 PSNH RRB issuance (\$6.7 million) and an increase in interest on notes payable (\$4.1 million). Partially offsetting these increases were an increase in AFUDC related to debt funds (\$5.9 million) and higher other capitalized interest (\$17.0 million).

**Other Income, Net** increased in 2019, as compared to 2018, due primarily to an increase in equity in earnings of unconsolidated affiliates related to Eversource's equity method investments, net of impairment (\$38.4 million) and investment income in 2019 compared to investment losses in 2018 (\$4.8 million). In 2018, Eversource recognized a \$32.9 million other-than-temporary impairment charge to our equity method investment in the Access Northeast project, which was reflected as a loss within equity in earnings. Partially offsetting these increases were a decrease related to pension, SERP and PBOP non-service income components (\$29.5 million), lower gains on sales of property (\$4.8 million), and a decrease in the recognition of the equity component of the carrying charges related to storm costs recorded in interest income at PSNH (\$2.4 million).

**Income Tax Expense** decreased in 2019, as compared to 2018, due primarily to amortization of EDIT (\$32.4 million), by the impairment of NPT in 2019, compared to the write-off of Access Northeast in 2018 (\$37.8 million), partially offset by higher pre-tax earnings (\$15.0 million), by items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$8.4 million), an increase in valuation allowance against state tax credits (\$13.3 million), and due to the offset of one-time items relating to federal tax reform and release of tax reserve in 2018 (\$18.0 million) that did not occur in 2019. The impact of the amortization of the EDIT regulatory liability, including the tax gross up portion, that reduced revenue was \$51.5 million, offset by current tax benefits of \$14.1 million and amortization of EDIT of \$37.4 million, for the year ended December 31, 2019, which results in no impact on earnings.

**Results of Operations for the years ended December 31, 2019 and 2018 for each of CL&P, NSTAR Electric and PSNH have been omitted from this report but are set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).**

## **Item 7A. Quantitative and Qualitative Disclosures about Market Risk**

### **Market Risk Information**

*Commodity Price Risk Management:* Our regulated companies enter into energy contracts to serve our customers, and the economic impacts of those contracts are passed on to our customers. Accordingly, the regulated companies have no exposure to loss of future earnings or fair values due to these market risk-sensitive instruments. Eversource's Energy Supply Risk Committee, comprised of senior officers, reviews and approves all large-scale energy related transactions entered into by its regulated companies.

### **Other Risk Management Activities**

We have an Enterprise Risk Management (ERM) program for identifying the principal risks of the Company. Our ERM program involves the application of a well-defined, enterprise-wide methodology designed to allow our Risk Committee, comprised of our senior officers of the Company, to identify, categorize, prioritize, and mitigate the principal risks to the Company. The ERM program is integrated with other assurance functions throughout the Company including Compliance, Auditing, and Insurance to ensure appropriate coverage of risks that could impact the Company. In addition to known risks, ERM identifies emerging risks to the Company, through participation in industry groups, discussions with management and in consultation with outside advisers. Our management then analyzes risks to determine materiality, likelihood and impact, and develops mitigation strategies. Management broadly considers our business model, the utility industry, the global economy, climate change, sustainability and the current environment to identify risks. The Finance Committee of the Board of Trustees is responsible for oversight of the Company's ERM program and enterprise-wide risks as well as specific risks associated with insurance, credit, financing, investments, pensions and overall system security including cyber security. The findings of the ERM process are periodically discussed with the Finance Committee of our Board of Trustees, as well as with other Board Committees or the full Board of Trustees, as appropriate, including reporting on how these issues are being measured and managed. However, there can be no assurances that the ERM process will identify or manage every risk or event that could impact our financial position, results of operations or cash flows.

*Interest Rate Risk Management:* We manage our interest rate risk exposure in accordance with our written policies and procedures by maintaining a mix of fixed and variable rate long-term debt. As of December 31, 2019, all of our long-term debt except for \$11.6 million of fees and interest due for CYAPC's spent nuclear fuel disposal costs, was at a fixed interest rate.

*Credit Risk Management:* Credit risk relates to the risk of loss that we would incur as a result of non-performance by counterparties pursuant to the terms of our contractual obligations. We serve a wide variety of customers and transact with suppliers that include IPPs, industrial companies, natural gas and electric utilities, oil and natural gas producers, financial institutions, and other energy marketers. Margin accounts exist within this diverse group, and we realize interest receipts and payments related to balances outstanding in these margin accounts. This wide customer and supplier mix generates a need for a variety of contractual structures, products and terms that, in turn, require us to manage the portfolio of market risk inherent in those transactions in a manner consistent with the parameters established by our risk management process.

Our regulated companies are subject to credit risk from certain long-term or high-volume supply contracts with energy marketing companies. Our regulated companies manage the credit risk with these counterparties in accordance with established credit risk practices and monitor contracting risks, including credit risk. As of December 31, 2019, our regulated companies held collateral (letters of credit or cash) of \$20.0 million from counterparties related to our standard service contracts. As of December 31, 2019, Eversource had \$19.3 million of cash posted with ISO-NE related to energy transactions.

For further information on cash collateral deposited and posted with counterparties, see Note 10, "Summary of Significant Accounting Policies - Supplemental Cash Flow Information," to the financial statements.

If the respective unsecured debt ratings of Eversource or its subsidiaries were reduced to below investment grade by either Moody's or S&P, certain of Eversource's contracts would require additional collateral in the form of cash to be provided to counterparties and independent system operators. Eversource would have been and remains able to provide that collateral.

Eversource

Company Report on Internal Controls Over Financial Reporting  
Reports of Independent Registered Public Accounting Firm  
Consolidated Financial Statements

### **Company Report on Internal Controls Over Financial Reporting**

#### **Eversource Energy**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of Eversource Energy and subsidiaries (Eversource or the Company) and of other sections of this annual report. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, Eversource conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2019.

February 26, 2020

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Trustees of Eversource Energy

### Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Eversource Energy and subsidiaries (the “Company”) as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2019, of the Company and our report dated February 26, 2020, expressed an unqualified opinion on those financial statements.

### Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Company Report on Internal Controls Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

### Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of Eversource Energy:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Eversource Energy and subsidiaries (the “Company”) as of December 31, 2019 and 2018, the related consolidated statements of income, comprehensive income, common shareholders’ equity, and cash flows, for each of the three years in the period ended December 31, 2019, and the related notes and the schedules listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 26, 2020, expressed an unqualified opinion on the Company’s internal control over financial reporting.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

#### ***Regulatory Accounting - Impact of Rate Regulation on the Financial Statements - Refer to Note 2 to the Financial Statements***

##### *Critical Audit Matter Description*

The Company’s utility companies are subject to rate regulation by one or more of the Federal Energy Regulatory Commission and the Connecticut, Massachusetts, and New Hampshire state public utility authorities (the “Commissions”) that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies’ financial statements reflect the effects of the rate-making process. The rates charged to the customers of the Company’s regulated companies are designed to collect each company’s cost to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, the Company records regulatory assets before approval for recovery has been received from the applicable regulatory commission. The Company must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. The Company bases its conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

The Company uses judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on the financial statements. Management believes it is probable that each of the regulated companies will recover its respective investment in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to any of the regulated companies’ operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Accounting for the economics of rate-regulation impacts multiple financial statement line items and disclosures, such as regulated property, plant, and equipment, regulatory assets and liabilities, operating revenues and depreciation expense. While management has indicated it expects to recover costs from customers through regulated rates, there is a risk that the Commissions will not approve full recovery of such costs or full recovery of all amounts invested in the utility business and a reasonable return on that investment. We identified the impact of rate-regulation as a critical audit matter due to the significant judgments made by management to support its assertions about impact of future regulatory orders on the financial statements. Management judgments include assessing the probability of recovery in future rates of incurred costs and a refund to customers. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these judgments requires specialized knowledge of accounting for rate regulation and the rate setting process due to its inherent complexities.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates, a refund, or a future reduction in rates.

We evaluated the Company's disclosures related to the applicability and impacts of rate regulation, including the balances recorded and regulatory developments disclosed in the financial statements.

We read relevant regulatory orders issued by the Commissions for the Company and other public utilities in Connecticut, Massachusetts, and New Hampshire, regulatory statutes, interpretations, procedural memorandums, filings made by intervenors, and other publicly available information to assess the likelihood of recovery in future rates or of a future refund or reduction in rates based on precedence of the Commissions' treatment of similar costs under similar circumstances. We evaluated the external information and compared it to management's recorded regulatory asset and liability balances for completeness.

For regulatory matters in process, we inspected the Company's filings with the Commissions and the filings with the Commissions by intervenors that may impact the Company's future rates, for any evidence that might contradict management's assertions.

We obtained the regulatory orders and analysis from management that support the probability of recovery, refund, or future reductions in rates for regulatory assets and liabilities to assess management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

**COMBINED NOTES TO FINANCIAL STATEMENTS**

Refer to the Glossary of Terms included in this combined Annual Report on Form 10-K for abbreviations and acronyms used throughout the combined notes to the financial statements.

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. About Eversource, CL&P, NSTAR Electric and PSNH**

Eversource Energy is a public utility holding company primarily engaged, through its wholly-owned regulated utility subsidiaries, in the energy delivery business. Eversource Energy's wholly-owned regulated utility subsidiaries consist of CL&P, NSTAR Electric and PSNH (electric utilities), Yankee Gas and NSTAR Gas (natural gas utilities) and Aquarion (water utilities). Eversource provides energy delivery and/or water service to approximately four million electric, natural gas and water customers through eight regulated utilities in Connecticut, Massachusetts and New Hampshire.

Eversource, CL&P, NSTAR Electric and PSNH are reporting companies under the Securities Exchange Act of 1934. Eversource Energy is a public utility holding company under the Public Utility Holding Company Act of 2005. Arrangements among the regulated electric companies and other Eversource companies, outside agencies and other utilities covering interconnections, interchange of electric power and sales of utility property are subject to regulation by the FERC. Eversource's regulated companies are subject to regulation of rates, accounting and other matters by the FERC and/or applicable state regulatory commissions (the PURA for CL&P, Yankee Gas and Aquarion, the DPU for NSTAR Electric, NSTAR Gas and Aquarion, and the NHPUC for PSNH and Aquarion).

CL&P, NSTAR Electric and PSNH furnish franchised retail electric service in Connecticut, Massachusetts and New Hampshire. Yankee Gas and NSTAR Gas are engaged in the distribution and sale of natural gas to customers within Connecticut and Massachusetts, respectively. Aquarion is engaged in the collection, treatment and distribution of water in Connecticut, Massachusetts and New Hampshire. CL&P, NSTAR Electric and PSNH's results include the operations of their respective distribution and transmission businesses. The distribution business also includes the results of NSTAR Electric's solar power facilities and PSNH's generation facilities prior to sale in 2018. PSNH completed the sales of all its thermal and hydroelectric generation assets in 2018. See Note 14, "Generation Asset Sale," for further information.

Eversource Service, Eversource's service company, and several wholly-owned real estate subsidiaries of Eversource, provide support services to Eversource, including its regulated companies.

**B. Basis of Presentation**

The consolidated financial statements of Eversource, NSTAR Electric and PSNH include the accounts of each of their respective subsidiaries. Intercompany transactions have been eliminated in consolidation. The accompanying consolidated financial statements of Eversource, NSTAR Electric and PSNH and the financial statements of CL&P are herein collectively referred to as the "financial statements."

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Eversource consolidates the operations of CYAPC and YAEC, both of which are inactive regional nuclear generation companies engaged in the long-term storage of their spent nuclear fuel. Eversource consolidates CYAPC and YAEC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in each of these entities is greater than 50 percent. Intercompany transactions between CL&P, NSTAR Electric, PSNH and the CYAPC and YAEC companies have been eliminated in consolidation of the Eversource financial statements.

Eversource's consolidated financial information includes the results of Aquarion and its subsidiaries beginning from the date of the acquisition on December 4, 2017.

Eversource holds several equity ownership interests that are not consolidated and are accounted for under the equity method.

In accordance with accounting guidance on noncontrolling interests in consolidated financial statements, the Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric, which are not owned by Eversource or its consolidated subsidiaries and are not subject to mandatory redemption, have been presented as noncontrolling interests in the financial statements of Eversource. The Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric are considered to be temporary equity and have been classified between liabilities and permanent shareholders' equity on the balance sheets of Eversource, CL&P and NSTAR Electric due to a provision in the preferred stock agreements of both CL&P and NSTAR Electric that grant preferred stockholders the right to elect a majority of the CL&P and NSTAR Electric Boards of Directors, respectively, should certain conditions exist, such as if preferred dividends are in arrears for a specified amount of time. The Net Income reported in the statements of income and cash flows represents net income prior to apportionment to noncontrolling interests, which is represented by dividends on preferred stock of CL&P and NSTAR Electric.

Eversource's utility subsidiaries' electric, natural gas and water distribution and transmission businesses are subject to rate-regulation that is based on cost recovery and meets the criteria for application of accounting guidance for entities with rate-regulated operations, which considers the effect

of regulation on the differences in the timing of the recognition of certain revenues and expenses from those of other businesses and industries. See Note 2, "Regulatory Accounting," for further information.

Certain reclassifications of prior year data were made in the accompanying financial statements to conform to the current year presentation.

The Eversource and PSNH 2018 statements of cash flows, the 2018 supplemental cash flow information footnote, and the 2018 segment footnote were revised to correct an error in the presentation of non-cash capital additions. The impact of this revision on the statement of cash flows is an increase to operating cash inflows in Accounts Payable of \$46.6 million and a corresponding increase to investing cash outflows in Investments in Property, Plant and Equipment for the year ended December 31, 2018. This revision is not deemed material, individually or in the aggregate, to the previously issued financial statements.

As of both December 31, 2019 and 2018, Eversource's carrying amount of goodwill was \$4.43 billion. Eversource performs an assessment for possible impairment of its goodwill at least annually. Eversource completed its annual goodwill impairment test for each of its reporting units as of October 1, 2019 and determined that no impairment exists. See Note 25B, "Acquisition of Aquarion and Goodwill - Goodwill," for further information.

### **C. Accounting Standards**

*Accounting Standards Issued but Not Yet Effective:* In June 2016, the FASB issued Accounting Standards Update ("ASU") 2016-13, *Financial Instruments - Credit Losses (Topic 326)*, which provides a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. Under the new guidance, immediate recognition of credit losses expected over the life of a financial instrument is required. The standard is effective January 1, 2020. The Company assessed the impacts of this standard on the accounting for credit losses on its financial instruments, including accounts receivable, and does not expect a material impact on the financial statements of Eversource, CL&P, NSTAR Electric or PSNH.

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740) - Simplifying the Accounting for Income Taxes*, which eliminates certain exceptions to the general principles of current income tax guidance in ASC 740, Income Taxes, and simplifies and improves consistency in application of that income tax guidance through clarifications of, and amendments to, ASC 740. The guidance is effective in the first quarter of 2021. The Company is evaluating the impact of this standard on the financial statements of Eversource, CL&P, NSTAR Electric and PSNH.

*Accounting Standards Recently Adopted:* On January 1, 2019, the Company adopted ASU 2016-02, *Leases (Topic 842)*, which amended existing lease accounting guidance. The Company applied the Topic 842 lease criteria to new leases and lease renewals entered into effective on or after January 1, 2019. The ASU required balance sheet recognition of leases deemed to be operating leases as well as additional disclosure requirements. The recognition, measurement and presentation of expenses and cash flows were not significantly changed.

The Company utilized the modified retrospective transition method allowed in ASU 2018-11, *Leases (Topic 842) - Targeted Improvements*, which allowed the Company to adopt the new leases standard as of January 1, 2019, with prior periods presented in the financial statements continuing to follow existing lease accounting guidance under Topic 840 (Leases) in the accounting literature. Implementation of ASU 2018-11 had no effect on retained earnings, and the requirements of the new lease standard (Topic 842) are reflected in the 2019 financial statements and footnotes.

The Company elected the practical expedient package whereby it did not need to reassess whether or not an existing contract is or contains a lease or whether a lease is an operating or capital lease, and it did not need to reassess initial direct costs for leases. Election of this practical expedient allowed us to carry forward our historical lease classifications. The Company elected the practical expedient to not reevaluate land easements existing at adoption if they were not previously accounted for as leases. The Company also elected to use the discount rate as of the January 1, 2019 implementation date to discount its operating lease liabilities. The Company did not elect the hindsight practical expedient to determine the lease term for existing leases.

The Company determined the impact the ASUs had on its financial statements by reviewing its lease population and identifying lease data needed for the disclosure requirements. The Company implemented a new lease accounting system in 2019 to ensure ongoing compliance with the ASU's requirements. Adoption of the new standard resulted in the recording of operating lease liabilities and right-of-use assets on the balance sheet upon transition at January 1, 2019 of \$58.0 million at Eversource, \$25.3 million at NSTAR Electric, \$0.6 million at CL&P, and \$0.6 million at PSNH. Implementation of the new guidance did not have an impact on each company's results of operations or cash flows.

### **D. Impairment of Northern Pass Transmission**

Northern Pass was Eversource's planned 1,090 MW HVDC transmission line that would have interconnected from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire. As a result of a final decision received on July 19, 2019 from the New Hampshire Supreme Court, whereby the court denied Northern Pass' appeal and affirmed the NHSEC's denial of Northern Pass' siting application on NPT, Eversource concluded that construction of NPT was no longer probable and that there was no constructive path forward for the project. Eversource terminated the project and permanently abandoned any further development. As a result, substantially all of the capitalized project costs, which totaled \$318 million, certain of which are subject to cost reimbursement agreements, were impaired.

Based on the conclusion that the construction of Northern Pass was no longer probable, Eversource recorded an impairment charge in 2019 for all of the project costs associated with Northern Pass, which were primarily engineering design, siting, permitting and legal costs, along with appropriate allowances for funds used during construction, and recognized a receivable for certain cost reimbursement agreements. Additionally, Eversource recorded an impairment charge associated with the land acquired to construct Northern Pass in order to recognize the land at its estimated fair value based on assessed values and transaction costs. In total, this resulted in a pre-tax impairment charge of \$239.6 million within Operating Income on the statement of income for the year ended December 31, 2019, and was reflected in the Electric Transmission segment. The after-tax impact of the impairment charge was \$204.4 million, or \$0.64 per share, after giving effect to the estimated fair value of the related land,

reimbursement agreements, and the impact of expected income tax benefits associated with the impairment charge. As a result of the decision to terminate the NPT project and permanently abandon any further development, Eversource does not expect any future cash expenditures associated with this project.

#### E. Cash

Cash includes cash on hand. At the end of each reporting period, any overdraft amounts are reclassified from Cash to Accounts Payable on the balance sheets.

#### F. Provision for Uncollectible Accounts

Eversource, including CL&P, NSTAR Electric and PSNH, presents its receivables at estimated net realizable value by maintaining a provision for uncollectible accounts. This provision is determined based upon a variety of judgments and factors, including the application of an estimated uncollectible percentage to each receivable aging category. The estimate is based upon historical collection and write-off experience and management's assessment of collectability from customers. Management continuously assesses the collectability of receivables and adjusts collectability estimates based on actual experience. Receivable balances are written off against the provision for uncollectible accounts when the customer accounts are terminated and these balances are deemed to be uncollectible.

The PURA allows CL&P and Yankee Gas to accelerate the recovery of accounts receivable balances attributable to qualified customers under financial or medical duress (uncollectible hardship accounts receivable) outstanding for greater than 180 days and 90 days, respectively. The DPU allows NSTAR Electric and NSTAR Gas to recover in rates, amounts associated with certain uncollectible hardship accounts receivable. These uncollectible hardship customer account balances are included in Regulatory Assets or Other Long-Term Assets on the balance sheets.

The total provision for uncollectible accounts is included in Receivables, Net on the balance sheets. The provision for uncollectible hardship accounts is included in the total uncollectible provision balance. The provision balances were as follows:

<i>(Millions of Dollars)</i>	<u>Total Provision for Uncollectible Accounts</u>		<u>Provision for Uncollectible Hardship Accounts</u>	
	<u>As of December 31,</u>		<u>As of December 31,</u>	
	<u>2019</u>	<u>2018</u>	<u>2019</u>	<u>2018</u>
Eversource	\$ 224.8	\$ 212.7	\$ 143.3	\$ 131.5
CL&P	97.3	88.0	80.1	71.9
NSTAR Electric	75.4	74.5	43.9	42.5
PSNH	10.5	11.1	—	—

Uncollectible expense associated with customers' accounts receivable included in Operations and Maintenance expense on the statements of income was as follows:

<i>(Millions of Dollars)</i>	<u>For the Years Ended December 31,</u>		
	<u>2019</u>	<u>2018</u>	<u>2017</u>
Eversource	\$ 63.4	\$ 61.3	\$ 44.5
CL&P	15.9	15.8	5.3
NSTAR Electric	25.1	22.3	21.3
PSNH	6.7	6.4	6.7

#### G. Transfer of Energy Efficiency Loans

In 2018, CL&P transferred \$41.3 million of its energy efficiency customer loan portfolio to two outside lenders in order to make additional loans to customers. CL&P remains the servicer of the loans and will transmit customer payments to the lenders. Under a three-year agreement with the lenders, additional energy efficiency loans will also be transferred with a maximum amount outstanding under this program of \$55 million. The transaction did not qualify as a sale for accounting purposes, and the amounts of the loans are included in Accounts Receivable, Net and Other Long-Term Assets, and are offset by Other Current Liabilities and Other Long-Term Liabilities on CL&P's balance sheet. The current and long-term portions totaled \$16.5 million and \$18.2 million, respectively, as of December 31, 2019, and \$18.5 million and \$22.8 million, respectively, as of December 31, 2018.

#### H. Fuel, Materials, Supplies and REC Inventory

Fuel, Materials, Supplies and REC Inventory include natural gas inventory, materials and supplies purchased primarily for construction or operation and maintenance purposes, and RECs. Inventory is valued at the lower of cost or net realizable value. RECs are purchased from suppliers of renewable sources of generation and are used to meet state mandated Renewable Portfolio Standards requirements. The carrying amounts of fuel, materials and supplies, and RECs, which are included in Current Assets on the balance sheets, were as follows:

<i>(Millions of Dollars)</i>	<u>As of December 31,</u>							
	<u>2019</u>				<u>2018</u>			
	<u>Eversource</u>	<u>CL&amp;P</u>	<u>NSTAR Electric</u>	<u>PSNH</u>	<u>Eversource</u>	<u>CL&amp;P</u>	<u>NSTAR Electric</u>	<u>PSNH</u>
Fuel	\$ 26.7	\$ —	\$ —	\$ —	\$ 33.1	\$ —	\$ —	\$ —
Materials and Supplies	132.9	50.7	54.7	18.5	126.1	44.5	48.6	24.3
RECs	75.9	—	69.4	6.5	78.8	—	65.6	13.2
Total	\$ 235.5	\$ 50.7	\$ 124.1	\$ 25.0	\$ 238.0	\$ 44.5	\$ 114.2	\$ 37.5

## I. Fair Value Measurements

Fair value measurement guidance is applied to derivative contracts that are not elected or designated as "normal purchases" or "normal sales" (normal) and to the marketable securities held in trusts. Fair value measurement guidance is also applied to valuations of the investments used to calculate the funded status of pension and PBOP plans, the nonrecurring fair value measurements of nonfinancial assets such as goodwill, long-lived assets and AROs. We also applied this guidance in the valuation of our basis differences in our equity method offshore wind investments (see Note 6, "Investments in Unconsolidated Affiliates," for further information). The fair value measurement guidance was also applied in estimating the fair value of preferred stock, long-term debt and RRBs.

*Fair Value Hierarchy:* In measuring fair value, Eversource uses observable market data when available in order to minimize the use of unobservable inputs. Inputs used in fair value measurements are categorized into three fair value hierarchy levels for disclosure purposes. The entire fair value measurement is categorized based on the lowest level of input that is significant to the fair value measurement. Eversource evaluates the classification of assets and liabilities measured at fair value on a quarterly basis, and Eversource's policy is to recognize transfers between levels of the fair value hierarchy as of the end of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Inputs are quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs are observable.

Level 3 - Quoted market prices are not available. Fair value is derived from valuation techniques in which one or more significant inputs or assumptions are unobservable. Where possible, valuation techniques incorporate observable market inputs that can be validated to external sources such as industry exchanges, including prices of energy and energy-related products.

Uncategorized - Investments that are measured at net asset value are not categorized within the fair value hierarchy.

*Determination of Fair Value:* The valuation techniques and inputs used in Eversource's fair value measurements are described in Note 4, "Derivative Instruments," Note 5, "Marketable Securities," Note 6, "Investments in Unconsolidated Affiliates," Note 7, "Asset Retirement Obligations," Note 11A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," Note 16, "Fair Value of Financial Instruments" and Note 25B, "Acquisition of Aquarion and Goodwill - Goodwill" to the financial statements.

## J. Derivative Accounting

Many of the electric and natural gas companies' contracts for the purchase and sale of energy or energy-related products are derivatives. The accounting treatment for energy contracts entered into varies and depends on the intended use of the particular contract and on whether or not the contract is a derivative.

The application of derivative accounting is complex and requires management judgment in the following respects: identification of derivatives and embedded derivatives, election and designation of a contract as normal, and determination of the fair value of derivative contracts. All of these judgments can have a significant impact on the financial statements. The judgment applied in the election of a contract as normal (and resulting accrual accounting) includes the conclusion that it is probable at the inception of the contract and throughout its term that it will result in physical delivery of the underlying product and that the quantities will be used or sold by the business in the normal course of business. If facts and circumstances change and management can no longer support this conclusion, then a contract cannot be considered normal, accrual accounting is terminated, and fair value accounting is applied prospectively.

The fair value of derivative contracts is based upon the contract terms and conditions and the underlying market price or fair value per unit. When quantities are not specified in the contract, the Company determines whether the contract has a determinable quantity by using amounts referenced in default provisions and other relevant sections of the contract. The fair value of derivative assets and liabilities with the same counterparty are offset and recorded as a net derivative asset or liability on the balance sheets.

Regulatory assets or regulatory liabilities are recorded to offset the fair values of derivative contracts related to energy and energy-related products, as contract settlements are recovered from, or refunded to, customers in future rates. All changes in the fair value of derivative contracts are recorded as regulatory assets or liabilities and do not impact net income.

For further information regarding derivative contracts, see Note 4, "Derivative Instruments," to the financial statements.

## K. Operating Expenses

Costs related to fuel and natural gas included in Purchased Power, Fuel and Transmission on the statements of income were as follows:

(Millions of Dollars)	For the Years Ended December 31,		
	2019	2018	2017
Eversource - Natural Gas and Fuel	\$ 462.1	\$ 442.6	\$ 432.5
PSNH - Fuel	—	7.9	43.4

PSNH completed the sale of its generation assets in 2018. See Note 14, "Generation Asset Sale," for further information.

## L. Allowance for Funds Used During Construction

AFUDC represents the cost of borrowed and equity funds used to finance construction and is included in the cost of the electric, natural gas and water companies' utility plant on the balance sheet. The portion of AFUDC attributable to borrowed funds is recorded as a reduction of Interest Expense, and the AFUDC related to equity funds is recorded as Other Income, Net on the statements of income. AFUDC costs are recovered from customers over the service life of the related plant in the form of increased revenue collected as a result of higher depreciation expense.

The average AFUDC rate is based on a FERC-prescribed formula using the cost of a company's short-term financings and capitalization (preferred stock, long-term debt and common equity), as appropriate. The average rate is applied to average eligible CWIP amounts to calculate AFUDC.

AFUDC costs and the weighted-average AFUDC rates were as follows:

Eversource <i>(Millions of Dollars, except percentages)</i>	For the Years Ended December 31,		
	2019	2018	2017
Borrowed Funds	\$ 25.6	\$ 19.7	\$ 12.5
Equity Funds	45.0	44.0	34.4
Total AFUDC	\$ 70.6	\$ 63.7	\$ 46.9
Average AFUDC Rate	5.4%	4.9%	5.1%

Eversource <i>(Millions of Dollars, except percentages)</i>	For the Years Ended December 31,								
	2019			2018			2017		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Borrowed Funds	\$ 7.1	\$ 10.4	\$ 2.8	\$ 6.3	\$ 7.8	\$ 1.3	\$ 5.1	\$ 4.8	\$ 0.7
Equity Funds	13.2	19.8	3.4	12.2	15.6	—	12.1	10.2	—
Total AFUDC	\$ 20.3	\$ 30.2	\$ 6.2	\$ 18.5	\$ 23.4	\$ 1.3	\$ 17.2	\$ 15.0	\$ 0.7
Average AFUDC Rate	6.3%	5.7%	4.6%	5.8%	5.0%	0.7%	6.2%	5.0%	0.7%

## M. Other Income, Net

The components of Other Income, Net on the statements of income were as follows:

Eversource <i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2019	2018	2017
Pension, SERP and PBOP Non-Service Income Components	\$ 31.3	\$ 60.8	\$ 29.9
AFUDC Equity	45.0	44.0	34.4
Equity in Earnings of Unconsolidated Affiliates <sup>(1)</sup>	42.2	3.8	27.4
Investment Income/(Loss)	0.8	(4.0)	7.5
Interest Income <sup>(2)</sup>	12.8	18.1	8.3
Gains on Sales of Property	0.3	5.1	—
Other	0.4	0.6	0.4
Total Other Income, Net	\$ 132.8	\$ 128.4	\$ 107.9

Eversource <i>(Millions of Dollars)</i>	For the Years Ended December 31,								
	2019			2018			2017		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Pension, SERP and PBOP Non-Service Income Components	\$ 0.5	\$ 23.5	\$ 4.9	\$ 9.5	\$ 36.0	\$ 9.9	\$ 1.8	\$ 19.2	\$ 5.9
AFUDC Equity	13.2	19.8	3.4	12.2	15.6	—	12.1	10.2	—
Equity in Earnings of Unconsolidated Affiliates	0.1	0.7	—	0.1	0.7	—	—	0.3	—
Investment Income/(Loss)	2.3	(0.4)	0.3	(3.0)	(0.5)	(0.8)	4.5	2.6	1.6
Interest Income <sup>(2)</sup>	1.5	0.7	10.5	3.7	0.8	14.1	4.6	1.8	2.2
Gains on Sales of Property	—	0.1	—	—	0.5	4.4	—	—	—
Other	(0.1)	0.2	0.1	0.2	—	0.1	—	—	0.1
Total Other Income, Net	\$ 17.5	\$ 44.6	\$ 19.2	\$ 22.7	\$ 53.1	\$ 27.7	\$ 23.0	\$ 34.1	\$ 9.8

<sup>(1)</sup> Equity in earnings of unconsolidated affiliates includes an other-than-temporary impairment of \$32.9 million of the Access Northeast project investment for the year ended December 31, 2018. See Note 6, "Investments in Unconsolidated Affiliates," for further information. Equity in earnings includes \$20.4 million, \$17.6 million and \$9.7 million of pre-tax unrealized gains for the years ended December 31, 2019, 2018 and 2017, respectively, associated with an equity method investment in a renewable energy fund.

- (2) For the years ended December 31, 2019 and 2018, PSNH recognized \$6.3 million and \$8.7 million, respectively, of interest income for the equity return component of carrying charges on storm costs approved in 2019 and 2018. See Note 2, "Regulatory Accounting," for further information.

#### N. Other Taxes

Eversource's companies that serve customers in Connecticut collect gross receipts taxes levied by the state of Connecticut from their customers. These gross receipts taxes are recorded separately with collections in Operating Revenues and with payments in Taxes Other Than Income Taxes on the statements of income as follows:

<i>(Millions of Dollars)</i>	For the Years Ended December 31,		
	2019	2018	2017
Eversource	\$ 163.1	\$ 161.9	\$ 157.4
CL&P	141.1	141.4	137.5

As agents for state and local governments, Eversource's companies that serve customers in Connecticut and Massachusetts collect certain sales taxes that are recorded on a net basis with no impact on the statements of income.

Separate from above were amounts recorded as Taxes Other Than Income Taxes related to the remittance to the State of Connecticut of energy efficiency funds collected from customers in Operating Revenues. These amounts were \$21.4 million and \$46.8 million in 2019 and 2018, respectively. Energy efficiency funds collected from customers after July 1, 2019 are no longer subject to remittance to the State of Connecticut. These amounts were recorded separately, with collections in Operating Revenues and with payments in Taxes Other Than Income Taxes on the Eversource and CL&P statements of income.

#### O. Supplemental Cash Flow Information

<i>Eversource</i> <i>(Millions of Dollars)</i>	As of and For the Years Ended December 31,		
	2019	2018	2017
Cash Paid During the Year for:			
Interest, Net of Amounts Capitalized	\$ 532.4	\$ 503.2	\$ 419.1
Income Taxes	56.0	158.8	30.8
Non-Cash Investing Activities:			
Plant Additions Included in Accounts Payable (As of) <sup>(1)</sup>	379.4	389.3	379.5

<i>(Millions of Dollars)</i>	As of and For the Years Ended December 31,								
	2019			2018			2017		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Cash Paid During the Year for:									
Interest, Net of Amounts Capitalized	\$ 144.6	\$ 121.9	\$ 56.9	\$ 149.7	\$ 122.1	\$ 40.5	\$ 144.6	\$ 124.6	\$ 45.9
Income Taxes	80.6	77.9	3.4	66.1	120.0	27.3	68.8	95.5	26.1
Non-Cash Investing Activities:									
Plant Additions Included in Accounts Payable (As of) <sup>(1)</sup>	111.3	116.4	49.9	106.1	116.5	35.1	132.5	116.5	44.4

- (1) See Note 1B, "Summary of Significant Accounting Policies - Basis of Presentation," for information regarding the correction of non-cash capital additions at Eversource and PSNH reported as of December 31, 2018.

Beginning in 2019, Eversource began issuing treasury shares to satisfy awards under the Company's incentive plans, shares issued under the dividend reinvestment and share purchase plan, and matching contributions under the Eversource 401k Plan. The issuance of treasury shares represents a non-cash transaction, as the treasury shares were used to fulfill Eversource's obligations that require the issuance of common shares.

The following table reconciles cash as reported on the balance sheets to the cash and restricted cash balance as reported on the statements of cash flows:

	As of December 31,								
	2019				2018				
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH	
<i>(Millions of Dollars)</i>									
Cash as reported on the Balance Sheets	\$ 15.4	\$ —	\$ 0.1	\$ 0.4	\$ 108.1	\$ 87.7	\$ 1.6	\$ 1.4	
Restricted cash included in:									
Special Deposits	52.5	4.6	6.2	32.5	72.1	3.5	13.0	47.5	
Marketable Securities	46.0	0.4	—	0.6	25.9	0.4	0.1	0.6	
Other Long-Term Assets	3.2	—	—	3.2	3.2	—	—	3.2	
Cash and Restricted Cash reported on the Statements of Cash Flows	\$ 117.1	\$ 5.0	\$ 6.3	\$ 36.7	\$ 209.3	\$ 91.6	\$ 14.7	\$ 52.7	

Special Deposits represent cash collections related to the PSNH RRB customer charges that are held in trust and required ISO-NE cash deposits, and are included in Current Assets on the balance sheets. Restricted cash included in Marketable Securities represents money market funds held in trusts to fund certain non-qualified executive benefits and restricted trusts to fund CYAPC and YAEC's spent nuclear fuel storage obligations.

#### P. Related Parties

Eversource Service, Eversource's service company, provides centralized accounting, administrative, engineering, financial, information technology, legal, operational, planning, purchasing, tax, and other services to Eversource's companies. The Rocky River Realty Company, Renewable Properties, Inc. and Properties, Inc., three other Eversource subsidiaries, construct, acquire or lease some of the property and facilities used by Eversource's companies.

As of both December 31, 2019 and 2018, CL&P, NSTAR Electric and PSNH had long-term receivables from Eversource Service in the amounts of \$25.0 million, \$5.5 million and \$3.8 million, respectively, which were included in Other Long-Term Assets on the balance sheets. These amounts related to the funding of investments held in trust by Eversource Service in connection with certain postretirement benefits for CL&P, NSTAR Electric and PSNH employees and have been eliminated in consolidation on the Eversource financial statements.

Included in the CL&P, NSTAR Electric and PSNH balance sheets as of December 31, 2019 and 2018 were Accounts Receivable from Affiliated Companies and Accounts Payable to Affiliated Companies relating to transactions between CL&P, NSTAR Electric and PSNH and other subsidiaries that are wholly-owned by Eversource. These amounts have been eliminated in consolidation on the Eversource financial statements.

#### Q. Acquisition of Assets of Columbia Gas of Massachusetts

On February 26, 2020, Eversource and NiSource entered into an asset purchase agreement (the Agreement) pursuant to which Eversource would acquire the assets that comprise NiSource's local gas distribution business in Massachusetts, which is doing business as Columbia Gas of Massachusetts (CMA). The purchase price of \$1.1 billion includes a target working capital amount that would be adjusted to reflect actual working capital as of the closing date. The acquisition and resulting rate plan both require DPU and other approvals.

The liabilities to be assumed by Eversource under the Agreement specifically exclude any liabilities (past or future) arising out of or related to the fires and explosions that occurred on September 13, 2018 in Lawrence, Andover and North Andover, Massachusetts related to the delivery of natural gas by CMA, including certain subsequent events, all as described and in the DPU's Order on Scope dated December 23, 2019 (D.P.U. 19-141) (the Greater Lawrence Incident or GLI), and any further emergency events prior to the closing of the acquisition related to the restoration and reconstruction with respect to the GLI, including any losses arising out of or related to any litigation, demand, cause of action, claim, suit, investigation, proceeding, indemnification agreements or rights.

## 2. REGULATORY ACCOUNTING

Eversource's utility companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of Eversource's regulated companies are designed to collect each company's costs to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

Management believes it is probable that each of the regulated companies will recover its respective investments in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to any of the regulated companies' operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

*Regulatory Assets:* The components of regulatory assets were as follows:

<i>(Millions of Dollars)</i>	As of December 31,							
	2019				2018			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Benefit Costs	\$ 2,382.9	\$ 539.0	\$ 629.8	\$ 218.2	\$ 1,914.8	\$ 424.7	\$ 544.4	\$ 169.6
Income Taxes, Net	725.8	458.8	108.0	12.8	728.6	454.4	105.9	8.3
Securitized Stranded Costs	565.3	—	—	565.3	608.4	—	—	608.4
Storm Restoration Costs, Net	540.6	274.6	200.6	65.4	576.0	302.6	212.9	60.5
Regulatory Tracker Mechanisms	411.5	78.3	207.1	65.8	316.0	33.2	169.1	67.3
Derivative Liabilities	334.5	329.2	—	—	356.5	356.5	—	—
Goodwill-related	331.5	—	284.6	—	348.4	—	299.1	—
Asset Retirement Obligations	97.2	30.8	50.3	3.6	89.2	32.3	42.2	3.3
Other Regulatory Assets	125.4	25.2	55.2	14.7	208.0	27.0	64.6	12.1
Total Regulatory Assets	5,514.7	1,735.9	1,535.6	945.8	5,145.9	1,630.7	1,438.2	929.5
Less: Current Portion	651.1	178.6	285.6	84.1	514.8	125.2	241.7	67.2
Total Long-Term Regulatory Assets	\$ 4,863.6	\$ 1,557.3	\$ 1,250.0	\$ 861.7	\$ 4,631.1	\$ 1,505.5	\$ 1,196.5	\$ 862.3

**Benefit Costs:** Eversource's Pension, SERP and PBOP Plans are accounted for in accordance with accounting guidance on defined benefit pension and other PBOP plans. The liability (or asset) recorded by the regulated companies to recognize the funded status of their retiree benefit plans is offset by a regulatory asset (or offset by a regulatory liability in the case of a benefit plan asset) in lieu of a charge to Accumulated Other Comprehensive Income/(Loss), reflecting ultimate recovery from customers through rates. The regulatory asset (or regulatory liability) is amortized as the actuarial gains and losses and prior service cost are amortized to net periodic benefit cost for the pension and PBOP plans. All amounts are remeasured annually. Regulatory accounting is also applied to the portions of Eversource's service company costs that support the regulated companies, as these amounts are also recoverable. As these regulatory assets or regulatory liabilities do not represent a cash outlay for the regulated companies, no carrying charge is recovered from customers. See Note 11A, "Employee Benefits - Pensions and Postretirement Benefits Other Than Pension," for further information on regulatory benefit plan amounts recognized and amortized during the year.

CL&P, NSTAR Electric and PSNH recover benefit costs related to their distribution and transmission operations from customers in rates as allowed by their applicable regulatory commissions. NSTAR Electric recovers qualified pension and PBOP expenses related to its distribution operations through a rate reconciling mechanism that fully tracks the change in net pension and PBOP expenses each year.

**Income Taxes, Net:** The tax effect of temporary book-tax differences (differences between the periods in which transactions affect income in the financial statements and the periods in which they affect the determination of taxable income, including those differences relating to uncertain tax positions) is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and accounting guidance for income taxes. Differences in income taxes between the accounting guidance and the rate-making treatment of the applicable regulatory commissions are recorded as regulatory assets. As these assets are offset by deferred income tax liabilities, no carrying charge is collected. The amortization period of these assets varies depending on the nature and/or remaining life of the underlying assets and liabilities. For further information regarding income taxes, see Note 12, "Income Taxes," to the financial statements.

**Securitized Stranded Costs:** In 2018, a subsidiary of PSNH issued \$635.7 million of securitized RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets. Securitized regulatory assets, which are not earning an equity return, are being recovered over the amortization period of the associated RRBs. The PSNH RRBs are expected to be repaid by February 1, 2033. For further information, see Note 10, "Rate Reduction Bonds and Variable Interest Entities."

**Storm Restoration Costs, Net:** The storm restoration cost deferrals relate to costs incurred for storm events at CL&P, NSTAR Electric and PSNH that each company expects to recover from customers. A storm must meet certain criteria to qualify for deferral and recovery with the criteria specific to each state jurisdiction and utility company. Once a storm qualifies for recovery, all qualifying expenses incurred during storm restoration efforts are deferred and recovered from customers. Costs for storms that do not meet the specific criteria are expensed as incurred. In addition to storm restoration costs, CL&P and PSNH are each allowed to recover pre-staging storm costs. Management believes storm restoration costs deferred were prudently incurred and meet the criteria for specific cost recovery in Connecticut, Massachusetts and New Hampshire, and that recovery from customers is probable through the applicable regulatory recovery processes. Each electric utility company either recovers a carrying charge on its deferred storm restoration cost regulatory asset balance or the regulatory asset balance is included in rate base.

In 2019, several significant storms caused extensive damage to our electric distribution systems and customer outages. These storms resulted in deferred storm restoration costs of approximately \$126 million (\$62 million for CL&P, \$48 million for NSTAR Electric, and \$16 million for PSNH), which were reflected in Storm Restoration Costs, Net in the table above as of December 31, 2019.

**Storm Filings:** On November 16, 2018, CL&P filed for recovery of \$153 million of storm costs incurred from October 2017 through May 2018, with recovery over six years. Through the course of the proceeding, CL&P updated its request to \$145.5 million to reflect final invoicing and capitalization amounts. On April 17, 2019, PURA authorized recovery of \$141.0 million as part of storm cost recovery and the remainder to be recorded to plant or other balance sheet accounts. CL&P began recovery of the \$141.0 million in distribution rates effective May 1, 2019.

On March 26, 2019, the NHPUC approved the recovery of \$38.1 million, plus carrying charges, of storm costs incurred from December 2013 through April 2016 and the transfer of funding from PSNH's major storm reserve to recover those costs. The costs of these storms (excluding the equity return component of the carrying charges) were deferred as regulatory assets, and the funding reserve collected from customers was accrued as a regulatory liability. As a result of the duration of time between incurring storm costs in December 2013 through April 2016 and final approval from the NHPUC in 2019, PSNH recognized \$5.2 million (pre-tax) for the equity return component of the carrying charges within Other Income, Net on the statement of income in 2019, which has been collected from customers. Also included in the March 26, 2019 NHPUC approval is a prospective requirement for PSNH to annually net its storm funding reserve collected from customers against deferred storm costs.

In addition, on June 27, 2019, the NHPUC approved a temporary rate settlement that allowed PSNH to recover approximately \$68.5 million in unrecovered storm costs over a five-year period beginning August 1, 2019, with debt carrying charges.

**Regulatory Tracker Mechanisms:** The regulated companies' approved rates are designed to recover costs incurred to provide service to customers. The regulated companies recover certain of their costs on a fully-reconciling basis through regulatory commission-approved tracking mechanisms. The differences between the costs incurred (or the rate recovery allowed) and the actual revenues are recorded as regulatory assets (for undercollections) or as regulatory liabilities (for overcollections) to be included in future customer rates each year. Carrying charges are recovered in rates on all material regulatory tracker mechanisms.

CL&P, NSTAR Electric and PSNH each recover, on a fully reconciling basis, the costs associated with the procurement of energy, transmission related costs from FERC-approved transmission tariffs, energy efficiency programs, low income assistance programs, certain uncollectible accounts receivable for hardship customers, and restructuring and stranded costs as a result of deregulation (including securitized RRB charges), and additionally for the Massachusetts utilities, pension and PBOP benefits and net metering for distributed generation. Energy procurement costs at NSTAR Electric include the costs related to its solar power facilities.

CL&P, NSTAR Electric, Yankee Gas and NSTAR Gas each have a regulatory commission approved revenue decoupling mechanism. Distribution revenues are decoupled from customer sales volumes, where applicable, which breaks the relationship between sales volumes and revenues. Each company reconciles its annual base distribution rate recovery amount to the pre-established levels of baseline distribution delivery service revenues. Any difference between the allowed level of distribution revenue and the actual amount realized during a 12-month period is adjusted through rates in the following period.

**Derivative Liabilities:** Regulatory assets are recorded as an offset to derivative liabilities and relate to the fair value of contracts used to purchase energy and energy-related products that will be recovered from customers in future rates. These assets are excluded from rate base and are being recovered as the actual settlements occur over the duration of the contracts. See Note 4, "Derivative Instruments," to the financial statements for further information on these contracts.

**Goodwill-related:** The goodwill regulatory asset originated from a 1999 transaction, and the DPU allowed its recovery in NSTAR Electric and NSTAR Gas rates. This regulatory asset is currently being amortized and recovered from customers in rates without a carrying charge over a 40-year period, and as of December 31, 2019, there were 20 years of amortization remaining.

**Asset Retirement Obligations:** The costs associated with the depreciation of the regulated companies' ARO assets and accretion of the ARO liabilities are recorded as regulatory assets in accordance with regulatory accounting guidance. The regulated companies' ARO assets, regulatory assets and liabilities offset and are excluded from rate base. These costs are being recovered over the life of the underlying property, plant and equipment.

**Other Regulatory Assets:** Other Regulatory Assets primarily include contractual obligations associated with the spent nuclear fuel storage costs of the CYAPC, YAEC and MYAPC decommissioned nuclear power facilities, environmental remediation costs, losses associated with the reacquisition or redemption of long-term debt, certain uncollectible accounts receivable for hardship customers, certain merger-related costs allowed for recovery, water tank painting costs, and various other items.

**Regulatory Costs in Long-Term Assets:** Eversource's regulated companies had \$146.0 million (including \$51.8 million for CL&P, \$55.7 million for NSTAR Electric and \$18.0 million for PSNH) and \$122.9 million (including \$42.1 million for CL&P, \$49.3 million for NSTAR Electric and \$12.2 million for PSNH) of additional regulatory costs as of December 31, 2019 and 2018, respectively, that were included in long-term assets on the balance sheets. These amounts represent incurred costs for which recovery has not yet been specifically approved by the applicable regulatory agency. However, based on regulatory policies or past precedent on similar costs, management believes it is probable that these costs will ultimately be approved and recovered from customers in rates.

**Equity Return on Regulatory Assets:** For rate-making purposes, the regulated companies recover the carrying costs related to their regulatory assets. For certain regulatory assets, the carrying cost recovered includes an equity return component. This equity return, which is not recorded on the balance sheets, totaled \$0.5 million and \$0.7 million for CL&P as of December 31, 2019 and 2018, respectively, and \$6.5 million and \$12.0 million for PSNH as of December 31, 2019 and 2018, respectively. These carrying costs will be recovered from customers in future rates.

*Regulatory Liabilities:* The components of regulatory liabilities were as follows:

	As of December 31,							
	2019				2018			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
<i>(Millions of Dollars)</i>								
EDIT due to Tax Cuts and Jobs Act	\$ 2,844.6	\$ 1,022.8	\$ 1,071.2	\$ 392.8	\$ 2,883.0	\$ 1,031.0	\$ 1,103.7	\$ 396.4
Cost of Removal	559.8	64.6	330.6	16.3	521.0	39.9	307.1	22.1
Benefit Costs	84.5	—	72.2	—	91.2	—	76.9	—
Regulatory Tracker Mechanisms	325.1	94.8	165.6	57.0	309.0	89.5	163.7	48.3
AFUDC - Transmission	73.2	46.0	27.2	—	70.7	47.4	23.3	—
Revenue Subject to Refund due to Tax Cuts and Jobs Act	14.6	—	—	6.0	24.6	—	—	12.6
Other Regulatory Liabilities	117.4	19.6	59.0	7.1	80.2	24.0	29.2	4.2
Total Regulatory Liabilities	4,019.2	1,247.8	1,725.8	479.2	3,979.7	1,231.8	1,703.9	483.6
Less: Current Portion	361.2	82.8	209.2	65.8	370.2	109.6	190.6	55.5
Total Long-Term Regulatory Liabilities	\$ 3,658.0	\$ 1,165.0	\$ 1,516.6	\$ 413.4	\$ 3,609.5	\$ 1,122.2	\$ 1,513.3	\$ 428.1

**EDIT due to Tax Cuts and Jobs Act:** Pursuant to the "Tax Cuts and Jobs Act" (the Act), which became law on December 22, 2017, Eversource had remeasured its existing deferred federal income tax balances to reflect the decrease in the U.S. federal corporate income tax rate from 35 percent to 21 percent. The remeasurement resulted in provisional regulated excess accumulated deferred income tax (excess ADIT or EDIT) liabilities that will benefit our customers in future periods and were recognized as regulatory liabilities on the balance sheet. EDIT liabilities related to property, plant, and equipment are subject to IRS normalization rules and will be returned to customers using the same timing as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities.

Eversource's regulated companies are in the process of, or will be, refunding the EDIT liabilities to customers based on orders issued by applicable state regulatory commissions. For CL&P (effective May 1, 2019) and Yankee Gas (effective November 15, 2018), the refund of EDIT liabilities was incorporated into base distribution rates. For NSTAR Electric (effective January 1, 2019) and NSTAR Gas (effective February 1, 2019), the refund of EDIT liabilities occurred in rates through a new reconciling factor. For PSNH, EDIT refunds will be addressed as part of the permanent distribution rate case filing. The EDIT balance related to PSNH's divested generation assets was included as a component of the securitization of the stranded generation assets and began to be refunded to customers, effective August 1, 2018. For our transmission companies, on November 21, 2019, the FERC issued its final rule requiring public utilities with transmission formula rates to make adjustments to ADIT and EDIT. Eversource expects to submit a filing demonstrating its compliance with the final rule in the second half of 2020.

**Cost of Removal:** Eversource's regulated companies currently recover amounts in rates for future costs of removal of plant assets over the lives of the assets. The estimated cost to remove utility assets from service is recognized as a component of depreciation expense, and the cumulative amount collected from customers but not yet expended is recognized as a regulatory liability.

**AFUDC - Transmission:** Regulatory liabilities were recorded by CL&P and NSTAR Electric for AFUDC accrued on certain reliability-related transmission projects to reflect local rate base recovery. These regulatory liabilities will be amortized over the depreciable life of the related transmission assets.

**Revenue Subject to Refund due to Tax Cuts and Jobs Act:** Eversource established a regulatory liability with a corresponding reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflected the lower federal tax rate. Effective May 1, 2018, CL&P adjusted distribution rates billed to customers to reflect the lower federal income tax rate prospectively and, as of December 31, 2018, fully refunded its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through April 30, 2018. Effective November 15, 2018, Yankee Gas adjusted distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through November 14, 2018. Effective July 1, 2019, PSNH adjusted temporary distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through June 30, 2019. For NSTAR Electric and NSTAR Gas, a December 2018 DPU order indicated that the DPU would not require a revision to base distribution rates for any potential refunds associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 to the effective dates of each company's rate changes (effective February 1, 2018 for NSTAR Electric and July 1, 2018 for NSTAR Gas).

Effective January 1, 2018, local transmission service rates were updated to reflect the lower U.S. federal corporate income tax rate that resulted from the act. On June 28, 2018, FERC granted a one-time tariff waiver of tariff provisions related to the federal corporate income tax rate so that effective June 1, 2018, the regional transmission service rates also reflected the reduced federal corporate income tax rate at 21 percent.

**FERC ROE Complaints:** As of December 31, 2019, Eversource has a reserve established for the second ROE complaint in the pending FERC ROE complaint proceedings, which was recorded as a regulatory liability and is reflected within Regulatory Tracker Mechanisms in the table above. The cumulative pre-tax reserve (excluding interest) as of December 31, 2019 totaled \$39.1 million for Eversource (including \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH). See Note 13E, "Commitments and Contingencies – FERC ROE Complaints," for further information on developments in the pending ROE complaint proceedings.

### 3. PROPERTY, PLANT AND EQUIPMENT AND ACCUMULATED DEPRECIATION

Utility property, plant and equipment is recorded at original cost. Original cost includes materials, labor, construction overheads and AFUDC for regulated property. The cost of repairs and maintenance is charged to Operations and Maintenance expense as incurred.

The following tables summarize property, plant and equipment by asset category:

Eversource (Millions of Dollars)	As of December 31,	
	2019	2018
Distribution - Electric	\$ 15,880.0	\$ 15,071.1
Distribution - Natural Gas	3,931.1	3,546.2

<sup>(1)</sup> These assets are primarily comprised of computer software, hardware and equipment at Eversource Service and buildings at The Rocky River Realty Company.

In 2019, Eversource recorded an impairment charge for the NPT project costs, which had been recorded within both Construction Work in Progress and the Transmission - Electric asset categories. For further information regarding the impairment of NPT, see Note 1D, "Summary of Significant Accounting Policies - Impairment of Northern Pass Transmission," to the financial statements.

Depreciation of utility assets is calculated on a straight-line basis using composite rates based on the estimated remaining useful lives of the various classes of property (estimated useful life for PSNH distribution and the water utilities). The composite rates, which are subject to approval by the appropriate state regulatory agency, include a cost of removal component, which is collected from customers over the lives of the plant assets and is recognized as a regulatory liability. Depreciation rates are applied to property from the time it is placed in service.

Upon retirement from service, the cost of the utility asset is charged to the accumulated provision for depreciation. The actual incurred removal costs are applied against the related regulatory liability.

The depreciation rates for the various classes of utility property, plant and equipment aggregate to composite rates as follows:

(Percent)	2019	2018	2017
Eversource	3.0%	2.9%	3.0%
CL&P	2.8%	2.8%	2.8%
NSTAR Electric	2.8%	2.8%	2.9%
PSNH	2.8%	2.8%	3.1%

The following table summarizes average remaining useful lives of depreciable assets:

(Years)	As of December 31, 2019			
	Eversource	CL&P	NSTAR Electric	PSNH
Distribution - Electric	34.3	35.3	33.7	33.2
Distribution - Natural Gas	43.2	—	—	—
Transmission - Electric	40.4	36.8	44.9	42.1
Distribution - Water	33.5	—	—	—
Solar	24.2	—	24.2	—
Other <sup>(1)</sup>	11.2	—	—	—

<sup>(1)</sup> The estimated useful life of computer software, hardware and equipment primarily ranges from 5 to 15 years and of buildings is 40 years.

#### 4. DERIVATIVE INSTRUMENTS

The electric and natural gas companies purchase and procure energy and energy-related products, which are subject to price volatility, for their customers. The costs associated with supplying energy to customers are recoverable from customers in future rates. These regulated companies manage the risks associated with the price volatility of energy and energy-related products through the use of derivative and non-derivative contracts.

Many of the derivative contracts meet the definition of, and are designated as, normal and qualify for accrual accounting under the applicable accounting guidance. The costs and benefits of derivative contracts that meet the definition of normal are recognized in Operating Expenses on the statements of income, as applicable, as electricity or natural gas is delivered.

Derivative contracts that are not designated as normal are recorded at fair value as current or long-term Derivative Assets or Derivative Liabilities on the balance sheets. For the electric and natural gas companies, regulatory assets or regulatory liabilities are recorded to offset the fair values of derivatives, as contract settlement amounts are recovered from, or refunded to, customers in their respective energy supply rates.

The gross fair values of derivative assets and liabilities with the same counterparty are offset and reported as net Derivative Assets or Derivative Liabilities, with current and long-term portions, on the balance sheets. The following table presents the gross fair values of contracts, categorized by risk type, and the net amounts recorded as current or long-term derivative assets or liabilities:

(Millions of Dollars)	Fair Value Hierarchy	As of December 31,					
		2019			2018		
		Commodity Supply and Price Risk Management	Netting <sup>(1)</sup>	Net Amount Recorded as a Derivative	Commodity Supply and Price Risk Management	Netting <sup>(1)</sup>	Net Amount Recorded as a Derivative
<b>Current Derivative Assets:</b>							
CL&P	Level 3	\$ 12.2	\$ (0.4)	\$ 11.8	\$ 9.6	\$ (3.4)	\$ 6.2
Other	Level 2	—	—	—	1.5	(0.9)	0.6
<b>Long-Term Derivative Assets:</b>							
CL&P	Level 3	67.5	(2.1)	65.4	74.2	(2.3)	71.9
<b>Current Derivative Liabilities:</b>							
CL&P	Level 3	(67.8)	—	(67.8)	(55.1)	—	(55.1)
Other	Level 2	(5.2)	—	(5.2)	—	—	—
<b>Long-Term Derivative Liabilities:</b>							
CL&P	Level 3	(338.6)	—	(338.6)	(379.5)	—	(379.5)
Other	Level 2	(0.1)	—	(0.1)	—	—	—

<sup>(1)</sup> Amounts represent derivative assets and liabilities that Eversource elected to record net on the balance sheets. These amounts are subject to master netting agreements or similar agreements for which the right of offset exists.

The business activities that result in the recognition of derivative assets also create exposure to various counterparties. As of December 31, 2019, CL&P's derivative assets were exposed to counterparty credit risk and contracted with investment grade entities.

For further information on the fair value of derivative contracts, see Note 1I, "Summary of Significant Accounting Policies – Fair Value Measurements," and Note 1J, "Summary of Significant Accounting Policies – Derivative Accounting," to the financial statements.

#### Derivative Contracts at Fair Value with Offsetting Regulatory Amounts

**Commodity Supply and Price Risk Management:** As required by regulation, CL&P, along with UI, has capacity-related contracts with generation facilities. CL&P has a sharing agreement with UI, with 80 percent of the costs or benefits of each contract borne by or allocated to CL&P and 20 percent borne by or allocated to UI. The combined capacities of these contracts as of December 31, 2019 and 2018 were 676 MW and 787 MW, respectively. The capacity contracts extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set capacity price and the capacity market price received in the ISO-NE capacity markets. In addition, CL&P has a contract to purchase 0.1 million MWh of energy per year through 2020.

As of December 31, 2019 and 2018, Eversource had New York Mercantile Exchange (NYMEX) financial contracts for natural gas futures in order to reduce variability associated with the price of 9.6 million and 12.5 million MMBtu of natural gas, respectively.

For the years ended December 31, 2019, 2018 and 2017, there were losses of \$20.7 million, \$25.0 million and \$29.0 million, respectively, deferred as regulatory costs, which reflect the change in fair value associated with Eversource's derivative contracts.

#### Fair Value Measurements of Derivative Instruments

Derivative contracts classified as Level 2 in the fair value hierarchy relate to the financial contracts for natural gas futures. Prices are obtained from broker quotes and are based on actual market activity. The contracts are valued using NYMEX natural gas prices. Valuations of these contracts also incorporate discount rates using the yield curve approach.

The fair value of derivative contracts classified as Level 3 utilizes significant unobservable inputs. The fair value is modeled using income techniques, such as discounted cash flow valuations adjusted for assumptions related to exit price. Significant observable inputs for valuations of these contracts include energy and energy-related product prices in future years for which quoted prices in an active market exist. Fair value measurements categorized in Level 3 of the fair value hierarchy are prepared by individuals with expertise in valuation techniques, pricing of energy and energy-related products, and accounting requirements. The future capacity prices for periods that are not quoted in an active market or established at auction are based on available market data and are escalated based on estimates of inflation in order to address the full term of the contract.

Valuations of derivative contracts using a discounted cash flow methodology include assumptions regarding the timing and likelihood of scheduled payments and also reflect non-performance risk, including credit, using the default probability approach based on the counterparty's credit rating for assets and the Company's credit rating for liabilities. Valuations incorporate estimates of premiums or discounts that would be required by a market participant to arrive at an exit price, using historical market transactions adjusted for the terms of the contract.

The following is a summary of Level 3 derivative contracts and the range of the significant unobservable inputs utilized in the valuations over the duration of the contracts:

CL&P	As of December 31,									
	2019					2018				
	Range			Period Covered	Range			Period Covered		
Capacity Prices	\$ 3.01	—	7.34	per kW-Month	2023 - 2026	\$ 4.30	—	7.44	per kW-Month	2022 - 2026
Forward Reserve	0.80	—	1.90	per kW-Month	2020 - 2024	0.75	—	1.78	per kW-Month	2019 - 2024

Exit price premiums of 2.1 percent through 13.6 percent are also applied to these contracts and reflect the uncertainty and illiquidity premiums that would be required based on the most recent market activity available for similar type contracts.

Significant increases or decreases in future capacity or forward reserve prices in isolation would decrease or increase, respectively, the fair value of the derivative liability. Any increases in risk premiums would increase the fair value of the derivative liability. Changes in these fair values are recorded as a regulatory asset or liability and do not impact net income.

*Valuations using significant unobservable inputs:* The following table presents changes in the Level 3 category of derivative assets and derivative liabilities measured at fair value on a recurring basis. The derivative assets and liabilities are presented on a net basis.

CL&P (Millions of Dollars)	For the Years Ended December 31,	
	2019	2018
<u>Derivatives, Net:</u>		
Fair Value as of Beginning of Period	\$ (356.5)	\$ (362.3)
Net Realized/Unrealized Losses Included in Regulatory Assets	(15.0)	(32.0)
Settlements	42.3	37.8
Fair Value as of End of Period	\$ (329.2)	\$ (356.5)

## 5. MARKETABLE SECURITIES

Eversource holds marketable securities that are primarily used to fund certain non-qualified executive benefits. The trusts that hold marketable securities are not subject to regulatory oversight by state or federal agencies. CYAPC and YAEC maintain legally restricted trusts, each of which holds marketable securities, to fund the spent nuclear fuel removal obligations of their nuclear fuel storage facilities.

*Equity Securities:* Unrealized gains and losses on equity securities held in Eversource's non-qualified executive benefit trust are recorded in Other Income, Net on the statements of income. The fair value of these equity securities as of December 31, 2019 and 2018 was \$45.7 million and \$44.0 million, respectively. For the years ended December 31, 2019 and 2018, there were unrealized gains of \$9.8 million and unrealized losses of \$4.3 million recorded in Other Income, Net related to these equity securities, respectively.

Eversource's equity securities also include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts, which had fair values of \$182.8 million and \$200.0 million as of December 31, 2019 and 2018, respectively. Unrealized gains and losses for these spent nuclear fuel trusts

are subject to regulatory accounting treatment and are recorded in Marketable Securities with the corresponding offset to Other Long-Term Liabilities on the balance sheets, with no impact on the statements of income.

*Available-for-Sale Debt Securities:* The following is a summary of the available-for-sale debt securities, which are recorded at fair value and are included in current and long-term Marketable Securities on the balance sheets.

Eversource (Millions of Dollars)	As of December 31,							
	2019				2018			
	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value
Debt Securities	\$ 228.4	\$ 5.8	\$ (0.1)	\$ 234.1	\$ 190.0	\$ 0.4	\$ (4.0)	\$ 186.4

Eversource's debt securities include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts in the amounts of \$198.1 million and \$143.9 million as of December 31, 2019 and 2018, respectively.

Unrealized gains and losses on available-for-sale debt securities held in Eversource's non-qualified benefit trust are recorded in Accumulated Other Comprehensive Income. There have been no significant unrealized losses, other-than-temporary impairments, or credit losses for the years ended December 31, 2019 or 2018. Factors considered in determining whether a credit loss exists include the duration and severity of the impairment, adverse conditions specifically affecting the issuer, and the payment history, ratings and rating changes of the security. For asset-backed debt securities, underlying collateral and expected future cash flows are also evaluated.

As of December 31, 2019, the contractual maturities of available-for-sale debt securities were as follows:

Eversource (Millions of Dollars)	Amortized Cost	Fair Value
Less than one year <sup>(1)</sup>	\$ 59.2	\$ 59.3
One to five years	40.5	41.4
Six to ten years	33.6	34.8
Greater than ten years	95.1	98.6
Total Debt Securities	\$ 228.4	\$ 234.1

<sup>(1)</sup> Amounts in the Less than one year category include securities in the CYAPC and YAEC spent nuclear fuel trusts, which are restricted and are classified in long-term Marketable Securities on the balance sheets.

*Realized Gains and Losses:* Realized gains and losses are recorded in Other Income, Net for Eversource's benefit trust and are offset in Other Long-Term Liabilities for CYAPC and YAEC. Eversource utilizes the specific identification basis method for the Eversource non-qualified benefit trust, and the average cost basis method for the CYAPC and YAEC spent nuclear fuel trusts to compute the realized gains and losses on the sale of marketable securities.

*Fair Value Measurements:* The following table presents the marketable securities recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

Eversource (Millions of Dollars)	As of December 31,	
	2019	2018
Level 1:		
Mutual Funds and Equities	\$ 228.5	\$ 244.0
Money Market Funds	46.0	25.9
Total Level 1	\$ 274.5	\$ 269.9
Level 2:		
U.S. Government Issued Debt Securities (Agency and Treasury)	\$ 96.8	\$ 79.6
Corporate Debt Securities	44.0	39.5
Asset-Backed Debt Securities	12.9	14.0
Municipal Bonds	26.7	19.2
Other Fixed Income Securities	7.7	8.2
Total Level 2	\$ 188.1	\$ 160.5
Total Marketable Securities	\$ 462.6	\$ 430.4

U.S. government issued debt securities are valued using market approaches that incorporate transactions for the same or similar bonds and adjustments for yields and maturity dates. Corporate debt securities are valued using a market approach, utilizing recent trades of the same or similar instruments and also incorporating yield curves, credit spreads and specific bond terms and conditions. Asset-backed debt securities include collateralized mortgage obligations, commercial mortgage backed securities, and securities collateralized by auto loans, credit card loans or receivables. Asset-backed debt securities are valued using recent trades of similar instruments, prepayment assumptions, yield curves, issuance and maturity dates, and tranche information. Municipal bonds are valued using a market approach that incorporates reported trades and benchmark

yields. Other fixed income securities are valued using pricing models, quoted prices of securities with similar characteristics, and discounted cash flows.

## 6. INVESTMENTS IN UNCONSOLIDATED AFFILIATES

Investments in entities that are not consolidated are included in long-term assets on the balance sheets and earnings impacts from these equity investments are included in Other Income, Net on the statements of income. Eversource's investments included the following:

<i>(Millions of Dollars)</i>	Ownership Interest	Investment Balance as of December 31,	
		2019	2018
Offshore Wind Business - North East Offshore and Bay State Wind	50%	\$ 649.3	\$ 234.3
Natural Gas Pipeline - Algonquin Gas Transmission, LLC	15%	127.8	155.0
Renewable Energy Investment Fund	90%	72.4	54.1
Other	various	22.1	20.9
Total Investments in Unconsolidated Affiliates		\$ 871.6	\$ 464.3

For the years ended December 31, 2019, 2018 and 2017, Eversource had equity in earnings, net of impairment, of unconsolidated affiliates of \$42.2 million, \$3.8 million, and \$27.4 million, respectively. Eversource received dividends from its equity method investees of \$48.9 million, \$22.3 million and \$20.0 million, respectively, for the years ended December 31, 2019, 2018 and 2017.

Investments in affiliates where Eversource has the ability to exercise significant influence, but not control, over an investee are initially recognized as an equity method investment at cost. Any differences between the cost of an investment and the amount of underlying equity in net assets of an investee are considered basis differences, and are determined based upon the estimated fair values of the investee's identifiable assets and liabilities. The carrying amount of Eversource's offshore wind investments exceeded its share of underlying equity in net assets by \$240.3 million and \$7.2 million, respectively, as of December 31, 2019 and 2018. As of December 31, 2019, these basis differences are primarily comprised of \$168.3 million of equity method goodwill that is not being amortized, intangible assets for PPAs, which will be amortized over the term of the PPAs, and capitalized interest.

*Offshore Wind Business:* Eversource's offshore wind business includes ownership interests in North East Offshore and Bay State Wind, which together hold PPAs and contracts for the Revolution Wind, South Fork Wind and Sunrise Wind projects, as well as offshore leases through BOEM. Eversource's offshore wind projects are being developed and constructed through a joint and equal partnership with Ørsted. On February 8, 2019, Eversource and Ørsted entered into an equal partnership to acquire key offshore wind assets in the Northeast. Eversource has a 50 percent ownership interest in North East Offshore, which holds the Revolution Wind and South Fork Wind projects, as well as a 257-square-mile lease off the coasts of Massachusetts and Rhode Island. Eversource also has a 50 percent ownership interest in Bay State Wind, which holds the Sunrise Wind project. Bay State Wind's separate 300-square-mile ocean lease is located approximately 25 miles south of the coast of Massachusetts adjacent to the North East Offshore area.

*NSTAR Electric:* As of December 31, 2019 and 2018, NSTAR Electric's investments included a 14.5 percent ownership interest in two companies that transmit hydro-electricity imported from the Hydro-Quebec system in Canada of \$8.2 million and \$7.6 million, respectively.

*Impairment of Equity Method Investments:* Equity method investments are assessed for impairment when conditions exist that indicate that the fair value of the investment is less than book value. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist and developing undiscounted future cash flows.

During the year ended December 31, 2018, Eversource recorded an other-than-temporary impairment of \$32.9 million within Other Income, Net on our statement of income, related to Access Northeast, a natural gas pipeline and storage project, which represented the full carrying value of our equity method investment. On April 1, 2019, pursuant to a provision in the partnership agreement jointly entered into by Eversource, Enbridge, Inc. and National Grid plc, through Algonquin Gas Transmission, LLC, the Access Northeast project was terminated.

## 7. ASSET RETIREMENT OBLIGATIONS

Eversource, including CL&P, NSTAR Electric and PSNH, recognizes a liability for the fair value of an ARO on the obligation date if the liability's fair value can be reasonably estimated, even if it is conditional on a future event. Settlement dates and future costs are reasonably estimated when sufficient information becomes available. Management has identified various categories of AROs, primarily CYAPC's and YAEC's obligation to dispose of spent nuclear fuel and high level waste, and also certain assets containing asbestos and hazardous contamination. Management has performed fair value calculations reflecting expected probabilities for settlement scenarios.

The fair value of an ARO is recorded as a liability in Other Long-Term Liabilities with a corresponding amount included in Property, Plant and Equipment, Net on the balance sheets. The ARO assets are depreciated, and the ARO liabilities are accreted over the estimated life of the obligation and the corresponding credits are recorded as accumulated depreciation and ARO liabilities, respectively. As the electric and natural gas companies are rate-regulated on a cost-of-service basis, these companies apply regulatory accounting guidance and both the depreciation and accretion costs associated with these companies' AROs are recorded as increases to Regulatory Assets on the balance sheets.

A reconciliation of the beginning and ending carrying amounts of ARO liabilities is as follows:

(Millions of Dollars)	As of December 31,							
	2019				2018			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
Balance as of Beginning of Year	\$ 466.2	\$ 33.5	\$ 72.4	\$ 4.0	\$ 419.1	\$ 31.5	\$ 44.6	\$ 25.0
Liabilities Incurred During the Year	30.3	—	30.3	—	11.3	—	11.3	—
Liabilities Settled During the Year	(21.3)	(3.6)	—	—	(36.6)	—	—	(21.5)
Accretion	27.1	2.2	3.5	0.2	25.5	2.0	2.2	0.5
Revisions in Estimated Cash Flows	(12.8)	(0.1)	(8.7)	—	46.9	—	14.3	—
Balance as of End of Year	\$ 489.5	\$ 32.0	\$ 97.5	\$ 4.2	\$ 466.2	\$ 33.5	\$ 72.4	\$ 4.0

The ARO balance includes the current portion of \$1.0 million for Eversource and NSTAR Electric as of December 31, 2019, which is included in Other Current Liabilities on the balance sheets.

Eversource's amounts include CYAPC and YAEC's AROs of \$337.7 million and \$339.9 million as of December 31, 2019 and 2018, respectively. The fair value of the ARO for CYAPC and YAEC includes uncertainties of the fuel off-load dates related to the DOE's timing of performance regarding its obligation to dispose of the spent nuclear fuel and high level waste and other assumptions, including discount rates. The incremental asset recorded as an offset to the ARO liability was fully depreciated since the plants have no remaining useful life. Any changes in the ARO liability are recorded with a corresponding offset to the related regulatory asset. The assets held in the CYAPC and YAEC spent nuclear fuel trusts are restricted for settling the ARO and all other nuclear fuel storage obligations. For further information on the assets held in the spent nuclear fuel trusts, see Note 5, "Marketable Securities," to the financial statements.

The increase in the ARO balance at NSTAR Electric for the year ended December 31, 2019 was due to the recording of a new liability associated with the installation of a 115kV distribution cable across Boston Harbor to Deer Island that was placed into service in 2019. See Note 13F, "Commitments and Contingencies - Eversource and NSTAR Electric Boston Harbor Civil Action," to the financial statements for further information on the HEEC distribution cable.

## 8. SHORT-TERM DEBT

*Short-Term Debt Borrowing Limits:* The amount of short-term borrowings that may be incurred by CL&P and NSTAR Electric is subject to periodic approval by the FERC. Because the NHPUC has jurisdiction over PSNH's short-term debt, PSNH is not currently required to obtain FERC approval for its short-term borrowings. On October 25, 2019, the FERC granted authorization that allows CL&P to issue total short-term borrowings in an aggregate principal amount not to exceed \$600 million outstanding at any one time, through December 31, 2021. On December 18, 2019, the FERC granted authorization that allows NSTAR Electric to issue total short-term borrowings in an aggregate principal amount not to exceed \$655 million outstanding at any one time, through December 31, 2021.

PSNH is authorized by regulation of the NHPUC to incur short-term borrowings up to 10 percent of net fixed plant plus an additional \$60 million until further ordered by the NHPUC. As of December 31, 2019, PSNH's short-term debt authorization under the 10 percent of net fixed plant test plus \$60 million totaled approximately \$354 million.

CL&P's certificate of incorporation contains preferred stock provisions restricting the amount of unsecured debt that CL&P may incur, including limiting unsecured indebtedness with a maturity of less than 10 years to 10 percent of total capitalization. As of December 31, 2019, CL&P had \$738.1 million of unsecured debt capacity available under this authorization.

Yankee Gas and NSTAR Gas are not required to obtain approval from any state or federal authority to incur short-term debt.

*Commercial Paper Programs and Credit Agreements:* Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas, Yankee Gas and Aquarion Water Company of Connecticut are also parties to a five-year \$1.45 billion revolving credit facility. Effective December 9, 2019, the revolving credit facility's termination date was extended for one additional year to December 6, 2024. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility. Effective December 9, 2019, the revolving credit facility's termination date was extended for one additional year to December 6, 2024. The revolving credit facility serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

(Millions of Dollars)	Borrowings Outstanding as of December 31,		Available Borrowing Capacity as of December 31,		Weighted-Average Interest Rate as of December 31,	
	2019	2018	2019	2018	2019	2018
	Eversource Parent Commercial Paper Program	\$ 1,224.9	\$ 631.5	\$ 225.1	\$ 818.5	1.98%
NSTAR Electric Commercial Paper Program	10.5	278.5	639.5	371.5	1.63%	2.50%

There were no borrowings outstanding on either the Eversource parent or NSTAR Electric revolving credit facilities as of December 31, 2019 or 2018.

Amounts outstanding under the commercial paper programs and revolving credit facilities are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets as all borrowings are outstanding for no more than 364 days at one time. As a result of the Eversource parent long-term debt issuance on January 10, 2020, the net proceeds of which were used to repay short-term borrowings outstanding under its commercial paper program, \$346.3 million of commercial paper borrowings under the Eversource parent commercial paper program were classified as Long-Term Debt as of December 31, 2019.

Under the credit facilities described above, Eversource and its subsidiaries must comply with certain financial and non-financial covenants, including a consolidated debt to total capitalization ratio. As of December 31, 2019 and 2018, Eversource and its subsidiaries were in compliance with these covenants. If Eversource or its subsidiaries were not in compliance with these covenants, an event of default would occur requiring all outstanding borrowings by such borrower to be repaid, and additional borrowings by such borrower would not be permitted under its respective credit facility.

The Company expects the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with existing borrowing availability and access to both debt and equity markets, will be sufficient to meet any working capital and future operating requirements, and capital investment forecasted opportunities.

*Intercompany Borrowings:* Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2019, there were intercompany loans from Eversource parent to CL&P of \$63.8 million, to PSNH of \$27.0 million, and to a subsidiary of NSTAR Electric of \$30.3 million. As of December 31, 2018, there were intercompany loans from Eversource parent to PSNH of \$57.0 million. Intercompany loans from Eversource parent are included in Notes Payable to Eversource Parent and classified in current liabilities on the respective subsidiary's balance sheets.

## 9. LONG-TERM DEBT

Details of long-term debt outstanding are as follows:

CL&P (Millions of Dollars)	As of December 31,	
	2019	2018
First Mortgage Bonds:		
7.875% 1994 Series D due 2024	\$ 139.8	\$ 139.8
5.750% 2004 Series B due 2034	130.0	130.0
5.625% 2005 Series B due 2035	100.0	100.0
6.350% 2006 Series A due 2036	250.0	250.0
5.750% 2007 Series B due 2037	150.0	150.0
6.375% 2007 Series D due 2037	100.0	100.0
5.500% 2009 Series A due 2019	—	250.0
2.500% 2013 Series A due 2023	400.0	400.0
4.300% 2014 Series A due 2044	475.0	475.0
4.150% 2015 Series A due 2045	350.0	350.0
3.200% 2017 Series A due 2027	500.0	300.0
4.000% 2018 Series A due 2048	800.0	500.0
Total First Mortgage Bonds	3,394.8	3,144.8

<sup>(1)</sup> These bonds are part of the same series issued by CL&P in March 2018. The aggregate outstanding principal amount of these bonds is now \$800 million.

(2) These bonds are part of the same series issued by CL&P in March 2017. The aggregate outstanding principal amount of these bonds is now \$500 million.

*Long-Term Debt Issuance Authorizations:* On February 27, 2019, the DPU approved NSTAR Electric's request for authorization to issue up to \$800 million in long-term debt through December 31, 2020. On April 26, 2019, the NHPUC approved PSNH's request for authorization to issue up to \$300 million in long-term debt through December 31, 2019. On August 14, 2019, PURA approved CL&P's request for authorization to issue up to \$675 million in long-term debt through December 31, 2022. On December 11, 2019, PURA approved Aquarion Water Company of Connecticut's request for authorization to issue up to \$45 million of long-term debt. On January 27, 2020, the DPU approved NSTAR Gas' request for authorization to issue up to \$270 million in long-term debt through December 31, 2021.

*Long-Term Debt Provisions:* The utility plant of CL&P, PSNH, Yankee Gas, NSTAR Gas and a portion of Aquarion is subject to the lien of each company's respective first mortgage bond indenture. The Eversource parent, NSTAR Electric and a portion of Aquarion debt is unsecured. Additionally, the long-term debt agreements provide that Eversource and certain of its subsidiaries must comply with certain covenants as are customarily included in such agreements, including equity requirements for NSTAR Electric, NSTAR Gas and Aquarion. Under the equity requirements, NSTAR Electric's and Aquarion's senior notes must maintain a certain consolidated indebtedness to capitalization ratio as of the end of any fiscal quarter and NSTAR Gas' outstanding long-term debt must not exceed equity.

CL&P's obligation to repay the Pollution Control Revenue Bonds (PCRBs) is secured by first mortgage bonds. The first mortgage bonds contain similar terms and provisions as the applicable series of PCRBs. If CL&P fails to meet its obligations under the first mortgage bonds, then the holder of the first mortgage bonds (the issuer of the PCRBs) would have rights under the first mortgage bonds. CL&P's tax-exempt PCRBs will be subject to redemption at par on or after September 1, 2021.

Certain secured and unsecured long-term debt securities are callable at redemption price or are subject to make-whole provisions.

Eversource, NSTAR Electric, Yankee Gas and Aquarion have certain long-term debt agreements that contain cross-default provisions. No other debt issuances contain cross-default provisions as of December 31, 2019.

*CYAPC's Pre-1983 Spent Nuclear Fuel Obligation:* Under the Nuclear Waste Policy Act of 1982, the DOE is responsible for the selection and development of repositories for, and the disposal of, spent nuclear fuel and high-level radioactive waste. CYAPC is obligated to pay the DOE for the costs to dispose of spent nuclear fuel and high-level radioactive waste generated prior to April 7, 1983 (pre-1983 Spent Nuclear Fuel) and recorded an accrual for the full liability thereof to the DOE. This liability accrues interest costs at the 3-month Treasury bill yield rate. For nuclear fuel used to generate electricity prior to April 7, 1983, payment may be made any time prior to the first delivery of spent fuel to the DOE. Fees for disposal of nuclear fuel burned on or after April 7, 1983 were billed to member companies and paid to the DOE.

As of December 31, 2019 and 2018, as a result of consolidating CYAPC, Eversource has consolidated \$11.6 million and \$39.5 million, respectively, in pre-1983 spent nuclear fuel obligations to the DOE. In December 2019 and 2018, CYAPC paid \$29 million and \$145 million, respectively, to the DOE to partially settle this obligation. The obligation includes accumulated interest costs of \$8.6 million and \$29.0 million as of December 31, 2019 and 2018, respectively. CYAPC maintains a trust to fund amounts due to the DOE for the disposal of pre-1983 spent nuclear fuel. For further information, see Note 5, "Marketable Securities," to the financial statements.

*Long-Term Debt Maturities:* Long-term debt maturities on debt outstanding for the years 2020 through 2024 and thereafter are shown below. These amounts exclude PSNH rate reduction bonds, CYAPC pre-1983 spent nuclear fuel obligation, net unamortized premiums, discounts and debt issuance costs, and other fair value adjustments as of December 31, 2019:

(Millions of Dollars)	Eversource	CL&P	NSTAR Electric	PSNH
2020	\$ 296.1	\$ —	\$ 95.0	\$ —
2021	1,033.6	—	250.0	282.0
2022	1,188.9	—	400.0	—
2023	1,665.2	400.0	80.0	325.0
2024	1,049.8	139.8	—	—
Thereafter	8,447.8	2,975.5	2,540.0	350.0
Total	\$ 13,681.4	\$ 3,515.3	\$ 3,365.0	\$ 957.0

## 10. RATE REDUCTION BONDS AND VARIABLE INTEREST ENTITIES

*Rate Reduction Bonds:* On May 8, 2018, PSNH Funding, a wholly-owned subsidiary of PSNH, issued \$635.7 million of securitized RRBs in multiple tranches with a weighted average interest rate of 3.66 percent, and final maturity dates ranging from 2026 to 2035. The RRBs are expected to be repaid by February 1, 2033. RRB payments consist of principal and interest and are paid semi-annually, beginning on February 1, 2019. The RRBs were issued pursuant to a finance order issued by the NHPUC on January 30, 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets.

The proceeds were used by PSNH Funding to purchase PSNH's stranded cost asset-recovery property, including its vested property right to bill, collect and adjust a non-bypassable stranded cost recovery charge from PSNH's retail customers. The collections are used to pay principal, interest and other costs in connection with the RRBs. The RRBs are secured by the stranded cost asset-recovery property. Cash collections from the stranded cost recovery charges and funds on deposit in trust accounts are the sole source of funds to satisfy the debt obligation. PSNH is not the owner of the RRBs, and PSNH Funding's assets and revenues are not available to pay PSNH's creditors. The RRBs are non-recourse senior secured obligations of PSNH Funding and are not insured or guaranteed by PSNH or Eversource Energy.

PSNH Funding was formed solely to issue RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets. PSNH Funding is considered a VIE primarily because the equity capitalization is insufficient to support its operations. PSNH has the power to direct the significant activities of the VIE and is most closely associated with the VIE as compared to other interest holders. Therefore, PSNH is considered the primary beneficiary and consolidates PSNH Funding in its consolidated financial statements. The following tables summarize the impact of PSNH Funding on PSNH's balance sheets and income statements:

(Millions of Dollars)

Balance Sheet:	As of December 31, 2019	As of December 31, 2018
Restricted Cash - Current Portion (included in Current Assets)	\$ 32.5	\$ 47.5
Restricted Cash - Long-Term Portion (included in Other Long-Term Assets)	3.2	3.2
Securitized Stranded Cost (included in Regulatory Assets)	565.3	608.4
Other Regulatory Liabilities (included in Regulatory Liabilities)	5.6	5.8
Accrued Interest (included in Other Current Liabilities)	8.6	14.4
Rate Reduction Bonds - Current Portion	43.2	52.3
Rate Reduction Bonds - Long-Term Portion	540.1	583.3

(Millions of Dollars)

Income Statement:	For the Year Ended December 31, 2019	For the Year Ended December 31, 2018
Amortization of RRB Principal (included in Amortization of Regulatory Assets, Net)	\$ 43.0	\$ 27.3
Interest Expense on RRB Principal (included in Interest Expense)	21.1	14.4

*Variable Interest Entities - Other:* The Company's variable interests outside of the consolidated group include contracts that are required by regulation and provide for regulatory recovery of contract costs and benefits through customer rates. Eversource, CL&P and NSTAR Electric hold variable interests in VIEs through agreements with certain entities that own single renewable energy or peaking generation power plants, with other independent power producers and with transmission businesses. Eversource, CL&P and NSTAR Electric do not control the activities that are economically significant to these VIEs or provide financial or other support to these VIEs. Therefore, Eversource, CL&P and NSTAR Electric do not consolidate these VIEs.

## 11. EMPLOYEE BENEFITS

### A. Pension Benefits and Postretirement Benefits Other Than Pension

Eversource provides defined benefit retirement plans (Pension Plans) that cover eligible employees and are subject to the provisions of ERISA, as amended by the Pension Protection Act of 2006. Eversource's policy is to annually fund the Pension Plans in an amount at least equal to an amount that will satisfy all federal funding requirements. In addition to the Pension Plans, Eversource maintains non-qualified defined benefit retirement plans (SERP Plans) which provide benefits in excess of Internal Revenue Code limitations to eligible participants consisting of current and retired employees.

Eversource also provides defined benefit postretirement plans (PBOP Plans) that provide life insurance and a health reimbursement arrangement created for the purpose of reimbursing retirees and dependents for health insurance premiums and certain medical expenses to eligible employees that meet certain age and service eligibility requirements. The benefits provided under the PBOP Plans are not vested, and the Company has the right to modify any benefit provision subject to applicable laws at that time. Eversource annually funds postretirement costs through tax deductible contributions to external trusts.

The Pension, SERP and PBOP Plans cover eligible employees, including, among others, employees of the regulated companies. Because the regulated companies recover retiree benefit costs from customers through rates, regulatory assets are recorded in lieu of recording an adjustment to Accumulated Other Comprehensive Income/(Loss) as an offset to the funded status of the Pension, SERP and PBOP Plans. Regulatory accounting is also applied to the portions of the Eversource Service retiree benefit costs that support the regulated companies, as these costs are also recovered from customers. Adjustments to the Pension, SERP and PBOP Plans' funded status for the unregulated companies are recorded on an after-tax basis to Accumulated Other Comprehensive Income/(Loss). For further information, see Note 2, "Regulatory Accounting," and Note 17, "Accumulated Other Comprehensive Income/(Loss)," to the financial statements.

**Funded Status:** The Pension, SERP and PBOP Plans are accounted for under the multiple-employer approach, with each operating company's balance sheet reflecting its share of the funded status of the plans. Although Eversource maintains marketable securities in a benefit trust, the SERP Plans do not contain any assets. For further information, see Note 5, "Marketable Securities," to the financial statements. The following tables provide information on the plan benefit obligations, fair values of plan assets, and funded status:

	<b>Pension and SERP</b>

Funded Status as of December 31st	\$ (1,353.1)	\$ (345.1)	\$ (108.5)	\$ (141.0)	\$ (946.1)	\$ (242.0)	\$ (14.4)	\$ (104.1)

As of December 31, 2019, there was a decrease in the discount rate used to calculate the pension funded status, which resulted in an increase to Eversource's pension liability of \$813.1 million, which was partially offset by changes in actual plan experience and changes in other assumptions. As of December 31, 2018, there was an increase in the discount rate used to calculate the pension funded status, which resulted in a decrease to Eversource's pension liability of approximately \$465 million, which was partially offset by changes in actual plan experience and changes in other assumptions.

The pension and SERP Plans' funded status includes the current portion of the SERP liability totaling \$8.7 million and \$8.9 million as of December 31, 2019 and 2018, respectively, which is included in Other Current Liabilities on the balance sheets.

As of December 31, 2019 and 2018, the accumulated benefit obligation for the Pension and SERP Plans is as follows:

<i>(Millions of Dollars)</i>	<b>Eversource</b>	<b>CL&amp;P</b>	<b>NSTAR Electric</b>	<b>PSNH</b>
2019	\$ 5,963.4	\$ 1,205.4	\$ 1,340.8	\$ 646.7

Fair Value of Plan Assets as of End of Year	\$ 935.9	\$ 126.3	\$ 424.4	\$ 76.0	\$ 849.6	\$ 120.6	\$ 379.1	\$ 71.2
Funded Status as of December 31st	\$ 36.9	\$ (46.4)	\$ 166.1	\$ (17.0)	\$ 8.1	\$ (41.1)	\$ 132.8	\$ (20.7)

The Eversource PBOP funded status includes prepaid assets of \$62.7 million and \$33.4 million recorded in Other Long-Term Assets and liabilities of \$25.8 million and \$25.3 million included in Accrued Pension, SERP and PBOP on the balance sheets as of December 31, 2019 and 2018, respectively.

As of December 31, 2019, there was a decrease in the discount rate used to calculate the PBOP funded status, which resulted in an increase to the Eversource PBOP liability of \$88.6 million. As of December 31, 2018, there was an increase in the discount rate used to calculate the funded status, which resulted in a decrease to the Eversource PBOP liability of approximately \$88 million.

The following actuarial assumptions were used in calculating the Pension, SERP and PBOP Plans' year end funded status:

	<b>Pension and SERP</b>				<b>PBOP</b>							
	<b>As of December 31,</b>				<b>As of December 31,</b>							
	<b>2019</b>		<b>2018</b>		<b>2019</b>		<b>2018</b>					
Discount Rate	3.04%	—	3.35%	4.22%	—	4.45%	3.26%	—	3.28%	4.38%	—	4.41%
Compensation/Progression Rate	3.50%	—	4.00%	3.50%	—	4.00%	N/A					

For the Eversource Service PBOP Plan, the health care cost trend rate is not applicable. For the Aquarion PBOP Plan, the health care trend rate is a range of 3.5 percent to 6.5 percent, with an ultimate rate of 3.5 percent to 5 percent in 2019 and 2023, for post-65 and pre-65 retirees, respectively.

*Expense:* Eversource charges net periodic benefit expense/(income) for the Pension, SERP and PBOP Plans to its subsidiaries based on the actual participant demographic data for each subsidiary's participants. The actual investment return in the trust is allocated to each of the subsidiaries annually in proportion to the investment return expected to be earned during the year. The Company utilizes the spot rate methodology to estimate the discount rate for the service and interest cost components of benefit expense, which provides a more precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve.

The components of net periodic benefit expense/(income) for the Pension, SERP and PBOP Plans, prior to amounts capitalized as Property, Plant and Equipment or deferred as regulatory assets for future recovery, are shown below. The service cost component of net periodic benefit expense/(income), less the capitalized portion, is included in Operations and Maintenance expense on the statements of income. The remaining components of net periodic benefit expense/(income), less the deferred portion, are included in Other Income, Net on the statements of income. Pension, SERP and PBOP expense reflected in the statements of cash flows for CL&P, NSTAR Electric and PSNH does not include the intercompany allocations or the corresponding capitalized and deferred portion, as these amounts are cash settled on a short-term basis.

<i>(Millions of Dollars)</i>	Pension and SERP				PBOP

The following actuarial assumptions were used to calculate Pension, SERP and PBOP expense amounts:

	Pension and SERP						PBOP					
	For the Years Ended December 31,						For the Years Ended December 31,					
	2019		2018		2017		2019		2018		2017	
Discount Rate	2.63%	- 3.55%	3.85%	- 4.62%	3.20%	- 3.90%	3.85%	- 4.65%	3.28%	- 3.94%	3.48%	- 4.64%
Expected Long-Term Rate of Return	8.25%		8.25%		8.25%		8.25%		8.25%		8.25%	
Compensation/Progression Rate	3.50%	- 4.00%	3.50%	- 4.00%	3.50%		N/A		N/A		N/A	

For the Aquarion Pension and PBOP Plans, the expected long-term rate of return was 7 percent for the years ended December 31, 2019 and 2018. For the Aquarion PBOP Plan, the health care trend rate was a range of 3.5 percent to 6.75 percent for the year ended December 31, 2019, and 7 percent for the year ended December 31, 2018.

The following is a summary of the changes in plan assets and benefit obligations recognized in Regulatory Assets and Other Comprehensive Income (OCI) as well as amounts in Regulatory Assets and OCI that were reclassified as net periodic benefit expense during the years presented:

	Pension and SERP				PBOP			
	Regulatory Assets		OCI		Regulatory Assets		OCI	
	For the Years Ended December 31,				For the Years Ended December 31,			
	2019	2018	2019	2018	2019	2018	2019	2018
(Millions of Dollars)								
Actuarial Losses/(Gains) Arising During the Year	\$ 591.6	\$ 48.6	\$ 15.4	\$ 0.7	\$ 4.6	\$ 6.4	\$ 2.3	\$ (1.2)
Actuarial Losses Reclassified as Net Periodic Benefit Expense	(137.8)	(140.1)	(5.4)	(5.6)	(8.0)	(9.9)	(0.3)	(0.4)
Actuarial Losses Securitized as Stranded Costs <sup>(1)</sup>	—	(36.7)	—	—	—	(0.8)	—	—
Prior Service Cost Arising During the Year	—	—	—	—	—	1.3	—	—
Prior Service (Cost)/Credit Reclassified as Net Periodic Benefit (Expense)/Income	(0.7)	(3.9)	(0.2)	(0.4)	25.1	23.6	(1.6)	—
Prior Service Cost Securitized as Stranded Costs <sup>(1)</sup>	—	(0.1)	—	—	—	(1.3)	—	—

<sup>(1)</sup> These amounts were reclassified to securitized regulatory assets in connection with the divestiture of PSNH's generation business. For further information see Note 2, "Regulatory Accounting" to the financial statements.

The following is a summary of the remaining Regulatory Assets and Accumulated Other Comprehensive Income amounts that have not been recognized as components of net periodic benefit expense as of December 31, 2019 and 2018, as well as the amounts that are expected to be recognized as components in 2020:

	Regulatory Assets as of December 31,		Expected 2020 Expense/(Income)	AOCI as of December 31,		Expected 2020 Expense
	2019	2018		2019	2018	
(Millions of Dollars)						
<b>Pension and SERP</b>						
Actuarial Loss	\$ 2,261.4	\$ 1,807.6	\$ 190.3	\$ 90.8	\$ 80.8	\$ 7.2
Prior Service Cost	5.6	6.3	0.9	0.9	1.1	0.2
<b>PBOP</b>						
Actuarial Loss	\$ 203.9	\$ 207.3	\$ 8.3	\$ 7.0	\$ 5.0	\$ 0.2
Prior Service (Credit)/Cost	(172.5)	(197.6)	(21.4)	1.0	2.6	0.2

The difference between the actual return and calculated expected return on plan assets for the Pension and PBOP Plans is reflected as a component of unamortized actuarial gains or losses, which are recorded in Regulatory Assets or Accumulated Other Comprehensive Income/(Loss). Unamortized actuarial gains or losses are amortized as a component of pension and PBOP expense over the estimated average future employee service period.

**Estimated Future Benefit Payments:** The following benefit payments, which reflect expected future service, are expected to be paid by the Pension, SERP and PBOP Plans:

(Millions of Dollars)	2020	2021	2022	2023	2024	2025 - 2029
Pension and SERP	\$ 320.1	\$ 328.7	\$ 337.5	\$ 346.5	\$ 352.4	\$ 1,813.1
PBOP	58.1	57.9	57.3	56.8	56.2	264.7

**Eversource Contributions:** Based on the current status of the Pension Plans and federal pension funding requirements, Eversource currently expects to make contributions of \$105.0 million in 2020, of which \$23.2 million and \$19.5 million will be contributed by CL&P and PSNH, respectively. The remaining \$57.3 million is expected to be contributed by other Eversource subsidiaries, primarily Eversource Service. Eversource currently estimates contributing \$2.9 million to the PBOP Plans in 2020.

**Fair Value of Pension and PBOP Plan Assets:** Pension and PBOP funds are held in external trusts. Trust assets, including accumulated earnings, must be used exclusively for Pension and PBOP payments. Eversource's investment strategy for its Pension and PBOP Plans is to maximize the long-term rates of return on these plans' assets within an acceptable level of risk. The investment strategy for each asset category includes a diversification of asset types, fund strategies and fund managers and it establishes target asset allocations that are routinely reviewed and periodically rebalanced. PBOP assets are comprised of assets held in the PBOP Plan trust, as well as specific assets within the Pension Plan trust (401(h) assets). The investment policy and strategy of the 401(h) assets is consistent with that of the defined benefit pension plan. Eversource's expected long-term rates of return on Pension and PBOP Plan assets are based on target asset allocation assumptions and related expected long-term rates of return. In developing its expected long-term rate of return assumptions for the Pension and PBOP Plans, Eversource evaluated input from consultants, as well as long-term inflation assumptions and historical returns. Management has assumed long-term rates of return of 8.25 percent for the Eversource Service Pension and PBOP Plan assets and a 7 percent long-term rate of return for the Aquarion Plans to estimate its 2020 Pension and PBOP costs.

These long-term rates of return are based on the assumed rates of return for the target asset allocations as follows:

	As of December 31,			
	2019		2018	
	Eversource Pension Plan and Tax-Exempt Assets Within PBOP Plan		Eversource Pension Plan and Tax-Exempt Assets Within PBOP Plan	
	Target Asset Allocation	Assumed Rate of Return	Target Asset Allocation	Assumed Rate of Return
<b>Equity Securities:</b>				
United States	15.0%	8.5%	15.0%	8.5%
Global	10.0%	8.75%	10.0%	8.75%
Non-United States	8.0%	8.5%	8.0%	8.5%
Emerging Markets	4.0%	10.0%	4.0%	10.0%
<b>Debt Securities:</b>				
Fixed Income	13.0%	4.0%	13.0%	4.0%
Public High Yield Fixed Income	4.0%	6.5%	4.0%	6.5%
Private Debt	15.0%	9.0%	15.0%	9.0%
Private Equity	15.0%	12.0%	15.0%	12.0%
Real Assets	16.0%	7.5%	16.0%	7.5%

The taxable assets within the Eversource PBOP Plan have a target asset allocation of 70 percent equity securities and 30 percent fixed income securities. The target asset allocation for the Aquarion Pension Plan is 54 percent equity, 36 percent debt and 10 percent other. The target asset allocation for the Aquarion PBOP Plan is 54 percent equity, 41 percent debt and 5 percent other.

The following table presents, by asset category, the Pension and PBOP Plan assets recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

	Pension Plan

<sup>(1)</sup> United States, Global, Non-United States and Emerging Markets equity securities that are uncategorized include investments in commingled funds and hedge funds that are overlaid with equity index swaps and futures contracts.

<sup>(2)</sup> Fixed Income investments that are uncategorized include investments in commingled funds, fixed income funds that invest in a variety of opportunistic and fixed income strategies, and hedge funds that are overlaid with fixed income futures.

<sup>(3)</sup> Real assets include real estate funds and hedge funds.

<sup>(4)</sup> The assets of the Pension Plan include a 401(h) account that has been allocated to provide health and welfare postretirement benefits under the PBOP Plan.

The Company values assets based on observable inputs when available. Equity securities, exchange traded funds and futures contracts classified as Level 1 in the fair value hierarchy are priced based on the closing price on the primary exchange as of the balance sheet date.

Fixed income securities, such as government issued securities and corporate bonds, are included in Level 2 and are valued using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. The pricing models utilize observable inputs such as recent trades for the same or similar instruments, yield curves, discount margins and bond structures. Swaps are valued using pricing models that incorporate interest rates and equity and fixed income index closing prices to determine a net present value of the cash flows.

Certain investments, such as commingled funds, private equity investments, real estate funds and hedge funds are valued using the net asset value (NAV) as a practical expedient. These investments are structured as investment companies offering shares or units to multiple investors for the purpose of providing a return. Commingled funds are recorded at NAV provided by the asset manager, which is based on the market prices of the underlying equity securities. Private Equity investments, Fixed Income partnership funds and Real Assets are valued using the NAV provided by the partnerships, which are based on discounted cash flows of the underlying investments, real estate appraisals or public market comparables of the underlying investments, or the NAV of underlying assets held in hedge funds. Assets valued at NAV are uncategorized in the fair value hierarchy.

## B. Defined Contribution Plans

Eversource maintains defined contribution plans on behalf of eligible participants. The Eversource 401k Plan provides for employee and employer contributions up to statutory limits. For eligible employees, the Eversource 401k Plan provides employer matching contributions of either 100 percent up to a maximum of three percent of eligible compensation or 50 percent up to a maximum of eight percent of eligible compensation. The Eversource 401k Plan also contains a K-Vantage feature for the benefit of eligible participants, which provides an additional annual employer contribution based on age and years of service. K-Vantage participants are not eligible to actively participate in the Eversource Pension Plan.

The total Eversource 401k Plan employer matching contributions, including the K-Vantage contributions, were as follows:

<i>(Millions of Dollars)</i>	<u>Eversource</u>	<u>CL&amp;P</u>	<u>NSTAR Electric</u>	<u>PSNH</u>
2019	\$ 41.6	\$ 5.5	\$ 10.3	\$ 3.5
2018	38.4	5.0	9.7	3.3
2017	34.5	4.6	8.5	3.7

## C. Share-Based Payments

Share-based compensation awards are recorded using a fair-value based method at the date of grant. Eversource, CL&P, NSTAR Electric and PSNH record compensation expense related to these awards, as applicable, for shares issued or sold to their respective employees and officers, as well as for the allocation of costs associated with shares issued or sold to Eversource's service company employees and officers that support CL&P, NSTAR Electric and PSNH.

*Eversource Incentive Plans:* Eversource maintains long-term equity-based incentive plans in which Eversource, CL&P, NSTAR Electric and PSNH employees, officers and board members are eligible to participate. The incentive plans authorize Eversource to grant up to 6,700,000 new shares for various types of awards, including RSUs and performance shares, to eligible employees, officers, and board members. As of December 31, 2019 and 2018, Eversource had 3,302,526 and 3,720,650 common shares, respectively, available for issuance under these plans.

Eversource accounts for its various share-based plans as follows:

- RSUs - Eversource records compensation expense, net of estimated forfeitures, on a straight-line basis over the requisite service period based upon the fair value of Eversource's common shares at the date of grant. The par value of RSUs is reclassified to Common Stock from Capital Surplus, Paid In as RSUs become issued as common shares.
- Performance Shares - Eversource records compensation expense, net of estimated forfeitures, on a straight-line basis over the requisite service period. Performance shares vest based upon the extent to which Company goals are achieved. Vesting of outstanding performance shares is based upon both the Company's EPS growth over the requisite service period and the total shareholder return as compared to the Edison Electric Institute (EEI) Index during the requisite service period. The fair value of performance shares is determined at the date of grant using a lattice model.

*RSUs:* Eversource granted RSUs under the annual long-term incentive programs that are subject to three-year graded vesting schedules for employees, and one-year graded vesting schedules, or immediate vesting, for board members. RSUs are paid in shares, reduced by amounts sufficient to satisfy withholdings for income taxes, subsequent to vesting. A summary of RSU transactions is as follows:

	<u>RSUs (Units)</u>	<u>Weighted Average Grant-Date Fair Value</u>
Outstanding as of December 31, 2018	782,365	\$ 50.25
Granted	271,144	\$ 67.91
Shares Issued	(263,219)	\$ 55.34
Forfeited	(16,127)	\$ 63.31
Outstanding as of December 31, 2019	<u>774,163</u>	<u>\$ 54.43</u>

The weighted average grant-date fair value of RSUs granted for the years ended December 31, 2019, 2018 and 2017 was \$67.91, \$56.69 and \$55.97, respectively. As of December 31, 2019 and 2018, the number and weighted average grant-date fair value of unvested RSUs was 439,293 and \$63.06 per share, and 424,119 and \$56.57 per share, respectively. During 2019, there were 236,359 RSUs at a weighted average grant-date fair value of \$57.47 per share that vested during the year and were either paid or deferred. As of December 31, 2019, 334,870 RSUs were fully vested and deferred and an additional 417,328 are expected to vest.

*Performance Shares:* Eversource granted performance shares under the annual long-term incentive programs that vest based upon the extent to which Company goals are achieved at the end of three-year performance measurement periods. Performance shares are paid in shares, after the performance measurement period. A summary of performance share transactions is as follows:

	Performance Shares (Units)	Weighted Average Grant-Date Fair Value
Outstanding as of December 31, 2018	499,564	\$ 56.08
Granted	165,022	\$ 68.33
Shares Issued	(162,959)	\$ 55.69
Forfeited	(14,720)	\$ 58.20
Outstanding as of December 31, 2019	486,907	\$ 60.30

The weighted average grant-date fair value of performance shares granted for the years ended December 31, 2019, 2018 and 2017 was \$68.33, \$56.77 and \$55.70, respectively. As of December 31, 2019 and 2018, the number and weighted average grant-date fair value of unvested performance shares was 427,894 and \$60.38 per share, and 366,995 and \$56.17 per share, respectively. During 2019, there were 88,664 performance shares at a weighted average grant-date fair value of \$58.13 per share that vested during the year and were either paid or deferred. As of December 31, 2019, 59,013 performance shares were fully vested and deferred.

*Compensation Expense:* The total compensation expense and associated future income tax benefits recognized by Eversource, CL&P, NSTAR Electric and PSNH for share-based compensation awards were as follows:

Eversource (Millions of Dollars)	For the Years Ended December 31,		
	2019	2018	2017
Compensation Expense	\$ 27.3	\$ 21.4	\$ 19.7
Future Income Tax Benefit	7.0	5.4	8.0

(Millions of Dollars)	For the Years Ended December 31,								
	2019			2018			2017		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Compensation Expense	\$ 9.8	\$ 9.7	\$ 3.3	\$ 7.8	\$ 7.7	\$ 2.9	\$ 7.0	\$ 7.0	\$ 3.2
Future Income Tax Benefit	2.5	2.5	0.8	2.0	1.9	0.7	2.9	2.8	1.3

As of December 31, 2019, there was \$24.4 million of total unrecognized compensation expense related to nonvested share-based awards for Eversource, including \$5.3 million for CL&P, \$5.3 million for NSTAR Electric and \$2.1 million for PSNH. This cost is expected to be recognized ratably over a weighted-average period of 1.75 years for Eversource, 1.79 years for CL&P and NSTAR Electric, and 1.78 years for PSNH.

An income tax rate of 25 percent was used to estimate the tax effect on total share-based payments determined under the fair-value based method for all awards. Beginning in 2019, the Company began issuing treasury shares to settle fully vested RSUs and performance shares under the Company's incentive plans.

For the years ended December 31, 2019, 2018 and 2017, excess tax benefits associated with the distribution of stock compensation awards reduced income tax expense by \$1.5 million, \$1.5 million, and \$2.9 million, respectively, which increased cash flows from operating activities on the statements of cash flows.

#### D. Other Retirement Benefits

Eversource provides retirement and other benefits for certain current and past company officers. These benefits are accounted for on an accrual basis and expensed over a period equal to the service lives of the employees. The actuarially-determined liability for these benefits is included in Other Current and Long-Term Liabilities on the balance sheets. The related expense, which includes the allocation of expense associated with Eversource's service company officers that support CL&P, NSTAR Electric and PSNH, is included in Operations and Maintenance Expense on the income statements. The liability and expense amounts are as follows:

Eversource (Millions of Dollars)	As of and For the Years Ended December 31,		
	2019	2018	2017
Actuarially-Determined Liability	\$ 52.0	\$ 49.1	\$ 53.4
Other Retirement Benefits Expense	2.7	2.7	2.8

Eversource, CL&P, NSTAR Electric and PSNH file a consolidated federal income tax return and unitary, combined and separate state income tax returns. These entities are also parties to a tax allocation agreement under which taxable subsidiaries do not pay any more taxes than they would have otherwise paid had they filed a separate company tax return, and subsidiaries generating tax losses, if any, are paid for their losses when utilized.

Deferred tax assets and liabilities are recognized for the future tax effects of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The tax effect of temporary differences is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and relevant accounting authoritative literature. The tax effects of temporary differences that give rise to the net accumulated deferred income tax obligations are as follows:

<i>(Millions of Dollars)</i>	As of December 31,

**2017 Federal Legislation:** On December 22, 2017, the Tax Cuts and Jobs Act became law, which amended existing federal tax rules and included numerous provisions that impacted corporations. In particular, the act reduced the U.S. federal corporate income tax rate from 35 percent to 21 percent effective January 1, 2018. For our regulated companies, the most significant changes are (1) the benefit of incurring a lower federal income tax expense and (2) the reduction in ADIT liabilities (now excess ADIT or EDIT), which are estimated to be approximately \$2.8 billion and are included in regulatory liabilities as of December 31, 2019. In 2019, Eversource refunded \$51.5 million (\$7.9 million at CL&P, \$31.5 million at NSTAR Electric, \$5.6 million at PSNH, \$1.4 million at Yankee Gas and \$5.1 million at NSTAR Gas) to customers. See Note 2, "Regulatory Accounting," to the financial statements for further information.

**2019 Federal Legislation:** On December 20, 2019, the "Further Consolidated Appropriations Act, 2020," became law, which provided a one-year extension of the production tax credit or the investment tax credit for renewable wind projects under Section 45 of the Internal Revenue Code of 1986 on which construction begins before January 1, 2021. If construction begins on a qualifying wind project in 2020, the project will qualify for a production tax credit of \$15 per MWh or an 18 percent investment tax credit.

**Carryforwards:** The following table provides the amounts and expiration dates of state tax credit and loss carryforwards and federal tax credit and net operating loss carryforwards:

(Millions of Dollars)	As of December 31,									
	2019					2018				
	Eversource	CL&P	NSTAR Electric	PSNH	Expiration Range	Eversource	CL&P	NSTAR Electric	PSNH	Expiration Range
Federal Net Operating Loss	\$ 19.8	\$ —	\$ —	\$ —	2033 - 2037	\$ 103.6	\$ —	\$ —	\$ —	2033 - 2037
Federal Charitable Contribution	—	—	—	—	2020 - 2022	2.2	—	—	—	2020 - 2022
State Net Operating Loss	65.5	—	—	—	2020 - 2038	80.7	—	—	—	2019 - 2038
State Tax Credit	168.1	122.3	—	—	2019 - 2024	148.9	107.0	—	—	2018 - 2023
State Charitable Contribution	9.9	—	—	—	2019 - 2023	9.6	—	—	—	2019 - 2023

In 2019, the company increased its valuation allowance reserve for state credits by \$18.5 million (\$14.2 million for CL&P), net of tax, to reflect an update for expired tax credits. In 2018, the Company increased its valuation allowance reserve for state credits by \$5.2 million (\$4.4 million for CL&P), net of tax, to reflect an update for expired tax credits.

For 2019 and 2018, state credit and state loss carryforwards have been partially reserved by a valuation allowance of \$43.0 million and \$19.5 million (net of tax), respectively.

**Unrecognized Tax Benefits:** A reconciliation of the activity in unrecognized tax benefits, all of which would impact the effective tax rate if recognized, is as follows:

(Millions of Dollars)	Eversource	CL&P
Balance as of January 1, 2017	\$ 48.4	\$ 15.3
Gross Increases - Current Year	11.4	4.7
Gross Decreases - Prior Year	(0.9)	(0.5)
Lapse of Statute of Limitations	(7.2)	(1.4)
Balance as of December 31, 2017	51.7	18.1
Gross Increases - Current Year	9.2	3.2
Gross Decreases - Prior Year	(6.5)	(0.9)
Lapse of Statute of Limitations	(8.5)	(2.2)
Balance as of December 31, 2018	45.9	18.2
Gross Increases - Current Year	12.1	4.0
Gross Increases - Prior Year	3.4	3.3
Lapse of Statute of Limitations	(6.4)	(2.4)
Balance as of December 31, 2019	\$ 55.0	\$ 23.1

**Interest and Penalties:** Interest on uncertain tax positions is recorded and generally classified as a component of Other Interest Expense on the statements of income. However, when resolution of uncertainties results in the Company receiving interest income, any related interest benefit is recorded in Other Income, Net on the statements of income. No penalties have been recorded. The amount of interest expense/(income) on uncertain tax positions recognized and the related accrued interest payable/(receivable) are as follows:

(Millions of Dollars)	Other Interest Expense/(Income)			Accrued Interest Expense	
	For the Years Ended December 31,			As of December 31,	
	2019	2018	2017	2019	2018
Eversource	\$ —	\$ (1.7)	\$ —	\$ 0.1	\$ 0.1

*Tax Positions:* During 2019 and 2018, Eversource did not resolve any of its uncertain tax positions.

*Open Tax Years:* The following table summarizes Eversource, CL&P, NSTAR Electric and PSNH's tax years that remain subject to examination by major tax jurisdictions as of December 31, 2019:

Description	Tax Years
Federal	2019
Connecticut	2016 - 2019
Massachusetts	2016 - 2019
New Hampshire	2017 - 2019

Eversource does not estimate to have an earnings impact related to unrecognized tax benefits during the next twelve months.

### 13. COMMITMENTS AND CONTINGENCIES

#### A. Environmental Matters

Eversource, CL&P, NSTAR Electric and PSNH are subject to environmental laws and regulations intended to mitigate or remove the effect of past operations and improve or maintain the quality of the environment. These laws and regulations require the removal or the remedy of the effect on the environment of the disposal or release of certain specified hazardous substances at current and former operating sites. Eversource, CL&P, NSTAR Electric and PSNH have an active environmental auditing and training program and each believes it is substantially in compliance with all enacted laws and regulations.

Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. The approach used estimates the liability based on the most likely action plan from a variety of available remediation options, including no action required or several different remedies ranging from establishing institutional controls to full site remediation and monitoring. These liabilities are estimated on an undiscounted basis and do not assume that the amounts are recoverable from insurance companies or other third parties. The environmental reserves include sites at different stages of discovery and remediation and do not include any unasserted claims.

These reserve estimates are subjective in nature as they take into consideration several different remediation options at each specific site. The reliability and precision of these estimates can be affected by several factors, including new information concerning either the level of contamination at the site, the extent of Eversource's, CL&P's, NSTAR Electric's and PSNH's responsibility for remediation or the extent of remediation required, recently enacted laws and regulations or changes in cost estimates due to certain economic factors. It is possible that new information or future developments could require a reassessment of the potential exposure to required environmental remediation. As this information becomes available, management will continue to assess the potential exposure and adjust the reserves accordingly.

The amounts recorded as environmental reserves are included in Other Current Liabilities and Other Long-Term Liabilities on the balance sheets and represent management's best estimate of the liability for environmental costs, and take into consideration site assessment, remediation and long-term monitoring costs. The environmental reserves also take into account recurring costs of managing hazardous substances and pollutants, mandated expenditures to remediate contaminated sites and any other infrequent and non-recurring clean-up costs. A reconciliation of the activity in the environmental reserves is as follows:

(Millions of Dollars)	Eversource	CL&P	NSTAR Electric	PSNH
Balance as of January 1, 2018	\$ 54.9	\$ 4.7	\$ 2.7	\$ 5.7
Additions	23.5	1.9	9.7	—
Payments/Reductions	(13.7)	(1.2)	(1.5)	(0.3)
Balance as of December 31, 2018	64.7	5.4	10.9	5.4
Additions	26.5	7.0	0.5	2.8
Payments/Reductions	(10.2)	(1.0)	(3.4)	(0.7)
Balance as of December 31, 2019	\$ 81.0	\$ 11.4	\$ 8.0	\$ 7.5

The number of environmental sites for which remediation or long-term monitoring, preliminary site work or site assessment is being performed are as follows:

	Eversource	CL&P	NSTAR Electric	PSNH
2019	57	15	15	9
2018	60	15	16	9

The increase in the reserve balance was due primarily to changes in cost estimates at certain MGP sites at the natural gas companies, at CL&P and at PSNH, for which additional remediation will be required.

Included in the number of sites and reserve amounts above are former MGP sites that were operated several decades ago and manufactured natural gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which Eversource may have potential liability. The reserve balances related to these former MGP sites were \$67.9 million and \$50.1 million as of December 31, 2019 and 2018, respectively, and related primarily to the natural gas business segment.

As of December 31, 2019, for 6 environmental sites (1 for CL&P) that are included in the Company's reserve for environmental costs, the information known and the nature of the remediation options allow for the Company to estimate the range of losses for environmental costs. As of December 31, 2019, \$35.9 million (including \$0.4 million for CL&P) had been accrued as a liability for these sites, which represents the low end of the range of the liabilities for environmental costs. Management believes that additional losses of up to approximately \$35 million (\$0.5 million at CL&P) may be incurred in executing current remediation plans for these sites.

As of December 31, 2019, for 15 environmental sites (7 for CL&P and 4 for NSTAR Electric) that are included in the Company's reserve for environmental costs, management cannot reasonably estimate the exposure to loss in excess of the reserve, or range of loss, as these sites are under investigation and/or there is significant uncertainty as to what remedial actions, if any, the Company may be required to undertake. As of December 31, 2019, \$7.4 million (including \$2.3 million for CL&P and \$1.9 million for NSTAR Electric) had been accrued as a liability for these sites. As of December 31, 2019, for the remaining 36 environmental sites (including 7 for CL&P, 11 for NSTAR Electric and 9 for PSNH) that are included in the Company's reserve for environmental costs, the \$37.7 million accrual (including \$8.7 million for CL&P, \$6.1 million for NSTAR Electric and \$7.5 million for PSNH) represents management's best estimate of the probable liability and no additional loss is anticipated at this time.

PSNH, NSTAR Gas and Yankee Gas have rate recovery mechanisms for MGP related environmental costs, therefore, changes in their respective environmental reserves do not impact Net Income. CL&P is allowed to defer certain environmental costs for future recovery. NSTAR Electric does not have a separate environmental cost recovery regulatory mechanism.

## B. Long-Term Contractual Arrangements

*Estimated Future Annual Costs:* The estimated future annual costs of significant executed, non-cancelable, long-term contractual arrangements in effect as of December 31, 2019 are as follows:

<b>Eversource</b>							
<i>(Millions of Dollars)</i>							
	2020	2021	2022	2023	2024	Thereafter	Total

<b>Total</b>	<b>\$ 67.1</b>	<b>\$ 44.1</b>	<b>\$ 46.5</b>	<b>\$ 46.9</b>	<b>\$ 43.6</b>	<b>\$ 381.9</b>	<b>\$ 630.1</b>

*Renewable Energy:* Renewable energy contracts include non-cancellable commitments under contracts of CL&P, NSTAR Electric and PSNH for the purchase of energy and capacity from renewable energy facilities. Such contracts extend through 2039 for CL&P, 2040 for NSTAR Electric and 2033 for PSNH.

On December 28, 2018, under Public Act 17-3, "An Act Concerning Zero Carbon Procurement," DEEP selected the Millstone Nuclear Power Station generation facility and Seabrook Nuclear Power Plant, along with smaller generation facilities, in DEEP's zero-carbon request for proposal. CL&P and UI were directed by DEEP to enter into ten-year contracts to purchase a combined total of approximately 9 million MWh annually from the Millstone generation facility. On March 15, 2019, CL&P and UI each signed a ten-year contract with the owner of Millstone Nuclear Power Station in order to purchase a combined amount of approximately 50 percent of the facility's output (approximately 40 percent by CL&P). The Millstone Nuclear Power Station has a 2,112 MW nameplate capacity. PURA approved the contracts on September 18, 2019. Energy deliveries and payments under these contracts began in the fourth quarter of 2019.

CL&P and UI were also directed by DEEP to enter into eight-year contracts to purchase a combined amount of approximately 18 percent of the facility's output (approximately 15 percent by CL&P), from the Seabrook Nuclear Power Plant beginning January 1, 2022. The Seabrook Nuclear Power Plant has an approximate 1,250 MW nameplate capacity. On November 22, 2019, CL&P and UI each signed an eight-year contract with the owner of the Seabrook Nuclear Power Plant. PURA approved the contracts on November 27, 2019.

The total estimated cost of the Millstone Nuclear Power Station and Seabrook Nuclear Power Plant energy purchase contracts are \$4.1 billion and are reflected in the table above. CL&P sells the energy purchased under these contracts into the market and uses the proceeds from these energy sales to offset the contract costs. As the net costs under these contracts are recovered from customers in future rates, the contracts do not have an impact on the net income of CL&P. These new contracts do not meet the definition of a derivative, and accordingly, the costs of these contracts are being accounted for as incurred.

The contractual obligations table above does not include long-term commitments signed by CL&P and NSTAR Electric, as required by the PURA and DPU, respectively, for the purchase of renewable energy and related products that are contingent on the future construction of energy facilities.

*Purchased Power and Capacity:* These contracts include capacity CfDs of CL&P through 2026, and various IPP contracts or purchase obligations for electricity which extend through 2024 for CL&P, 2031 for NSTAR Electric and 2023 for PSNH.

CL&P, along with UI, has three capacity CfDs for a total of approximately 676 MW of capacity consisting of two generation units and one demand response project. The capacity CfDs extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set contractual capacity price and the capacity market prices received by the generation facilities in the ISO-NE capacity markets. CL&P has a sharing agreement with UI, whereby UI shares 20 percent of the costs and benefits of these contracts. CL&P's portion of the costs and benefits of these contracts will be paid by, or refunded to, CL&P's customers.

The contractual obligations table above does not include CL&P's, NSTAR Electric's or PSNH's standard/basic service contracts for the purchase of energy supply, the amounts of which vary with customers' energy needs.

*Peaker CfDs:* CL&P, along with UI, has three peaker CfDs for a total of approximately 500 MW of peaking capacity through 2042. CL&P has a sharing agreement with UI, whereby CL&P is responsible for 80 percent and UI for 20 percent of the net costs or benefits of these CfDs. The Peaker CfDs pay the generation facility owner the difference between capacity, forward reserve and energy market revenues and a cost-of-service payment stream for 30 years. The ultimate cost or benefit to CL&P under these contracts will depend on the costs of plant operation and the prices that the projects receive for capacity and other products in the ISO-NE markets. CL&P's portion of the amounts paid or received under the Peaker CfDs will be recoverable from, or refunded to, CL&P's customers.

*Natural Gas Procurement:* Eversource's natural gas distribution businesses have long-term contracts for the purchase, transportation and storage of natural gas as part of its portfolio of supplies, which extend through 2038.

*Transmission Support Commitments:* Along with other New England utilities, CL&P, NSTAR Electric and PSNH entered into agreements in 1985 to support transmission and terminal facilities that were built to import electricity from the Hydro-Québec system in Canada. CL&P, NSTAR Electric and PSNH are obligated to pay, over a 30-year period ending in 2020, their proportionate shares of the annual operation and maintenance expenses and capital costs of those facilities. Future transmission support agreements beginning in the second half of 2020 are under negotiation.

The total costs incurred under these agreements were as follows:

Eversource (Millions of Dollars)	For the Years Ended December 31,		
	2019	2018	2017
Renewable Energy	\$ 320.8	\$ 218.5	\$ 235.5
Purchased Power and Capacity	62.1	72.0	103.9
Peaker CfDs	13.0	20.9	38.7
Natural Gas Procurement	448.5	432.4	377.0
Transmission Support Commitments	21.8	23.4	19.8
Coal, Wood and Other <sup>(1)</sup>	—	—	47.7

For the Years Ended December 31,

(Millions of Dollars)	2019			2018			2017		
	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH	CL&P	NSTAR Electric	PSNH
Renewable Energy	\$ 160.6	\$ 89.9	\$ 70.3	\$ 63.2	\$ 89.8	\$ 65.5	\$ 51.0	\$ 123.7	\$ 60.8
Purchased Power and Capacity	50.4	5.1	6.6	49.4	4.4	18.2	81.0	4.0	18.9
Peaker CfDs	13.0	—	—	20.9	—	—	38.7	—	—
Transmission Support Commitments	8.6	8.6	4.6	9.2	9.2	5.0	7.8	7.8	4.2
Coal, Wood and Other <sup>(1)</sup>	—	—	—	—	—	—	—	—	47.7

<sup>(1)</sup> PSNH previously entered into various arrangements for the purchase of coal, wood and the transportation services for fuel supply for its electric generating assets. In 2018, Eversource and PSNH completed the sales of PSNH's thermal and hydroelectric generation assets. Upon sale, the remaining future contractual obligations were transferred to the respective buyers. See Note 14, "Generation Asset Sale," for further information.

### C. Spent Nuclear Fuel Obligations - Yankee Companies

CL&P, NSTAR Electric and PSNH have plant closure and fuel storage cost obligations to the Yankee Companies, which have each completed the physical decommissioning of their respective nuclear power facilities and are now engaged in the long-term storage of their spent fuel. The Yankee Companies fund these costs through litigation proceeds received from the DOE and, to the extent necessary, through wholesale, FERC-approved rates charged under power purchase agreements with several New England utilities, including CL&P, NSTAR Electric and PSNH. CL&P, NSTAR Electric and PSNH, in turn recover these costs from their customers through state regulatory commission-approved retail rates. The Yankee Companies collect amounts that management believes are adequate to recover the remaining plant closure and fuel storage cost estimates for the respective plants. Management believes CL&P and NSTAR Electric will recover their shares of these obligations from their customers. PSNH has recovered its total share of these costs from its customers.

#### *Spent Nuclear Fuel Litigation:*

The Yankee Companies have filed complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to accept delivery of, and provide for a permanent facility to store, spent nuclear fuel pursuant to the terms of the 1983 spent fuel and high-level waste disposal contracts between the Yankee Companies and the DOE. The court previously awarded the Yankee Companies damages for Phases I, II and III of litigation resulting from the DOE's failure to meet its contractual obligations. These Phases covered damages incurred in the years 1998 through 2012, and the awarded damages have been received by the Yankee Companies with certain amounts of the damages refunded to their customers.

*DOE Phase IV Damages* - On May 22, 2017, each of the Yankee Companies filed a fourth set of lawsuits against the DOE in the Court of Federal Claims. The Yankee Companies sought monetary damages totaling \$104.4 million for CYAPC, YAEC and MYAPC, resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal covering the years from 2013 to 2016 ("DOE Phase IV"). On February 21, 2019, the Yankee Companies received a partial summary judgment and partial final judgment in their favor for the undisputed amount of monetary damages of \$103.2 million. The court awarded CYAPC, YAEC, and MYAPC damages of \$40.7 million, \$28.1 million and \$34.4 million, respectively. The DOE did not appeal the court's judgment and the decision became final on April 23, 2019. On June 12, 2019, each of the Yankee Companies received the damages proceeds. On June 12, 2019, the court accepted an offer of judgment in the amount of \$0.5 million to settle the disputed amount of approximately \$1 million in Phase IV contested damages. The Yankee Companies received the \$0.5 million payment in July 2019. CYAPC's and YAEC's proceeds received were classified as operating activities on the Eversource consolidated statement of cash flows.

In September 2019, the Yankee Companies made a required informational filing with FERC as to the use of proceeds, for which approval was received in the fourth quarter of 2019. In December 2019, YAEC and MYAPC returned proceeds of \$5.4 million and \$21.0 million, respectively, to its member companies, of which the Eversource utilities (CL&P, NSTAR Electric and PSNH) received a total of \$2.8 million from YAEC and \$5.0 million from MYAPC. The Eversource utilities will ultimately refund these proceeds to utility customers. Also, in December 2019, CYAPC paid \$29.0 million to the DOE to partially settle its pre-1983 spent nuclear fuel obligation.

### D. Guarantees and Indemnifications

In the normal course of business, Eversource parent provides credit assurances on behalf of its subsidiaries, including CL&P, NSTAR Electric and PSNH, in the form of guarantees. Management does not anticipate a material impact to net income or cash flows as a result of these various guarantees and indemnifications. The following table summarizes Eversource parent's exposure to guarantees and indemnifications of its subsidiaries and affiliates to external parties as of December 31, 2019:

Company	Description	Maximum Exposure (in millions)	Expiration Dates
Various	Surety Bonds <sup>(1)</sup>	\$ 29.2	2020 - 2021
Rocky River Realty Company and Eversource Service	Lease Payments for Real Estate	6.5	2024
Bay State Wind LLC	Real Estate Purchase	2.5	2020
Sunrise Wind LLC	Offshore Wind <sup>(2)</sup>	2.2	—

<sup>(1)</sup> Surety bond expiration dates reflect termination dates, the majority of which will be renewed or extended. Certain surety bonds contain credit ratings triggers that would require Eversource parent to post collateral in the event that the unsecured debt credit ratings of Eversource parent are downgraded.

- (2) On October 25, 2019, Eversource parent issued a guaranty on behalf of its 50 percent-owned affiliate, Sunrise Wind LLC, whereby Eversource parent will guaranty Sunrise Wind LLC's performance of certain obligations, in an amount not to exceed \$15.4 million, under the Offshore Wind Renewable Energy Certificate Purchase and Sale Agreement (the Agreement). The Agreement was executed on October 25, 2019, by and between NYSEERDA and Sunrise Wind LLC. Obligations of Eversource parent under the guaranty expire at such time as the guaranteed obligations have been fully performed. The Company regularly reviews performance risk under this arrangement, and in the event it becomes probable that Eversource parent will be required to perform under the guarantee, the amount of probable payment will be recorded. As of December 31, 2019, the fair value of the guarantee was immaterial.

Eversource parent issued a guaranty on behalf of its subsidiary, NPT, under which, beginning at the time the Northern Pass Transmission line would go into commercial operation, Eversource parent would guarantee the financial obligations of NPT under the TSA with HQ in an amount not to exceed \$25 million. Eversource parent's obligations under the guaranty expire upon the full, final and indefeasible payment of the guaranteed obligations. In the second quarter of 2019, Eversource concluded that construction of the NPT project was no longer probable. For further information regarding the impairment of NPT, see Note 1D, "Summary of Significant Accounting Policies - Impairment of Northern Pass Transmission," to the financial statements. While this guaranty is currently outstanding, it is expected to be extinguished in connection with the final dissolution of NPT.

#### **E. FERC ROE Complaints**

Four separate complaints were filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively, the Complainants). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive (incentive cap) of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent. On October 16, 2014, the FERC set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the Court).

All amounts associated with the first complaint period have been refunded, which totaled \$38.9 million (pre-tax and excluding interest) at Eversource and reflected both the base ROE and incentive cap prescribed by the FERC order. The refund consisted of \$22.4 million for CL&P, \$13.7 million for NSTAR Electric and \$2.8 million for PSNH.

Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of December 31, 2019. This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of December 31, 2019.

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019 and reply briefs were filed on March 8, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order provided the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those illustrative calculations indicated that for the first complaint period, for the NETOs, which FERC concludes are of average financial risk, the preliminary just and reasonable base ROE is 10.41 percent and the preliminary incentive cap on total ROE is 13.08 percent.

If the results of the illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods. These preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order.

On November 21, 2019, FERC issued an order concerning the transmission ROEs for the Midcontinent ISO transmission owners (MISO). In that order, FERC adopted another new methodology for determining base ROEs for MISO, which differed significantly from the methodology and framework set forth in its October 16, 2018 FERC order on the NETOs' ROE dockets. On December 23, 2019, the NETOs filed a Supplemental Paper Hearing Brief and a Motion to supplement the record in the NETO ROE dockets to respond to the new methodology proposed in the MISO order, as there is uncertainty to whether it may be applied to the NETOs' cases. On January 21, 2020, the FERC issued an order granting rehearing for further consideration to give the FERC more time to act on the substantive issues of the MISO ROE proceedings. Further changes to the methodology by FERC are possible as a result of the arguments in both the MISO and NETO proceedings. Given the significant uncertainty relating to the October 2018 FERC order, the November 2019 FERC order to MISO, and the FERC's rehearing of the MISO order, the Company is unable to predict the potential effect of the MISO order on the NETO complaints or the outcome of the four complaints and concluded that there is no reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods at this time. Further, the Company cannot reasonably estimate a range of gain or loss for any of the four complaint proceedings.

Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

A change of 10 basis points to the base ROE used to establish the reserves would impact Eversource's after-tax earnings by an average of approximately \$3 million for each of the four 15-month complaint periods.

#### **F. Eversource and NSTAR Electric Boston Harbor Civil Action**

On July 15, 2016, the United States Attorney on behalf of the United States Army Corps of Engineers filed a civil action in the United States District Court for the District of Massachusetts under provisions of the Rivers and Harbors Act of 1899 and the Clean Water Act against NSTAR Electric, HEEC, and the Massachusetts Water Resources Authority (together with NSTAR Electric and HEEC, the Defendants). The action alleged that the Defendants failed to comply with certain permitting requirements related to the placement of the HEEC-owned electric distribution cable beneath Boston Harbor. The action sought an order to compel HEEC to comply with cable depth requirements in the United States Army Corps of Engineers' permit or alternatively to remove the electric distribution cable and cease unauthorized work in U.S. waterways. The action also sought civil penalties and other costs.

The parties reached a settlement pursuant to which HEEC agreed to install a new 115kV distribution cable across Boston Harbor to Deer Island, utilizing a different route, and remove portions of the existing cable. Upon the installation and completion of the new cable and the removal of the portions of the existing cable, all issues surrounding the current permit from the United States Army Corps of Engineers are expected to be resolved, and such litigation is expected to be dismissed with prejudice. Construction of the new distribution cable was completed in August 2019 and removal of the portions of the existing cable was completed in January 2020.

NSTAR Electric agreed to provide a rate base credit of \$17.5 million to the Massachusetts Water Resources Authority for the new cable. This negotiated credit resulted in the initial \$17.5 million of construction costs on the new cable being expensed as incurred, all of which was fully expensed in 2018. In connection with the new cable that was placed into service, a corresponding ARO was recognized for approximately \$32 million within Other Long-Term Liabilities on the Eversource and NSTAR Electric balance sheets as of December 31, 2019. For further information on the ARO, see Note 7, "Asset Retirement Obligations," to the financial statements.

#### **G. Litigation and Legal Proceedings**

Eversource, including CL&P, NSTAR Electric and PSNH, are involved in legal, tax and regulatory proceedings regarding matters arising in the ordinary course of business, which involve management's assessment to determine the probability of whether a loss will occur and, if probable, its best estimate of probable loss. The Company records and discloses losses when these losses are probable and reasonably estimable, and discloses matters when losses are probable but not estimable or when losses are reasonably possible. Legal costs related to the defense of loss contingencies are expensed as incurred.

### **14. GENERATION ASSET SALE**

On January 10, 2018, PSNH completed the sale of its thermal generation assets. The original purchase price of \$175 million was adjusted to reflect working capital adjustments, closing date adjustments and proration of taxes and fees prior to closing. As a result of these adjustments, net proceeds from the sale of the thermal assets totaled \$116.8 million. On August 26, 2018, PSNH completed the sale of its hydroelectric generation assets. The original purchase price of \$83 million was adjusted to reflect contractual adjustments totaling \$5.8 million, resulting in net proceeds of \$77.2 million. The difference between the carrying value of the hydroelectric generation assets and the sale proceeds resulted in a gain of \$17.3 million. An estimated gain from the sale of these assets was included as an offset to the total remaining costs associated with the sale of generation assets that were securitized on May 8, 2018.

On May 8, 2018, PSNH Funding issued \$635.7 million of securitized RRBs to finance PSNH's unrecovered remaining costs resulting from the divestiture of its generation assets, which included the deferred costs resulting from the sale of the thermal generation assets. These RRBs are secured by a non-bypassable charge recoverable from PSNH customers. PSNH recorded regulatory assets and other deferred costs in connection with the generation asset divestiture and the securitization of remaining costs, which are probable of recovery through collection of the non-bypassable charge. As of December 31, 2019 and 2018, unamortized securitized stranded costs totaled \$565.3 million and \$608.4 million, respectively, and are included in Regulatory Assets on the Eversource and PSNH balance sheets. For further information on the securitized RRB issuance, see Note 10, "Rate Reduction Bonds and Variable Interest Entities."

On November 27, 2019, PSNH filed a motion for the commencement of audit of divestiture-related costs. PSNH's actual balance of costs eligible for recovery as divestiture-related costs is \$654.0 million, which is above the \$635.7 million amount securitized in May 2018. PSNH proposed to recover this balance through the SCRC tracker mechanism and believes the amount deferred is probable of recovery. These deferred costs are recorded in Other Long-Term Assets on the balance sheet.

For the year ended December 31, 2018, pre-tax income associated with the hydroelectric assets prior to the sale on August 26, 2018 was \$9.9 million. For the year ended December 31, 2017, pre-tax income associated with PSNH's generation assets was \$60.0 million. As of December 31, 2018, all generation assets had been sold.

## 15. LEASES

Eversource, including CL&P, NSTAR Electric and PSNH, has entered into lease agreements as a lessee for the use of land, office space, service centers, vehicles, information technology, and equipment. These lease agreements are classified as either finance or operating leases and the liability and right-of-use asset are recognized on the balance sheet at lease commencement. Leases with an initial term of 12 months or less are not recorded on the balance sheet and are recognized as lease expense on a straight-line basis over the lease term.

Eversource determines whether or not a contract contains a lease based on whether or not it provides Eversource with the use of a specifically identified asset for a period of time, as well as both the right to direct the use of that asset and receive the significant economic benefits of the asset. Eversource has elected the practical expedient to not separate non-lease components from lease components and instead to account for both as a single lease component, with the exception of the information technology asset class where the lease and non-lease components are separated.

The provisions of Eversource, CL&P, NSTAR Electric and PSNH lease agreements contain renewal options. The renewal options range from one year to twenty years. The renewal period is included in the measurement of the lease liability if it is reasonably certain that Eversource will exercise these renewal options.

For leases entered into or modified after the January 1, 2019 implementation date, the discount rate utilized for classification and measurement purposes as of the inception date of the lease is based on each company's collateralized incremental interest rate to borrow over a comparable term for an individual lease because the rate implicit in the lease is not determinable.

CL&P and PSNH entered into certain contracts for the purchase of energy that qualify as leases. These contracts do not have minimum lease payments and therefore are not recognized as a lease liability on the balance sheet and are not reflected in the future minimum lease payments table below. Expense related to these contracts is included as variable lease cost in the table below. The expense and long-term obligation for these contracts are also included in Note 13B, "Commitments and Contingencies - Long-Term Contractual Arrangements," to the financial statements.

The components of lease cost, prior to amounts capitalized, are as follows:

	For the Year Ended December 31, 2019			
	Eversource	CL&P	NSTAR Electric	PSNH
<i>(Millions of Dollars)</i>				
Financing Lease Cost:				
Amortization of Right-of-use-Assets	\$ 1.7	\$ 0.7	\$ 0.2	\$ 0.1
Interest on Lease Liabilities	1.2	0.6	0.6	—
Total Finance Lease Cost	2.9	1.3	0.8	0.1
Operating Lease Cost	11.7	0.5	3.4	0.1
Variable Lease Cost	60.5	13.3	—	47.2
Total Lease Cost	\$ 75.1	\$ 15.1	\$ 4.2	\$ 47.4

Operating lease rental payments charged to expense in 2018 and 2017 (which exclude CL&P's and PSNH's energy purchase contracts) were as follows:

	Eversource	CL&P	NSTAR Electric	PSNH
<i>(Millions of Dollars)</i>				
2018	\$ 10.8	\$ 10.9	\$ 11.8	\$ 2.5
2017	10.5	11.7	11.3	3.3

Operating lease cost, net of the capitalized portion, is included in Operations and Maintenance (or Purchased Power, Fuel and Transmission expense for transmission segment leases) on the statements of income. Amortization of finance lease assets is included in Depreciation on the statements of income. Interest expense on finance leases is included in Interest Expense on the statements of income.

Supplemental balance sheet information related to leases is as follows:

<i>(Millions of Dollars)</i>	Balance Sheet Classification	As of December 31, 2019			
		Eversource	CL&P	NSTAR Electric	PSNH
<b>Operating Leases:</b>					
Operating Lease Right-of-use-Assets, Net	Other Long-Term Assets	\$ 49.9	\$ 0.7	\$ 24.2	\$ 0.4
<b>Operating Lease Liabilities</b>					
Operating Lease Liabilities - Current Portion	Other Current Liabilities	\$ 8.6	\$ 0.5	\$ 0.7	\$ 0.1
Operating Lease Liabilities - Long-Term	Other Long-Term Liabilities	41.3	0.2	23.5	0.3
Total Operating Lease Liabilities		\$ 49.9	\$ 0.7	\$ 24.2	\$ 0.4
<b>Finance Leases:</b>					
Finance Lease Right-of-use-Assets, Net	Property, Plant and Equipment, Net	\$ 8.2	\$ 1.9	\$ 3.3	\$ 0.9
<b>Finance Lease Liabilities</b>					
Finance Lease Liabilities - Current Portion	Other Current Liabilities	\$ 2.4	\$ 1.6	\$ —	\$ 0.1
Finance Lease Liabilities - Long-Term	Other Long-Term Liabilities	8.1	1.4	4.4	0.8
Total Finance Lease Liabilities		\$ 10.5	\$ 3.0	\$ 4.4	\$ 0.9

The finance lease payments that NSTAR Electric will make over the next twelve months are entirely interest-related, due to escalating payments. As such, none of the finance lease payments over the next twelve months will reduce the finance lease liability.

Other information related to leases is as follows (in millions of dollars, unless otherwise noted):

	Eversource	CL&P	NSTAR Electric	PSNH
<b>As of December 31, 2019</b>				
<b>Weighted-Average Remaining Lease Term (Years):</b>				
Operating Leases	12	2	20	9
Finance Leases	12	2	22	9
<b>Weighted-Average Discount Rate (Percentage):</b>				
Operating Leases	3.9%	2.5%	4.1%	3.7%
Finance Leases	4.0%	10.5%	2.9%	3.5%

	Eversource	CL&P	NSTAR Electric	PSNH
<b>For the Year Ended December 31, 2019</b>				
<b>Cash Paid for Amounts Included in the Measurement of Lease Liabilities:</b>				
Operating Cash Flows from Operating Leases	\$ 11.4	\$ 0.4	\$ 1.6	\$ 0.1
Operating Cash Flows from Finance Leases	1.2	0.6	0.6	—
Financing Cash Flows from Finance Leases	2.6	1.4	—	0.1
<b>Supplemental Non-Cash Information on Lease Liabilities:</b>				
Right-of-use-Assets Obtained in Exchange for New Operating Lease Liabilities	2.9	1.0	0.1	0.2
Right-of-use-Assets Obtained in Exchange for New Finance Lease Liabilities	2.0	—	—	—

Future minimum lease payments, excluding variable costs, under long-term leases, as of December 31, 2019 are as follows:

<i>(Millions of Dollars)</i>	Operating Leases				Finance Leases			
	Eversource	CL&P	NSTAR Electric	PSNH	Eversource	CL&P	NSTAR Electric	PSNH
<b>Year Ending December 31,</b>								
2020	\$ 10.2	\$ 0.5	\$ 1.8	\$ 0.1	\$ 3.4	\$ 2.0	\$ 0.6	\$ 0.1
2021	9.0	0.2	1.6	0.1	2.9	1.5	0.6	0.1
2022	7.4	—	1.6	0.1	1.5	—	0.6	0.1
2023	4.9	—	1.6	—	0.8	—	0.6	0.1
2024	2.8	—	1.7	—	0.8	—	0.7	0.1
Thereafter	28.9	0.1	28.7	0.2	13.1	—	12.6	0.5
Future lease payments	63.2	0.8	37.0	0.5	22.5	3.5	15.7	1.0
Less amount representing interest	13.3	0.1	12.8	0.1	12.0	0.5	11.3	0.1
Present value of future minimum lease payments	\$ 49.9	\$ 0.7	\$ 24.2	\$ 0.4	\$ 10.5	\$ 3.0	\$ 4.4	\$ 0.9

At December 31, 2018, future minimum rental payments, excluding executory costs, such as property taxes, state use taxes, insurance, and maintenance were as follows:

<b>Operating Leases</b> (Millions of Dollars)	<b>Eversource</b>		<b>CL&amp;P</b>		<b>NSTAR Electric</b>		<b>PSNH</b>	
2019	\$	11.5	\$	1.5	\$	7.2	\$	0.5
2020		9.8		1.4		6.0		0.4
2021		8.7		1.2		5.3		0.4
2022		7.2		1.1		4.4		0.4
2023		4.7		0.5		3.1		0.2
Thereafter		32.7		0.2		29.5		0.3
Future minimum lease payments	\$	74.6	\$	5.9	\$	55.5	\$	2.2

<b>Capital Leases</b> (Millions of Dollars)	<b>Eversource</b>		<b>CL&amp;P</b>		<b>NSTAR Electric</b>		<b>PSNH</b>	
2019	\$	3.4	\$	2.0	\$	0.5	\$	0.1
2020		3.4		2.0		0.5		0.1

## 16. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of each of the following financial instruments:

*Preferred Stock, Long-Term Debt and Rate Reduction Bonds:* The fair value of CL&P's and NSTAR Electric's preferred stock is based upon pricing models that incorporate interest rates and other market factors, valuations or trades of similar securities and cash flow projections. The fair value of long-term debt and RRB debt securities is based upon pricing models that incorporate quoted market prices for those issues or similar issues adjusted for market conditions, credit ratings of the respective companies and treasury benchmark yields. The fair values provided in the table below are classified as Level 2 within the fair value hierarchy. Carrying amounts and estimated fair values are as follows:

(Millions of Dollars)	<b>Eversource</b>		<b>CL&amp;P</b>		<b>NSTAR Electric</b>		<b>PSNH</b>	
	<b>Carrying Amount</b>	<b>Fair Value</b>						
<b>As of December 31, 2019:</b>								
Preferred Stock Not Subject to Mandatory Redemption	\$ 155.6	\$ 162.0	\$ 116.2	\$ 117.8	\$ 43.0	\$ 44.2	\$ —	\$ —
Long-Term Debt	14,098.2	15,170.2	3,518.1	4,058.0	3,342.1	3,659.9	951.6	1,005.7
Rate Reduction Bonds	583.3	625.9	—	—	—	—	583.3	625.9
<b>As of December 31, 2018:</b>								
Preferred Stock Not Subject to Mandatory Redemption	\$ 155.6	\$ 156.8	\$ 116.2	\$ 113.8	\$ 43.0	\$ 43.0	\$ —	\$ —
Long-Term Debt	13,086.1	13,154.9	3,254.0	3,429.2	2,944.8	3,024.1	805.2	819.5
Rate Reduction Bonds	635.7	645.8	—	—	—	—	635.7	645.8

*Derivative Instruments and Marketable Securities:* Derivative instruments and investments in marketable securities are carried at fair value. For further information, see Note 4, "Derivative Instruments," and Note 5, "Marketable Securities," to the financial statements.

See Note 11, "Summary of Significant Accounting Policies – Fair Value Measurements," for the fair value measurement policy and the fair value hierarchy.

## 17. ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

The changes in accumulated other comprehensive income/(loss) by component, net of tax, are as follows:

Eversource (Millions of Dollars)	For the Year Ended December 31, 2019				For the Year Ended December 31, 2018			
	Qualified Cash Flow Hedging Instruments	Unrealized Gains/(Losses) on Marketable Securities	Defined Benefit Plans	Total	Qualified Cash Flow Hedging Instruments	Unrealized Losses on Marketable Securities	Defined Benefit Plans	Total
Balance as of January 1st	\$ (4.4)	\$ (0.5)	\$ (55.1)	\$ (60.0)	\$ (6.2)	\$ —	\$ (60.2)	\$ (66.4)
OCI Before Reclassifications	—	1.2	(13.3)	(12.1)	—	(0.5)	0.3	(0.2)
Amounts Reclassified from AOCI	1.4	—	5.6	7.0	1.8	—	4.8	6.6
Net OCI	1.4	1.2	(7.7)	(5.1)	1.8	(0.5)	5.1	6.4
Balance as of December 31st	\$ (3.0)	\$ 0.7	\$ (62.8)	\$ (65.1)	\$ (4.4)	\$ (0.5)	\$ (55.1)	\$ (60.0)

Eversource's qualified cash flow hedging instruments represent interest rate swap agreements on debt issuances that were settled in prior years. The settlement amount was recorded in AOCI and is being amortized into Net Income over the term of the underlying debt instrument. CL&P, NSTAR Electric and PSNH continue to amortize interest rate swaps settled in prior years from AOCI into Interest Expense over the remaining life of the associated long-term debt. Such interest rate swaps are not material to their respective financial statements.

Defined benefit plan OCI amounts before reclassifications relate to actuarial gains and losses that arose during the year and were recognized in AOCI. The unamortized actuarial gains and losses and prior service costs on the defined benefit plans are amortized from AOCI into Other Income, Net over the average future employee service period, and are reflected in amounts reclassified from AOCI. The related tax effects recognized in AOCI were net deferred tax assets of \$4.4 million and \$4.1 million in 2019 and 2017, respectively, and deferred tax liabilities of \$0.2 million in 2018.

Eversource did not elect to reclassify the income tax effects of the Tax Cuts and Jobs Act from AOCI to Retained Earnings as permitted by ASU 2018-02, *Income Statement – Reporting Comprehensive Income (Topic 220)*.

The following table sets forth the amounts reclassified from AOCI by component and the impacted line item on the statements of income:

Eversource (Millions of Dollars)	Amounts Reclassified from AOCI			Statements of Income Line Item Impacted
	For the Years Ended December 31,			
	2019	2018	2017	
Qualified Cash Flow Hedging Instruments	\$ (2.5)	\$ (2.8)	\$ (3.3)	Interest Expense
Tax Effect	1.1	1.0	1.3	Income Tax Expense
Qualified Cash Flow Hedging Instruments, Net of Tax	\$ (1.4)	\$ (1.8)	\$ (2.0)	
Defined Benefit Plan Costs:				
Amortization of Actuarial Losses	\$ (5.7)	\$ (6.0)	\$ (6.2)	Other Income, Net <sup>(1)</sup>
Amortization of Prior Service Cost	(1.8)	(0.4)	(1.1)	Other Income, Net <sup>(1)</sup>
Total Defined Benefit Plan Costs	(7.5)	(6.4)	(7.3)	
Tax Effect	1.9	1.6	2.8	Income Tax Expense
Defined Benefit Plan Costs, Net of Tax	\$ (5.6)	\$ (4.8)	\$ (4.5)	
Total Amounts Reclassified from AOCI, Net of Tax	\$ (7.0)	\$ (6.6)	\$ (6.5)	

<sup>(1)</sup> These amounts are included in the computation of net periodic Pension, SERP and PBOP costs. See Note 1M, "Summary of Significant Accounting Policies – Other Income, Net" and Note 11A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," for further information.

As of December 31, 2019, it is estimated that a pre-tax amount of \$2.5 million (\$0.7 million for NSTAR Electric and \$1.8 million for PSNH) will be reclassified from AOCI as a decrease to Net Income over the next 12 months as a result of the amortization of the interest rate swap agreements which have been settled. In addition, it is estimated that a pre-tax amount of \$7.8 million will be reclassified from AOCI as a decrease to Net Income over the next 12 months as a result of the amortization of Pension, SERP and PBOP costs.

## 18. DIVIDEND RESTRICTIONS

Eversource parent's ability to pay dividends may be affected by certain state statutes, the ability of its subsidiaries to pay common dividends and the leverage restriction tied to its consolidated total debt to total capitalization ratio requirement in its revolving credit agreement. Pursuant to the joint revolving credit agreement of Eversource, CL&P, PSNH, NSTAR Gas, Yankee Gas and Aquarion Water Company of Connecticut, and to the NSTAR Electric revolving credit agreement, each company is required to maintain consolidated total indebtedness to total capitalization ratio of no greater than 65 percent at the end of each fiscal quarter. As of December 31, 2019, all companies were in compliance with such covenant and in compliance with all such provisions of the revolving credit agreements that may restrict the payment of dividends as of December 31, 2019.

The Retained Earnings balances subject to dividend restrictions were \$4.2 billion for Eversource, \$1.8 billion for CL&P, \$2.3 billion for NSTAR Electric and \$490.3 million for PSNH as of December 31, 2019.

CL&P, NSTAR Electric and PSNH are subject to Section 305 of the Federal Power Act that makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in its capital account." Management believes that this Federal Power Act restriction, as applied to CL&P, NSTAR Electric and PSNH, would not be construed or applied by the FERC to prohibit the payment of dividends from retained earnings for lawful and legitimate business purposes. In addition, certain state statutes may impose additional limitations on such companies and on NSTAR Gas, Yankee Gas, Aquarion Water Company of Connecticut, Aquarion Water Company of Massachusetts and Aquarion Water Company of New Hampshire. Such state law restrictions do not restrict the payment of dividends from retained earnings or net income.

## 19. COMMON SHARES

The following table sets forth the Eversource parent common shares and the shares of common stock of CL&P, NSTAR Electric and PSNH that were authorized and issued, as well as the respective per share par values:

	Shares			
	Par Value	Authorized as of December 31, 2019 and 2018	Issued as of December 31,	
			2019	2018
Eversource	\$ 5	380,000,000	345,858,402	333,878,402
CL&P	\$ 10	24,500,000	6,035,205	6,035,205
NSTAR Electric	\$ 1	100,000,000	200	200
PSNH	\$ 1	100,000,000	301	301

*Common Share Issuance and Forward Sale Agreement:* On June 4, 2019, Eversource completed an equity offering of 17,940,000 common shares, consisting of 5,980,000 common shares issued directly by the Company and 11,960,000 common shares issuable pursuant to a forward sale agreement with an investment bank. The issuance of 5,980,000 common shares resulted in proceeds of \$426.9 million, net of issuance costs.

Under the forward sale agreement, a total of 11,960,000 common shares were borrowed from third parties and sold by the underwriters. The forward sale agreement allows Eversource, at its election and prior to May 29, 2020, to physically settle the forward sale agreement by issuing common shares in exchange for net proceeds at the then-applicable forward sale price specified by the agreement (initially, \$71.48 per share) or, alternatively, to settle the forward sale agreement in whole or in part through the delivery or receipt of shares or cash. The forward sale price is subject to adjustment daily based on a floating interest rate factor and will decrease in respect of certain fixed amounts specified in the agreement, such as dividends.

On December 30, 2019, Eversource physically settled a portion of the forward sale agreement by delivering 6,000,000 common shares in exchange for net proceeds of \$425.4 million. The forward sale price used to determine the cash proceeds received by Eversource was calculated based on the initial forward sale price of \$71.48 per share, as adjusted in accordance with the forward sale agreement.

The 2019 issuances of 11,980,000 common shares resulted in proceeds of \$852.3 million, net of issuance costs, and were reflected in shareholders' equity and as financing activities on the statement of cash flows.

Eversource's intent is to physically settle the forward sale agreement by issuing common shares. As of December 31, 2019, if Eversource had elected to net settle the forward sale agreement, Eversource would have been required to pay \$84.4 million under a cash settlement or would have been required to deliver 992,189 common shares under a net share settlement.

Issuances of shares under the forward sale agreement are classified as equity transactions. Accordingly, no amounts relating to the forward sale agreement have or will be recorded in the financial statements until settlements take place. Prior to any settlements, the only impact to the financial statements is the inclusion of incremental shares within the calculation of diluted EPS using the treasury stock method. See Note 22, "Earnings Per Share," to the financial statements for information on the forward sale agreement's impact on the calculation of diluted EPS.

Eversource used the net proceeds received upon the direct issuance of common shares and the net proceeds received upon partial settlement of the forward sale agreement to repay short-term debt under the commercial paper program, to fund capital spending and clean energy initiatives, and for general corporate purposes.

*Treasury Shares:* As of December 31, 2019 and 2018, there were 15,977,757 and 16,992,594 Eversource common shares held as treasury shares, respectively. As of December 31, 2019 and 2018, there were 329,880,645 and 316,885,808 Eversource common shares outstanding, respectively.

Beginning in 2019, Eversource began issuing treasury shares to satisfy awards under the Company's incentive plans, shares issued under the dividend reinvestment and share purchase plan, and matching contributions under the Eversource 401k Plan.

## 20. PREFERRED STOCK NOT SUBJECT TO MANDATORY REDEMPTION

The CL&P and NSTAR Electric preferred stock is not subject to mandatory redemption and is presented as a noncontrolling interest of a subsidiary in Eversource's financial statements.

CL&P is authorized to issue up to 9,000,000 shares of preferred stock, par value \$50 per share, and NSTAR Electric is authorized to issue 2,890,000 shares of preferred stock, par value \$100 per share. Holders of preferred stock of CL&P and NSTAR Electric are entitled to receive cumulative dividends in preference to any payment of dividends on the common stock. Upon liquidation, holders of preferred stock of CL&P and NSTAR Electric are entitled to receive a liquidation preference before any distribution to holders of common stock in an amount equal to the par value of the preferred stock plus accrued and unpaid dividends. If the net assets were to be insufficient to pay the liquidation preference in full, then the net assets would be distributed ratably to all holders of preferred stock. The preferred stock of CL&P and NSTAR Electric is subject to optional redemption by the CL&P and NSTAR Electric Boards of Directors at any time.

Details of preferred stock not subject to mandatory redemption are as follows (in millions, except in redemption price and shares):

Series	Redemption Price Per Share	Shares Outstanding as of December 31,		As of December 31,	
		2019	2018	2019	2018
<b>CL&amp;P</b>

<b>Total Eversource - Noncontrolling Interest - Preferred Stock of Subsidiaries</b>					<b>\$ 155.6 \$ 155.6</b>

## 21. COMMON SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS

Dividends on the preferred stock of CL&P and NSTAR Electric totaled \$7.5 million for each of the years ended December 31, 2019, 2018 and 2017. These dividends were presented as Net Income Attributable to Noncontrolling Interests on the Eversource statements of income. Noncontrolling Interest – Preferred Stock of Subsidiaries on the Eversource balance sheets totaled \$155.6 million as of December 31, 2019 and 2018. On the Eversource balance sheets, Common Shareholders' Equity was fully attributable to Eversource parent and Noncontrolling Interest – Preferred Stock of Subsidiaries was fully attributable to the noncontrolling interest.

For the years ended December 31, 2019, 2018 and 2017, there was no change in ownership of the common equity of CL&P and NSTAR Electric.

## 22. EARNINGS PER SHARE

Basic EPS is computed based upon the weighted average number of common shares outstanding during each period. Diluted EPS is computed on the basis of the weighted average number of common shares outstanding plus the potential dilutive effect of certain share-based compensation awards and the equity forward sale agreement, as if they were converted into outstanding common shares. The dilutive effect of unvested RSU and performance share awards, as well as the equity forward sale agreement, is calculated using the treasury stock method. RSU and performance share awards are included in basic weighted average common shares outstanding as of the date that all necessary vesting conditions have been satisfied.

As described in Note 19, "Common Shares," earnings per share dilution, if any, related to the forward sale agreement will be determined under the treasury stock method until settlement of the forward sale agreement. Under this method, the number of Eversource common shares used in calculating diluted EPS is deemed to be increased by the excess, if any, of the number of shares that would be issued upon physical settlement of the forward sale agreement less the number of shares that would be purchased by Eversource in the market (based on the average market price during the same reporting period) using the proceeds receivable upon settlement (based on the adjusted forward sale price at the end of that reporting period). Share dilution occurs when the average market price of Eversource's common shares is higher than the adjusted forward sale price.

The following table sets forth the components of basic and diluted EPS:

Eversource (Millions of Dollars, except share information)	For the Years Ended December 31,		
	2019	2018	2017
Net Income Attributable to Common Shareholders	\$ 909.1	\$ 1,033.0	\$ 988.0
Weighted Average Common Shares Outstanding:			
Basic	321,416,086	317,370,369	317,411,097
Dilutive Effect of:			
Share-Based Compensation Awards and Other	762,215	623,565	620,483
Equity Forward Sale Agreement	763,335	—	—
Total Dilutive Effect	1,525,550	623,565	620,483
Diluted	322,941,636	317,993,934	318,031,580
Basic EPS	\$ 2.83	\$ 3.25	\$ 3.11
Diluted EPS	\$ 2.81	\$ 3.25	\$ 3.11

## 23. REVENUES

On January 1, 2018, Eversource, including CL&P, NSTAR Electric and PSNH, adopted ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" using the modified retrospective approach. The core principle of this accounting guidance is that revenue is recognized when promised goods or services (referred to as performance obligations) are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. A five-step model is used for recognizing and measuring revenue from contracts with customers, which includes identifying the contract with the customer, identifying the performance obligations promised within the contract, determining the transaction price (the amount of consideration to which the company expects to be entitled), allocating the transaction price to the performance obligations and recognizing revenue when (or as) the performance obligation is satisfied.

The following table presents operating revenues disaggregated by revenue source:

Eversource (Millions of Dollars)	For the Year Ended December 31, 2019						
	Electric Distribution	Natural Gas Distribution	Electric Transmission	Water Distribution	Other	Eliminations	Total
Revenues from Contracts with Customers							
Retail Tariff Sales

*Retail Tariff Sales:* Regulated utilities provide products and services to their regulated customers under rates, pricing, payment terms and conditions of service, regulated by each state regulatory agency. The arrangement whereby a utility provides commodity service to a customer for a price approved by the respective state regulatory commission is referred to as a tariff sale contract, and the tariff governs all aspects of the provision of regulated services by utilities. The majority of revenue for Eversource, CL&P, NSTAR Electric and PSNH is derived from regulated retail tariff sales for the sale and distribution of electricity, natural gas and water to residential, commercial and industrial retail customers.

The utility's performance obligation for the regulated tariff sales is to provide electricity, natural gas or water to the customer as demanded. The promise to provide the commodity represents a single performance obligation, as it is a promise to transfer a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. Revenue is recognized over time as the customer simultaneously receives and consumes the benefits provided by the utility, and the utility satisfies its performance obligation. Revenue is recognized based on the output method as there is a directly observable output to the customer (electricity, natural gas or water units delivered to the customer and immediately consumed). Each Eversource utility is entitled to be compensated for performance completed to date (service taken by the customer) until service is terminated.

In regulated tariff sales, the transaction prices are the rates approved by the respective state regulatory commissions. In general, rates can only be changed through formal proceedings with the state regulatory commissions. These rates are designed to recover the costs to provide service to customers and include a return on investment. Regulatory commission-approved tracking mechanisms are included in these rates and are also used to recover, on a fully-reconciling basis, certain costs, such as the procurement of energy supply, retail transmission charges, energy efficiency program costs, net metering for distributed generation, and restructuring and stranded costs. These tracking mechanisms result in rates being changed periodically to ensure recovery of actual costs incurred.

Customers may elect to purchase electricity from each Eversource electric utility or may contract separately with a competitive third party supplier. Revenue is not recorded for the sale of the electricity commodity to customers who have contracted separately with these suppliers, only the delivery to a customer, as the utility is acting as an agent on behalf of the third party supplier.

*Wholesale Transmission Revenues:* The Eversource electric transmission-owning companies (CL&P, NSTAR Electric and PSNH) each own and maintain transmission facilities that are part of an interstate power transmission grid over which electricity is transmitted throughout New England. CL&P, NSTAR Electric and PSNH, as well as most other New England utilities, are parties to a series of agreements that provide for coordinated planning and operation of the region's transmission facilities and the rules by which they acquire transmission services. The Eversource electric transmission-owning companies have a combination of FERC-approved regional and local formula rates that work in tandem to recover all their transmission costs. These rates are part of the ISO-NE Tariff. Regional rates recover the costs of higher voltage transmission facilities that benefit the region and are collected from all New England transmission customers, including the Eversource distribution businesses. Eversource's local rates recover the companies' total transmission revenue requirements, less revenues received from regional rates and other sources, and are collected from Eversource's distribution businesses and other transmission customers. The distribution businesses of Eversource, in turn, recover the FERC approved charges from retail customers through annual or semiannual tracking mechanisms, which are retail tariff sales.

The utility's performance obligation for regulated wholesale transmission sales is to provide transmission services to the customer as demanded. The promise to provide transmission service represents a single performance obligation. The transaction prices are the transmission rate formulas as defined by the ISO-NE Tariff and are regulated and established by FERC. Wholesale transmission revenue is recognized over time as the performance obligation is completed, which occurs as transmission services are provided to customers. The revenue is recognized based on the output method. Each Eversource utility is entitled to be compensated for performance completed to date (e.g., use of the transmission system by the customer).

*Wholesale Market Sales Revenues:* Wholesale market sales transactions include sales of energy and energy-related products into the ISO-NE wholesale electricity market, sales of natural gas to third party marketers, and also the sale of RECs to various counterparties. ISO-NE oversees the region's wholesale electricity market and administers the transactions and terms and conditions, including payment terms, which are established in the ISO-NE tariff, between the buyers and sellers in the market. Pricing is set by the wholesale market. The wholesale transactions in the ISO-NE market occur on a day-ahead basis or a real-time basis (daily) and are, therefore, short-term. Transactions are tracked and reported by ISO-NE net by the hour, which is the net hourly position of energy sales and purchases by each market participant. Beginning in the first quarter of 2018, the performance obligation for ISO-NE energy transactions is defined to be the net by hour transaction. Revenue is recognized when the performance obligation for these energy sales transactions is satisfied, when the sale occurs and the energy is transferred to the customer. For sales of natural gas, transportation, and natural gas pipeline capacity to third party marketers, revenue is recognized when the performance obligation is satisfied at the point in time the sale occurs and the natural gas or related product is transferred to the marketer. RECs are sold to various counterparties, and revenue is recognized when the performance obligation is satisfied upon transfer of title to the customer through the New England Power Pool Generation Information System.

*Other Revenues from Contracts with Customers:* Other revenues from contracts with customers primarily include property rentals that are not deemed leases. These revenues are generally recognized on a straight-line basis over time as the service is provided to the customer. Other revenues also include revenues from Eversource's service company, which is eliminated in consolidation.

*Reserve for Revenues Subject to Refund:* Current base rates include an estimate of income taxes, which was based on the U.S. federal corporate income tax rate in effect at the time of the rate proceeding. Eversource established a regulatory liability, recorded as a reduction to revenue, to reflect the difference between the 35 percent federal corporate income tax rate included in rates charged to customers and the 21 percent federal corporate income tax rate, effective January 1, 2018 as a result of the Tax Cuts and Jobs Act, until rates billed to customers reflect the lower federal tax rate. Effective May 1, 2018, CL&P adjusted distribution rates billed to customers to reflect the lower federal income tax rate prospectively and, as of December 31, 2018, fully refunded its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through April 30, 2018. Effective November 15, 2018, Yankee Gas adjusted distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through November 14, 2018. Effective July 1, 2019, PSNH adjusted temporary distribution rates to reflect the lower federal income tax rate prospectively and to refund its regulatory liability associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 through June 30, 2019. For NSTAR Electric and NSTAR Gas, a December 2018 DPU order indicated that the DPU would not require a revision to base distribution rates for any potential refunds associated with the higher federal corporate income tax rate billed to customers in the period between January 1, 2018 to the effective dates of each company's rate changes (effective February 1, 2018 for NSTAR Electric and July 1, 2018 for NSTAR Gas).

*Alternative Revenue Programs:* In accordance with accounting guidance for rate-regulated operations, certain of Eversource's utilities' rate making mechanisms qualify as alternative revenue programs (ARPs) if they meet specified criteria, in which case revenues may be recognized prior to billing based on allowed levels of collection in rates. Eversource's utility companies recognize revenue and record a regulatory asset or liability once the condition or event allowing for the automatic adjustment of future rates occurs. ARP revenues include both the recognition of the deferral adjustment to ARP revenues, when the regulator-specified condition or event allowing for additional billing or refund has occurred, and an equal and offsetting reversal of the ARP deferral to revenues as those amounts are reflected in the price of service in subsequent periods.

Eversource's ARPs include the revenue decoupling mechanism and the annual reconciliation adjustment to transmission formula rates, described below.

- Certain Eversource electric, natural gas and water companies, including CL&P and NSTAR Electric, have revenue decoupling mechanisms approved by a regulatory commission (decoupled companies). Decoupled companies' distribution revenues are not directly based on sales volumes. The decoupled companies reconcile their annual base distribution rate recovery to pre-established levels of baseline distribution delivery service revenues, with any difference between the allowed level of distribution revenue and the actual amount realized adjusted through subsequent rates.
- The transmission formula rates provide for the annual reconciliation and recovery or refund of estimated costs to actual costs. The financial impacts of differences between actual and estimated costs are deferred for future recovery from, or refund to, transmission

customers. This transmission deferral reconciles billed transmission revenues to the revenue requirement for our transmission businesses.

*Other Revenues:* Other Revenues include certain fees charged to customers that are not considered revenue from contracts with customers and lease revenues under lessor accounting guidance. Lease revenues totaled \$4.4 million at Eversource, \$1.0 million at CL&P, and \$2.7 million at NSTAR Electric for the year ended December 31, 2019.

*Intercompany Eliminations:* Intercompany eliminations are primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business, and revenues from Eversource's service company. Intercompany revenues and expenses between the Eversource wholesale transmission businesses and the Eversource distribution businesses and from Eversource's service company are eliminated in consolidation and included in "Eliminations" in the table above.

*Receivables:* Receivables, Net on the balance sheet include trade receivables from our retail customers and receivables arising from ISO-NE billing related to wholesale transmission contracts and wholesale market transactions, sales of natural gas and capacity to marketers, sales of RECs, and property rentals. In general, retail tariff customers and wholesale transmission customers are billed monthly and the payment terms are generally due and payable upon receipt of the bill.

*Unbilled Revenues:* Unbilled Revenues on the balance sheet represent estimated amounts due from retail customers for electricity, natural gas or water delivered to customers but not yet billed. The utility company has satisfied its performance obligation and the customer has received and consumed the commodity as of the balance sheet date, and therefore, the utility company records revenue for those services in the period the services were provided. Only the passage of time is required before the company is entitled to payment for the satisfaction of the performance obligation. Payment from customers is due monthly as services are rendered and amounts are billed. Actual amounts billed to customers when meter readings become available may vary from the estimated amount.

Unbilled revenues are recognized by allocating estimated unbilled sales volumes to the respective customer classes, and then applying an estimated rate by customer class to those sales volumes. Unbilled revenue estimates reflect seasonality, weather, customer usage patterns, customer rates in effect for customer classes, and the timing of customer billing. The companies that have a decoupling mechanism record a regulatory deferral to reflect the actual allowed amount of revenue associated with their respective decoupled distribution rate design.

*Practical Expedients:* Eversource has elected practical expedients in the accounting guidance that allow the company to record revenue in the amount that the company has a right to invoice, if that amount corresponds directly with the value to the customer of the company's performance to date, and not to disclose related unsatisfied performance obligations. Retail and wholesale transmission tariff sales fall into this category, as these sales are recognized as revenue in the period the utility provides the service and completes the performance obligation, which is the same as the monthly amount billed to customers. There are no other material revenue streams for which Eversource has unsatisfied performance obligations.

## **24. SEGMENT INFORMATION**

Eversource is organized into the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reportable segments and Other based on a combination of factors, including the characteristics of each segments' services, the sources of operating revenues and expenses and the regulatory environment in which each segment operates. These reportable segments represent substantially all of Eversource's total consolidated revenues. Revenues from the sale of electricity, natural gas and water primarily are derived from residential, commercial and industrial customers and are not dependent on any single customer. The Electric Distribution reportable segment includes the results of PSNH's generation facilities prior to sales in January and August 2018, and NSTAR Electric's solar power facilities. On December 4, 2017, Eversource acquired Aquarion, and its water distribution business was deemed a reportable segment beginning in 2018. Eversource's reportable segments are determined based upon the level at which Eversource's chief operating decision maker assesses performance and makes decisions about the allocation of company resources.

The remainder of Eversource's operations is presented as Other in the tables below and primarily consists of 1) the equity in earnings of Eversource parent from its subsidiaries and intercompany interest income, both of which are eliminated in consolidation, and interest expense related to the debt of Eversource parent, 2) the revenues and expenses of Eversource Service, most of which are eliminated in consolidation, 3) the operations of CYAPC and YAEC, 4) Eversource Water Ventures, Inc., parent company of Aquarion, 5) the results of other unregulated subsidiaries, which are not part of its core business, and 6) Eversource parent's equity ownership interests that are not consolidated, which primarily include the offshore wind business, a natural gas pipeline owned by Enbridge, Inc., and a renewable energy investment fund.

In the ordinary course of business, Yankee Gas and NSTAR Gas purchase natural gas transmission services from the Enbridge, Inc. natural gas pipeline project described above. These affiliate transaction costs total \$62.5 million annually and are classified as Purchased Power, Fuel and Transmission on the Eversource statements of income.

Each of Eversource's subsidiaries, including CL&P, NSTAR Electric and PSNH, has one reportable segment.

Cash flows used for investments in plant included in the segment information below are cash capital expenditures that do not include amounts incurred but not paid, cost of removal, AFUDC related to equity funds, and the capitalized portions of pension and PBOP expense.

Eversource's segment information is as follows:

For the Year Ended December 31, 2019

<b>Eversource</b> <i>(Millions of Dollars)</i>	<b>Electric Distribution</b>	<b>Natural Gas Distribution</b>	<b>Electric Transmission</b>	<b>Water Distribution</b>	<b>Other</b>	<b>Eliminations</b>	<b>Total</b>

- (1) Effective January 1, 2018, upon implementation of the new revenue accounting guidance, the electric distribution segment is presented gross and intercompany transmission billings are presented in the eliminations column, as Eversource believes that the electric distribution segment acts as a principal, rather than an agent, in its contracts with retail customers. Retail customers contract directly with the electric distribution utility and do not differentiate between distribution and transmission services. Therefore, the electric distribution segment revenues, which are derived from retail customer billings, are presented gross of the eliminations. Prior to 2018, the electric distribution segment presented intercompany electric transmission billings net, based on indicators of net presentation prior to the new revenue guidance. See Note 23 "Revenues," to the financial statements regarding accounting for revenues.
- (2) See Note 1B, "Summary of Significant Accounting Policies - Basis of Presentation," for information regarding the correction of cash investments in plant reported in 2018.

## 25. ACQUISITION OF AQUARION AND GOODWILL

### A. Acquisition of Aquarion

On December 4, 2017, Eversource acquired Aquarion for a purchase price of \$1.675 billion, consisting of approximately \$880 million in cash and \$795 million of assumed Aquarion debt. Aquarion is a holding company that owns three separate regulated water utility subsidiaries engaged in the water collection, treatment and distribution business that operate in Connecticut, Massachusetts and New Hampshire. These regulated utilities collect, treat and distribute water to residential, commercial and industrial customers, to other utilities for resale, and for private and municipal fire protection. Aquarion and its subsidiaries became wholly-owned subsidiaries of Eversource, and Eversource's consolidated financial information includes Aquarion and its subsidiaries' activity beginning December 4, 2017. The approximate \$880 million cash purchase price included the \$745 million equity purchase price plus a \$135 million shareholder loan that was repaid at closing.

*Pro Forma Financial Information:* The following unaudited pro forma financial information reflects the pro forma combined results of operations of Eversource and Aquarion and reflects the amortization of purchase price adjustments assuming the acquisition had taken place on January 1, 2017. The unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of the consolidated results of operations that would have been achieved or the future consolidated results of operations of Eversource.

<i>(Pro forma amounts in millions, except share amounts)</i>	<b>For the Year Ended December 31, 2017</b>	
Operating Revenues	\$	7,947.7
Net Income Attributable to Common Shareholders		1,019.1
Basic EPS		3.21
Diluted EPS		3.20

*Aquarion Revenues and Pre-Tax Income:* The impact of Aquarion on Eversource's accompanying consolidated statement of income included operating revenues of \$15.9 million and pre-tax income of \$1.1 million for the year ended December 31, 2017.

### B. Goodwill

In a business combination, the excess of the purchase price over the estimated fair values of the assets acquired and liabilities assumed is recognized as goodwill. Goodwill is evaluated for impairment at least annually and more frequently if indicators of impairment arise. In accordance with the accounting standards, if the fair value of a reporting unit is less than its carrying value (including goodwill), the goodwill is tested for impairment. Goodwill is not subject to amortization, however is subject to a fair value based assessment for impairment at least annually and whenever facts or circumstances indicate that there may be an impairment. A resulting write-down, if any, would be charged to Operating Expenses.

Eversource's reporting units for the purpose of testing goodwill are Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. These reporting units are consistent with the operating segments underlying the reportable segments identified in Note 24, "Segment Information," to the financial statements.

Eversource completed its annual goodwill impairment test for Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units as of October 1, 2019 and determined that no impairment existed. There were no events subsequent to October 1, 2019 that indicated impairment of goodwill. The annual goodwill assessment included an evaluation of the Company's share price and credit ratings, analyst reports, financial performance, cost and risk factors, long-term strategy, growth and future projections, as well as macroeconomic, industry and market conditions. This evaluation required the consideration of several factors that impact the fair value of the reporting units, including conditions and assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, and internal estimates of future cash flows and net income.

The following table presents goodwill by reportable segment as of December 31, 2019 and 2018:

<i>(Billions of Dollars)</i>	<b>Electric Distribution</b>		<b>Electric Transmission</b>		<b>Natural Gas Distribution</b>		<b>Water Distribution</b>		<b>Total</b>	
Goodwill	\$	2.5	\$	0.6	\$	0.4	\$	0.9	\$	4.4

## 26. QUARTERLY FINANCIAL DATA (UNAUDITED)

### Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

No events that would be described in response to this item have occurred with respect to Eversource, CL&P, NSTAR Electric or PSNH.

#### Item 9A. Controls and Procedures

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for the preparation, integrity, and fair presentation of the accompanying Financial Statements and other sections of this combined Annual Report on Form 10-K. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for establishing and maintaining adequate internal controls over financial reporting. The internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment. Under the supervision and with the participation of the principal executive officer and principal financial officer, an evaluation of the effectiveness of internal controls over financial reporting was conducted based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting at Eversource, CL&P, NSTAR Electric and PSNH were effective as of December 31, 2019.

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, evaluated the design and operation of the disclosure controls and procedures as of December 31, 2019 to determine whether they are effective in ensuring that the disclosure of required information is made timely and in accordance with the Securities Exchange Act of 1934 and the rules and regulations of the SEC. This evaluation was made under management's supervision and with management's participation, including the principal executive officer and principal financial officer as of the end of the period covered by this Annual Report on Form 10-K. There are inherent limitations of disclosure controls and procedures, including the possibility of human error and the circumventing or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. The principal executive officer and principal financial

officer have concluded, based on their review, that the disclosure controls and procedures of Eversource, CL&P, NSTAR Electric and PSNH are effective to ensure that information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 (i) is recorded, processed, summarized, and reported within the time periods specified in SEC rules and regulations and (ii) is accumulated and communicated to management, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

There have been no changes in internal controls over financial reporting for Eversource, CL&P, NSTAR Electric and PSNH during the quarter ended December 31, 2019 that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

## Item 9B. Other Information

No information is required to be disclosed under this item as of December 31, 2019, as this information has been previously disclosed in applicable reports on Form 8-K during the fourth quarter of 2019.

## PART III

### Item 10. Directors, Executive Officers and Corporate Governance

The information in Item 10 is provided as of February 26, 2020, except where otherwise indicated.

Certain information required by this Item 10 is omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly Owned Subsidiaries.

#### Eversource Energy

In addition to the information provided below concerning the executive officers of Eversource Energy, incorporated herein by reference is the information to be contained in the sections captioned “Election of Trustees,” “Governance of Eversource Energy” and the related subsections, “Selection of Trustees,” and “Delinquent Section 16(a) Reports” of Eversource Energy’s definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 26, 2020.

Set forth below is certain information concerning Eversource Energy’s executive officers:

Name	Age	Title

Werner J. Schweiger	60	Executive Vice President and Chief Operating Officer of Eversource Energy; Chief Executive Officer and director of CL&P
Jay S. Buth	50	Vice President, Controller and Chief Accounting Officer of Eversource Energy and CL&P

*James J. Judge.* Mr. Judge has served as Chairman of the Board, President and Chief Executive Officer of Eversource Energy since May 3, 2017. Previously, Mr. Judge served as President and Chief Executive Officer, and a Trustee, of Eversource Energy from May 4, 2016 until May 3, 2017, and as Executive Vice President and Chief Financial Officer of Eversource Energy from April 10, 2012 until May 4, 2016. Mr. Judge has served as Chairman of CL&P since May 4, 2016, and as a director of CL&P since April 10, 2012. Based on his experience described above, Mr. Judge has the skills and qualifications necessary to serve as a director of CL&P.

*Philip J. Lembo.* Mr. Lembo has served as Chief Financial Officer of Eversource Energy and CL&P since May 4, 2016. He previously served as Treasurer of Eversource Energy from April 10, 2012 until May 3, 2017, and as Treasurer of CL&P from April 10, 2012 until March 31, 2017. Mr. Lembo has served as Executive Vice President of Eversource Energy and CL&P since August 8, 2016. Previously, he served as Senior Vice President of Eversource Energy and CL&P from May 4, 2016 until August 8, 2016, and as Vice President of Eversource Energy and CL&P from April 10, 2012 until May 4, 2016. Mr. Lembo has served as a director of CL&P since May 4, 2016. Based on his experience described above, Mr. Lembo has the skills and qualifications necessary to serve as a director of CL&P.

*Gregory B. Butler.* Mr. Butler has served as General Counsel of Eversource Energy since May 1, 2001, and of CL&P since March 9, 2006. He has served as Executive Vice President of Eversource Energy and CL&P since August 8, 2016. Previously, Mr. Butler served as Senior Vice President of Eversource Energy from December 1, 2005 to August 8, 2016, and of CL&P from March 9, 2006 until August 8, 2016. He has served as a director of CL&P since April 22, 2009. Based on his experience described above, Mr. Butler has the skills and qualifications necessary to serve as a director of CL&P.

*Christine M. Carmody.* Ms. Carmody has served as Executive Vice President-Human Resources and Information Technology of Eversource Energy since August 8, 2016. Previously Ms. Carmody served as Senior Vice President-Human Resources of Eversource Energy from May 4, 2016 until August 8, 2016; and of Eversource Service from April 10, 2012 until August 8, 2016.

*Joseph R. Nolan, Jr.* Mr. Nolan has served as Executive Vice President-Strategy, Customer and Corporate Relations of Eversource Energy since February 5, 2020. Previously Mr. Nolan served as Executive Vice President-Customer and Corporate Relations of Eversource Energy from August 8, 2016 to February 5, 2020. He served as Senior Vice President-Corporate Relations of Eversource Energy from May 4, 2016 until August 8, 2016, and of Eversource Service from April 10, 2012 until August 8, 2016.

*Werner J. Schweiger.* Mr. Schweiger has served as Executive Vice President and Chief Operating Officer of Eversource Energy since September 2, 2014, and as Chief Executive Officer of CL&P since August 11, 2014. Mr. Schweiger has served as a director of CL&P since May 28, 2013. He previously served as President of CL&P from June 2, 2015 until June 27, 2016. Based on his experience described above, Mr. Schweiger has the skills and qualifications necessary to serve as a director of CL&P.

*Jay S. Buth.* Mr. Buth has served as Vice President, Controller and Chief Accounting Officer of Eversource Energy and CL&P since April 10, 2012.

There are no family relationships between any director or executive officer and any other trustee, director or executive officer of Eversource Energy or CL&P and none of the above executive officers or directors serves as an executive officer or director pursuant to any agreement or understanding with any other person. Our executive officers hold the offices set forth opposite their names until the next annual meeting of the Board of Trustees, in the case of Eversource Energy, and the Board of Directors, in the case of CL&P, and until their successors have been elected and qualified.

## **CL&P**

**The information required by this Item 10 for CL&P has been omitted from this report but is set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).**

## **Item 11. Executive Compensation**

### **Eversource Energy**

The information required by this Item 11 for Eversource Energy is incorporated herein by reference to certain information contained in Eversource Energy's definitive proxy statement for solicitation of proxies, which is expected to be filed with the SEC on or about March 26, 2020, under the sections captioned "Compensation Discussion and Analysis," plus related subsections, and "Compensation Committee Report," plus related subsections following such Report.

### **NSTAR ELECTRIC and PSNH**

Certain information required by this Item 11 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

## **CL&P**

**The information required by this Item 11 for CL&P has been omitted from this report but is set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).**

## **Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

### **Eversource Energy**

In addition to the information below under "Securities Authorized for Issuance Under Equity Compensation Plans," incorporated herein by reference is the information contained in the sections "Common Share Ownership of Certain Beneficial Owners" and "Common Share Ownership of Trustees and Management" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 26, 2020.

### **NSTAR ELECTRIC and PSNH**

Certain information required by this Item 12 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

## **CL&P**

**The information required by this Item 12 for CL&P has been omitted from this report but is set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).**

## SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table sets forth the number of Eversource Energy common shares issuable under Eversource Energy equity compensation plans, as well as their weighted exercise price, as of December 31, 2019, in accordance with the rules of the SEC:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights <sup>(1)</sup>	Weighted-average exercise price of outstanding options, warrants and rights <sup>(2)</sup>	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column <sup>(1)</sup> )
Equity compensation plans approved by security holders	1,261,070	\$—	3,302,526
Equity compensation plans not approved by security holders <sup>(3)</sup>	—	—	—
Total	1,261,070	\$—	3,302,526

(1) Includes 774,163 common shares for distribution in respect of restricted share units, and 486,907 performance shares issuable at target, all pursuant to the terms of our Incentive Plan.

(2) The weighted-average exercise price does not take into account restricted share units or performance shares, which have no exercise price.

(3) Securities set forth in this table are authorized for issuance under compensation plans that have been approved by shareholders of Eversource Energy or the former shareholders of NSTAR.

### Item 13. Certain Relationships and Related Transactions, and Director Independence

#### Eversource Energy

Incorporated herein by reference is the information contained in the sections captioned "Trustee Independence" and "Related Person Transactions" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 26, 2020.

#### NSTAR ELECTRIC and PSNH

Certain information required by this Item 13 has been omitted for NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

#### CL&P

The information required by this Item 13 for CL&P has been omitted from this report but is set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).

### Item 14. Principal Accountant Fees and Services

#### Eversource Energy

Incorporated herein by reference is the information contained in the section "Relationship with Independent Auditors" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 26, 2020.

#### CL&P, NSTAR ELECTRIC and PSNH

The information required by this Item 14 for CL&P, NSTAR Electric and PSNH has been omitted from this report but is set forth in the Annual Report on Form 10-K for 2019 filed with the SEC on a combined basis with Eversource Energy on February 27, 2020. Such report is also available in the Investors section at [www.eversource.com](http://www.eversource.com).

## PART IV

### Item 15. Exhibits and Financial Statement Schedules

(a) 1. Financial Statements:

The financial statements filed as part of this Annual Report on Form 10-K are set forth under Item 8, "Financial Statements and Supplementary Data."

2. Schedules

I. Financial Information of Registrant:

Eversource Energy (Parent) Balance Sheets as of December 31, 2019 and 2018 \*

Eversource Energy (Parent) Statements of Income for the Years Ended  
December 31, 2019, 2018 and 2017 \*

Eversource Energy (Parent) Statements of Comprehensive Income for the Years Ended

CERTIFICATION PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, James J. Judge, certify that:

1. I have reviewed this Annual Report on Form 10-K of Eversource Energy (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with this Annual Report on Form 10-K of Eversource Energy (the registrant) for the period ending December 31, 2019 as filed with the Securities and Exchange Commission (the Report), we, James J. Judge, Chairman of the Board, President and Chief Executive Officer of the registrant, and Philip J. Lembo, Executive Vice President and Chief Financial Officer of the registrant, certify, pursuant to 18 U.S.C. Sec. 1350, as adopted pursuant to Sec. 906 of the Sarbanes-Oxley Act of 2002, that:

- 1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- 2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

## Dividend Reinvestment Plan

Eversource offers a dividend reinvestment and share purchase plan. This plan is sponsored by the company and not only offers the reinvestment of dividends but provides both registered shareholders and interested first-time investors an affordable alternative for buying and selling Eversource common shares. To request an enrollment package, please call 1-800-999-7269 or log into: [www.computershare.com/investor](http://www.computershare.com/investor)

## Direct Deposit for Quarterly Dividends

Direct deposit provides the convenience of automatic and immediate access to your funds, while eliminating the possibility for mail delays and lost, stolen or destroyed checks. This service is free of charge to you. Please call 1-800-999-7269 to request an enrollment form.

## Common Share Dividend Payment Dates

Last business day of March, June, September and December.

## Common Share Information

The common shares of Eversource Energy are listed on the New York Stock Exchange. The ticker symbol is "ES." The high and low daily prices and dividends paid for the past two years, by quarters, are shown in the table below.

Year	Quarter	High	Low	Quarterly Dividend per Share
2019	First	\$72.26	\$63.10	\$0.535
	Second	\$77.87	\$69.09	\$0.535
	Third	\$85.93	\$74.77	\$0.535
	Fourth	\$86.55	\$78.58	\$0.535
2018	First	\$64.99	\$55.93	\$0.505
	Second	\$60.89	\$52.76	\$0.505
	Third	\$63.88	\$57.49	\$0.505
	Fourth	\$70.53	\$60.56	\$0.505

## Corporate Governance

For information on Corporate Governance at Eversource, go to our website, [www.eversource.com](http://www.eversource.com), and select "Investors" and see "Corporate Governance" options.

*Eversource would like to offer special thanks to Sandy Cloud, who is retiring from our Board of Trustees after 20 years of exceptional service to our company, including the last eight years as lead trustee. Sandy always offered wise counsel to this company's leadership as we pursued new opportunities and navigated challenges.*

#1 utility on the Forbes/JUST Capital Most Just Companies list, honoring our combination of corporate social responsibility and business success.

#1 energy company on Newsweek's list of Most Responsible Companies, recognizing our commitment to corporate social responsibility.

Rated by institutional investors as one of the top two US utilities in multiple categories related to executive leadership, sustainability, governance and investor relations.

One of only four energy companies on the Barron's 100 Most Sustainable Companies list, based on an evaluation of more than 230 performance indicators that address environmental, social and corporate governance issues.

**ATTACHMENT 8-1**

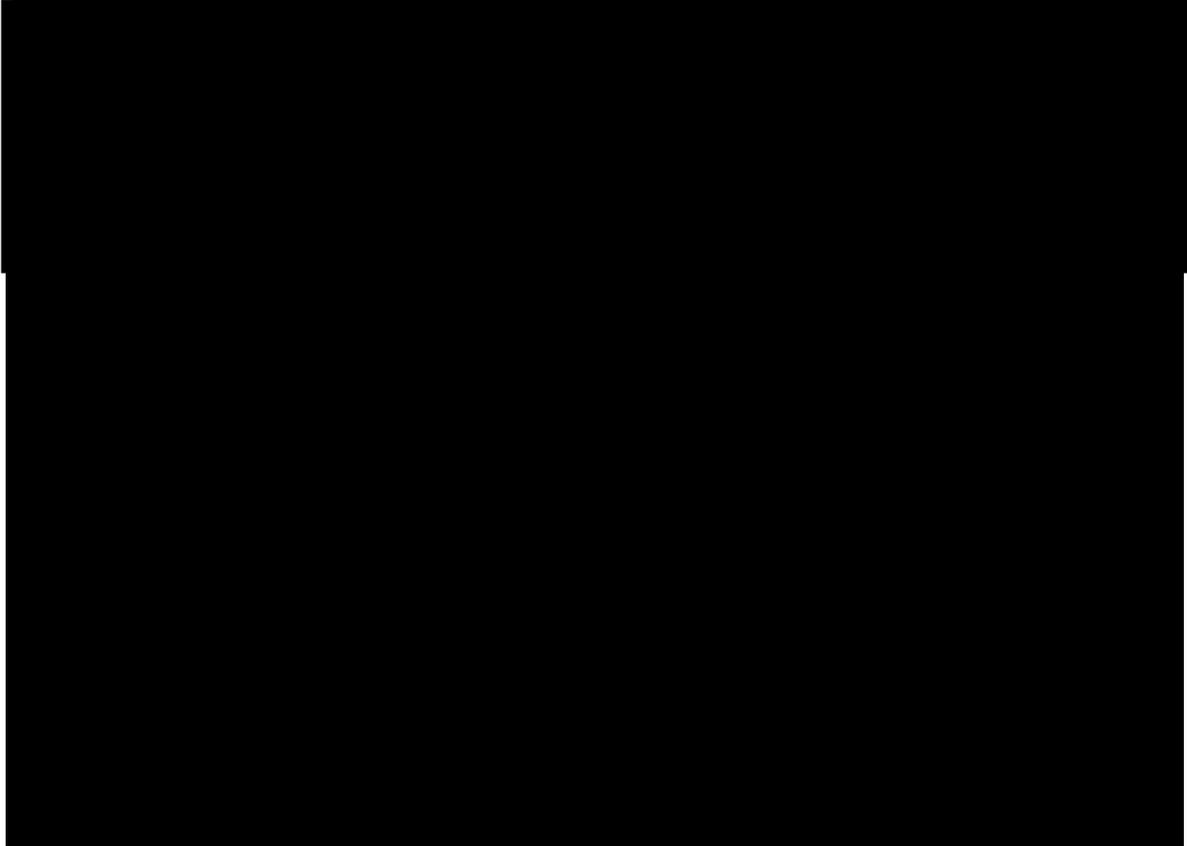

**Interconnection and  
Deliverability**

## 8 INTERCONNECTION AND DELIVERABILITY

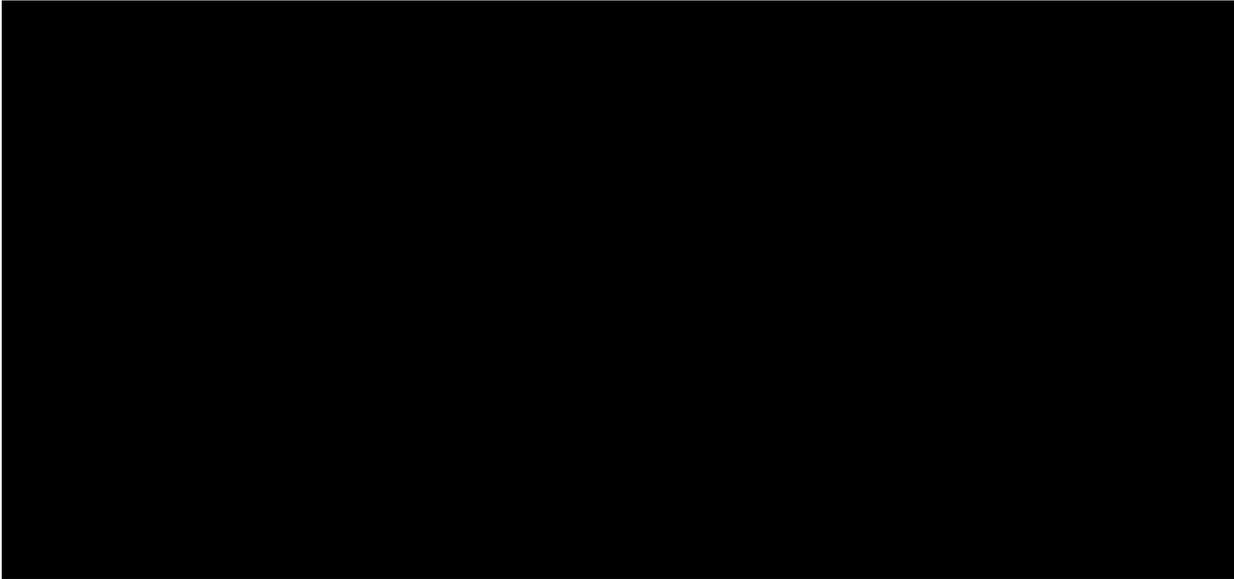

6.4.8 Proposers are required to demonstrate the Offshore Wind Generation Facility's interconnection status and deliverability capabilities. A narrative description of the interconnection and deliverability plan should be included in the Proposal Narrative. Detailed supporting information should be included in the required Interconnection and Deliverability Plan attachment. Proposers should provide the following information:

The Proposer takes a holistic view of interconnection and deliverability, from the Project's Lease Area [REDACTED] This includes consideration of the critical aspects of development: interconnection studies, onshore route site control, and the onshore permitting plan. This holistic approach applies not only to this Section 8 of the Proposal, but also to the Proposer's approach to site control (Section 4 of the Proposal) and permitting (Section 9 of the Proposal).

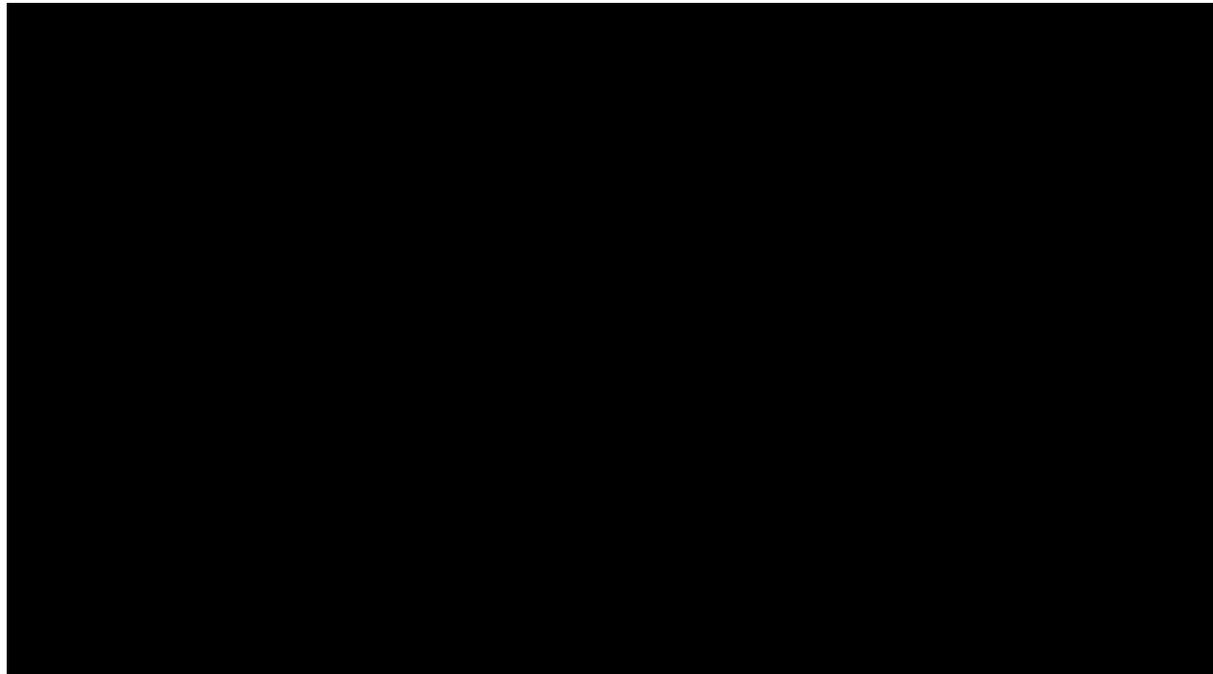

For the offshore transmission facilities, the Proposer was able to draw on proven designs, used extensively on other Ørsted offshore wind projects.

## 8.1 Interconnection Request to NYISO

1. a) Provide documentation to show evidence of the interconnection request to NYISO or any neighboring control areas for Capacity Resource Interconnection Service (CRIS) or for Energy Resource Interconnection Service, or similar interconnection standards in neighboring control areas.

[REDACTED]

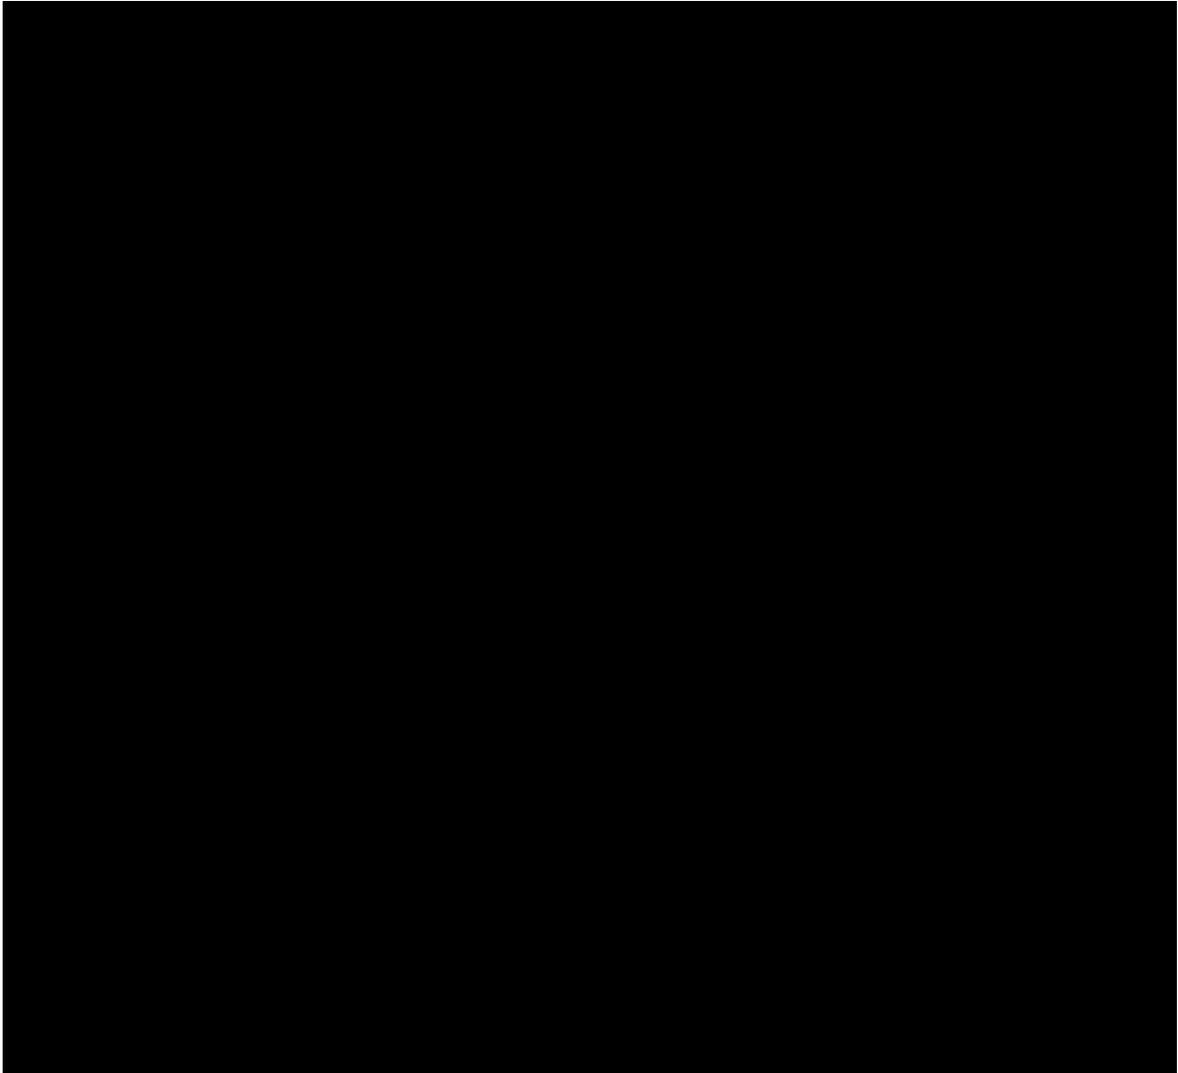

[REDACTED]

---

b) For Proposals where capacity is to be delivered to NYCA, Proposers should describe any required transmission system upgrades and provide an estimate of the required transmission system upgrade costs under NYISO CRIS to meet deliverability requirements in NYISO. Evidence that Proposer has a pending, valid interconnection request is sufficient. Describe the status of any planned interconnection to the grid.

---

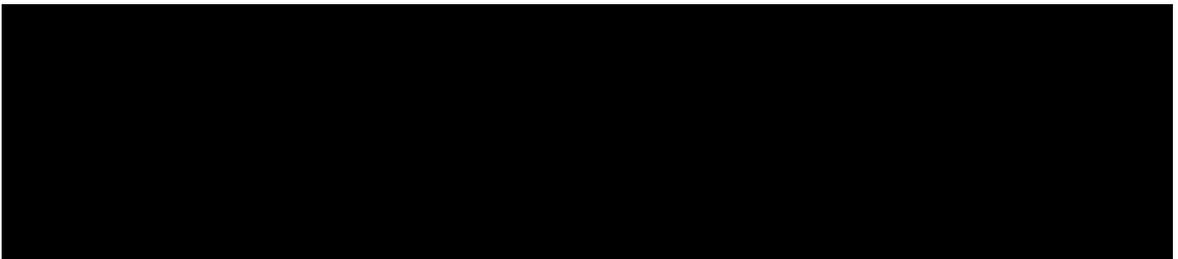

[REDACTED]

---

c) Any interconnection studies undertaken by the applicable control area or third parties on behalf of Proposer must be provided.

---

- 
- [REDACTED]
  - [REDACTED]
  - [REDACTED]

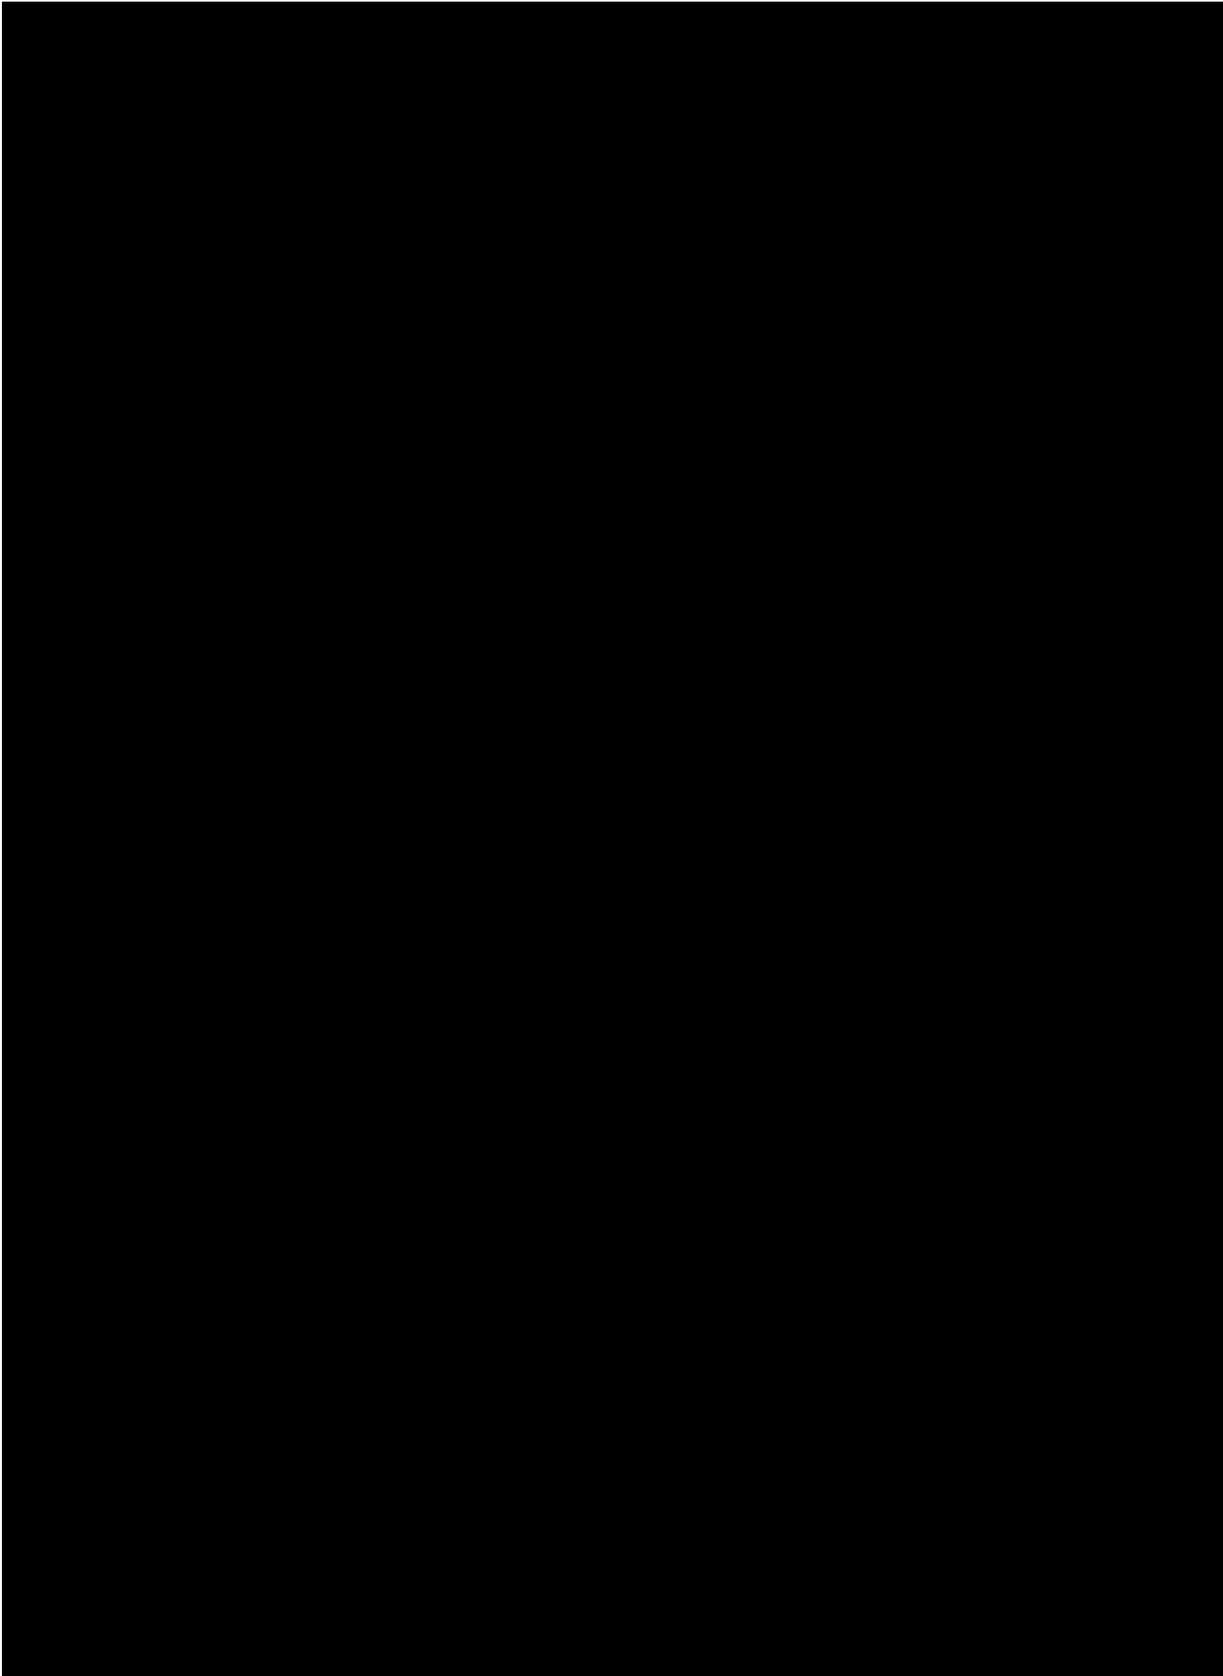

## 8.2 Electrical One-Line Diagram

---

2. Provide a copy of an electrical one-line diagram showing the interconnection facilities and the relevant facilities of the transmission provider.
- 

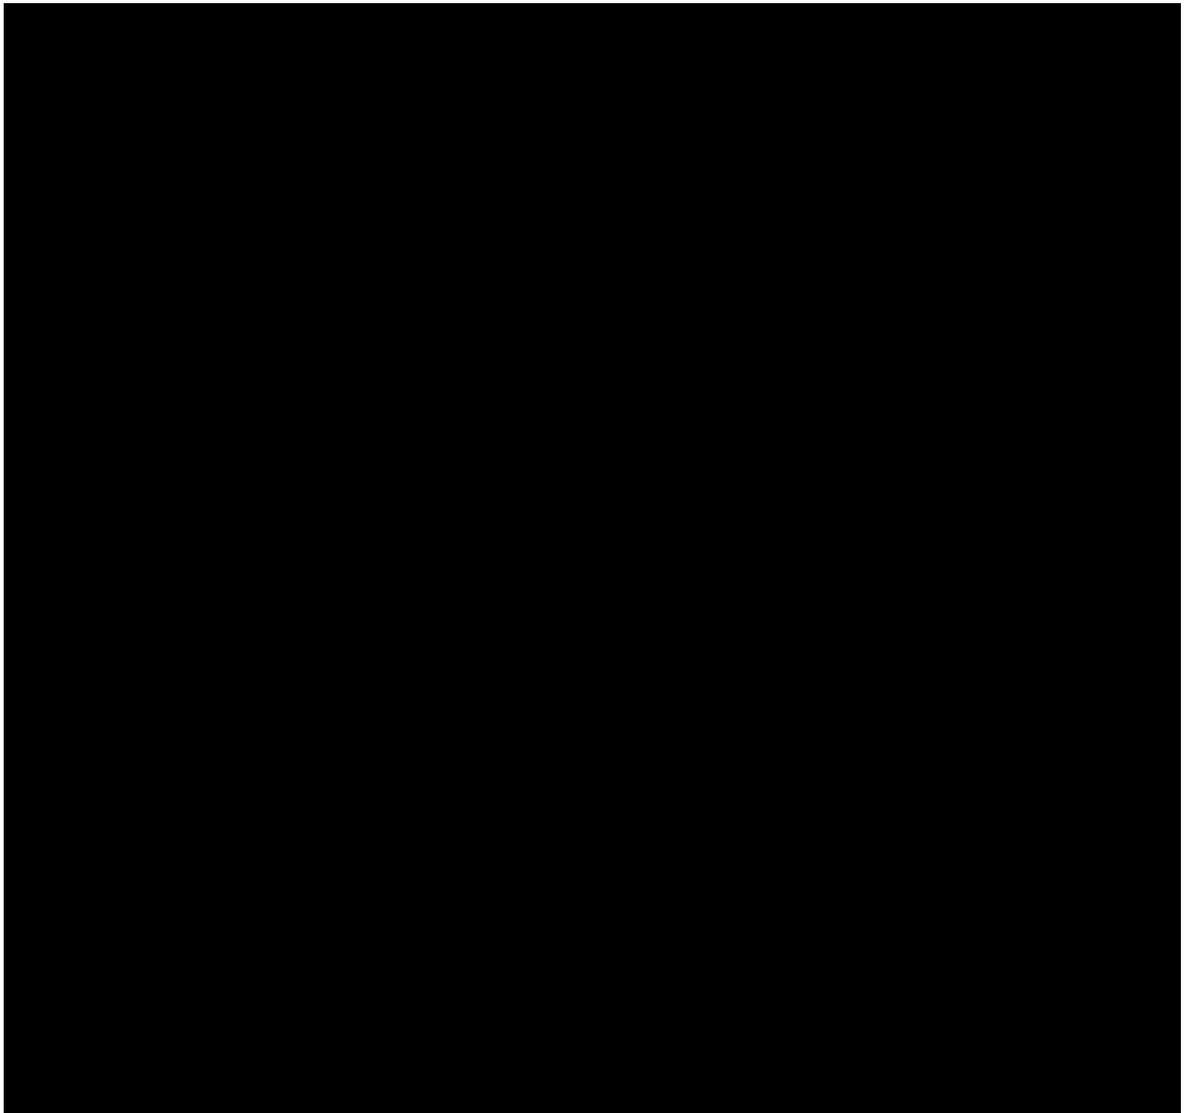

[REDACTED]

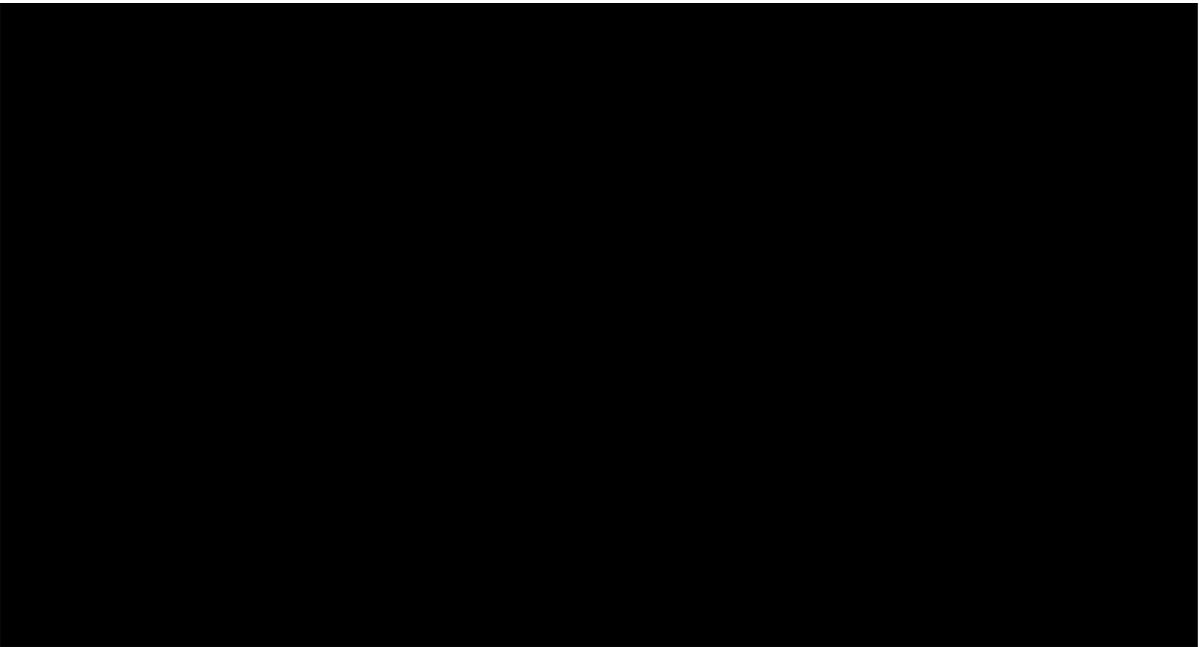

### 8.3 Interconnection and Transmission Upgrades

---

3. Identify and provide an estimate of cost, supported by an independent third party, for all proposed or anticipated interconnection and transmission upgrades, including any transmission upgrades beyond the point of interconnection that are needed to ensure delivery of energy from the Offshore Wind Generation Facility into NYCA. Describe measures to identify and control the regulatory and operational risks related to the delivery of energy from the Offshore Wind Generation Facility.
- 

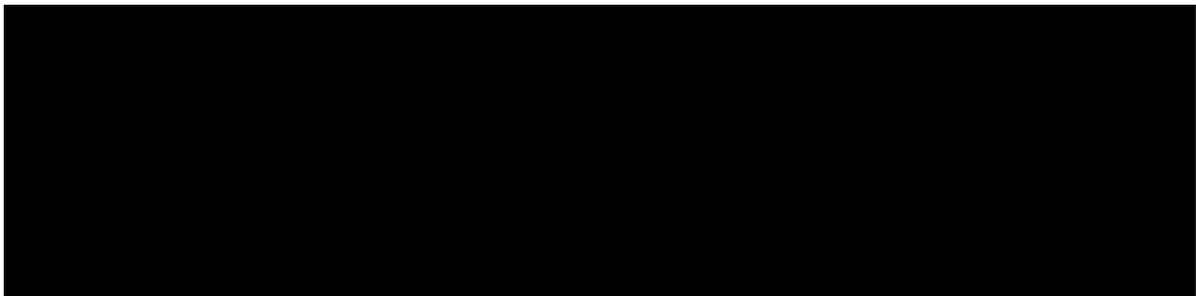

---

Describe measures to identify and control the regulatory and operational risks related to the delivery of energy from the Offshore Wind Generation Facility.

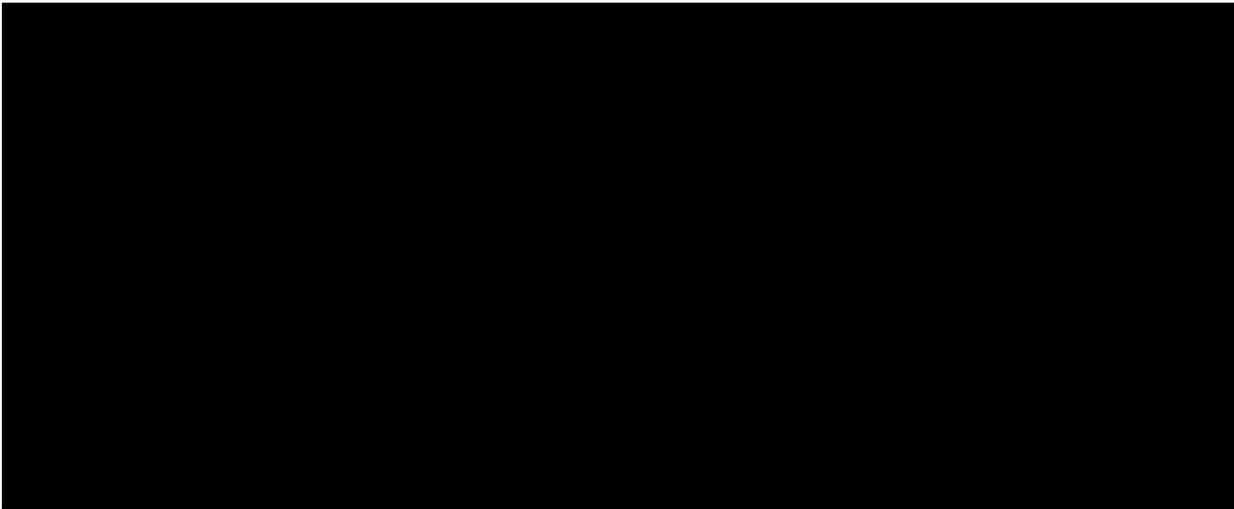

---

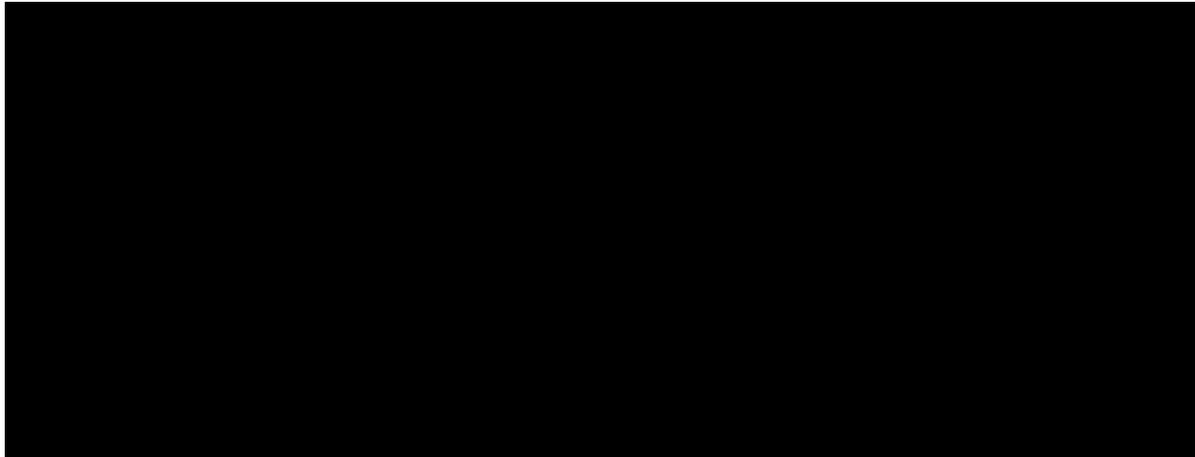

#### 8.4 Energy Delivery into NYCA

- 
4. Demonstrate that energy and associated ORECs generated by the facility can be delivered into the NYCA. For an Offshore Wind Generation Facility interconnecting in an adjacent Control Area, describe how Proposer intends to fulfill the External Project Delivery Requirement.
- 

#### 8.5 Injection Point Capacity

- 
5. Provide detail regarding the available capacity, at the time of submission, of the proposed Injection Point.
-

# 1 PROJECT INFORMATION

## 1.1 Introduction

Tetra Tech, Inc. prepared this Visibility Study for the development of the Sunrise Wind 2 Offshore Wind Project (Project) in response to Section 6.4.16 Visibility and Viewshed Impacts of Request for Proposals ORECRFP20-1. [REDACTED]

[REDACTED]

The Project consists of an offshore wind farm to be located in [REDACTED] [REDACTED] to connect power produced by the wind farm to the regional electric transmission system. [REDACTED]

[REDACTED]

[REDACTED]

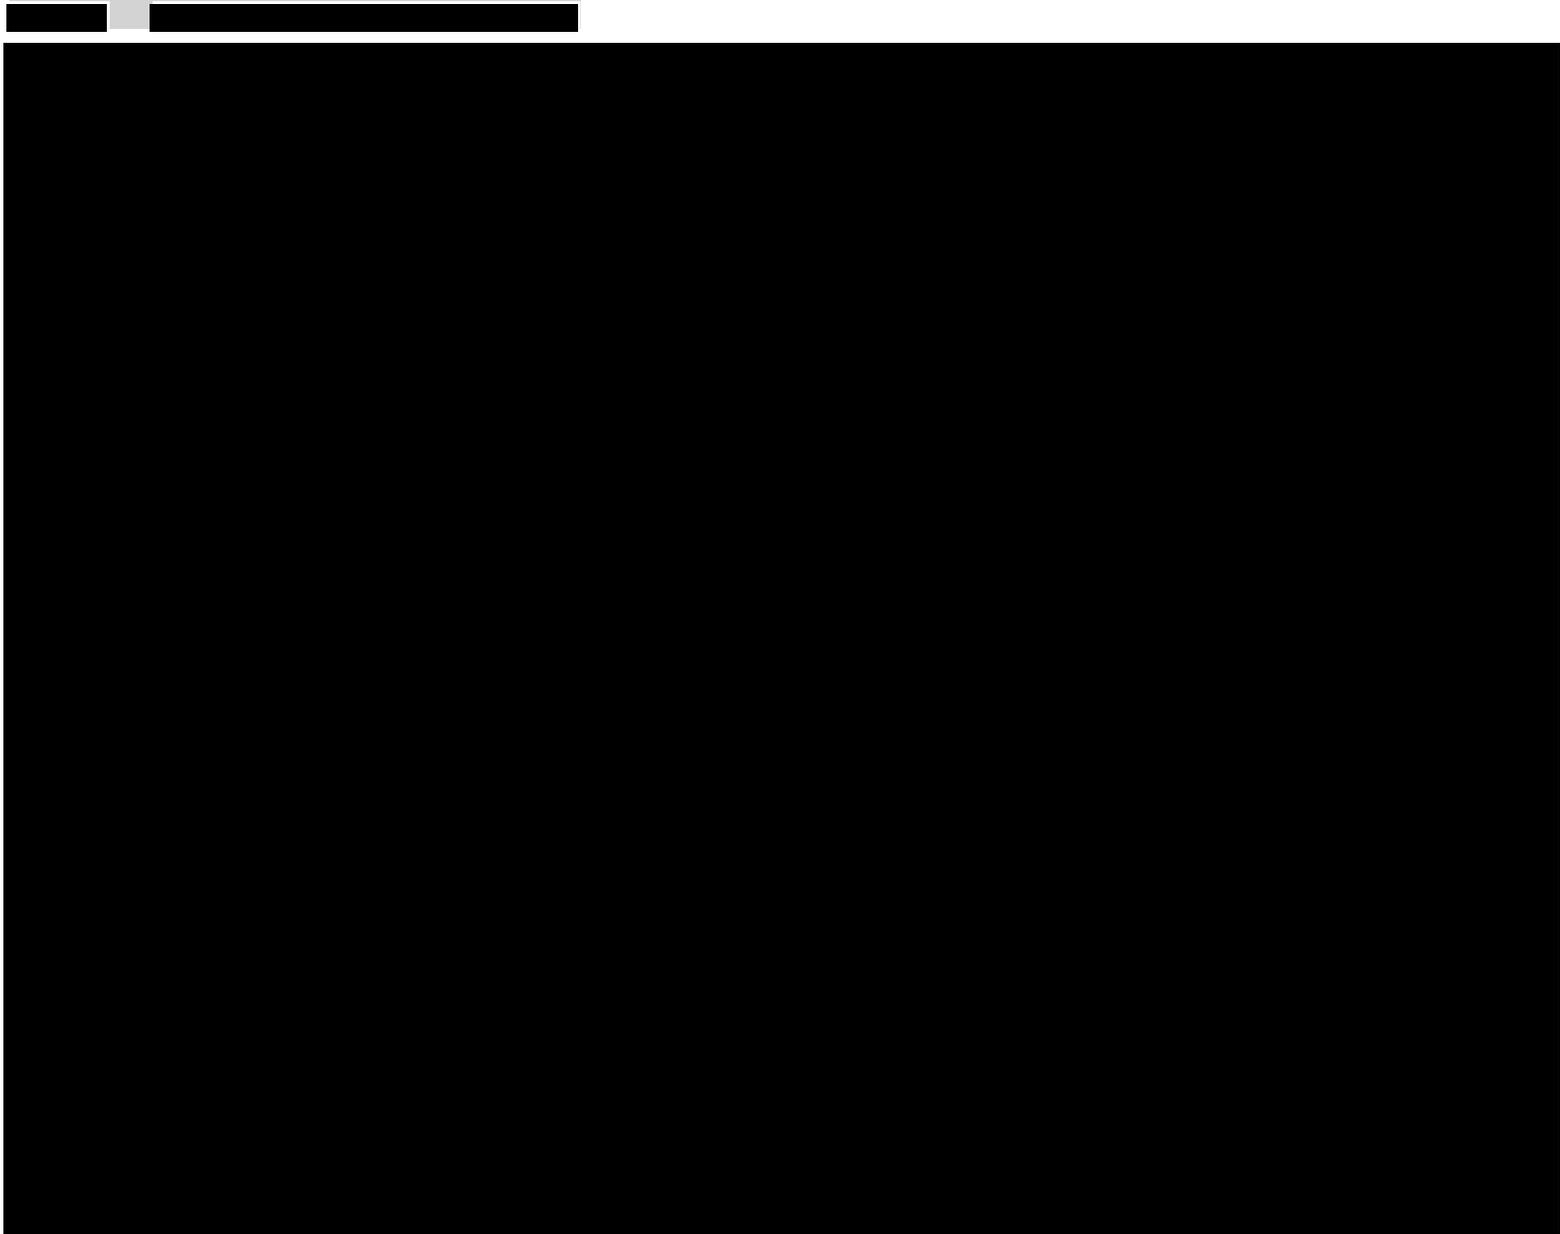

[REDACTED]

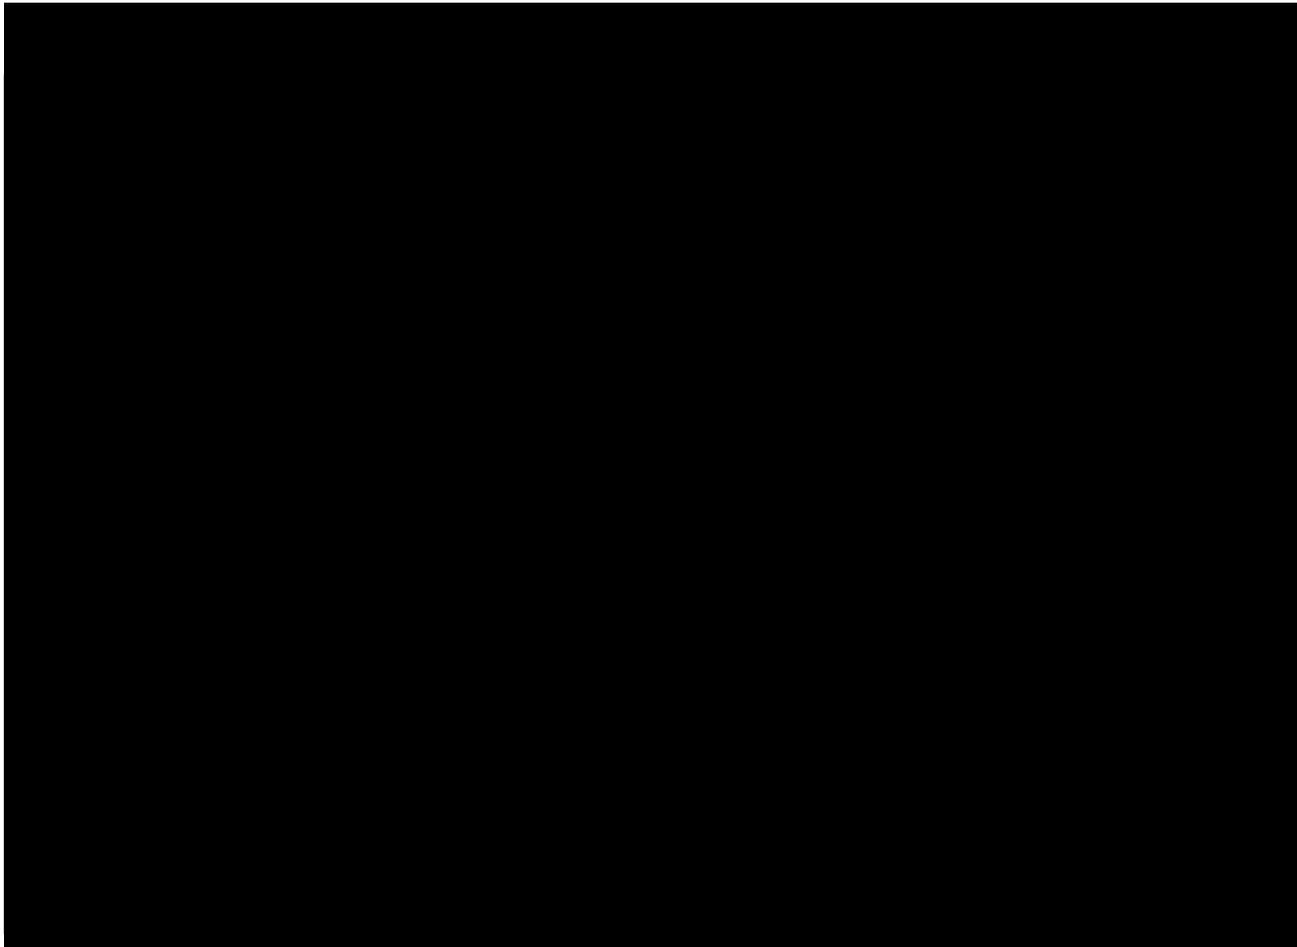

[REDACTED]

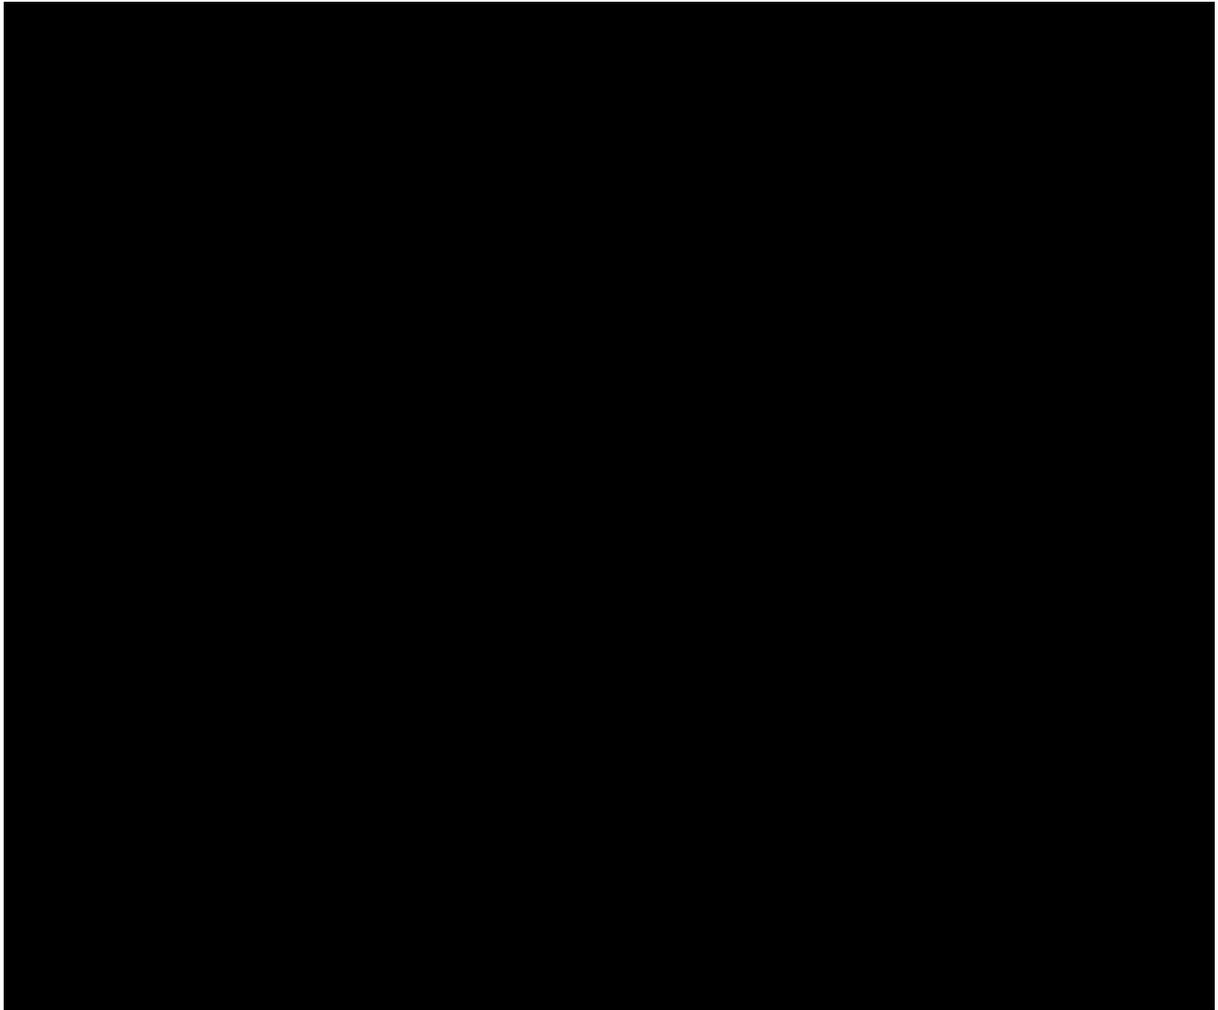

[REDACTED]

[REDACTED] The focus of this report is the portion of the Lease Area being developed for the Project, known as the Wind Farm Area. [REDACTED]

[REDACTED] Visibility of onshore facilities is not included as part of this document but will be analyzed during Project permitting.

## 2 VISIBILITY STUDY

### 2.1 Overview

The closest shoreline to the Project WTGs is the uninhabited Nomans Land Island, located approximately [REDACTED]

Nomans Land Island National Wildlife Refuge is a 628-acre island located in Dukes County, Massachusetts, 3 mi (4.8 km) southwest of Martha's Vineyard in the Atlantic Ocean. The U.S. Fish and Wildlife Service first began managing the eastern third of Nomans Land Island in 1970 under a Joint Management Agreement with the U.S. Navy, while they were actively using the island for military training purposes. In 1998, management of the entire island was transferred from the U.S. Navy to the U.S. Fish and Wildlife Service for the protection and management of migratory birds. Both the island and its surrounding waters have been closed to public access since the U.S. Navy began leasing it in the 1940s as an aerial bombardment and gunnery range.<sup>1</sup> The island is closed to public use and impacts to the local and state economy and historic and visual resources are therefore not expected.

This study analyzes visibility from publicly accessible locations on the southwestern shore of Martha's Vineyard and Nantucket, Massachusetts and the closest location in New York as representative sensitive viewing locations. A detailed visual impact assessment also will be completed for the Construction and Operations Plan per BOEM requirements which would include soliciting agency and stakeholder input as well as technical analysis.

### 2.2 Project Visibility

The Project is located in the open ocean [REDACTED] away from the shorelines of surrounding states. While the distance from which the Project will most often be viewed will minimize the visibility of the WTGs, the degree to which the WTGs will be visible or noticeable depends on several factors including:

- WTG height, distance from viewer, viewer elevation, and curvature of the earth;
- topography, vegetation, and buildings/developments that obscure the WTGs from certain viewpoints;
- atmospheric conditions, including haze and cloud cover;
- lighting angles;
- nighttime lighting; and
- viewing context.

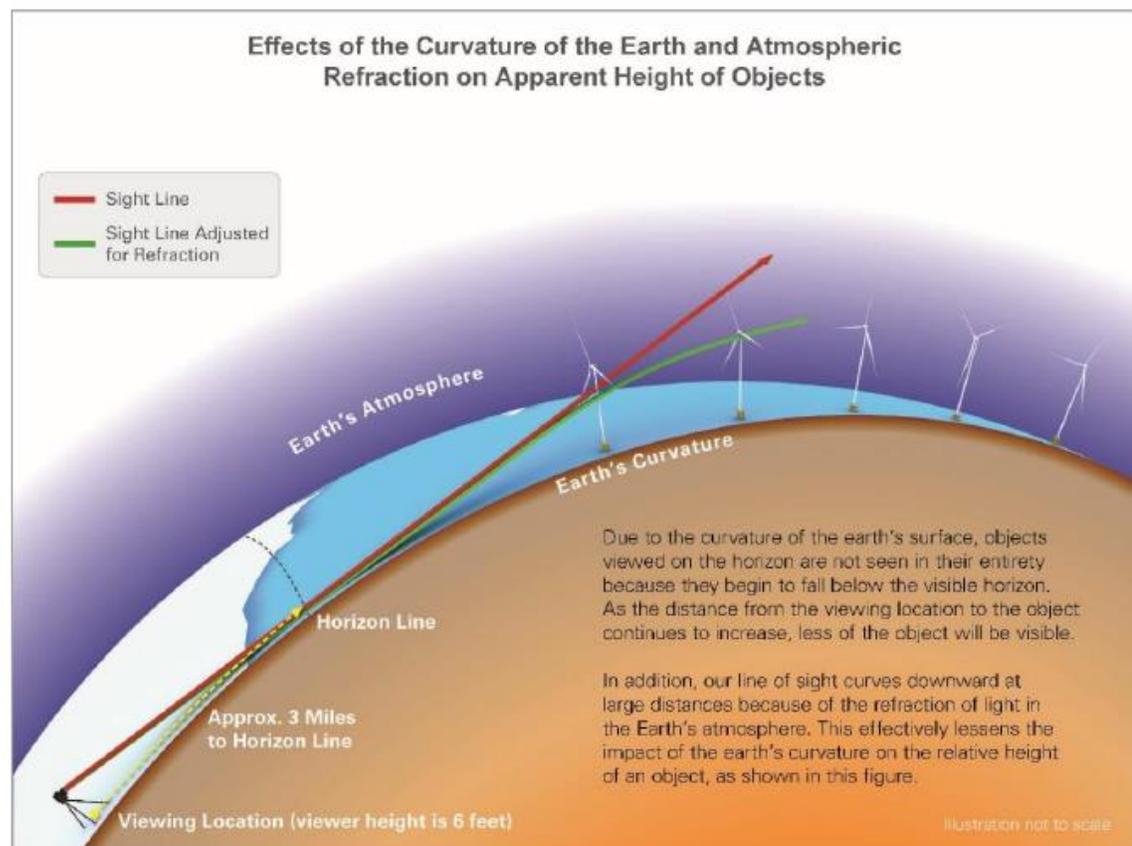

These factors are further described in the following sections.

<sup>1</sup> [https://www.fws.gov/refuge/Nomans\\_Land\\_Island/about.html](https://www.fws.gov/refuge/Nomans_Land_Island/about.html)

### 2.2.1 WTG Height/Curvature of the Earth and Atmospheric Refraction

In general, objects or features that are closer to a viewer's location will appear more detailed and more dominant. In the case of offshore wind projects in which WTGs are often located miles offshore, objects viewed on the horizon are often not seen in their entirety because they begin to fall below the visible horizon due to the curvature of the earth's surface. As the distance increases, less of the object will be visible. In addition, line of sight curves downward at large distances because of the refraction of light in the earth's atmosphere. This effectively lessens the impact of the earth's curvature on the relative height of an object. The effects of the earth's curvature and refraction are calculated with commonly used formulas for surveying work and reasonable assumptions for the average amount of refraction in the atmosphere. The effects of the curvature of the earth and atmospheric refraction on the apparent height of objects is shown in Figure 4.

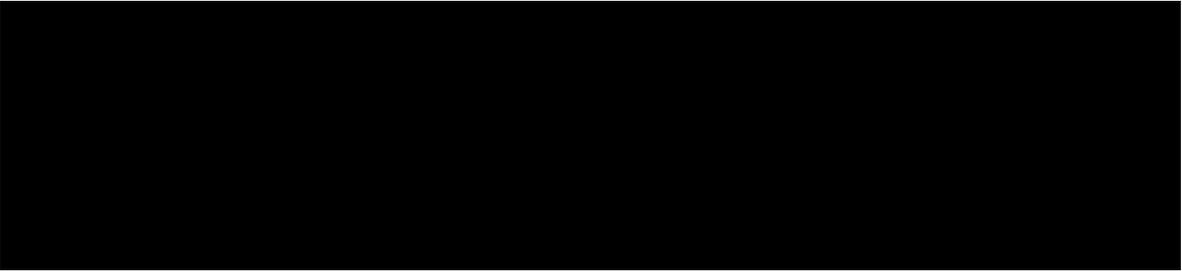

Figure 4. Curvature of the Earth and Atmospheric Refraction

### 2.2.2 Viewer Distance

Viewer distance from an area is a key factor in determining the level of visual effect, with perceived impact generally diminishing as distance between the viewer and the affected area increases (BOEM 2007). The Bureau of Land Management Visual Resource Management categorizes views into foreground/middle ground, background, and seldom

seen distance zones. These distance zones provide a frame of reference for classifying the degree to which details of the viewed Project will affect visual resources. The “foreground/middle ground” area, identified as occurring from 0 to 5 mi (8 km) from the Project, is considered to be the location from which Project element details will be visually clear (in the foreground) and where viewers still have the potential to distinguish individual forms, and texture and color are still identifiable but become muted and less detailed (middle ground). In the “background,” classified as the area from 5 to 15 mi (8 to 24 km), texture has disappeared, and color has flattened making objects appear “washed out”, however, landform ridgelines are still distinguishable. The “seldom seen” area includes lands visible beyond 15 mi (24 km) or lands hidden from view from key locations.

### 2.2.3 Angle of Observation

Angle of observation refers to the angle between the viewer’s line of sight and an object’s location. There are some areas that have superior views towards the Wind Farm Area from potentially sensitive viewpoints. When distance from the WTGs is consistent, viewers at higher elevations (superior views) will see larger portions of the WTGs when compared to viewers at beach level.

### 2.2.4 Meteorological Conditions

Two existing studies were consulted to determine the frequency of various meteorological conditions that would impact visibility of the offshore components in the Wind Farm Area. The New York State Offshore Wind Master Plan, Visibility Threshold Study (NYSERDA 2017) analyzed frequency of certain meteorological conditions and the impact of those conditions on visibility of wind turbines over distance. The NYSERDA study indicated that “...offshore wind energy projects would have minimal visual impact at a distance of 20 miles from shore and negligible impact beyond 25 miles”. As the Sunrise 2 Wind Farm Area is located more than [REDACTED] from New York and not anticipated to be visible, and the NYSERDA study focused on frequency of conditions and visibility within 30 miles, a second study was reviewed that assessed conditions in the geographic area most closely related to the Wind Farm Area.

In 2017, BOEM developed an analysis of the meteorological conditions associated with the offshore Massachusetts and Rhode Island Wind Energy Areas. The report was developed to help understand both the meteorological conditions experienced from select viewpoint locations on Martha’s Vineyard, Nantucket and the southern coast of Massachusetts and Rhode Island, and how they may influence the visibility of offshore wind energy projects. A total of 24 viewpoint locations were identified that represent points the public may frequent that could have a view of any offshore wind energy projects developed in the Wind Energy Areas (BOEM 2017). The analysis was based on hourly meteorological surface data collected at the National Weather Service measurement sites (also referred to as meteorological sites)

in Massachusetts and Rhode Island over a 10-year period. Data collected included wind speed and direction, cloud cover, cloud ceiling height, visibility, precipitation, and temperature (BOEM 2017). The BOEM report was reviewed to identify the typical or average weather conditions and visibility that occur within the Project area.

Based on data collected from the three meteorological sites used in the report (i.e., airport locations in Martha’s Vineyard, Nantucket, Massachusetts and Newport, Rhode Island) and the results of the analysis, clear conditions occurred between 51 and 56 percent of the daylight hours over the course of one year, with visibility during clear conditions averaging approximately 17 to 20 nautical miles (19 to 23 mi; 32 to 37 km). During nighttime hours, clear conditions occurred between 50 and 57 percent of the time over the course of one year, with visibility during clear conditions averaging approximately 16 to 20 nautical miles (18 to 23 mi; 30 to 37 km). Furthermore, visibility was generally found to be greater in wintertime and lower in summer. Figure 5 and Figure 6 provide a summary of the results of the meteorological conditions and visibility, respectively, observed at each of the meteorological sites.

**Figure 5. Summary of Meteorological Conditions – Distribution of Hourly Daylight/Nighttime Observations**

Conditions a/	Meteorological sites					
	Newport		Nantucket		Martha’s Vineyard	
	Daytime	Nighttime	Daytime	Nighttime	Daytime	Nighttime
Clear	56%	57%	51%	50%	53%	54%
Foggy	15%	13%	22%	21%	17%	15%
Rainy	7%	7%	6%	7%	7%	7%
Hazy	1%	1%	2%	1%	1%	1%
Cloudy	21%	22%	19%	21%	22%	23%

a/ Data in the table presents the annual distribution of the five meteorological conditions during daylight hours as a percentage. Each hour is characterized as either clear, foggy, rainy, hazy, or cloudy.  
Source: BOEM 2017.

**Figure 6. Summary of Average Daylight/Nighttime Visibility (nautical miles) at Meteorological Sites**

Conditions a/	Meteorological Sites					
	Newport		Nantucket		Martha’s Vineyard	
	Daytime	Nighttime	Daytime	Nighttime	Daytime	Nighttime
Clear	20	20	17	16	20	18
Foggy	3	3	3	3	3	3
Rainy	8	9	9	9	9	9
Hazy	4	4	4	4	5	5
Cloudy	12	13	12	13	13	13

a/ Data in the table presents the average annual visibility distance for clear, foggy, rainy, hazy, or cloudy conditions for daylight and nighttime hours.

## 2.3 Visual Simulations

Visual simulations (simulations) were created to depict the Project components and their potential changes to the existing landscape. The simulations depict various weather conditions including clear, partly cloudy and overcast conditions in the early morning, mid-afternoon, late day and nighttime. The simulations were used to determine the level of contrast between the existing landscape and the expected landscape after the Project is commissioned. Simulations are included as Attachment 16-2 to the Proposal.

The simulations were created using geographic information system (GIS) software, Autodesk 3D Studio Max®, and rendering software combined with site photography to depict what would be seen if the Project is developed. To create the simulations, the location data captured by the GPS device for each photographed area were transferred to GIS software, where it was combined with GIS data of the preliminary layouts of Project components and facilities. A map showing the data was exported at true scale and imported into 3D Studio Max®. Using this scaled map as a base, 3D models of the offshore Project area were created to scale. These 3D models of the Project features, previously modeled to scale in 3D Studio Max®, were added in their appropriate locations and elevations. The views from the existing digital photographs were then matched in the 3D model using virtual cameras with the same focal length and field of view as the camera used to capture the photography. After date- and time-specific lighting was added to the 3D model, renderings from the virtual cameras were created. These renderings were then blended into the photographs in Adobe Photoshop software. Any necessary modifications to the existing landscape were completed in Photoshop as well. This process of creating a 3D model at true scale and rendering images using the same specifications used by the camera ensures that the spatial relationships of the landscape, Project features, and viewer perspective are accurate and match the existing site photographs. Each simulation was then scaled to be viewed at a specified distance to represent the actual size of the WTGs.

### 3 POTENTIAL EFFECTS TO VISUAL RESOURCES

Where visible and noticeable, the Project facilities have the potential to create visual effects. The Project will introduce several vertical objects (i.e., WTGs) [REDACTED] into a landscape setting dominated by open expanses of water and defined by the horizon line. The Wind Farm Area is located approximately [REDACTED]

[REDACTED]

[REDACTED] The farther away objects are from the viewer, the smaller they appear, features lose details and become less distinct, and surface textures become difficult to discern. In addition, objects viewed on the horizon are often not seen in their entirety because they begin to fall below the visible horizon due the curvature of the earth's surface.

It is anticipated that views of the Project from the southern coast of mainland Rhode Island and Massachusetts will be limited primarily to coastal beaches that have unobstructed views of the Atlantic Ocean. In seascapes, atmospheric haze reduces the practical visibility, sometimes significantly. Potential viewers located along the southern coast of Rhode Island and Massachusetts, [REDACTED]

[REDACTED] will theoretically only have views of the upper portion of the rotor blade of the above the horizon. It is anticipated that actual visibility at [REDACTED] will not be noticeable or perceived by viewers along the coast. From the southern coast of mainland Rhode Island and Massachusetts, under varying atmospheric conditions such as haze or fog, the WTGs will most likely not be visible.

Potential views of the Project from the south or west shores of Martha's Vineyard and Nantucket will also be limited primarily to locations at coastal beaches and bluffs. [REDACTED]

[REDACTED]

Visibility of turbines is not the only factor that needs to be considered when determining potential visual impacts of the Project. For example, potential visual effects not only consider how much of the turbine is visible, but distance of the turbine from the viewer, number of turbines visible, perceived scale of the turbines, spatial dominance<sup>2</sup>, and meteorological conditions.

At a distance of [REDACTED] it is anticipated that the WTGs will be noticeable to viewers along the coast. However, the degree to which the WTGs will be noticeable will vary depending upon atmospheric conditions. Under certain atmospheric conditions the WTGs located out on the horizon will be "skylined" or seen in front of a contrasting color such as blue sky or a sunset and will be more likely to draw the viewers' attention. The structures will potentially produce visual contrasts by virtue of their design attributes (form, color and line) and the reflectivity of their surfaces (USDI 2013). [REDACTED]

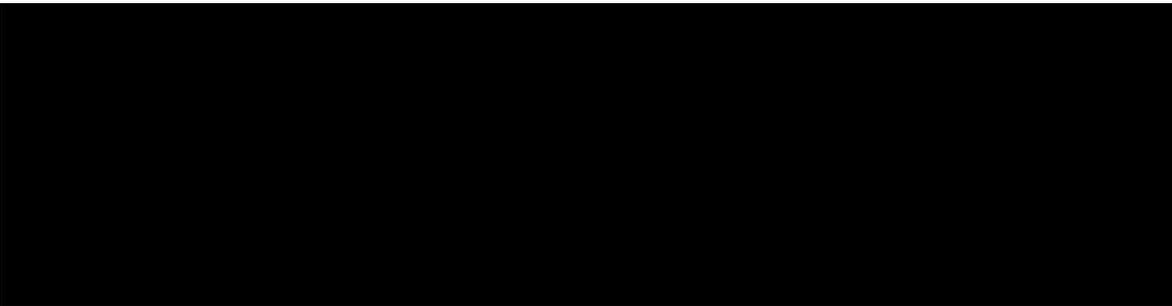

<sup>2</sup> Spatial dominance is the scale of an object relative to the visible expanse of the landscape which forms its setting. The Project will be a subordinate feature in the context of the expansive Atlantic Ocean setting.

[REDACTED] If the weather is overcast, hazy or foggy, the WTGs will produce less contrast because the white/light grey color of the WTGs will be similar to the white/grey color of the backdrop and will be less noticeable.

From areas along the southern coastline of Martha's Vineyard and Nantucket, the WTGs will be the tallest elements in the seascape setting. However, the perceived scale of the WTGs will be relatively small, amounting to fractions of an inch for viewers onshore. [REDACTED]

[REDACTED]

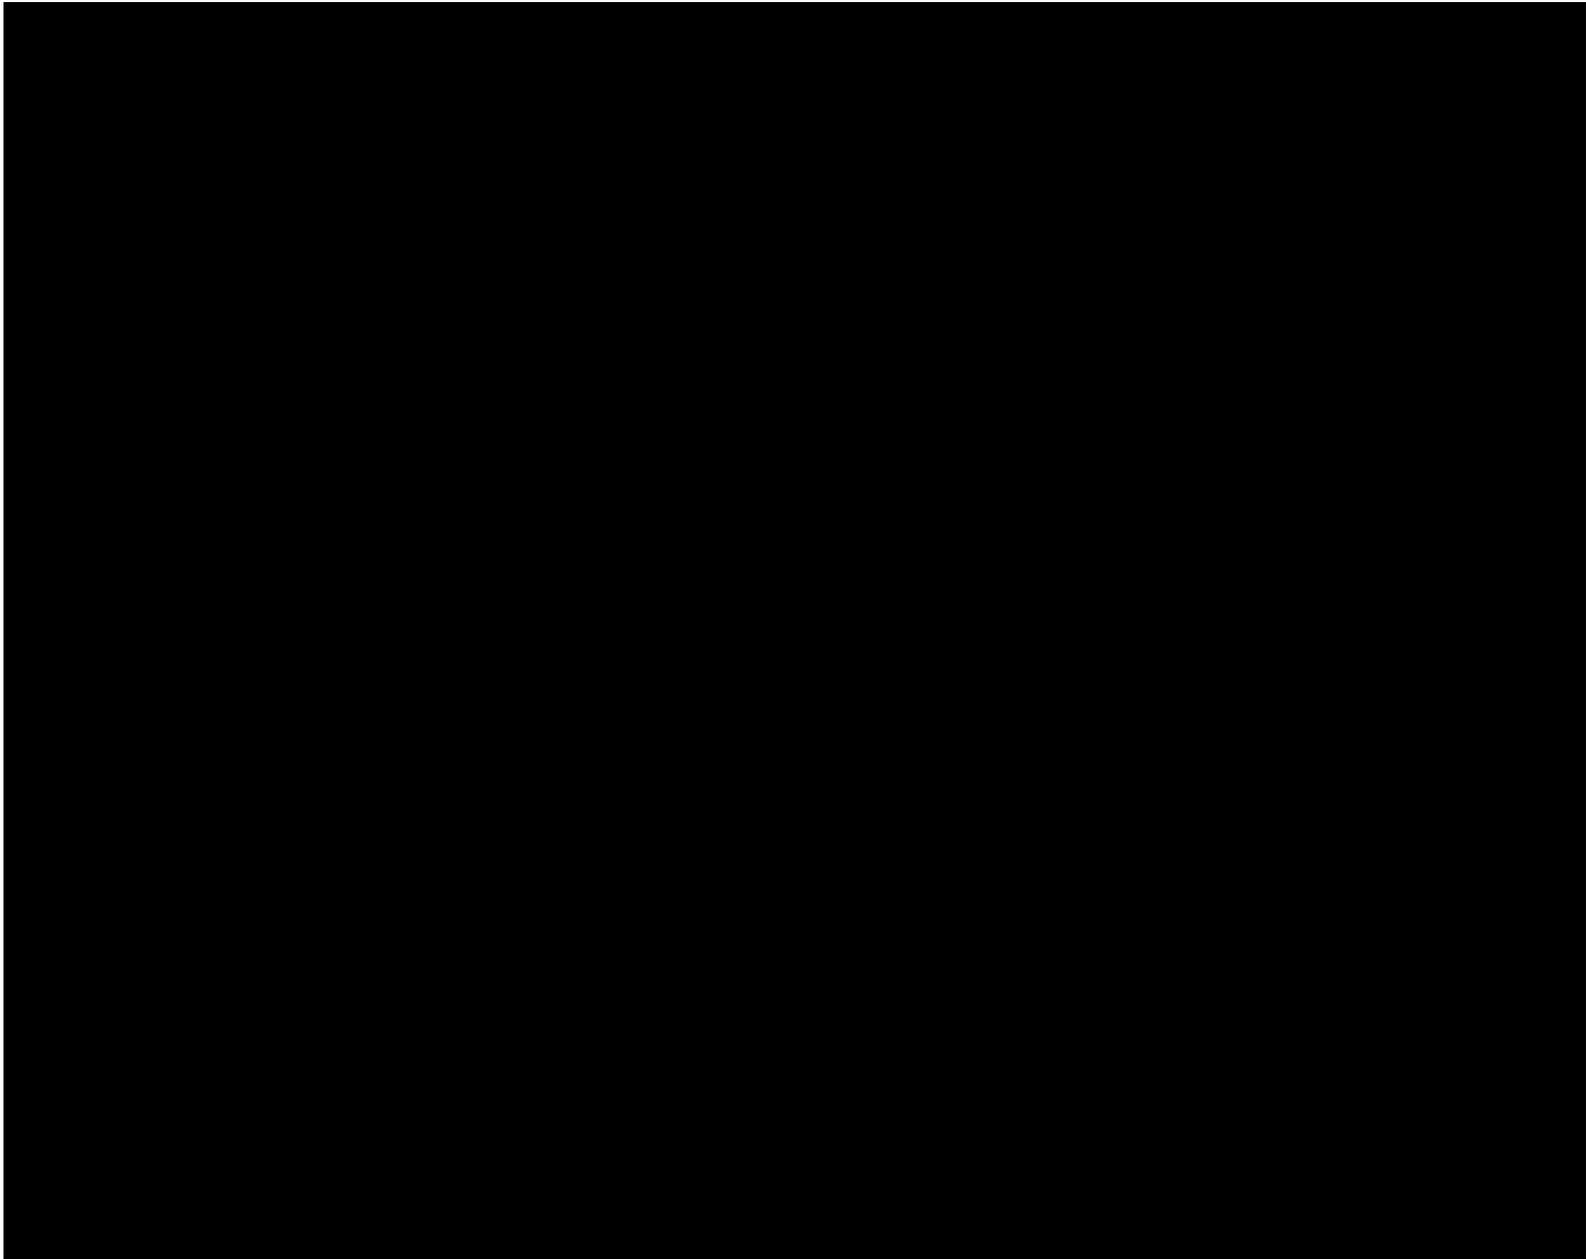

Typically, viewers located away from the coast, including residents, recreational users associated with parks, and motorists along local travel routes will not have views of the offshore Project area, because they will be screened by vegetation and/or urban development. Exceptions will be viewers with an elevated or superior viewing position who have unobstructed views toward the Wind Farm Area.

Construction impacts of the Project were not considered for the purposes of this study. The Construction Operations Plan and associated Visual Impact Assessment will be submitted to BOEM and will analyze those potential effects in detail.

### 3.1 Key Observation Points

Three Key Observation Points (KOPs) representing critical or typical viewpoints within, or along, an identified viewing location were selected and used to assess the visibility and potential visual effects of the proposed Project (see [REDACTED]). The sensitivity of viewers at each KOP is based on the following criteria: type of use, expected concern for aesthetics, and special status or designation. Identifying groups of individuals that will likely be sensitive to visual changes is an important part of the visual assessment process and helps to define specific locations from which to assess changes to the visual character of the landscape.

### 3.1.1 Camp Hero State Park/Montauk Lighthouse

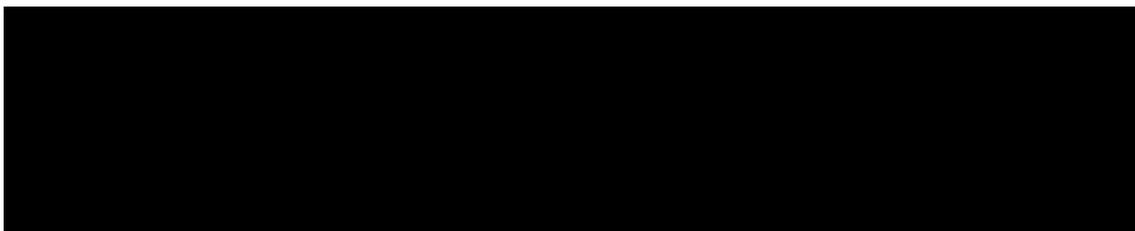

Camp Hero State Park/Montauk Lighthouse is in New York State at the easternmost point of Long Island and is located approximately [REDACTED] to the nearest WTG. This is a high trafficked area with recreational and tourist viewers. Vegetation at this location includes shoreline bluff and low herbaceous vegetation. Views of the horizon are unobstructed and open; however, the WTGs will not be visible due its distance to the Wind Farm Area.

Photographs from this location are provided in Attachment 16-2.

### 3.1.2 Squibnocket

Squibnocket Beach is on the southwestern coastline of Martha's Vineyard and is located [REDACTED]. Squibnocket Beach is located in, as well as owned and maintained by, the town of Chilmark. It is only open to residents and renters from June 15<sup>th</sup> through Labor Day. The landscape surrounding the beach includes Squibnocket Pond to the west, residential development to the north and west, and the Atlantic Ocean. The nearest WTG within the Wind Farm Area is located [REDACTED].

Squibnocket Beach is located in the Cape Cod/Long Island ecoregion. The landscape surrounding this location is typical of the ecoregion and is characterized by beaches, dunes, ponds, and tidal flats. Views from this location consist of flat, sandy beaches with scattered boulders and dunes along the coastline to the northeast and southwest in the foreground/middle ground. Vegetation includes grasses covering the dunes and rolling terrain in the middle ground and background. Trees are scattered along the tops of the dunes and around residential structures.

From this location, portions of [REDACTED] as depicted in the simulations provided in Attachment 16-2 to the Proposal.

### 3.1.3 Madaket Beach

Madaket Beach on the southwestern coast of Nantucket Island is located [REDACTED]. Madaket Beach is owned and maintained by the Town of Nantucket. The landscape surrounding this location includes open space to the north that is part of the Nantucket Land Bank holdings, beaches and dunes along the coastline and the Atlantic Ocean to the west and southwest. [REDACTED]

Located in the Cape Cod/Long Island ecoregion, the landscape is typical of the ecoregion and is characterized by beaches, dunes, coastal inlets and ponds, and grasslands. Views from this location consist of flat, sandy beaches and dunes along the coastline to the northwest and southeast, and the Atlantic Ocean to the west-southwest. Vegetation is limited

to grasses along the dunes. From this KOP, views toward the Wind Farm Area are unobstructed and dominated by the open expanse of the Atlantic Ocean with the horizon line as a main focal point. [REDACTED]

[REDACTED]

This location represents recreational users associated with the dunes, such as sunbathers, surfers, and people walking along the beach. [REDACTED]

[REDACTED]

From this location, portions of [REDACTED] as depicted in the simulations provided in Attachment 16-2 to the Proposal.

## 4 CONCLUSIONS

The level of change perceived by viewers will be dependent upon multiple factors, including distance between the viewer and the structure, the height of the WTGs, the elevation of the viewer, the curvature of the earth, and meteorological conditions. [REDACTED]

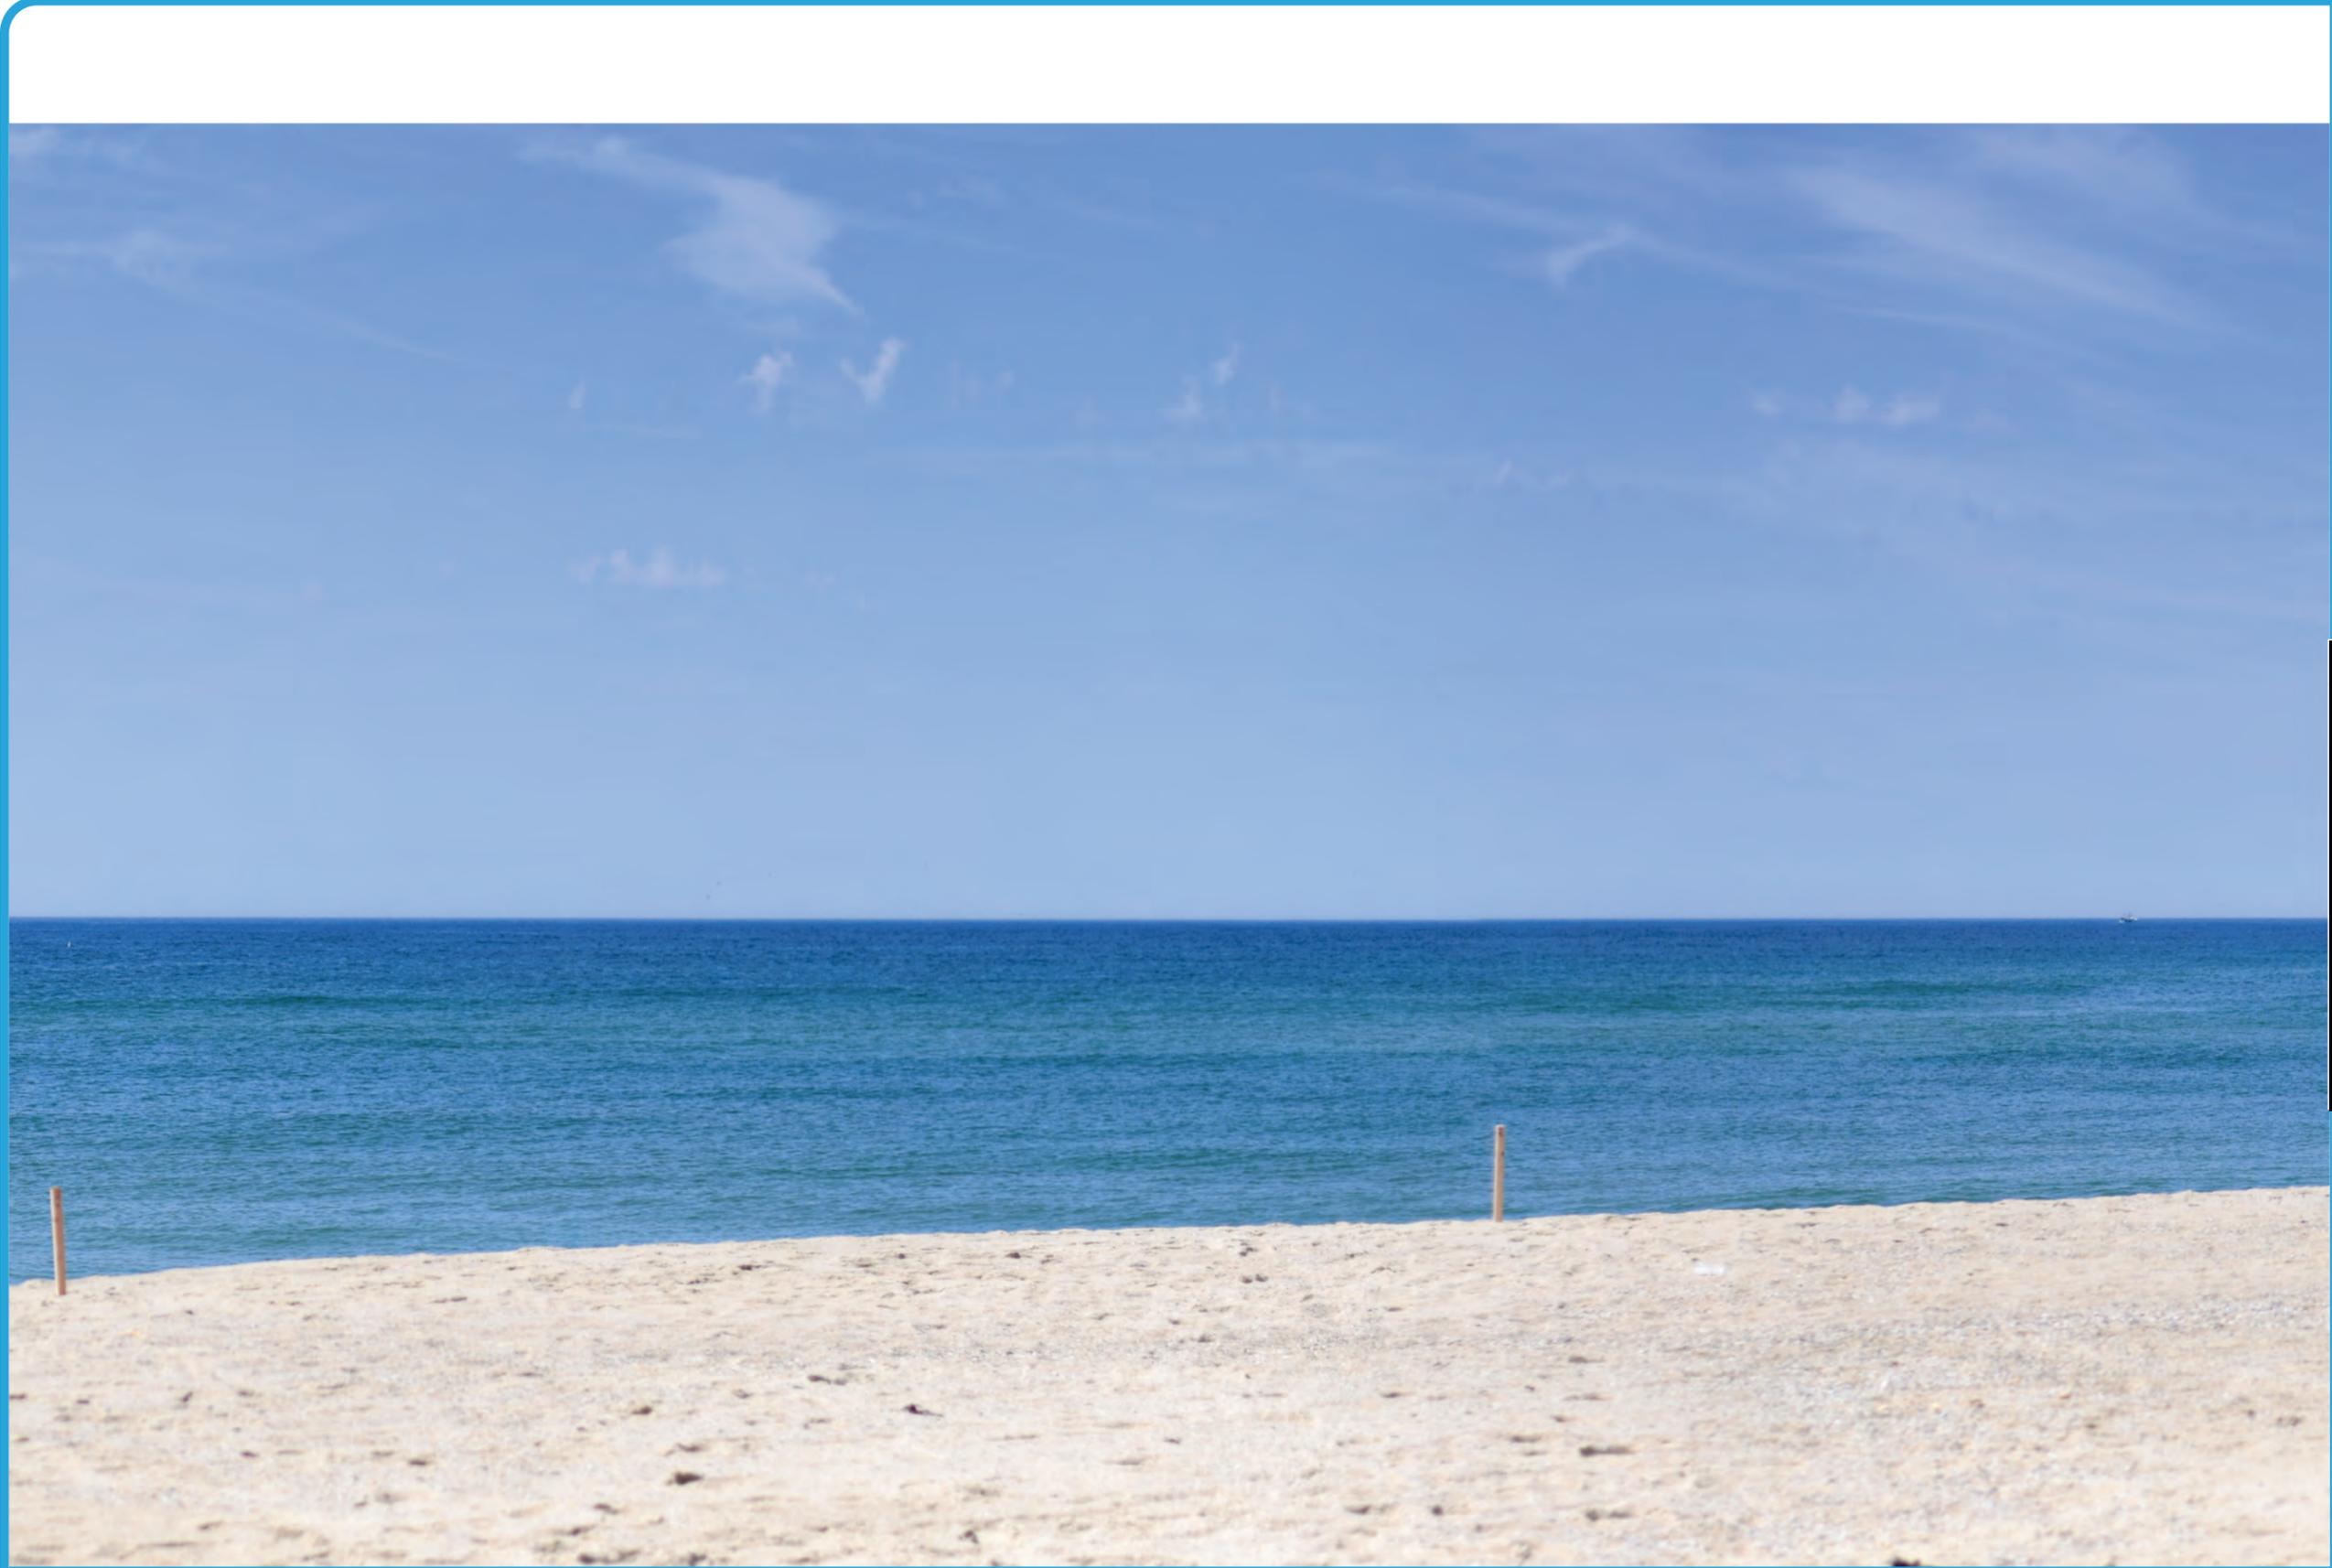

[REDACTED] Several measures to mitigate visual effects have been incorporated into the siting and design of the Project offshore components. In addition to the minimal visual impacts of the Project detailed in this report, the following mitigation measures have been or will be implemented:

- The offshore Project components will be located in a designated Lease Area identified by BOEM as suitable for commercial offshore wind development.
- The WTG design and appearance will align with mitigation measures recommended by BOEM (2007). All WTGs will be uniform in shape, color, size of rotor, nacelle and tower type.
- The WTGs [REDACTED] will be white/light gray which will help to minimize contrast with the sky under most conditions.

Sunrise 2 Wind will implement an Aircraft Detection Lighting System (or similar system) to turn on, and off, the aviation obstruction lights in response to detection of aircraft in proximity to the wind farm, pursuant to approval by the FAA, commercial and technical feasibility, and dialogue with stakeholders.

# Edison Chouest Offshore affiliate executes long-term charter agreement with Ørsted and Eversource for provision of the first U.S. Jones Act compliant wind farm Service Operation Vessel

10.01.2020 07:00

**Cut Off, Louisiana** — Edison Chouest Offshore (ECO), Ørsted and Eversource announced today the execution of a long-term charter agreement for the provision of the first-ever U.S. flagged “Jones Act” compliant Service Operations Vessel (SOV). The SOV will be engineered, constructed and operated by ECO as an integral part of the operation and maintenance of the Revolution Wind, South Fork Wind and Sunrise Wind offshore wind farms in the northeast United States, which are dependent on obtaining the necessary federal permits from the Bureau of Ocean Energy Management (BOEM).

The SOV will be utilized during the operation & maintenance (O&M) phases of the wind farm projects, serving as an at sea base of operations to accommodate and transfer technicians, tools and parts safely to and from the individual Wind Turbine Generators. This vessel is a special-purpose design with focus on passenger comfort and safety, enhanced maneuverability and ship motions, extended offshore endurance and reduced emissions.

The vessel will be built at a combination of Edison Chouest’s shipyards in Florida, Mississippi and Louisiana, creating well over 300 new construction jobs. The construction of

this vessel will also have a broader economic impact on other U.S. states hosting suppliers of major components, with some notable beneficiaries being North Carolina and Illinois for steel and main engines, respectively. While the offshore wind industry is relatively new to the United States, states in the Gulf of Mexico region, who have a long history in offshore related industries, stand to immediately gain from the high transferability of existing jobs over to offshore wind. In addition to jobs created in Louisiana, the vessel will operate from New York once in operation.

“The offshore wind energy industry is generally well developed and understood, particularly in Europe where an enormous industry has developed over decades, but this industry is in an initial stage in the United States. There is an unprecedented opportunity, with twelve offshore wind projects planned, an additional ten offshore wind leases signed, and another six wind leases awaiting award. In aggregate, there is a pipeline of well over 25 thousand megawatts of power to be produced by over 1,700 wind turbines, across thirteen states, and in various stages of development that will require an incredible array of vessels, resources, knowledge, and capital commitment to install, operate, and repair,” says Mr. Gary Chouest, President of Edison Chouest Offshore. “We’re unique in the U.S. offshore marine vessel industry with our own in-house engineering group, our own shipyards, and a wealth of expertise in the offshore industry putting us in a dominant position in the industry with the unique capability to engineer, construct and operate specialized vessels for this market.”

The vessel will be over 260 feet long and capable of housing 60 passengers. Crew will enjoy access to passenger staterooms with private bathrooms, an exercise room, cinema/training room, internet café and multiple lounges. The SOV will include a below deck warehouse to palletize storage for wind farm tools, components and supplies with step-less access to an elevator. A Daughter Craft, with associated Launch and Recovery System and hydraulic height-compensating landing platform, will also be installed for infield turbine repair operations. In keeping with the environmental goals of the offshore wind industry, this vessel will operate on diesel electric power that meets EPA Tier 4 emission standards and will feature proprietary ECO Variable Frequency Drive (VFD) to reduce greenhouse gas emissions.

“This is an incredible moment for the American offshore wind industry,” said Thomas Brostrøm, CEO of Ørsted North America, Offshore. “It is hard to state what this moment means for this new, multi- billion-dollar industry. The SOV is not only a crucial part of our plans to build out and operate our Northeast Wind Farms, but it represents just how far reaching the economic impacts of offshore wind can be; offshore wind means massive investments for U.S. companies and jobs for American workers, even those in states without active projects.”

“Today’s news represents a key moment in the advancement of the offshore wind industry in the United States,” said Joe Nolan, Executive Vice President at Eversource Energy. “Not only is this new vessel a critical component of our plans to build and develop the next generation of clean energy in our country, it’s a testament to how far the industry has come in such a short time and what we can achieve moving forward. This new state of the art vessel will help us deliver on the promise of creating jobs, driving economic growth, and combating climate

change and will play a key role in our efforts to support states in meeting their commitment to decarbonization.”

“The Offshore Marine Service Association (OMSA) is thrilled that Ørsted and Eversource are investing in U.S. vessels,” said Aaron Smith, President of OMSA. “This is proof that the offshore wind will be an economic driver for the U.S. maritime industry and the U.S. maritime industry is fully capable of satisfying the needs of the offshore wind.”

###

### **About Edison Chouest Offshore**

Founded as Edison Chouest Boat Rental in 1960, ECO is recognized today as the most diverse and dynamic marine transportation solution provider in the world. ECO operates a growing fleet of almost 300 vessels, up to 525 feet in length, and serving an expanding global customer base. ECO is the largest provider of U.S. ‘Jones Act’ compliant offshore marine vessels, the largest provider of offshore marine service vessels to Central and South American markets, has the largest base of shipyards in the U.S., owns and manages world-class port terminal facilities and operates worldwide on all oceans, including the Arctic and Antarctic regions. Staying on the forefront of new technologies is an integral part of the ECO vision, as evidenced by recent advances in the areas of emissions reductions, subsea support services, integrated bridge systems, remote monitoring of vessel systems and global communications. Please visit Edison Chouest Offshore’s website at [www.chouest.com](http://www.chouest.com).

### **About Ørsted North America, Offshore**

The Ørsted vision is a world that runs entirely on green energy. Ørsted ranks #1 in Corporate Knights’ 2020 index of the Global 100 most sustainable corporations in the world and is recognized on the CDP Climate Change A List as a global leader on climate action.

In the United States, Ørsted operates the Block Island Wind Farm, America’s first offshore wind farm, and constructed the two-turbine Coastal Virginia Offshore Wind pilot project – the first turbines to be installed in federal waters. Ørsted has secured over 2,900 megawatts of additional capacity through five projects in the Northeast and Mid-Atlantic. Ørsted’s North American Offshore business is jointly headquartered in Boston, Massachusetts and Providence, Rhode Island and employs more than 150 people. To learn more visit [us.orssted.com](http://us.orssted.com) or follow us on Facebook, Instagram and Twitter (@OrstedUS).

### **About Eversource**

Eversource (NYSE: ES), celebrated as a national leader for its corporate citizenship, is the #1 energy company in Newsweek’s list of America’s Most Responsible Companies for 2020 and recognized as one of America’s Most JUST Companies and the #1 utility by Forbes and JUST Capital. Eversource transmits and delivers electricity to 1.25 million customers in 149 cities and towns, provides natural gas to 237,000 customers in 74 communities, and supplies water to approximately 199,000 customers in 52 communities across Connecticut. Eversource harnesses the commitment of approximately 8,300 employees across three states to build a single, united company around the mission of safely delivering reliable energy and water with superior customer service. The #1 energy efficiency provider in the nation, the company is empowering a clean energy future in the Northeast, with nationally-recognized energy

efficiency solutions and successful programs to integrate new clean energy resources like solar, offshore wind, electric vehicles and battery storage, into the electric system. For more information, please visit [eversource.com](http://eversource.com), and follow us on Twitter, Facebook, Instagram, and LinkedIn. For more information on our water services, visit [aquarionwater.com](http://aquarionwater.com).
