#### **DIRECT INCENTIVES LIST**

#### P-12 Schools: Green and Clean Energy Solutions

October 2019

NYSERDA will provide Direct Incentives for energy savings associated with installed energy load reduction projects. For measures not included in the pre-qualified measure list, a custom incentive may be available. Calculations are not required for custom measure submissions. Projects eligible for existing investor owned utility incentives are ineligible. Please check back for the most recent list, as measures, eligibility criteria, and incentive amounts will be updated on a periodic basis. For any questions, please contact P12Schools@nyserda.ny.gov.

#### **How to Apply**

Submit to P12Schools@nyserda.ny.gov:

- PON 4157 Program Application (Attachment A) indicating which incentive number(s) the Applicant is applying for
  - Optional: populated measure worksheets (found below) may be submitted as supplemental information to the application
- Specification sheets showing manufacturer and model number
- · Proof of equipment purchase including, but not limited to, a copy of a paid in full dated work order, invoice, receipt, or comparable including:
  - equipment or measures installed
  - quantity installed
  - material and labor costs (as applicable: in-house labor costs not required)
  - paid in full or zero balance
  - installer name (if contractor installed)

Heating Ventilation & Air Conditioning (HVAC)

For more information, please see PON 4157 Section V. Direct Incentives.
