online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the “Current Opportunities” section of NYSERDA’s website (<https://www.nyserdera.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

The New York State Energy Research and Development Authority (NYSERDA) provides financial incentives through the Residential and Retail Energy Storage Programs for the installation of new grid-connected distributed energy storage systems.

On June 20, 2024, the New York State Public Service Commission (“PSC”) directed NYSERDA to administer Residential and Retail Energy Storage Market Acceleration Incentives to accelerate qualified energy storage system deployments, cost reduction, value improvement, and the market (Order Establishing Updated Energy Storage Goal and Deployment Policy, 18-E-0130). On February 14, 2024, the PSC issued an Order approving the Residential and Retail Energy Storage Market Acceleration Incentives Program Implementation Plan with modifications (Order Approving Implementation Plan With Modifications, 18-E-0130). NYSERDA has issued the Residential and Retail Energy Storage Programs to further New York State’s objective of supporting the development of its energy storage industry in order to reach the 6 GW energy storage deployment target announced by Governor Kathy Hochul in January 2022.

NYSERDA has been designated by the New York State Public Service Commission as the administrator of the New York State Renewable Portfolio Standard (“RPS”), CEF programs (14-M-0094), and energy storage programs, which were established to achieve the State’s peak reduction, renewable generation, and greenhouse gas reduction goals.

II. Program & Application Requirements

\$675,000,000 of funding is available for the Retail Program, while \$100,000,000 is available for Residential Program. Incentives for both Programs are awarded on a dollar per kilowatt-hour rate. Incentives are awarded on a first-come, first-serve basis under capacity-based blocks with defined dollar per kilowatt-hour rates. Blocks are subdivided by market segment and region, meaning that incentive rates are dependent on Program and location of the energy storage system.

Applicants can apply to become a Participating Contractor in either the Residential or Retail Program, or both, by submitting a Participating Contractor Application. Eligible applicants must be a Participating Contractor in good disciplinary standing in order to apply for project incentive awards under the respective Program. Participating Contractors can face disciplinary action as a result of poor performance, including suspension from the Programs.

The Retail Project Application process for energy storage systems located outside of New York City includes review of submitted documents, a fire safety peer review, and a quality assurance site inspection. The Retail Project Application process for energy storage systems located in New York City does not include a fire safety peer review. The Residential Project application process includes review of submitted documents and a quality assurance inspection, if that system was randomly selected for inspection. Incentive applications for both the Residential and Retail Programs will be accepted through December 31, 2030, at 3:00 PM Eastern Time, or until funds are fully committed, whichever is earlier.

See the NYSERDA Residential and Retail Energy Storage Market Acceleration Incentives Program Manual for the full details regarding program and application requirements.

III. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your application. Review should include whether it is critical for evaluating an application, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the applicant wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Applicants are required to answer questions during application submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the applicant has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at

http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple award under this solicitation. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each application should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA expects to notify applicants within a few weeks from the receipt of an application whether their application has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing an application, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all applications received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject applications based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify applicants based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The applicant shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When an applicant is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Applicants must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

EO 16 Protocols - Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Attachment B – NYSERDA Residential and Retail Energy Storage Incentive Program Participation Agreement

NYSERDA Building Cleaner Communities Competition

Funding Available: \$15 million

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

PROGRAM DESCRIPTION

The New York State Energy Research and Development Authority (NYSERDA) has \$15 million of funding available to administer the Building Cleaner communities Competition (BCCC) which will support regionally significant, zero emissions, all electric, carbon neutral and resilient projects in New York State. These projects can be new construction, adaptive reuse, and gut rehabilitation projects that will be clean and resilient, beautiful, and functional, and will provide healthy, safe, comfortable, and resilient spaces. All projects must demonstrate that the project will achieve all electric, carbon neutral or net zero energy performance. Projects should also demonstrate how they will help achieve the goals of the New York State Regional Economic Development Council's (REDC's) Strategic Plan. Projects should address NYSERDA's long term goal to increase the economic competitiveness of facilities by providing technical and financial support for the implementation of cost-effective energy efficiency and renewable energy technologies.

NYSERDA will make a total of \$15 million available through this solicitation. Up to \$3 million will be available Statewide through the Regional Greenhouse Gas Initiative funding, and at least \$12 million will be available through the Clean Energy Fund only to sites that pay into the System Benefits Charge (SBC).

Projects may apply under one of the two following Categories, however NYSERDA may or may not choose to award funding in all Categories:

Category A

BCCC provides eligible New York State commercial, industrial, institutional, municipal, and mixed-use applicants with financial support for the design, construction of, or renovation to existing, buildings expected to achieve all electric, carbon neutral or net zero energy performance. Projects must demonstrate as part of their application how the technical solutions, systems, or design and construction strategies of the project are replicable at scale and have the potential to achieve broad-based adoption by both developers and consumers. Applications must also demonstrate how their projects provide superior financial benefits for owners.

The financial support for projects will be capped at \$2,000,000. This funding can be comprised of both a dollar per square foot amount and flat incentive amounts for project elements. Projects owned by a 501(c)(3) entity may be eligible for an award of \$45 per square foot of gross floor area, up to \$2,000,000. All other projects will be eligible for an award of \$35 per square foot of gross floor area, up to \$2,000,000.

Additional incentives available for projects include the below:

1. Projects that have committed to designing to and certifying to the Passive House standard will be eligible for an incentive of \$300,000.
2. Projects that have committed to installing Ground Source Heat Pumps to meet the design temperature-based heating and cooling loads will be eligible for an incentive of \$300,000.
3. Projects that have committed to installing a battery storage system will be eligible for an incentive of \$150,000.

4. Projects that have committed to installing a solar photovoltaic will be eligible for an incentive of \$100,000.

Category B

BCCC provides eligible communities, campuses, and owners of large real estate portfolios in New York State (e.g., downtown business districts, neighborhoods, commercial or residential campuses or large-scale private developers) with incentives on a competitive basis, for the planning, energy modeling, and design necessary to convert the proposed building portfolio to achieve carbon neutral or net zero energy performance. Communities and campuses are defined as projects comprised of a group of multiple buildings or a portfolio of buildings located within a defined singular project site or on adjacent and associated project sites, that may involve different building types and multiple building owners or tenants. There is no restriction for building types eligible under this category. Community and campus scale work is defined at the building, infrastructure, and overall layout of the site.

Incentives are available for the cost of planning, energy modeling, design, technical analysis, and other soft costs as approved by NYSEDA, of community-level, campus, or large private developer projects to achieve carbon neutral or net zero energy performance. Project awards will be up to 75 percent of the eligible costs, with a maximum project award amount of \$2,000,000. To qualify for this Category, projects must include at least 500,000 square feet (of new construction or rehabilitation), or a total project implementation cost of at least \$50 Million.

APPLICATION SUBMISSION

No communication intended to influence this procurement is permitted except by contacting the designated contact by e-mail BCCC@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact James Cowman at (518) 862-1090, ext. 3652 or jim.solicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the applicant or indirectly through a lobbyist or other person acting on the applicant's behalf) in an attempt to influence the procurement: (1) may result in a applicant being deemed a non-responsible offerer, and (2) may result in the applicant not being awarded a contract.

FUNDING AVAILABLE

1. Category A

The financial support for projects will be capped at \$2,000,000. This funding can be comprised of both a dollar per square foot amount and flat incentive amounts for various project elements. Projects owned by a 501(c)(3) entity may be eligible for an award of \$45 per square foot of gross floor area, up to \$2,000,000. All other projects will be eligible for an award of \$35 per square foot of gross floor area, up to \$2,000,000.

Additional incentives available for projects include the below:

1. Projects that have committed to designing to and certifying to the Passive House standard will be eligible for an incentive of \$300,000.
2. Projects that have committed to installing Ground Source Heat Pumps to meet the design temperature-based heating and cooling loads will be eligible for an incentive of \$300,000.
3. Projects that have committed to installing a battery storage system will be eligible for an incentive of \$150,000.

4. Projects that have committed to installing a solar photovoltaic will be eligible for an incentive of \$100,000. Any renewable energy that is not co-located on the same site as the project site will not be considered part of the eligible project award.

Awarded projects that propose any of the above but determine that they cannot proceed with the implementation or installation, will have their award reduced to the lower amount, but may retain 15% of the difference between the two award options, at NYSERDA's sole discretion, based upon NYSERDA's review of the project team's submission of additional information including but not limited to, energy modeling, technical and cost analysis.

2. Category B

The financial support for projects will be capped at \$2,000,000. This funding will be seventy-five percent (75%) of the eligible carbon neutral or net zero energy planning and design costs, based on an approved Scope of Work.

Incentives will be paid for the incremental cost to plan and/or design a community, campus, or large real estate portfolio project to achieve carbon neutral or net zero energy performance. It is expected that all projects that receive planning and design funds through Category B of this program will apply to NYSERDA and utility programs at a future date for incentives to co-fund the actual installation costs of project measures, as applicable and available. However, projects shall not apply to NYSERDA or utility programs for planning, design, or analysis work included in the scope of work through this program, if selected. Applicants applying for BCCC incentives must clearly describe the scope, schedule and budget for the project. The application should also include description of how the balance of the project will be funded or financed.

Applicants applying for Category B funding shall be required to make a public commitment to decarbonize their community, campus, or large real estate portfolio, to publicize their pursuit of a carbon neutral goal, if the project is awarded through this program.

3. All Applicants

The awarded funding will be available to contracted projects for five years from the date of the contract execution. If the project is making sufficient progress on the contracted work and funding is still available, the project team may request an extension to the project period. The funding may be extended at NYSERDA's sole discretion.

Expenses incurred prior to the execution of a contract for an awarded project are not eligible expenses in the Consolidated Funding Application (CFA) project budget.

ELIGIBILITY

NYSERDA, at its sole discretion, determines a application's eligibility for BCCC.

Eligible Applicants

1. All Applicants

1. Industrial and Manufacturing Facilities
2. Commercial Facilities
3. Warehouses and Distribution Centers
4. Restaurants, Breweries, Vineyards, and Distilleries
5. Retail (must show alignment with Regional Priorities)

6. Food Processing Facilities
7. Colleges and Universities
8. Healthcare Facilities
9. Agricultural Facilities
10. Municipalities (Local Government)
11. State Agencies & Other State Government
12. Not-for-profit Corporations
13. Private Developers
14. Mixed Use Facilities
15. Decarbonization of an existing central plant

Ineligible Applicants

1. All Applicants

1. Heavy Industrial Facilities (large-scale industrial operations that require specialized equipment and processes)
2. Projects that include hydro-electric power

Project Location

1. All Applicants

BCCC is available to projects located anywhere in New York State. Applicants in REDC regions must be contributing to the System Benefits Charge (SBC) on their electric utility bill in order to be eligible for Clean Energy Fund incentives. To be an SBC eligible project, the project must be a New York State electricity distribution customer of one of the following utilities: Central Hudson Gas & Electric Corporation, Consolidated Edison Company of New York, Inc., New York State Electric & Gas Corporation, National Grid, Orange and Rockland Utilities, Inc., and Rochester Gas and Electric Corporation. Applicants that are not contributing to the SBC, may be eligible for Regional Greenhouse Gas Initiative incentives. Applications for projects that are or will be located in [disadvantaged communities \(DAC\)](#) and located within [Downtown Revitalization Initiative \(DRI\)](#) districts are considered in the scoring evaluation.

Project Status

1. All Applicants

Projects that have received a municipal approval; a Building Department's final approval of the building's architectural, mechanical, and plumbing plans; or the permit that allows for construction of the building at the time their application is submitted to NYSERDA will not be eligible for consideration. Projects in the early schematic design through the design development phase as of the date their application is submitted to NYSERDA are considered in the scoring evaluation.

General Eligibility

1. All Applicants

The funding provided through BCCC may be used in conjunction with other funding opportunities offered by NYSERDA and utility service providers (e.g. electric vehicle charging stations, solar photovoltaics, battery storage, and clean heat solutions). Projects that have been awarded or are seeking funding for support services from NYSERDA's PON 4614 or PON 5614 will need to clearly indicate duplicative funding is not being provided for the same scope of work. If incentives are being received from multiple programs, the incentive amount cannot exceed the design and implementation cost of the scope of work.

Applications are not eligible for award if they have already been awarded funding under previous rounds of BCCC, or intend to seek or have already been awarded Clean Energy Initiative (CEI) funding distributed by the New York State Homes and Community Renewal (HCR), or funding distributed through the New York City Housing Preservation and Development (HPD) Future Housing Initiative or any of their sub-agencies that is provided by NYSERDA through the Clean Energy Fund and intended to support goals similar to those promoted through BCCC. Applicants must review the rules and eligibility of all other programs, including utility programs, to determine if those funds are accessible in combination with funds offered by BCCC.

The applicant must be the owner or developer and have the authority, or have been given the authority, to select and direct all other members of the project team. The applicant must demonstrate their internal and external project team, including sub-consultants, have the capabilities to perform and successfully complete the proposed project as a multidisciplinary and integrated project delivery team,

An applicant may elect to submit more than one application to BCCC for different projects (different locations). Members of an applicant's team are welcome to participate in more than one application. Multiple, alternative applications submitted for a single project will result in the disqualification of both proposals, as it is the responsibility of the applicant to determine the more appropriate set of solutions for their project.

Eligible projects are as follows:

1. New Construction: A new building, buildings, or an addition, where a licensed professional architect or engineer has prepared and certified the building design documents.
2. Adaptive Re-use or Gut Rehabilitation: Substantial renovation for one of the following types of projects where a licensed professional architect or engineer has prepared and certified the building design documents:
 - i. Change of use and reconstruction of an existing building, buildings, or space(s) within a building,
 - ii. Construction work of a nature requiring that the building, buildings, or space(s) within a building to be out of service and unoccupied for a minimum of thirty (30) days,
 - iii. Reconstruction of a vacant structure, or structures, or space(s) within a building,
 - iv. The addition to or expansion of a building, in combination with any of the above.

2. Category A

The applicant will be defined as the Site Owner.

3. Category B

The applicant is defined as the Site Owner when the entire project site(s) is owned by a single entity. However, for Category B projects that have multiple Site Owners, the applicant may be the municipality, a business district, community organization, or other entity that can represent the combined interests of the site owners within the community. To be accepted as an aggregator of multiple site owners within the community, the aggregator must have letters of commitment from all of the site owners being represented.

Energy Performance

1. All Applicants

The project must demonstrate clean, resilient, high performance and carbon neutral attributes, and meet the definition of either Carbon Neutral or Net-Zero Energy performance as defined below:

1. Carbon Neutral Performance: A project that excludes all fossil fuels from the building systems and equipment qualifies to be Carbon Neutral. Building systems and equipment refers to at a minimum: building heating, ventilating, and air conditioning (HVAC), domestic hot water (DHW), kitchen, laundry, and other appliances.
2. Net-Zero Energy Performance: A project that excludes all fossil fuels from the building systems and equipment and where the actual annual energy used on-site is less than or equal to the on-site renewable energy produced, qualifies to be Net-Zero Energy.

Projects that rely on a fossil fuel-fired generator for emergency use only, projects which are served by an off-site fossil fuel-fired central heating plant, or if fossil fuels must be utilized for a project due to energy requirements for an industrial process or for unregulated loads, may at NYSERDA's sole discretion qualify as carbon neutral if fossil fuel use is excluded from all other building systems and equipment. NYSERDA, at its sole discretion, will consider exemptions to the Carbon Neutral rule for process and other unregulated loads on the site on a case-by-case basis. To be considered, the Applicant must explain the rationale for continuing to use fossil fuels and demonstrate that there is not a fossil fuel free equipment or process that can replace the fossil fuel usage (commercial kitchens will be required to be all-electric). In this instance, NYSERDA will consider the project's use of the US Department of Energy's publication of [A Common Definition for Zero Energy Buildings](#) in determining eligibility based on off-setting carbon-emitting fuels with additional renewable energy production.

Electric vehicle (EV) charging stations are strongly encouraged to be included in projects. However, it is not required that loads related to EV charging be included in the determination of net zero energy performance.

The applicant must deliver an energy model and analysis report for the Project that will determine the energy savings of the Project.

Additionally, the applicants must rely on one (1) of the following Standards to establish that the minimum projected energy efficiency and building performance. The applicants must provide documentation associated with any selected Standard as a deliverable.

1. Appendix G of ASHRAE Standard 90.1: Applicants intending to rely on this standard to model and predict energy performance must commit to designing a project that will achieve a minimum modeled source (primary) energy savings of 20% when compared with a project design that complies with the relevant Energy Conservation Construction Code of New York State (ECCC of NYS), currently the 2020 version; excluding the impacts of any proposed renewable energy generation. Energy performance must be established without the inclusion of any renewable or distributed energy generation, to confirm the energy efficiency performance threshold has been met, and then again calculated after renewable or distributed energy generation has been included in the energy model and submitted by the applicants to support evaluation of the energy efficiency of the design. Applicants will apply a 2.55 source-to-site conversion factor to support the calculation of efficiency in comparison with the natural gas baseline relied on by this standard to confirm the minimum energy performance threshold will be met. Applicants must commit to use of the "90.1 Section 11 and Appendix G Compliance Form" to establish simulation inputs and complete internal quality control.
2. Projects intending to meet certification requirements as published by Phius (Passive House Institute U.S.) must identify the building(s)' modeled source (primary) energy use in terms of kWh/person/year; and projects intending to meet certification requirements published by the Passive House Institute (PHI) must identify the building(s)' modeled source (primary) energy use in terms of kBtu/treated-floor-area/year. Applicants committing to achieving certification to either passive house standard are deemed as meeting the minimum modeled source energy savings requirements. Energy modeling must be completed and submitted both with and without the use of renewable or distributed energy generation to support evaluation of the efficiency of the design. Alternative energy modeling will not be expected of the applicants committing to achieving certification to either passive house standard to support their predicted energy performance.

Alternative energy modeling and energy performance standards may be considered on a case-by-case basis. Applicants must specify in their Scope of Work any requests to utilize an alternative energy modeling approach or performance standard. Energy standards developed by NYSERDA for existing Standard Offer programs, such as NY Sun and Charge NY, including the use of eligible installers, will be required for awarded projects.

NYSERDA, at its sole discretion, may choose to award highly replicable projects where only a portion of the building is seeking carbon neutral or net zero energy performance. In this instance, projects must demonstrate that the loads for that portion of the building will be separated from the other portions of the building, and the installed renewable energy system will be sized appropriately for those anticipated loads.

2. Category B

For Category B projects choosing to pursue net zero energy performance, project performance will be defined as highly energy-efficient, fossil fuel free facilities within a project boundary where the actual annual energy used within the project boundary is less than or equal to the renewable energy produced within the project boundary. If the project site cannot accommodate some or all of the renewable energy for the project loads within the project boundary, the Applicant may propose to study the use of long-term contracts for off-site renewable electricity generation (the

electricity generated as part of these contracts must end up in the New York Control Zone to be considered as part of the project).

Eligible Activities

Proposed projects must be comprehensive in nature. Applications of a nature that are single system or limited in scope will be deemed as ineligible if existing NYSERDA or utility programs are intended to support that single system project (e.g., projects only installing solar).

1. Category A

1. Planning, Design, Energy Modeling, and Integrated Project Delivery
2. Energy Efficiency Improvements
3. High performance building envelopes
4. Upgrades and Appliances Necessary for Electrification
5. On-site Renewable Energy Systems (photovoltaics, wind, or solar thermal), less applicable program incentives
6. Ground Source or Air Source Heat Pumps
7. On-site Electric Vehicle Charging Stations, less applicable program incentives
8. Battery and Thermal Storage Systems, less applicable program incentives
9. Advanced Controls to Enable Building-Grid Interactivity
10. Resiliency measures
11. Passive and active survivability measures
12. Certification fees for third-party building performance standards (Passive House, WELL, LEED)
13. Commissioning
14. Decarbonization of Central Plants
15. Or other efficiency or renewable energy technologies, as determined by NYSERDA

2. Category B

1. Master/Comprehensive/Site Plan as it pertains to design and energy performance
2. Design as it pertains to energy performance or other work necessary to achieve a carbon neutral site
3. Energy Modeling, Benchmarking and Technical Analysis
4. Development of Zoning Ordinances
5. Creation of Bid Documents
6. Technical Guidelines & Training for overseeing the installation of energy efficiency measures, renewable energy, energy storage and electric vehicle charging infrastructure
7. Case Studies

Ineligible Activities

1. Category A

1. Carbon capture or sequestration activities,
2. Off-site solar,
3. Projects or measures that intend to export power (e.g., community solar or exporting to the grid for profit), and
4. Applicants may not obtain incentives through this program for measures installed before an application is approved.

APPLICATION REQUIREMENTS AND FORMAT

The application structure should follow the outline listed below, and sequentially address the Scoring Criteria as listed in the Application Evaluation section. The applicant must identify their project's status as of the date of submission, as defined and detailed in the –Eligibility section.

The quality, rigor, and organization of the application will impact its evaluation and scoring, in part as a reflection of the likelihood a selected applicants will be successful in reaching their stated goals. Inconsistencies within applications (e.g., descriptions, drawings, or data across all documents) may also impact evaluation and scoring.

Applications should include a clear and concise description of the project, proposed scope of work services to be performed, and proposed project promotion, addressing each category detailed below. Applications should not exceed ten (10) pages, not including supplemental project documents.

The applicant must submit the following:

1. Category A

1. Project Description and Proposed Scope of Work Description:

- i. Project Description - including project status, design and construction schedule, square footage, number of buildings, construction type and methodology, building function, and third-party standards designed to,
- ii. Project Location - including the building address and if the project is located within a Downtown Revitalization Initiative (DRI) district, disadvantaged community (DAC) as defined by NYS, NYS Department of Environmental Conservation (DEC) Potential Environmental Justice area, Clean Energy Community (CEC), or a jurisdiction that has committed to adopting the NYS Energy Stretch Code 2020,
- iii. Project Team – including a list of additional developers of the project, firms acting in either a sub consultant capacity or as another partner on the project for design, engineering, certification, quality control, construction manager, general contracting, and an indication of whether integrated design or construction will be employed on the project,
- iv. Clean building attributes and design description - including carbon neutral or net zero status, how the project meets the definition of the Carbon Neutral definition as noted in the Eligibility section, project compliance path followed, overall building performance, energy goals, proposed Third Party Certifications, energy savings measures and systems, solutions implemented, renewables, water conservation strategies, storage, EV charging equipment, and the anticipated effects to the electrical grid,
 - a. Indication of energy modeling status, describing how energy modeling will be used to inform the design of the project, and the intended energy modeling standards or proposed alternative,
 - b. Indication of the expected, predicted, or modeled energy use and operational energy costs of the project. Predicted impacts of the project as proposed can include CO₂/person and CO₂/SF. A description of how the energy use and operational energy cost were calculated should be provided, along with documentation associated with the modeled or projected energy use,
 - c. Reducing piping and multiple in-field connections in Variable Refrigerant Flow (VRF) air-source heat pump (ASHP) systems.

- v. Resilience, Passive and Active Survivability description: including strategies to increase the resilience of the building, its components, occupants, and the surrounding community. These strategies should address forward-looking climate conditions, including a wider range of operating temperatures, increased incidences of flooding on site, extended power outages, and other extreme events.
 - vi. Quality of Non-Energy Co-Benefits description: including non-energy co-benefits to be incorporated into the proposed project's design, including strategies that increase occupant comfort, health, productivity, and safety.
 - vii. Reduction in Embodied Carbon description: Conduct research to reduce embodied and operation carbon in the proposed project's design.
 - viii. Alignment with REDC's Strategic Plan: Clearly state how the project is aligned with the applicable REDC's Strategic Plan, and/or Regional/State Priorities, such as how the project is aligned with the Region's Economic Clusters.
2. Project Costs and Budget: including the requested funding for the project in terms of the \$/sf amount and the project component incentives. Additionally, the application should include the project budget, proposed operation and maintenance costs, cost effectiveness, and cost reduction strategies implemented, including listing any additional anticipated incentive programs, and a description of how the balance of the project will be funded or financed.
 3. Project Marketing Plan: The applicant should describe how they intend to create high impact influence through successful marketing and promotion the project, including disseminating information to the market that could be useful to the industry and better inform the public about clean, resilient, carbon neutral building performance that supports the elimination or reduction in use of fossil fuels, and be aimed at increasing market replicability and scalability. Additional and relevant information may include but should not be limited to information about the project design, the construction and operational processes, strategies to reduce costs, project costs that are either absolute or comparative, financing strategies, additional construction details, resilient, active, and passive survivability attributes; non-energy co-benefits; cost reduction strategies, and overall lessons learned.

2. Category B

1. Campus/Community/Large Portfolio Project Description and Proposed Scope of Work Description:
 - i. Project Description – including what is needed to plan the project, how will the plan be implemented, planning and designing project status, planning, design and construction schedule, square footage, number of buildings, construction type and methodology, building function, and third-party standards designed to,
 - ii. Project Location - including the project boundary or provide a map of the project site(s), if the project is located within a Downtown Revitalization Initiative (DRI) district, disadvantaged community (DAC) as defined by NYS, NYS Department of Environmental Conservation (DEC) Potential Environmental Justice area, Clean Energy Community (CEC), or a jurisdiction that has committed to adopting the NYS Energy Stretch Code 2020,

- iii. Project Team – including who will be responsible for enforcement of the plan, a list of additional developers of the project, firms acting in either a sub consultant capacity or as another partner on the project for design, engineering, certification, quality control, construction manager, general contracting, and an indication of whether integrated design or construction will be employed on the project,
 - iv. Clean building attributes and design description - including comprehensive scope that will be undertaken to convert the facilities within the boundary to all-electric systems for the large-scale development, carbon neutral or net zero status, how the project meets the definition of the Carbon Neutral definition as noted in the –Eligibility section, project compliance path followed, overall building performance, energy goals, proposed Third Party Certifications, energy savings measures and systems, solutions implemented, renewables, water conservation strategies, storage, EV charging equipment, and the anticipated effects to the electrical grid,
 - v. Resilience, Passive and Active Survivability description: including strategies to increase the resilience of the buildings, components, occupants, and the surrounding community. These strategies should address forward-looking climate conditions, including a wider range of operating temperatures, increased incidences of flooding on site, extended power outages, and other extreme events.
 - vi. Quality of Non-Energy Co-Benefits description: including non-energy co-benefits to be incorporated into the proposed project’s design, including strategies that increase occupant comfort, health, productivity, and safety.
 - vii. Reduction in Embodied Carbon description: Conduct research to reduce embodied and operation carbon in the proposed project’s design.
 - viii. Alignment with REDC’s Strategic Plan: Clearly state how the project is aligned with the applicable REDC’s Strategic Plan, and/or Regional/State Priorities, such as how the project is aligned with the Region’s Economic Clusters.
2. Project Costs and Budget: including the requested funding for the costs of planning and design development for carbon neutral or net zero energy performance as it relates to Category B, inclusive of planning, design development and performance criteria, engineering and technical analysis, and validation. The application should also include description of how the balance of the project will be funded or financed.
3. Project Marketing Plan: The applicant should describe how they intend to make a public commitment to pursuing carbon neutral performance, create high impact influence through successful marketing and promotion the project, including disseminating information to the market that could be useful to the industry and better inform the public about clean, resilient, carbon neutral building performance that supports the elimination or reduction in use of fossil fuels, and be aimed at increasing market replicability and scalability. Additional and relevant information may include but should not be limited to information about the project design, the construction and operational processes, strategies to reduce costs, project costs that are either absolute or comparative, financing strategies, additional construction details, resilient, active, and passive survivability attributes; non-energy co-benefits; cost reduction strategies, and overall lessons learned.

3. All Applicants

In accordance with the Applicant Responsibilities section, the applicant should indicate which aspects of the project information can be publicly shared by NYSERDA in its promotional

activities and should stipulate if any portion or portions of the information should be reserved for NYSERDA's internal use and/or for anonymized analysis, and not publicly shared as project-specific information.

After a project has received funding, NYSERDA may elect to disclose unprotected information, in whole or in part, on websites, social media, in publications, in presentations, or other venues. In addition, the applicant should outline their proposed methods or mechanisms for sharing this information through their marketing plan. Applicants are expected to cooperate with NYSERDA in the development and review of marketing materials. NYSERDA credits the project name and applicants in all promotional material. Applicants are expected to participate in presentations and other promotional events.

Supplementary Documents:

1. All Applicants

The applicant must submit all supplementary documents listed here, as available, to support the application evaluation:

1. Project rendering(s) - at least one (1) high-quality rendering,
2. Architectural drawings as available, including but not limited to:
 - i. Floor plans,
 - ii. Site plans

Notes:

1. Submitted materials may be used for the presentation of funded projects in various forums.
2. Photographs and other images may be submitted as .pdf at the time of the application but must be provided as high-resolution image files at 24 inches wide and 300 dpi for projects funded and upon request.
3. Updates to the initially submitted materials may be requested for projects funded under BCCC.

APPLICATION EVALUATION

Prior to review by a scoring committee, applications will be reviewed for completeness and to ensure they meet General Eligibility requirements as detailed in the Eligibility section. This will be conducted several weeks after the close of the CFA. Applicants that are determined to not meet basic eligibility criteria will be informed at that time that they are not eligible for further consideration of this program for this year. Applications that do not meet the listed requirements will not be reviewed by the scoring committee.

Following the initial review, applications to BCCC will be evaluated based on their overall response and specifically based on the Categories and Category Descriptions as detailed in the Scoring Criteria section below. Evaluation and scoring of each application will ultimately be determined in comparison with and relative to the other applications submitted to BCCC.

A proposal is eligible to receive a total final score of 100, of which 80 percent is derived from the NYSERDA review criteria below and 20 percent is allocated to the applicable REDC. The REDC rates the degree to which the project aligns with the REDC's Strategic Plan.

Scoring Criteria

1. All Applicants

1. Regional and State Economic Development and Energy Strategies:

- a. Alignment with the REDC's stated Economic Clusters or Strategic Plan;
- b. The Project provides supportive or essential services to the community, including but not limited to childcare, workforce development, health services, or services for veterans;
- c. Contributes to Priority Issue Areas, including but not limited to:
 - i. Disadvantaged Communities: The Climate Leadership and Community Protection Act (CLCPA) requires state agencies, authorities, and entities to direct funding in a manner designed to achieve a goal for disadvantaged communities to receive forty percent of overall benefits of spending on clean energy and energy efficiency programs, <https://www.nyserderda.ny.gov/ny/Disadvantaged-Communities>,
 - ii. Downtown Revitalization Initiative and Strategic Community Investment: Priority consideration will be given to applications which demonstrate they will advance downtown revitalization and strategic place making through transformative housing, economic development, transportation and community projects that will attract and retain residents, visitors and businesses - creating dynamic neighborhoods where tomorrow's workforce will want to live, work, and raise a family. Projects should reflect the general principles of smart growth and sustainable development, and
 - iii. Health Across All Policies/Age-Friendly NY: This funding also supports the State's initiative to advance [Health Across All Policies/Age-Friendly NY](#), a collaborative approach that integrates health considerations into policymaking and program development across all sectors to improve community health and wellness. To encourage the economic and civic strengths of the aging population and to incorporate the social needs and desires of aging New Yorkers, NYSERDA will promote economic development that improves community health and wellness and supports age-friendly communities. Projects that favorably impact the ability of individuals to continue living in their homes and communities in a manner consistent with their abilities, and approaches that build toward a future in which every New Yorker can enjoy wellness, longevity, and quality of life in strong healthy communities are encouraged to describe in detail how the project addresses age-friendly inclusion.

2. Clean and Carbon Neutral Performance Measures:

- a. The estimated energy performance of the project, including all building systems, unregulated loads and renewable energy systems;
- b. Any early-stage analysis that has been performed to date,
- c. The applicant's commitment to meet the carbon neutral or net zero performance standard;
- d. Whether the project will include integrated design and construction principles,
- e. Whether the project will be designed to meet third-party performance validation standards (e.g., Passive House, International Living Future Institute (ILFI) Living Buildings Challenge, LEED Zero, Resilience Action List (RELi), WELL Building Standards, AIA 2030, ASHRAE beQ, EnergyStar Label, Fitwel, Green Globes, Indoor airPLUS, Enterprise Green Community (EGC), etc.);

- f. Whether the project will integrate energy performance validation (i.e. measurement and verification) in the future
- g. Whether the project is technically feasible, innovative, and superior to alternatives,
- h. Innovations in industrialization of construction, reduction in construction waste, efficient mechanical systems, how the innovations can be scaled and replicated
- i. Strategies to achieve clean building design attributes can include, but are not limited to:
 - i. High performance building envelope,
 - ii. Geothermal (ground-source or water-source) heat pump systems,
 - iii. Electrical grid interactivity and controls,
 - iv. Energy storage (thermal and electric),
 - v. On-site renewable energy systems,
 - vi. On-site electric vehicle charging,
 - vii. Battery storage,
 - viii. Heating, cooling, domestic hot water and ventilation components,
 - ix. Appliances,
 - x. Renewable generation district,
 - xi. Smart building controls and monitors,
 - xii. Transit-oriented development, and
 - xiii. Clean building design attributes, or combinations of attributes, that have been designed to reduce peak loads.
- j. Preference will be given to projects that:
 - i. Integrate a high-performance building envelope;
 - ii. Utilize Ground Source Heat Pumps for heating and cooling; and
 - iii. Are pursuing Passive House Certification.

3. Resiliency, Passive and Active Survivability:

- a. Applications should identify and assess each project-specific resilience risk, both current and anticipated throughout the project's useful life (e.g., more intense heat waves and increased frequency and severity of flooding), and describe in detail how a proposed strategy (or combination of strategies) will increase resilience of the building and its occupants by addressing that risk. This can be in the form of presenting climate hazard exposure data or a resiliency plan.
- b. Examples of resilience, passive and active survivability include, but are not limited to:
 - i. Locating the building outside of the 100- or 500- year flood plain and raising living spaces and critical system components above 500- year flood level, at a minimum,
 - ii. Creating areas of refuge within the building for occupants to shelter in place during extreme heat and cold events, power outages, or flooding, that incorporate HVAC systems that remain operable during power outages,
 - iii. Ensuring adequate passive survivability during extended power outages by identifying the duration the building could remain safely occupied, while maintaining safe thermal conditions, natural light, natural ventilation, and other conditions,
 - iv. Incorporating active resiliency strategies, such as satisfying critical loads for an extended duration using backup power or the use of energy storage solutions, potentially in combination with renewable energy generation,

- v. Incorporating community resilience-enhancing strategies, such as providing community services, connecting to district systems to ensure diversity of energy resources, and reduction of vulnerability of the area surrounding the site to extreme heat,
- vi. Other strategies that enable the building or community to adapt to, absorb or recover from events, such as mechanical systems that can accommodate future climate conditions,
- c. For any buildings in New York City that are expected to be subject to tidal inundation by 2080 or in the 2080 future floodplain and for buildings outside of New York City that are in the 500year flood zone or that are otherwise at risk of current or future flooding, storm water management and flood-mitigation measures should be incorporated into the design. At a minimum, critical system components must be raised above the future tidal inundation or flood elevation, depending on location, unless an alternative flood-mitigation plan to protect those critical components is proposed, and ultimately determined to be acceptable during the proposed project's review process, at NYSERDA's sole discretion.
- d. Applicants, regardless of the proposed project site location, may find the NYC Climate Resiliency Design Guidelines useful for resilience strategies and resources.
- e. For guidance on managing future flood risk, Partners may refer to the State Flood Risk Management Guidance and NYC Flood Hazard Mapper.
- f. For guidance on climate change and building resilience, Partners may refer to the ClimAID climate projections for New York State, the New York Adapting Buildings for a Changing Climate website, and the New York State Climate Impacts Assessment: Understanding and Preparing for Our Changing Climate.

4. Non-Energy Co-Benefits:

- a. Strategies to achieve successful integration of non-energy co-benefits include, but are not limited to:
 - i. Attributes related to community connectivity, economic development, sustainability, durability, and other aspects to improve the living environments for occupants,
 - ii. Actions to optimize indoor air quality, reduce indoor pollutants, and to safeguard against transmission of air-borne contaminants that cause allergies, asthma, and illness, such as use of Minimum Efficiency Performance Value (MERV) 13 air filters or better, and use of durable materials that limit moisture intrusion,
 - iii. Integrating design attributes found in non-energy third party standards and feasibility of certification, validation or verification of non-energy co-benefits through third party standard(s) that incorporate health-related co-benefits.

5. Embodied Carbon Reduction:

- a. Strategies to reduce the proposed project's overall carbon impact may include, but not be limited to:
 - i. Strategies that reduce embodied and operational carbon in materials and the use of materials that achieve carbon sequestration,

- ii. Integrate construction, operational, and waste reduction processes, or other design attributes,
- iii. overall reduction to the total volume of refrigerants and greenhouse gas emissions, the use of lower Global Warming Potential (GWP) refrigerants, and increased use of systems that require few or no refrigerant piping joints to be made on the construction site,
- b. Applicants must conform to the NY Office of General Services GreenNY Specification: Lower Carbon Concrete and NYS Office of General Services Buy Clean Concrete Guidelines when specifying concrete,
- c. Indication of embodied carbon modeling tool.

6. Cost Effectiveness:

- a. The estimated return on investment that the project identified in the application will generate (energy savings, lower operating costs, productivity, improved work environment, shortening the timeframe of on-site construction) for the project cost,
- b. Cost reduction strategies that have the capacity to substantively reduce the overall cost of the proposed project,
- c. The degree of the Applicant's financial viability and strength of financials/operating history/credit score.

7. Replicability:

- a. Whether the design and construction utilize materials and equipment that is commercially available,
- b. Whether the project scope is highly replicable for similar development projects within the Region or the State,
- c. Whether the project type and sector are economically viable in the current market,
- d. The degree of project readiness and likelihood of completion, including, where applicable for real estate development projects, if there are identified tenants for a completed project.

NYSERDA, at its sole discretion, may choose to not award any projects.

Program Policy Factors:

NYSERDA reserves the right to accept or reject applications based on the following program policy factors:

- 1. The degree to which the proposed project, including proposed cost share(s), optimizes the use of available funding to achieve NYSERDA's overall programmatic and portfolio objectives, as specifically set forth in BCCC,
- 2. There is diversity of technologies, approaches, and/or methods utilized to achieve carbon savings,
- 3. There is diversity among awardee sectors and industries,
- 4. There is geographic diversity among awardees, including within multiple locations, climates, regions, or other geographically articulated criteria (for example, disadvantaged communities, Regional Economic Development Regions, or an area of natural gas resource constraint),

AWARD CRITERIA DETAILS, FUNDED PROJECTS, SUBSEQUENT SUBMISSIONS, AND REQUIRED UPDATES

All Applicants

1. Upon NYSERDA selection for an award, NYSERDA will issue an Agreement for the project's estimated/eligible award amount. Applicants are required to execute an agreement with NYSERDA and deliver completed projects that meet the requirements detailed in the Request For Applications (RFA). The project deliverables and associated time and material or milestone payments will be as detailed in the RFA and the agreement executed between the selected applicants and NYSERDA. Selected applications will work with NYSERDA to develop a detailed and site-specific scope of work, schedule and project budget.
2. Notice of a funding award will be given in the form of a contract outlining the terms of the proposed assistance. Applicants are strongly encouraged to review and countersign NYSERDA's Agreement prior to starting the project. Project funding may only be used for expenses incurred after the date that the contract is executed. Costs associated with work or analyses conducted to submit an application to this program are not eligible for reimbursement.
3. While NYSERDA may at its discretion consider some design costs that occur prior to award to be eligible, all physical work conducted and costs incurred to make capital improvements to the facility prior to the execution of a contract of an awarded project will not be eligible for cost-sharing.
4. An independent third-party energy consultant is required for all projects. The applicant must deliver an energy model and analysis report for the Project that will determine the energy savings of the Project.
5. At any point during the design process, NYSERDA must be notified and provided associated details if significant deviation from the original application is expected, including whether the project is expected to fall short of the building performance and related goals as detailed in the original application, including the applicant's commitment to achieving the source energy savings in their original application to NYSERDA. Continuation of any project that deviates from the original application will be subject to NYSERDA's discretion.
6. All applicants will be required to certify and agree that any decrease in the scope of work described in the applicant's final CFA submission including, but not limited to, total project costs, may result in NYSERDA's reduction of the award, in NYSERDA's sole discretion, in an amount proportionate to any such decrease. All applicants will be requested to certify and agree that any expansion of the scope of work described in the applicant's final CFA submission including, but not limited to, total project costs, may not result in an increase of the award, consideration of scope changes will be at the sole discretion of NYSERDA.
7. NYSERDA reserves the right to reduce the award amount or terminate any project should it fall below the originally committed energy performance.
8. Please note that awarded grants are transferable at the sole discretion of NYSERDA.
9. It is expected the project will proceed in the time frame set forth by the applicant. If the implementation of a project fails to proceed as planned and is delayed for a significant period of time and there is, in the exclusive judgment of NYSERDA, doubt as to its viability,

NYSERDA reserves the right to cancel its funding commitment to such project. NYSERDA reserves the right to require Recipient to provide any additional information and/or documentation NYSERDA deems necessary and terminate the project at any point if the applicant fails to provide such documentation in a timely manner.

10. All required public approvals must be in place prior to the start of construction and installation of renewables, including State Environmental Quality Review (SEQR) and consultation with the New York State Historic Preservation Office (NYSHPO), if applicable. Physical work on a NYSERDA-funded project may not be started prior to the completion of any necessary environmental, historic and/or smart growth review.
11. Grant funds originally awarded to projects that have since been cancelled or terminated will be repurposed for economic development projects by NYSERDA at its discretion in consultation with the REDCs.
12. PROJECT TERM COMPLETION DATES: Financial incentives are based upon a dollar per square foot methodology and flat incentives to achieve carbon neutral or net zero energy performance, as determined in the approved Scope of Work.

Category A

- i. NYSERDA will provide payments of incentives in at least three designated stages during the design and construction of the project: 1) Design Complete/ Buildings Department Approval; 2) Site Work, 3) 50% construction complete, with delivery of systems equipment on-site; and 4) when construction is complete.

Category B

- i. NYSERDA will provide payments for time and materials on a monthly or quarterly basis.

13. MATCHING FUND REQUIREMENTS / DEADLINES: The applicant will pay the remaining percentage of the total project cost of the design and construction of the project.
14. NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

SCHEDULE OF PAYMENTS

Category A

Milestone		Percent of Total Award Paid at Each Milestone
1	Energy Model and Design Phase	25%
2	At the Start of Construction	25%
3	At 50% Completion of Construction	25%
4	At Completion of Construction	25%

NYSERDA reserves the right to negotiate the type (time and materials or milestone) as well as the amount or schedule of payments for a funded project. At its sole discretion, NYSERDA may reduce or withhold payments for a project that falls short of the proposed level of performance, or that has not met this solicitation's minimum submission requirements.

NYSERDA RESPONSIBILITIES

1. NYSERDA provides funding and support to projects in accordance with Building Cleaner Communities Competition, as detailed in this solicitation.

APPLICANT RESPONSIBILITIES

1. Applicants are responsible for completing and promoting the use of effective, energy efficient products, services, and designs, as defined by the RFA.
2. Applicants must update the project information that was initially provided in the application, assist NYSERDA in promoting the project, and share information that will help the industry accelerate the design, construction, and operation of clean, resilient, high-performance buildings. All of which may be shared publicly unless otherwise noted.
3. Applicants must allow the project to be part of NYSERDA's promotional efforts and to cooperate with NYSERDA in the creation and implementation of those efforts, including but not limited to articles, books, case studies, exhibitions, lectures, presentations, tours, social media, and other electronic marketing promotions including a BCCC website. NYSERDA reserves the right to brand and market the funded projects as Building Cleaner Communities projects or a similar reference.
4. Applicants are responsible for abiding by the Terms and Conditions in the RFA.

ADDITIONAL RESOURCES

For more information, Proposers should contact the New York State Energy Research and Development Authority, 17 Columbia Circle, Albany, New York 12203, email BCCC@nyserda.ny.gov or visit: <https://www.nyserda.ny.gov/>.

NYSERDA Evaluation Services

Request for Proposal (RFP) 6010

***Maximum funding available: \$38 Million**

Category A: Market Development and Deployment: \$26.6 Million

Category B: Innovation and Research: \$11.4 Million

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other priorities arise or program funding sources become available

Proposals Due: June 25, 2025 by 3:00 pm, Eastern Time*

The New York State Energy Research and Development Authority (NYSERDA) is issuing this competitive solicitation to procure a single contractor or a lead contractor with a team of subcontractors to conduct clean energy program evaluations for each of the following distinct categories of programs:

Category A: Market Development and Deployment (MD&D) Evaluation

Category B: Innovation and Research (I&R) Evaluation

NYSERDA anticipates awarding one contract for Category A and one contract for Category B. Individual evaluation workplans will be developed, budgeted, and implemented within the construct of the contract and draw down from available funding accordingly. This RFP replaces and evolves NYSERDA's current evaluation framework through RFQL 4162 to improve early engagement between NYSERDA and consultants in developing workplans, improve throughput and access to key findings, and reduce administrative burden related to mini bid procurements and associated contracting actions.

At a high level, anticipated activities that will be undertaken to evaluate each category of programs include, but are not limited to the following:

- Market characterization and market effects assessment designed to capture a holistic Market Transformation viewpoint of program activities, including non-energy benefits
- Assessment of Indirect and Direct impacts linked to program activities and energy/performance related metrics
- Process evaluation

While evaluation methods and approaches used to conduct these activities may apply similarly across Categories of programs, there are also notable differences in MD&D and I&R that require specialized evaluation methods and approaches.

NYSERDA's work is funded by a combination of sources including, but not limited to, ratepayer funding authorized through Orders issued by the New York State Public Service Commission (PSC), auction proceeds from the Regional Greenhouse Gas Initiative (RGGI), and a small share of New York State budget appropriations. The selected contractor's evaluation activities will include Categories and programs within all these sources and

encompass both existing funding and future funding that may become available.¹ It should be noted that some programs are funded by more than one of these sources; in those instances, the evaluation will generally be cross-cutting, but it may be necessary to report results specific to a funding source.

Further detail about these activities is presented herein.

Proposers may submit proposals for one or both Categories and may be selected for none, one, or both Categories. However, each Category must be submitted separately as combined proposals will not be considered. Qualified proposers will be evaluated and scored according to a scoring rubric specific to each Category. **For this solicitation, NYSERDA requires the majority (no less than 60% of the total contract budget) of the work under each resulting contract to be conducted by the lead contractor. Review of expenditure proportions will be conducted annually to ensure compliance. Therefore, the use of subcontractors to implement the body of work, in totality, shall not exceed 40% of the total contract budget.**

The successful proposer(s) will demonstrate expertise and experience in evaluating a wide range of programs, interventions and activities represented in the MD&D and I&R categories, respectively. The successful proposer(s) will also demonstrate expertise and experience in applying best practice methods and innovations in the needed areas of evaluation work, as described in this solicitation. All of these activities are conducted in support of the NYSERDA Market Characterization and Evaluation team, which is responsible for implementing a variety of objective evaluations and analyses per NYSERDA governance, regulatory, and statutory mandates. The work of the selected contractor(s) will aid in understanding NYSERDA's efficiency, effectiveness, and overall results specific to funding-portfolio goals as well as support the energy and climate policy goals of New York State. The body of work included in each Category will inform NYSERDA, the PSC, the New York State Department of Public Service (DPS), and program administrators, and be used to inform efforts to reduce greenhouse gas emissions, accelerate economic growth, and improve the quality of life for all New Yorkers.

This RFP 6010, NYSERDA Evaluation Services, will require the selected contractor(s) to meet short turnaround requests and provide actionable insights while supporting NYSERDA's accountability standards.

Informational Q&A

NYSERDA will accept questions regarding this solicitation until June 18, 2025 at 3 p.m. EST. Proposers should submit all formal questions in an email to: evaluationservicesrfp@nyserda.ny.gov with the subject "RFP 6010: Solicitation Questions- [Proposing Entities Name]". Responses to all questions will be posted anonymously on https://portal.nyserda.ny.gov/CORE_Solicitation_Detail_Page?SolicitationId=a0rcr00000PBKDA. NYSERDA's written responses will supersede any content provided within this solicitation.

Teaming Options

To facilitate the teaming of firms with experience in delivering the services requested in this RFP, NYSERDA is compiling and will make available a list of individual firms interested in acting as a lead contractor, subcontractor, or subject matter expert. This list will reflect only those contractors that express interest in collaborating with other firms on this RFP and is not intended to be an exhaustive list of lead contractors, subcontractors, or subject matter experts available to respond to this RFP. Any and all teaming arrangements for proposals to this RFP shall

¹ While future evaluation funding sources are currently unknown and unallocated, proposers are strongly encouraged to review and familiarize themselves with recent public regulatory proposals and petitions that may potentially signal additional funds that may be allocated to NYSERDA, pending regulatory review and authorization for such funds. These recent public proposals include: [NYSERDA's EE-BE Strategic Plan - LMI](#), [NYSERDA's EE-BE Strategic Plan – Non-LMI](#), [New York Green Bank Petition](#), and [NYSERDA's Innovation and Research Petition](#).

be the responsibility of individual firms. **NYSERDA will not take on any role in coordinating or assembling teaming arrangements for proposals to this RFP.**

For inclusion in the published list of contractors (lead, subcontractor, or subject matter expert) interested in teaming, NYSERDA requests the following information emailed to evaluationservicesrfp@nyserda.ny.gov with the subject “RFP6010: Teaming Opt-In [Proposing Entities Name]” on or before **5:00pm, May 21, 2025**:

Name of Firm

Contact Name

Contact Email

Contact Phone

Category of Expertise:

- Category A: Market Development and Deployment (MD&D) Evaluation
- Category B: Innovation and Research (I&R) Evaluation.

The list will be posted on

https://portal.nyserda.ny.gov/CORE_Solicitation_Detail_Page?SolicitationId=a0rcr00000PBKDA on or before **May 23, 2025**.

Intent-to-Propose

Proposers should indicate their intent to propose to this RFP in an email, including *Attachment A: Intent to Propose*, to evaluationservicesrfp@nyserda.ny.gov by 5 p.m. EST on or before **May 28, 2025**. Failure to submit an intent-to-propose notification will not result in disqualification, but notification is strongly preferred to inform NYSERDA’s internal planning for a timely review of proposals.

Proposal Submission

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal in PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer’s entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible.

For detailed instructions on how to submit a proposal (online or paper submission), click the link “[Application Instructions and Portal Training Guide](#) [PDF]” located in the “Current Opportunities” section of NYSERDA’s website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>). To ensure successful submission, it is strongly advised that proposals are submitted to the portal well in advance of the deadline. This allows ample time for unforeseen technical issues and ensures the submittal process is completed successfully.

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The NYSERDA Designated Contacts for this Procurement are Patricia Gonzales (Category A) and Dana Nilsson (Category B) (Designated Contacts) at evaluationservicesrfp@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Jim Cowman (Designated Contact) at (518) 862-1090, ext.3652 or JimSolicitations@nyserda.ny.gov. Contacting

anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see [Solicitation Proposal and Vendor Responsibility Questions.pdf](#) for a complete list of the questions proposers must answer as part of a submission. The online proposal system closes promptly at 3 p.m. Eastern Time, and files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. INTRODUCTION

NYSERDA works to promote energy efficiency, renewable energy, and emissions reduction across New York's economy and energy ecosystem. This work helps consumers, businesses, organizations, and communities access affordable and clean energy, energy efficiency and resiliency measures, and all-electric buildings and vehicles in New York. At the same time, NYSERDA encourages innovation and market competition to deliver value to the State. NYSERDA uses rigorous evaluation to provide high levels of accountability and transparency, in order to steward public funds toward prudent and impactful investments.

This Evaluation Services solicitation seeks to align evaluation of NYSERDA offerings that reflect new and significant drivers of change, including the prioritization of the key strategies and policies as outlined in NYSERDA's Strategic Plan, *Toward a Clean Energy Future: A Strategic Outlook 2025-2028*.² The Strategic Plan outlines NYSERDA's key mission outcomes, roles and strategies for 2025-2028, and presents indicators that show progress toward goals.

The contractor(s) shall conduct the following evaluation activities, in support of NYSERDA's continuous strategic optimization of its programs:

- Market characterization and market effects assessment designed to capture a holistic market transformation viewpoint of program activities, including non-energy benefits
- Assessment of indirect and direct impacts linked to program activities and energy/performance related metrics
- Process evaluation

The contractor(s) will be expected to use real-time data collection and analysis to serve NYSERDA decision-making needs. The contractor(s) efforts will aid in driving accountability for outcomes both internally and externally.

A composite set of metrics will be necessary to capture the full picture of performance across NYSERDA programs and portfolios. NYSERDA has developed and continues to improve upon a Common Metrics Framework to enable a varied set of programs across its portfolios to be measured in a more standardized way that enables comparisons where appropriate and roll-up of progress.

Additionally, in implementing the evaluation work, the selected contractor(s) shall:

- Take an enterprise-level view, eventually covering all business units, Categories and funds.
- Conduct independent assessments at multiple levels including Category and program performance.
- Facilitate and coordinate among teams, business units, and network of data experts on market understanding, planning, and performance.
- Uphold and raise the standards of evaluation and reporting, supporting confidence and trust in NYSERDA.
- Maintain regulatory compliance regarding performance evaluation and reporting.

At this time, NYSERDA has allocated approximately \$38 million of authorized/available evaluation funds for five years (through at least 2030), with the option to extend for an additional two years at NYSERDA's discretion. NYSERDA envisions approximately 70% of its evaluation activity will support Category A: MD&D Evaluation and approximately 30% of its evaluation activity will support Category B: I&R Evaluation. **The overall dollar value and category allocations are subject to change, especially as additional funds may be authorized through new**

² <https://www.nysERDA.ny.gov/-/media/Project/Nyserda/Files/About/Strategic-Plan/Strategic-Outlook.pdf>.

regulatory proceedings and budgeting processes. These estimates are provided here as a reference for potential workload and emphasis. Funding will only be allocated to each Category of programs as specific workplans are developed and approved by NYSERDA on an individual workplan basis.

II. SERVICES REQUESTED

NYSERDA anticipates awarding one contract for each Category of programs (Category A: MD&D Evaluation and Category B: I&R Evaluation). Individual evaluation workplans will be developed, budgeted, and implemented within the construct of the contract and draw down from available funding accordingly.

Proposers are invited to submit, in the format described in the Contractual Arrangement and Responsibility section, a proposal demonstrating their skills, expertise, qualifications and personnel rates in any or all of the two Categories described herein. In addition to covering the services requested for Category A and/or Category B, contractors must also cover the Core services and Process Evaluation, as described below.

Core Evaluation Services

Evaluation services that apply to both Categories are described in this section and must be addressed by all proposals.

All contractors, regardless of the Category being proposed, must provide the following core services:

Project Development, Execution and Communication

- Quickly develop tactical and cost-effective evaluation plans, including approaches for all the services requested as described herein. Conduct early program data characterization activities to assess the evaluation strategy (strategies) that best meets NYSERDA needs, and is consistent with NYSERDA's funding, program structures, and best practices (see Appendix A).
- Apply synergies where feasible to effectively leverage evaluation funds, reveal potential data trends/opportunities, and optimize evaluation value.
- Efficiently and effectively implement described evaluation plans, as specified by NYSERDA.
- Efficiently and effectively manage and conduct multiple projects at once, ensuring high quality work output and budget adherence.
- Ensure timely completion per the agreed-upon work plan and NYSERDA's set schedules for completing evaluations that align with required reporting cycles in November and March, and with sufficient allowance for both internal and external review by stakeholders.
- Effectuate strong project management approaches to identify and mitigate evaluation risks.
- Work with data provided by others (e.g., survey data, industry data sources – open and commercially available).
- Provide clean, coded data in a manner satisfactory to NYSERDA and use, treat, and store data in a manner consistent with State requirements as outlined in Attachment C: Sample Agreement.
- Prepare and deliver clear presentations of study objectives, methods and results to NYSERDA and external stakeholders. This includes the ability to represent data in the form of charts, graphs, maps, dashboards, and other forms of data visualization that are paramount to the effective utilization and clear communication of the data and evaluation results.
- Apply expert technical report writing and editing skills to all project deliverables. This includes the ability to represent data in the form of charts, graphs, maps, dashboards, and other forms of data visualization.

- Expertise in or willingness to adopt the following software:
 - Survey Data Collection – Qualtrics
 - Statistical Analysis - SAS, Python
 - Data Visualization - Tableau, Python, Power BI
 - Project Management - Jira, Asana
 - Note general software proficiency in the suite of Microsoft products (Excel, PowerPoint, Word, Teams) and SharePoint is required.

Technical

- Use of NYSERDA-developed logic models to inform the market, impact or other types of program evaluations, communicate the program theory with NYSERDA program and other internal stakeholders, support NYSERDA's regulatory reporting requirements and communicate broadly with external stakeholders.
- Identification of pathways for anticipated savings (direct or indirect) for a target population market actors.
- Development probability and non-probability sampling techniques for evaluating clean energy programs. NYSERDA evaluation work typically involves stratified random sampling; purposive sampling has also been applied and systematic sampling may be useful for incremental evaluation approaches. Bidders should describe their experience with sampling techniques used by NYSERDA and any others that may be applied to this work. Bidders should include explanation of how they would go about choosing the appropriate sampling technique and estimating statistically relevant precision of the results, if applicable.
- Execution of a range of primary and secondary social science and market research data collection methods such as interviews, surveys, focus groups, Delphi panels, site visits (including virtual), citation analysis, use of web analytics, and others that align with industry best practices (see Appendix A).
- Recruiting of respondents in hard-to-reach populations, applying innovative approaches where needed. Bidders should describe innovative approaches used and found to be successful with various populations.
- Execution of a range of relevant technical measurement and verification (M&V) approaches that align with industry best practice, cited protocols (e.g., International Performance Measurement and Verification Protocol - IPMVP), and standards (see Appendix A). M&V may address electricity, natural gas, delivered fuels and capacity savings and other non-energy impacts. M&V will produce valid energy savings/usage/generation units to support calculation of emission reductions, customer bill savings, health and other non-energy benefits, including on a lifetime basis to understand cost-effectiveness of initiatives.
- Leverage information from M&V approaches as well as primary and secondary data collection and analysis to conduct analyses designed to capture and measure market effects and market transformation.
- Ensure expert interpretation of results in comparison with other programs and evaluations needed to provide relevance and context.
- Provide NYSERDA with objective expertise on the strength and merits of various program strategies based on current research, as well as best practices in program evaluation and market research.
- Conduct case studies and other targeted evaluation at various levels where applicable.
- Apply policy analysis or research related to evaluations, if needed.
- Consistently innovate and engage in advisement or development of evaluation approaches to meet NYSERDA's evolving needs.

Process Evaluation

Across the Categories and programs, NYSERDA will conduct process evaluations to inform the program design and implementation and establish the framework for future program evaluation activities. Technical **will be applied to both Category A and Category B and must be addressed in all proposals.**

Process evaluations may include a NYSERDA relationship, and customer journey mapping. Process evaluation may also include an exercise to assess and document similar or competing program offers within the same target population(s) or segment(s). This relationship and network mapping also supports the documentation of market and other external factors that may influence the ability to meet the program stated goals and outcomes. Proposers should detail their approach to conducting program process evaluations at a high-level and in coordination with evaluation and program activities.

Category A: MD&D Evaluation

MD&D Evaluations are designed to identify, quantify and validate the outcomes and impacts associated with NYSERDA funded programs. Evaluations include estimates of impacts due to the program, both immediate and those expected to accrue over the longer term from follow on market activity that results from NYSERDA's investments.

NYSERDA anticipates 25 or more MD&D evaluation studies will be undertaken for completion over the course of 2025 and 2026 in alignment with annual reporting cycles. Among these, five or more projects are anticipated to be high complexity and are also slated as high priority for completion of preliminary results no later than Q1 2026 to meet annual report deadlines.

Key objectives to evaluate the category of MD&D programs include, but are not limited to:

- Assess and verify program impacts and technical, economic, and behavioral influences associated with program activity (direct and indirect) including recommending approaches to improve evaluability of programs.
- Characterize and assess deeper market related influences and effects including technical, economic and behavioral barriers and motivations to determine extent of market transformation.
- Conduct longitudinal measurement of key market progress indicators to assess market transformation.
- Collect and analyze data on the status of several common metrics to measure and communicate NYSERDA's market transformation impacts more effectively.
- Assess technical performance of clean energy technologies to meet regulatory requirements and NYSERDA's strategic MD&D goals using real-time, or near real-time evaluation practices.
- Assist with review and development of technical baselines and metrics development that serve New York State more broadly well as data analytics/visualization strategies to better communicate evaluated metrics to internal and external stakeholders.
- Collaborate and coordinate with Category B: Innovation & Research evaluation to better reveal NYSERDA sponsored innovations that make the leap to full commercialization.

Proposers should demonstrate experience completing evaluation deliverables that include, but are not limited to the following areas:

Market Adoption, Animation and Transformation

- Market sizing and segmentation associated with direct and indirect impact assessment

- Quantify awareness, knowledge, behavior, soft costs, and adoption (e.g., market penetration, market share, and investment) of clean energy technologies and practices that reveal deeper market trends within and among initiatives to establish and reinforce a common metrics framework.
- Quantify direct and indirect adoption of supported measures, including the percent of a target market that adopts supported measures or participates in a program in a representative period of time.
- Supply chain visualization, retail demand/adoption analysis, and market infrastructure analysis required to reveal impacts associated with deeper market trends related to program performance.
- Assessment of expectations and behaviors associated with direct and/or indirect impacts, including but not limited to those associated with program implementers, contractors, developers, and customers.

Metrics quantification and program performance assessment

- Accurate representation of program performance for all required reporting metrics, including more common metrics such as evaluated savings and realization rates, as well as expanded metrics including energy savings as a percent of baseline consumption, or alternative metrics especially for technologies or programs that do not lend themselves to standard realization rate quantification, such as energy storage.
- Assess electrification impacts, including but not limited to analysis of heating and cooling periods, appliance use, and associated costs. Identify variables driving energy and load savings, usage and behavior patterns.
- Determination of causes for anomalous results in energy savings and consumption, peak load trends, energy storage charge/discharge patterns, and energy generation including but not limited to effects resulting from financial, behavioral, technical sources, and program implementation.
- Conduct onsite and/or virtual primary and secondary data collection of power, energy, and related performance information associated with NYSERDA supported measures and technologies as appropriate for direct and/or indirect impacts.
- Conduct energy consumption and peak load analysis – Monthly and Interval (Hourly). This activity includes, but is not limited to, methods that accurately assess demand management, time of use, peak shaving (where feasible), measure specific use patterns, and peak load reduction savings as appropriate for direct and/or indirect impacts.
- Technical Resource Manual (TRM) measure review as required to support NYSERDA in providing confidence in savings assessments and Effective Useful Life (EUL) estimates (where applicable). Consultant coordination tasks shall align with the external TRM review cycle for initiatives that use TRM calculations, assumptions, or measures as outlined in Verified Gross Savings (VGS) documents filed annually by NYSERDA. The TRM measure review process, workplans, and current versions can be found on the TRM website³. Measure reviews occur quarterly, with major revision updates occurring annually.
- Identify and verify EUL from valid industry sources (e.g., ASHRAE, national labs, TRM, etc.) required to estimate lifetime savings.

For a listing of Sectors, Areas, and Measures anticipated to be evaluated through Category A, please refer to Appendix A.

Category A: MD&D Evaluation Subject Matter Expertise

In addition to services requested outlined above, NYSERDA has identified **areas of specific interest** and need whereby the use of Subject Matter Experts (SMEs) may be needed. **New and novel evaluation approaches and topics** noted below are emerging areas of interest for NYSERDA, where SME services may be added to support

³ <https://dps.ny.gov/technical-resource-manual-trm>.

proposals. Proposers should highlight particular expertise in these approaches as part of their submittal that may be called upon in the future.

NYSERDA reserves the right to establish teaming arrangements that support subject matter expert input, either as part of this contract or through separate contract agreements. NYSERDA requires the majority (no less than 60% of the total budget) of the work under the resulting contract shall be conducted by the lead contractor and, therefore, the use of subcontractors to implement the body of work, in totality, shall not exceed 40%. Should a proposer need assistance acquiring an SME in a particular area, the proposal should clearly note this, along with plans to acquire or willingness to team.

Areas of specific interest where SME may be required in Category A:

- Clean energy financial markets/financing
- Solar PV and Energy Storage system performance, including Community Distributed Generation
- New Construction
- Codes and Product Standards
- Low-to-Moderate Income
- Disadvantaged communities
- Heat Recovery
- Net Zero Buildings

New and novel evaluation approaches where SME may be required in Category A:

- Macroeconomic analysis
- Artificial Intelligence for evaluation (as applicable by NYSERDA ITS)
- Detailed Web scraping, including advanced techniques (e.g., AI development, etc.)
- Satellite imaging
- Geospatial analysis and visualization
- Evaluation 'gamification' to supplement/replace traditional survey approaches or other self-reporting evaluation methods
- Use of 'Internet of Things' devices to supplement/replace utility billing consumption collection/analysis for evaluation
- Novel on-site or virtual site measurement and verification
- Data analysis platform development/visualization of savings, usage, and program realization rates in 'real time' or near real-time
- Non-Energy Impacts evaluation strategies

Category B: I&R Evaluation

I&R Evaluations are designed to understand and broadly quantify NYSERDA I&R investments from concept to commercialization, revealing not only the savings and non-energy impacts associated with NYSERDA funded programs, but also reveal the impact of key NYSERDA milestones driving innovation success. Evaluations include estimates of impacts due to the program, both immediate and those expected to accrue over the longer term from follow on market activity that results from NYSERDA's investments.

NYSERDA anticipates 10 or more I&R studies for completion over the course of 2025 and 2026. Among these, approximately 3 are anticipated to be high complexity and are also slated as high priority for completion of preliminary results no later than Q1 2026 to meet annual report deadlines.

Understanding of and experience with the full lifecycle of innovation and research from concept through to commercialization is required.

Key objectives to evaluate innovation and research initiatives include, but are not limited to:

- Assess and verify program benefits and technical, economic, and behavioral influences associated with program activity (direct and indirect) including evaluability of programs
- Collect and analyze data on the status of several common metrics to measure and communicate NYSERDA's market transformation impacts more effectively.
- Understand and quantify NYSERDA involvement through the complete innovation process from ideation, ties to academic and industry-based research, knowledge creation, product development, patents, funding sources, through to demonstration of technology, and ultimately to market introduction and full commercialization.
- Assess technology and market adoption staging and readiness milestones that occur within innovation and are necessary to minimize risk (technical, manufacturability, cost, knowledge, workforce, market awareness, etc.) associated with commercialization and scale-up.
- Understanding Technology Readiness Levels and Adoption Readiness level metrics and progression
- Conduct early data characterization of the full innovation pathway with the intent to assess influences that affect the NYSERDA innovation lifecycle from pre-seed/ideation to commercialization.
- Collaborate and coordinate with Category A: Market Development and Deployment evaluation to better reveal NYSERDA sponsored innovations that make the leap to full commercialization.
- Assess how well program processes are working as well as the extent to which a program is being implemented as designed and optimally achieving the stated outcomes.

Proposers should demonstrate experience completing evaluation deliverables that include, but are not limited to the following areas:

Technology and Market Adoption Readiness

- Review (quantification, validation) of technology readiness indicators including, but not limited to Technology Readiness Level and Adoption Readiness Level
- Quantification and characterization of variables that affect technology readiness levels as well as velocity of movement along these continuums.
- Identification of critical technology readiness features necessary for innovation progress apparent in product development, demonstration, business development, or replication projects.
- Market sizing and segmentation associated with benefits assessment and quantifying subgroups or subsegments likely to emerge into viable market segments at commercialization as evidenced by replication and other growth indicators through the lifecycle of NYSERDA related technical and innovation business support
- Analyzing and quantifying (where feasible) the market demand for NYSERDA supported innovation in terms of its size, market trends, market actor (e.g., end users, service providers, distributors, manufacturers, other stakeholders, etc.) preferences and behaviors with the intention of assigning benefits to NYSERDA innovation programs using evaluation best practices and standards.

- Anticipated market penetration associated with supported innovation technologies and practices as evidenced by replication of products/demonstration projects, licensing, and other market indicators.

Commercialization Pathways

- Overarching tracking and evaluation of illustrative technologies, projects, or products from the ideation/pre-seed founder identification stage through early, growth, and full commercialization stages associated with NYSERDA funded innovation and research activity.

Metrics quantification and program performance assessment

- Identification of and/or verifying additional product sales and related outcomes as well as replication of sponsored innovation activity
- Primary and secondary data collection of power, energy, and related performance information associated with NYSERDA supported innovation activities
- Verification of relevant knowledge creation (e.g., patents) associated with innovation supported activities and replication
- Quantification of program customer perceptions, expectations and behaviors
- Implementation of methods consistent with reliable collection of Industry data, when available, to verify technical and market adoption readiness and/or commercial launch points signaling effective market development and deployment potential
- Possible review and identification of emerging technologies potentially suitable for inclusion in the New York State Technical Resource Manual (TRM)

For a listing of Sectors, Areas, and Measures anticipated to be evaluated through Category B, please refer to Appendix A.

Category B: I&R Evaluation Subject Matter Expertise

In addition to services requested outlined above, NYSERDA has identified **areas of specific interest** and need whereby the use of Subject Matter Experts may be needed. **New and novel evaluation approaches and topics** noted below are emerging areas of interest for NYSERDA, where SME services may be added to support proposals. Proposers should highlight particular expertise in these approaches as part of their submittal that may be called upon in the future.

NYSERDA reserves the right to establish teaming arrangements that support subject matter expert input, either as part of this contract or through separate contract agreements. NYSERDA requires the majority (no less than 60% of the total budget) of the work under the resulting contract shall be conducted by the lead contractor and, therefore, the use of subcontractors to implement the body of work, in totality, shall not exceed 40%. Should the proposer need assistance acquiring an SME in a particular area, the proposal should clearly note this, along with plans to acquire or willingness to team.

Areas of specific interest where SME may be required in Category B:

- Hydrogen (infrastructure, development, technology and uses)
- Long Duration Energy Storage
- Heat Recovery
- Net Zero Buildings

New and novel evaluation approaches where SME may be required in Category B:

- Macroeconomic analysis
- Artificial Intelligence for evaluation (as applicable by NYSERDA ITS)
- Detailed Web scraping, including advanced techniques (e.g., AI development, etc.)
- Satellite imaging
- Geospatial analysis and visualization
- Evaluation 'gamification' to supplement/replace traditional survey approaches or other self-reporting evaluation methods
- Use of 'Internet of Things' devices to supplement/replace utility billing consumption collection/analysis for evaluation
- Evaluation of technology development from ideation through to commercialization
- Technology and market readiness designations

III. CONTRACTUAL ARRANGEMENT AND RESPONSIBILITY

The selected contractor for each category will enter into a standard contract enabling NYSERDA to retain their services for each category for which they have been selected. This standard contract will not guarantee any specific amount of work. The work and funding assigned to each contractor will be determined on a project-by-project basis.

The term of retention for each selected contractor is up to five years with two annual options to renew at NYSERDA's discretion. NYSERDA will evaluate performance on at least an annual basis and reserves the right to resolicit the work encompassed within this solicitation when necessary.

Work plans

Projects will be assigned through individual workplans that will be developed, budgeted and implemented by the selected contractors with oversight and input by NYSERDA. Anticipated tasks outlined within each workplan are included in Appendix A.

Upon the conclusion of each workplan, NYSERDA will provide feedback to the contractor on performance related to the following metrics:

- Timeliness, adherence to schedule and final project deadlines
- Deliverable quality
- Budget adherence, or advance notification by contractor to NYSERDA of potential budget variances including reasons and proposed alternatives
- Engagement/responsiveness by the contractor to NYSERDA and its partners
- Meeting goals and objectives of the workplan

Contractor Responsibility

Upon selection through this RFP, and upon agreement and approval of workplans, selected contractors shall be responsible for the following:

- Demonstrating value-added, timely completion of workplans that align with the requirements and qualifications described in the Services Requested and Qualifications section of this RFP
- Providing titles and rates according to the contract agreement
- Keeping NYSERDA informed regularly on the progress of the evaluation effort, including meeting with NYSERDA staff on a periodic basis, as needed

- Submitting deliverables to NYSERDA for review and approval in accordance with the timeline outlined in the workplan
- Providing required documentation of expenditures by Activity (required) and other more discrete Task level at NYSERDA's discretion when seeking reimbursement from NYSERDA and ensuring NYSERDA is fully aware of any budget implications not anticipated at the onset of the work (See Appendix A)
- Ensuring the evaluation effort is based on the following principles:
 - Objectivity, fairness, and balance in terms of the types of data collected; only those data deemed necessary for evaluation purposes shall be collected and summarized in reports
 - Sound methodology, credible data and analysis, and adherence to the highest professional standards

All studies require timely invoicing and Project Management task steps which include tracking of expenditures related to individual NYSERDA funding codes and Activities as well as incorporation of strategic Project Management coordination across studies both within and across Categories, where desired by NYSERDA.

Active coordination is a requirement for Project Management for all studies between MD&D and I&R evaluation activities on technologies and approaches that encompass both categories making the leap to commercialization as identified by the I&R Consultant.

NYSERDA's Responsibility

Designated NYSERDA project managers will be responsible for overseeing and managing workplans undertaken by the selected contractors, including but not limited to reviewing, commenting and approving activities, tasks and subsequent deliverables; coordinating with program staff and interested external stakeholders; promoting coordination among contractors qualified for each evaluation area, as appropriate; assisting in the presentation and dissemination of findings; reviewing and approving invoices promptly; and providing timely feedback to contractor on performance following the conclusion of each workplan.

Proposal Submission

Proposals should not be excessively long or submitted in an elaborate format that includes expensive binders or graphics. **Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal.** Each page of the proposal should state the name of the proposer, RFP 6010, and the page number. Proposals may be either single- or double-sided, but a page is considered one side of an 8-1/2" x 11" piece of paper. The font size shall not be smaller than 11 point. Each proposal shall contain, at a minimum, the components listed below.

The proposal must include the information described in Services Requested and be presented in the format detailed and include the attachments listed below.

One individual proposal must be submitted for each Category.

Cover Letter (1 page)

Proposers shall submit a cover letter on company letterhead that:

- References RFP 6010
- Specifies the specific Category being offered by the Proposer
- Summarizes the proposer's ability to perform such services under the Category

- It is signed by a person with authority to enter into a contract with NYSERDA

Table of Contents

- Proposers should present a comprehensive table of contents that outlines the page number and section where the Category components and requirements can be found.
- Potential bidders are advised that while a proposer may submit proposals to both Categories, one singular proposal that addresses Category A and Category B together will **not** be considered.

Proposals for each area must include the items listed below, **regardless** of whether they have been presented in another proposal:

- Overall experience and capabilities
- Cost Proposal – Project Personnel and Rates Form
- Relevant Attachments

Introduction and General Information (up to 2 pages)

- Proposers shall summarize their understanding of the objectives and requirements of this RFP and briefly identify key information about their organization and any other organizations that are part of the proposer's team.
- Proposers shall describe how the organization or team is qualified to perform and complete the core evaluation services requested under this RFP.

Evaluation Approaches (maximum of 2 pages)

- Describe the evaluation, measurement, and verification (EM&V) experience and approaches needed to assess the performance of the NYSERDA Categories with rigor and certainty, consistent with industry standards and protocols (see Appendix A)
- Well-developed and systematic approach that describes how the proposer, including its team of subcontractors and subject matter experts, will collaborate with NYSERDA, its stakeholders, and the successful proposer of the relevant Category to develop and implement research described in the Services Requested section.
- Present well-developed strategic insights and actionable recommendations grounded in rigorous, defensible methods.
- Describe its process, adherence to and consideration for regulatory, statutory, and reporting requirements, including but not limited to those associated with the funding streams and outlined in this RFP.
- Describe the actions the proposed team will take to complete each project highlighting innovative approaches that maximize efficiency and accuracy.

Management Structure (maximum of 2 pages)

- Identify all team members, including the Principal or Lead contact, who will be responsible for ensuring that all deliverables and projects are timely and of good quality. Proposers are required to identify the project manager within their firm who will serve as the single point of contact for the entirety of the contract.
- Identify all personnel providing services requested under the RFP and their respective roles. The management structure should identify a lead person and backup support, should this need arise.
- Provide a clear description of the roles and responsibilities of each key person in completing the work, including subcontractors and subject matter experts.
- Provide an organizational chart and discuss how the team will be structured to meet the information and reporting needs of NYSERDA efficiently and effectively.

- Describe how the proposed team plans to coordinate the design and implementation of the individual studies among Evaluation and Program staffs, the evaluation contractor team members/subcontractors. Include proposed approach to collaborating across Evaluation Categories and NYSDERDA programs.
- Provide the proposed approach for convening and managing thematic or project-specific working groups and the sharing of information in a timely, secure manner. Discuss how the proposed team would manage deliverables according to the timeline while maintaining flexibility to accommodate learnings.
- Discuss proposed teaming arrangements, if applicable. State the team's individual and combined expertise that would enable successful completion of the project in Category A or B. Please note: NYSDERDA requires the majority (no less than 60%) of the work under the resulting contract shall be conducted by the lead contractor and, therefore, the use of subcontractors to implement the body of work, in totality, shall not exceed 40%.
- Indicate which team members are responsible for each high-level Activity, as noted in Appendix A.
- One-page resumes of all personnel shall be provided in an Appendix and/or hyperlinked.
- Indicate the name and contact information for at least three references for whom your organization, or proposed teaming arrangement if appropriate, has recently completed similar or relevant projects.

Unnecessary attachments or broken hyperlinks beyond those sufficient to present a complete, comprehensive, and effective response will influence the evaluation of the proposal.

Experience and Capabilities (2 pages)

- For each evaluation Category, proposers must explicitly describe their expertise and ability to deliver services specific to that Category. This should include the aggregate number of years working in this area and a summary of **at least one and no more than three** relevant projects which include
 - Cost of the study
 - Description of the deliverables
 - Access to the final study (weblink preferred)
 - References for each of the projects
 - NYSDERDA projects presented in this section must identify a NYSDERDA staff reference.
 - Resumes can be placed in an appendix to limit page length for this section.
- Selected projects should refer to the specific qualifications described for each Category as described above and demonstrate the firm's capability to incorporate innovative methods to solve problems
 - Identify challenges in data collection and methods used to mitigate those challenges while maintaining the integrity and credibility of the data
 - Describe how the firm was a key contributor to the study
 - Describe how the firm was able to triangulate and analyze data to inform decision making.

Proposers should ensure the summaries prepared in this section represent the widest range of services the firm is offering for each Category.

Evaluation Strategy Questions (3 pages)

Proposers are required to respond to all questions below, which will be included in scoring rubric.

How would the proposed team respond to the following scenarios:

1. Response: Poor or significantly delayed response to data collection and/or chosen outreach method
2. Data Quality: Poor data quality either from the program and/or from respondents to outreach (e.g., delivered fuels)
3. Incentives: Choice of incentive and decision to implement or not implement financial incentives

4. Tools: How to stay current in latest technology, software, and state-of-the art tools for analysis, reporting, visualization, and evaluation.
5. Strategy: How to stay current in all available modes of outreach and related enabling technologies

Potential Conflicts of Interest (maximum of 1 page)

The proposer and any personnel of the proposer firm must be free from any financial or similar interest in any product or service which may conflict with or appear to conflict with the objectivity of the services provided to NYSERDA.

- Describe all product, manufacturer, or service-related affiliations.
- Fully discuss possible conflicts of interest, actual and perceived, which could arise in connection with performance of this work by proposed team members.
- Describe how the proposer would resolve conflicts of interest. In the event that NYSERDA determines that a team member, subcontractor or subject matter expert may have a conflict of interest or the appearance of a conflict of interest, NYSERDA may: (1) take this into consideration in evaluating the proposal; (2) exclude the proposer from consideration for an award; (3) adjust the scope of work to avoid the conflict or appearance of conflict; or (4) negotiate other appropriate actions with the team member to avoid the conflict or appearance of conflict.
- **Non-disclosure of any affiliation can result in the termination of a contract, if awarded.**

Category Budget and Schedule (2 page maximum)

To evaluate the cost component of each proposal, for an anticipated 5-year contract term with two optional renewal periods, NYSERDA requires a 7-year project budget estimate containing the following:

- In Excel format, Attachment B – Budget and Staffing detail be developed with budget estimates allocated to each Activity and Project Management line item as a *dollar (\$) amount by activity and percentage of the total budget by activity for each Category, and encompassing the duration of the contract*, in addition to justification of percentage allocations. Strategic oversight, collaboration, and administration of evaluation services in and across the Categories should be clearly accounted for in the budget. See Appendix A for important information describing the typical evaluation lifecycle that includes these Activities.
 - Activity 1: Data characterization, workplan scoping, and finalization
 - Activity 2: Workplan Execution
 - Activity 3: Workplan completion and dissemination
 - Activity 4: Workplan closure
 - Activity 5: Project Management
- Include all fully loaded costs associated with this RFP in their proposed price.

Category A: To the best of its current knowledge, NYSERDA anticipates that there could be 25 or more MD&D evaluation studies undertaken for completion over the course of 2025 and 2026 in alignment with annual reporting cycles. Among these, five or more projects are anticipated to be high complexity and are also slated as high priority for completion of preliminary results no later than Q1 2026 to meet annual report deadlines.

Category B: To the best of its current knowledge, NYSERDA anticipates 10 or more I&R studies for completion over the course of 2025 and 2026. Among these, approximately 3 are anticipated to be high complexity and are also slated as high priority for completion of preliminary results no later than Q1 2026 to meet annual report deadlines.

NYSERDA will collaborate with the successful proposer to develop and implement specific evaluations with differing complexity and priority. As noted above, the funding opportunity notice includes an option to extend the duration of the resulting contract at NYSERDA's sole discretion.

- For each proposed Category, proposers must provide a Budget and Staffing detail form (Attachment B) and submit the name, title, and fully-burdened hourly salary range for each individual in the proposal who will perform the work in the Services Requested section under an agreement with NYSERDA. **Note: Any escalation rates must be identified for the full five-year contract term. NYSERDA reserves the right to cap escalation rates.**

NYSERDA does not require proposers to estimate travel or other direct costs as part of proposals, but reasonable costs for these may be part of workplans on an as needed basis. NYSERDA will not reimburse the purchase or rental of measurement tools and equipment or costs to respond to task work order requests.

Staffing

- Using Attachment B- Budget and Staffing detail and Instructions as a template, submit the name, title, and fully burdened hourly rates of the staff proposed to perform the work outlined in this RFP.
- Use the Attachment B Budget and Staffing detail form to provide overhead multipliers for the duration of the project.
- Attach documentation to support indirect cost (overhead) rate(s) included in your proposal as follows:
 - Describe the basis for the rates proposed (i.e., based on prior period actual results, projections, federal government or other independently approved rates).
 - If rate(s) is approved by an independent organization, provide a copy of such approval.
 - If rate(s) is based on estimated costs or prior period actual results, include calculations to support proposed rate(s). Calculation should provide enough information for NYSERDA to evaluate and confirm that the rate(s) are consistent with generally accepted accounting principles for indirect costs.

NYSERDA reserves the right to audit any indirect rate presented in the proposal and to make adjustment for such difference. NYSERDA reserves the right to cap an escalation rate of 3%. Requests for financial statements or other needed financial information may be made if deemed necessary. A payment based on the final deliverable will be reserved until project completion. If awarded, NYSERDA may choose to negotiate the amount of such payment.

In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

A payment based on the final deliverable will be reserved until project completion. If awarded, NYSERDA may choose to negotiate the amount of such payment.

IV. PROPOSAL EVALUATION – RUBRIC

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria listed in Appendix A. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview.

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making one award for each category of programs (Category A: MD&D Evaluation and Category B: I&R Evaluation) under this solicitation. NYSERDA anticipates a contract duration of 5

years with two (2) one-year options to renew at NYSERDA's discretion, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify **proposers** in approximately (four) weeks from the **proposal due date** whether your **proposal** has been selected to receive an award. Upon receipt of this notification, a proposer can request to schedule a debrief on the selection process and the strengths and weaknesses of its proposal by contacting evaluation-services-rfp@nyserderda.ny.gov. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Information Security: The NYS Office of Information Technology Services (ITS) establishes and regularly updates policies, standards, and guidelines for information security (collectively referred to as "ITS Security Policies") for State Entities, including NYSERDA. contractors, vendors, and solution providers conducting work on behalf of NYSERDA including, but not limited to, application development, web development, hosting, or managing NYSERDA's sensitive data are required to comply with the NYS requirements. These requirements include, but are not limited to, the NYS Information Security Policy NYS-P03-002 which sets forth the minimum requirements, responsibilities, and accepted behaviors to establish and maintain a secure environment and achieve the State's information security objectives. contractors that manage NYSERDA's data outside of NYSERDA's systems with a High or Moderate rating as per the NYS ITS Information Asset Identification Worksheet must comply with the following requirements.

High Rating	Moderate Rating
- Maintain up-to-date SOC 2 Type 2 Assessment Report and provide to NYSERDA upon request. - Maintain Cyber Security Insurance - Provide a signed self-attestation on an annual basis for multiyear contracts	- Maintain Cyber Security Insurance - Provide a signed self-attestation on an annual basis for multiyear contracts

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or

members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to):

interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Investment Banking and Underwriting Services

Request for Proposal (RFP) 6013

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Proposals Due: July 30, 2025 by 3:00 p.m. Eastern Time*

The New York State Energy Research and Development Authority (NYSERDA) requests proposals from firms interested in providing investment banking and underwriting services related to the competitive or negotiated sale or private placement of bonds by NYSERDA, or the sale or financing of loans issued by NYSERDA, in connection with NYSERDA's Green Jobs – Green York (GJGNY) Loan Program, or for other financing program activities. NYSERDA expects to award a contract to a single firm or a single contract to a teaming arrangement of firms. The contract term is anticipated to be five years. NYSERDA is requesting responses from firms interested in providing these services as a Senior Manager. NYSERDA will consider firms with an underwriting practice whose scope is either national and/or focused on the Northeast region. Firms must either be New York State (NYS)-certified minority-and women-owned business enterprises or must partner with a NYS-certified minority-and women-owned business enterprises as a Co-Senior Manager.

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](#) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are: Heather J. Clark (Designated Contact) at (518) 862-1090, ext. 3253 or by e-mail heathersolicitations@nyserda.ny.gov or Luis Aguirre-Torres (Designated Contact) at (518) 862-1090, ext. 3410 or by e-mail LuisSLuisSolicitations@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact James Cowman (Designated Contact) at (518) 862-1090, ext. 3652 or jim.solicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for

online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>) .

I. Introduction

NYSERDA is a public benefit corporation created in 1975 under Article 8, Title 9 of the State Public Authorities Law through the reconstitution of the New York State Atomic and Space Development Authority.

NYSERDA is responsible for administrating the Green Jobs – Green New York (GJGNY) Loan Program under the GJGNY Act of 2009 ("GJGNY Act"). NYSERDA has established a revolving loan fund to provide loans to finance (i) the installation of energy efficiency improvements and (ii) the installation of renewable technologies, including solar systems, air source and ground source heat pumps for residential 1-4 family dwellings. The GJGNY Program was funded with \$112 million in Regional Greenhouse Gas Initiative ("RGGI") funds authorized by the GJGNY Act, and approximately \$280.7 million in additional RGGI funds approved by the Authority's Board, through the State's fiscal year ending March 31, 2025.

The legislation limits the amount of energy efficiency loans to not more than \$13,000 for single-family residential homes (this limit is increased to \$25,000, for projects with a payback of 15 years or less).

Residential unsecured consumer loans were launched in November 2010. Loans are originated by contracted third-party loan originator, using loan underwriting standards established by NYSERDA. The loans are then serviced by a contracted third-party loan servicer.

In August 2011, the Power NY Act of 2011 was enacted authorizing NYSERDA loans issued through the GJGNY Loan Program to use an on-bill recovery mechanism to allow loans to be repaid through a charge on the customer's electric or gas utility bill. In March of 2012, NYSERDA began to issue on-bill recovery loans for residential loans.

GJGNY Loan Financing – Residential

Following is a comparison of the terms and conditions for residential loan financing offered through the GJGNY Loan Program:

ON-BILL RECOVERY LOAN		SMART ENERGY LOAN
Interest Rate (subject to change)	4.50% or 8.00%	4.50% or 8.00% A 0.5% interest rate discount is applied to these rates if the customer selects automatic ACH payments prior to loan closing.
Loan Amount	- Up to \$13,000 (up to \$25,000 if the simple payback is less than 15 years, calculated by dividing the loan amount by the first year estimated energy cost savings). \$1,500 minimum loan amount.	
Loan Term	5, 10, or 15 years (term may not exceed expected useful life of home energy improvements).	
Repayment Terms	- Repayments added to borrower's utility bill as a NYSERDA Loan Installment charge. - If utility service is terminated or suspended, borrower will be billed directly by NYSERDA's loan servicer. - If the loan obligation is not fully satisfied prior to the sale of the home, the borrower must provide notice to the purchaser; is responsible for amounts billed by the utility up to the date of transfer; and with agreement from the buyer, can transfer the remaining monthly payments to the new utility account holder. - Non-payment of utility charges may result in termination of service; non-payment of the loan obligation may result in a judgment.	- Repayments made directly to NYSERDA's loan servicer via monthly statement billing or automatic bank withdrawal (ACH). - If home is sold or transferred, borrower is responsible for the outstanding balance of the loan and cannot be assigned. - Non-payment of the loan obligation may result in a judgment; NYSERDA is authorized under State law to certify amounts past due for collection by offset from income tax refunds and other payments due from the State.
Borrower Eligibility	- Borrower (or co-borrower) must own the home and be named on the utility account of a participating utility: Central Hudson, Con Edison, PSEG-Long Island, National Grid (upstate customers only), New York State Electric and Gas Corporation, Orange & Rockland Utilities, or Rochester Gas and Electric. - A title company under contract with NYSERDA will search public records to verify ownership of the property.	Borrower (or co-borrower) must own the home, or lease or manage the residential building and be an authorized representative of the owner.
Eligible Home Energy Improvements	Energy efficiency or renewable technology measures designed to increase the energy efficiency of existing buildings and any required ancillary equipment and related services, including necessary health and safety improvements. Eligible Measures can be found in the Eligible Measures list.	
Cost Effectiveness Requirements	- Monthly payment may not exceed 1/12th of the estimated average annual energy cost savings from the improvements over the loan term. - Loans over \$13,000 must have a payback of 15-years or less (money saved must pay for project cost within 15 years).	- The project is considered cost effective if at least 85% of the total loan amount is comprised of pre-qualified eligible measures or the savings to investment ratio (SIR) is less than or equal to 80%. - Loans over \$13,000 must have a payback of 15-years or less (money saved must pay for project cost within 15 years).

(Continued on next page)

ON-BILL RECOVERY LOAN		SMART ENERGY LOAN	
Fees	• \$150 origination fee (can be included in the loan amount). • Late payment fee equal to 1.5% of unpaid payments. • Returned payment fee may be charged by the utility as authorized by the Public Service Commission. • Past due balance on utility account may be subject to a collection fee by the utility as authorized by the Public Service Commission. • If utility service is terminated, borrower may be subject to a reconnection fee from the utility.		• \$150 origination fee (can be included in the loan amount). • Late payment fee is the lesser of 5% or \$5. • \$20 fee for returned payments. • Collection fee of up to 22% of amount due if not received within 90 days of due date, as authorized by State law.
Agreements	• Borrower must sign a loan note with NYSERDA. • All individuals or legal entity representatives named on the property deed must sign and have notarized an On-Bill Recovery Program Declaration, which will be filed by NYSERDA to provide notice to any subsequent purchaser of the property; the Declaration is not a lien on the property, but is recorded in a similar way as a mortgage to provide notice to others of the loan obligation. • Only one On-Bill Recovery Loan per account allowed.		• Borrower must sign a loan note with NYSERDA's loan originator. • When the loan is disbursed, it will be serviced by NYSERDA's loan originator.

Following are the residential loan underwriting standards used in the program (effective July 1, 2021):

LOAN UNDERWRITING STANDARDS		
(subject to change)		
Standard	"Tier 1" Loans	"Tier 2" Loans
Minimum Credit Score	640	540
Maximum Debt-to-Income (DTI) Ratio	• 50% for credit score 640-719 • No limit for credit score 720+¹	• 40% if credit score is 540-599 • 45% if credit score is 600-639 • 50% if credit score is 640-679 • 60% if credit score is 680-719 • No limit if credit score is 720+¹
Mortgage Payment History	None	As reported on the credit report, current on all mortgage payments for the past 12 months. NO mortgage payments more than 60 days late during the past 24 months.
Bankruptcy	No bankruptcy, foreclosure, or repossession within last 7 years.	No bankruptcy, foreclosure, or repossession within last 2 years.
Judgements	No combined outstanding collections, judgments, charge-offs, or tax liens > \$2,500	

¹ DTI ratio for applicants with a credit score of 720+ or with a loan of <\$5,000 will be calculated on stated income only for program analysis purposes.

As of 01/31/2025, NYSERDA has issued 47,153 residential unsecured consumer loans totaling approximately \$623.6 million in capital and with a current loan balance of \$330.8 million. Following are summary statistics of the current loan portfolio:

Average credit score	749
Average debt-to-income ratio	33.1%
Average original term	168.2 months
Average interest rate	3.80%
Average payments made	86.3
Average payments remaining	81.5

Summarized information and anonymized loan-level details on the attributes and payment performance history on the residential program loan portfolio is available on NYSERDA's website and the OpenNY platform at: <https://www.nyserda.ny.gov/Researchers-and-Policymakers/Green-Jobs-Green-New-York/Data-and-Trends>.

Bond Securitizations

As a means of leveraging the GJGNY Loan Program's initial revolving loan funding capital, particularly for the residential loans, NYSERDA has issued ten series of bonds in an aggregate amount of \$283.8 million, consisting of three series of Residential Energy Efficiency Revenue Bonds, two series of Residential Solar Loan Revenue Bonds, two series consisting of Residential Energy Efficiency and Solar Loan Revenue Bonds and three series consisting of Residential Clean Energy and Energy Efficiency Financing Revenue Bonds. As of December 31, 2024, the aggregate principal balance of the Authority's Residential Energy Efficiency Revenue Bonds outstanding was \$33,550,000, the aggregate principal balance of the previously issued Residential Solar Loan Revenue Bonds outstanding was \$2,625,000, the aggregate principal balance of the Authority's Residential Solar and Energy Efficiency Revenue Bonds outstanding was \$6,610,000, and the aggregate principal balance of the Authority's Residential Clean Energy and Energy Efficiency Revenue Bonds outstanding was \$77,870,000.

NYSERDA will continue to access the primary markets for best execution, using various execution approaches, including but not limited to securitization, back-levered, whole-loan sales, and participation certificates and syndication to leverage the GJGNY Loan Program funding capital for the residential loans. Each series of program bonds is issued under a separate bond indenture and is secured by repayment income on loans made through the GJGNY Loan Program, funds held under the bond indenture as security for that series of program bonds, as well as funds and accounts held under the indenture as security for all program bonds.

NYSERDA may also issue additional bonds, notes and other obligations, the proceeds of which are used to promote activities.

For a more detailed description of the GJGNY Loan Program, please visit NYSERDA's website at <https://www.nyserda.ny.gov/All-Programs/Programs/Residential-Financing-Options>.

For the official statement for Series 2024A please visit <https://emma.msrb.org/IssueView/Details/P1426855>.

II. Scope of Services

Senior and Co-Senior Manager will be expected to provide comprehensive “book-running” services related to the structuring, marketing, selling, and underwriting of NYSERDA's GJGNY Primary Market Execution. This shall include, but may not be limited to, the services listed below.

- Identify opportunities in the market for NYSERDA;

- Develop and analyze potential financing structures and advising, in consultation with NYSERDA's financial advisor and bond counsel, on the development of the overall financing plan;
- Run "Best Execution" analysis for market execution using industry standards analytics, approaches and modeling assumptions using analytical tools for arbitrage pricing and bond sizing to maximize proceeds and reduce cost of capital / funding, marketing and underwriting;
- Creating an overall marketing plan and pricing strategy for each bond sale;
- Provide relevant market and economic data, pricing views, comparable prices, and pricing proposals prior to pricing;
- Preparation of strategy for presentations to rating agencies, credit enhancers, and investors, as necessary and assist NYSERDA and its financial advisors in obtaining ratings;
- Follow NYSERDA's policies, either oral or written, for liability, designation and retention, pricing procedures and the process of selling debt obligations;
- Underwrite the bonds;
- Post-pricing support; including:
 - Fulfillment of orders and allotments, upon approval of NYSERDA;
 - Market support for underwritten bonds; and
 - Provide all relevant pricing information to NYSERDA, including orders (retail, member, priority), debt service schedule, rates, yields, true interest cost, information related to comparable transactions.
- Provide support and service in selling existing loan portfolios; and
- Provide support and service for post transaction activities including rating agency surveillance reporting.

III. Proposal Requirements

Both Senior Manager and, if applicable, Co-Senior Manager shall complete the proposal requirements.

Proposals should not be excessively long or submitted in an elaborate format that includes expensive binders or graphics. Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. To be considered, the proposals must respond to the questions and requests listed below. Failure to respond to the questions or provide information as requested may be deemed unresponsive. Proposals should not exceed twenty (20) pages, excluding required attachments and signed cover letter. NYSERDA will not be responsible for any costs or expenses incurred by respondents responding to this RFP, including the cost of preparing the initial response, providing any additional information and traveling for an oral presentation. Proposals and attachments should be uploaded as individual documents.

Each page of the proposal should state the name of the proposer, the RFP number, and the page number. The proposal must be in the following format:

Section 1. Background Information

1. **Cover Letter.** Cover letter shall be signed by a person authorized to commit the firm to the terms of the response and to be held primarily responsible for the veracity of statements made in the response.
2. **Description of Firm.** Provide a brief description of your firm, its capabilities and organizational structure. Please describe how your firm's selection would benefit NYSERDA and why your firm should be appointed as a senior manager, including a description of the firm's strengths and any other factors that should be considered in the selection process.
3. **Approach to Services Requested.** Present your firm's approach to complete the services requested in Section II above. Describe your firm's in-house technical and analytical abilities.
4. **Key Personnel.** Identify and describe the qualifications of key personnel and team members that will be involved in underwriting NYSERDA's debt, including their role and the extent of their participation, their capabilities and relevant experience. Please limit this list to those who will actively work on NYSERDA's account. The respondent should include resumes and all NYSE/NASD registration information for all key personnel in an appendix (appendix will not be counted against page limit). The respondent should also include information relating the position and importance of the public finance department within the firm as well as current staffing levels and any known or proposed changes to those staffing levels. Please be specific for the following duties (if applicable), providing telephone and fax numbers, mailing address and e-mail address for each individual:
 - (a) primary contact/day-to-day responsibilities,
 - (b) financial analysis,
 - (c) new products,
 - (d) marketing and sales,
 - (e) underwriting.
5. **Capital/Liquidity.** Attach your firm's most recent quarterly financial statements. Please discuss your firm's capital structure including its total capital, equity capital, and excess net capital for each of the last three (3) years, and in accordance with SEC Rule 15c3-1. The bidder should demonstrate its capacity to successfully underwrite NYSERDA's tax-exempt or taxable debt, including the firm's ability to distribute bonds nationally. Discuss your firm's capital structure including total capital, equity capital, and uncommitted excess capital. Indicate how much of your firm's uncommitted excess capital is allocated to municipal finance and provide recent examples of how the firm has used that capital to support the sale and market distribution of tax-exempt or taxable municipal bonds. Provide the minimum and maximum bond par amounts that your firm would be comfortable with as a senior manager. The respondent should identify any commitments or other restrictions which may limit its ability to underwrite NYSERDA's debt. Please include the name, address, email address, phone number, and fax number of the contact person who is authorized to answer questions and negotiate final terms and conditions on behalf of your firm.
6. **Relevant Experience and Past Performance:** Describe recent underwriting work which best illustrates the firm's most relevant experience, ability, and expertise, including your firm's experience underwriting Asset Backed Securities and your strategy for issuing these bonds in conjunction with a pooled loan program. Provide a brief history and a general description of underwriting practices, highlighting particular experience with New York based clients, asset-backed issuers and pooled financings. Please summarize your firm's negotiated underwriting experience with leveraged pooled transactions from 2020 to date. For each issue please list your firm's role (Senior Manager, Co-Senior Manager, or Co-Manager), the issuer, the overall size of the issue, the related pricing date, the orders placed by your firm and the amount of bonds allotted to your firm.
7. **Credit Ratings.** Please discuss your approach to assisting NYSERDA rate a transaction similar to Residential Clean Energy and Energy Efficiency Financing Green Revenue Bonds comparable to NYSERDA's last two bond issues sold in 2023 and 2024. Include a discussion of which rating agencies should be used between Moody's Corporation, S&P Global Ratings, Fitch Ratings Inc., and Kroll Holding Corporation.
8. **Marketing.** Please provide your firm's distribution capabilities. What would your firm propose as an investor outreach plan? How would you suggest NYSERDA market Residential Clean Energy and

Energy Efficiency Financing Green Revenue Bonds comparable to NYSERDA's last two bond issues sold in 2023 and 2024? How would you maximize investor participation? How do you suggest NYSERDA structure the bonds to focus sales to sophisticated investors? Discuss any potential limitations on suggested approaches and the impact that this may have on investor participation. Discuss whether the bonds should be structured/designated as municipal bonds or corporate bonds and how this is expected to impact investor interest and orders.

9. **Bond Structuring and Sale.** What is your underwriting desk's approach to structuring and pricing a transaction similar to Residential Clean Energy and Energy Efficiency Financing Green Revenue Bonds comparable to NYSERDA's last two bond issues sold in 2023 and 2024? Include the following in your discussion:

- What software or structuring application does your firm use? What type of access is given to NYSERDA and its financial advisor? Please state in your proposal if you intend to use artificial intelligence ("AI") for this work. Approval must be expressly granted by NYSERDA to use any AI Systems by any NYSERDA Vendor for any purpose whatsoever related to their work for NYSERDA. See <https://www.nyserda.ny.gov/About/Doing-Business-with-NYSERDA> for more information on the use of AI at NYSERDA.
- How your firm would structure the bonds to minimize NYSERDA's required equity contribution and maximize the advance rate (In its most recent Series 2024A bonds, based on the characteristics of the pledged loan portfolio and Kroll's CPR and stress case loss assumptions, the structure resulted in bond principal equal to about 60% of pledged loan principal, requiring an equity contribution equal to about 40% of pledged loan principal; NYSERDA seeks to minimize its equity funding contribution while still allowing a financing product with attractive terms to encourage consumer access, particularly to support broadening access to financing to lower income and lower credit consumers).;
- What call and redemption provisions would provide for an optimal structure and result in the best pricing for NYSERDA;
- If the suggested structure includes a supersinker term bond, how can NYSERDA achieve the lowest rate and spread on this bond at pricing?
- What would be your firm's major contribution to the structuring, marketing, pricing and distribution of NYSERDA's debt?
- Would you recommend an approach for financing the portfolio through a structure other than bond issuance (e.g. whole loan sales)? If so, provide a summary of the structure that you would propose including advantages and disadvantages of the approach.
- What is your firm's experience in arranging "Whole-loan" sales, including Reps & Warranties, Back-leveraged financing, participation, private rating or syndication structures?

10. **Technical and Innovative Capabilities.** Please describe (no more than 3) transactions that your firm has senior managed for leveraged pooled transactions, demonstrating the technical and innovative capabilities of your firm. Describe how your firm assisted the issuer(s) in optimizing the benefits of the transaction. For each transaction listed, please provide the issuers name, issue date, amount involved, issuer contact and telephone number. Also, please discuss the benefits of using a privately placed sale instead of a public offering, and whether there would be any limitations with using this method.

Section 2. NYSERDA Financial Strategy

1. **Programmatic/Structuring Changes.** Describe any significant innovations your firm has made in the area of pooled or structured finance bond issues. What approach would you recommend for the GJGNY program?
2. **Compensation.** The proposal must include the underwriter's proposed fees on a per-bond basis. All proposers should submit fees that would be charged if the proposer were to serve as lead underwriter on NYSERDA's financing transaction assuming a bond issuance of \$25 million. If partnering with a NYS

certified minority-and women-owned business enterprises firm as Co-Senior Manager, fee structure should include proposed compensation split between Senior and Co-Senior Manager, with a minimum of thirty (30) percent allocated to the NYS certified minority-and women-owned business enterprises Co-Senior Manager.

In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

IV. Proposal Evaluation.

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview.

A. Evaluation Factors. In evaluating proposals submitted in response to this RFP, NYSERDA will consider the following factors.

1. Demonstrated experience as underwriter to complex, multiple participant revolving loan financings, in particular, programs similar in nature to the GJGNY Loan Program. Demonstration of the firm's commitment to providing a high level of responsive client service, including positive references for such experience.
2. Demonstrated understanding of the structure of GJGNY Loan Program, the ongoing work required by the scope of services and any additional services necessary for the success of the bond issuance.
3. Demonstrated assignment of sufficient, qualified, and experienced professional personnel, with preference given to personnel experienced in providing services such as those contemplated by this RFP.
4. Demonstrated ability of firm to underwrite and commit capital toward the underwriting of bond issuances.
5. Anticipated cost of services and willingness to work with NYSERDA to minimize costs. (Although proposed fees will be taken into account in the selection process, NYSERDA reserves the right to negotiate with any firm selected, lower fees or different fee structures other than the proposed).
6. The proposer is a NYS-certified minority-owned or women-owned business.

NYSERDA reserves the right to accept or reject proposals based on the following factor(s):

- The degree to which pricing and hourly rates are in line with the rest of the market.

B. Selection Process. A selection committee consisting of NYSERDA staff will review and evaluate proposals and develop a short list for further consideration. Firms so selected may be requested to submit sample financing documents that they have prepared. Firms so selected may also be invited to make oral presentations to NYSERDA staff and any members of the Audit and Finance Committee of NYSERDA who wish to participate. The staff will then make a recommendation to the Audit and Finance Committee, which will make a recommendation to the Members of NYSERDA. The Members will make the final selection, subject to the provisions of Section 1853 of the Public Authorities Law

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of

Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

New York Executive Law Article 15-A - NYSERDA is required under the law to promote opportunities for maximum feasible participation of certified minority- and women-owned business enterprises and the employment of minority group members and women in the performance of NYSERDA contracts. The MWBE participation goals and obligations of the selected Contractor are set forth in the Sample Agreement.

New York State Executive Law Article 17-B, NYSERDA recognizes its obligation under the law to promote opportunities for maximum feasible participation of certified service-disabled veteran-owned business enterprises (SDVOB) in the performance of NYSERDA contracts. Executive Law Article 17-B and its associated regulations require, among other things, that NYSERDA establish goals for maximum feasible participation of New York State Certified SDVOBs in the performance of New York State contracts. The SDVOB participations goals and obligations of the selected Contractor are set forth in the Sample Agreement.

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at

http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making one award under this solicitation. NYSERDA anticipates a contract duration of five (5) years, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately by November 1, 2025 whether your proposal has been selected to receive an award. Upon receipt of this notification, a proposer can request to schedule a debrief on the selection process and the strengths and weaknesses of its proposal by contacting heather.clark@nyserda.ny.gov. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from

appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

NYSERDA

Innovation Sponsorship

Request for Proposal (RFP) 6015

\$ 1,000,000 Available

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Proposals Due: July 17, 2025, by 3:00 p.m. Eastern Time*

Program Summary: This New York State Energy Research and Development Authority (NYSERDA) RFP #6015, Innovation Sponsorship, requests proposals from organizations seeking a NYSERDA sponsorship to support their work advancing clean energy innovation.

This initiative supports organizations or entities with established programming that supports and strengthens New York State's energy innovation ecosystem. NYSERDA aims to provide sponsorships that enhance and expand existing efforts, leveraging available resources to maximize impact and create greater value for New York ratepayers. Sponsored organizations may include industry groups, startup incubators and accelerators, advocacy and community-based organizations, Indigenous Nations, research institutions, and other entities focused on creating and promoting innovation solutions that improve access to clean energy and accelerate market adoption.

Awards will be made based on the proposers' ability to contribute to the broader New York State innovation ecosystem, demonstrate measurable impact, and engage stakeholders to foster collaboration and growth throughout the State.

Funding may be used to support key activities, including, but not limited to, partnerships, expertise, policy support, market readiness, operations and management, facilities and infrastructure buildouts, equipment purchases, networking, workshops, or events that effectively meet the stated goals of this initiative. Award payments will typically be tied to additional services or outcomes delivered as a direct result of sponsorship funds.

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](#) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are Anna Nix (Designated Contact) at (518) 862-1090, ext. 3484 or by e-mail at InnovationSponsorshipRFP@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or by email at NancySolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see [Solicitation Proposal and Vendor Responsibility Questions.pdf](#) for a complete list of the questions proposers must answer as part of a submission. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserdera.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>)

I. Introduction

The New York State Energy Research and Development Authority (NYSERDA) works to promote energy efficiency, affordability, and reliability, and reduce emissions across New York State. NYSERDA's mission is to catalyze New York's clean energy transition, to provide energy that supports a healthier and thriving future for all New Yorkers.

NYSERDA's Innovation team ("Innovation") focuses on advancing clean energy technologies and companies that contribute to the State's clean energy economy. Innovation seeks to accelerate market transformation via initiatives that identify, mitigate, and remove barriers to clean energy technology deployment, supporting clean energy technology solutions and innovative business models across technical focus areas such as energy end use, clean transportation, power generation and storage, grid modernization, advanced fuels, and thermal energy research.

Innovation programs accomplish these objectives through grants for clean energy product development and demonstrations, and by offering commercialization services, including founder development, and manufacturing scale-up and revenue growth guidance, that help clean energy companies gain market traction and impact. Some recent program offerings include a prize program for innovative building demonstration projects, funding for clean hydrogen research and development, and research projects to enable integration of renewable energy to the power grid with enhanced performance and reliability.

Alongside this work, Innovation seeks to support and sustain organizations aligned with Innovation's programmatic goals with awards of up to \$50,000 annually, renewable for up to two total years of support. NYSERDA intends to make up to ten sponsorship awards through this solicitation. Sponsored organizations will provide NYSERDA with reports on their activities, connection to stakeholders, access to events, and other deliverables.

NYSERDA's goals for this opportunity are to support the continued growth of the NYS energy innovation ecosystem, advance equity and inclusion in energy innovation, and generate measurable climate and market outcomes.

II. Program Requirements

Applicant Eligibility:

Funding is available to U.S.-based organizations that meet the following criteria:

- Non-profit and not-for-profit organizations, including 501(c)(3) and 501(c)(6) entities, foundations, local government organizations, and Indigenous nation and Tribal government organizations
- For-profit organizations
- Academic and research institutions, including public and private colleges and universities

Applicants must have a minimum of one year of demonstrated experience relevant to the proposed work.

Proposers currently receiving a NYSERDA sponsorship or executing a NYSERDA contracted program may apply for a consecutive award, or for a scope of work that is differentiated from and non-duplicative of the proposer's current award. Such proposers must be in good standing with respect to all contracted requirements.

If potential proposers are unsure whether they are eligible to apply, please contact NYSERDA via the contact information provided.

Proposal Eligibility

This section is intended to help applicants determine whether their proposal aligns with the goals and structure of the sponsorship program. While more detailed guidance on how to prepare a competitive application is provided in the Evaluation Criteria and Submission Checklist sections below, the information here will help an applicant assess whether its proposal is eligible for this opportunity.

Proposals for support of established sponsorship levels or tiers (e.g., silver, gold, platinum) may be submitted if all other eligibility criteria are met. **Proposers who wish to apply for NYSERDA participation in an established sponsorship structure may include a prospectus in lieu of a draft statement of work for attachment A.** Please indicate in your proposal the level of sponsorship requested.

Proposals must demonstrate alignment with the goals and objectives of this initiative. In addition, each proposal must select one of the following four Focus Areas aligned with the proposer's organization and activities to advance energy innovation.

Focus Areas:

i. Commercialization

Intended for organizations that support the growth and scaling of clean energy ventures by providing business development curriculum and support, mentorship, funding, and connections to investors, customers, manufacturing partners, and others.

Example organizations in this Focus Area include, but are not limited to, incubators and accelerators, investor associations, and others focused on developing, investing, and working with clean energy startups.

ii. Industry

Intended for organizations that represent and advocate for businesses with respect to energy and clean energy innovation, and the adoption of clean energy solutions by established industries.

Example organizations in this Focus Area include, but are not limited to, trade associations with a focus on sector-specific energy topics, business advocacy groups that champion clean energy policies, and industry alliances and consortia that facilitate knowledge-sharing, supply chain development, and market expansion for climate innovations.

iii. Inclusive Innovation

Intended for organizations committed to increasing participation in climate technology innovation and entrepreneurship by historically under-represented groups, as well as communities disproportionately impacted by climate change and communities that face barriers to the deployment of clean energy solutions. These organizations may be located in and/or supporting designated New York State Disadvantaged Communities (NYS DACs).

Example organizations in this Focus Area include, but are not limited to, incubators and accelerators supporting diverse founders and underrepresented entrepreneurs; Tribal governments and community-based organizations committed to equitable climate solutions and workforce development; and nonprofits and mission-driven organizations that work to expand equitable access to investment, funding, and opportunities for clean energy technologies.

iv. R&D Partners

Intended for entities that focus on advancing clean energy technology through research, development, demonstrations, pilots, and innovation.

Example organizations in this Focus Area include, but are not limited to, university research centers and institutes; national and regional laboratories; public-private research consortia that bridge academia, government, and industry to accelerate commercialization; and think tanks and other policy research organizations that focus on energy technology and innovation.

A single proposer may submit one (1) application for each of four (4) Focus Areas; however, **a maximum of one (1) award per proposer will be awarded under this solicitation.**

Program Overview

Being selected for sponsorship through this solicitation will lead to entering a contract with NYSERDA. The sponsorship program is intended to support the awardees in their ongoing activities that advance clean energy innovation, in alignment with the goals of the program.

1. Award Size and Duration

- Individual awards will be made for up to \$50,000 annually.
- Funding will be awarded for an initial term of one year, with an option to renew for a second year at the sole discretion of NYSERDA.

2. Timeline

Proposal Submission Deadline	July 17, 2025
Notification of Award	September 18, 2025
Expected Contract Start	October 28, 2025

3. Statement of Work (SOW)

- Applicants must include a completed SOW with their application (Attachment A)
- Applicants with an established sponsorship structure may submit their Sponsorship Prospectus as Attachment A in lieu of an SOW.
- The SOW will outline activities, milestones, and deliverables in NYSERDA's preferred format.
- The final SOW will become part of the contract and serve as the basis for contract management and payments.

4. Project Oversight

- A NYSERDA Project Manager (PM) will be assigned to each awardee. The NYSERDA PM's role includes approving deliverables tied to milestones, releasing payments based on satisfactory completion, and serving as a point of contact for questions and coordination.

5. Payment Structure

- Payments will be made on a milestone basis, following the approval of the deliverables.

III. Evaluation

Scoring Criteria

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria listed below in order of importance:

Alignment with NYSEERDA's mission and goals

Is the proposed sponsorship well-aligned with the goals and the objectives of this program? Is the proposer able to clearly articulate how the proposed use of funds has the potential to lead to outcomes that support the goals and objectives of this solicitation? Has the proposer demonstrated an understanding of NYSEERDA's primary goals and objectives and proposed a sponsorship in alignment with those goals?

NYS Innovation Ecosystem & Industry Impact

Does the proposed use of funds enable and accelerate the near-term deployment and scale up of the products and solutions most needed to enable New York's clean energy transition? Does the proposed use of funds help to de-risk climate technology or product development and deployment? Does the proposed use of sponsorship funds enhance the existing ecosystem efforts and not duplicate existing efforts in the market and ecosystem?

Cost-effectiveness, and value of proposed use of sponsorship funds

Is the proposed use of sponsorship funds, and the requested funding amount cost-effective? Does the proposed sponsorship provide value at cost by addressing a proven market need? Has the proposer clearly articulated the desired outcomes of the sponsorship, and how the proposed use of funds will be applied to achieve and enhance those outcomes and to provide value to the NYS innovation ecosystem? Have proposers addressed why additional funding is needed/requested to allow the proposer to pursue the proposed sponsorship activities?

Focus Area Selection and Role in the Innovation Ecosystem

Does the Proposer's selection of a Focus Area demonstrate knowledge of New York's innovation ecosystem and the Proposer's role in it? Will the proposed use of funds advance energy innovation for partners and stakeholders in the selected Focus Area? Does the Proposer demonstrate an effective track record in meeting the objectives of the selected Focus Area?

Benefit to NYS Ratepayers

Does the proposal provide a potential benefit to NYS ratepayers in terms of energy-cost reduction, and/or other co-benefits? Does the proposed sponsorship have the potential to foster solutions that improve ratepayer affordability and co-benefits to ratepayers, such as improving functionality, reducing cost, lowering energy consumption and costs and contributing to economic growth and job creation? Does the proposed use of funds accelerate solutions that can contribute to safe, affordable, and reliable clean energy to NYS ratepayers? The proposer

should demonstrate knowledge about the NYS energy grid and energy markets and the types of clean energy solutions relevant to the specific energy needs of NYS.

Team qualifications, Collaboration and Expertise

Does this proposal bring together diverse stakeholders (geographic and experience) to identify and develop solutions around specific energy challenges, while ensuring solutions are practical and effective for NYS applications? Does this proposal include plans to collaborate with disadvantaged communities (DAC) partners, and/or Indigenous Nations and Peoples?

Evaluation Process

- All proposals will be evaluated together in a single review pool, regardless of the focus area track selected. NYSERDA will make award selections based on the established scoring criteria and Program Policy Factors.
- NYSERDA reserves the right to interview proposers during the evaluation process.

Program Policy Factors

NYSERDA may consider the following program policy factors in making award selection decisions, and reserves the right to accept or reject proposals based on the following program policy factor(s):

- The degree to which the proposed program, including proposed cost share, optimizes the use of available funding to achieve sponsorship objectives.
- The degree to which a proposal contributes to a distribution of awards across all Focus Area Tracks, with the goal of representation in each track of the program.
- The degree to which a proposer organization relies on memberships and sponsorships to support their activities related to clean energy innovation, as opposed to other sources of revenue and funding.
- The degree to which there is diversity of technologies, approaches, methods, and institutions complementary to and supportive of a diversity of geographic locations and of technical approaches and methods that, in conjunction with the existing portfolio of projects, best achieve the overall goals and objectives of NYSERDA.
- The degree to which a proposal demonstrates close collaboration with similar entities and other players to ensure meaningful value-add and avoid duplicative efforts.

IV. Submission Guidelines

The checklist includes a comprehensive guide for all the attachments that would qualify as an official submission.

Narrative guide:

- This narrative is the primary opportunity to demonstrate the value and alignment of the proposed sponsorship. Each question in the checklist is designed to provide the scoring committee with the necessary information to evaluate responses against the scoring criteria.
- The content can be organized into as many sections as necessary, but all required questions must be addressed.
- The length of the proposal shall be no longer than 10 pages (12-point font, double-spaced). Additional content in excess of this page limit will not be considered.

Attachment	Content	Questions/Description
Narrative (in a single document)	Organizational Description & Capacity	An overview of the organization, its leadership structure, its mission, and vision.
		Contacts and roles of the key staff members who will be responsible for executing the contract.
	Focus Area Track	Proposed focus-area track, and description of fit, for the Focus Area the applicant is applying to.
	Proposal Description	Detailed explanation of how the proposed sponsorship aligns with the goals of the RFP and NYSERDA.
		An overview of key partnerships, collaborations, or stakeholders involved in the proposed initiative, demonstrating how these relationships will support the success of the proposed use of sponsorship funds.
		Description of the tangible benefits this project will bring to NYS ratepayers.
		A breakdown of the total project budget with a narrative.
		The organization's role and key partnerships in New York's ecosystem / the value of the proposer's work in achieving NYSERDA's goals.
		Detailed explanation of how Innovation Sponsorship will add value to the organization and enhance its ability to accomplish its goals and vision.
Attachment A	Statement of Work (SOW)	A detailed description of the proposed activities, deliverables and timeline. The SOW will be incorporated into the final award agreement (see Attachment C. Exception: Proposers who wish to apply for NYSERDA participation in an established sponsorship structure may include a prospectus in lieu of a draft statement of work for attachment A (refer to Section II: Proposal Eligibility).
Attachment B	Budget	Use the budget template.
Attachment C	Sample Agreement	Review carefully.
Disclosure Statement Vendor Assurance		Signed statement of conflict-of-interest disclosure. For full details, refer to the description below the checklist.

Executive Order No. 16

Signed statement confirming that the applying organization does not engage in prohibited activities with the Russian Federation. For full details, refer to the EO 16 clause in General Conditions.

Conflict of Interest Disclosure

Proposers must identify the nature of any potential conflicts of interest among team members and partners in providing services to NYSERDA under this RFP. Fully discuss possible conflicts of interest, actual and perceived, which could arise in connection with performance by team members and partners of the proposed contract. Describe how your organization would resolve conflicts of interest.

Individuals that have an active contractual relationship with NYSERDA to provide strategic guidance and advisement to NYSERDA Innovation staff are not eligible to serve in a management role of the Innovation Sponsorship RFP or to assist in the preparation of any proposals submitted under this solicitation. In addition, these individuals shall not provide written endorsements, references, or letters of support to any proposers for this PON.

In the event that NYSERDA determines that a team member may have a conflict of interest or the appearance of such, NYSERDA may: (1) take this into consideration in evaluating the proposal; (2) exclude the proposer from consideration for an award; (3) adjust the scope of work to avoid the conflict or appearance of conflict; or (4) negotiate other appropriate actions with the team member to avoid the conflict or appearance of conflict.

V. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSEERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSEERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSEERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSEERDA-Regulations.ashx>. However, NYSEERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSEERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of one year with an option to renew for one additional year, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each application should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately 10 weeks from the proposal due date whether your proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA’s sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

**“Residential and Retail Energy Storage Inclusive Storage Incentives:
Proposed Program Rules”**

Request for Information (RFI) 6016

No Funding is Associated with this RFI

NYSERDA reserves the right to extend the RFI.

Feedback Requested May 13, 2025, through June 3, 2025, by 3:00 PM Eastern Time*

Request for Information (RFI) Summary: The purpose of this Request for Information is for the New York State Energy Research and Development Authority (NYSERDA) to share draft program rules with stakeholders for the Inclusive Storage Incentive (ISI) incentives supporting deployment of residential and on-site retail (distributed commercial-scale) energy storage projects benefiting disadvantaged communities (DACs) and obtain responses to specific program design questions.

Feedback Submission: Feedback and responses must be sent to energystorage@nyserdera.ny.gov with the subject line “ISI RFI Feedback: Organization Name”. Failure to use this subject line may result in NYSEDA not receiving your response. Upon receipt, NYSEDA may request further details or a call/meeting to discuss the respondent’s submission. Feedback and responses are requested by June 3, 2025 at 3:00 PM Eastern Time. While stakeholders are encouraged to respond to the specific questions listed in *Questions for Stakeholder Feedback*, feedback on other program aspects will also be considered. Please reference any specific experiences, examples, or data that support your responses. Stakeholder feedback will not be treated as confidential information and may be disclosed and discussed publicly.

For any questions, please contact energystorage@nyserdera.ny.gov.

I. Purpose

The purpose of this Request for Information is for the New York State Energy Research and Development Authority (NYSERDA) to share draft program rules with stakeholders for the Inclusive Storage Incentive (ISI) incentives supporting deployment of residential and on-site retail (distributed commercial-scale) energy storage projects benefiting disadvantaged communities (DACs) and obtain responses to specific program design questions.

The proposed program rules are based on the New York Public Service Commission's (PSC) June 2024 Order Establishing Updated Energy Storage Goal and Deployment Policy and February 2025 Order Approving Implementation Plan With Modifications. The rules incorporate lessons learned from other NYSEDA programs serving disadvantaged communities and informal feedback received from energy storage stakeholders. NYSEDA requests that stakeholders review the draft rules and respond to specific program design questions in the RFI document attached, to the extent that they are applicable to their experience or business model. Stakeholder responses will help NYSEDA refine and finalize the program rules to ensure they effectively serve disadvantaged communities while supporting New York’s broader energy storage deployment goals.

II. Background

On June 20, 2024, the PSC issued an Order establishing an expanded statewide energy storage goal of 6 GW by 2030, including authorization of funding for new NYSEDA incentive programs to support the deployment of 200 MW of residential energy storage and 1,500 MW of commercial-scale distributed (“retail”) energy storage by 2030. The 2024 Storage Order also included directives pertaining to minimum incentive program procurement requirements pertaining to on-site energy storage (residential and behind-the-meter retail storage systems) and off-site energy storage projects, namely that:

1. A minimum of 35% of procurements for off-site retail projects be located in NYISO Capacity Zones G (Mid-Hudson Valley), H (Lower Hudson Valley-Westchester), I (Westchester), J (New York City) and K (Long Island), with at least 30% of total procurements in Zone J; and
2. A minimum of 35% of residential and on-site retail energy storage projects be located within Disadvantaged Community census tracts.

The 2024 Storage Order directed NYSERDA to propose how it would design its incentive programs to meet the above directives as part of an Implementation Plan describing program design, budgets, and other program elements pertaining to the Residential and Retail energy storage programs. This Implementation Plan was filed by NYSERDA in August 2024 and was subject to a 60-day public comment period for stakeholder feedback. In it, NYSERDA described proposed design, budget, and eligibility requirements for a targeted incentive, termed as the Inclusive Storage Incentive (ISI), to support deployment of residential and on-site retail storage projects benefitting disadvantaged communities, and indicated that additional stakeholder engagement would be conducted to finalize ISI design and eligibility criteria prior to program launch.¹ In February 2025, the Public Service Commission approved (with modifications) the Residential-Retail Storage Implementation Plan, and directed NYSERDA to continue engagement with stakeholders to finalize ISI program rules.

III. Stakeholder Feedback Submission Process

Please read the draft program rules pertaining to the Residential and Retail ISI attached to this document as Attachment A; for orientation purposes, a high-level overview of program background, key considerations, and design drivers in slide deck format is available [here](#). For reference, the current version of Program Manual that describes program design and rules for all projects is available [here](#).

Please see *Questions for Stakeholder Feedback* and provide your feedback on the following key components of the Inclusive Storage Incentive (ISI):

Retail ISI

- Critical Facility Inclusion Criteria
- Proposed List of Critical Facilities
- Verification Requirements

Residential ISI

- Additional eligibility pathways

While stakeholders are encouraged to respond to the specific questions listed in *Questions for Stakeholder Feedback*, feedback on other program aspects will also be considered. Please reference any specific experiences, examples, or data that support your responses. Stakeholder feedback will not be treated as confidential information and may be disclosed and discussed publicly.

Feedback and responses must be sent to energystorage@nyserda.ny.gov with the subject line “ISI RFI Feedback: Organization Name”. Failure to use this subject line may result in NYSERDA not receiving your response. Upon receipt, NYSERDA may request further details or a call/meeting to discuss the respondent’s submission. Feedback and responses are requested by June 3, 2025 at 3:00 PM.

For any questions, please contact energystorage@nyserda.ny.gov.

¹ In the same Implementation Plan, NYSERDA also proposed program procurement minimums to comply with the 2024 Storage Order’s directive regarding off-site retail projects, namely, that a minimum total of 750 MW (50 percent of total Retail incentive capacity allocations) would be allocated to the New York City region (NYISO Zone J), and a minimum total of 150 MW (10 percent of total Retail incentive capacity allocations) would be allocated to the Con Edison Westchester region (NYISO Zones H and I). These proposals were approved by the PSC via its February 2025 Order approving (with modifications) the Residential-Retail Energy Storage Implementation Plan, and are outside the scope of this RFI, which focuses on residential and on-site retail energy storage projects.

IV. Questions for Stakeholder Feedback

Please respond to the following questions based on the Residential and Retail Energy Storage Inclusive Storage Incentives: Proposed Program Rules, attached hereto as Attachment A.

A. Retail ISI: Critical Facilities List

A1. Are there critical facility types that should be added to or removed from the proposed list?

In order to minimize NYSERDA programmatic discretion in application review, it is recommended that any suggested additional critical facilities meet the following criteria:

- Included in a relevant existing federal, state, or utility-level framework (E.g. FEMA Public Assistance Program and Policy Guide)
- Facility eligibility should be verifiable by NYSERDA

B. Retail ISI: Critical Facility Inclusion Criteria

B1. Are there additional ways to make facility categories and definitions clear and implementable and minimize programmatic discretion in application review?

C. Retail ISI: Verification Documentation Requirements

C1. What additional or alternative documentation could be required to verify facility eligibility?

C2. Are the proposed documentation requirements rigorous, valid, reasonable and obtainable for different facility types?

C3. Are there other types of documentation that should be considered as acceptable proof of facility type/operation, proof of active operation, list of services, proof of population served, or other?

C4. Should documentation requirements vary by facility type? If so, how?

C5. What processes could help streamline documentation submission while ensuring program integrity?

D. Residential ISI: Additional Eligibility Pathways

D1. Should customers that **do not** meet any of the Residential ISI eligibility pathways listed in Section 3.3.1 be eligible for the Residential ISI through the below pathways?

- They have a serious illness or condition that could become life-threatening if electricity is disconnected; or
- Have experienced frequent power outages over a historical period.

E. Residential ISI: Tiered Rate

E1. Should there be a higher Residential ISI rate for customers that **do** meet the Residential ISI eligibility pathways listed in Section 3.3.1 and meet either of the additional below criteria?

- They have a serious illness or condition that could become life-threatening if electricity is disconnected; or
- Have experienced frequent power outages over a historical period.

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your feedback. Review should include whether it is critical for evaluating feedback, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the stakeholder wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/>

</media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Disclaimer - The information gathered by NYSERDA will be advisory only and is not binding on any state agency, office, commission, or public authority. Any actions recommended by NYSERDA will be subject to all applicable laws, including procedural, regulatory, and environmental review requirements. This RFI is neither a contract offer nor a request for proposals and does not commit NYSERDA to award a contract, pay any costs incurred in preparing a response, or to procure or contract for services or supplies.

Respondents are encouraged to respond to this RFI; however, failure to submit a response will not impact a Respondent's ability to respond to any future competitive solicitation process (if any) for projects, or influence the selection of a service provider going forward or affect its rights and obligations under any applicable laws or in any legal proceeding. NYSERDA reserves the right to discontinue or modify the RFI process at any time, and makes no commitments, implied or otherwise, that this process will result in a business transaction or negotiation with one or more Respondents.

All costs associated with responding to this RFI will be solely at Respondents' expense.

VI. Attachments:

Attachment A – RFI Document: Residential and Retail Energy Storage Inclusive Storage Incentives: Proposed Program Rules

Developing Maritime Vessels to Transport Hydrogen at Scale

Program Opportunity Notice (PON) 6021

Up to \$4.7 million Available

All, some, or none, of the available funds may be awarded.

NYSERDA reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

Proposals Due: October 1st , 2025, by 3:00 PM Eastern Time

The New York State Energy Research and Development Authority (NYSERDA) announces the availability of up to \$4.7M million for PON 6021 to develop maritime vessels for bulk hydrogen delivery without pipelines and support industrial scale hydrogen application in New York State. Specifically, this solicitation focuses on innovative maritime vessel solutions to cost effectively transport bulk clean hydrogen for short and medium distance. NYSERDA reserves the right to add funding to this solicitation.

Funding for this solicitation is limited to product development only. Estimated Technology Readiness Levels (TRLs) and cost share requirements are provided in the table below.

Funding Category	Estimated Technology Readiness Level (TRL)	Minimum Cost Share (non-NYSERDA funding) **	Anticipated Period of Performance (months)	Anticipated Number of Awards
Product Development*	4-6	50% of total project cost	Within 36 months	1~2 awards

*Product Development projects will be subject to recoupment requirements.

**The cost share percentage is based on total project cost (NYSERDA share + proposer/external cost share), not solely NYSERDA's contribution.

Proposal Submission

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Questions? Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Designated Contacts for this Procurement are:

- Eliseo Curcio (Designated Contact) by e-mail at PON6021@nyserda.ny.gov (for technical questions).
- Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or nancysolicitations@nyserda.ny.gov (for contractual questions).

All Proposers should be familiar with the legal prohibitions against certain types of contacts during government procurements set forth in State Finance Law section 139-j. In accordance with that law, contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals.

The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted.

If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

A. Climate Act and Clean Hydrogen

As energy demand across New York State continues to grow, NYSERDA is prioritizing pragmatic solutions that strengthen energy infrastructure and economic resilience. The development of innovative maritime solutions for hydrogen transportation presents an opportunity to meet increasing energy needs efficiently, cost-effectively, and reliably. By promoting economically viable technologies and leveraging public-private partnerships, New York aims to enhance energy security, support industrial and community growth, and strategically position itself to manage future energy demand challenges. This initiative aligns with state goals for a just energy transition, emphasizing tangible benefits for communities, including those historically underserved.

B. NYSERDA Clean Hydrogen Efforts

New York has undertaken several key efforts to assess potential roles for clean hydrogen. In April 2025, NYSERDA released its [New York State Hydrogen Assessment \[1\]](#), a comprehensive analysis of hydrogen's potential role to decarbonize hard-to-electrify sectors and includes analysis to evaluate the feasibility, costs, and deployment opportunities for hydrogen, employing techno-economic optimization modeling and total cost of ownership analysis.

NYSERDA has also convened a series of meetings, listening sessions, and direct discussions with individuals and groups across the stakeholder landscape to better understand diverse perspectives on clean hydrogen in New York and to prioritize investment focus areas. Through its solicitation efforts in clean hydrogen, NYSERDA has awarded up to \$11.3 million for fifteen clean hydrogen innovation projects to date. More information about NYSERDA's efforts in clean hydrogen can be found at <https://www.nyserda.ny.gov/hydrogen>.

C. Hydrogen Transportation

Current methods for transporting hydrogen within New York State primarily rely on compressed hydrogen gas trucks, which face significant limitations, including limited volumetric capacity per trip, high transportation costs, and logistical complexities [2]. Pipeline infrastructure, while effective for large-scale hydrogen distribution, remains economically prohibitive before broad adoption of hydrogen and faces substantial permitting and geographical barriers, especially in short- to medium-distance (at least 100 miles) transport scenarios within the state [3]. Alternative scalable and cost-effective methods, such as barge-based or maritime vessel solutions, are critical to addressing these logistical and economic challenges, offering the potential for significant cost reductions and operational efficiencies in hydrogen distribution without pipelines.

Globally, maritime transport of liquid hydrogen (LH₂) has demonstrated significant potential, exemplified by the successful operation of the Suiso Frontier vessel, which transported approximately 75,000 kg of LH₂ between Australia and Japan [4]. European demonstration projects, including LH2CRAFT and NAVHYS, have validated maritime LH₂ transport technologies at scales ranging from 10,000 to 18,000 kg per vessel, showcasing practical capacities suitable for bulk hydrogen transport [5, 6]. However, existing maritime hydrogen transport solutions typically focus on long-haul international shipping, whereas shorter-haul, intrastate transport scenarios, such as those required in New York, remain underdeveloped.

Clean hydrogen transportation via maritime vessels poses unique technical and operational challenges, including managing boil-off losses, ensuring rapid loading and unloading operations, and meeting rigorous safety standards related to hydrogen's wide flammability range, high flame speed, and embrittlement of storage and containment materials [7]. Consequently, there is a clear need for tailored innovative solutions optimized specifically for short- to medium-distance maritime hydrogen transport applications.

Several waterways suitable for barge transport of hydrogen within New York State can be considered. Potential routes include the Erie Canal connecting Buffalo and Upstate regions to the Hudson River at Albany, providing direct access to New York Harbor; the St. Lawrence Seaway and Lake Ontario, linking Canadian production sites to Oswego and onward through the canal system to Albany and NYC; the Champlain Canal connecting Lake Champlain to the Hudson River, facilitating access from Northern NY or Canada; and the Delaware River offering an alternate route from neighboring states such as Pennsylvania directly to New York Harbor.

D. Hydrogen Partners List

Proposers wishing to find hydrogen partners may use the Advanced Fuels and Thermal Energy Innovation program's partnering platform, [the Hydrogen Partners List](#).

The platform is intended to help potential proposers find other teams with complementary capabilities when submitting proposals to NYSERDA Program Opportunity Notices issued by the Hydrogen and Clean Fuels Program. Submitting teaming information is completely optional, and not required. By enabling and publishing the teaming partner list, NYSERDA is not endorsing, sponsoring, or otherwise evaluating the qualifications of the individuals and organizations.

II. Program Requirements

A. Teaming requirement

At a minimum, a project team should consist of the following:

- Naval architect and/or shipyard ,
- Maritime vessel operator in New York State and
- Hydrogen fuel supplier

Proposers should succinctly describe the role, qualifications, experience, and capabilities of the proposed project team to execute the project successfully. Strong preference will be given to proposing teams with experience designing, building and operating hydrogen or alternative fuel vessels, or teams familiar with New York State waterways and maritime ports. The lead proposing entity does not need to be based in or operating in New York, but the proposal team must include a Maritime vessel operator in New York State. An entity is only allowed to submit one Proposal.

B. Technical requirements

NYSERDA seeks proposals specifically aimed at developing innovative maritime vessel solutions for efficiently transporting bulk hydrogen over short to medium distance. Proposals must meet the technical requirements specified below:

- Safe, efficient, scalable hydrogen transport methods specifically optimized for short to medium distance of at least 100 nautical miles maritime routes.
- Capable of delivering at least 20,000 kilograms of hydrogen per shipment.
- Logistically feasible for inland waterway and coastal hydrogen transport within New York State waterways or from adjacent states.
- Compliance with relevant maritime and hydrogen safety standards and regulations.
- The maritime vessel developed under this solicitation can be powered by hydrogen, other low-carbon fuels, or conventional maritime fuels compliant with ISO 8217:2024. Proposers are encouraged but not required to utilize low-carbon fuels.
- Vessel design should include provisions to accommodate potential future upgrades or transitions to alternative low-carbon or zero-carbon maritime fuels in response to evolving market conditions and regulations.

C. Expected Project Scope of Work

All proposals must include tasks and deliverables to design and build the maritime vessel to meet technical requirements specified above, which should include but not be limited to system and subsystem diagrams, process design basis, equipment specifications and lists, general arrangement drawings, detailed piping and instrumentation diagrams, electrical single line diagrams, vessel construction and factory test. In addition, proposers should include the following tasks and deliverables:

- 1) Safety and regulations
 - Outline applicable safety codes, standards (e.g., IMO codes including MARPOL Annex VI Emission Control Area (ECA) requirements, NFPA 2), and regulations requirements for the maritime vessel from USCG, port authorities, etc.
 - Specify timeline to engage relevant authorities for required reviews and approvals.
- 2) Market analysis:
 - Project the applicable end-use cases that the proposed maritime vessel will serve (e.g., hydrogen fueling station, industrial heating processes, backup power, etc.).
 - Estimate the annual hydrogen demand of the intended end-users in New York and confirm that the proposed barge or maritime hydrogen vessel will meet the projected demand scenarios and operational requirements.
 - Based on the projected hydrogen end users, assess compatibility of the proposed maritime vessels with relevant ports, docks, or terminals in NYS for berthing, loading/unloading, and support services. Identify any modifications necessary for infrastructure to support the proposed maritime vessels.
- 3) Planning for future demonstration:
 - Identify sites most suitable for future demonstration of the proposed maritime vessel.
 - Secure letters of support from the port or terminal operators, and hydrogen end user(s).
 - Identify areas where the selected sites do not meet relevant safety codes, regulations, and permitting requirements to enable future demonstration

- Develop initial community and stakeholder engagement plan. Identify potential local community acceptance issues and possible mitigation plan.
- 4) Cost analysis:
- Estimate CAPital EXpenditure (CAPEX) and OPerational EXpenditure (OPEX) for the entire system, including maritime vessel construction or retrofit, onboard hydrogen storage solution, transfer systems, and safety systems, etc.
 - Compare the estimated cost of transporting hydrogen using the proposed maritime vessel versus using commercially available trucking. The cost should consider transporting hydrogen from potential hydrogen producers to hydrogen user sites analyzed in 2) above. If hydrogen can't be delivered directly to the site via the maritime vessel, costs for truck or alternative 'last-mile' delivery should be considered. All assumptions, methodologies, logistical coordination, and sources of cost estimates must be clearly documented and articulated.

A demonstration of the maritime vessel is not required under this solicitation.

D. Examples of eligible and noneligible proposals

Eligible proposals may include, but are not limited to:

- Barge designed using a retrofitted articulated tug barge (ATB) with integrated cryogenic LH₂ tanks, or flat-deck barges equipped with modular cryogenic ISO tanks optimized for efficient loading, unloading, flexible transport operations and enhanced volumetric storage efficiency [5].
- A maritime vessel incorporating modular containerized LH₂ storage and dispensing systems with rapid, standardized loading/unloading interfaces optimized for short turnaround times and scalable capacities [6].
- Application of commercially available cryogenic insulation systems for LH₂ storage to maritime applications, focusing on thermal stability during hydrogen transport to reduce operational energy costs [7].
- A maritime vessel incorporating commercially validated materials or coatings with known resistance to hydrogen embrittlement to enhance durability and operational longevity of LH₂ maritime storage and transfer systems [8].
- A maritime vessel incorporating rapid, safe, and standardized cryogenic transfer connectors and coupling systems specifically optimized to minimize operational risks, enhance transfer efficiency, and significantly reduce loading/unloading times for maritime LH₂ transport operations. [9]
- Develop modular boil-off gas (BOG) management systems specifically integrated into the maritime vessel design, including vent capture or pressure relief routing, to support efficient and safe maritime hydrogen transport.

Noneligible proposals may include, but are not limited to:

- Projects unrelated to barge or maritime hydrogen transportation, such as
 - Hydrogen pipeline infrastructure development
 - Hydrogen transportation methods using chemical carriers (e.g. ammonia, methanol).
 - Solid-state storage methods (metal hydrides, adsorption-based systems).
 - Transporting hydrogen by trucks or rail.

- Projects focused on early-stage research and feasibility study (TRL 1-3).

III. Proposal Requirements

A. Required Proposal Attachments

To submit a Proposal, the proposer must submit all attachments listed below. The goal should be to concisely present the information needed to fully address the proposal evaluation criteria (in Section IV).

Required Attachments for the Proposal:

- ☐ Attachment A – Proposal Narrative Template
- ☐ Attachment B – Statement of Work Template
- ☐ Attachment C – TRL/CRL Calculator
- ☐ Attachment D1 – Milestone Payment Schedule
- ☐ Attachment D2 – Budget Form
- ☐ Attachment E – Executive Summary Slide Template
- ☐ Project List – A list of relevant projects that the proposal team has completed in the past.
- ☐ Letter(s) of Commitment from the Proposer, all teaming entities, and all cost share providers
- ☐ References
- ☐ Resumes/CVs
- ☐ Indirect Cost Rate Supporting Documentation

For reference only, does not need to be filled:

- Attachment F – Metrics Form
- Attachment G – Sample Agreement

As part of the proposal package, **Proposers must provide a separate tab in Attachment D2 for each Subrecipient that is expected to perform work estimated to be more than \$250,000.** If the total project cost for a vendor is over \$250,000, a budgetary quote from the vendor will be required upon selection for contract negotiation by NYSERDA.

Proposers must carefully review the required attachments to ensure that all required sections are completed. Failure to do so may result in the proposal being rejected as non-responsive. It is the proposer's responsibility to ensure that all pages have been included in the proposal and that they have been timely submitted before the proposal due date.

Proposals that exceed the page limits or fail to follow the format guidelines will be rejected as non-responsive. Proposals deemed non-responsive will not be eligible for awards. If you believe proprietary information must be submitted to provide an adequate proposal, you must comply with the Section V – General Conditions for submitting proprietary material. Each page of the proposal should state the name of the proposer, the PON number (PON 6021), and the page number.

Proposals determined to be compliant with proposal requirements and responsive to the solicitation will be subject to review by a scoring committee comprised of internal and external technical experts in

accordance with Section IV - Proposal Evaluation. Only the most technically meritorious proposals will be awarded an invitation from NYSERDA to enter into an agreement. Proposals not meriting an award for contracting may be debriefed as requested.

Please state in your proposal if you intend to use artificial intelligence ("AI") for this work. Approval for any Vendor to use any AI Systems must be expressly granted by NYSERDA for any purpose whatsoever related to the Vendor's work for NYSERDA. See [Doing Business with NYSERDA](#) on NYSERDA's website for more information on the use of AI at NYSERDA.

B. Compliance with New York State Finance Law

In compliance with §139-j and §139-k of the State Finance Law (see Section VI, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

C. Cost Sharing

The proposal must show non-NYSERDA cost share funding of at least 50% of the total cost of the project. Scoring preference will be given to proposals that best leverage NYSERDA funding by providing greater amounts of non-NYSERDA cost share funding (see Section IV - Proposal Evaluation). Cost sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered "cash" contributions. Unpaid labor, indirect labor, or other general overhead may be considered "in-kind" contributions. Total non-NYSERDA cost share is the sum of cash and in-kind contributions from non-NYSERDA sources. NYSERDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred.

Cost share must be verifiable upon submission of the Proposal. Proposers are required to provide written assurance of their proposed cost share contributions in their Proposals. Upon selection for award negotiations, Proposers may be required to provide additional information and documentation regarding their cost share contributions. Cost share contributions must be specified in the Attachment D1 – Milestone Payment Schedule and the Attachment D2 – Budget Form.

Cost share commitments cannot be dependent on some future event, such as receiving a grant, obtaining a loan, monetizing tax incentives, or securing an investor. If funds from a federal source are being proposed as cost share, the Proposer must provide a commitment letter from the federal agency as part of the Proposal that specifically commits those funds and identifies the statutory authority that allows those funds to be used for the project scope being proposed.

The Proposer is ultimately and legally responsible for providing the entire amount of cost share required, if an award is made, even if the cost share is being provided by a Subcontractor or Subrecipient. The Lead Proposer is solely responsible for managing cost share contributions by the Project Team and enforcing cost share obligations assumed by Project Team members in subawards or related agreements. If the funding agreement is terminated prior to the end of the project period, the Lead Proposer is required to contribute at least the cost share percentage of total expenditures incurred through the date of termination.

The Proposer must submit Letters of Commitment from the Proposer, all teaming entities, and all cost share providers. If applicable, the letter must state that the party is committed to providing a specific dollar amount or value of in-kind contributions allocated to cost sharing. The following information for each party contributing to cost sharing should be identified: (1) the name of the organization; (2) the proposed dollar amount to be provided; and (3) the proposed cost.

NYSERDA reserves the right to negotiate the funding category, scope of work, budget, and funding levels on all awarded projects. Efforts requesting more than \$250,000 from NYSERDA may be funded in phases separated by go/no-go milestones.

A payment based on the final deliverable or final report will be reserved until project completion. If awarded, NYSERDA may choose to negotiate the amount of such payment.

D. Recoupment

For any new projects exceeding \$100,000 in total NYSERDA funding that involve **product development, including business development**, NYSERDA will require a royalty based on sales and/or licensing of the new product developed. NYSERDA's standard royalty terms are 1% of sales and of all license revenue accruing to the Contractor for products produced, for a period of fifteen years or until the Contractor pays NYSERDA an amount equal to the total amount of funds paid by NYSERDA to the Contractor, whichever comes first. Please see Attachment G, Sample Agreement, for specific recoupment obligations. Please see the definitions below to determine if your project will be subject to recoupment. Please note that NYSERDA will make final determinations as to whether proposals fit within the demonstration or product development categories.

Product Development: efforts to bring a new or improved product to market including business case development, product design, scale, and field testing, but not including earlier stage technical feasibility or proof of concept development. Technologies with a Technology Readiness Level (TRL) exceeding 3 are to be considered Product Development (see Attachment C: TRL/CRL Calculator for additional guidance on TRLs). Field testing or pilot deployments of a non-commercial, non-warranted technology are considered Product Development.

Please note: NYSERDA may decline to contract with awardees that are delinquent with respect to recoupment payments or sales reporting for any previous NYSERDA agreement.

E. Annual Metrics Reports

If awarded, the proposer will be required to submit to NYSERDA's Project Manager on an annual basis, a prepared analysis and summary of metrics addressing the anticipated energy, environmental and economic benefits that are realized by the project. All estimates shall reference credible sources and estimating procedures, and all assumptions shall be documented. Reporting shall commence the first calendar year after the contract is executed. Reports shall be submitted by January 31st for the previous calendar years' activities (i.e., reporting period). Please see Attachment F: Metrics Form for the metrics that you will be expected to provide and the reporting duration. The Contractor shall provide metrics in accordance with a web-based form, which will be distributed by NYSERDA. NYSERDA may decline to contract with awardees that are delinquent with respect to metrics reporting for any previous or active NYSERDA agreement.

IV. Proposal Evaluation

A. Proposal Evaluation Criteria

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below **listed in order of importance**. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposal. Proposers will be notified if they are requested to attend an interview.

Innovation, State of the Art, and Technical Merit

- The proposer has demonstrated a thorough understanding of fundamental scientific principles and current state-of-the-art maritime vessel technologies specifically related to hydrogen transport.
- The proposed project specifically and convincingly demonstrates how the Proposer will successfully complete the proposed scope of work and move the technology to future commercial deployment.
- The proposal identifies buy-in from needed stakeholders to ensure success of the project.
- The proposed project technologies are technically sound, feasible, innovative, and will make significant progress toward solving the identified problem.

Team Experience and Capabilities

- The proposed team structure includes the minimum required team partners: a naval architect and/or shipyard a maritime vessel operator based in New York State, and a hydrogen fuel supplier.
- The proposed team demonstrates experience in designing, constructing, and operating maritime vessels utilizing hydrogen or alternative fuels, and managing projects of similar size, scope, and complexity. A list of relevant projects previously completed by the team is included in the proposal. The proposed team has the necessary expertise and resources to carry out the proposed work, including members with industry and business experience as well as technical skill.
- The proposal provides letters of commitment from the Proposer, all teaming entities, and all cost share providers that the team will need to provide data, equipment, support, facilities, or cost share.
- The proposed team structure includes additional team partners beyond the minimum required to support the project such as financial partner(s), environmental consultant(s), community engagement consultant(s), etc.
- The proposal clearly demonstrates the team structure and staff roles and responsibilities.
- The proposal includes resumes of key individuals.

Project Benefits and Value

- The proposed project will evaluate innovative maritime vessel solutions specifically optimized for efficient bulk hydrogen transport over short- to medium-distance maritime routes to and within New York State.
- Learnings from the proposed project have significant potential for replication, supporting wider adoption of efficient, cost-effective maritime hydrogen transport solutions in New York State.
- The degree to which the proposal introduces innovative maritime vessel technologies or approaches to enhance efficient hydrogen transportation within New York State waterways.
- The proposed project has potential to greatly benefit low-income or historically disadvantaged communities.

- The proposer provides private and/or other sources of cost share funding for the project (with letters of commitment), with greater amounts of non-NYSERDA cost share considered more favorably.
- Cost share included in the proposal is verifiable.
- The project cost is justified and reasonable with respect to the level of effort proposed, the expected benefits, and the potential market or deployment opportunity.

Project Plan, Scope, Risks, and Challenges

- Technical and programmatic risks are clearly understood and fully disclosed, with well-considered mitigation plans that have a high probability of ensuring project success.
- The proposal includes sufficient details in Attachment B – Statement of Work. The tasks are clearly defined, with fully developed tasks, subtasks, milestones, and deliverables that will enable effective project execution.
- The proposal demonstrates adequacy, reasonableness, and soundness of the project schedule as detailed in the proposed Statement of Work and Milestone Payment Schedule.
- The proposal demonstrates reasonableness of budget and spend plan as detailed in the submitted Milestone Payment Schedule (Attachment D1) and Budget Form (Attachment D2).
- The proposal demonstrates adequacy of proposed project management systems including the ability to track scope, cost, and schedule progress and changes.

B. Program Policy Factors

NYSERDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- The consideration of the impact on, and benefits to, a diversity of communities/locations, including low-income and rural communities, partnerships with minority serving and/or owned businesses.
- Whether the proposed project will accelerate technology advances in areas that industry is not likely to undertake.
- The degree to which the proposal expands the portfolio of technical areas and project types both within this program and within NYSEDA's portfolio.
- The degree to which the proposal aligns with the latest NYSEDA strategy and policy in clean hydrogen.

V. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSEDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSEDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSEDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This

information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law Sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law Sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under Section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of up to three years, unless NYSERDA management determines a different

structure is more efficient based upon proposals received. A contract may be awarded based on initial Proposals without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support Proposals. NYSERDA will use Attachment F, Sample Agreement, to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately twelve weeks from the proposal due date whether your proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Recoupment - For any new product research and/or development, NYSERDA will generally require a royalty based on sales of the new product developed. NYSERDA's standard royalty terms are 1% of sales and of all license revenue accruing to the Contractor for products produced, for a period of fifteen years or until the Contractor pays NYSERDA an amount equal to the amount of funds paid by NYSERDA to the Contractor, whichever comes first.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSERDA's Accessibility Requirements](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of Attachment F, Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with

any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of a Proposal and to assess Proposers' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to

request additional information or clarification regarding Proposer's proposal, including questions regarding Proposer's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the Proposers' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

VI. Attachments

Required Attachments for the Proposal:

- ☐ Attachment A – Proposal Narrative Template
- ☐ Attachment B – Statement of Work Template
- ☐ Attachment C – TRL/CRL Calculator
- ☐ Attachment D1 – Milestone Payment Schedule
- ☐ Attachment D2 – Budget Form

- ☐ Attachment E – Executive Summary Slide Template
- ☐ Project List – A list of relevant projects that the proposal team has completed in the past.
- ☐ Letter(s) of Commitment from the Proposer, all teaming entities, and all cost share providers
- ☐ Resumes/CVs
- ☐ Indirect Cost Rate Supporting Documentation

For Reference Only (Does not need to be Submitted):

- Attachment F – Metrics Form
- Attachment G – Sample Agreement

Inform Climate Change Impacts and Adaptation Research Planning Request for Information (RFI) 6024

No funding is associated with this solicitation

Responses Due July 31, 2025, by 3:00 PM Eastern Time

The purpose of this Request for Information (RFI) is to solicit input from interested stakeholders across the state to inform the New York State Energy and Research Development Authority's (NYSERDA) Environmental Research Program in developing a Research Plan for the topics of climate change impacts, adaptation, and resilience.

NYSERDA does not intend to publish responses to this RFI. NYSERDA may share responses with other New York State agencies. NYSERDA may share an aggregation of responses, in which the identity of the respondent is not disclosed, with the public or NYSERDA partners.

Response Submission:

Electronic submission is required. Responses should be submitted using the Microsoft Forms survey link: <https://forms.office.com/g/R3uwThGaef>. If you are unable to respond via MS Forms, please send your responses in a PDF or Word document via email to ClimateResearch@nyserda.ny.gov, with the subject line "RFI-6024 Response." The response should be provided in an attachment to the email (.docx or .pdf format) and provide the information listed in Section II below.

NYSERDA may reach out to respondents to seek clarifications. If you have technical questions regarding this RFI, please contact ClimateResearch@nyserda.ny.gov with the subject line "RFI-6024 Inquiry."

All responses must be received by 3 pm ET on July 31, 2025. Late or faxed responses will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx).

Introduction

[NYSERDA's Environmental Research Program](#) supports policy-relevant research to increase the understanding and awareness of the environmental impacts of energy choices and emerging energy options. The program aims to provide a scientific foundation for formulating effective, equitable, energy-related environmental policies and resource management practices. Examples of research undertaken to-date include the [New York State Climate Impacts Assessment](#) (NYSCIA) sea level rise mapping tools, and a study on the unequal distribution and use of cooling practices. Project reports from the program's more-recent climate research projects can be found on [the program's report page](#).

The program is updating its Climate Change Adaptation Research Plan to address information gaps and research needs related to climate change projections (forward-looking climate information), climate impacts, and adaptation. The current research plan was published in 2019 and is available for reference [on the program's website](#).

Through this RFI, the program is seeking input from stakeholders on gaps in research and tools for using climate science and information in local, county and state climate change planning and response.

This effort is focused on NYSERDA's Environmental Research Program and is separate from the [NYS Adaptation and Resiliency Plan](#) (NYSARP), which is a statewide, multi-agency initiative to establish a statewide framework to guide adaptation planning and implementation across the state. While the efforts are separate, this Environmental Research Plan could inform the development of the NYSARP, and vice versa.

Information Requested

NYSERDA is seeking information to help inform development of a Climate Change Adaptation Research Plan. The term "research" as used here is broad and could include information gaps, planning tools, visualization tools of climate projections, pilot projects for adaptation strategies, etc. Topics can span all sectors covered by the [NYSCIA](#). Research topics can also consider the implications, co-benefits, and unintended consequences to other sectors, as well as the implications for Environmental Justice and Disadvantaged Communities.

Please note that this research plan will be focused on increasing our understanding of how the climate in NYS will change (climate projections), how those changes will affect the state (impacts), and how the state and its communities can prepare for those impacts (adaptation and resilience). **This research will not focus on reducing greenhouse gas emissions or reducing energy use.**

Responses will be considered during development of the plan. The items in the final research plan will be prioritized using criteria such as alignment with NYS policies, alignment with NYSERDA and program goals, and feasibility. It is also important that the research not be redundant with other ongoing projects and activities.

Please submit responses to the questions in this RFI using the Microsoft Forms survey link:

<https://forms.office.com/g/R3uwThGaef> by 3PM Eastern Time on July 31, 2025

If you are unable to respond via MS Forms, please send your responses in a PDF or Word document to ClimateResearch@nyserda.ny.gov.

To apply via email:

All respondents should complete the first section (Respondent Information) with answers to all relevant questions. Respondents may choose to respond to any or all questions in the second section (Questions to Inform Research Plan). Please include the question numbers with your responses.

Respondent Information

1. Contact Information:

- Name: _____
- Email: _____
- Phone (optional): _____

2. Organization Name

3. In what region of the state are you located? (Refer to the [NYSCIA map of regions](#).)

- The Adirondacks Region
- The Catskills Region
- The Central/Finger Lakes Region
- The Champlain Valley Region
- The Great Lakes Region
- The Long Island Region
- The Mohawk River Valley Region
- The New York City Region
- The North Hudson Region
- The South Hudson Region
- The Southern Tier Region
- The St. Lawrence Valley Region

4. Organization Industry (select as many as applicable)

- University/college
- Non-governmental organization
- Local government/planning organization
- State government
- Federal government
- Private sector/consultant
- Individual/concerned citizen
- Other: _____

Questions to Inform Research Plan

Please remember that all answers should pertain to climate change projections, impacts, or adaptation/resilience, NOT greenhouse gas emissions.

1. What do you think are the three most pressing research or information needs for climate change impacts and adaptation in New York State?
 - a. What are the most pressing needs for you or your organization specifically?
2. In the past, have you used any climate data or information? If so, what have you used? How could that data or information be improved for your work?
3. What additional information or research would help you perform your work, and how would it help you?
 - a. Specifically related to climate projections, what additional climate change information would be useful for your work or those you work with, beyond those already produced for the NYS Climate Impacts Assessment? How would they help?
4. What information or research would better characterize climate impacts on communities or groups that are particularly vulnerable to climate change, including but not limited to Disadvantaged Communities, Tribal Nations, those with low mobility, or aging populations? What information or research would support solutions to address these impacts?

5. What information or research would help inform future New York State policies or implementation of current policies or permitting requirements? What specific parameters or data are needed to address policy requirements?
6. What information or research would assist municipal planning and how?
 - a. What is the most challenging aspect of climate adaptation and resilience planning for municipalities and other communities?
7. What tools related to climate impacts or adaptation would be useful to you or the people you work with?
 - a. If there are existing tools that don't meet your needs, why not? How could they be improved, or how could a new tool be more useful?
 - b. Are you aware of anyone currently developing such a tool?
8. Is there research or information that is integral to enabling other research? That is, information that is needed before certain other research can be started?
9. Are you aware of any research that is currently ongoing that is related to any of the above questions? Who is performing the research?

How Comments Will Be Used

This RFI may inform the Environmental Research Program's research agenda.

General Conditions

Proprietary Information

Careful consideration should be given before confidential information is submitted to NYSDERDA as part of your response. Review should include whether it is critical for understanding responses, and whether general, non-confidential information, may be adequate. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSDERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSDERDA that the responder wishes to have treated as proprietary, and confidential trade secret information, should be identified, and marked as "Confidential" or "Proprietary" as the first word in that response. This information should include a written request to exempt it from disclosure, including a written statement of the reasons why the information should be exempted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nysderda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSDERDA cannot guarantee the confidentiality of any information submitted.

Contract Award

This solicitation for information (RFI) will not result in the award of any contract for goods or services. NYSDERDA anticipates collecting and analyzing RFI responses to inform potential future contracts. Respondents are advised that all costs associated with this RFI response will be solely at their expense.

Limitation

The information gathered by NYSERDA will be advisory only and is not binding on NYSERDA or any other state agency, office, commission, or public authority. Responses will become the property of NYSERDA. Any actions recommended by NYSERDA will be subject to all applicable laws, including procedural, regulatory and environmental review requirements. This RFI is neither a contract offer, nor a request for proposals and does not commit NYSERDA to award a contract, pay any costs incurred in preparing a response, or to procure or contract for services or supplies. Respondents are encouraged to respond to this RFI; however, failure to submit a response will not impact a respondent's ability to respond to any future competitive solicitation process or influence the selection of a proposer going forward or affect its rights and obligations under any applicable laws or in any legal proceeding. NYSERDA reserves the right to discontinue or modify the RFI process at any time, and makes no commitments, implied or otherwise, that this process will result in a business transaction or negotiation with one or more respondents.

**Statewide Commercial Building Stock Study (CBSS)
Request for Proposal (RFP) 6026**

***Maximum funding available: \$8,000,000**

*This funding opportunity provides the maximum of \$8M to encompass the initial CBSS assessment and one update. The initial project timeline is 2 years. The opportunity to exercise one option to renew for up to an additional two years is at the sole discretion of NYSERDA. NYSERDA reserves the right to extend and/or add funding to the Solicitation should other priorities arise, or program funding sources become available.

Proposals Due: August 27, 2025 by 3:00 PM Eastern Time ¹

The New York State Energy Research and Development Authority (NYSERDA) requests proposals from organizations, individuals, or teams interested in conducting a New York Statewide stock assessment of commercial and institutional buildings. The Commercial Building Stock Study (CBSS) will be a stand-alone study but will apply trends in the measurement and analysis applied in the previous 2021 Commercial Statewide Baseline Study (CSBS)²when applicable. The new study shall introduce enhancements that can offer additional value to NYSERDA and its stakeholders with specific interest in equity and Disadvantaged Communities, and further support the energy and climate policy goals of New York State.

This study will (a) develop a census (total and categorical counts) of commercial buildings in New York state, (b) develop a comprehensive understanding of commercial building characteristics, including square footage, interior dimensional ratios (e.g., window-to-wall, etc.), building shell, lighting system, heating and cooling system, other energy-using equipment, and its operation and usage patterns; (c) the current commercial use of energy consuming equipment (electric, gas, and other fuels), the penetration of energy efficient equipment, and energy management practices. Additionally, the study will assess the market for HVAC, lighting, energy management

¹ All proposals must be received by 3 PM Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted. Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see Solicitation Proposal and Vendor Responsibility Questions.pdf for a complete list of the questions proposers must answer as part of a submission. The online proposal system closes promptly at 3 PM Eastern Time, files in process or attempted edits or submission after 3 PM Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserdera.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

² <https://www.nyserdera.ny.gov/About/Publications/Evaluation-Reports/Building-Stock-and-Potential-Studies/Commercial-Statewide-Baseline-Study>

systems/controls, and water process heating equipment to determine the baseline efficiency of equipment installed in New York and practices used by vendors in specifying and installing equipment. This information will be used to improve the ability of NYSERDA, DPS, and program administrators to develop, implement and evaluate energy efficiency programs. More specifically, the information gained in the study will be used to set more accurate baselines for incentive programs, inform energy savings calculations, improve evaluation guidelines, and provide energy efficiency potential estimates.

A significant cross-section of New York State commercial energy users will be included in the scope of the commercial building stock study. The selected contractor will be required to collect primary data across the entire state and utilize secondary data, where possible, from relevant data sources and research studies.

The information gleaned from this study will also be used to inform a time series dataset of market changes which will be examined as part of NYSERDA's market development strategies. Comparability between the 2021 study and this proposed study is required, but should be balanced with datapoint improvements or study augmentation, where possible. Areas of potential improvement/augmentation include geographic segmentation and building characteristics (e.g., square footage, spatial dimensions and ratios, etc.) and are identified below. The selected Contractor will coordinate with NYSERDA Project Managers and other relevant stakeholders to understand these additional research areas and determine what datapoints should be collected. Adaptations to improve measurement and accuracy of the study are encouraged with these requirements in mind. Further, the primary data collected in this CBSS will be used as inputs to potential studies and other analyses conducted by NYSERDA. Service providers can employ this anonymized data (to be published on OpenNY) in their business and marketing strategies to target and engage the commercial market in energy efficiency, renewable energy, and building electrification opportunities.

Following successful completion of this CBSS, there will be one option to renew for an additional two years at NYSERDA's sole discretion. If approved by NYSERDA, the Contractor shall conduct the next iteration of the commercial building stock assessment. The project award resulting from this solicitation will be for 2 years with one 2-year option to renew at NYSERDA's sole discretion.

Informational Q&A

Proposers should submit all formal questions in an email to: NYSERDA.CBSS@nyserda.ny.gov with the subject "CBSS: Solicitation Questions-Proposing Entities Name". NYSERDA will accept questions regarding this solicitation until August 6, 2025 at 5 PM EST. Responses to all questions will be provided on a public facing page on NYSERDA's website on August 8, 2025 by 5 PM EST. All questions will be posted anonymously.

NYSERDA's written responses will supersede any content provided within this solicitation.

Intent-to-Propose

Proposers should indicate their intent to propose in an email to NYSERDA.CBSS@nyserda.ny.gov by 5 PM EST on August 13, 2025. Failure to submit an intent-to-propose notification will **not** result in disqualification, but notification is strongly preferred to inform NYSERDA's internal planning.

Proposal Submission

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "Application Instructions and Portal Training Guide [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are Cory Blad, Program Manager at (917) 242-0396 and Tracey DeSimone, Project Manager at (518) 862-1090 ext. 3452 or by e-mail (NYSERDA.CBSS@nyserda.ny.gov). If you have contractual questions concerning this solicitation, contact Jim Cowman (Designated Contact) at (518) 862-1090, ext.3652 or Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

I. Introduction

The commercial building stock in New York is highly diverse and will require detailed sector and subsector categorization techniques as well as various methods of data collection to ensure requisite accuracy. All New York State commercial energy users will be statistically represented in the scope of this study. The CBSS will collect data on building characteristics, energy use, energy consuming equipment, and occupant demographics (detailed below). The study will also include additional assessments related to building resiliency. It is expected that this CBSS will sustain variables and measurement applied in the previous (2021) commercial building stock assessment conducted by NYSERDA where appropriate, however enhancements and innovative approaches that offer additional value to NYSERDA and its stakeholders is welcomed. Desired variables and conceptual approaches that move beyond the 2021 CSBS are detailed below in “Services Requested.”

This CBSS will include particular focus on achieving results related to building electrification, clean heating and cooling technologies, building-related climate resilience, and the overarching energy and climate policy goals of New York State. Links to the final reports, methodology, and data sets from this assessment will be published on NYSERDA's website and Open NY and findings will be made available through public venues. Results from the 2021 Commercial Statewide Baseline Study³ can be viewed on the NYSERDA website (see footnote below) and the anonymized data sets on Open NY⁴. Proposers will be asked to recommend innovative approaches to data collection strategies for different types of data that may include adapting existing methods, developing new tools (surveys, instruments, guides, platforms, etc.), and/or leveraging advanced technologies.

⁴ data.ny.gov

II. Services Requested

NYSERDA will procure a Contractor, or team of contractors, to conduct a comprehensive, statewide Commercial Building Stock Study of commercial (including mixed-use commercial and residential) and institutional buildings in New York State. The selected Contractor will be required to execute a complex and multi-faceted project, described below. (See Proposer Qualifications section for details related to required skills and experience.) After completing a comprehensive review of the 2021 CSBS and other existing data sources (*Task 2: Review of 2021 Commercial Statewide Baseline Study* and *Task 3: Review of Existing Data*), the Contractor will work with NYSERDA and other primary stakeholders to finalize a plan for data collection, analysis, and reporting. Specific areas of need that require adaptation and augmentation from the 2021 CSBS include:

- Improved quantification (census) of commercial building space in New York both in terms of number of commercial buildings as well as internal quantification such as square footage, internal ratios (i.e., wall/window, envelope/floor), unit location within large and multiuse spaces
- Revised geographic segmentation: Upstate New York, Downstate New York (Hudson Valley, New York City, Long Island)
- Energy systems and distribution within buildings (i.e., rooftop systems, thermal load, heat capture)
- Distinct issues related to leased spaces
- Building categorization
 - Mixed use buildings will require more consistent and comparable data in terms of physical space description.
 - Specific use categories such as data centers and warehouses will require additional segmentation, including differentiation between exclusive data centers and high-energy data spaces, such as server floors in data-intensive commercial industries (i.e., finance).
 - Institutional categorical breakdown by municipal, university, P-12 school, and healthcare buildings
- Load category breakdown within mixed use buildings, including such high use examples as dedicated server spaces, mentioned above.
- Improved analysis of large buildings (40 stories or taller) and high-rise mixed-use commercial and multi-family residential) and the unique impact of Local Law 97 in New York City

Overall, these activities will collect information needed to characterize the commercial building stock in NYS. More specific categorical needs and best data collection strategies will be determined in collaboration with project working groups. A census count of commercial buildings is a primary goal, but more detailed building characteristics may require representative sampling to be determined in collaboration with project working groups. The data categories include, but are not limited to:

- **Building characteristics:** Square footage, EUI (energy usage intensity), year of construction; mixed-use buildings, commercial segmentation (office, retail, food service, warehouse, data center, grocery, health service/hospitals, educational and business campuses, lodging/hospitality, etc.).
- **Heating and cooling:** Number, type, age, efficiency, capacity, and condition of HVAC and water heating system(s); types of fuels (natural gas, delivered fuels, electric, district

steam); thermostat type and set points; space heating, thermal capture, presence of backup power (e.g., generator), etc.

- **Building shell:** Number, type, material and condition of windows and doors; internal and/or external wall-to-window ratios; building air leakage measured by blower door testing; building siding and roof materials, condition, and color; lighting (observation): number, location, usage, and type of lighting and lighting controls.
- **Behaviors and awareness:** Assess awareness of energy efficiency, assess the penetrations of retrofitting to date, clean energy, and beneficial electrification; interest in or barriers to participation in energy efficiency (EE) or beneficial electrification (BE) programs; customer satisfaction and behaviors related to operating heat pumps and other energy efficient or clean energy technologies.
- **Business equipment:** Examples include but are not limited to:
 - Commercial kitchen: refrigerant types, cooking equipment; ovens, boilers, dishwashers, etc.
 - Health Care: Medical equipment, laboratory equipment, etc.
 - Office equipment: computers, cash registers, point of sale equipment, printers & copiers, TVs, etc.
- **Energy Management Systems (EMS/BMS).**
- **On-site generation and unique large building systems:** Wind turbines; biomass; solar photovoltaics; renewable energy generation; cogeneration; emergency power backup generation; thermal capture; thermal load shifting.

The selected Contractor will identify additional metrics for collection based on this study's updated research goals, which encompass several thematic areas not covered by the 2021 CSBS and determine the optimal manner in which metrics should be collected (Task 4: Data Strategy). The Contractor will update the documentation and tools from the 2021 CSBS, create new data collection instruments, as needed, and institute a data security plan (Task 6: Develop

Study Documentation, Instruments and Tools). The Contractor will design sampling strategies to efficiently collect the primary data needed to inform the research objectives with a sufficient level of statistical precision and accuracy across desired stratifications. Achieving response rates necessary to achieve rigorous, statistically significant results may require incentives to target respondent groups (Task 5: Sample Design).

NYSERDA anticipates that activities related to this workplan finalization effort will be aided by the formation of one or more thematic working groups with NYSERDA and its assessment partners. NYSERDA encourages the Contractor to propose working groups related to one or more of these tasks to build consensus around any key aspects of the CBSS that may require more deliberation (Task 1: Working Groups). The contractor will work closely with NYSERDA to ensure those with most relevant expertise are invited to join commensurate working groups.

After the workplan and associated documentation are finalized, the selected Contractor will collect and analyze primary data. This will involve self-reported surveys (Task 8: Survey Data Collection) for some datapoints and validated observation for other datapoints. Validated observation could take several forms, such as in-person, virtual site observations (Task 9: Conduct Site Observations), assessment data analysis, or image analysis (Optional Task A): Image Analysis).

The Contractor may also analyze Advanced Metering Infrastructure (AMI) data (Optional Task B: Advanced Metering Infrastructure Data Analysis).

Finally, the Contractor will consolidate the primary data and compile draft and final reports detailing the research objectives and associated outcomes of this study (Task 10: Reporting). The data collected from this study will directly inform the assessment of energy efficiency potential in the commercial building sector. The selected Contractor will coordinate with NYSERDA's PAR team leading a separate potential study to ensure the data outputs of this study seamlessly feed into the potential analysis (Task 11: Coordinate with Other Key Data Analysis Efforts).

As noted above, there will be one option to renew for an additional 2 years at NYSERDA's sole discretion. If approved by NYSERDA, the Contractor shall conduct the next iteration of the commercial building stock assessment. In addition to the proposal requirements for this CBSS, Proposers should provide an updated scope, estimated timeline, and budget to replicate the study following successful completion. It is expected that the renewal will create budgetary and timeline efficiencies. NYSERDA reserves the right to advance or not advance, or to modify, the renewal plan.

III. Scope of Services to be Provided

Tasks and assistance that may be required of the selected Contractor are described in detail below:

Task 0: Project Management

Regardless of subcontracting arrangements, the Contractor shall be responsible for the timely completion of all the tasks in the Statement of Work per the proposed and approved project schedule. The Contractor shall provide all project management activities necessary for the performance of the resulting Statement of Work, including but not limited to, the coordination of all work undertaken to deliver the objectives of this project, ensuring control over and adherence to the project budget, schedule, data management and security requirements, leading working groups, and interim, draft, and final deliverables.

Task 1: Working Groups

The CBSS is a multi-faceted and multi-stage project which will have widespread implications for the work of NYSERDA and other stakeholders. The Contractor will convene and lead Working Groups to ensure efficiency and alignment across various efforts and initiatives, use stakeholders' subject matter expertise, and build consensus around key aspects of the CBSS. Aligning working group composition with subject matter expertise is essential to ensure efficient operation. The Contractor will coordinate with NYSERDA on working group member selection with NYSERDA providing final approval.

The Contractor shall implement the Working Groups such that the goals, schedule, participant expectations, collaborative decision-making process, and necessary outcomes are clearly defined and communicated. The Contractor is responsible for convening and moderating the Working Groups, including developing and distributing agendas, documenting talking points, decisions, and action items and relaying this

information to the larger project team in a timely manner. Further, the Contractor shall synthesize and implement the outcomes of each Working Group, ensuring the outcomes are implemented comprehensively throughout the study.

NYSERDA anticipates that representatives from the following stakeholder groups may sit on one or more thematic working groups:

- NYSERDA
 - Policy, Analysis and Research (PAR) Team
 - Clean Heating and Cooling Team
 - Clean and Resilient Buildings Team
 - Business Performance Management⁵ Teams
- New York State Joint Utilities
- New York State Department of Public Service

Proposers should:

1. For each subsequent Task, indicate whether Working Group(s) will be convened to inform the development and execution of that Task's activities and identify the proposed Working Group(s).
2. Preliminarily indicate which stakeholder groups should be represented in the Working Group(s).
3. Identify high-level methodological or research questions to address through the Working Group(s).

Task 2: Review of 2021 Commercial Statewide Baseline Study of New York

The selected Contractor is expected to conduct an in-depth review of the measure list, methodology, data collection instruments, sample design, and results from the 2021. This review shall result in a comprehensive understanding of the methodology and data collection instruments, including salient points, reusable methodology and recommended methodological revisions, review of lessons learned, and a summary of proposed changes to implement in this Commercial Building Stock Assessment.

NYSERDA anticipates the need for a data collection working group to review new and existing data points, consolidate data needed, and to verify the approach. The Contractor will be expected to lead working group activities in order to build consensus around any key aspects related to data collection, sampling, and/or other aspects of the CBSS that require more deliberation.

Task 3: Review of Existing Data

To maximize efficiency, the Commercial Building Stock Study seeks to leverage existing data sources to inform or triangulate results of this study. The selected Contractor will be expected to review existing data sources including (but not be limited to) program data, prior studies, utility customer data, local, city, and state government data and analyses (e.g., tax assessment records), and/or third-party data sources. Issues such as data comparability, data-linkage, validity, representativeness, and timing should be

⁵ Business Performance Management Teams include: Market Characterization and Evaluation, Quality and Market Standards, Performance Measurement & Reporting, Statistics & Analytics.

considered in proposing whether existing data can be used to supplement or take the place of primary data collection. In addition, the Contractor should state how CBSS data will utilize external data and studies to validate and/or confirm CBSS results.

Task 4: Data Strategy

In this CBSS, NYSERDA aims to maintain consistency in the measurement and methods applied in the previous building stock assessments conducted by NYSERDA while refining, expanding, or enhancing these approaches as needed to meet the research objectives of this study. Specifically, enhanced data granularity is of particular importance as references in Section II. Services Requested, above.

The selected Contractor will develop and implement a Data Strategy that identifies and documents a list of datapoints to be collected in this study. It is expected that all or nearly all datapoints collected in the 2021 CSBS will be updated through this study; these datapoints must be collected in a manner that allows for longitudinal comparison with the previous and future measurements. Additionally, there are several research questions and thematic areas which will be assessed for the first time in this CBSS. Such as building-level resiliency and beneficial electrification (e.g., clean heating and cooling readiness) as well as physical building space characteristics (i.e., square footage, internal ratios, etc.). For building resilience, NYSERDA has developed recommendations for resilience-related elements to include in a building stock assessment, which can be used as a starting point for this aspect of the study.

As part of this task, the selected Contractor will determine the optimal method for primary data collection of each metric. Certain datapoints will be collected through self-reported surveys, while others will require validated observation. NYSERDA is interested in creative approaches to accurately and efficiently collect many datapoints through verified observation, which may take the form of on-site inspection, virtual site inspection, or image analysis. While on-site inspections will be required for some datapoints (e.g., blower door test measurements [ACH50]), it may be possible to collect other desired datapoints through virtual inspections.

Furthermore, for data points identified by NYSERDA to be especially significant in informing near-term strategic decisions, the Contractor may be required to conduct virtual observations to provide validated data on an expedited timeline. The Contractor may be required to periodically provide updates on preliminary results for these data points. The contractor will need to detail in proposals or as part of final workplan how virtual inspections will be undertaken to ensure quality data collection and consistency.

The Contractor will develop and maintain a data dictionary for this project which will include, but is not limited to: Data variable names, definitions, unit of measurement, allowed values, mode of collection, and other critical information needed to describe the data produced by surveys and other observational methods. The data dictionary should also include an identification of consistency or deviation from the previous building stock assessments noted above.

At the conclusion of the study, the Contractor will deliver to NYSERDA a data dictionary and all data and analysis files in .csv or .sas/.ipynb/.py format, including all code, data cleaning, data weighting, and other analysis.

Proposers should:

1. Include preliminary recommendations as to which types of datapoints may be collected through self-reporting and which require validated observation.
2. Suggest data collection approaches that maximize accuracy and efficiency.
3. Suggest preliminary datapoints for collection related to:
 - a. Clean Heating and Cooling
 - b. Resiliency
 - c. Commercial building segments
4. Describe the working group strategy, if applicable.

Task 5: Sample Design

The selected Contractor will finalize probability-based sampling strategies used to collect the primary data needed to inform this study's research objectives with sufficient levels of statistical precision and accuracy. A sampling strategy will be developed for each method of primary data collection identified in Task 4: Data Strategy (i.e., self-reported surveys and various methods of validated observation).

It is required that this study achieve a minimum of 90% confidence with a precision of +/- 10% for all statewide datapoints and for selected typology stratifications.

The Contractor should weigh the costs and benefits of different sample sizes and levels of disaggregation when developing the sampling plans, while ensuring longitudinal comparison to the baseline year. The associated recruitment strategy must be designed to be representative of target populations. It is expected that an engagement strategy and some level of respondent incentive will be necessary to achieve sufficient response rates for some or all of the primary data collection activities. A working group may be used to determine a final sampling and incentive strategy.

For each method of primary data collection, Proposers should:

1. Identify a preliminary sampling approach and outline how this strategy will efficiently maximize statistical significance.
2. Indicate their preliminary target number of engagements to achieve desired response rates.
3. Indicate a preliminary strategy for assessing population shifts in New York since the latest census.
4. Provide estimates of statistical precision that could be expected for each pre- and post-stratification level based on the proposed approach.
5. Explain preliminary recruitment, engagement, and incentive distribution strategy for each respondent group.
6. Identify the cost per completed engagement, itemized wherever possible (e.g., the cost of conducting a site inspection should be separate from the cost of recruiting for site inspections).
7. Describe the working group strategy.

Task 6: Develop Study Documentation, Instruments and Tools

Based on the output of the prior tasks, the Contractor will update or develop documentation and tools (e.g., survey instruments, interview guides, primary data collection templates, etc.) needed to implement the CBSS. This task will result in

finalized data collection instruments, methodology, and guidebooks. The primary data collection instruments should include a summary of consistency or deviation from the previous building stock assessments noted above.

All documentation and tools must be shared with NYSERDA for review and approval before implementation. The Contractor may also choose to utilize working groups in the finalization of study documentation and tools.

Proposers should:

1. Indicate current level of compliance with NYS Office of Information Technology Services (ITS) policies, standards, and guidelines for information security (*see General Conditions: Information Security*). The selected Contractor must meet the requirements to manage data with a “High” information security rating; if these requirements are not currently satisfied then Proposers should outline plans to reach this level of compliance.

Task 7: Finalize Work Plan

The selected Contractor will finalize a work plan, with NYSERDA’s approval, detailing the process, timeline, and cost for undertaking activities related to the Commercial Building Stock Study.

The finalized work plan should include a detailed analysis plan that will solidify how the longitudinal study between the 2021 CSBS and this CBSS will be conducted. The plan should link the data being collected as part of this Commercial Building Stock Study to data collected in the 2021 CSBS to ensure longitudinal measurements and conclusions can be made. The findings from both studies are expected to be statistically significant, roll up, show change over time, and build measurements of key indicators of market change. The finalized work plan will include the data dictionary, sampling strategy, data collection instruments and methodologies, and timeline.

Task 8: Survey Data Collection

Utilizing the instruments developed in Task 6: Develop Study Documentation, Instruments and Tools, surveys (e.g., telephone, web-based, in-person) should be conducted for a representative sample of commercial building owners and property managers throughout the upstate and downstate regions and sample frame decided upon within the working groups.

The Contractor shall make efforts to minimize measurement error and survey response bias and will be responsible for pre-testing primary data collection instruments and optimizing the web-based survey for mobile devices. Primary data collection instruments and collection should adhere to industry best practices and accommodate responses from a diverse population of NYS residents. Incentives are often utilized to encourage

Proposers should:

1. Include proposed methods for survey data collection.
2. Indicate intent to recruit participants for a site observation as a part of the survey (e.g., nested sample).
3. Describe the working group strategy, if applicable.

participation and improve response rates when conducting primary data collection. Proposals must outline the survey incentives expected for each survey and each respondent group, justification for the incentive decision, and the total incentive cost.

Task 9: Conduct Site Observations

The Contractor will collect additional information through site inspections, virtual observations, secondary data analyses, or a combination of the three approaches, as determined in Task 4: Data Strategy. As part of this process, it is anticipated that the Contractor will verify the responses for a subset of data points in the self-report surveys as well as reconcile CBSS findings with any existing governmental or third-party analyses of New York State commercial buildings. Recruitment will be conducted in a manner that minimizes bias in the sample of businesses or other commercial and institutional buildings selected. Additionally, for certain measures primary data may need to be collected during heating and cooling seasons.

Unless otherwise noted by NYSERDA, all on-site observations must be done by personnel with at least one year's experience in building science and must follow industry best practices. It is strongly preferred that personnel conducting on-site observations have at least one of the following certifications: BPI Building Analyst, BPI Building Analyst Technician, BPI Energy Auditor, AEE Certified Energy Auditor, ASHRAE- Building Energy Assessment Professional. If personnel conducting on-site observations do not have one of the listed certifications, their related experience and qualifications should be outlined.

Where physical site inspections occur, to ensure the safety of all parties, the Contractor will work in collaboration with NYSERDA and other primary stakeholders to develop and implement safety protocols. NYSERDA assumes that an incentive will be necessary for owners/managers to agree to participate in these site inspections and proposers should be prepared to deliver incentives as determined in Task 5: Sample Design.

The Contractor will be responsible for proposing, developing, and deploying a secure method and tool for collecting site data. NYSERDA requires the method and tool be available for NYSERDA's use in subsequent commercial building stock studies. This can be accomplished by using an open method and open- source tool, by transferring ownership of the method and tool to NYSERDA at the end of the study, or by any other method that will ensure NYSERDA's ownership following the completion of the study. The final method, tool, and process to transfer ownership at the conclusion of the study will be negotiated and approved by NYSERDA.

The Contractor will be responsible for drafting a quality assurance plan for all data collection and inspection methods. This plan and all related quality control data must be

Proposers should:

1. Indicate whether they intend to conduct surveys in-person in furtherance of Task 8 concurrently with site inspections.
2. Indicate a strategy to collect data during both heating and cooling seasons.
3. Provide details as to the accessibility and ownership of the method and tool after the conclusion of the study. (Preference will be given to proposals that allow for NYSERDA's access or ownership after the study is complete.)

submitted for NYSERDA approval prior to implementing the data collection tasks and meet NYSERDA Data Governance requirements.¹⁰

NYSERDA strongly encourages the integration of alternative data collection strategies including, image analysis, municipal assessment data analysis, and/or advanced metering infrastructure data analysis. These alternative strategies are detailed below.

Optional Task A: Commercial Building Image Analysis

This task includes creation of a public database containing all commercial buildings in NYS, and detailed building information (window-to-wall ratio, square feet, etc.). The image analysis database of commercial (including mixed-use) and institutional buildings in the State will allow NYSERDA and various market actors to mine basic building configuration and shell information for commercial buildings in New York State.

The image analysis task comprises two subtasks—enhancing and validating the building inventory to provide a detailed building inventory and conducting the image analysis on each building in the inventory. The Contractor shall conduct image analysis on the identified buildings. Because of the experimental nature of the image analysis task, the proposer shall incorporate two proof of concept steps into the image analysis—one to provide an estimate of what percentage of commercial buildings in the State are documented with high-quality, unobstructed images and another to test the accuracy of the image analysis itself. Any use of artificial intelligence software to acquire data (such as web scraping) and/or analysis must be explicitly detailed by the contractor and formally approved by NYSERDA before any such technologies can be utilized.

The purpose of an image or equivalent alternative analysis is to:

- Address one or more of this RFP's goals as accurately but more efficiently than the surveys or site inspections, or
- Significantly increase the accuracy or meaningfulness of survey or site observation results at a cost acceptable to NYSERDA.

Complementary methodologies may include strategies such as **municipal assessment analysis**, utilizing public tax assessment data to extract meaningful data related to building space and other characteristics.

These municipal assessment data may be used to supplement, augment, or verify commercial statewide building stock. Image analysis may include digital image processing techniques, thermography, or other suggested methods to extract meaningful information from imaging data. The selected proposer will work with NYSERDA to finalize specific research goals and methodologies.

The selected proposer will be responsible for providing an image analysis methodology document for pre- approval.

(Optional task) Proposers should:

1. Detail their experience and methods for collecting, processing, and/or analyzing image data.
2. Identify research goals of this RFP which could be furthered by the incorporation of image analysis.
3. Itemize the portion of the total project budget dedicated to this Optional Task.

Optional Task B: Advanced Metering Infrastructure Data Analysis

If interval data from Advanced Metering Infrastructure (AMI) is available from the utilities, then the selected Contractor should utilize this data to:

- Understand commercial load profiles, including identification of peak load characteristics and usage patterns across different time intervals.
- Analyze commercial load profiles across geographic and income stratifications, as well as for buildings with on-site generation and/or storage.
- Identify opportunities for cost savings or grid reliability improvements by peak load shifting or reduction in the commercial market.

The process for obtaining AMI data from the utilities is still in development and the selected Contractor may be asked to engage directly with the utilities to obtain the data or be given access to NYSERDA systems housing this data. Preference will be given to Proposers who can meet the data security requirements set forth by the utilities to collect, store, and manage this data. The final method, tool, and process to collect AMI data and transfer ownership at the conclusion of the study will be negotiated and approved by NYSERDA.

(Optional Task) Proposers should:

1. Detail their experience processing and analyzing AMI data.
2. Identify other research goals of this RFP which could be furthered by the incorporation of AMI data.
3. Itemize the portion of the total project budget dedicated to this Optional Task.

Task 10: Reporting

Preliminary findings should be provided to NYSERDA as soon as they are available and according to the project schedule (within the stated two-year timeframe). Tableau experience is preferred. The selected contractor will, experience permitting, be granted access to build a dashboard within NYSERDA's system for intermediate reporting on specified datapoints. This NYSERDA-owned work product will facilitate Program staff interaction with the data, both before and after the publication of the final report. NYSERDA staff feedback is expected to shape the Contractor's analysis and final written report.

The Contractor will work with NYSERDA to design relevant data views and visualizations to be included in the draft and final reports. The Contractor will work with NYSERDA to determine the final format of the written report, which may include separate volumes

focusing on specific learning objectives and assessments for Disadvantaged Communities, and/or Building Resiliency. The final written report is expected to have a concise Executive Summary, should be visually appealing, include a variety of visual aids and meet Web Content Accessibility Guidelines (WCAG) 2.2 compliance.

A draft report should be compiled, and a final report should be completed once NYSERDA reviews and provides feedback on the draft. The final report should be presented to NYSERDA staff via a webinar. The final report and Appendices are expected to fully adhere to NYSERDA's Accessibility Requirements. The results and data obtained in the study should be available in an electronic Excel spreadsheet or other format negotiated by NYSERDA and the Contractor (e.g., sas, .csv, .ipynb, .py, etc.) that can be distributed without any copyright protection. If the Contractor recommends presenting findings in an additional manipulatable format, justification should be provided.

The data needs to be in a format that allows it to be readily publishable on Open NY. The proposer must prepare Open NY Dataset(s) and supporting documentation in accordance with the ITS Dataset Submission Guide. The final formatting of data will be developed in consultation with and approved by NYSERDA before project closeout.

Proposers should:

1. Provide example(s) and/or details of Tableau dashboard development experience.
2. Provide example(s) of prior written reports completed demonstrating capability to effectively communicate key insights and results, including data presentation and visualization. If possible, example reports should be submitted as hyperlinks, else they can be included in the Appendix.

Task 11: Coordinate with Other Key Data Analysis Efforts

As noted earlier, the data collected from this study will directly inform an energy efficiency potential study of the commercial building sector, as well as other NYSERDA program analyses. The NYSERDA Team will facilitate the selected Contractors coordination with NYSERDA's Policy, Analysis & Research group which leads analysis of energy efficiency and electrification potential in the State's buildings sector to ensure that the data outputs of this study seamlessly feed into subsequent potential studies. The Contractor shall review the potential analysis data requirements, make themselves available for meetings to discuss how data from this study will be used in the potential analysis, and generally maintain a level of awareness and support for the potential analysis as needed to help ensure success. Further, it is expected that other internal stakeholders will leverage the data outputs and insights resulting from the CBSS.

Proposers should:

1. Outline how they will ensure data coming out of the CBSS can be integrated into other research efforts and projects.

Task 12: Data Destruction

Upon conclusion of the project (or contract in the case of multi-year studies), and after transferring all data files to NYSERDA, any confidential utility customer data used as part of the project must be destroyed by the Contractor and the Contractor shall countersign a letter to NYSERDA certifying this has occurred. All other data associated with the project and stored on the Contractor's systems must also be destroyed by the Contractor and the Contractor shall send NYSERDA an e-mail stating this has occurred.

IV. Contractor's Responsibility

The selected Contractor will assume overall responsibility for the timely completion of the requirements described in the Services Requested section of this RFP and the resulting Statement of Work while adhering to the approved project budget and schedule. The Contractor is expected to provide prompt invoices and/or expense reports via Excel, tracking effort and spending per task. The Contractor will provide detailed and comprehensive reports on each project and major activity as it is completed. These reports will detail any issues or problems that arise, along with the Contractor's proposed solution. The selected Contractor will employ good data documentation procedures to ensure that NYSERDA can replicate the study in the future and analyze changes over time. In addition, the selected Contractor will provide all datasets and analysis from data collection activities. The structure and delivery of these datasets will be determined upon further discussion between NYSERDA and the selected Contractor.

V. Available Funds, Limitations, and Option to Renew

As noted above, this funding opportunity provides the maximum of \$8,000,000 to encompass the initial CBSS assessment and one update. The initial project timeline is two years. The opportunity to exercise one option to renew for an additional 2 years is at the sole discretion of NYSERDA. NYSERDA reserves the right to extend and/or add funding to the Solicitation should other priorities arise, or program funding sources become available. If approved by NYSERDA, the Contractor shall conduct the second iteration of the commercial building stock assessment. In addition to the proposal requirements for this CBSS Proposers should provide an updated scope, estimated timeline, and budget to replicate the study following successful completion. It is expected that the renewal will create budgetary and timeline efficiencies. NYSERDA reserves the right to advance or not advance, or to modify, the renewal plan.

VI. NYSERDA Responsibility

The NYSERDA Project Manager(s) will be responsible for overseeing and managing all tasks undertaken by the selected Contractor, including but not limited to reviewing, commenting upon and approving tasks and subsequent deliverables; coordinating with the project collaborators on such reviews and decision-making; promoting coordination between the selected Contractor and various project stakeholders, as needed; and approving invoices promptly.

VII. Proposer Qualifications

This study will require the selected Contractor to fully understand the breadth and depth of the portfolio of NYSERDA and utility-administered commercial programs, program and portfolio interactions and relationships, utility territories, and affected markets. The selected Contractor should plan on reviewing secondary data sources mentioned in this RFP, as well as evaluation reports that have been conducted for NYSERDA and utility programs.

Bidders may form interdisciplinary teams to meet project goals as needed. Teams may consist of a variety of entities possessing program evaluation, market research and field data collection expertise, including, but not limited to experts in the commercial building stock in New York State; industry associations; government organizations; universities; research organizations; or others. Multi-disciplinary expertise and experience in working with the commercial building stock and associated energy uses will be necessary to complete the complex project requirements.

In addition to the services described in the Scope of Services to be Provided above, the following must also be fulfilled by the selected Contractor:

Working Group Facilitation

- Demonstrate the expertise and capability to effectively and efficiently manage multiple groups of stakeholders in the shared goal of reaching consensus on specific details related to data points, sample design, and other points of foundational importance to this study.
- Demonstrate expertise and capability to clearly communicate and document questions and decisions resulting from fast-paced technical discussions in a timely manner.
- Demonstrate thoughtfulness on the construct of Working Groups, including potential members of the Working Groups.

Energy End Uses and Fuel Type Coverage

- Demonstrate the expertise and capability to evaluate a broad range of building science and energy-related end uses including electric, natural gas, fuel oil and propane energy efficiency equipment; clean energy, beneficial electrification, electric demand reduction end uses; on-site generation (including renewables); and building- related climate resilience.
- Demonstrate the expertise and capability to collect and analyze clean heating and cooling equipment (e.g., air source heat pumps, geothermal (ground source) heat pumps, and heat pump water heaters (hybrid water heaters) used in commercial heating and cooling applications in New York State.

Audience Coverage

- Demonstrate the experience and capability to work with, and conduct analysis for, a wide variety of energy users within the commercial sector as defined in this RFP.

Technical Support Requirements

- Demonstrate technical expertise and capability to design study and evaluation plans and carry out all associated work. Past projects relevant to supporting knowledge and experience in baseline evaluation activities and field work experience shall be included and summarized in the proposal.
- Demonstrate technical expertise in survey and interview guide design and development through an understanding and application of survey design principles related to

appropriate wording of survey questions, length of survey, survey structure, etc. Past projects relevant to supporting knowledge and experience in survey design and development shall be included and summarized in the proposal.

- Statistical software expertise in SAS, R, or equivalent platforms. Demonstrate expertise in appropriate statistical analyses and interpretation of various statistical tests associated with survey or other data.
- Prefer that the selected Contractor is efficient in Qualtrics survey design and implementation.
- Computer software proficiency in MS Excel, MS PowerPoint, MS Word, MS Teams, etc.

VIII. Proposal Requirements

The proposal must include the information requested within the Scope of Services Requested, be presented in the format detailed and include the attachments listed below.

Introduction and General Information (up to 2 pages)

Proposers shall summarize their understanding of the objectives and requirements of this RFP. Proposers shall briefly identify key information about their organization and any other organizations that are part of the proposer's team. Proposers shall describe how the organization or team is qualified to perform and complete the services requested under this RFP.

Statement of Work and Approach (maximum of 13 pages)

The Statement of Work must be consistent with the deliverables and schedule outlined in this RFP. This section should be organized by Task as broken out in the Services Requested section above. Provide a plan of how you will assist NYSERDA in designing and implementing the tasks and evaluation activities outlined in this RFP and a timeline for completing these activities. Describe the actions you will take to complete each task, highlighting innovative approaches that maximize efficiency and accuracy. Proposers must provide the initial 2-year CBSS plan, budget and schedule. Further, the proposal should also include a plan, general timeline and budget to replicate and renew the study following successful completion of the initial assessment. It is expected that the renewal will create scope, budgetary and timeline efficiencies. NYSERDA reserves the right to advance or not advance, or to modify, the renewal plan.

Management Structure (maximum of 2 pages)

Proposers shall identify all team members, including the Principal or Lead contact, who will be responsible for ensuring that all deliverables and ultimate projects are timely and of good quality, as well as a backup lead person should this need arise. Provide a clear description of the roles and responsibilities of each key person in completing the work plan, including subcontractors and subject matter experts. Provide the names and addresses of subcontractors. Provide an organizational chart and discuss how you would structure the team to efficiently and effectively meet the needs of NYSERDA and other project collaborators to conduct the evaluation activities covering a broad range of geographic regions, data inputs and analytical approaches. Describe how you plan to coordinate the design and implementation of the study among all team members/subcontractors and with NYSERDA. Include your proposed approach to convening and managing working groups. Discuss how you would manage deliverables according to the timeline while maintaining flexibility to accommodate in-field learnings.

Qualifications, Experience, and References to Similar Projects (maximum of 5 pages)

Describe specific experience pertaining to this type of evaluation work. Discuss proposed teaming arrangements, if applicable. State the team's individual and combined expertise that

would enable successful completion of the project. List, link to, and briefly describe relevant projects that have been completed by the proposer/proposing team. Include specific examples of prior work involving expert longitudinal evaluation design, data collection including field work, image analysis, data analysis, reporting of findings as well as interpretations and recommendations related to this work. Indicate which team members were responsible for each project element described. Resumes of key personnel shall be provided in an appendix. Indicate the name and contact information for at least three references for whom your organization, or proposed teaming arrangement if appropriate, has recently completed similar, relevant projects. Summaries of related work products and other supporting materials that demonstrate your ability to complete the work requested in this RFP may be submitted as attachments to your proposal in addition to embedded links.

Potential Conflicts of Interest (maximum of 1 page)

The firm and any personnel of the firm must be free from any financial or similar interest in any product or service which may conflict with or appear to conflict with the objectivity of the services provided to NYSERDA. Please describe all product, manufacturer, or service-related affiliations. Fully discuss possible conflicts of interest, actual and perceived, which could arise in connection with performance by team members of the proposed contract.

Describe how your firm would resolve conflicts of interest. In the event that NYSERDA determines that a team member may have a conflict of interest or the appearance of a conflict of interest, NYSERDA may: (1) take this into consideration in evaluating the proposal; (2) exclude the proposer from consideration for an award; (3) adjust the scope of work to avoid the conflict or appearance of conflict; or (4) negotiate other appropriate actions with the team member to avoid the conflict or appearance of conflict. Non-disclosure of any affiliation can result in the termination of a contract, if awarded.

Project Schedule (1 page maximum)

This RFP outlines a major, comprehensive study effort that will take significant time to complete. Final study results need to be delivered and all tasks identified in this RFP completed no later than **24 months from when the contract is executed**. Project deadlines for stated deliverables will be rigorously enforced. More aggressive schedules will be given special consideration during proposal evaluation as long as proposers present sufficient evidence that they possess and can dedicate the resources to accomplish the tasks and deliver rigorous results on the timeline proposed, taking into account the complexities and possible roadblocks that can arise in conducting a study of this magnitude. The convening and administration of working groups should be clearly accounted for in the project timeline. The seasonal nature of heating and cooling seasons should also be addressed. Proposers should provide an updated scope, estimated timeline, and budget to replicate the study following successful completion if the initial assessment. It is expected that the renewal will create budgetary and timeline efficiencies. NYSERDA reserves the right to advance or not advance, or to modify, the renewal plan.

Proposals must include a detailed schedule, including dates by which the following major study milestones will be completed:

- Kick-off Meeting
- Review of Existing Data
- Data Framework
- Working Group Administration
- Sample Design
- Finalize Work Plan
- Completed Phone and Web Surveys
- Site Inspections
- Final Report and Data Delivery

Project Budget (2 page maximum)

Proposers should provide the initial 2-year project budget and timeline and the budget to replicate the study following successful completion, should NYSERDA authorize the 2-year option to renew. It is expected that the renewal will create scope, budgetary and timeline efficiencies. NYSERDA reserves the right to advance or not advance, or to modify, the renewal plan.

Substantial consideration will be given to cost-efficiency and competitive pricing in the proposal review and scoring. Working group administration should be clearly accounted for in the budget. Bidders are to include all fully loaded costs associated with this RFP in their bid price. To evaluate the cost component of each proposal, NYSERDA requires that a budget (in Excel format) be developed that uses the bidder's proposed sample sizes in this RFP for Task 8: Survey Data Collection and Task 9: Conduct Site Observations. Using Attachment A - Contract Budget Form and Instructions as a template, submit the name, title, and fully burdened hourly rate for the project for everyone proposed to perform the work outlined in this RFP. Use the Contract Budget Form to provide overhead multipliers for the duration of the project.

Attach documentation to support indirect cost (overhead) rate(s) included in your proposal as follows:

- Describe the basis for the rates proposed (i.e., based on prior period actual results; based on projections; based on federal government or other independently approved rates).
- If rate(s) is approved by an independent organization, such as the federal government, provide a copy of such approval.
- If rate(s) is based on estimated costs or prior period actual results, include calculations to support proposed rate(s). Calculation should provide enough information for NYSERDA to evaluate and confirm that the rate(s) are consistent with generally accepted accounting principles for indirect costs.

NYSERDA reserves the right to audit any indirect rate presented in the proposal and to make adjustment for such difference. Requests for financial statements or other needed financial information may be made if deemed necessary. A payment based on the final deliverable will be reserved until project completion. If awarded, NYSERDA may choose to negotiate the amount of such payment.

Additionally, if there are any significant direct costs associated with conducting the on-site fieldwork requested in this RFP, please provide a detailed schedule of those costs in your proposal. Incentives are often utilized to encourage participation and improve response rates when conducting primary data collection. Proposals must outline the survey incentives expected to be given for each survey and each respondent group, the justification for the incentive decision, and the total incentive cost.

The Proposer is encouraged to provide hyperlinks to supporting information, including but not limited to examples of similar work, writing styles, and presentation of similar data and scope

requested here. Unnecessary attachments or broken hyperlinks beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal.

In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non- Responsibility.

IX. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below, listed in order of importance. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview.

NYSERDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- The degree to which pricing and hourly rates are in line with the rest of the market.

Responsiveness to the RFP

- Does the proposer present a sound understanding for delivering the services requested in this RFP?
- Does the proposer appear to have the flexibility to accommodate potentially short notification times, tight deadlines, and tight turnaround times?
- Do the proposed methods thoroughly address stated objectives?
- Is the inclusion of any optional tasks supported by sufficient justification?
- Is there information provided by references, such as letters of support from and electronic references to and examples of past projects?
- Is the proposal concise, well-organized, well-written, and complete?

Comprehensiveness of Approach and Management Plan

- Commercial Statewide Baseline Study (CSBS) Review and Longitudinal Methodology: Demonstrates clear understanding of the 2021 CSBS methodology. Proposes enhancements while ensuring the proposed methodology, including enhancements, yield rigorous longitudinal results.

- **Working Group Approach and Facilitation:** Proposes a solid strategy for identifying Working Group members, administering Working Groups, including management of tasks, time, and budget.
- **Commercial Building Science, Energy Program and Fuel Type Coverage:** Demonstrates the expertise and capability to evaluate a broad range of building science and energy-related end uses including electric, natural gas, fuel oil and propane energy efficiency equipment; clean energy, beneficial electrification, electric demand reduction end uses; on-site generation (including renewables); and building-related climate resilience.
- **Data Strategy, Collection, Management and Analysis:** Proposes preliminary recommendations as to which types of datapoints may be collected through self-reporting and which require validated observation; Suggests preliminary datapoints related to Clean Heating and Cooling, Resiliency, Affordable Housing, and Disadvantaged Communities; Demonstrates a solid methodology for data collection, storage, and management (this includes the ability to craft appropriate survey instruments, conduct interviews, and manage on-site/virtual inspections); Demonstrates a data management plan that is innovative approaches while ensuring the data is accurate, complete, consistent, and valid throughout its life cycle. Primary data collection includes quality assurance, quality control, and error mitigation and remediation strategies; and demonstrates a solid methodology for ensuring that data coming out of the CBSS can be integrated into other research efforts and projects.
- **Proposed Incentive Structure and Engagement Strategy:** Proposes an innovative and cost-effective approach to engaging respondent groups, and proven methods of providing (monetary and non-monetary) incentives to increase survey response rates and participation in primary data collection activities, including but not limited to surveys, remote and/or on-site inspections.
- **Risk Mitigation:** Demonstrates understanding of the NY commercial buildings sector, specific challenges or barriers that may be faced when implementing the proposed scope and proposes approaches to overcome them.
- **Timeline:** Demonstrates the ability to address the scope and submit deliverables on an appropriate timeline that accounts for potential challenges (seasonal timing, response rates, etc.).
- **Advanced Metering Infrastructure (AMI) Data & Analysis (Optional Task A):** Demonstrates the ability to collect, process, and/or analyze AMI data, demonstrates a solid methodology for AMI data analysis procedures and identifies research goals which could be cost-effectively furthered by the incorporation of AMI analysis.

Relevant Experience and Qualifications: Experienced organization and team that demonstrates organizational or individual subject matter expert experience in conducting similar work including, but not limited to, building stock assessments, primary data collection instrument design and implementation, on-site data collection, working group facilitation, data strategy and management; Provides examples of similar studies of the same or similar scope and magnitude; Demonstrates understanding of NYSERDA's data tracking, reporting, communication needs and requirements; and Demonstrates project management experience and provides qualifications, experience, and expertise of key personnel in relevant research and study evaluations.

Cost: Proposal allocates an appropriate proportion of project cost dedicated to program completion (versus travel, equipment, and administration); provides experienced staff performing appropriate tasks at industry comparable rates; demonstrates reasonableness and relative competitiveness of fully burdened labor rates and

escalation rates, and includes innovative processes, structure, or methods to reduce implementation and operation costs. The proposal is supported by the initial budget and timeline, and a budget to replicate the study following successful completion of the initial iteration, noting where the renewal will create budgetary and timeline efficiencies.

References and Other Items

- Does the proposal offer economic benefits in New York State (a local office, while not required, would be considered favorably)?
- Does the proposal include participation of certified minority-and women-owned business enterprises and the employment of minority group members and women in the performance of this scope of work?
- Does the proposal include participation of certified service-disabled veteran-owned business enterprises (SDVOB) and the employment of service-disabled veteran members in the performance of this scope of work?

X. General Conditions

Proprietary Information: Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992: It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business 625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division 625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k: NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include

making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a: NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award: NYSERDA anticipates making one award under this solicitation. NYSERDA anticipates a contract duration of 2 years with one 2-year option to renew, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately 4 weeks from February 5, 2025, whether your proposal has been selected to receive an

award. Upon receipt of this notification, a proposer can request to schedule a debrief on the selection process and the strengths and weaknesses of its proposal by contacting the Designated Contacts: Cory Blad, Project Manager and Tracey DeSimone, Project Manager by e-mail at NYSERDA.CBSS@nyserda.ny.gov. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements: NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the Doing Business with NYSERDA page or download NYSERDA's Accessibility Requirements [PDF].

Limitation: This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement: The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect: The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law: For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements.

During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence: NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal.

Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols: Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and

that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Information Security: The NYS Office of Information Technology Services (ITS) establishes and regularly updates policies, standards, and guidelines for information security (collectively referred to as "ITS Security Policies") for State Entities, including NYSERDA. Contractors, vendors, and solution providers conducting work on behalf of NYSERDA including, but not limited to, application development, web development, hosting, or managing NYSERDA's sensitive data are required to comply with the NYS requirements. These requirements include, but are not limited to, the NYS Information Security Policy NYS-P03-002 which sets forth the minimum requirements, responsibilities, and accepted behaviors to establish and maintain a secure environment

and achieve the State's information security objectives. Contractors that manage NYSERDA's data outside of NYSERDA's systems with a High or Moderate rating as per the NYS ITS Information Asset Identification Worksheet must comply with the following requirements.

High Rating	Moderate Rating
• Maintain up-to-date SOC 2 Type 2 Assessment Report and provide to NYSERDA upon request. • Maintain Cyber Security Insurance • Provide a signed self-attestation on an annual basis for multiyear contracts	• Maintain Cyber Security Insurance • Provide a signed self-attestation on an annual basis for multiyear contracts

Attachment A – Contract Budget Form and Instructions

Attachment B – Sample Agreement (Exhibit A - template statement of work)

NYSERDA

New York's Innovation Ecosystem Strategy

Request for Proposal (RFP) 6029

Up to \$ 900,000

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Proposals Due: **July 21, 2025**, by 3:00 p.m. Eastern Time*

Program Summary: The New York State Energy Research and Development Authority (NYSERDA) seeks one or more contractors or teams of contractors to assist NYSERDA with developing strategies and recommending future investments and programs to increase the effectiveness of New York State's energy innovation ecosystem in advancing new technologies to market adoption.

Only (1) award will be made by NYSERDA. Prime contractors are strongly encouraged to enter into teaming arrangements to ensure that all requested elements are provided.

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide \[PDF\]](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx)" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are: Richard Bourgeois at (518) 862-1090, ext. 3484 or by e-mail rfp6029@nyserda.ny.gov or Anna Nix by e-mail rfp6029@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or by email at NancySolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see [Solicitation Proposal and Vendor Responsibility Questions.pdf](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx) for a complete list of the questions proposers must answer as part of a submission. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

NYSERDA's Innovation and Research business unit ("Innovation") focuses on advancing clean energy technologies and companies that contribute to the state's clean energy economy. Innovation seeks to accelerate market transformation via initiatives that identify, mitigate, and remove barriers to clean energy technology deployment, supporting clean energy technology solutions and innovative business models across technical focus areas such as energy end use, clean transportation, power generation and storage, grid modernization, advanced fuels, and thermal energy research.

NYSERDA seeks to engage a consultant, or team of consultants, for a period of up to two (2) years for a comprehensive study of New York State's energy innovation ecosystem. The successful proposer will assemble an advisory committee of independent experts in innovation, hold advisory meetings, and perform analysis and assessments of New York's existing innovation ecosystem compared to other national and global models. Through this work, the successful proposer will make a series of recommendations to NYSERDA including visionary objectives, potential strategic partnerships, and proposed definition, scope, partners, and budget for future programs that will fully utilize New York's innovation ecosystem to support the state's climate and energy goals, driving economic development and securing access to affordable clean energy for all New Yorkers.

II. Program Requirements

A. Services Requested

NYSERDA seeks to contract with one consultant or a team of consultants to support this program.

Proposers should pay careful attention to the skills, qualifications and services required for each element. Due to the breadth and complexity of this solicitation, teaming arrangements are strongly encouraged to ensure that all requirements of the services requested are fully addressed.

Innovation Advisory Committee

In evaluating the New York State innovation ecosystem, NYSERDA seeks advisement from experts with expertise in exemplary innovation ecosystems throughout the United States, and globally. An Advisory Committee made up of such experts can advise NYSERDA on best practices, models for collaboration, institutional frameworks, policies, support and financing arrangements, and other features of successful innovation ecosystems.

The selected proposer will select a group of experts knowledgeable in leading US and international innovation ecosystems. The proposer will then engage with those experts, subject to NYSERDA approval, to form an Innovation Advisory Committee that will meet as required over the course of the project for the strategic discussions necessary to inform the objectives and proposed future initiatives of this program.

The selected proposer will be responsible for recruiting, supporting, and managing this Committee including scheduling meetings, preparing materials and facilitating said meetings, recording the results, communicating summaries and analysis to NYSERDA, and incorporating the Committee's insights into the other activities and strategic planning work of this program.

Ecosystem Assessment and Comparative Analysis

Prior to this program, NYSERDA Innovation and others have performed studies on New York's energy innovation ecosystem. Additional studies will be needed to complement this existing body of work, specifically an analysis of the downstate (New York City, Long Island, and lower Hudson Valley) ecosystem and the relationship and connection of those regions to other regions of New York State.

These studies will communicate an overview of relevant ecosystem participants and their relationships to each other, including entities such as universities, incubators, accelerators, business startups, venture capital and other financing resource, R&D facilities, and public and private funders of innovation.

The successful proposer will generate presentation materials clearly and visually describing these regional ecosystems, assessing their performance and efficiency, and highlighting potential gaps and obstacles in the ecosystem including lack of funding availability, insufficient collaboration between participants, inadequate infrastructure or workforce, or other relevant measures.

Initial Findings and Recommendations

NYSERDA serves in a key convening role for New York's innovation ecosystem, working and partnering with others to advance new energy technologies to market. An important outcome of this program will be recommended initiatives that NYSERDA and others in the state can pursue to maximize the efficiency and effectiveness of its energy innovation ecosystem.

The successful proposer will work from prior analysis products, input from the Advisory Committee, and new analysis conducted as part of this program to develop an initial set of strategic findings. These findings will describe gaps, barriers, and opportunities in New York's innovation ecosystem relative to other exemplary or ideal models. It is expected that many of these initial findings will focus on local and regional actions that can be taken to address inefficiencies in policy, access to resources and human capital, regional collaboration, and other factors that inhibit energy innovation.

Working from the initial findings, the successful proposer will generate a list of possible initiatives for NYSERDA and New York State to pursue that address the issues surfaced. These initiatives will be described as visionary objectives that, if pursued, will address gaps and barriers to fully utilize the ecosystem's strengths and capabilities in advancing energy innovation and technology adoption.

Initiative recommendations will be framed in terms of their scope, cost, and potential impact, giving appropriate numerical measures wherever possible—for example budget dollars, number of jobs created, number of new products introduced, etc.

Strategic Partnerships, Teams, and Stakeholders

The successful proposer will recommend and prioritize strategic partnerships between NYSERDA and others in the state ecosystem, as well as between other elements of the ecosystem, necessary to achieve the objectives outlined in the Initial Findings and Recommendations. As part of this work, the proposer will outline these partners' roles in working together to maximize ecosystem effectiveness, as well as recommended activities for the Advisory Committee and its members to facilitate cooperation.

The proposer will also identify key stakeholder groups across the ecosystem who should be engaged in discussion regarding the proposed ecosystem initiatives and develop a preliminary communication and engagement strategy for these stakeholders to provide inputs in the strategic planning process. This work will be critical to finalize and gain statewide support for the proposed initiatives.

B. Proposer Eligibility and Qualifications

NYSERDA anticipates awarding one contract to one contractor, or a team of contractors, through this RFP. If forming teams, proposers must clearly identify the primary contractor, key employees, subcontractors, and relevant affiliates of all entities who are proposed to fulfil the requirements of this RFP. Even if a proposer includes a teaming arrangement with third parties in its proposal, the proposer will retain sole responsibility for successful completion of the work under the resulting contract.

Proposers must demonstrate that they have a clear understanding of the services described in this RFP. Proposers must also demonstrate the ability to provide all of the required services as outlined in this RFP. Proposers must provide all of the support services requested above. NYSERDA aims to award a single contract to one proposer or to one team of proposers, with a single contractor serving as prime.

Proposers must be available to start work **no later than August 18, 2025**

Experienced Team

Proposers must clearly demonstrate their ability to provide the necessary technical expertise and administrative support described in this RFP. The selected contractor or team of contractors will provide NYSERDA with a dedicated team of high-level professionals qualified to undertake the requested services.

Dedicated Personnel

Proposers must identify one qualified team member who will be responsible for leading the work in this RFP and additional personnel who will support the team lead. The identified personnel must have previous experience in the services requested under this RFP.

C. Contract Term

The contract term is anticipated to be approximately 24 months (2 years). At its sole discretion, NYSERDA may elect to add funding and/or extend the term of the contract.

NYSERDA has the right to:

- Incorporate necessary program changes by modifying or adding to the services required for successful support of the program, consistent with the terms of this RFP;
- Tailor the services as needed within the scope of the contract; and,
- Add necessary additional funds and time to the contract at any time.

III. Proposal Requirements

Proposers must submit their proposal(s) by the due date in accordance with the instructions described in this RFP. Proposals must adhere to the maximum length requirements for each section as given below.

Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. Page limits for each section are provided below in parentheses. Proposals that exceed the page limits or fail to follow the format guidelines may be rejected as nonresponsive.

Proposals should concisely present the information needed to fully address the evaluation criteria (see Section IV). Each page of the proposal should state the name of the proposer, the RFP number (RFP 6029), and the page number. If you believe proprietary information must be submitted to present an adequate proposal, please contact the Designated Contact listed at the beginning of this RFP, indicate as such on the proposal, and comply with the Section V requirements for submitting proprietary material.

The proposal must be a **single file**, unless otherwise noted, with the items in the format and sequence indicated below:

Section 1: Introduction and Proposal Narrative
Section 2: Statement of Work (separate Attachment A)
Section 3: Staffing Plan
Section 4: Qualifications
Section 5: Cost Proposal (separate Attachment B)
Section 6: Schedule/Work Plan
Section 7: Letters of Commitment (if applicable)
Section 8: Appendices

Section 1. Introduction and Proposal Narrative (2-3 pages): This section must include a narrative of how the proposer intends to complete the required services described under Section II.A. Proposers should briefly identify key information about their organization and any proposed subcontractors. Describe any other additional resources the proposer can bring to the project, such as cost-sharing funds or materials already developed, and how they would be used to advance the project goals. Proposers should describe why they believe that they are qualified to perform and complete the services requested under this RFP.

Proposers should include the following:

- How the proposer intends to complete the required elements described above, including a detailed project plan describing tasks and resources needed to complete the deliverables
- References to examples of existing reports, white papers, and other materials that provide evidence of similar past experience
- Any other additional resources the proposer can bring to the project, such as cost sharing funds or tools already developed, and how they would be used to advance the project

Section 2. Statement of Work (4-6 pages): Submit a proposed Statement of Work delineating each step required to accomplish the project objectives. The Statement of Work (SOW) is the primary contractual document that outlines work activities and specifies deliverables. Therefore, each action needs to be identified, indicating who will perform it, how it will be performed and its intended result. At the end of each task description, specific task deliverable(s) must be listed. Deliverables are documentation that the contractor will submit to NYSEDA as evidence that the work in the task has been completed.

The SOW should highlight how the proposer will deliver services. If a proposal is selected, NYSEDA may choose to move forward with some tasks but not others, based on in-house capabilities, timing, and available budget. Because of this, proposals should be constructed as a menu of tasks, with clearly assigned budget estimates for each task.

NYSERDA has provided a sample Statement of Work (Attachment A). The proposer is strongly encouraged to use this template and may adapt it as needed. Significant departures from the provided template may result in delays in the negotiation process and the start date of work. NYSERDA reserves the right to make changes to the proposed Statement of Work to meet the needs of the program. The Statement of Work must:

- Read as a stand-alone document that identifies assumptions and detailed descriptions of tasks, ideally in chronological order.
- Be clear and specific: concentrate on “how” and not “why.” Use “active voice” sentence structure to make clear who is responsible for specific actions. Use the following phrase to start the description of every task and subtask: “The Contractor shall....”, and “The Contractor shall ensure that [Subcontractor Name] ...”
- Include information regarding subcontractors.
- Include a timeline and connect to the requested work plan.

Section 3. Staffing Plan (2-3 pages): Provide an organizational structure that facilitates effective leadership and quality staff services. Identify teaming arrangements, if applicable, between the firms comprising the proposal team. Identify the main point of contact for NYSERDA and key participants in the project. Describe their individual expertise and explain how each will contribute to the work. Describe the team’s management and technical expertise and relevant experience with the work described under Section II.A. Please include an organization chart showing the relationship between all personnel and subcontractors.

Resumes of key personnel highlighting relevant experience should be included as appendices. Resumes are not included in the page total.

Section 4. Qualifications (1-2 pages): Describe how the Proposer’s staff and other team members meet the required experience, skills, and abilities to perform the services described under Section II.A of this RFP. State the individual and combined expertise that would enable successful completion of the objectives outlined in this solicitation. Provide relevant background information demonstrating the ability to successfully provide the required services, including prior experience with this type of work and any tools and templates that may already be developed. Cite specific examples of previous relevant projects.

Section 5. Cost Proposal (1-2 pages): Submit a proposed total project budget, itemized by task, including cost elements and subcontractor costs (if applicable) using the attached Budget Form (see Attachment B). Labor rates should be inclusive of any overhead. In the case of subcontractors, explain in the Supporting Schedule of the Budget any administrative hours needed to manage subcontractors and include those hours in the direct labor category. NYSERDA does not accept a percentage-based mark-up on subcontractors (see the Instructions tab of Attachment B).

Cost Share

Cost-sharing is encouraged but not required. Cost-sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered “cash” contributions. Unpaid labor may be considered “in-kind” contributions. NYSERDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred. Show the cost-sharing plan in the following format:

	Cash	In-Kind Contribution	Total
NYSERDA	\$	\$	\$
Proposer	\$	\$	\$
Others (list individually)	\$	\$	\$
Total	\$	\$	\$

Section 6. Schedule/Work Plan (1-2 pages): Submit a schedule for conducting the work proposed in the SOW in a Gantt chart or similar format in terms of weeks and months. Specifically address the plan for commencing work no later than August 18, 2025. Proposers should allow time for correspondence with and approval of tasks by NYSERDA. Note that hours allocated in the work schedule must be consistent with those in the budget and Statement of Work.

Section 7. Letters of Commitment: If proposers are relying on any other organization to do some of the work or provide services or resources, include a letter from that organization describing its planned participation. Absence of letters of commitment may be interpreted as meaning that the proposer has not secured a firm commitment from the subject parties.

Section 8. Appendices: Include resumes, company qualifications, sample work products, or ancillary information which is deemed necessary to support your proposal. Keep appendices to a reasonable length. In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

IV. Evaluation

Scoring Criteria

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Scoring Criteria outlined below. NYSERDA reserves the right to potentially interview proposers to address any potential questions or clarifications presented in the proposals.

Proposer Qualifications:

- Ability of the proposed team to bring relevant experience, tools, subject matter expertise, and the organizational capacity to successfully complete all requested services.
- Selection of a proposal team and teaming arrangements with sufficient capacity and expertise to fully address each of the requested service areas.
- Experience of the team at conducting projects similar to the project described, including for NYSERDA. For those proposers who have worked in any capacity with NYSERDA, the quality of work on those transactions may be considered.

Services Requested:

- Demonstrates an understanding of the range of services requested and presents a workplan that responds to the requested services.
- Clearly identifies the specific expertise of team members and subcontractors applicable to each requested service area.
- Presents a credible explanation of its ability to successfully deliver these services.
- Provides appropriate and creative ideas for approaching the project.

Proposal Quality:

- The clarity, organization, and overall quality of the proposal, including Proposal Narrative, Statement of Work, and Staffing Plan.
- Demonstrates the ability to address NYSEDA program needs and deliver high-quality work on tight deadlines.
- Commits and shows a demonstrated ability to starting work no later than August 18, 2025.

Proposal Value:

- Demonstrates the level of service provided is in line with the proposal cost.
- Allocates an appropriate proportion of project cost dedicated to project completion (versus travel, administration, or other expenses).

NYSEDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- 1) The degree to which pricing and hourly rates are in line with the rest of the market.

V. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSEDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSEDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSEDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSEDA-Regulations.ashx>. However, NYSEDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSEDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx> . Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSEDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSEDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEDA, the prospective contractor must also certify to NYSEDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSEDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf> .

Contract Award - NYSEDA anticipates making one award under this solicitation. NYSEDA anticipates a contract duration of up to two (2) years, unless NYSEDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each application should be submitted using the most favorable cost and technical terms. NYSEDA may request additional data or material to support applications. NYSEDA will use the Sample Agreement to contract successful proposals. NYSEDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSEDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSEDA expects to notify the proposers in approximately two (2) weeks from the proposal due date whether your proposal has been selected to receive an award. NYSEDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSEDA agreement.

Accessibility Requirements - If awardees from this solicitation will be posting anything on the web, or if the awardee will produce a final report that NYSEDA will post to the web, the following language must be included. NYSEDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSEDA's Accessibility Requirements on the [Doing Business with NYSEDA page](#) or download [NYSEDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSEDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSEDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEDA's best interest. NYSEDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSEDA

reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Solicitation should other program funding sources become available.*

Proposals Due: Tuesday, September 30th by 3:00 p.m. Eastern Time*

Program Summary

The New York State Energy Research and Development Authority (NYSED) seeks proposals in support of determining a multi-year record of Atlantic sturgeon presence to inform regulatory decision making associated with energy projects within the greater New York City region. NYSED seeks to negotiate one contract for acoustic receiver deployment, Atlantic sturgeon tagging, vessel use, data collection and management, receiver loss and data integrity, and data sharing and communication to achieve this goal. The awarded project should operate for at least five years.

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSED will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide \[PDF\]](#)" also located in the "Current Opportunities" section of NYSED's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are: Kate McClellan Press (Designated Contact) at (518) 862-1090, ext. 3110 or by e-mail fisheriesandoffshorewind@nyserda.ny.gov or Morgan Brunbauer (Designated Contact) at (518) 862-1090, ext. 3368 or by e-mail fisheriesandoffshorewind@nyserda.ny.gov (for technical questions). If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or NancySolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on Tuesday, September 30th. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see [Solicitation Proposal and Vendor Responsibility Questions.pdf](#) for a complete list of the questions proposers must answer as part of a submission. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSED's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

Background

New York is focused on prioritizing fiscal responsibility and ensuring affordability for all New Yorkers as part of the State's clean energy transition. New infrastructure will be required to support energy injections and other technologies that will be used to cost-effectively transition New York's energy systems.

NYSERDA, working with DPS and other New York State agencies, published the New York Offshore Wind Cable Corridor Constraints Assessment (Assessment) in 2023¹. The Assessment identified several potential constraints to transmission cables connecting into New York City, including the presence of threatened and endangered species and sensitive habitats. NYSERDA confirmed this to be a constraint of concern through RFI 5925, which identified additional data on the presence of Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) as providing valuable and time-sensitive information to support decision-making on project work windows.

Predevelopment Research

The State has taken a proactive approach to advance responsible and cost-effective offshore energy deployment by investing in predevelopment activities and stakeholder engagement. For example, in 2019, NYSERDA deployed two metocean buoys more than 40 miles off New York's coast in Bureau of Ocean Energy Management (BOEM) Draft Wind Energy Areas (WEAs) to collect data for two years. NYSERDA has also funded digital aerial surveys for wildlife over three-years at a planning level, collecting more than 3.5 million images and providing broad scale contemporary data about the seasonal, interannual, and spatial distributions of wildlife in the New York Bight. In 2020, NYSERDA invested in planning level geophysical investigations of BOEM Draft WEAs to understand site conditions. Data collected from predevelopment surveys has been used by developers to reduce leaseholder uncertainty at the time of offtake to reduce the cost of offshore wind energy and accelerate deployment.

This RFP seeks to conduct predevelopment research to better characterize Atlantic sturgeon presence in and around the New York Harbor where energy infrastructure may be sited and associated onshore development activities may occur.

Atlantic sturgeon are an anadromous, long-lived species with a broad distribution along the Atlantic Coast of the US. They are highly migratory and exhibit a complex life-history that is dependent on access to both freshwater and marine environments, contingent on life-stage. Atlantic sturgeon in the New York Bight distinct population segment (DPS) have been listed as endangered under the Endangered Species Act since 2012. Mature Atlantic sturgeon migrate into the Hudson River to spawn and then return to the Atlantic Ocean. Juvenile sturgeon remain in the estuary for two to six years before entering the ocean to mature. Atlantic sturgeon are also commonly found off the coast of Long Island throughout the spring and fall. Although some direct threats to Atlantic sturgeon have been addressed (e.g. fishing and possession of Atlantic sturgeon is illegal), they face ongoing threats from entanglement in fishing gear (bycatch), habitat degradation, habitat impediments, such as dams and other barriers, and vessel strikes.

To facilitate the conservation of Atlantic sturgeon, the New York State Department of Environmental Conservation (DEC), as well as academic researchers, maintain an acoustic receiver network in and around New York Harbor and Long Island and periodically tag Atlantic sturgeon. Acoustic telemetry can be used to monitor animal presence and movements across a range of spatial and temporal scales. Individuals tagged with an acoustic transmitter that pass within the range of the receiver can provide information on an animal's presence, movements, and behavior at a fine scale. The National Oceanic and Atmospheric Administration's (NOAA) Atlantic Sturgeon Acoustic Tagging Program has provided funds for several projects to gather data and develop conservation strategies for the Atlantic sturgeon in the Northeastern US, including spawning habitat assessment, tracking marked individuals, genetics and stock assessment. Despite these tagging efforts and the network of existing receivers, the lack of information on Atlantic sturgeon presence remains a limiting factor for energy development activities and many of the deployed tags are over 15 years old and may no longer be functional which could dramatically impact data used by regulatory decision makers.

Energy construction and operation activities, including debris removal, transmission line installation and burial, cable operation and maintenance, near shore port development, and vessel operation may affect Atlantic sturgeon and their designated critical habitat. Time of year restrictions on in-water activities to avoid disturbance to protected aquatic species, such as migrating Atlantic sturgeon, are applied to energy infrastructure and port development projects to minimize their potential impacts. In constrained areas like New York Harbor and the surrounding waterways, flexibility in work windows can be a critical factor in maintaining development project schedules and budgets. Additional information on the presence of Atlantic sturgeon will provide valuable and time-sensitive information to support effective decision-making for time of year restrictions, while also maintaining a critical path for energy development activities.

¹ <https://www.nyserdera.ny.gov/-/media/Project/Nyserda/Files/Programs/Offshore-Wind/Attachment-A---Draft-Assessment-Report.pdf>

II. Program Requirements

NYSERDA requests a qualified proposer to:

- 1) Deploy a minimum of three hundred (300) acoustic tags on New York Bight DPS Atlantic sturgeon over the first two years of the project;
- 2) Collaborate with New York State Department of Environmental Conservation and other researchers maintaining existing acoustic receivers to determine locations for up to 10 new receivers in the New York Harbor and surrounding waterways;
- 3) Manage data collection for a minimum of 5 years;
- 4) Ensure that data is publicly available by following the data sharing portion of the proposal below and all data QA/QC procedures; and
- 5) Submit a final technical report to NYSERDA.

Required proposer qualifications:

- 1) Proposers must have a current ESA 10(a)(1)(A) permit to tag Atlantic sturgeon;
- 2) Proposers must have or obtain a Marine Resources License to Collect or Possess

NYSERDA reserves the right to negotiate changes to the proposed project approach, teaming arrangements, deliverables, and deliverable formats with the selected proposer. All responses submitted as part of this solicitation process become the property of NYSERDA. Careful consideration should be given before confidential information is submitted to NYSERDA as part of any proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information may be adequate for review purposes. (See Section VI below, “Proprietary Information”, for details.) Proposers will not be reimbursed by NYSERDA for any costs associated with the preparation of their proposals.

III. Proposal Requirements

The proposal should be developed to describe and address the topics identified in this RFP. Proposers may suggest alternatives or improvements to the prescribed approach. Additional materials beyond what is outlined below will not be considered. Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. The maximum length of each proposal section is shown and should not be exceeded. If the proposer wishes to provide alternative options to those presented here for consideration by the reviewers, they may be presented along with appropriate justification and sufficient cost implications. Please state in your proposal if you intend to use artificial intelligence (“AI”) for any portion this work.

Approval for any Vendor to use any AI Systems must be expressly granted by NYSERDA for any purpose whatsoever related to the Vendor’s work for NYSERDA. See [Doing Business with NYSERDA](#) on NYSERDA’s website for more information on the use of AI at NYSERDA.

Proposal Format

Proposals must be submitted as a single file PDF file, inclusive of all supporting documents. The proposal should be in document form in an 8.5x11 format, with a readable font not below 11-point, 1-inch margins, and paginated including name of the bidder and bid on the bottom of each page. The file should be 100MB or less in file size. Each page of the proposal should state the name of the proposer, “RFP 6030” and the page number. Proposals should follow the format below and provide sufficient and succinct information to complete the required descriptions and answer the questions described in Section V “Proposal Evaluation” below. The preferred length of each proposal section is shown.

The minimum contents for the response are as follows:

1. *Project Summary (up to 5 pages, citations not included in page count):* Summarize the proposed project methods and overall research design. Explain why the equipment, methods, and data management strategies and other aspects of the work are expected to be capable of meeting the study objective. Describe the extent to which these have been accepted by the scientific community and policy making organizations or otherwise demonstrated to be valid.
 - a. *Project Management:* Must include written quarterly progress reports and virtual quarterly project meetings with NYSERDA project manager(s).

- b. *Receiver Deployment:* Proposers must demonstrate an efficient manner for deployment of acoustic receivers and articulate why locations have been or how they will be selected. All attempts should be made to ensure that deployment and retrieval opportunities are efficiently scheduled to reduce unnecessary field events and maximize use of funds for additional receivers.
 - i. Proposers should pair receivers with temperature loggers to collect additional environmental site conditions
 - c. *Tagging:* Provide information on the following -
 - i. Number of tags that will be deployed and timeline for deployment;
 - ii. Planned tagging locations that increase the likelihood for maximum deployment and success of tagging opportunities;
 - iii. A plan for data collection that includes at a minimum:
 1. Effort data: location (latitude and longitude), gear used, duration of tow/soak
 2. Biological data: total length, forked length, weight (if possible), PIT tag and acoustic tag, sex (if possible)
 3. Environmental data: water temperature, salinity, dissolved oxygen, pH
 4. Acoustic tag data: tag type, serial number, tag ID, full ID
 5. PIT tag data: tag ID number
 - d. *Data Sharing:* Downloaded acoustic data must be uploaded to the Mid-Atlantic Acoustic Telemetry Observation System and Atlantic Cooperative Telemetry Network (ACT_MATOS). Detections of telemetered individuals that were tagged by other researchers must be provided to MATOS. Telemetered individuals that were tagged as part of this research project must be uploaded to MATOS with the tag identification and species and all metadata (e.g. length, weight, date of capture). Instrument metadata and tag metadata must be reported using the templates provided by ACT.⁴ Completed Instrument Metadata must be sent to admin@rwsc.org for inclusion in the Acoustic Telemetry Layer of the Regional Wildlife Science Collaborative Research Planning Map.⁵ Once data and metadata have been submitted to ACT_MATOS, the project must be set to public.
 - i. Describe if/how the proposed team will collaborate or engage with other researchers that may benefit from this data or how existing projects may be leveraged to maximize the value of this research.
 - e. *Vessel Management Plan:* The proposer must provide a short description of the approach that will be used to ensure a vessel will be available during any and all field events. This should include an approach to identify necessary backup plans if the primary vessel is unable to accomplish the field events in an efficient and seasonally appropriate manner. Efforts shall be made by the proposer to identify fishing industry vessels that have previous experience with tagging and receiver deployment activities
2. *Project Team and Qualifications (up to 2 pages)*
 - a. The staff who will interact with NYSERDA during initial contract negotiations and subsequent project management activities and their qualifications pertinent to this effort;
 - b. Any staff who would be assigned for substantive work in the deployment of receivers and tagging of Atlantic Sturgeon and their respective roles;
 - c. If the staff is not currently on board, the process and timeline for retaining needed staff members in a timely and effective manner;
 - d. Any subcontracts or outside personnel that will be used their experience and role;
 - e. The proposer must provide the CVs of existing personnel (CVs should be no more than five (5) pages in length each) for any key, current personnel who will work substantially on project. *Not included in page count.*
3. *Task Chart (1 pg)* Prepare a task chart with the number of hours of effort contributed by each of the key personnel and others involved in this project for each task and the total effort.
4. *Related Projects (up to 2 pgs)* Provide up to three related projects undertaken by the proposer and/or subcontractors. For each project, provide a brief summary with the title, scope, funding amount, and client contact numbers. NYSERDA may contact listed clients.
5. *Master Schedule (1 page)* Complete a schedule showing start and anticipated completion times for all major tasks, in terms of months after project initiation. Include anticipated major milestones and important decisions points and meetings deployment and tagging field events, publications, workshops, reports, and other key deliverables. The Schedule should be aggressive yet realistic and reflect the nature of key tasks and will be subject to revision as the effort proceeds. The length of the schedule shall not exceed the six-year contract term inclusive of any NYSERDA identified option periods. While the contractor will be expected to abide by this

schedule to the extent possible, NYSERDA recognizes the success of field activities and supply chain impacts may affect timely delivery. Any binding contractual deadlines will be established during contractual negotiations post award.

6. *Budget Form (1 page)* Proposers must provide sufficient detail in the supporting schedule for each cost element, its description, and amount to justify the budget and allow for evaluation. The proposer shall reasonably attempt to identify any project costs (marine fuel, tag or receiver supply chain, any associated data storage or management costs, etc.) that may be subject to market forces outside their control which will need further refinement during final contracting. The degree of cost-sharing will be considered in the evaluation of proposals. Cost-sharing of at least 25% is preferred.
 - a. Complete the attached Budget Form (Attachment A; Not included in page count) for the entire project, including any in-kind contributions and other cost-sharing.
 - b. A payment based on the final deliverable will be reserved until project completion. If awarded, NYSEDA may choose to negotiate the amount of such payment.

Cost sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered "cash" contributions. Unpaid labor, indirect labor, or other general overhead may be considered "in-kind" contributions. NYSERDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred. Show the cost-sharing plan in the following format (expand table as needed):

	Cash	In-Kind Contribution	Total
NYSERDA	\$	\$	\$
Proposer	\$	\$	\$
Others (list individually)	\$	\$	\$
Total	\$	\$	\$

Annual Metrics Reports – If awarded, the proposer will be required to submit to NYSERDA's Project Manager on an annual basis, a prepared analysis and summary of metrics addressing the anticipated energy, environmental and economic benefits that are realized by the project. All estimates shall reference credible sources and estimating procedures, and all assumptions shall be documented. Reporting shall commence the first calendar year after the contract is executed. Reports shall be submitted by January 31st for the previous calendar years' activities (i.e. reporting period). Please see Attachment C: Metrics Reporting Guide for the metrics that you will be expected to provide and the reporting duration. NYSERDA may decline to contract with awardees that are delinquent with respect to metrics reporting for any previous or active NYSERDA agreement.

IV. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below **listed in order of importance**. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview.

a. Project Management Plan and Qualifications

- i. Are each of the team members' roles and responsibilities clearly defined? Is there a primary point of contact designated for project management?
- ii. Are team members qualified to conduct the technical, operational, educational, or administrative tasks they will be responsible for?
- iii. Does the team have the necessary permits, licenses, and industry-standard insurances to conduct this work or a reasonable plan for obtaining them?
- iv. Does the Vessel Management Plan ensure a vessel will be available during any and all field events and that a backup vessel is identified if the primary vessel is unable to accomplish the field events in an efficient and seasonally appropriate manner?

b. Project Methods and Schedule

- i. How suitable are the proposed project methods and overall research design for meeting the project objectives and yielding accepted results?
- ii. How comprehensive, realistic, and explicit is the proposal with respect to the project objectives and proposal requirements?
- iii. Are specific measurable targets of success provided where applicable?
- iv. Are there contingencies provided with respect to staff, supply costs, vessel availability, and other risks?
- v. Is the field schedule reasonable and will data be collected for a minimum of five (5) years?
- vi. Is the data management plan clear, reasonable, and does it meet the minimum proposal requirements?

c. Cost

- i. Does the project budget have sufficient detail to understand the cost elements?
- ii. How justifiable and reasonable are the cost allocations?
- iii. Are there co-funding contributions?

d. Collaboration and Communication

- i. Is there a clear strategy for sharing data with the New York State Department of Environmental Conservation?
- ii. Does the project have a plan to coordinate with other research organizations?

NYSERDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- a. The degree to which pricing and hourly rates are in line with the rest of the market

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserdera.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making one award under this solicitation. NYSERDA anticipates a project period of five years with an additional year for project expiration for a total contract duration of six years, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately four (4) weeks from the proposal due date, Tuesday September 30, 2025 whether your proposal has been selected to receive an award. Upon receipt of this notification, a proposer can request to schedule a debrief on the selection process and the strengths and weaknesses of its proposal by contacting fisheriesandoffshorewind@nyserda.ny.gov. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Information Security: The NYS Office of Information Technology Services (ITS) establishes and regularly updates policies, standards, and guidelines for information security (collectively referred to as “ITS Security Policies”) for State Entities, including NYSERDA. Contractors, vendors, and solution providers conducting work on behalf of NYSERDA including, but not limited to, application development, web development, hosting, or managing NYSERDA’s sensitive data are required to comply with the NYS requirements. These requirements include, but are not limited to, the NYS Information Security Policy NYS-P03-002 which sets forth the minimum requirements, responsibilities, and accepted behaviors to establish and maintain a secure environment and achieve the State's information security objectives. Contractors that manage NYSERDA’s data outside of NYSERDA’s systems with a High or Moderate rating as per the NYS ITS Information Asset Identification Worksheet must comply with the following requirements.

High Rating	Moderate Rating
• Maintain up-to-date SOC 2 Type 2 Assessment Report and provide to NYSERDA upon request. • Maintain Cyber Security Insurance • Provide a signed self-attestation on an annual basis for multiyear contracts	• Maintain Cyber Security Insurance • Provide a signed self-attestation on an annual basis for multiyear contracts

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State’s Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA’s Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly

governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to,

or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Waste to Low-Carbon Fuels Pilot and Demonstration

Program Opportunity Notice (PON) 6031

Up to \$7.8 million Available

All, some, or none, of the available funds may be awarded.

NYSERDA reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

Proposals Due: January 22nd, 2026, by 3:00 PM Eastern Time

The New York State Energy Research and Development Authority (NYSERDA) announces the availability of up to \$7.8M million to support pilot-scale innovation projects that convert New York's waste streams into clean, low-carbon fuels. This solicitation seeks the most viable pathways for converting waste feedstock generated in New York State, such as Municipal Solid Waste (MSW) organics, landfill gas, wastewater sludge, agricultural residues, and point source CO₂ into low-carbon fuels that can help decarbonize the hard-to-electrify sectors which include aviation, rail, maritime transport, industry, and low-capacity factor firm resources. Eligible fuels include Sustainable Aviation Fuel (SAF), Renewable Natural Gas (RNG), Renewable Diesel (RD), and clean methanol. The scope of work will cover the project lifecycle phases from securing a final site-control agreement and feedstock supply agreement through detailed engineering, construction, commissioning, and pilot operation. Outcomes will accelerate commercialization of waste to low-carbon fuel production in New York State and de-risk scale-up.

The table below shows the required minimum cost share, anticipated period of performance and expected funding.

Total PON Funding	Minimum Proposer or External Cost Share (non-NYSERDA funding) *	Maximum NYSERDA Funding per Award	Anticipated Period of Performance (months)	Anticipated Number of Awards
\$7.8 Million	50% of total project cost	No limit	24-36 Months	1~2 awards

*The cost share percentage is based on total project cost (NYSERDA share + proposer/external cost share), not solely NYSERDA's contribution.

Proposal Submission

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Mailed or hand-delivered Proposals must be clearly labeled and submitted to:

**Jillina Baxter, Proposals, PON 6031
NYS Energy Research and Development Authority
17 Columbia Circle
Albany, NY 12203-6399**

Questions? Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Designated Contacts for this Procurement are:

- Ajay Jagdish (Designated Contact) by e-mail at PON6031@nyserda.ny.gov (for technical questions).
- If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or nancysolicitations@nyserda.ny.gov.

All Proposers should be familiar with the legal prohibitions against certain types of contacts during government procurements set forth in State Finance Law section 139-j. In accordance with that law, contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. Please see [Solicitation](#)

[Proposal and Vendor Responsibility Questions.pdf](#) for a complete list of the questions proposers must answer as part of a submission.

The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted.

If changes are made to this solicitation, notification will be posted on the “Current Opportunities” section of NYSERDA’s website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

A. Climate Act and Low-Carbon Fuels

As the U.S. energy landscape undergoes a historic transformation, New York State is committed to putting forward policies and programs that send a strong signal that public-private partnerships can catalyze economic growth and advance the State’s energy transition. The Climate Action Council’s Scoping Plan explicitly identifies the strategic use of low-carbon fuels as a key pillar for achieving sector-wide greenhouse gas (GHG) reductions, particularly in hard-to-electrify applications in transportation, industry and building.

B. NYSERDA Low-Carbon Fuels Efforts

New York’s Climate Action Council Scoping Plan highlights the need for the “strategic use of low-carbon fuels” and deeper methane cuts from waste streams to stay on track for the Climate Act’s 2030 and 2050 goals. NYSERDA’s published Renewable Natural Gas (RNG) potential studyⁱ confirms the resource: in-state landfill gas, organics, sludge, residues, and MSW could deliver 47 – 147 TBtu/Year of RNG by 2040 at weighted costs of \$11 – \$35 / MMBtu. Complementing that baseline, an ongoing NYSERDA–NREL feasibility effort is analyzing the feasibility of developing the full supply-chains—from feedstock collection through conversion and delivery of the final fuel products which include SAF, Renewable Diesel (RD), and Renewable Gasoline (RG).

On January 29, 2025, NYSERDA’s Board of Directors approved the 2025 Final [RGGI Operating Plan Amendment](#). The funding level allocated for each program during the planning period from FY24-25 through FY27-28 is presented in Table 1 on page 10, which includes a total \$24.5M for advanced fuels to “create a program that accelerates the product development of advanced feedstock conversion technologies for producing clean fuels from non-food, waste, and residue feedstocks.” This solicitation is based on funding allocated for FY25-26.

On April 2, 2025, NYSERDA issued Request for Information (RFI) 5985 to gather stakeholder input on the proposed Program Opportunity Notice. The RFI sought comments on research focus areas, teaming requirements, proposal timelines, risk-mitigation strategies, and performance metrics for pilot-scale demonstrations (TRL 5-6) and early-stage research and development (TRL 3-4) that convert New York–

sourced waste streams—landfill gas, MSW organics, wastewater sludge, agricultural residues, and captured CO₂—into low-carbon fuels such as SAF, RNG, RD, RG, and clean methanol.

On Aug. 4, 2025, NYSERDA published the [Feasibility Study for Renewable Fuel Production from Waste Resources in New York State](#), developed in collaboration with the National Renewable Energy Laboratory (NREL). The study provides an assessment of in-state waste feedstocks, existing infrastructure, conversion technology readiness, techno-economic performance, and emissions reduction potential across fuel pathways including SAF, RD, RG, and clean methanol. While not a policy document, the report is intended to inform public and private stakeholders considering alternative fuel project development in New York State.

More information about NYSERDA's efforts in low-carbon fuels can be found at: [NYSERDA Advanced Fuels Innovation - Alternative Fuels](#)

C. Federal Low-Carbon Fuels Programs and Policy

The federal government has recognized the critical role that low-carbon fuels, including Sustainable Aviation Fuel (SAF) and other waste- and biomass-derived fuels, can play in decarbonizing hard-to-electrify sectors such as aviation, heavy-duty transportation, and industrial processes. As outlined in the U.S. Department of Energy's Pathways to Commercial Liftoff: Sustainable Aviation Fuel reportⁱⁱ, the domestic SAF market is positioned for significant growth, with the potential to scale to 3 billion gallons per year by 2030 if public and private sector actions scale up. This growth is supported by a combination of feedstock availability, maturing conversion technologies, and growing demand from public and private sector decarbonization commitments.

In 2023, the U.S. Department of the Treasury and Internal Revenue Service (IRS) introduced guidance on the Section 45Z Clean Fuel Production Credit—originally established under the Inflation Reduction Act of 2022—which remains in effect. Eligible low-carbon transportation fuels achieving a ≥ 60% lifecycle GHG reduction compared to petroleum continue to qualify. Non-SAF fuels receive \$1.00 per gallon equivalent, while SAF is eligible for \$1.75 per gallon through 2025, thereafter dropping to \$1.00 beginning in 2026. Under the 2025 One Big Beautiful Bill Act, the credit has been extended through the end of 2029 and expanded to cover more fuel pathways—but it eliminates the enhanced SAF rate after 2025, requires feedstocks to be sourced from the U.S., Mexico, or Canada, and disqualifies entities deemed “Foreign Entities of Concern” from claiming the creditⁱⁱⁱ.

In 2024, the U.S. Department of Energy (DOE) Bioenergy Technologies Office (BETO) announced a funding opportunity^{iv} to support pilot-scale integrated biorefineries that convert organic waste streams—including municipal solid waste, landfill gas, agricultural residues, wastewater sludge, and captured CO₂—into low-carbon fuels such as SAF, renewable diesel and gasoline, renewable natural gas, and methanol. Additional DOE funding initiatives continue to target scale-up and demonstration of renewable fuels infrastructure and conversion technologies.

D. Alternative Fuels Partners List

Proposers wishing to find project partners may use the Advanced Fuels and Thermal Energy Innovation program's partnering platform, [the Alternative fuels partners list](#).

The platform is intended to help potential proposers find other teams with complementary capabilities when submitting proposals to NYSERDA Program Opportunity Notices issued by the Advanced fuels program. Submitting teaming information is completely optional and not required. By enabling and publishing the teaming partner list, NYSERDA is not endorsing, sponsoring, or otherwise evaluating the qualifications of the individuals and organizations.

II. Background

A. Strategic Role of Waste-based Low-Carbon Fuels in NYS

As New York advances toward the climate targets under the CLCPA and detailed in the State's Scoping Plan, the need for deep decarbonization across hard-to-electrify sectors has become increasingly urgent. While electrification will dominate in sectors like buildings and light-duty vehicles, achieving net-zero economy-wide emissions by 2050 will require alternative energy carriers for heavy-duty transportation, aviation, maritime, industrial process heat, and dispatchable power generation.

Low-carbon fuels—such as renewable natural gas (RNG), sustainable aviation fuel (SAF), renewable diesel, renewable gasoline, clean methanol, and green hydrogen—are highlighted in the Scoping Plan as critical to filling these gaps. Fuels like RNG and hydrogen can serve as firm, zero-emission resources to support grid reliability and displace fossil-fueled peaker plants, while liquid fuels like SAF and renewable diesel are essential for decarbonizing aviation and freight sectors that lack near-term electrification pathways.

The following standard definitions are used when discussing low-carbon fuels (or renewable fuels, used interchangeably) throughout this program:

- Sustainable Aviation Fuel (SAF): a drop-in jet fuel made from non-petroleum feedstocks that meets ASTM D7566 specifications and can be blended up to 50 % (depending on pathways) with conventional Jet A.^v SAF includes both bio-based SAF and e-SAF, the latter produced by reacting hydrogen with captured CO₂ or CO to synthesize hydrocarbon chains to meet the same ASTM specification.
- Renewable Diesel (RD): a drop-in diesel fuel derived from any bio-feedstock that satisfies the ASTM D975 diesel standard, enabling one-for-one substitution for fossil diesel^{vi}. This, produced by reacting hydrogen with captured CO₂ or CO to synthesize hydrocarbon chains to meet the same ASTM specification.
- Renewable Natural Gas (RNG) (or Renewable-LNG when liquified): pipeline-quality methane that is produced by various processes (upgrading biogas from anaerobic digestion or landfills or by synthesizing "e-methane" from hydrogen and captured CO₂ or CO); the final yield is a gas

interchangeable with fossil natural gas for pipeline or in the case of Renewable-LNG, interchangeable with fossil liquid natural gas (LNG).^{vii}

- **Clean Methanol:** fuel-grade methanol that meets ASTM D1152 purity specifications and is produced either from biomass sources (bio-methanol) or from low-carbon hydrogen reacted with captured CO₂ (e-methanol), providing a low-carbon substitute for fossil methanol.^{viii}
- **Biodiesel:** a fuel produced through transesterification of vegetable oils or animal fats that conforms to ASTM D6751; it can be used neat as B100 or blended with petroleum diesel in concentrations designated BXX (for example, B20 is 20 % biodiesel and 80 % petroleum diesel).^{ix}
- **Green Hydrogen:** hydrogen produced by electrolyzing water using electricity generated entirely from renewable sources (such as wind, solar, or hydropower)
- **Biogas:** the gas resulting from the anaerobic (oxygen-free) decomposition of organic matter—principally a mixture of methane and carbon dioxide—generated at landfills, wastewater-treatment plants, agricultural digesters, or other biomass systems.

Currently, New York produces an estimated 13 million dry tons of eligible waste each year, including municipal solid waste organics, lignocellulosic biomass, and wet wastes like manure and sludge—much of which remains untapped as a feedstock and is disposed. Apart from this, point source CO₂ sources from industry and power generation assets are both a significant source of GHG emissions and a viable feedstock for producing low-carbon fuels.

B. NYS' Waste Feedstock and Supporting Infrastructure

New York's economy generates sizeable, geographically distributed waste and CO₂ streams—ranging from landfill gas and municipal organics to lignocellulosic residues, manure, wastewater sludge, and industrial point-source CO₂—that together represent a substantial resource for low-carbon fuel production.

- **Waste Feedstock.** Statewide studies estimate roughly **13 million dry tons** of eligible wastes annually which include MSW, lignocellulosic biomass and wet organic wastes.^x Apart from these, Preliminary NYS DEC emissions inventories indicate **~40 industrial facilities**—such as cement, glass, and ethanol plants—each emitting >100 kt CO₂ per year, offering candidates for point-source CO₂ capture and e-fuel synthesis.^{xi}
- **Existing low-carbon fuel projects.** There are **26 landfill-gas projects** in operation and **90+ active landfills**; two sites already upgrade gas to pipeline-quality RNG, and several wastewater plants and dairy digesters are commissioning additional RNG capacity.^{xii}
- **Supportive logistics.** The current footprint—**340+ material-handling facilities**, existing gas pipelines, multiple jet-fuel terminals, and rail and marine terminals—can support supply-chain buildouts and create offtake opportunities for SAF, renewable diesel, RNG, methanol, and hydrogen pilots.^{xiii}

Taken together, these resources and assets give project developers multiple siting options and the chance to leverage existing permits, utilities, and distribution networks for pilot scale waste-to-fuel plants.

C. Waste-to-Low-Carbon Fuel Conversion Technologies

Commercial low-carbon fuel technologies in operation today: Commercial production of low-carbon fuels from waste feedstocks is under way in the United States. Mature pathways already operate at scale in the United States: (1) anaerobic digestion of wastewater sludge, food scraps, and dairy manure followed by upgrading to renewable natural gas (RNG); (2) hydrotreating of used cooking oil, animal fats, and distillers corn oil to make renewable diesel (RD) and sustainable aviation fuel (SAF); and (3) landfill-gas recovery tied to on-site power or pipeline injection after upgrading. Plants such as World Energy's 340-million-gallon/yr Paramount refinery (SAF/RD)^{xiv} and dozens of landfill-RNG facilities demonstrate that low-carbon fuels can meet ASTM specifications, secure offtake agreements, and displace fossil diesel, jet, pipeline gas, etc.

Advanced waste-to-low-carbon fuel pathways: Advanced waste-conversion technologies are now progressing through pilot and demonstration phases. Thermochemical routes include gasification of MSW or forestry residues with Fischer-Tropsch or methanol-to-jet upgrading; catalytic fast pyrolysis of woody biomass followed by hydrotreating; and hydrothermal liquefaction (HTL) that converts wet organics into biocrude in a single step with no drying. Biochemical and hybrid approaches—sugar-to-jet (alcohol-to-jet, lipid fermentation), engineered microbes that ferment syngas or captured CO₂ to ethanol/SAF intermediates, and single-reactor electro- and photo-catalytic CO₂-to-e-methanol or e-jet—are also advancing.

NYS' existing low-carbon fuel projects and supporting infrastructure: New York already hosts the feedstock and infrastructure to support these pilots. Ninety-plus active landfills, 30+ wastewater digesters, and more than 340 recyclables-handling or transfer facilities generate steady streams of biogenic carbon. RNG projects at Seneca Meadows and Oneida-Herkimer Landfills, dairy-based digesters in the Finger Lakes, and the Yaphank food-waste digester on Long Island show that long-term feedstock agreements and pipeline interconnects can be secured. Industrial CO₂ emitters—ethanol distilleries, cement plants, pulp-and-paper mills, and refineries—offer concentrated, year-round carbon that can be upgraded to electro-fuels. Multiple jet-fuel terminals downstate and a robust petroleum fuel-distribution network statewide provide immediate options to blend and distribute drop-in SAF, RD, and RG.

III. Program Requirements

A. Pilot Project Requirements

The proposed pilot project should meet the following requirements:

i. Feedstock Requirement

Applicants must demonstrate that the project's feedstock will originate from waste resources generated inside New York State.

Eligible in-state waste feedstocks include the following:

- Biogenic solid wastes: Sorted Municipal solid-wastes organics, lignocellulosic residues which include forestry and agricultural by-products, construction and demolition (C&D) wood.

- Wet organic wastes: wastewater residuals (sludge, biosolids, FOGs (fats, oils and greases) collected at Waste Water Treatment Plants (WWTPs)), animal manure, food waste.
- Biogenic gaseous feedstock: landfill gas, wastewater-treatment digester gas, biogas (preferred biogas that would otherwise be flared or remain unutilized).
- Industrial by-products: Waste oils.
- Captured point source CO₂: fermentation CO₂, cement or glass flue gas, refinery CO₂, power plant flue gas, waste CO₂ from biogas upgrading to RNG will also be considered.

Purpose grown feedstocks such as energy crops, algae, etc. are not eligible for this PON.

ii. Low Carbon Fuel Product Requirement

Low carbon fuels produced under this solicitation must be targeted to hard-to-electrify markets such as aviation, heavy-duty on-road freight, maritime transport, rail, industrial process heat, or firm-dispatchable power generation. Fuels intended primarily for light-duty passenger vehicles or non-transport uses outside these sectors are not eligible. The following low carbon fuels produced from waste resource are considered eligible:

- SAF / E-SAF
- Renewable Diesel (RD) / E-Diesel.
- Clean Methanol / E-Methanol.
- Sustainable Marine Fuel (IMO compliant distillate or LNG)
- Renewable Natural Gas (RNG) / E-Natural Gas / E-Methane (pipeline quality) or Renewable Liquefied Natural Gas (RLNG).

Proposals focusing on producing fuels other than the list above are considered ineligible, this includes but is not limited to:

- Low-Carbon / Green Hydrogen or Ammonia
- Biogas

iii. Waste-to-Low-Carbon Fuel Conversion Technologies

Projects may employ any fuel conversion pathway that targets one of the fuel products listed in section III.A.ii and meet the below requirements:

- **Feedstock Carbon-to-fuel requirement:**
 - All proposals must demonstrate a conversion pathway in which at least 50% of the carbon contained in the incoming feedstock is retained in one or more finished low-carbon fuels specified above as eligible. Any remaining carbon that leaves the process as a by-product or co-product (both as vented gas or in a sequestered form) must be itemized in Engineering block flow diagram (Attachment C3), TEA (Attachment C4), and LCA calculations (Attachment C5). Section II.3.a of the proposal narrative (Attachment A) must clearly describe the process and present a credible plan for achieving ASTM compliance to verify that the fuel meets applicable specification.
- **Lifecycle emissions Reduction** – Attachment C5

- The proposed solution (or conversion technology option) can achieve a minimum lifecycle-greenhouse-gas (GHG) reduction (cradle-to-gate) target of ≥ 70 percent below the petroleum baseline; ≥ 50 percent for RNG.
- **Technology readiness level (TRL) requirements:**
 - Projects, at a minimum must demonstrate full system integration at the pilot scale (TRL 6) including the core waste-to-fuel conversion technology and required upgrading, along with the Balance of Plant components (BOP).
 - The core conversion train (the technology stack from feedstock entry to final fuel product produced) must enter the project at TRL 4-5 or TRL 6 and exit at the next level as defined below. Refer to Appendix A of this document for more details on TRL definitions used.

TRL Definitions used for this program

Path	Allowable Trajectory	Explanation of TRL in the context of waste-to-low carbon fuel projects
A	Start of project <i>TRL 4-5</i> → end-of-project <i>TRL 6</i>	<i>TRL 4:</i> The core component being piloted has been tested in a controlled environment with real or simulated feedstock and demonstrated to function at relevant scale to the pilot project. <i>TRL 5:</i> The integrated system (core components + BOP) being piloted has been tested in a controlled environment with real or simulated feedstock and demonstrated to function at relevant scales to the pilot project. <i>TRL 6:</i> An integrated pilot scale plant operating in a relevant environment with continuous data showing stable yields, impurity tolerance to real-world feedstock and on-spec final fuel product produced.
B	Start of project <i>TRL 6</i> → end-of-project <i>TRL 7</i>	TRL 6: As explained above. TRL 7: Demonstration plant (at least 5X scale-up from previously tested pilot plant) operating in relevant environment with continuous data that can prove the technology train prior to FOAK commercial project. Used to generate OPEX data, validate integration, safety and permitting pathways.

- **Scale Requirements:**
 - For projects producing liquid hydrocarbons, pilot project scale must be at least 1 gallon of fuel produced per day (assuming 24 hours of continuous operation at max feedstock throughput).

- For projects producing RNG (or Renewable – LNG), pilot project scale must be at least 1 MMBtu of fuel produced per day (assuming 24 hours of continuous operation at max feedstock throughput).

Conversion pathways that have already reached full technical and commercial maturity are considered ineligible in this solicitation. This includes but not limited to:

- HEFA (**Hydroprocessed Esters and Fatty Acids**) process to produce SAF
- Anaerobic digestion and biogas upgrade to produce RNG
- Hydrotreating of Triglycerides to produce RD

B. Proposal requirements

All applicants should include the required attachments specified in section IV of this document in their proposal package. These include Attachments (templates provided for each) or Letters of Commitment (LOC). The attachments described below are only part of the required items list to provide further clarification; applicants must still submit all items listed in Section IV.

i. Teaming and Project Partners Requirement

At a minimum, a project team should consist of the following entities, covering the critical functional roles required. The project team members responsible for executing part of the scope of work will be required to enter into a sub-contract agreement as outlined in the SOW document (Attachment B). Applicants should also succinctly describe the role, qualifications, experience, and capabilities of the proposed project team to execute the project plan successfully in the proposal narrative (Attachment A). Teams that demonstrated prior successful collaboration to execute on an energy project will be scored more favorably. The required attachment or the letter of commitment (LOC) specified must be included as part of the proposal package.

- Low-Carbon fuel conversion technology provider (Attachment C7)
 - The proposal team must either own the IP or obtain IP clearance for the proposed low-carbon fuel conversion technology.
 - Attachment C7 – IP Access for Core Technology must be filled out and submitted as part of the proposal package.
- Engineering, Procurement and Construction (EPC) capability (LOC A)
 - An EPC firm with prior experience executing similar scale energy projects must be part of the proposal team.
 - LOC A – Should clearly outline name of the EPC firm, the key person(s), and the required qualifications.
 - List of past projects of the entire team including the EPC should be included in Attachment F.

In addition, the project team should include the following partners. Project partners don't necessarily need to perform any scope of work for the project, but they need to provide necessary support as specified below.

Applicants that submit detailed letters of commitment from partners—outlining concrete plans and a credible path to full agreements—will be scored more favorably.

- Host-site partner (LOC B)
 - The LOC must confirm their interest in supporting a detailed due diligence and potential pilot project.
- Feedstock supply partners appropriate to the proposed pathway (LOC C)
 - The LOC to confirm feedstock supplier will supply one of the eligible in-state feedstocks and confirming volume is sufficient to meet the pilot's planned operational requirement; or
 - If the applicant intends to source feedstock from a commercial feedstock supplier, details must be provided on the commercial entity including information to verify feedstock type and geographic source.
- Offtake / end-use partner (LOC D)
 - LOCs stating their commitment to support testing efforts by serving as an advisory committee member or technical liaison for ASTM product testing, in order to demonstrate market viability of the fuel product of interest.

ii. Technical Attachments

- Engineering Block Flow Diagram – Attachment C3
 - Applicants must submit a block-flow diagram showing all major unit operations and stream connections for the proposed pilot project. The diagram should clearly mark the core conversion technology being piloted and the BOP. It should also clearly quantify the inputs and outputs, providing the basis on which the TEA and LCA (Attachments C4, C5) will be built.
- Lifecycle emissions Reduction – Attachment C5
 - Applicants must submit a Life-Cycle Assessment (LCA) model that covers the prepared feedstock to final fuel transfer point (cradle-to-gate). key assumptions, mass- and energy-balance tables, and the resulting carbon-intensity ($\text{g CO}_2\text{e MJ}^{-1}$) relative to the appropriate petroleum comparator or Natural gas. See Attachment C5 template for further details.
- Techno-Economic Model - Attachment C4
 - Both a TEA at current pilot scale and projections at commercial scale will be required at the application stage. The TEA submitted (for both current scale and commercial scale projections) must outline key cost input assumptions, technical assumptions including details such as expected integrated system level performance such as conversion efficiency, etc. The TEA should be built based on the Engineering block-flow diagram submitted (Attachment C3). The purpose of the TEA is to evaluate technical performance in comparison to current state-of-the-art and also expected economic performance at commercial scale. See Attachment C4 template for further details.
- Data from Prior Testing – Attachment C6
 - For proposed pilot projects progressing from *TRL 4–5* → *TRL 6*, Individual components or the integrated systems must have been validated in a controlled environment at a similar scale to the proposed pilot. The results from these validations must be provided, including:
 - prior operational run-times for individual components demonstrating cumulative run-time >500 hours and continuous run-time >50 hours.

- conversion efficiency / yield test data for individual components along with projections for an integrated pilot scale project.
- modeled or simulated data to show that integrated process in the planned pilot project can maintain specification performance when exposed to the impurity levels in real-world feedstocks.
- For proposed demonstration projects progressing from *TRL 6* → *TRL 7*, the integrated systems must have been validated in a relevant environment at pilot scale. The required results include:
 - prior operational run-times for the pilot project demonstrating continuous run-time >500 hours.
 - conversion efficiency / yield test data for the pilot project along with projections for a demonstration project (at least 5X scale up from pilot).

C. Scope of Work Requirements

i. Funding Boundary

NYSERDA support under this PON is limited to activities inside the pilot-plant process island—from feedstock inlet to finished-fuel transfer point—plus any external, third-party analytical or certification testing (e.g., ASTM, ISO, or EPA protocols) required to verify that the finished fuel meets applicable specifications or regulatory limits. Eligible costs therefore include on-site capital items and non-capital expenses (engineering, permitting, project management, pilot project’s operating cost items such as feedstock, pilot-operation labor) as well as off-site laboratory fees and sample-shipping costs necessary for ASTM compliance.

Sections ii–iv below divide the project into three budget periods that mirror its life-cycle phases — (1) site control and feedstock supply, (2) engineering design and permitting, and (3) build, commission, and operate—and establish the minimum deliverables required in each phase. These periods are purely for

structuring tasks and funding; the Go/No-Go reviews already specified in the SOW template occur after each budget period. NYSERDA may require additional Go/No-Go reviews.

All milestones and deliverables described below should be included in the Attachment B – Statement of Work (refer to attachment for more details on minimum deliverables).

ii. Budget Period 1 – Site Control Agreement and Feedstock Supply Agreement

Minimum Scope of Work:

- Site Finalization: Complete detailed due-diligence of host-site and negotiate and execute site-control agreement with site owner for building and operating pilot project on host-site. Refer to SOW template for site control agreement minimum requirements to be submitted to NYSERDA.
- Feedstock supply agreement: Negotiate and execute feedstock supply agreement with feedstock supply partner to secure the supply of feedstock that proves enough supply to cover the entire operational requirement of the pilot project. If feedstock supplier and host-site are one-entity, then a combined site-control agreement and feedstock supply agreement is acceptable. See SOW template for feedstock supply agreement minimum requirements to be submitted to NYSERDA.

Minimum Deliverables Include:

- Executed site-control agreement
- Executed Feedstock supply agreement

iii. Budget Period 2– Engineering Design & Permit

Minimum Scope of Work:

- Detailed Engineering Design work required for both construction sign-off and for permit approval including:
 - Process design.
 - Update to conceptual engineering design package (Front End Loading (FEL) 1 or FEL2 compressed as appropriate for pilot project) to progress to FEL-3/Front-End Engineering Design (FEED) level package as appropriate for a pilot project Final Investment Decision (FID) (increasing the accuracy of the cost estimates).
 - Safety reviews reports.
 - Specifications for equipment that needs to be ordered.
 - Design validation of the integrated system using process modeling.
- Obtain necessary permits from relevant Authorities Having Jurisdiction (AHJs)

Minimum Deliverables Include:

- Engineering design deliverables:
 - Process flow diagrams (PFDs)
 - Piping & Instrumentation Diagrams (P&IDs)
 - Final process description and control philosophy
 - Environmental, Safety & Health (ES&H) Plan

- Closed-out Hazard and Operability study (HAZOP) and if required based on HAZOP, Layer of Protection Analysis (LOPA) action list
- Permit Applications including emissions, wastewater characterization, etc., as relevant
- Vendor quotes for major items
- Updated budget and TEA calculations based on the more accurate Capital Cost (CAPEX) information
- Single-line diagrams and load lists for electrical and instrumentation equipment
- Confirmation of receipt of necessary permits

iv. Budget Period 3 and After –Build, Commissioning, & Operate

Minimum Scope of Work:

- Procurement and fabrication of equipment
- Site preparation and build: Site preparation activities include utility installation, equipment delivery and installation.
- Commissioning: Confirm readiness for extended runs including environment, safety and health (ES&H) reviews through shakedown runs.
- Performance testing: ≥ 500 h continuous operational testing; demonstrating stability with real-world feedstock; collect yield, carbon intensity data and update to LCA; and perform fuel-quality testing to verify ASTM compliance.

Minimum Deliverable Include:

- Invoices for purchased equipment
- Build ready report including ES&H review reports
- Data from shakedown runs to confirm readiness for pilot operation
- Performance test data
- ASTM compliance data package as relevant to the fuel product produced.

D. Cost Sharing

The proposal must show proposer or external (non-NYSERDA) cost share funding of at least 50% of the total cost of the project. Scoring preference will be given to proposals that best leverage NYSEDA funding by providing greater amounts of non-NYSERDA cost share funding (see IV. Proposal Evaluation). Cost sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered "cash" contributions. Unpaid labor, indirect labor, or other general overhead may be considered "in-kind" contributions. Total non-NYSERDA cost share is the sum of cash and in-kind contributions from non-NYSERDA sources. NYSEDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred.

Cost share must be verifiable upon submission of the application. Applicants are required to provide written assurance of their proposed cost share contributions in their applications. Upon selection for award negotiations, applicants may be required to provide additional information and documentation

regarding their cost share contributions. Cost share contributions must be specified in the Attachment C1 – Milestone Payment Schedule and the Attachment C2 – Budget Form.

Cost share commitments cannot be dependent on some future event, such as receiving a grant, obtaining a loan, monetizing tax incentives, or securing an investor. If funds from a federal source are being proposed as cost share, the applicant must provide a commitment letter from the federal agency as part of the application that specifically commits those funds and identifies the statutory authority that allows those funds to be used for the project scope being proposed.

The applicant is ultimately and legally responsible for providing the entire amount of cost share required, if an award is made, even if the cost share is being provided by a Subcontractor or Subrecipient. The Recipient is solely responsible for managing cost share contributions by the Project Team and enforcing cost share obligations assumed by Project Team members in subawards or related agreements. If the funding agreement is terminated prior to the end of the project period, the Recipient is required to contribute at least the cost share percentage of total expenditures incurred through the date of termination.

The applicant must submit Letters of Commitment from the applicant, all teaming entities, and all cost share providers. If applicable, the letter must state that the party is committed to providing a specific dollar amount or value of in-kind contributions allocated to cost sharing. The following information for each party contributing to cost sharing should be identified: (1) the name of the organization; (2) the proposed dollar amount to be provided; and (3) the proposed cost.

IV. Proposal Required Attachments

A. Required Proposal Attachments

To submit a Proposal, the proposer must submit all attachments listed below. The goal should be to concisely present the information needed to fully address the proposal evaluation criteria (in Section V.A.i.).

Required Attachments for the Proposal:

- Attachment A – Proposal Narrative
- Attachment B – Statement of Work
- Attachment C1 – Milestone Payment Schedule
- Attachment C2 – Budget Form
- Attachment C3 –Engineering Block Flow Diagram
- Attachment C4 – Techno-Economic Model (TEA)
- Attachment C5 – Life Cycle Assessment (LCA)
- Attachment C6 – Data from Prior Testing
- Attachment C7 – IP Access for Core Technology
- Attachment D – Executive Summary Slide

Required Letters of Commitment (LOCs) for the Proposal:

- LOC A – EPC Partner
- LOC B – Host-Site
- LOC C – Feedstock Supplier
- LOC D – Offtake Partner
- LOC E – All Cost-Share Partners

Required Additional Attachments to be Uploaded in the Portal:

- Attachment F - Project List: A list of relevant projects that the proposal team has completed in the past.
- Attachment G - Resumes/CVs
- Attachment H - References

For Reference Only (Does not need to Be Submitted)

- Attachment E – Sample Agreement

As part of the proposal package, **applicants must include in Attachment C2, a separate tab for each Subrecipient (project teaming partner) that is expected to perform work estimated to be more than \$250,000.** Additionally, If the total project cost for a vendor is over \$250,000, a budgetary quote from the vendor will be required upon selection for contract negotiation by NYSERDA.

Proposers must carefully review the required attachments to ensure that all required sections are completed. Failure to do so may result in the proposal being rejected as non-responsive. It is the proposer's responsibility to ensure that all pages have been included in the proposal and that they have been timely submitted before 3 PM on the proposal due date.

Proposals that exceed the page limits or fail to follow the format guidelines will be rejected as non-responsive. Proposals deemed non-responsive will not be eligible for awards. If you believe proprietary information must be submitted to provide an adequate proposal, you must comply with the Section VI instructions for submitting proprietary material. Each page of the proposal should state the name of the proposer, the PON number (PON 6031), and the page number.

Proposals determined to be compliant with application procedures and responsive to the solicitation will be subject to review by a scoring committee comprised of internal and external technical experts in accordance with Section V. Proposal Evaluation. Only the most technically meritorious proposals will be awarded an invitation from NYSDERDA to enter into an agreement. Proposals not meriting an award for contracting may be debriefed as requested.

B. Compliance with New York State Finance Law

In compliance with §139-j and §139-k of the State Finance Law (see Section VI, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

V. Proposal Evaluation

A. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below. At NYSDERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications about the proposal. Proposers will be notified if they are requested to attend an interview

i. Evaluation Criteria

Technology Merit & Value Proposition

Objective: Assess technical innovation, how the proposed technology advances performance compared to other waste-to-fuel technologies, & LCA benefits. Confirm proposed solution is scientifically sound and benefits NYS.

- The proposed waste-to-fuel solution / technology is technically sound and innovative, and addresses a barrier in this topic area with clear improvements in functional performance as compared to state-of-the-art
- The attachments C3 - C6 clearly outline the process with a block-flow diagram, clearly distinguish core technology from balance-of-plant, and confirm the prior performance results

- from controlled testing of least 500 hours cumulative and 50 hours continuous run-time, high yields, and tolerance to real-world impurities.
- The proposed solution demonstrates a carbon intensity that shows a minimum 70 percent greenhouse-gas reduction for liquid fuels, or 50 percent for RNG, relative to the fossil baseline. Proposals with higher GHG reductions will be scored more favorably.
- The proposal includes a credible techno-economic analysis that compares the pilot-scale minimum fuel-selling price to current market prices and a cost-reduction roadmap that leads to commercial-scale parity while highlighting advantages in yield, capital intensity, energy use, and emissions over benchmark technologies.
- The project cost/budget is justified and reasonable with respect to the level of the expected benefits, and the potential market or deployment opportunity.
- The proposer provides private and/or other sources of cost share funding for the project (with letters of commitment), with greater amounts of non-NYSERDA cost share considered more favorably. Cost share included in the proposal is also verifiable.

Team experience and capabilities

Objective: Assess the team's experience and resources to deliver the pilot on time and on budget.

- The proposed team has the necessary expertise and resources to carry out the proposed work, including members with industry and business experience as well as technical skill.
- The proposer has successfully commercialized one or more low-carbon fuel products or deployed services in the past.
- The proposal team has secured strong commitments from all essential team members and external partners, including letters of support or commitment, and has demonstrated strong support from industry or necessary market actors.
- The proposal clearly demonstrates the team structure and staff roles and responsibilities.
- The proposal includes resumes of key individuals.

Project plan, risk and mitigation plan

Objective: Assess feasibility of schedule and budget, adequacy of contingency and effectiveness of risk-mitigation strategy.

- The proposal includes a detailed SOW that presents clear tasks, milestones, deliverables, and schedules, and that which can be realistically completed within the proposed timeline and budget.
- The proposal includes a detailed risk register, with adequate mitigation strategies in place and contingency actions in place.
- The proposer included information on measurement, evaluation, and validation measures and a plan to contract with a qualified independent evaluator.
- The proposal clearly outlines the readiness of supply chains and workforce, and the robustness of the data-acquisition and independent-evaluation plan that will support the 500-hour continuous-operation test

NYS Market and Scalability

Objective: Assess whether the pathway can scale in NYS with reliable and scalable feedstock supply, replicability of solution, etc.

- The proposed solution has a high potential for commercialization, replicability, and/or scalability in New York State based on the feedstock – conversion option, demonstration site characteristics that are transferable to other locations, and other relevant factors. The proposal describes a credible pathway to commercialize the product or service.
- The proposal clearly documents the potential off-take demand, and the breadth of future replication opportunities across different feedstock and off-take options.
- The proposal clearly outlines the solution's commercialization timeline and stakeholder-engagement strategy, to overcome market barriers.
- The proposal has discussed in depth the sensitivity of economics to incentives and future mitigation strategies to change in policy environment.

License to Operate (Pilot Readiness)

Objective: Assess whether the non-technical enablers – site partners, offtake partners for fuel quality testing etc. – are in place or clearly defined in SOW so the pilot has a high confidence of successful implementation.

- The proposed solution's selected host-site is technically suitable for a waste-to-fuel pilot—adequate utilities, zoning compatibility, and proximity to feedstock.
- The proposal includes letters of intent or support from the host site, feedstock supplier, and offtake partner, with high-level of specificity and details from each supporting entity.
- The proposal has a clear understanding of the complete permitting pathway, identified Authorities Having Jurisdiction, and has outlined realistic timelines for relevant permits to secure.
- The proposal does not require navigating any new regulations or developing new safety procedures to execute on the pilot project.
- The proposal outlines a clear strategy for achieving ASTM (or equivalent) fuel-specification compliance—backed by prior lab data or a defined testing plan in the SOW.
- The proposed solution does not depend on any external infrastructure (off-site outside of the SOW) that must be developed in order for the pilot project to be executed on time. Alternatively, the proposal includes a clear strategy to work with the responsible owners of these required off-site infrastructure assets, with a timeline aligned to the overall project schedule.

ii. Program Policy Factors

NYSERDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- The degree to which the proposal avoids overlap with technologies (feedstock – conversion options, renewable fuel type) currently supported in NYSERDA's project portfolio.
- Whether the project contributes to a balanced distribution of supported technologies and feedstocks, helping to reduce NYSERDA portfolio-level technical and commercial risk.
- The extent to which the project is likely to generate insights, tools, or infrastructure that benefit the broader low-carbon fuels sector beyond the proposing entity (e.g., data sharing, supply chain development, permitting templates, interoperable tech).

VI. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law Sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law Sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under Section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of up to three years, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use Attachment E, Sample Agreement, to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately twelve weeks from the proposal due date whether your proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of Attachment E, Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation

for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable

exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

VII. Appendix A – TRL Definitions

Relative Level of Technology Development	Technology Readiness Level	TRL Definition	Description
System Operations	TRL 9	Actual system operated over the full range of expected conditions.	The technology is in its final form and operated under the full range of operating conditions. Examples include using the actual system with the full range of wastes in hot operations.
System Commissioning	TRL 8	Actual system completed and qualified through test and demonstration.	The technology has been proven to work in its final form and under expected conditions. In almost all cases, this TRL represents the end of true system development. Examples include developmental testing and evaluation of the system with actual waste in hot commissioning. Supporting information includes operational procedures that are virtually complete. An Operational Readiness Review (ORR) has been successfully completed prior to the start of hot testing.
	TRL 7	Full-scale, similar (prototypical) system demonstrated in relevant environment	This represents a major step up from TRL 6, requiring demonstration of an actual system prototype in a relevant environment. Examples include testing full-scale prototype in the field with a range of simulants in cold commissioning ¹ . Supporting information includes results from the full-scale testing and analysis of the differences between the test environment, and analysis of what the experimental results mean for the eventual operating system/environment. Final design is virtually complete.
Technology Demonstration	TRL 6	Engineering/pilot-scale, similar (prototypical) system validation in relevant environment	Engineering-scale models or prototypes are tested in a relevant environment. This represents a major step up in a technology's demonstrated readiness. Examples include testing an engineering scale prototypical system with a range of simulants. ¹ Supporting information includes results from the engineering scale testing and analysis of the differences between the engineering scale, prototypical system/environment, and analysis of what the experimental results mean for the eventual operating system/environment. TRL 6 begins true engineering development of the technology as an operational system. The major difference between TRL 5 and 6 is the step up from laboratory scale to engineering scale and the determination of scaling factors that will enable design of the operating system. The prototype should be capable of performing all the functions that will be required of the operational system. The operating environment for the testing should closely represent the actual operating environment.
Technology Development	TRL 5	Laboratory scale, similar system validation in relevant environment	The basic technological components are integrated so that the system configuration is similar to (matches) the final application in almost all respects. Examples include testing a high-fidelity, laboratory scale system in a simulated environment with a range of simulants ¹ and actual waste ² . Supporting information includes results from the laboratory scale testing, analysis of the differences between the laboratory and eventual operating system/environment, and analysis of what the experimental results mean for the eventual operating system/environment. The major difference between TRL 4 and 5 is the increase in the fidelity of the system and environment to the actual application. The system tested is almost prototypical.

Relative Level of Technology Development	Technology Readiness Level	TRL Definition	Description
	TRL 4	Component and/or system validation in laboratory environment	The basic technological components are integrated to establish that the pieces will work together. This is relatively "low fidelity" compared with the eventual system. Examples include integration of ad hoc hardware in a laboratory and testing with a range of simulants and small scale tests on actual waste ² . Supporting information includes the results of the integrated experiments and estimates of how the experimental components and experimental test results differ from the expected system performance goals. TRL 4-6 represent the bridge from scientific research to engineering. TRL 4 is the first step in determining whether the individual components will work together as a system. The laboratory system will probably be a mix of on hand equipment and a few special purpose components that may require special handling, calibration, or alignment to get them to function.
Research to Prove Feasibility	TRL 3	Analytical and experimental critical function and/or characteristic proof of concept	Active research and development (R&D) is initiated. This includes analytical studies and laboratory-scale studies to physically validate the analytical predictions of separate elements of the technology. Examples include components that are not yet integrated or representative tested with simulants. ¹ Supporting information includes results of laboratory tests performed to measure parameters of interest and comparison to analytical predictions for critical subsystems. At TRL 3 the work has moved beyond the paper phase to experimental work that verifies that the concept works as expected on simulants. Components of the technology are validated, but there is no attempt to integrate the components into a complete system. Modeling and simulation may be used to complement physical experiments.
Basic Technology Research	TRL 2	Technology concept and/or application formulated	Once basic principles are observed, practical applications can be invented. Applications are speculative, and there may be no proof or detailed analysis to support the assumptions. Examples are still limited to analytic studies. Supporting information includes publications or other references that outline the application being considered and that provide analysis to support the concept. The step up from TRL 1 to TRL 2 moves the ideas from pure to applied research. Most of the work is analytical or paper studies with the emphasis on understanding the science better. Experimental work is designed to corroborate the basic scientific observations made during TRL 1 work.
	TRL 1	Basic principles observed and reported	This is the lowest level of technology readiness. Scientific research begins to be translated into applied R&D. Examples might include paper studies of a technology's basic properties or experimental work that consists mainly of observations of the physical world. Supporting Information includes published research or other references that identify the principles that underlie the technology.

New York Truck Voucher Incentive Program

Program Opportunity Notice (PON) 4089

\$53 million is available

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Vehicle and Equipment Eligibility Applications currently being accepted.

Contractor (Dealer) Application will be available July 14, 2025.

Funding for Project Applications will be available August 2025.

Applications accepted through December 31, 2029, by 3:00 PM Eastern Time, or until funds are fully committed, whichever is earlier.

The **New York Truck Voucher Incentive Program** (Program or NYTVIP) is an incentive program designed to accelerate the adoption of zero emission medium and heavy-duty vehicles and non-road equipment. This Program benefits New York State by reducing harmful emissions and the transportation sector's dependence on fossil fuels. The New York State Energy Research and Development Authority (NYSERDA) developed the Program to provide incentives that reduce the cost of purchasing Class 3-8 Zero Emission Vehicles, Zero Emission Non-Road Equipment, and Electric Transit Buses.

Incentives are available to Public, Private, Not-for-Profit, and Municipal purchasers that meet the eligibility requirements in the Program Implementation Manual. NYSERDA is providing vouchers for Class 3-8 Zero Emission Vehicles as a base incentive with three bonuses: Small Fleet, Scrappage, and Disadvantaged Community (DAC). For Non-Road Equipment, vouchers will cover 35% of the base cost, with an additional 10% given to equipment located in a DAC. For Transit Buses, incremental incentives up-to voucher caps are available to select transit agencies in New York State. Incentives will be calculated at application submission and final amounts will be provided in an Award Letter sent to the Vehicle/Equipment Purchaser's selected Eligible Dealer (Contractor) in NYTVIP. NYTVIP is designed as a rebate program, Purchasers will see a point-of-sale discount. Dealers will receive the full incentive amount directly from NYSERDA upon Vehicle/Equipment delivery.

Applications are accepted on a **first-come, first-served basis until funding is expended**. Program rules are available in the Implementation Manual accompanying this solicitation. **All Manufacturers, Dealers, and Fleets should review the Implementation Manual prior to applying.**

Application Submission: Online submission is required through the Salesforce Application Portal. The NYTVIP launch will come in three phases: Vehicle/Equipment Eligibility Application, Contractor (Dealer) Application, and then Project Incentive Application. For detailed instructions on how to submit a project application, visit the NYTVIP website for training materials.

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are Natalie Tauro (Designated Contact) at (212) 971-5342, ext. 3519 or by e-mail at natalie.tauro@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Jim Cowman (Designated Contact) at (518) 862-1090, ext. 3652 or Jim.Solicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in the applicant being deemed a non-responsible offerer, and (2) may result in the applicant not being awarded a contract.

I. Introduction

The New York Truck Voucher Incentive Program is a voucher-based program that provides incentives in the form of vehicle/equipment vouchers to Dealers, which are passed through to purchasers on their purchase orders. The Dealer in this program is responsible for Voucher application and will carry the incentive cost burden until Voucher Redemption, which is when the new vehicle/equipment is delivered, all other requirements are satisfied, and scrappage is complete (if applicable).

The Program now includes three funding tracks: Zero Emission Non-Road Equipment (funded through Volkswagen Settlement EPA DERA Option), Class 3-8 Zero Emission Vehicles (funded through RGGI), and Transit Buses (funded through Volkswagen Settlement). Prospective purchasers can acquire Eligible Vehicles/Equipment through approved NYTVIP Dealers (Contractors).

Additional details and all program rules are available in the Implementation Manual accompanying this solicitation. **All applicants should review the Implementation Manual [PDF] prior to submitting an application.** The Implementation Manual is subject to change at any time.

Purchaser Eligibility

Eligible Applicants are commercial enterprises (i.e., not used for individual or personal activities), nonprofit organizations (those exempt from federal income taxed under Section 501 of the Internal Revenue Code 26 U.S.C. § 501), or public sector entity (excluding federal governmental entities) that domiciles, registers (if applicable), and/or operates Class 3-8 Zero Emission Vehicles, and/or Non-Road Equipment in New York State. Eligible applicants must also adhere to requirements set forth in each Purchaser Eligibility section of the respective funding track in the Implementation Manual.

Transit Bus applications are restricted to the below five transit agencies in NYS:

1. Capital District Transportation Authority
2. Niagara Frontier Transportation Authority
3. Rochester-Genesee Regional Transit Authority
4. Suffolk County Transportation
5. Westchester County Bee-Line Bus System

Currently, no other entity can access the Transit Bus Funding track.

Manufacturer Eligibility

Any Original Equipment Manufacturer is eligible to apply, if their vehicles/equipment meet eligibility requirements set forth in Section 12 of the Implementation Manual.

Dealer Eligibility

Vehicle/Equipment Dealers are eligible if they meet the following requirements:

- Is a vehicle and/or equipment dealership that has a written agreement with a medium- and/or heavy-duty vehicle OEM and sells or leases fully assembled Eligible Vehicles/Equipment to Vehicle/Equipment Purchasers in New York State.
- An OEM that builds and sells or leases complete Eligible Vehicles/Equipment directly to Vehicle/Equipment Purchasers in New York State.
- Have a valid business license for the past two years. This will be checked by the company Employer Identification Number (EIN) at time of Dealer (Contractor) Application.

How it Works

1. **Vehicle/Equipment Eligibility Application** –A Manufacturer submits a completed Vehicle/Equipment Eligibility Application in the NYSERDA Salesforce Portal. Once approved, vehicles/equipment are listed on the Program Website on the approved NYTVIP-Eligible Vehicles/Equipment List.
2. **Dealer Approval** – A Dealer submits an Application in the NYSERDA Salesforce Portal to become an approved Contractor with a Salesforce Account. If the Dealer is not the OEM, the Dealer must submit proof of OEM authorization (Vehicle Manufacturer Authorization Form) to sell the vehicle as part of the approval process. Approved Dealers may then market Program incentives to prospective Vehicle/Equipment Purchasers and submit Voucher Applications to NYSERDA.
3. **Voucher Application and Approval** – When a Vehicle/Equipment Purchaser is ready to purchase an Eligible Vehicle/Equipment from an approved Dealer, the Dealer submits a Voucher Application to NYSERDA for review and approve. Final vouchers are determined at application approval in the Award Letter Sent to the Dealer.
4. **Vehicle Scrappage (Required for Non-Road and Transit Projects)** –Please note that Scrappage is only required for two funding tracks: Non-Road Equipment and Transit Buses. For Class 3-8 Zero Emission Vehicles, Vehicle Scrappage is optional and makes a project eligible for a Voucher Bonus if a Model Year 2015 and older vehicle is scrapped. The Vehicle/Equipment Purchaser must provide the Contractor with all required Scrappage documentation within the timeframes listed in the respective funding tracks scrappage sections.
5. **Voucher Redemption** – After the Vehicle/Equipment Purchaser takes delivery of the new Eligible Vehicle/Equipment, pays for it in full, and satisfies all NYTVIP requirements, the Dealer completes the Voucher Redemption process in the NYSERDA Salesforce Portal.
6. **Voucher Payment** –NYSERDA reviews the Voucher Redemption request and associated documents. If there are corrections needed, NYSERDA will work with the Dealer. Once all documentation has been reviewed and approved, NYSERDA will issue the voucher payment to the Dealer.
7. **Required Reporting** - NYSERDA requires the submission of vehicle/equipment use data for three to five years, as a condition of funding. Telematics devices may be installed on NYTVIP supported vehicles/equipment, or purchasers can use their own devices.

II. Program Requirements

Project applications will be granted on a first-come, first-served basis. NYSERDA reserves the right to modify the application acceptance period and extend and/or add funding to this solicitation.

III. Application Requirements

- a. **For Manufacturers** - Eligible OEM's will have to submit four documents in addition to completing the Vehicle/Equipment Eligibility Form (see Section 15.1 of Implementation Manual for complete fields):
 1. Warranty Sheet – must be at least three (3) years.
 2. Specification Sheet for Vehicle/Equipment.
 3. MSRP/Price Sheet for Vehicle/Equipment.
 4. Service Plan (see Implementation Manual for details)

b. For Contractors (Dealers) – Eligible Dealers submit a Salesforce Application:

1. Dealer enters in general company information and details.
2. Dealer selects from drop down list eligible equipment/vehicles they market to Fleets.
3. Dealer reviews and submits Dealer (Contractor) Participation Agreement.
4. Dealer submits Vehicle Authorization form, with a signature from the Manufacturer authorizing Dealer to sell specific models of vehicles/equipment.

c. For Vehicle/Equipment Purchasers – Eligible Dealers submit a Salesforce Project Application on behalf of the Eligible Purchasers:

1. Enter Domicile Addresses
2. Enter general information on Purchaser
3. Select Eligible Vehicles/Equipment for Purchaser
4. Enter Scrap Vehicle/Equipment information (required for Transit Buses and Non-Road Equipment, bonus for Class 308 ZEVs)
5. Upload signed Vehicle/Equipment Purchaser Participation Agreement and signed Vehicle/Equipment Operator Addendum (if leasing for at least 3 years)
6. Fleet Certification Letter
7. Photos of Scrapped Vehicle/Equipment (if applicable)

To apply for **NYTVIP funding**, eligible Dealers submit project applications on behalf of eligible Purchasers (Vehicle/Equipment Purchasers/Operators). Purchasers must meet eligibility requirements and have vehicles/equipment ready to purchase from the NYTVIP Eligibility List. Dealers must complete the application and agree to abide by the terms and conditions of the NYTVIP Implementation Manual and Program Agreements.

IV. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development

Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

NY-Sun Project Applications and Contractor Applications currently being accepted.

Applications accepted August 12, 2010 through December 31, 2030, by 3:00 PM Eastern Time, or until funds are fully committed, whichever is earlier.*

Program Summary: The New York State Energy Research and Development Authority (NYSERDA) provides financial incentives for the installation by Contractors and Builders of new grid-connected solar electric photovoltaic (PV) systems for residential sites in the Upstate region that are 25kW-direct current (dc) or less, for nonresidential sites in the Upstate region that are up to 750kW-dc, and for nonresidential sites in Con Ed region that are up to 7.5MW-dc. Incentives for nonresidential sites in Upstate region that are ranging from 750kW-dc to 7.5MW-dc are available through the Commercial/Industrial Program (PON 3082).

Funding for the NY-Sun Incentive Program ("Program") has been allocated by the New York State Clean Energy Fund (CEF) and Regional Greenhouse Gas Initiative (RGGI) and the Order Authorizing the Clean Energy Fund Framework, dated January 21, 2016. An Order, dated May 14, 2020, authorized additional CEF funds to achieve the goal of 6GW by 2025. An Order, dated April 14, 2022, authorized additional CEF funds to achieve the expanded goal of 10GW by 2030. A further Order, dated April 28, 2025, modified the Program budget and authorized CEF funds for 500 MW of additional capacity participating in the Statewide Solar for All program.

Incentives for solar PV installations are available for residential projects for eligible low-to-moderate income homeowners; and for nonresidential projects serving multifamily affordable housing properties, projects located on a brownfield or landfill, parking solar canopies, rooftop solar canopies and Community Distributed Generation (CDG) solar projects in the Con Edison region that did not qualify for a Community Credit under the Value Stack. The Inclusive Community Solar Adder (ICSA) is also available for nonresidential CDG solar projects serving low-to-moderate income (LMI) subscribers, affordable housing, and other facilities serving disadvantaged communities. The Statewide Solar for All (S-SFA) Adder is available for nonresidential CDG solar projects that enrolled in S-SFA with the applicable utility.

Additional incentives for solar PV installations paired with an energy storage system are available for residential customer households in PSEG Long Island region. A higher incentive rate is available for residential customer households in PSEG Long Island region who qualify as low-to-moderate income.

Information on the Program design, including real-time data on the current incentive levels can be found by visiting <https://www.nyserda.ny.gov/All-Programs/NY-Sun/Contractors/Dashboards-and-incentives>.

Incentives will be granted on a first-come, first-served basis, and PV project applications will be accepted through December 31, 2030, or until funds are fully committed, whichever comes first.

For projects 1 MW-ac or greater in capacity that submit utility interconnection application after April 14, 2022, or that submit applications to the Program on or after July 1, 2024, incentive will be conditioned on the developer paying prevailing wages for construction activities associated with project design and installation.

Total incentives available is subject to change. NYSERDA reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

Application Submission: Potential Contractors and/or Builders must apply on-line to participate in the Program at: https://nyserda-portal.force.com/CORE_CONAPP_Program_Page. Once approved, NY-Sun Participating Contractors and/or Builders must submit a completed and signed Project Application package into the NYSERDA Portal, as detailed in the Program Manual, for review and approval. Participating Contractors and/or Builders will

be notified once an application is approved.

All Contractual questions should be directed to Jim Cowman at 518-362-0487 or jim.solicitations@nyserda.ny.gov. All Technical questions should be directed to PVprocessing@nyserda.ny.gov.

*** All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed applications will not be accepted.** Incomplete applications may be subject to disqualification. It is the applicant's responsibility to ensure that all pages have been completed and included in the application. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

The New York State Energy Research and Development Authority (NYSERDA) provides financial incentives for the installation by Contractors and Builders of new grid-connected solar electric photovoltaic (PV) systems for residential sites in any region that are 25kW or less, for nonresidential sites in Upstate and PSEG Long Island regions that are up to 750kW, and for nonresidential sites in Con Ed region that are up to 7.5MW. Incentives for nonresidential sites in Upstate region that are ranging from 750kW to 7.5MW are available through the Commercial/Industrial Program (PON 3082). Funding for the NY-Sun Incentive Program ("Program") has been allocated by the New York State Clean Energy Fund (CEF) and Regional Greenhouse Gas Initiative (RGGI) and the Order Authorizing the Clean Energy Fund Framework, dated January 21, 2016. An Order, dated May 14, 2020, authorizes additional CEF funds to achieve the expanded goal of 6GW by 2025. A further Order, dated April 14, 2022, authorized additional CEF funds to achieve the expanded goal of 10GW by 2030. A further Order, dated April 28, 2025, modified the Program budget and authorized CEF funds for 500 MW of additional capacity participating in the Statewide Solar for All program.

Incentives will be granted on a first-come, first-served basis and applications will be accepted through December 31, 2030, or until funds are fully committed, whichever comes first.

Cash incentives are available for eligible customers who wish to install PV systems through applications submitted by a Participating Contractor. A Participating Contractor has signed a Participation Agreement (with NYSERDA, agreeing to abide by Program terms and conditions). The Participating Contractors have established relationships with Builders. Contractors are responsible for the quality of the builders. Builders are responsible for the installation and quality of projects. Builders are responsible for maintaining a credentialed person on-staff.

A detailed description of the Program and the terms and conditions under which it operates is provided in the NY-Sun Incentive Program Manual available at <http://www.nyserda.ny.gov/solar-contractor-resources>.

Incentives are paid directly to the Contractor and must be applied in full to the cost of the PV system, thereby reducing the out-of-pocket cost to the customer.

A Builder must have demonstrated technical competence in the PV field and the Contractor/Builder is responsible for preparing and submitting all necessary project application and incentive paperwork to NYSERDA. A Builder must employ an individual who meets one of the three eligibility paths:

1. North American Board of Certified Energy Practitioners (NABCEP): installers choosing this path must be NABCEP certified Solar PV Installers within 24 months of entering the PON 2112 Program to retain their eligibility.
2. IBEW-NECA: Installers who are Journeymen Electrician with IBEW-NECA PV training.
3. UL (Underwriters Labs): Installers who choose to become credentialed through the UL must be certified by UL as a PV System Installer.

More information on how to become a Contractor can be found on the NY-Sun website at <https://www.nyserda.ny.gov/All-Programs/NY-Sun/Contractors/How-to-Become-a-Participating-Contractor>. In general, incentives for a typical residential or commercial system cover approximately 25-35% of the installed cost of a PV system.

In addition to financing that may be offered through a Contractor, the Program offers financing through Green Jobs-Green New York (GJGNY). Information on financing options, terms and qualification criteria can be found on NYSERDA's web site at the following link:

<http://www.nyserra.ny.gov/All-Programs/Programs/Residential-Financing-Options>

II. Program Requirements

The following rules apply to the Program and the payment of incentives:

Energy Efficiency Audit.

Residential Projects: A clipboard energy efficiency assessment must be performed. A clipboard assessment consists of two components: an interview of the home owners to determine energy-use habits and age of the home, and a home inspection to identify energy-saving opportunities. Certification an assessment has been completed must be indicated on the project application at time of submission. The inspection component of the assessment should take no more than 60 minutes. After the assessment, the results will be reviewed with the homeowner. A copy of the report will be left with the homeowner along with a list of Home Performance contractors and informational brochures detailing NYSEDA's energy efficiency programs. Customers will not be required to implement energy efficiency upgrades.

Nonresidential Projects: Building owners are given information on benchmarking tools, such as ENERGY STAR's portfolio manager benchmarking tool. If requested by the building owner, the contractor or builder will help input utility bill information in the tool to calculate an energy-use index and, where applicable, an ENERGY STAR score. Customers will not be required to benchmark or implement energy efficiency upgrades as a program prerequisite. Energy assessment completion must be indicated on the project application at time of submission. Any CDG project is exempt from the energy assessment requirements.

Incentive Highlights:

- Incentives are paid directly to "Contractor" but must be passed on in the full amount to the customer, unless a payment assignment has been identified for nonresidential projects. Incentives will not be provided directly to customers purchasing or installing PV systems.
- Incentives are only available for new equipment and PV systems that have not been installed (partially or completely) prior to being submitted to NYSEDA in accordance with the terms and conditions of this Program.
- Incentives for residential projects are capped based on a PV system size that does not exceed 110% of the total kWh consumption for the previous 12 months of electric usage. For residential new construction, systems must be sized not to exceed 110% of the calculated yearly projected kWh of electric usage.
- All potential PV system output losses associated with shading, system orientation, tilt angle, etc., must be analyzed and detailed for each PV System by the Contractor/Builder. If your system is shaded by trees, faces east or west, or is installed on a flat roof, the kWh output of your PV System will be less than ideal. All impacts on system output must be quantified and are considered during the review of project applications submitted by the Contractor/Builder. Incentives are reduced in proportion to output losses when losses from factors such as shading and orientation exceed 30%.
- The Program uses a MW Block incentive structure that is designed to provide certainty and transparency to the industry regarding incentive levels, accounts for regional market differences, provides a clear signal to industry that New York intends to eliminate cash incentives in a reasonable timeframe, and allows for the elimination of those incentives sooner in regions where the market conditions can support it, based on market penetration, demand, and payback. Information on the Program progress through the MW Blocks will be provided through a Dashboard. The Dashboard is an online, publicly facing tool that shows real-time progression in the current blocks, provides incentive levels and MW targets for subsequent blocks and provide details on the progress towards the overall NY-Sun Statewide PV initiative installed capacity goal of 10 GW.

III. General Conditions

Limitation

This solicitation does not commit NYSERDA to award a contract or to pay any costs incurred in preparing any application. NYSERDA reserves the right to accept or reject any or all applications received, and to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest.

Additional Information

Available on the NY-Sun Website at <https://www.nyserda.ny.gov/ny-sun>.

NY-Sun Commercial/Industrial Incentive Program

Program Opportunity Notice (PON) 3082

NY-Sun Project Applications and Contractor Applications currently being accepted.

Applications accepted May 4, 2015 through December 31, 2030, by 3:00 PM Eastern Time, or until funds are fully committed, whichever is earlier.*

Program Summary: The New York State Energy Research and Development Authority (NYSERDA) provides incentives for the installation by Contractors of new grid-connected solar electric photovoltaic (PV) systems that range from 750kW-direct current (dc) to 7.5MW-dc in the Upstate region. Incentives for residential sites in all regions, nonresidential sites 750kW or less in Upstate and PSEG Long Island regions, and nonresidential sites 7.5MW or less in Con Ed region are available through the NY-Sun Residential & Nonresidential Program (PON 2112). Funding for the NY-Sun Incentive Program ("Program") has been allocated by the New York State Clean Energy Fund (CEF) and Regional Greenhouse Gas Initiative (RGGI) and the Order Authorizing the Clean Energy Fund Framework, dated January 21, 2016. An Order, dated May 14, 2020, authorizes additional CEF funds to achieve the goal of 6GW by 2025. An Order, dated April 14, 2022, authorized additional CEF funds to achieve the expanded goal of 10GW by 2030. A further Order, dated April 28, 2025, modified the Program budget and authorized CEF funds for 500 MW of additional capacity participating in the Statewide Solar for All program.

For community solar projects participating in Statewide Solar for All (S-SFA) or Inclusive Community Solar Adder (ICSA), NYSERDA is offering Solar Energy Equity Framework (SEEF) incentives under new capacity blocks ("Upstate C/I SEEF Blocks"). Value of Distributed Energy Resources (VDER) compensation structure remains in place. **No new incentives are available for projects that are not participating in S-SFA or ICSA.**

Maintaining the overall NY-Sun program structure, each SEEF Block is specific to a sector and region and will become active once the applicable MW Block is closed. Until a sector/region's MW Block closes, SEEF incentives will continue to be available as "adder" incentives (Affordable Solar, Multifamily Affordable Housing Incentive, ICSA, S-SFA Adder). Projects in the SEEF Blocks are eligible to receive other incentive adders, including Prevailing Wage and Beneficial Siting (brownfield/landfill/floating) adders.

Incentives will be granted on a first-come, first-served basis, and PV project applications will be accepted through December 31, 2030, or until funds are fully committed, whichever comes first.

For projects 1 MW-ac or greater in capacity that submit utility interconnection application after April 14, 2022, or that submit applications to the Program on or after July 1, 2024, incentive will be conditioned on the developer paying prevailing wages for construction activities associated with project design and installation. Total incentives available is subject to change. NYSERDA reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

Information on the MW block design and SEEF block design, including real-time data on the current incentive levels for Upstate can be found by visiting nysenda.ny.gov/upstate-dashboard.

Application Submission: Potential Contractors must apply on-line to participate in the NY-Sun Commercial & Industrial Program at: https://nysenda-portal.force.com/CORE_CONAPP_Program_Page. Once approved, NY-Sun Commercial/Industrial Participating Contractors must submit a completed and signed Project Application package into the NYSERDA Portal, as detailed in the Program Manual, for review and approval. Participating Contractors will be notified once an application is approved.

All Contractual questions should be directed to Jim Cowman at (518) 862-1090, ext. 3652 or jim.solicitations@nyserda.ny.gov. Contractor Application questions may be sent to PVprocessing@nyserda.ny.gov. All Technical questions should be directed to Commercial.IndustrialPV@nyserda.ny.gov. Please reference PON 3082 when contacting NYSERDA with questions.

*** All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed applications will not be accepted.** Incomplete applications may be subject to disqualification. It is the applicant's responsibility to ensure that all pages have been completed and included in the application. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

The New York State Energy Research and Development Authority (NYSERDA) offers incentives for the installation of new grid-connected solar electric photovoltaic (PV) systems that range from 750kW-dc to 7.5MW-dc in the Upstate region.

Funding for the NY-Sun Commercial & Industrial Program has been allocated as part of the Clean Energy Fund with additional funding made available through the Regional Greenhouse Gas Initiative (RGGI) for New York State (NYS) electricity customers and the Order Authorizing the Clean Energy Fund Framework, dated January 21, 2016. An Order, dated May 14, 2020, authorizes additional CEF funds to achieve the expanded goal of 6GW by 2025. A Order, dated April 14, 2022, authorized additional CEF funds to achieve the expanded goal of 10GW by 2030. A further Order, dated April 28, 2025, modified the Program budget and authorized CEF funds for 500 MW of additional capacity participating in the Statewide Solar for All program.

Incentives will be allocated on a first-come, first-served basis and applications will be accepted on a rolling basis through December 31, 2030, or until funds are fully committed, whichever comes first.

A detailed description of the Program, incentives, and the terms and conditions under which it operates is provided in the NY-Sun Incentive Program Manual available at <http://www.nyserda.ny.gov/solar-contractor-resources>.

NYSERDA offers Solar Energy Equity Framework (SEEF) incentives for community solar projects structured as either Inclusive Community Solar Adder (ICSA) or Statewide Solar for All (S-SFA) under new capacity blocks ("Upstate C/I SEEF Blocks"). Maintaining the overall NY-Sun program structure, each SEEF Block is specific to a sector and region and will become active once the applicable MW Block is closed. Until a sector/region's MW Block closes, SEEF incentives will continue to be available as "adder" incentives (Affordable Solar, Multifamily Affordable Housing Incentive, ICSA, S-SFA Adder). Projects in the SEEF Blocks are eligible to receive other incentive adders, including Prevailing Wage and Beneficial Siting (brownfield/landfill/floating) adders. Value of Distributed Energy Resources (VDER) compensation structure remains in place. **No new incentives are available for projects that are not participating in S-SFA or ICSA.**

II. Program Requirements

Organizations that want to participate in the NY-Sun Commercial and Industrial Program must become a Participating Contractor. To become a Participating Contractor, organizations must complete a Contractor Application in which they agree to abide by the terms and conditions of the NY Sun Incentive Program Participation Agreement and Program Manual. These documents are available on the NY-Sun website at <https://www.nyserda.ny.gov/All-Programs/NY-Sun/Contractors/How-to-Become-a-Participating-Contractor>.

Applicants to the Commercial and Industrial Program must provide a minimum of three verifiable solar electric project references (project reference name, address, phone, and email) for completed, grid-connected solar electric installations that entered commercial operation in the past three years that, in aggregate, sum to at least

3MW for three projects. System size (kilowatts), interconnection date, and the applicant's role in the project must be specified. Construction photos for the projects listed as a reference are also required. Project references may not be provided by an owner or employee of the applicant's company or a related (subsidiary or parent) company, nor may references be provided by a relative of an owner or employee of the applicant's company or a related (subsidiary or parent) company.

Upon approval, the organization will be provided access to the NY- Sun Commercial and Industrial Program online applications platform and can submit project applications for incentives.

Participating Contractors are responsible for preparing and submitting all required PV Project Incentive Application documentation to NYSERDA.

Upon project completion, Participating Contractors must submit an invoice and the required documentation to the NYSERDA portal (see NY-Sun Incentive Program Manual). After review and approval, Participating Contractors will receive a single incentive payment from NYSERDA.

III. General Conditions

Limitation

This solicitation does not commit NYSERDA to award a contract or to pay any costs incurred in preparing any application. NYSERDA reserves the right to accept or reject any or all applications received, and to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest.

Additional Information

Forms are available on the NY-Sun Website at <https://www.nyserda.ny.gov/ny-sun>.

Introduction

Launched in August 2016, NYSERDA's Clean Energy Communities (CEC) program is for municipal officials and staff who want their municipalities to benefit from the new clean energy economy but struggle with tight budgets and limited staff. Municipalities can participate in Clean Energy Communities Round 3.0 to continue to move New York State towards a clean energy and sustainable economy.

By providing grants, coordinator support, and clear guidance for implementing a range of high-impact clean energy actions, NYSERDA is helping municipalities save money, grow the local economy, and improve the environment.

The program will continue to offer free technical assistance through regionally based Clean Energy Communities Coordinators. **As of November 7, 2024, 12:00P.M., the submission of High Impact Action Items is on pause, and no further High Impact Actions will be accepted.**

Key advantages to participating in the Clean Energy Communities program include:

- 1) **Free coordinator support**
- 2) **Clear pathways for implementing high priority actions**
- 3) **Flexible grant funding with no local cost share**
- 4) **Recognition for your municipality's leadership**

Acceptance of applications for PON 3298

Applications are accepted on a rolling basis until 3:00 p.m. Eastern Time on December 31, 2025, until funds are exhausted, or until the solicitation is revised or closed by NYSERDA, whichever comes first.

Eligible Applicants

Municipalities (county, city, town, or village governments) in New York State are eligible to apply for funds. Applicants are defined as Municipalities applying for a CEC grant. Communities whose mayor, supervisor or other authorized elected official's office prefers not to or is unable to receive NYSERDA funding directly may propose in via a municipal subdivision with a letter of support from the elected official's office or, in the case of New York City, the Department of Citywide Administrative Services from a deputy assistant commissioner or above.

Program Updates

Program details and requirements may change from time to time to maximize program impact. Any changes to this solicitation will be posted on the Clean Energy Communities website at www.nyserda.ny.gov/cec

Questions

Program questions may be directed to Chris Reohr at 518-362-0570, or cec@nyserda.ny.gov.

Contractual questions may be directed to Lori Armstrong at 1-866-NYSERDA, ext. 3142.

How to Participate

Step 1. Connect with a Clean Energy Communities Coordinator

Clean Energy Communities (CEC) Coordinators are based in each region of the state to help municipal staff navigate the program. Regions are defined as Regional Economic Development Council (REDC) regions. To access this support, please send an email to CEC@NYSERDA.NY.GOV or visit <https://www.nyserdanyc.org/ALL-PROGRAMS/CLEAN-ENERGY-COMMUNITIES/FIND-A-COORDINATOR> to identify your local coordinator.

Step 2. Complete High-Impact Actions: CLOSED

As of November 7, 2024, 12:00P.M., the submission of High Impact Action Items is on pause, and no further High Impact Actions will be accepted. High-Impact Actions are steps municipalities can take to save energy and improve the environment. The municipality completes the action by complying with a specific set of requirements. High Impact Action checklists and templates are available at <https://www.nyserdanyc.org/ALL-PROGRAMS/CLEAN-ENERGY-COMMUNITIES/HOW-IT-WORKS/TOOLKITS> to help municipalities complete the necessary requirements for High Impact Action submittals.

Step 3. Submit High-Impact Actions: CLOSED

To earn credit for completing high-impact actions, please visit

https://portal.nyserdanyc.org/CEC_HIGHIMPACT_ACTION_ITEM_DOCUMENT_PAGE?

As of November 7, 2024, 12:00P.M., the submission of High Impact Action Items is on pause, and no further High Impact Actions will be accepted. Documentation must meet the specific requirements detailed in this guidance document and in the relevant tool kit. NYSERDA will review the submitted documentation and provide notification that it has been approved or if it is incomplete and needs to be resubmitted. Municipalities are encouraged to submit documentation as each high-impact action is completed. Municipalities are strongly encouraged to work with their CEC Coordinators prior to submitting documentation. All submittals are subject to NYSERDA review and approval.

Step 4. Earn a Clean Energy Grant

Municipalities may be eligible for either Action Grants or Designation Grants. Grants are available on a first-come-first-served basis until all grant awards are claimed or all funds are exhausted.

Action Grants

Action Grants are available for Community Campaigns. The requirements for the Action Grants may be found in the High Impact Actions section of this guidance document.

Designation Grants

Municipalities collect points by completing high-impact actions. Each high-impact action has a certain number of points assigned to it, as listed below in this document. Once a municipality collects enough points, they can move on to a different point threshold and designation level and earn more grant funding for higher point levels.

Through the program NYSERDA is offering different levels of designation as outlined in the tables below. Please note that the funding levels decrease after September 1, 2024 to reward communities taking actions sooner.

The following bullet points identify designation restrictions and requirements per the incentive table listed below:

- Municipalities that have earned points previous to December 13, 2023 will have their existing points carried over into the program following the release of this PON.
- If a municipality enters CEC Round 3.0 with points above a designation threshold and has already been awarded a grant for that threshold, they cannot earn a grant at that threshold again. This is applicable to all designation levels.
- Municipalities entering CEC Round 3.0 with 1,000 to 2,900 points are eligible for the 1-Star Designation grant upon completing one new High Impact Action after December 13, 2023.
- Municipalities that enter CEC Round 3.0 with more than 5,000 points and did not previously earn a corresponding 5,000-point incentive may earn grant funding at the current incentive levels in this PON upon completing one new High Impact Action after December 13, 2023.
- Municipalities entering CEC Round 3.0 with 7,000 points or more are eligible for the 4-Star Designation grant upon completing one new High Impact Action after December 13, 2023.
- Municipalities that were notified of grant eligibility under the terms of the Leadership Round PON but that have not yet been awarded a grant must submit an application for the grant amount identified in the notification email and are eligible for the Leadership Round's DAC bonus, even if the grant application is submitted after the release of this PON. Municipalities in this position must apply using the Leadership Round's Grant Application and procedures; please contact cec@nyserda.ny.gov if you need a copy of the Leadership Round's Grant Application or terms.

How Can I Check My Community's Progress?

As of November 7, 2024, 12:00P.M., the submission of High Impact Action Items is on pause, and no further High Impact Actions will be accepted. Points will no longer be accumulating at the below link. Each community's point balance as of November 7 12:00 P.M., 2024 is available at [HTTPS://WWW.NYSERDA.NY.GOV/ALL-PROGRAMS/CLEAN-ENERGY-COMMUNITIES/TRACKING-PROGRESS/SCORECARD](https://www.nyserda.ny.gov/all-programs/clean-energy-communities/tracking-progress/scorecard)

DESIGNATION GRANTS BEFORE 10/1/24:

To earn funding at these levels, the municipality must submit the required documentation for the action(s) that qualifies them for the designation grant by 9/30/24 at 11:59 PM EST. If the action(s) is rejected, municipalities will not be eligible for grant awards at this level.

Designation Level	Number of Points	Funding for Small Municipalities (Up to 39,999 population)	Funding for Large Municipalities (40,000 or greater population)
CEC Designation - must complete 4 high-impact actions	N/A	\$5,000	\$5,000
1-Star Designation ★	1,000	\$10,000	\$10,000
2-Star Designation ★★	3,000	\$50,000	\$125,000
3-Star Designation ★★★	5,000	\$100,000	\$200,000
4-Star Designation ★★★★	7,000	\$175,000	\$275,000
5-Star Designation ★★★★★	9,000	\$250,000	\$350,000

DESIGNATION GRANTS ON OR AFTER 10/1/2024:

Designation Level	Number of Points	Funding for Small Municipalities (Up to 39,999 population)	Funding for Large Municipalities (40,000 or greater population)
CEC Designation - Must complete 4 high-impact actions	N/A	\$5,000	\$5,000
1-Star Designation ★	1,000	\$10,000	\$10,000
2-Star Designation ★★	3,000	\$40,000	\$100,000
3-Star Designation ★★★	5,000	\$75,000	\$150,000
4-Star Designation ★★★★	7,000	\$125,000	\$200,000
5-Star Designation ★★★★★	9,000	\$200,000	\$300,000

The determination of small versus large community size is found in the above tables is based on 2010 Census data.

Step 5. Submit Grant Application

How to Access Grant Funding

Once a municipality completes all stated requirements for grant eligibility, NYSERDA will send an email to the community representative who submitted the action item documentation. This email will explain how to apply for the grant including the grant amount for which the municipality is eligible and the grant application due date; the applicant has three months from the date of this email to submit a grant application describing a proposed project. If the due date falls on a Saturday, Sunday, or legal holiday, the due date is moved to the next business day. Projects must be ready to commence within three months of award notification and should be completed within three years of contract execution. Clean Energy Communities grant funds must be used for new work. If the proposed work is completed prior to execution of the NYSERDA grant contract, it is not eligible. No local cost share is required for grant applications, although cost share could result in a higher score. It is NYSERDA's expectation that the municipality will work with its CEC Coordinator to identify mutually beneficial grant project options.

Grant applications are accepted through an online grant application portal at <https://www.nyserda.ny.gov/cec>. Municipalities must propose either a pre-approved project type or a custom project that meets the selection criteria below. If you are having any trouble or are unable to submit via the portal, please contact your local Clean Energy Communities Coordinator for assistance or email CEC@NYSERDA.NY.GOV for assistance.

All project components located within a Disadvantaged Community (DAC) may be eligible for additional CEC grant funding. See Step 6 (Identify Opportunities for Disadvantaged Community Assistance) for additional details. DAC refers to the definition established by the NYS Climate Justice Working Group which used 45 indicators to determine DAC eligibility and is available here: <https://climate.ny.gov/resources/disadvantaged-communities-criteria/>

If a proposal is not approved, the applicant has one opportunity to revise and resubmit its rejected application within two months of rejection. Application extension requests are not available and will not be granted under this PON, as NYSERDA seeks to deploy funding in a timely manner. NYSERDA reserves the right to adjust funding levels and eligibility criteria as necessary to ensure the success of the program.

All grant-eligible municipalities must complete a CEC grant application workbook, located on the [CEC 3.0 webpage](#). There are three pathways to grant funding depending on the dollar amount of the award:

1. **For grants of \$5,000**, the applicant must describe the clean energy project in a paragraph format within the grant application workbook, and, if approved, the award will be paid in full directly without a contract.
2. **For grants of \$7,500 - \$30,000 (including DAC bonus funding, if applicable)**, the applicant must apply through pre-approved or custom project processes in the grant application workbook. Once approved, pre-approved projects will be paid in full directly without a contract with the exception of custom projects or building energy efficiency projects requesting a CEC Energy Study. Custom projects and building energy efficiency projects requesting CEC Energy Studies will require a contract with NYSERDA.
3. **For grants greater than \$30,000 (including additional DAC bonuses, if applicable)**, the applicant must propose either a pre-approved project type or a custom project in the grant application workbook that meets the selection criteria below. These projects will require a contract with NYSERDA.

Pre-Approved Projects

Municipalities proposing pre-approved project types must comply with the performance requirements included in the Statement of Work included within Sample Agreement (Attachment B) template provided with this PON. This template includes performance requirements for pre-approved project types including, but not limited to, conversion of streetlights to LED, installation of solar, purchase of electric vehicles, installation of electric vehicle charging stations, purchase of electric landscaping equipment, NYPA Clean Energy Solutions projects, and implementation of eligible building upgrades recommended in a Clean Energy Communities Energy Study or ASHRAE Level II or III Energy Audit completed no more than five years prior to application.

Custom Projects and Evaluation Criteria for Custom Projects

Applications for custom projects will be evaluated based on the following criteria, with a total number of possible points allocated to each. Municipalities that propose a custom project must earn a minimum threshold of the selection criteria points to be considered eligible. If a custom project proposal includes a pre-approved project element, the application

must identify exceptional factors which adversely affect the applicant's ability to apply for these elements as pre-approved project types. If the custom project is better suited for a pre-approved project type, NYSERDA reserves the right to shift the project to that application path. If the proposed project is located in a DAC area, the project is eligible for a DAC grant bonus of 50% of project grant funding.

The evaluation criteria below are listed in order of importance.

1. To what extent does the project/initiative have a positive direct impact on energy use and greenhouse gas emissions?
 - The total cost of the proposal achieves at least one ton of greenhouse gas savings annually per \$10,000 total dollars spent (1 MTCO₂e / \$10,000)
 - Does the proposal provide a clear estimate along with a brief description/methodology of annual energy savings and greenhouse gas emission reduction to support these estimates?
2. To what extent does the municipality present a thorough, sound, detailed approach for accomplishing the objectives of its proposal within a reasonable timeframe?
 - Is the project clearly and concisely defined?
 - Are project costs justified based on expected benefits?
 - Is the budget broken down by Task to match the Tasks established in the scope of work?
 - Is there an estimate of the timeframe for completing different phases of the project including the design phase and the construction/implementation phase?
 - Proposals seeking to offer rebates or mirror other existing utility, NYSERDA, or other NYS programs are not eligible.
3. To what extent will the project/initiative benefit [Disadvantaged Communities \(DAC\)](#), leverage public and private dollars, and/or generate economic development benefits (*i.e.*, temporary or permanent job creation and investment)?
 - Is the project located in a DAC (as defined in Step 6)?
 - Does the proposal include cost-sharing? If cost-sharing is included, is it documented?
 - Does the project provide direct economic development benefits including job creation or retention, savings, investment, or multiplier affects?
 - Approximately how many temporary or permanent jobs is the project likely to create?
4. To what extent will efforts be made to collaborate with other municipalities and to transfer knowledge to the broader region and state?
 - To what extent does the municipality provide specific tools and resources that other municipalities can use to facilitate collaboration or develop their own projects?
 - Is there a strategy in place to promote the project so that several other municipalities are made aware?
 - Will the municipality host an open house, presentation, website posting, or webinar to describe best practices and lessons learned from the project?

Application Requirements & Review Process

Applications will be scored and awarded on a rolling basis. No applicant or application is guaranteed funding.

Applications will be reviewed as outlined below.

- The grant application and NYSERDA Portal for submitting the grant application are available at www.nyserda.ny.gov/cec.
- Attachments to PON 3298 include a spreadsheet-based Grant Application (Attachment A). The “Contract” tab of the Grant Application includes a draft Statement of Work (SOW) included within the Sample Agreement (Attachment B).
- For each funding award, the Grant Application and a letter of commitment on municipal letterhead and signed by the chief elected official of the applying jurisdiction must be uploaded to the NYSERDA Portal.
- NYSERDA may reach out to municipalities via email or telephone with specific follow-up questions after reviewing proposals. Should NYSERDA request additional information, NYSERDA will contact the applicant and identify the timeframe for this additional information.
- Applicants that propose a custom project must earn a minimum scoring threshold of available selection criteria points to receive an award. If a proposal is found to be incomplete or if it does not earn the minimum threshold, the applicant may reapply one time within two months of notification.
- Review meetings shall be held periodically on at least a quarterly basis, depending on the volume of applications.
- NYSERDA, in order to avoid double-funding projects or measures within projects, may adjust awarded funding amounts at any time based on new information regarding other project funding secured.
- NYSERDA reserves the right to adjust award amounts at its sole discretion.
- Municipalities proposing in for awards that require NYSERDA contracts (see p. 10 above) must agree, or provide written exceptions, to NYSERDA’s standard contracting Terms and Conditions, which can be found at www.nyserda.ny.gov/cec.
- All payments made in advance of work being completed are subject to recapture for non-compliance or non- performance.

Metrics Report

Measurement of benefits associated with Clean Energy Communities projects is required in all NYSERDA agreements. It is important to begin considering project benefits at the application stage. Once awarded, each successful applicant shall submit preliminary (design) and final (completion) quantified documentation of the benefits of the project, including greenhouse gas reductions and energy savings, determined and documented in Exhibit E of Attachment B, SOW, which can be found on the www.nyserda.ny.gov/cec webpage. Each successful applicant should design the project to achieve the benefits identified in these submissions. NYSERDA will use the Metrics Report to assess activities in the project, capture the extent of benefits delivered, and gauge performance of the project and of the CEC Program.

NYSERDA Verification

NYSERDA may independently verify completion of any high-impact action and grant project. NYSERDA may inspect or confirm the validity of the information provided or request additional information at any time. NYSERDA may also request applicable documentation including, but not limited to, photos of the funded project components.

Step 6. Additional Opportunities Available Through the CEC Program

Disadvantaged Community Opportunities

The Climate Leadership and Community Protection Act (Climate Act or Climate Law) requires State agencies, authorities, and entities to direct a minimum of 35%, with a goal of 40%, of the benefits of clean energy place-based spending to disadvantaged communities.

Designation or Action Grant awards greater than \$5,000 may be eligible for a grant bonus of up to 50% of the awarded grant amount for a clean energy project if located in a New York State Disadvantaged Community in the applying jurisdiction.

Grant applications will be assessed for the Disadvantaged Community Bonus based upon the definition that is in use at the time of application.

The DAC map can be found on the Climate Act website here: <https://climate.ny.gov/resources/climate-justice-working-group/>. A project location lookup tool is available at <https://climate.ny.gov/resources/disadvantaged-communities-criteria/>. Eligibility is subject to NYSERDA verification.

Clean Energy Communities (CEC) Energy Studies

What is a CEC Energy Study?

CEC Energy Studies are prepared by consultants working on NYSERDA's behalf, and include a comprehensive, fuel-neutral, unbiased evaluation of all potential cost effective low-cost/no-cost and capital improvement upgrades, as well as potential electrification measures using a standardized calculation methodology pre-approved by NYSERDA. The cost of the study(ies) are deducted from earned grant funding and then paid directly to the third-party vendor by NYSERDA.

Applicants proposing to implement building upgrades as a Pre-Approved Project type must complete a CEC Energy Study or ASHRAE Level II or III Study. Previously performed ASHRAE Level II and III studies obtained by municipalities can be used as a prerequisite for Pre-Approved Building types in the same way as NYSERDA-funded CEC Energy Studies. Municipalities that propose to implement building upgrades as a Pre-Approved Project type and have already completed an ASHRAE Level II or III or CEC Energy study must have completed the study no more than five years prior to application. Municipalities requesting a CEC Energy Study should be prepared to provide at least 12 months of energy bills for the intended building of study upon request. NYSERDA reserves the right to discontinue offering CEC Energy Studies if it is unable to meet the demand with existing contracted engineering services or if funding is no longer available.

Opportunities to receive a CEC Energy Study

- 1. Through grant funding** - For grant awards greater than \$5,000, municipalities may apply to use funds for one or more CEC Energy Studies. An amount equal to the cost of the CEC Energy Study(ies) will be deducted from the original grant award. This deduction is reflected in the Total Amount of Award listed at the top of the grant agreement with NYSERDA. If the cost of the study(ies) exceeds the award amount, the applicant may negotiate with the NYSERDA-assigned vendor to pay the difference directly.
- 2. Completion of Benchmarking – CEC Energy Study Qualification High Impact Action** - Municipalities that have completed the Benchmarking – CEC Energy Study Qualification Item are eligible for a CEC Energy Study

conducted on their choice of one benchmarked building identified in the submitted Benchmarking – CEC Energy Study Qualification High Impact Action. This study will be provided at no cost and will not be deducted from any earned grant funding, but will be available based on the completion of the Benchmarking – CEC Energy Study Qualification action.

Categories of High-Impact Actions

As of November 7, 2024, 12:00P.M., the submission of High Impact Action Items is on pause, and no further High Impact Actions will be accepted.

1. Buildings and Facilities Category

Benchmarking

300 to 1,800 points | Applicable to All Municipalities

Description

Benchmarking is a policy that a municipality adopts that requires the annual reporting of energy used in buildings. Municipalities may require the annual disclosure of energy used in municipal buildings or in large private buildings. Measuring and sharing data on building energy use will help identify opportunities to cut energy waste.

Municipalities must complete one or more of the following to earn credit.

Benchmarking - Advanced Reporting

300 Points

Submission requirements:

- ☐ Submit a certified copy of an executed local law, ordinance, or resolution (template legislation can be accessed in the Benchmarking toolkit at www.nyserda.ny.gov/cec) that requires the applying jurisdiction to make available to the public on an annual basis, energy use information for each municipal building that is owned or occupied by the applying jurisdiction and is 1,000 square feet or larger. At a minimum, publicly disclosed energy use information shall include each building's energy use intensity (EUI), annual greenhouse gas emissions, and an energy performance score where available. Date of completion is when the legislation was adopted. The legislation must require the following:
 - Create an ENERGY STAR Portfolio Manager Account
 - Gather basic information required by Portfolio Manager and set up property profile(s)
 - Obtain monthly, whole building energy use data for all fuel types including, but not limited to, electricity, natural gas, fuel oil, chilled water, steam, and diesel
 - Enter property uses and details into profile(s)
 - Enter energy use data for all fuel types
 - Generate and review the building's report in Portfolio Manager
 - Make available to the public on the internet or other publicly accessible format annual summary statistics for each covered property including Energy Use Intensity (EUI), annual greenhouse gas emissions, and an energy performance score where available
 - Submit a screenshot of a webpage on the applying jurisdiction's website where a benchmarking report is posted that includes no less than 24-months of energy use information as described above for municipal buildings. If the jurisdiction does not have a website, the jurisdiction must attest that the report is available upon request.
- ☐ Share your municipality's Portfolio Manager account with NYSERDA. Add "NYSERDAcec1" contact in your My Contacts. Share with "view all read only access" permissions to the NYSERDAcec1 contact for all buildings and meters in your Portfolio Manager account. Submit a screenshot on the Sharing Tab of your Portfolio Manager

account which shows an accepted share request with NYSDAcec1, or comparable information, stating that NYSDA has accepted the sharing request. Date of completion is when the sharing request was accepted.

Benchmarking – CEC Energy Study Qualification

No Points Awarded; Free Energy Study

Completing an energy study on your municipal building is the first step to building a solid plan for improving energy efficiency. Municipalities that complete this action will be eligible for a free CEC Energy Study for one municipal building. Prepared by consultants working on NYSDA's behalf, the CEC Energy Study is a comprehensive, fuel-neutral, unbiased evaluation of all potential cost effective low-cost/no-cost and capital improvement upgrades, as well as potential electrification measures using a standardized calculation methodology pre-approved by NYSDA. The cost of the study will be paid directly by NYSDA to the third-party vendor. To complete this action, the applicant must have previously been approved for Benchmarking – Advanced Reporting. Connect with your regional CEC coordinator for assistance with the Share Forward process if necessary. Date of completion is when “Share Forward” abilities were provided to NYSDA.

Submission requirements:

- ☐ Enable “Share Forward” abilities to NYSDA (“NYSDAcec1”) with all properties in Portfolio Manager and submit a screenshot from Portfolio Manager, or comparable information, stating that NYSDA has been granted “Share Forward” abilities.
- ☐ Submit a screenshot of a webpage on the applying jurisdiction's website where a benchmarking report is posted that includes at least the two, **most recent full calendar years of data** (i.e., 2021 and 2022 if submitting in 2023). If the jurisdiction does not have a website, the jurisdiction must attest that the report is available upon request.
- ☐ Submit a completed CEC Energy Study Qualification Submission form (accessed in the Benchmarking toolkit at www.nysda.ny.gov/cec).

Once the action is approved, NYSDA will provide further instructions and connection with the auditor. Municipalities are encouraged to use their Municipal Building Scorecard to identify a building with the greatest opportunity for energy and cost savings, which would be an ideal candidate for the energy study. NYSDA reserves the right to reject buildings nominated by the municipality for the CEC Energy Study.

Benchmarking - Large Private Buildings

1,500 Points (applicable to cities, towns, and villages over 40,000 population)

Submission requirements:

- ☐ Submit a copy of an executed local law or ordinance, (template legislation can be accessed in the Benchmarking Private Buildings toolkit at www.nysda.ny.gov/cec) as described for Municipal Buildings above, but apply the requirements to the owners of commercial and multifamily buildings that are 25,000 square feet or larger. Date of completion is when the legislation was adopted.

Build Ready

100 to 800 points | Applicable to all Municipalities

Description

The Build-Ready Program advances large-scale renewable energy projects on underutilized land, such as brownfields, landfills, former industrial sites, parking lots, and abandoned or existing commercial and industrial sites.

Working with local partners and stakeholders, the Build-Ready Program takes difficult sites and makes them “build-ready” for private renewable energy developers to ultimately construct and operate. The Build-Ready Program carries out the project design, engineering, permitting, and electric grid interconnection activities as well as developing a project host community benefit package. Once a site has reached specific develop milestones, the Build-Ready Program runs a competitive request for proposal to award and transfer the project to a private developer for final design, financing, construction, ownership, and operation and to procure Tier 1 Renewable Energy Certificates (RECs) created through the production of renewable energy from the Build-Ready project.

Additional information regarding the Build-Ready Program can be accessed at <https://www.nyserda.ny.gov/build-ready>.

These actions must have been completed after December 13, 2023 to earn credit.

Site Nomination

100 Points

Prior to submission, make sure the submission materials include:

- ❑ The municipality must submit proof that a site in their municipality was submitted through the Build Ready program (e.g., a PDF of the nomination form or screenshot). An elected official, local community member, private company, or other interested party nominates a potential Build-Ready site using NYSERDA’s [Large-Scale Renewables “Build-Ready” Site Nomination Form](#). Site eligibility requirements can be found [here](#). Date of completion is when the site was nominated through the online form.

Site Selection

700 Points

Submission requirements:

- ❑ Submit a copy of the signed Memorandum of Understanding (MOU) between the municipality and NYSERDA. The Build-Ready Team has developed a Memorandum of Understanding (“MOU”) to facilitate the study and potential development of a site prior to NYSERDA entering into a lease-option agreement or other formal agreement. The MOU is a non-binding preliminary document that provides for information-sharing and states that, if preliminary analysis indicates that a site is suitable for development under the Program, the parties will negotiate in good faith to enter into mutually agreeable site-control documents such as a lease-option agreement. Date of completion is when the MOU was executed.

Renewable Energy

300 – 4,600 Points | Applicable to all Municipalities

Description

A municipality's decision to subscribe to clean Community Distributed Generation (CDG), and/or host or own clean distributed energy resources, like solar, hydro, wind, or battery energy storage, highlights its role as a leader in addressing climate change and protecting the environment.

Municipalities can receive points in the CEC program by subscribing municipal accounts to clean CDG (e.g., community solar), and/or hosting or installing clean distributed energy resources on municipal property.

As the CEC program strives to guide municipalities towards decarbonization and recognize their efforts, municipalities can gain additional points as they complete new actions over time. Municipalities can choose to complete any or all of the actions below.

CDG Subscription

300 points

Municipalities may subscribe to one or more clean CDG projects to receive utility bill discounts, saving money for the municipality. In addition, by municipalities entering into agreements to purchase energy as an “anchor” off taker, they may make it easier to develop CDG projects that benefit residents as well. This action encourages municipalities to serve as that anchor to enable more New Yorkers to benefit from CDG. Date of completion is when the CDG project began generating electricity.

Submission requirements:

- ☐ Submit a bill from the utility or CDG host demonstrating an active municipal subscription to a CDG project.
- ☐ Submit a completed Renewable Energy Certification Form (accessed in the Renewable Energy toolkit at www.nyserda.ny.gov/cec) showing the municipal electric load that is subscribed to CDG, including signing the certification that the applying municipality has **NOT** already received points for municipal CDG subscriptions through the Clean Energy Upgrades action in a previous round of the Clean Energy Communities program.

Host Clean Energy Generation Installation on Municipal Property

400-1,500 points

Finding suitable sites is one of the main barriers to siting solar, wind, or hydro. By allowing third-party owners to install clean energy installations on municipal rooftops, parking lots, landfills, or other sites, municipalities can address one of the key barriers to the clean energy transition. Municipalities can then take advantage of the installations through Power Purchase Agreements and/or CDG subscriptions. In addition, this action allows municipalities to host clean CDG projects, which provide utility bill discounts to local residents including low-income households. Eligible technologies for this action include solar, wind and hydro. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement. This action is not applicable to installations that the municipality owns (see Clean Energy Generation Installation Owned by Municipality to earn credit for municipality-owned installations). Date of completion is when the clean energy installation(s) started producing electricity. Municipalities that host a clean energy installation that started producing electricity on or after January 26, 2021 will be eligible for this action.

Host Clean Energy Generation Installation on Municipal Property		
Tier Number	Total Project(s) Size	Points
Tier 1	5 kW - 49.9 kW DC	400
Tier 2	50 kW - 99.99 kW DC	+ 500 Additional Points
Tier 3	100 kW DC or more	+ 600 Additional Points

Submission requirements for any of the above:

- ☐ Submit a completed Renewable Energy Certification Form (accessed in the Renewable Energy toolkit at www.nyserda.ny.gov/cec) showing the location of the installation(s), the total size, and that the site(s) is currently producing electricity.
- ☐ Submit a copy of the hosting agreement or a screenshot of an incentive approval in the NY-SUN Program.

Clean Energy Generation Installation Owned by Municipality

600-2,100 points

With the recent passage of the Inflation Reduction Act, municipalities are now eligible for “Elective Pay,” which allows them to receive tax credits even though municipalities don’t pay federal income taxes, a positive change from prior tax rules. By owning a clean energy installation, municipalities may now receive all the financial benefits from the installation and can help more of the financial benefits stay local. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement. Date of completion is when the clean energy installation(s) started producing electricity. Municipalities that own a clean energy installation that started producing electricity on or after January 26, 2021 will be eligible for this action.

Own Clean Energy Generation Installation		
Tier Number	Total Project(s) Size	Points
Tier 1	5 kW - 49.9 kW DC	600
Tier 2	50 kW - 99.99 kW DC	+ 700 Additional Points
Tier 3	100 kW DC or more	+ 800 Additional Points

Submission requirements for any of the above:

- ☐ Submit a completed Renewable Energy Certification Form (accessed in the Renewable Energy toolkit at www.nyserda.ny.gov/cec) showing the location of the installation(s), municipal ownership of installations, the total size corresponding to the requested points in the table above, and that the installation is currently producing electricity.
- ☐ Submit the application number or a screenshot of an incentive approval in the NY-SUN Program. Or, if the project did not go through the NY-SUN Program, please submit an explanation on municipal letterhead for not applying to NY-SUN along with paid invoice and photographs of the completed project.

100% Renewable Electricity

700 points

A local government's decision to purchase renewable energy for its electricity needs highlights its role as a leader in addressing climate change and protecting the environment.

Submission requirements:

- ☐ Submit a completed 100% Renewable Electricity Certification Form (accessed in the 100% Renewable Electricity toolkit at www.nyserda.ny.gov/cec) or comparable information. Requested information includes the average annual load of all municipal electricity accounts and the percentage of the load that will be matched with New York renewable energy certificates (RECs) that are retired in a New York State Generation Attribute Tracking System (NYGATS). RECs generated by state-owned resources including New York Power Authority-owned facilities do not qualify. RECs must be produced in the same calendar year as the electricity consumption. To earn credit for this action, the electricity consumption must occur in 2021 and later.
- ☐ Date of completion for this action is defined as the date after January 26, 2021 when the renewable energy is delivered.

Clean Energy Upgrades and Municipal Building Demonstration

100 – 4,100 points | Applicable to all Municipalities

Description

As municipalities reduce their GHG emissions, conducting retrofits and upgrades to reduce GHG emissions in existing buildings is a critical step. Additionally, municipalities that go further and convert existing buildings or new municipal facilities to use heat pumps and/or to be zero emissions inspires the municipality to decarbonize. This action will give municipalities credit for converting and retrofitting a municipal building, installing energy efficient technology, and implementing energy efficiency operations strategies.

Each project component of the upgrades must have been substantially completed after August 1, 2016. Date of completion for these actions is the date the clean energy upgrades or net-zero demonstration achieved substantial completion, and/or the date that ground- and/or air-source heat pump systems become operational as the building's primary heating and cooling systems, and/or the date that the pool heat pump became operational as the pool's primary heating system.

Clean Energy Upgrades

500-1,000 points

For this category, municipalities must submit documentation that demonstrates a minimum percent reduction in emissions for all municipally owned or occupied buildings 1,000 square feet and larger. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement. Each project component of the upgrades must be substantially completed after August 1, 2016.

Clean Energy Upgrades			
Tier Number	% Reduction	Points	Prequalification
Tier 1	10% reduction	500	If you received points through a previous CEC PON for a 10% reduction, you are not eligible.
Tier 2	15% reduction (an additional 5% from the previous tier)	+ 200 Additional	Must have already received approval for the 10% reduction tier.
Tier 3	20% reduction (an additional 5% from the previous tier)	+ 300 Additional	Must have already received approval for the 10% and 15% reduction tiers.

Submission requirements for any of the above:

- ☐ Submit an ENERGY STAR® Portfolio Manager® benchmarking report including energy use information for each municipal building that is owned or occupied by the applying jurisdiction that is 1,000 square feet or larger. The report shall include each building's energy use intensity (EUI) and annual greenhouse gas emissions. The report should cover at least 12 months of energy use of the portfolio from the year(s) prior to the commencement date of the upgrades as the baseline.
- ☐ Share read-only access to the applicant's Portfolio Manager account with NYSERDA and submit an email from Portfolio Manager or screenshot of the Portfolio Manager Sharing Page, or comparable information, stating that NYSERDA has accepted the sharing request.

- ❑ Submit succinct and relevant documentation that demonstrates a minimum 10 percent reduction in greenhouse gas emissions against the baseline with projects that are substantially complete by the date of submission. The documentation may include 1) an ASHRAE Energy Audit, 2) an approved pre-and-post engineering study that identifies implemented Energy Conservation Measures, 3) an executed contract or agreement with an energy efficiency contractor, or 4) comparable information.
- ❑ Submit a complete Clean Energy Upgrades Certification Form, available in the Clean Energy Upgrades toolkit at www.nyserda.ny.gov/cec. Information required in the certification form includes, but is not limited to, specific equipment or infrastructure upgrades and estimated energy savings of implemented measures, as well as a certification that your municipality has completed the pre-qualifications as noted above.

Greenhouse gas emission reductions must be achieved by building energy efficiency improvements and cannot be achieved by the installation or subscriptions of renewable energy. Renewable energy projects including solar, community distributed generation (CDG), wind, hydro, or battery energy storage should be submitted under the Clean Energy Engagement action.

Municipal Building Demonstrations: Clean Heating and Cooling

700-1,700 points

Currently, fossil-fuel based thermal energy – primarily natural gas, propane and fuel oil – is the main energy source for space heating and domestic hot water in the residential and commercial sectors. It is responsible for about one-third of New York’s energy-related greenhouse gas emissions. Clean heating and cooling technologies such as ground- and air-source heat pumps provide environmental benefits, energy bill savings, increased comfort levels and health benefits compared to conventional heating and cooling technologies. Municipalities can lead by example by installing clean heat technology and play an important role in encouraging adoption of ground- and air-source heat pump systems. This action is designed to demonstrate the benefits of clean heating and cooling technologies.

Municipalities may earn credit for the Municipal Building Demonstrations: Clean Heating and Cooling 1,000-14,999 Square Feet action and the Municipal Building Demonstrations: Clean Heating and Cooling 15,000 Square Feet and Above action, if submitting for clean heating and cooling installations at separate buildings. However, municipalities may not earn credit for a clean heating and cooling installation that previously was approved through the Clean Heating and Cooling Demonstration action as part of the CEC Leadership Round. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement.

Municipal Building Demonstration: Clean Heating and Cooling		
Tier Number	Building Square Footage	Points
Tier 1	1,000-14,999 Square Feet	700
Tier 2	15,000 Square Feet and Above	1,000

Submission requirements for any of the above:

- ☐ Submit a completed Municipal Building Demonstration Certification Form (available in the Municipal Building Demonstration toolkit at www.nyserda.ny.gov/cec) confirming that at least one municipal building owned and operated by the applicant has been recently converted or built to use clean heating and cooling as its primary source (providing heating and cooling for 75% or greater of the building's heating load). This includes signing the certification that the applicant is submitting for a clean heating and cooling installation at a building that did not already earn credit through the Clean Heating and Cooling Demonstration action as part of the CEC Leadership Round. Applicants may receive credit for clean heating and cooling actions if submitting for a clean heating and cooling installation at a municipal building that was not previously awarded credit. Eligible building(s) must:
 - Meet the square footage of the requested points amount in the table tier above
 - Be open to the public all year long.
 - Date of completion for this action is defined as the date that ground- and/or air-source heat pump systems become operational as the building's primary heating and cooling systems. This date must be after August 1, 2016 to earn credit for this action.
- ☐ Submit at least one photograph of an educational kiosk, display, and/or materials intended to educate municipal staff and the public about beneficial electrification.

Municipal Building Demonstrations: Net Zero

500-1,300 points

As municipalities reduce their GHG emissions through various strategies, developing and retrofitting zero emissions buildings are a critical step to reducing overall GHG emissions. This type of project also inspires the municipality to decarbonize. This action will give municipalities credit for building or retrofitting a municipal building to be zero emissions through renewable energy technology installation, energy efficient technology installation, and implementation of energy efficiency operations strategies.

Please note that municipalities can also earn credit for the Municipal Building Demonstration: Net Zero action(s), the Municipal Building Demonstration: Clean Heating and Cooling action(s), Clean Energy Upgrades, and/or the Own Clean Energy Installation action(s), if all are applicable to a net zero building. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement.

Municipal Building Demonstration: Net Zero Building Size		
Tier Number	Building Square Footage	Points
Tier 1	1,000-14,999 Square Feet	500
Tier 2	15,000 Square Feet and Above	800

Submission requirements for any of the above:

- ☐ Submit a completed Municipal Building Demonstration Certification Form (see: Municipal Building Demonstration Toolkit) confirming that at least one municipal building owned and operated by the applying

jurisdiction has been recently converted to use clean heating and cooling as its primary source or built to be net zero emissions. Eligible building(s) must:

- Meet the square footage of the requested points amount in the table tier above
 - Be open to the public all year long.
 - Date of completion for this action is defined as the date that the building began operating as net zero. This date must be after August 1, 2016 to earn credit for this action.
- ☐ At least one photograph of the educational kiosk, display, and/or materials intended to educate municipal staff and the public about the benefits of a net zero building.

Municipal Building Demonstration: Pool Heat Pump

100 points

Converting a municipal pool to use a heat pump pool heater or building a new pool using a heat pump pool heater can be a strategy to reduce emissions and reduce costs.

Submission requirements:

- ☐ Submit a completed Municipal Building Demonstration Certification Form (see: Municipal Building Demonstration Toolkit) confirming that at least one municipal pool owned and operated by the applying jurisdiction has been recently converted to use a heat pump pool heater or a new pool has been built to use a heat pump pool heater. Date of completion for this action is defined as the date that the pool began being heated by a pool heat pump. This date must be after December 13, 2023 to earn credit for this action.
- ☐ At least one photograph of the installation and an educational kiosk, display, and/or materials intended to educate municipal staff and the public about beneficial electrification.

LED Streetlights

200 – 900 Points | Applicable to All Municipalities

Description

By replacing conventional streetlights, municipalities can reduce street light energy use by as much as 65 percent, generating cost savings and emission reductions. In addition, street light projects can contribute to creating a well-lit, safer, and more attractive municipality. LED streetlights last up to 100,000 hours and require much less maintenance than conventional streetlights. The opportunity to incorporate smart, connected technology such as dimming functions and parking management offers potential for additional energy savings benefits. Even those municipalities that do not own their own streetlights have options for converting streetlights in their jurisdiction to LED.

50% Conversion of Cobra Head Streetlights

700 points

Submission requirements:

- ☐ Submit a completed LED Street Light Certification Form (accessed in the LED Streetlights toolkit at www.nyserda.ny.gov/cec) or comparable information demonstrating a minimum of 50% of all municipal and utility-owned cobra-head-style streetlights have been converted to LED. This documentation should include the number of streetlights converted, including the proportion of converted cobra-head streetlights to total cobra-head streetlights. Date of completion is the date on which fifty (50) percent of the streetlights or, for those municipalities with less than 20 streetlights, 10 fixtures were converted to LED. A minimum of 10 fixtures per jurisdiction must be converted to LED to qualify.

50% Conversion of Decorative Streetlights

200 points

Submission requirements:

- ☐ Submit a completed LED Street Light Certification Form (accessed in the LED Streetlights toolkit at www.nyserda.ny.gov/cec) or comparable information demonstrating that a minimum of 50% of all municipal and utility-owned decorative-style streetlights have been converted to LED. This documentation should include the number of streetlights converted, including the proportion of converted decorative streetlights to total decorative streetlights. Date of completion is the date on which fifty (50) percent of the streetlights or, for those municipalities with less than 20 streetlights, 10 fixtures were converted to LED. A minimum of 10 fixtures per jurisdiction must be converted to LED to qualify.

Thermal Energy Networks

500-1,000 points | Applicable to All Municipalities

Description

A thermal energy network uses a network of pipes to connect multiple buildings together, often including a large anchor off-taker (e.g., college/university, hospital), and to thermal sources and sinks, such as geothermal, surface water, waste heat, and the air, to provide space heating cooling and domestic hot water. This technology is an effective way for municipalities to reduce greenhouse gas emissions.

Thermal Energy Network: Study

500 Points

Points will be awarded to municipalities for Thermal Energy Network feasibility studies funded through NYSERDA's FlexTech Program for which the municipality provided significant resources or facilitation of the study. Applications to FlexTech must be submitted after December 13, 2023 to be eligible for points. Date of completion is when the Thermal Energy Network Study was completed through NYSERDA's FlexTech program.

Submission requirements:

- ☐ Submit the Thermal Energy Network study completed through NYSERDA's FlexTech program.

AND

- ☐ Submit documentation that indicates the municipality contributed at least \$5,000 of funding to the study.

OR

- ☐ Submit a Thermal Energy Network Certification Form, (accessed in the Thermal Energy Network toolkit at www.nyseda.ny.gov/cec), showing a list of facilities/buildings included in the study along with their square footage and documenting at least 40 hours of staff time spent by activity to provide proof that the municipality supports the study.

Thermal Energy Network: RFP

500 Points

Issuing a Request for Proposal (RFP) is one of the first critical steps to developing a Thermal Energy Network. Date of completion is when the RFP is released. The RFP must be released after December 13, 2023 to earn credit for this action.

Submission requirements:

- ☐ Submit a publicly posted RFP that includes detailed information on the specific scope of the project. The project must be within the municipality applying for CEC credit. The RFP must include the following components:
 - A list of buildings to include in the Thermal Energy Network.
 - The RFP should be issued in a way that doesn't lock the municipality or its partners into a specific design, business model, or ownership structure.
 - The RFP must include design and/or construction. It may also include a study, but an RFP for a study alone is not eligible for this action. If a study is part of the RFP scope, the study must meet NYSERDA's FlexTech program requirements.

2. Community Engagement and Training Category

Community Campaigns

200 to 3,900 points | Action Grant Eligible | Applicable to all Municipalities

Description

Community-scale campaigns can be an effective way during project implementation to encourage adoption of new, innovative technologies to generate value and savings for consumers while advancing state and local clean energy goals. Campaigns are typically short-term, local efforts that bring together groups of potential customers through widespread outreach and education. Well-organized campaigns are a great way to be active and visible in the community. Campaigns will primarily be initiated and supported by the municipality however, they can also be supported by local volunteers and other parties.

Municipalities that have completed Community Campaigns for Tiers (previously referred to as Achievement Level) 2 or 3 in any of the categories below must submit projects, subscriptions, or purchases that have been completed after June 1, 2023. Municipalities that have previously received a Community Campaign Tier 1 award are not eligible for an additional Tier 1 award.

Municipalities may complete any of the following campaign types, but no more than one campaign per campaign type Tier, to earn credit for this action. While a single campaign may cover more than one technology, municipalities should submit documentation separately under each campaign type. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement.

NYSERDA strongly encourages partnerships with [Regional Clean Energy Hubs](#) on campaigns.

To earn credit for this action, each campaign must complete the following steps:

Step 1 – During the planning phase of the campaign, the applying jurisdiction must submit a completed NYSERDA Scoping Document. NYSERDA will then review the scoping document and provide notification by email if the campaign may proceed.

- ☐ Submit a completed Community Campaigns Scoping Document which is available in the Community Campaigns toolkit at www.nyserda.ny.gov/cec.

Step 2 – Once the campaign is complete, the applying jurisdiction must submit the following:

- ☐ Submit documentation to demonstrate direct municipal participation in a campaign. Documentation should be dated and include the name of the applying jurisdiction, and may consist of one or more of the following: a press release, a flyer from an event hosted by the jurisdiction, a website screenshot, a local press article, a certified resolution, or comparable information. Date of completion is when the scoping document is submitted.
- ☐ Submit a completed Community Campaigns Certification Form which is available in the Community Campaigns toolkit at www.nyserda.ny.gov/cec.
 - Customers/participants must reside within the boundaries of the applying jurisdiction.
 - Date of completion for this action is defined as the date on which NYSERDA approved the scoping document.

Community Campaign for Community Solar

200-1,000 points

Commonly referred to as Community Solar, Community Distributed Generation (CDG) is a renewable energy project that will typically offer guaranteed cost savings to subscribers. The municipality enters partnerships with regional CDG projects and promotes Community Solar subscriptions to its constituents. CDG projects may include solar, wind, or hydro facilities. For the purpose of this High Impact Action, the municipality itself may not be considered a customer, CDG subscription related to the applying jurisdiction's municipal electric accounts are not eligible to be counted. Community Solar providers must be listed on the NYS Power to Choose Distributed Energy Resources (DER) list at <http://documents.dps.ny.gov/PTC/der>.

Tier 1 – 200 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	25	\$15,000
Small/Medium (0-39,999)	10	\$5,000

Tier 2 – Additional 300 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	100 (125 total participants)	\$30,000
Small/Medium (0-39,999)	50 (60 total participants)	\$10,000

Tier 3 – Additional 500 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	250 (375 total participants)	\$60,000
Small/Medium (0-39,999)	100 (160 total participants)	\$20,000

Community Campaign for Electric Vehicles (EVs)

200-1,000 points

Electric vehicles can provide a substantial reduction of greenhouse gas emissions. The municipality along with partner organizations and volunteers initiate and develop partnerships with car dealerships, platform providers, and/or other EV industry partners to offer local residents and businesses a variety of makes and models of electric vehicles. The offer may be promoted through ride and drive events and other outreach efforts. Vehicles must be new and purchased to qualify. Municipalities can use the Electric Vehicle Registration Map to track electric vehicle registrations in their community <https://data.ny.gov/Transportation/Vehicle-Snowmobile-and-Boat-Registrations/w4pv-hbkt/explore>. For

the purposes of this High Impact Action, the municipality may not be counted as a customer; EVs purchased by the applying jurisdiction are not eligible to be counted. Municipalities interested in purchasing EVs should refer to Transportation HIAs.

Tier 1 – 200 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	10	\$15,000
Small/Medium (0-39,999)	5	\$5,000

Tier 2 – Additional 300 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	50 (60 total participants)	\$25,000
Small/Medium (0-39,999)	15 (20 total participants)	\$7,500

Tier 3 – Additional 500 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	100 (160 total participants)	\$40,000
Small/Medium (0-39,999)	50 (70 total participants)	\$15,000

Community Campaign for Clean Heating and Cooling

500-1,800 points

The aim of Clean Heating and Cooling is to efficiently use electrical energy to replace other forms of energy such as fossil fuels. The municipality along with partner organizations can help educate residents in the region. NYSERDA strongly encourages partnerships with Regional Clean Energy Hubs on Clean Heating and Cooling campaigns. The municipality can organize a structured campaign to encourage the adoption of clean heating and cooling technologies (e.g., ground- and air- source heat pump systems and heat pump water heaters) to heat and cool homes, businesses, and community institutions. Campaign project submittals must be clean heating or cooling technologies. For the purpose of this High Impact Action item, the municipality may not be considered a customer; installations in the applying jurisdiction's municipal buildings are not eligible to be counted.

Tier 1 – 500 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	10	\$15,000
Small/Medium (0-39,999)	5	\$5,000

Tier 2 – Additional 600 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	20 (30 total participants)	\$30,000
Small/Medium (0-39,999)	10 (15 total participants)	\$10,000

Tier 3 – Additional 700 Points		
Municipality Size by Population	Required Number of Campaign Participants	Action Grant Amount
Large (40,000+)	30 (60 total participants)	\$60,000
Small/Medium (0-39,999)	15 (30 total participants)	\$20,000

County Hosted Trainings

300 to 1,200 points | Applicable only to County Governments

Description

County Governments are uniquely positioned to convene and support municipalities to advance local action on clean energy. The County Hosted Trainings high-impact action is designed to help municipalities understand how to manage responsible clean energy development in their communities.

Trainings must be hosted by the county in coordination with NYSERDA CEC Coordinators. The municipality must provide NYSERDA a minimum of four (4) weeks lead time prior to the requested training. For the training to qualify, municipal staff members, elected officials, or members of an official municipal board or committee representing at least 35 percent of the municipalities in the county must attend. Trainers will be provided by NYSERDA and may be available on a limited basis. Email cleanenergyhelp@nyserda.ny.gov to schedule trainings. The host county is responsible for logistics including coordinating with NYSERDA to schedule the training, publicizing, and promoting the training, and tracking attendance. Each county will have the opportunity to host each course once. If the attendance threshold is not met, the county may document their municipalities' attendance at a course hosted by another entity, including other counties. However, the county seeking credit for their municipalities' attendance is responsible for seeking out those alternate training opportunities, gathering documentation demonstrating attendance, compiling documentation, and submitting to NYSERDA. NYSERDA will not schedule a second session of the same course for the same county. Counties may choose to reschedule sessions by notifying NYSERDA at least three business days prior to the anticipated training sessions. If there are extenuating circumstances that prevent a scheduled course from occurring with fewer than three days' notice, NYSERDA, at its sole discretion, may allow the county to schedule a make-up session. Date of completion is the date the training(s) was held.

The host county representative must be involved as a partner in the presentation by providing an introduction explaining why the topic is necessary and important in the county and helping with Q&A. Trainings may be virtual or in-person. County governments may also coordinate with municipalities to determine whether continuing education credit for Planning Board and Zoning Board of Appeal may be available. Where indicated below, Building Safety Inspectors and Code Enforcement Officials are eligible for in-service credits from the NYS Department of State, Division of Building Standards and Codes.

County Hosted Training Type	Description	Points
Overview of Model Solar Energy Law	Provides an in-depth review of the customizable template zoning law contained in NYSERDA's Solar Guidebook for Local Governments. Municipal board members, code enforcement officials, and staff are encouraged to attend.	300
Overview of Model Battery Energy Storage System Law	Provides an in-depth review of the customizable template zoning law contained in NYSERDA's Battery Energy Storage System Guidebook for Local Governments. Municipal board members, code enforcement officials, and staff are encouraged to attend.	300
Clean Energy and Your Comprehensive Plan	Offers an introduction to best practices and strategies for incorporating clean energy goals and objectives into a new or updated municipal comprehensive plan. Municipal board members, planning staff, and comprehensive plan committee members are encouraged to attend.	300
Solar PV Permitting and Inspecting	Offers an in-depth review of permitting and inspecting solar energy systems in New York State from start to finish; topics covered include the NYS Unified Solar Permit and various components of the NYS Uniform Fire Prevention and Building Code. Code enforcement and building officials are encouraged to attend. (Approved for 2-hours of In-Service training credit.)	300

Submission requirements for any of the above:

- ☐ Submit a completed County Hosted Trainings Certification Form (accessed in the County Hosted Trainings toolkit at www.nyserda.ny.gov/cec) including a list with the name and date of the training, and attendee information – including name, title, email or phone number, and associated municipality – to demonstrate the requirements of this action have been met. A toolkit of resources is available at www.nyserda.ny.gov/cec.

Energy Code Enforcement Training

300 points | Applicable if the municipality enforces the Energy Code for private buildings

Description

The Energy Code is a minimum building standard for energy efficiency, applicable to new construction and renovation of commercial and residential buildings in New York State. The Energy Code is a complex document and one of nine building codes in New York State, making implementation and enforcement complex and time consuming. Since buildings represent roughly 60% of New York's total energy consumption, there is significant opportunity for energy savings through improved Energy Code compliance.

Submission requirements:

- ☐ At least one code official must complete a NYSERDA-approved Clean Energy Communities Energy Code Enforcement Training series including both residential and commercial workshops. Municipalities whose code official(s) completed Energy Code Enforcement Training prior to January 26, 2021 must retake the training to earn points for this action. Trainings are available on a limited basis.
- ☐ Submit a copy of the notification of completion email to earn credit for this action.

Date of completion for this action is defined as the date of the notification of completion email. For more information, please reach out to your CEC Coordinator or visit www.nyserda.ny.gov/cec.

3. Legislation and Regulation

Climate Smart Communities Certification

800 to 1,400 points | Applicable to all Municipalities

Description

The New York State Department of Environmental Conservation's (NYS DEC) Climate Smart Communities Certification (CSC) program provides municipalities with a robust framework to guide their climate action and celebrates the leadership of high-performing municipalities. Designed around the CSC pledge elements, the certification program awards points for actions that reduce greenhouse gas emissions and build community resilience to climate change.

CSC Certification Level	Points
Bronze CSC Certification	800
Silver CSC Certification	+ 600 Additional

Submission requirements for any of the above:

- ❑ Submit a screenshot of the www.climatesmart.ny.gov website, email notification from NYS DEC, or comparable information, that demonstrates the applying jurisdiction has been listed as a Bronze or Silver Certified Climate Smart Community. (Please note that Silver CSC Certified communities are eligible to earn credit for both Bronze Certification and Silver Certification. **Please submit for each separately to earn 1,400 points total.**) The date of completion is the date on which NYS DEC provides notification to the municipality regarding its achievement of the applicable certification level. The certification level must be current at the time of application.

Community Choice Aggregation

500 to 2,000 points | Applicable to eligible Cities, Towns and Villages

Description

Community Choice Aggregation (CCA) allows municipalities to choose where their community's energy comes from. CCA is a municipal energy procurement model that replaces the utility as the default supplier of energy for virtually all homes and small businesses within the jurisdiction. CCA puts control of energy supply decision making in local hands. By pooling demand, municipalities can aggregate the volume necessary to negotiate competitive rates with private suppliers and are able to choose cleaner energy. A CCA can allow whole communities to participate in the clean energy economy by ensuring that a greater percentage of electricity is coming from renewable sources.

As the CEC program strives to guide communities towards decarbonization and recognize their efforts, municipalities can reapply and gain points as they attain new percentages over time.

Community Choice Aggregation (CCA)

CCA greater than or equal to 50% and less than 100% Renewable Default Supply Mix with 100% Opt-up Option

500 points

Submission requirements:

- ❑ Submit a copy of the approval letter from the New York State Department of Public Service (DPS) naming the applying jurisdiction as authorized to move forward with CCA, or submit a copy of adopted legislation authorizing the municipality's participation in an opt-out CCA program.
- ❑ Submit a copy of an executed and current electric service agreement between the applying jurisdiction and an Energy Services Company (ESCO) to supply electricity to participating CCA customers on an **opt-out basis that is a default ≥50% renewable clean energy product mix, as well as an opt-up option for 100% renewable energy**, or comparable information. The ESCO electric service agreement or comparable information should indicate that the ESCO will retire renewable energy certificates (RECs) on behalf of the municipality in a New York State Generation Attribute Tracking System (NYGATS) Account (with reports on such retirements to the municipality) in a manner that is compliant with the environmental attributes and delivery rules of the New York Public Service Commission Environmental Disclosure Program. The electrical energy associated with the renewable energy certificates must be consumed by retail customers in New York State.

Municipalities are eligible for this action if they signed a contract on or after January 1, 2023. Municipalities that were approved by NYSERDA for the CCA high-impact action prior to December 13, 2023 must resubmit to earn points for this action if the municipality signs a new contract. Date of completion is the date on which the electric service agreement or addendum was fully executed.

CCA 100% Renewable Default Supply Mix

1,500 points

Submission requirements:

- ❑ Submit a copy of the approval letter from the New York State Department of Public Service (DPS) naming the applying jurisdiction as authorized to move forward with CCA, or submit a copy of adopted legislation authorizing the municipality's participation in an opt-out CCA program.
- ❑ Submit a copy of an executed and current electric service agreement between the applying jurisdiction and an Energy Services Company (ESCO) to supply electricity to participating CCA customers on an **opt-out basis that is a default 100% renewable clean energy product mix**, or comparable information. The ESCO electric service agreement, or comparable information, should indicate that the ESCO will retire renewable energy certificates (RECs) on behalf of the municipality in a New York State Generation Attribute Tracking System (NYGATS) Account (with reports on such retirements to the municipality) in a manner that is compliant with the environmental attributes and delivery rules of the New York Public Service Commission Environmental Disclosure Program. The electrical energy associated with the renewable energy certificates must be consumed at retail in New York State.

Municipalities are eligible for this action if they signed a contract on or after January 1, 2023. Municipalities that were approved by NYSERDA for the CCA high-impact action prior to December 13, 2023 must resubmit to earn points for this action if the municipality signs a new contract. Date of completion is the date on which the electric service agreement or addendum was fully executed. (Please note that municipalities who have completed a 100% Renewable Default Supply Mix CCA are eligible to earn credit for both CCA greater than 50% but less than 100% Default Supply Mix with 100% Opt-up Option and CCA 100% Renewable Default Supply Mix. **Please submit for each separately to earn 2,000 points total.**)

Green Financing

200 to 1,000 points | C-PACE Applicable to counties and cities outside Westchester County; cities and towns in Westchester County. NY-Green Bank financing is applicable to all municipalities.

Description

C-PACE (Property Assessed Clean Energy), also known as Commercial PACE (C-PACE) Financing, is a program adopted by an eligible municipality that allows commercial or non-profit property owners to pay back the cost of clean energy upgrades to their property over a term that can go as long as 20-30 years and is secured through a benefit assessment lien on the improved property. C-PACE enables eligible non-profit or commercially-owned buildings in New York State to secure private funds to tackle significant energy upgrades and renewable energy projects in existing building and new construction. C-PACE is available in NYS through the Energy Improvement Corporation (EIC), a non-profit, local development corporation designated as C-PACE administrator across NYS, except for the City of New York, and through New York City Energy Efficiency Corporation (NYCEEC), the City of New York's designated administrator of the NYC Accelerator PACE Financing program. Both administrators are in charge of ensuring C-PACE Financing conforms with the enabling legislation and NYSERDA C-PACE guidelines.

NY Green Bank (NYGB) is a New York State-sponsored investment fund at NYSERDA dedicated to filling financing gaps in clean energy and sustainable infrastructure markets. Its investments contribute to greenhouse gas emissions reductions, energy efficiency, clean energy generation, and the mobilization of private capital in key market sectors. As a State investment fund that collaborates with private investors, NY Green Bank plays a unique role in New York's transition to a green economy, which was written into law under the Climate Leadership and Community Protection Act (Climate Act). NY Green Bank uses public capital to mobilize private investment into underserved green sectors, filling market gaps and advancing public climate targets, with the goal of enabling private investors to expand their sustainable infrastructure portfolios in a meaningful way. NYGB is able to provide \$5-50 million in financing for projects that are located in or serving the jurisdiction of the municipality.

Municipalities may partner with clean energy and sustainable infrastructure project developers to encourage them to apply for C-PACE or NYGB financing when traditional lenders are not available to support their projects. The goal is to encourage project developers, with the help of municipal support, to apply directly for market-rate financing through C-PACE or NYGB to promote the development of clean energy projects. Municipalities will be recognized for bringing **eligible** projects through C-PACE or NYGB that lead to a successfully closed transaction.

For purposes of this category, municipalities must demonstrate completion of the Green Financing action by completing one or more of the below three options:

Open C-PACE Authorization

200 points

Submission requirements:

- ☐ Submit proof of the applying jurisdiction having authorized the C-PACE. Authorization requires adoption of a local law and signing a municipal agreement with the C-PACE Administrator.

Complete Open C-PACE Project

400 points

Submission requirements:

- ☐ Submit documentation closing of one or more C-PACE projects located in the jurisdiction, or comparable information. To be eligible, the jurisdiction must complete the *PACE Financing – C-PACE Authorization* action. Date of completion is date of the first finance closing.
- ☐ Submit proof of community outreach regarding C-PACE financing prior to the loan closing. This could include a screenshot or webpage, social media posts, flyers, etc.

NY Green Bank Project Closing

400 points

Submission requirements:

- ☐ Submit screenshot of social media/news posts uploaded to the municipality's website promoting NYGB financing opportunities.
- ☐ Submit proof of outreach to developers regarding NY Green Bank Financing programs prior to the loan closing. This shall include email blasts or flyers addressed to the developer or a targeted email correspondence to the developer. It is expected that the municipality will also maintain continuous contact with the developer through the financing approval process.
- ☐ Submit the relevant NY Green Bank Transaction Profile PDF (accessed <https://greenbank.ny.gov/Our-Impact/Portfolio>) demonstrating that one of the targeted developers achieved closing of one or more NY Green Bank projects located in the applying municipality's jurisdiction. The submitted documentation must include the date of the finance closing, which is the date of completion for this action.

4. Transportation and Landscaping

Clean Fleets – Electric Vehicles and Charging Stations

200 to 6,700 points | Applicable to all Municipalities

Description

Clean Fleets is an effort by municipalities to invest in electric vehicles and infrastructure while increasing opportunities for constituents to access electric vehicle charging stations. Compared to gasoline-powered cars, Electric Vehicles (EVs) are more energy efficient and cost about 50 to 70% less to operate per mile. EVs reduce greenhouse gas emissions and pollutants that cause smog and acid rain.

Complete one or more of the following to earn credit for the Clean Fleets - Electric Vehicles and Charging Stations actions. Point eligibility based on vehicle type and category will be determined by NYSDA. Municipalities are eligible for the High Impact Actions below even if they previously submitted for a clean fleets action in a previous CEC PON.

Electric Vehicles

Submission requirements for electric vehicles are listed at the end of this section.

Light-Duty Electric Vehicles (Class-1-2)

300-1,500 Points

Municipalities that implement a battery electric class 1-2 vehicle in the municipal fleet are eligible for this action. A battery electric vehicle is an all-electric vehicle. Vehicles must be new and manufactured for use primarily on public streets, roads, and highways and have a speed capability of at least fifty-five miles per hour. The vehicle(s) must be active at the time of submittal. Date of completion is when the equipment was put into service. All vehicles must be purchased after January 26, 2021. For Tier 2 and Tier 3, at least 1 vehicle in each submittal must be purchased after December 13, 2023. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement. Municipalities that already earned credit for the Clean Fleets – Light/Medium Duty EV action in the CEC Leadership Round are not eligible to resubmit for the Light-Duty Electric Vehicles Tier 1 action. Please include the total number of EVs required for the tier you are submitting for, as explained in the table below, including previously submitted vehicles.

Light-Duty Electric Vehicles		
Tier Number	Total Deployment	Points
Tier 1	1	300
Tier 2	At least 2 additional vehicles to tier 1 (3 vehicles total).	+ 500 Additional
Tier 3	At least 3 additional vehicles to tier 2 (6 vehicles total).	+ 700 Additional

Medium/Heavy-Duty Electric Vehicles (Class 3-8)

600 Points

Municipalities that purchase a battery electric class 3-8 vehicle in the municipal fleet are eligible for this action. A battery electric vehicle is an all-electric vehicle. Vehicles must be new and manufactured for use primarily on public streets, roads, and highways and have a maximum speed capability of at least fifty-five miles per hour. The vehicle(s) must be active at the time of submittal. Date of completion is when the equipment was put into service. All vehicles must be purchased after December 13, 2023. Class 1-2 vehicles should be submitted under Clean Fleets – Light-duty Electric Vehicles.

Light-Duty Non-Road Vehicles

200 Points

Eligible light-duty non-road vehicles are listed on the Clean Fleets Certification Form. Municipalities may only submit for one vehicle under this category. All vehicles must be purchased after December 13, 2023.

Medium/Heavy-Duty Non-Road Vehicles

700 Points

Eligible medium/heavy-duty non-road vehicles are listed on the Clean Fleets Certification Form. Municipalities may only submit for one vehicle under this category. All vehicles must be purchased after December 13, 2023.

Submission requirements for any of the above:

- ☐ Submit a completed Clean Fleets Certification Form (accessed in the Clean Fleets toolkit at www.nyserda.ny.gov/cec) or comparable information to demonstrate municipal purchase and deployment of at least one battery-electric non-road vehicle. Vehicle(s) must be active at the time of submittal. Date of completion is when the equipment became operational. Customers can only submit for one vehicle for all electric vehicle actions except for Light-Duty Electric Vehicles.

Charging Stations

Electric vehicle adoption is rapidly accelerating in New York – as many as three million electric vehicles (EVs) are expected to be on the road statewide by 2030. As more drivers make the switch to EVs, deploying charging infrastructure to match demand is essential. Municipalities can be well-positioned to install charging stations due to their high traffic and longer parking durations.

Municipalities can receive points for Level 2 Charging Stations and DC Fast Charging Stations. Municipalities that already earned credit for the Clean Fleets – Charging Stations action in the CEC Leadership Round are not eligible to resubmit for the Level 2 and/or DC Fast Charging Stations Tier 1 actions. Please include the total number of charging ports required for the action and tier you are submitting for, as explained in the table below, including previously submitted ports.

Level 2 Charging Stations

200 – 1,200 Points

Level 2 Charging Stations		
Tier Number	Total Ports	Points
Tier 1	Minimum of 2 ports	200
Tier 2	Minimum of 4 additional ports (6 total ports)	+ 400 Additional
Tier 3	*Minimum of 10 additional ports (16 total ports)	+ 600 Additional

Submission requirements for any of the above:

- ☐ Submit a completed Clean Fleets Certification Form (accessed in the Clean Fleets toolkit at www.nyserda.ny.gov/cec) to demonstrate municipal provision from one or more of the above tiers. Equipment must be active at the time of submittal. The municipality must own or lease the equipment or enter into a site host agreement with a company to lease municipal land for charging equipment. Charging Stations may be used for government operations or public use. Date of completion is when the equipment became operational. All equipment must be purchased after January 26, 2021. For Tier 2 and Tier 3, at least 1 port in each submittal must be purchased after December 13, 2023. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement. *If applying for a total of 16 or more ports, at least 50% of the ports must be available for public use.

DC Fast Charging Stations

500-2,500 Points

DC Fast Charging Stations		
Tier Number	Total Ports	Points
Tier 1	Minimum of 1 port	500
Tier 2	Minimum of 2 additional ports (3 total ports)	+ 800 Additional
Tier 3	Minimum of 3 additional ports (6 total ports)	+ 1,200 Additional

Submission requirements for any of the above:

- ☐ Submit a completed Clean Fleets Certification Form (accessed in the Clean Fleets toolkit at www.nyserda.ny.gov/cec) to demonstrate municipal provision of one or more of the above tiers. Equipment must be active at the time of submittal. The municipality must own or lease the equipment or enter into a site host agreement with a company to lease municipal land for charging equipment. Charging Stations may be used

for government operations or public use. Date of completion is when the equipment became operational. All equipment must be purchased after January 26, 2021. For Tier 2 and Tier 3, at least 1 port in each submittal must be purchased after December 13, 2023. The tiers and associated points for this action are cumulative and based on tier level accomplishment and must be submitted consecutively based on tier level of achievement.

Electric Landscaping Equipment

200 points | Applicable to all Municipalities

Description

Landscaping Equipment for municipal operations is a significant contributor to operational GHG emissions, noise, and other pollutants. NYSERDA will provide credit to municipalities that have purchased electric landscaping equipment (e.g., electric lawn mowers, leaf blowers, etc.).

Submission requirements:

- ❑ Submit an Electric Landscaping Certification Form that identifies sufficient pieces of electric landscaping equipment purchased for municipal operations will save at least five (5) tons of carbon dioxide equivalent annually. The Electric Landscaping Certification Form (accessed in the Clean Fleets toolkit at www.nyserda.ny.gov/cec) will help calculate these emissions. Date of completion is when the equipment was put into service. The equipment must have been purchased on or after December 13, 2023 to earn credit.

Municipal Clean Fleets Inventory

200 points | Applicable to All Municipalities

Description

As a leading source of emissions, transitioning vehicles from internal combustion engines to zero-emission propulsion is an important component of the State's Climate Action Plan. Municipalities have a wide range of vehicles across their fleet, varying from light-duty cars (e.g. police cruisers and inspection vehicles) to medium & heavy-duty (box trucks and shuttles). Through this action municipalities can plan their transition to electric vehicles in a thoughtful and efficient manner by starting with an inventory of all fleet vehicles.

Submission requirements:

- ❑ Submit a complete Clean Fleets Inventory Certification Form, available in the Transportation toolkit at www.nyserda.ny.gov/cec. At minimum, the fleet inventory must include at least five vehicles, and must include all required 11 categories for every four-wheeled vehicle owned or operated by the municipality. Date of completion is when the most recent inventory was completed. The inventory must have been completed on or after January 1, 2023 to earn credit.

GENERAL CONDITIONS

Application Submission: Online submission should be submitted via the Salesforce portal. Proposers may submit Word, Excel, or PDF files (file formats include: doc, docx, pdf, xls, andxlsx). Individual files should be 100MB or less in file size. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide \[PDF\]](#)" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

No communication intended to influence this procurement is permitted except by contacting Christopher Reohr at (518) 362-0570 or by e-mail cec@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Lori Armstrong at (518) 362-0385. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been completed/included in the application. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit applications. The online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>)

Proprietary Information: Careful consideration should be given before confidential information is submitted to NYSERDA as part of the applicant's proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the municipality wishes to have treated as proprietary and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <http://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Procurement Lobbying Requirements - State Finance Law sections 139-j and 139-k

NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at

<http://www.ogs.ny.gov/aboutogs/regulations/advisoryCouncil/StatutoryReferences.html>

The attached Proposal Checklist calls for a signature certifying that the municipality will comply with State Finance Law sections 139-j and 139-k and the Disclosure of Prior Findings of Non-responsibility form includes a disclosure statement regarding whether the municipality has been found non-responsible under section 139-j of the State Finance Law within the previous four years.

Tax Law Section 5-a – NYSEDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSEDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEDA, the prospective contractor must also certify to NYSEDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contacting and filed with NYSEDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division For Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

Contract Award

NYSEDA may award a contract based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work (included within Attachment B, Sample Agreement). Each offer should be submitted using the most favorable cost and technical terms. NYSEDA may request additional data or material to

support applications. NYSEDA will use the Sample Agreement including Sample SOW (Attachment B) to contract successful proposals. NYSEDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the submitted proposal. Municipalities should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSEDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSEDA agreement.

Accessibility Requirements

NYSEDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSEDA's Accessibility Requirements](#).

Limitation

This solicitation does not commit NYSEDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSEDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEDA's best interest. NYSEDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement.

Disclosure Requirement

The municipality shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States, and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSEDA after the award of a contract, NYSEDA may exercise its stop-work right pending further investigation, or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Municipalities must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Disclaimer

All projects must address the qualifications and eligibility requirements listed in this Guidance Document. NYSEDA reserves the right to issue revisions to this solicitation at any time. Any revisions will be announced and posted on NYSEDA's website at www.nyserda.ny.gov. High-Impact Actions may be adjusted, phased out, or newly developed based on a variety of factors including, but not limited to, new opportunities to help communities drive local energy action, level of uptake in communities relative to other actions, changes in the regulatory environment, consistency with NYSEDA and other New York State agency program offerings, and availability of external assistance, such as federal programs, tools, and resources.

EO 16 Protocols

Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final NYSERDA Clean Energy Communities 29 decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor. Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list. The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Additional Resources

All program resources and guidelines can be found on the Clean Energy Communities webpage at the following location: www.nyserda.ny.gov/cec.

On-site Energy Manager Program

Program Opportunity Notice (PON) 3701

Revised October 2025

NYSERDA reserves the right to extend and/or add funding to the

Solicitation should other program funding sources become available.

Applications accepted on a first-come, first serve basis dependent upon funding availability through December 31, 2030 by 3:00 PM Eastern Time*

This New York State Energy Research and Development Authority (NYSERDA) [Program Opportunity Notice \(PON\) 3701](#) seeks applications from facilities interested in participating in the On-site Energy Manager Program (the "Program") to demonstrate how a dedicated On-site Energy Manager (OsEM) can improve a company's profitability by delivering energy, process, and operational improvements.

The Program targets Commercial, Multifamily, and Industrial facilities, campuses, or portfolios that do not have an existing dedicated full-time OsEM who show a desire to continue the role beyond the Program engagement period and are willing to share results and lessons learned to further the Program's objective of increasing the penetration of energy managers.

Contracted OsEMs may be selected from the current list of NYSERDA Flexible Technical Assistance (FlexTech) Consultants or use an Independent Service Provider. Support may also be sought for a new permanent hire or a hybrid of supplementing permanent staff with a Consultant.

Additional information about the Program can be found on the webpage: www.nyserda.ny.gov/OSEM.

Application Submission:

A NYSERDA Portal Account is required for the Application Submission process. Applicants can follow the instructions on [FlexTech: Create a NYSERDA Portal Account](#).

Applicants with existing NYSERDA Portal Accounts may apply here: <https://portal.nyserda.ny.gov>

•(A) [NYSERDA Portal Application](#), Concept (B), Scope of Work (C), Budget (D) and OsEM Resume or Job Description must be uploaded to the application; see sample templates on [OsEM Resources page](#). For applications where a Consultant is fulfilling the OsEM role, a Letter of Commitment must also be uploaded.

• For affordable multifamily projects, affordability verification documentation must also be provided.

If Applicants intend to submit with a claim of confidentiality, please consult OnSiteEnergyManager@nyserda.ny.gov first.

Questions should be directed as follows:

Commercial Program questions: Adam DeSio, 518-362-0289, AdamOsEM@nyserda.ny.gov Industrial

Program questions: Stacey Sabo, 716-261-4862, StaceyOsEM@nyserda.ny.gov

Multifamily Program questions: Mira Martin, 518-362-0235, MiraOsEM@nyserda.ny.gov

All Contractual questions: Jim Cowman, 518-362-0487, Jim.Solicitations@nyserda.ny.gov

* NYSERDA reserves the right to extend and/or adjust funding to this solicitation. Late, incomplete, or unsigned applications will be returned. Faxed applications will not be accepted. If changes are made to this solicitation, notification will be posted on NYSERDA's website at www.nyserda.ny.gov.

I. Introduction

The Program seeks to demonstrate the value of an OsEM role at a given facility such that the role becomes standardized and self-sustaining. Facilities will benefit from the successful energy and productivity projects that will be driven by OsEMs. Projects may include operation and maintenance improvements, behavioral changes, energy efficiency upgrades, process improvements, throughput and scrap reduction improvements, cost management, and other improvements such as water savings.

The purpose of the Program is to prove the business case for an OsEM role and to disseminate developed case studies and tools to the market for broader adoption. Program participants are required to share success stories and best practices to facilitate this market transformation activity. Post Program, Customers who retain their OsEM and continue to demonstrate increased annual energy savings via reporting to NYSERDA may be eligible for a bonus payment (see Funding & Invoicing Section).

Participants are encouraged to continue sharing success stories, even beyond the bonus period if applicable, through NYSERDA's website, Best Practice events, and other market transformation activities.

II. Eligibility Requirements

Eligible Customers include Commercial, Multifamily, and Industrial facilities located in New York State. Most eligible participants must also pay into the electric System Benefits Charge (SBC). A limited amount of funding is available to certain Affordable Multifamily non-SBC paying Customers. Affordable Multifamily buildings must meet the affordability criteria detailed in the Affordable Multifamily Building Verification document available at <https://www.nyserdera.ny.gov/All-Programs/On-Site-Energy-Manager/Resources>. Contact OnSiteEnergyManager@nyserdera.ny.gov for more information.

In order to fully realize the benefit of energy management, the term of the OsEM contract will be a minimum of 12 months. Unless otherwise negotiated, all work cost-shared under this Program must be completed within 54 months of issuance of the Purchase Order (excluding the bonus payment period). The OsEM must begin work within 6 months of the issuance of the Purchase Order.

Customers must:

- Not have an existing dedicated full-time energy manager on-site.
- Effectively demonstrate the need for an OsEM per Attachment B: OsEM Concept.
- Ensure completion of the tasks listed in Attachment C: Scope of Work Requirements. Additional tasks related to energy management and productivity improvement may be added to the scope of work and will be subject to NYSERDA approval.

OsEM engagements must:

- Be at least 0.5 Full Time Equivalent (20 hours per week).
- Include cost-sharing in the form of cash support from the customer. In-kind contributions are allowed only in cases where the Applicant utilizes permanent staff.
- Use funds for OsEM services only and not for implementation or equipment purchase.

The OsEM must fall into one of the below designations:

- New permanent hire
- Supplementing permanent staff with contracted staff
- Contracted staff ("Consultant")
 - Contracted OsEM support may be selected from NYSERDA's qualified FlexTech Consultant list (<http://www.nyserdera.ny.gov/Contractors/Find-a-Contractor/FlexTech-Consultants>) or may be an Independent Service Provider.
 - The specific staff member who will be performing the OsEM role must be identified in the scope of work submitted with the application. There must be one dedicated individual who performs the on-site services and is the direct customer contact. It is acceptable to have junior Consultant staff perform lower-level administrative tasks, although such delegation should not hinder the Program's intention of demonstrating the business case for a dedicated energy manager. Unless otherwise approved by NYSERDA, the OsEM must account for a minimum of 75% of the total hours funded under the engagement. The resumes of all Consulting staff involved must be included in the proposal.

III. OsEM Application & Required Documentation

A Consultant (either a FlexTech Consultant or an Independent Service Provider) or Customer may be the Applicant.

Applications will be reviewed on a first-come, first-served basis dependent on funding availability. A complete application package consists of:

- **NYSERDA Portal Application**
 - If a Property Manager/Owner's Representative is completing the Customer portion of the application, provide the Property Owner Authorization Form authorizing submission of the application on their behalf.
- **OsEM Concept (Attachment B)** to justify the need for an OsEM and describe the reporting structure for the OsEM (include facility company organizational chart to illustrate structure).
 - If the OsEM application includes buildings that have recently applied for and/or completed FlexTech studies, explain how the OsEM will leverage the FlexTech study(ies) while avoiding duplication.
- **Scope of Work (per Scope of Work Requirements, Attachment C)** with facility energy reduction goal, tasks, deliverables, and project schedule.
- **Detailed budget (per Budget Template, Attachment D, or equivalent)** including a breakout by task and by title, hourly rate, hours, and non-labor costs.
- **OsEM resume*** (for staff, Consultant, or both depending on support sought) or job description. Please highlight:
 - Relevant qualifications such as licensed Professional Engineer (P.E.), Certified Energy Manager (CEM), Certified Energy Auditor (CEA), etc.
 - Past experience as energy advisor to the sector, including years of experience.
 - Demonstrated business acumen and leadership skills to be able to sell energy projects to upper management.

* If the new permanent hire is not yet identified, the job description which reflects the Program criteria must be included. The resume of the proposed candidate must be submitted once identified.
- **For projects using a Consultant to fulfill the OsEM role only, submit:**
 - Letter of commitment from facility's upper management (corporate officer or executive staff).
- **For Affordable Multifamily applications only**, affordability verification documentation must also be provided. Applicants should be sure to reference <https://www.nyserdera.ny.gov/All-Programs/On-Site-Energy-Manager/Resources> for the most current Affordable Multifamily Building Verification documentation requirements.

Application Review Process:

NYSERDA will review each application package for completeness and to ensure reasonableness across the following areas:

- OsEM experience, qualifications, and leadership skills
- OsEM integration
- Cost & time allocation
- Labor rates
- Energy savings target (for the cost-shared 12+ month engagement) relative to the facility's annual energy usage. The target energy savings ideally equals or exceeds the NYSERDA cost-share. The OsEM concept should include a description of how the potential savings justifies the OsEM cost.

After a complete application package is reviewed, NYSERDA will inform the Applicant of their selection status.

NYSERDA intends to work with Applicants during the review process through the sharing of comments and recommendations for scope of work improvement to encourage successful applications. This may include:

- Making adjustments to the contract period and funding levels.
- Reducing the NYSERDA cost-share based on hourly rates presented.
- Making adjustments to the proposed scope of work and required reporting.

Applications will be rejected when:

- The eligibility requirements set forth in Section II are not met.
- The application package is incomplete per Section III.
- Successful negotiation of the application package is not possible after comments and discussion with NYSERDA.

Consultants and/or individual contributors to OsEM engagements who repeatedly fail to resolve scope of work or deliverable technical review comments after three (3) revisions may be subject to disciplinary action, including but not limited to:

- Consultants and/or individuals may be limited to one (1) open application at a time until the Consultant and/or individual can demonstrate improvement meeting the OsEM program requirements.
- If the Consultant and/or individual cannot demonstrate improvement to the satisfaction of NYSERDA, the Consultant and/or individual may be prohibited from participating in the FlexTech Program, the Clean Green Schools Initiative, the OsEM Program, and/or other relevant technical assistance programs.
- If the Consultant is an approved FlexTech Consultant, that status will be reviewed and may be revoked resulting in

termination of the FlexTech Umbrella Agreement.

- If a Consultant and/or individual is prohibited from participating in the OsEM Program, NYSERDA may also prohibit the Consultant and/or individual from acting as a Subcontractor on projects participating in other NYSERDA funding opportunities, at NYSERDA's sole discretion.

These disciplinary actions may also apply to Subcontractors involved in projects that meet the above parameters.

IV. Funding & Invoicing

Funding Overview:

Facility Consumption (aggregated)**	OsEM Cost-Share Cap* <i>(initial 12+ month term)</i>	OsEM Bonus #1 <i>(12 months after initial term)</i>	OsEM Bonus #2*** <i>(24 months after initial term)</i>	Maximum Possible
Greater than \$1M annual energy spend	Not to exceed \$200,000	\$7,000	\$7,000	\$214,000
Less than \$1M annual energy spend	Not to exceed \$100,000	\$5,000	\$5,000	\$110,000

*Funds may be used for technical assistance and OsEM support only and may not be used toward implementation, equipment purchase, or any labor costs outside of the OsEM effort.

**At NYSERDA's discretion, aggregated facility consumption may be adjusted to only include building usage impacted by the OsEM's focus.

***Effective 1/1/2026, only one post-engagement bonus period will apply.

OsEM Cost-Share:

- NYSERDA will contribute up to 75% towards the allowable OsEM fees for most engagements per task and budget detail in the approved scope of work.
 - Priority Districts include P-12 public school districts identified using the New York State Education Department's Needs to Resource Index or districts that serve Disadvantaged Communities. Based on the availability of funding for Priority Districts, NYSERDA will contribute up to 90% of the allowable OsEM fees within the cap structure above. The list of eligible Priority Districts may be found here : <https://www.nyserda.ny.gov/All-Programs/FlexTech-Program/FlexTech-Documents-and-Resources>.
 - For Affordable Multifamily buildings which meet the affordability criteria detailed in the Affordable Multifamily Building Verification document, available at <https://www.nyserda.ny.gov/All-Programs/On-Site-Energy-Manager/Resources>. NYSERDA will contribute up to 100% of the allowable OsEM fees within the cap structure above.
 - Based on availability of funds and variety of projects in the sector program portfolio, after three project applications from a single owner-organization, the cost share may be limited to 50% for projects that do not further demonstrate value of the OsEM role for reasons including scope and/or facility similarity to previously completed projects from the same owner-organization.
- NYSERDA's cost-share for the OsEM will be paid directly to the Applicant, which is based on the Program Application, and may be the Consultant or Customer.
- For OsEM engagements with facilities who have annual energy costs greater than or equal to \$1 million (all fuels), the maximum OsEM cost-share excluding bonus payments is \$200,000.
- For OsEM engagements with facilities who have annual energy costs less than \$1 million (all fuels) the maximum OsEM cost-share excluding bonus payments is \$100,000.

OsEM Bonus:

Customers may be eligible for a bonus payment for each additional year of continued OsEM engagement, capped at 2 additional years. Effective after 12/31/2025, bonus payments will be capped at one year post-engagement. Customers will be required to demonstrate successful engagement of the OsEM during the initial term, as well as the continued value of the OsEM, to be considered for a bonus payment.

- Customers will be required to report the continued energy saving impacts and financial investments to NYSERDA at the conclusion of each additional year. Bonus payment reporting requirements are outlined on NYSERDA's OsEM page in the Resources section: www.nyserda.ny.gov/OSEM.
- Reported energy savings impacts for each bonus year period must be equal to or greater than 1% of the site's prior 12-month energy consumption to receive a bonus payment.
- Bonus payments are subject to NYSERDA's review and approval.

Invoicing:

- All invoices for OsEM services, whether consultant or staff services, should be broken out by non-labor costs, individuals, titles, hourly rates, dates and hours worked on each task.

- Invoices should also indicate the amount that is being invoiced concurrently to/paid for by the site. If applicable, NYSERDA may also require a copy of the Customer's canceled check paying their OsEM engagement cost-share.
- Travel costs are limited to 3% of the total OsEM engagement cost.
- Invoices may be submitted no more frequently than monthly at and are subject to NYSERDA Project Manager approval. All invoices complete with the required reimbursement documentation must be submitted through <https://services.nyserda.ny.gov/Invoices/>.
- NYSERDA reserves the right to withhold payment in cases where program deliverables are not being met, as outlined in the approved scope of work.
- NYSERDA will issue the Bonus payments directly to the Customer upon receipt and verification of required documentation, regardless of who was the Applicant. Consultants are not eligible to receive Bonuses so in the case of the Consultant being the Applicant, Bonus payments will be made directly to the Customer via a direct-to-voucher payment.

Project Payments:

NYSERDA will contribute its share of the eligible OsEM costs, not to exceed the amount agreed upon in the Purchase Order, directly to the Applicant per the approved Scope of Work. Customers shall pay the remaining balance of the OsEM fees directly to their OsEM, as applicable, under the terms and conditions to be negotiated by the Customer and OsEM.

Applicant invoices to NYSERDA must include the OsEM's total billed cost, and must include labor and nonlabor costs, title(s), hourly rates, dates and hours for each task. Invoices must also indicate the amount that is being invoiced concurrently to the Customer, if applicable. In such cases, NYSERDA may also require a copy of the customer's canceled check showing payment of their cost-share. NYSERDA payments may not be released prior to Customer contribution equal to or exceeding the requested payment amount, as applicable. Payment will be based on services provided as defined in the Scope of Work and as documented by approved deliverable(s), invoices and other documentation deemed necessary by NYSERDA. NYSERDA reserves the right to withhold payment in cases where program deliverables are not being met or where the Applicant has not met their scope of work or performance obligations.

V. PROGRAM PARTICIPATION

APPLYING TO THE PROGRAM

A FlexTech Consultant, Independent Service Provider, or Customer may be the Applicant.

A NYSERDA Portal Account is required for the Application Submission process. Applicants can follow the instructions on [FlexTech: Create a NYSERDA Portal Account](#).

Applicants with existing NYSERDA Portal Accounts may apply here: <https://portal.nyserda.ny.gov>

- (A) [NYSERDA Portal Application](#), Concept (B), Scope of Work (C), and Budget (D) and OsEM Resume or Job Description must be uploaded to the application; see sample templates on [OsEM Resources page](#). For applications where a Consultant is fulfilling the OsEM role, a Letter of Commitment must also be uploaded.
- For affordable multifamily projects, affordability verification documentation must also be provided. Applicants should be sure to reference [On-site Energy Manager Resources](#) for the most current Affordable Multifamily Building Verification documentation requirements.
- Property management and/or owner representative firms participating as the Customer or Applicant will be required to verify building owner agreement to the scope of work, concept, and budget, as well as agreement to the OsEM Program terms and conditions.

All applications will be reviewed on a first-come, first-served basis dependent on funding availability. A complete application package includes a complete Scope of Work and Concept with a detailed budget and schedule. Incomplete project application packages will be rejected.

VI. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501

<https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small
Business 625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development
Division 625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of six (6) years, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each application should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. Preference may be given to facilities with annual aggregated energy costs greater than \$500,000. NYSERDA will use Attachments A, C, D and E to contract successful applications. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify applicants in approximately four (4) weeks from the receipt of a complete application package whether your application has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Attachment A
On-site Energy Manager Program
NYSERDA Portal Application User Guide

A NYSERDA Portal Account is required for the Application Submission process. Applicants can follow the instructions on [FlexTech: Create a NYSERDA Portal Account](#).

Applicants with existing NYSERDA Portal Accounts may apply here: <https://portal.nyserda.ny.gov>

The online Application contains six (6) separate pages. Please review the information in the blue box at the top of each page. It provides high-level guidance and requirements that may be necessary for you to complete each step.

- Fields marked with a red asterisk (*) are required and must be completed before you can move on to the next page.
- Clicking Continue at the bottom of any page will save your progress (if all required fields have been completed) should you be unable to complete the application in one sitting.

For step-by-step instructions on the Application Submission process, please visit:
<https://nyserda.atlassian.net/wiki/spaces/PUBLIC/pages/64198450/FlexTech>

ATTACHMENT B

OsEM Concept Requirements

The OsEM concept must include and describe:

1. **Existing Conditions:** Identify existing facility conditions and assumptions that will allow for successful completion of the Scope of Work (SOW). Provide a list of the buildings that are included in the engagement, including the Property Name, Primary Street Address, City, Zip Code, and Number of Units (if applicable). If the OsEM application includes buildings that have recently applied for and/or completed FlexTech studies, explain how the OsEM will leverage the FlexTech study(ies) while avoiding duplication.
2. **Current state of energy management:** Describe the current energy management practices at the facility & the long-term need/ desire for an OsEM, including:
 - Background that explains special need/desire for an OsEM.
 - Plan for incorporating the OsEM into the broader team (account for operations and business process).
 - Description of existing:
 1. Organizational cultures, especially energy, sustainability, safety, and quality and awareness training programs
 - Is there a corporate electrification plan/ target?
 2. Energy tracking and monitoring system
 3. Cross-functional energy team
3. **OsEM Integration**
 - Demonstrate how the OsEM will be incorporated into the existing business structure by including a description of:
 1. The individual at the facility(ies) who will be responsible for overseeing the effort and ensuring successful integration of the OsEM and how the OsEM reports into the broader organization (could include an organizational chart).
 2. The intent to continue the role post Program engagement.
 3. How results and lessons learned will be shared to further the Program's objective of increasing the penetration of energy managers at comparable facilities.
 4. What data and other support will be available to the OsEM to enable successful performance of duties.
 5. An on-site workspace (with computer and phone).
 - Describe how the OsEM role will be fulfilled:
 1. New permanent hire
 - If the new permanent hire is not yet identified, the job description which reflects the Program criteria must be included.
 2. Supplementing permanent staff with contracted staff
 3. Contracted staff
 - Contracted OsEM support may be selected from NYSERDA qualified FlexTech Consultant from the list (<http://www.nyserda.ny.gov/Contractors/Find-a-Contractor/FlexTech-Consultants>) or an Independent Service Provider.
 - The specific staff member who will be performing the OsEM role must be identified in the scope of work. There must be one dedicated individual who performs the on-site services and is the direct customer contact. It is acceptable to have junior Consultant staff perform lower-level administrative tasks, although such delegation should not hinder the Program's intention of demonstrating the business case for a dedicated energy manager. Unless otherwise approved by NYSERDA, the OsEM must account for a minimum of 75% of the total hours funded under the engagement. The resumes of all Consulting staff involved must be included in the proposal.
4. **Preferred (not required) Experience**
 - Show ability to implement sizeable (>1,000 MWh electric or > 10,000 MMBtu fossil fuel), complicated (multi measure) energy and/or productivity projects.
 - Note OsEM resume is a required attachment; please see PON Section III for OsEM Application & Required Documentation.
4. **Facility energy acuity and project implementation history**
 - Provide existing corporate sustainability or energy goals.
 - Highlight independent or peer recognition for energy projects.
 - Experience implementing energy efficiency projects on the scale proposed.

ATTACHMENT C

Scope of Work Requirements

The Scope of Work (SOW) must be submitted in Microsoft Word format (or comparable) and written as such for contracting (not as a proposal). NYSERDA reserves the right to add or modify service areas. The SOW must include:

1. **OsEM engagement and site-specific goals**
 - a. Identify the site energy reduction target for the cost-shared 12+ month engagement and provide some discussion on how the facility plans to meet the target. The target should be stated by fuel type for all energy consumed on-site (electric, gas, and other fuels).
 - b. Identify any carbon reduction or electrification goals, if applicable.
 - c. State the length of the engagement in months and the weekly commitment in hours.
2. **Required Tasks and Deliverables** (the tasks below must be included in the SOW; additional tasks related to energy management and productivity improvement may be added):
 - a. Initiate and develop an energy management plan (first draft within 3 months of contracting the OsEM) that is a living document that is updated throughout the engagement and works towards the facility provided energy goal.
 - o Deliverable: Energy Management Plan to be submitted at the conclusion of the first quarter.
 - b. Develop and/or maintain an energy tracking and monitoring system. Explain how the system will be used to report results.
 - o Deliverable: Description of and updates to the energy tracking and monitoring system provided in Quarterly and Final Reports.
 - c. Develop and/or maintain a cross-functional energy team and hold monthly meetings. Schedule and hold project management check-ins with NYSERDA via conference call or written memo at least once per month; these can be incorporated into the broader cross-functional energy team meeting or held separately. Schedule and hold a minimum of two on-site (kick-off and exit) meetings, or other frequency at NYSERDA's discretion.
 - o Deliverable: Agendas and write-ups from cross-functional energy team and project management check-in meetings provided in Quarterly and Final Reports.
 - d. Develop a strategy for energy savings Measurement & Verification.
 - o Deliverable: Description of and updates to the energy savings Measurement & Verification plan.
 - e. Conduct walkthrough audits and reports that identify savings opportunities (Capital Expenditure, O Operation & Maintenance, etc.) for further investigation; provide reports to NYSERDA and the facility for review and comment.
 - o Deliverable: New or updated reports from walkthrough audits that identify opportunities for further investigation provided in Quarterly and Final Reports.
 - f. Review maintenance operational schedules and procedures to identify operational savings opportunities and develop preventative (rather than reactive) maintenance plan and schedule at least 1 employee training session to address the identified operational misuses that impact energy.
 - o Deliverables:
 - o Description of procedures put in place to address operational and maintenance misuses of energy; write-up summarizing the (planned or executed) employee operational and maintenance misuses training session (syllabus, employee feedback, results/outcomes, etc.) provided in Quarterly and Final Reports.
 - o Agenda and materials distributed at employee training session provided in Quarterly and Final Reports.
 - g. Develop and propose energy and productivity as well as beneficial electrification projects, including developing the business case.
 - o Deliverable: Proposed, evaluated, and implemented energy (capital upgrades and operational improvements) and productivity measure list, project descriptions, energy and cost savings analysis, and economic analysis provided in Quarterly and Final Reports.
 - h. Quarterly and Final reporting to NYSERDA on overall effort and progress towards goal. (NYSERDA reporting

templates are posted in the Resources section on www.nyserda.ny.gov/OSEM. These templates are provided as a guide and not a required format, however, all information requested in each template must be reported.)

- Deliverables:
 - Quarterly savings reports that document results from both capital upgrades and operational changes.
 - Final report that documents overall effort and progress against facility energy goal.
 - i. Tool development and peer to peer sharing for market dissemination of value of OsEM role. Develop tools – case study, including savings metrics, and road map documenting the on-boarding process and providing a lookback of the participant’s experience, with recommendations and adjustments made to reflect lessons learned during the process and best practices identified – for on-line publishing on NYSERDA website. Demonstrate a willingness for peer to peer sharing throughout the program, including internal sharing of success stories as well as external sharing upon NYSERDA’s request. OPTIONAL – Develop marketing materials highlighting and promoting projects.
 - Deliverables: Case study and road map provided to NYSERDA for online publishing. Marketing materials provided to NYSERDA (if including). (REQUIRED FOR FACILITIES USING A CONSULTANT TO FULFILL THE OSEM ROLE) Develop a potential glidepath to a permanent OsEM position or continuation of role at the facility.
 - Deliverable: Glidepath presented to NYSERDA in Final Report and at exit meeting.
 - j. CUSTOMERS ONLY: Bonus payment reporting, as applicable (Customers that continue to engage an OsEM and save an additional 1% of the site’s prior 12-month energy consumption). Develop and submit a Bonus Request that includes requisite reporting and documentation of energy savings impacts and financial benefits for each year (two years maximum for projects applying through December 31, 2025, otherwise one year maximum) following the OsEM engagement. Bonus Payment reporting details can be found in the Resources section on NYSERDA’s OsEM website: www.nyserda.ny.gov/OSEM.
 - Deliverable: Bonus Request with report that shows additional 1% savings submitted to NYSERDA.
3. **Schedule:** Include a schedule incorporating all SOW tasks and deliverables and indicate full time or part time OsEM engagement.
4. **Budget:** Include a detailed budget that shows hours and dollars allocated to each task of the scope of work. The budget must be reasonable and must show the portion of the budget being requested by NYSERDA and the portion that is the customer’s responsibility. Budget Template (Attachment D) or equivalent must be completed.

ATTACHMENT D

Budget Template

Facility:						
Task	Task Description (required tasks shown; additional tasks related to energy management and productivity improvement may be added)	Title	Rate	Hours	Hourly Charge-out Rate (Multiplier)	Total
a.	Develop energy management plan					\$0.00
b.	Develop energy tracking & monitoring system					\$0.00
c.	Develop a cross functional energy team and hold monthly meetings					\$0.00
d.	Develop a strategy for energy savings M&V at a corporate level					\$0.00
e.	Conduct walkthrough audits and reports					\$0.00
f.	Review Operations and Maintenance schedules and procedures and schedule at least one (1) employee training session to address energy awareness and operational issues					\$0.00
g.	Develop and propose energy and productivity as well as beneficial electrification projects, including developing the business case.					\$0.00
(insert and continue series)	Add your own task here					\$0.00
(insert and continue series)	Add your own task here					\$0.00
h.	Quarterly and Final Reporting					\$0.00
i.	Tool Development: Case study, Road Map, and Peer to Peer Sharing					\$0.00
j.	Develop a glidepath to permanent OsEM position or continuation of role					\$0.00
	Total			0.0		\$0.00
On-site Energy Manager Expenses (travel costs are limited to 3% of the total On-site Energy Manager engagement cost)						
Item	Amount	Unit/Description	Unit Cost		Total	
Expenses					\$0.00	
Mileage		mile			\$0.00	
			Total		\$0.00	
Program Engagement			Bonus Payment Potential (if applicable)			
TOTAL BUDGET (total labor + expenses)			\$0.00	Year 1 (\$5,000 or \$7,000)*		
Customer Share				Year 2** (\$5,000 or \$7,000)*		
NYSERDA Requested Share				Total BONUS PAYMENTS		
Total Potential NYSEDA Funding (NYSEDA cost share + total bonus payments)					\$0.00	

*Bonus amounts for eligible Customers are:

- \$5,000 for aggregated facility annual energy spend < \$1 million
- \$7,000 for aggregated facility annual energy spend > \$1 million

**Year 2 Bonus only available for project applications received by 12/31/25.

ATTACHMENT E

EXHIBIT A TERMS & CONDITIONS

1. Approval

NYSERDA's approval of a complete Application shall be evidenced by the issuance of a Purchase Order (PO). The Applicant may not commence work with the On-Site Energy Manager until such PO has been issued.

2. Amounts Payable

The Applicant shall pay the Cost-Share, identified in the PO, directly to the On-Site Energy Manager as set forth in a separate agreement between the Applicant and the On-Site Energy Manager. The NYSERDA Agreement with the Applicant is a not-to-exceed amount, based on the Applicant's scope of work, budget, and allowance for the potential bonus payment. The Applicant will be bound to the staff identified and hourly rates included in the approved scope of work and budget. The NYSERDA share shall not exceed the defined cost-share percent listed in the approved Scope of Work and Purchase Order based on the total cost of the On-Site Energy Manager's services. NYSERDA's share shall not to exceed the hourly rates included in the project budget, for the initial 12 or greater month work period. All NYSERDA payments will be based on approved invoices, and any backup documentation, when required. Should the total amount be lower than the original not-to-exceed amount, then NYSERDA reserves the right to lower the not-to-exceed amount accordingly. NYSERDA also reserves the right to seek a refund for monies paid if, at any time, it learns that the work was not completed as invoiced. Please see PON 3701 Section IV: Funding & Invoicing for detailed requirements related to Cost-Share, Invoicing and OsEM Bonus Payments.

3. Inspections, Follow-up Visits and On-Site Monitoring

(a) NYSERDA reserves the right to make a reasonable number of visits to the facility. Such visit(s) will be at a time convenient to the Applicant and made with at least one week advance notice to the applicant by NYSERDA.

4. Payments

OsEM Cost-Share: The Applicant will submit invoices directly to NYSERDA. NYSERDA may require a copy of the Applicant's canceled check paying their On-site Energy Manager engagement cost-share. Invoices may be submitted no more frequently than monthly to <https://services.nyserdera.ny.gov/Invoices>.

- Customers receiving a 100% cost share from NYSERDA must include the [OsEM 100% Cost Share Invoicing Form](#), signed by an authorized representative of the Customer, with all invoices.

OsEM Bonus: Per PON 3701 Section IV: Funding & Invoicing: OsEM Bonus, Customers that continue to engage an OsEM and save an additional 1% of the site's prior 12-month energy consumption will submit a Bonus Request that includes requisite reporting and documentation of energy savings impacts and financial benefits for each year (two years maximum) following the OsEM engagement. NYSERDA will issue the Bonus payments directly to the Customer after review and approval of each bonus period report. Consultants are not eligible to receive Bonuses so in the case of the Consultant being the Applicant, Bonus payments will be made directly to the Customer via a direct-to-voucher payment.

Applicant invoices to NYSERDA must include the OsEM's total billed cost, and must include labor and nonlabor costs, title(s), hourly rates, dates and hours for each task. Invoices must also indicate the amount that is being invoiced concurrently to the Customer, if applicable. In addition, if applicable, NYSERDA may also require a copy of the customer's canceled check showing payment of their cost-share. NYSERDA payments may not be released prior to Customer contribution equal to or exceeding the requested payment amount, as applicable. Payment will be based on services provided as defined in the Scope of Work and as documented by approved deliverable(s), invoices and other documentation deemed necessary by NYSERDA. NYSERDA reserves the right to withhold payment in cases where program deliverables are not being met or where the Applicant has not met their scope of work or performance obligations.

All invoices complete with the required reimbursement documentation must be submitted through <https://services.nyserda.ny.gov/Invoices/>.

5. Changes in the Program

Notwithstanding paragraph 18 (b), the program and these Terms & Conditions may be changed by NYSERDA at any time without notice. Approved applications, however, will be processed to completion under the Terms & Conditions in effect at the time of application to NYSERDA.

6. Indemnification

The Customer and the Applicant shall protect, indemnify and hold harmless NYSERDA and the State of New York from and against all liabilities, losses, claims, damages, judgments, penalties, causes of action, costs and expenses (including, without limitation, attorneys' fees and expenses) imposed upon or incurred by or asserted against NYSERDA or the State of New York resulting from, arising out of or relating to Applicant's or its subcontractors' performance of this Agreement. The obligations of the Applicant under this Article shall survive any expiration or termination of this Agreement, and shall not be limited by any enumeration herein of required insurance coverage.

7. No Warranties

- a) NYSERDA does not endorse, guarantee, or warrant any particular manufacturer or product, and NYSERDA provides no warranties, expressed or implied, for any product or services. The Applicant's reliance on warranties is limited to any warranties that may arise from, or be provided by contractors, vendors, etc.
- b) The Customer and the Applicant acknowledges that neither NYSERDA nor any of its consultants are responsible for assuring that the design, engineering and construction of the Project is proper or complies with any particular laws (including patent laws), codes, or industry standards. NYSERDA does not make any representations of any kind regarding the results to be achieved by the Project or the adequacy or safety of such measures.

8. Limit of Incentive Payments

NYSERDA reserves the right, for any reason, to stop approving applications and limit or stop making payments at any time without notice.

9. Release by the Applicant

The payment by the Applicant of the final invoice submitted shall release NYSERDA from any and all claims and liability the Applicant, its representatives, and assigns might otherwise have relating to this award.

10. Title to equipment

Title to all of the equipment purchased under this Agreement shall vest with the Customer.

11. Vendor Selection

NYSERDA has the right not to allow a vendor, contractor, or direct hire of the Applicant to participate in this program.

12. Removal of Equipment

The Customer agrees, as a condition of participation in the program, to remove and dispose of the equipment being replaced by the Project in accordance with all laws, rules, and regulations.

13. Miscellaneous

- (a) This Agreement (the Application and these Terms and Conditions) is the entire agreement between the parties and supersedes all other communications and representations.

- (b) If either NYSERDA or the Applicant desires to modify this Agreement, the modification must be in writing and approved by an authorized representative of both parties.

14. Audit

The Applicant shall keep, maintain, and preserve at its principal office throughout the term of the Agreement and for a period of seven years after acceptance of the Work, full and detailed books, accounts, and records pertaining to this Agreement, including without limitation, all data, bills, invoices, payrolls, time records, expense reports, subcontracting efforts and other documentation evidencing, or in any material way related to, Applicant's performance under this Agreement.

NYSERDA shall have the right from time to time and at all reasonable times during this period to inspect and audit any and all books, accounts and records related to this Agreement or reasonably necessary to the performance of an audit at the office or offices of the Applicant where they are then being kept, maintained and preserved. Any payment made under the Agreement shall be subject to retroactive reduction for amounts included therein which are found by NYSERDA on the basis of any audit of the Applicant by NYSERDA, the State of New York or an agency of the United States not to constitute an allowable charge or cost hereunder.

15. Stop Work Order

- (a) NYSERDA may at any time, by written Order to the Applicant, require the Applicant to stop all or any part of the Work called for by this Agreement for a period of up to ninety (90) days after the Stop Work Order is delivered to the Applicant, and for any further period to which the parties may agree. Any such order shall be specifically identified as a Stop Work Order issued pursuant to this Section. Upon receipt of such an Order, the Applicant shall forthwith comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the Work covered by the Order during the period of work stoppage consistent with public health and safety. Within a period of ninety (90) days after a Stop Work Order is delivered to the Applicant, or within any extension of that period to which the parties shall have agreed, NYSERDA shall either:
- (i) by written notice to the Applicant, cancel the Stop Work Order, which shall be effective as provided in such cancellation notice, or if not specified therein, upon receipt by the Applicant, or
 - (ii) terminate the Work covered by such order as provided in the Termination Section of this Agreement.
- (b) If a Stop Work Order issued under this Section is cancelled or the period of the Order or any extension thereof expires, the Applicant shall resume Work. An equitable adjustment shall be made in the delivery schedule, the estimated cost, the fee, if any, or a combination thereof, and in any other provisions of the Agreement that may be affected, and the Agreement shall be modified in writing accordingly, if:
- (i) the Stop Work Order results in an increase in the time required for, or in the Applicant's cost properly allocable to, the performance of any part of this Agreement, and
 - (ii) the Applicant asserts a claim for such adjustments within 30 days after the end of the period of Work stoppage; provided that, if NYSERDA decides the facts justify such action, NYSERDA may receive and act upon any such claim asserted at any time prior to final payment under this Agreement.
- (c) If a Stop Work Order is not cancelled and the Work covered by such Order is terminated, the reasonable costs resulting from the Stop Work Order shall be allowed by equitable adjustment or otherwise.
- (d) Notwithstanding the provisions of this Section, the maximum amount payable by NYSERDA to the

Applicant pursuant to this Section shall not be increased or deemed to be increased except by specific written amendment hereto.

16. Termination

- (a) This Agreement may be terminated by NYSERDA at any time during the term of this Agreement with or without cause, upon ten (10) days prior written notice to the Applicant. In such event, payment shall be paid to the Applicant for Work performed and expenses incurred prior to the effective date of termination in accordance with the provisions of the Article hereof entitled Incentive Payment and in reimbursement of any amounts required to be paid by the Applicant pursuant to Subcontracts; provided, however, that upon receipt of any such notice of termination, the Applicant shall cease the performance of Work, shall make no further commitments with respect thereto and shall reduce insofar as possible the amount of outstanding commitments (including, to the extent requested by NYSERDA, through termination of subcontracts containing provisions therefor).
- (b) NYSERDA specifically reserves the right to terminate this agreement in the event that the certification filed by the Applicant in accordance with State Finance Law Sections 139-j and 139-k is found to have been intentionally false or intentionally incomplete, or that the certification filed by the Applicant in accordance with New York State Tax Law Section 5-a is found to have been intentionally false when made. Terminations under this subsection (b) will be effective upon Notice.
- (c) Nothing in this Article shall preclude the Applicant from continuing to carry out the Work called for by the Agreement after receipt of a Stop Work Order or termination notice at its own election, provided that, if the Applicant so elects: (i) any such continuing Work after receipt of the Stop Work Order or termination notice shall be deemed not to be Work pursuant to the Agreement, and (ii) NYSERDA shall have no liability to the Applicant for any costs of the Work continuing after receipt of the Stop Work Order or termination notice.

17. Suspension or Termination for Non-Responsibility

- (a) Suspension. NYSERDA, in its sole discretion, reserves the right to suspend any or all activities under this Agreement, at any time, when it discovers information that calls into question the Responsibility of the Applicant. In the event of such suspension, the Applicant will be given written notice outlining the particulars of such suspension. Upon issuance of such notice, the Applicant must comply with the terms of the suspension order. Contract activity may resume at such time as NYSERDA issues a written notice authorizing a resumption of performance under the Contract.
- (b) Termination. Upon written notice to the Applicant, and a reasonable opportunity to be heard with appropriate NYSERDA officials or staff, this Agreement may be terminated by NYSERDA at the Applicant's expense where the Applicant is determined by NYSERDA to be non-Responsible. In such event, NYSERDA may complete the contractual requirements in any manner it may deem advisable and pursue available legal or equitable remedies for breach.

Payments are not payable unless NYSERDA has approved the Invoice, and approved the other activities and documentation provided by the On-Site Energy Manager.

18. Independent Contractor

- (a) The status of the Applicant under this Agreement shall be that of an independent contractor and not that of an agent, and in accordance with such status, the Applicant, the subcontractors, and their respective officers, agents, employees, representatives and servants shall at all times during the term of this Agreement conduct themselves in a manner consistent with such status and by reason of this Agreement shall neither hold themselves out as, nor claim to be acting in the capacity of, officers, employees, agents, representatives or servants of NYSERDA nor make any claim, demand or application for any right or privilege applicable to NYSERDA, including, without limitation, vicarious liability, professional liability coverage or indemnification, rights or privileges derived from workers' compensation coverage, unemployment insurance benefits, social security coverage and retirement membership or credit. It is understood and agreed that the personnel furnished by Applicant to

perform the Work shall be Applicant's employee(s) or agent(s), and under no circumstances are such employee(s) to be considered NYSERDA's employee(s) or agent(s), and shall remain the employees of Applicant, except to the extent required by section 414(n) of the Internal Revenue Code.

- (b) Applicant expressly acknowledges NYSERDA's need to be advised, on an immediate basis, of the existence of any claim or event that might result in a claim or claims against NYSERDA, Applicant and/or Applicant's personnel by virtue of any act or omission on the part of NYSERDA or its employees. Accordingly, Applicant expressly covenants and agrees to notify NYSERDA of any such claim or event, including but not limited to, requests for accommodation and allegations of harassment and/or discrimination, immediately upon Applicant's discovery of the same, and to fully and honestly cooperate with NYSERDA in its efforts to investigate and/or address such claims or events, including but not limited to, complying with any reasonable request by NYSERDA for disclosure of information concerning such claim or event even in the event that this Agreement should terminate for any reason.
- (c) Relationship of the Parties. It is understood and agreed that the personnel serving as the On-Site Energy Manager, to perform the services stipulated in the Scope of Work (SOW), under no circumstances are to be considered NYSERDA's employee(s) or agent(s), and shall remain the employees of the Applicant, except to the extent required by section 414(n) of the Internal Revenue Code.

The relationship of the parties to these Terms and Conditions, the Purchase Order, the On-Site Energy Manager Agreement with the Applicant, and the On-Site Energy Manager Scope of Work with NYSERDA is that of independent contractors. Nothing in this Agreement shall be construed as creating a partnership, joint venture, employment, agency, legal representation or other relationship between NYSERDA and the Applicant for any reason, including but not limited to unemployment, workers' compensation, employee benefits, expense reimbursement, vicarious liability, professional liability coverage or indemnification. Neither party shall have the right, power or authority to obligate or bind the other in any manner not specified in these Terms and Conditions, the Purchase Order, the On-Site Energy Manager Agreement with the Applicant, or the On-Site Energy Manager Scope of Work with NYSERDA.

19. Insurance

Section 19.01. Maintenance of Insurance; Policy Provisions The Applicant, at no additional cost to NYSERDA, shall maintain or cause to be maintained throughout the term of this Agreement, shall maintain or cause to be maintained throughout the term of this Agreement, insurance of the types and in the amounts specified in the Section hereof entitled Types of Insurance. All such insurance shall be evidenced by insurance policies, each of which shall:

- (a) except policies in evidence of insurance required under Section 11.02(b), name or be endorsed to cover NYSERDA, the State of New York and the Applicant as additional insureds;
- (b) provide that such policy may not be cancelled or modified until at least 30 days after receipt by NYSERDA of written notice thereof; and
- (c) be reasonably satisfactory to NYSERDA in all other respects.

Section 19.02. Types of Insurance. The types and amounts of insurance required to be maintained under this Article are as follows:

- (a) Commercial general liability insurance for bodily injury liability, including death, and property damage liability, incurred in connection with the performance of this Agreement, with minimum limits of \$1,000,000 in respect of claims arising out of personal injury or sickness or death of any one person, \$1,000,000 in respect of claims arising out of personal injury, sickness or death in any one accident or disaster, and \$1,000,000 in respect of claims arising out of property damage in any one accident or disaster; and
- (b) Workers Compensation, Employers Liability, and Disability Benefits as required by New York State.

Section 19.03. Notification of Claims/Events. The Applicant expressly acknowledges NYSERDA's need to be advised, on an immediate basis, of the existence of any claim or event that might result in a claim or claims against NYSERDA, the Applicant and/or the Applicant's personnel by virtue of any act or omission on the part of NYSERDA or its employees. Accordingly, the Applicant expressly covenants and agrees to notify NYSERDA of any such claim or event, including but not limited to, requests for accommodation and allegations of harassment and/or discrimination, immediately upon the Applicant's discovery of the same, and to fully and honestly cooperate with NYSERDA in its efforts to investigate and/or address such claims or events, including but not limited to, complying with any reasonable request by NYSERDA for disclosure of information concerning such claim or event even in the event that these Terms and Conditions, the On-Site Energy Manager Agreement or the On-Site Energy Manager Scope of Work should terminate for any reason.

20. OsEM Data for the Market

- (a) NYSERDA reserves the right to publish de-identified project data. NYSERDA shall follow New York State's Data Governance policy [NYS-S14-002 and NYS P03-002] for classification of information and no personally identifiable information shall be published.
- (b) For Multifamily Affordability Buildings, the Applicant and/or Customer agree that Customer's information, including name, electric and/or fuel consumption data, as well as any project information including but not limited to the FlexTech report, savings calculations and electric and/or fuel energy savings may be provided to the New York State Utilities, the Utilities implementation contractors and the Utilities' third-party evaluation contractor(s) for purposes of Affordable Multifamily Energy Efficiency Program (AMEEP) program management, AMEEP incentive payment, and AMEEP program evaluation purposes, subject to the Utilities entering into an agreement with the evaluation contractor(s) to maintain such Customer information confidential, and without regard to whether or not a Customer receives electric and gas service from more than one utility.

EXHIBIT B

REVISED

12/19

STANDARD TERMS AND
CONDITIONS FOR ALL NYSERDA
AGREEMENTS

(Based on Standard Clauses for New York State Contracts and Tax Law
Section 5-a)

The parties to the Agreement agree to be bound by the following clauses which are hereby made a part of the Agreement to the extent applicable:

1. **NON-DISCRIMINATION REQUIREMENTS.** To the extent required by Article 15 of the Executive Law (also known as the Human Rights Law) and all other State and Federal statutory and constitutional non-discrimination provisions, the Applicant will not discriminate against any employee or applicant for employment because of race, creed, color, sex, national origin, sexual orientation, age, disability, genetic predisposition or carrier status, or marital status. Furthermore, in accordance with Section 220-e of the Labor Law, if this is an Agreement for the construction, alteration or repair of any public building or public work or for the manufacture, sale or distribution of materials, equipment or supplies, and to the extent that this Agreement shall be performed within the State of New York, Applicant agrees that neither it nor its subcontractors shall, by reason of race, creed, color, disability, sex or national origin: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this Agreement. If this is a building service Agreement as defined in Section 230 of the Labor Law, then, in accordance with Section 239 thereof, Applicant agrees that neither it nor its subcontractors shall, by reason of race, creed, color, national origin, age, sex or disability: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this contract. Applicant is subject to fines of \$50.00 per person per day for any violation of Section 220-e or Section 239 as well as possible termination of this Agreement and forfeiture of all moneys due hereunder for a second subsequent violation.

2. **WAGE AND HOURS PROVISIONS.** If this is a public work Agreement covered by Article 8 of the Labor Law or a building service Agreement covered by Article 9 thereof, neither Applicant's employees nor the employees of its subcontractors may be required or permitted to work more than the number of hours or days stated in said statutes, except as otherwise provided in the Labor Law and as set forth in prevailing wage and supplement schedules issued by the State Labor Department. Furthermore, Applicant and its subcontractors must pay at least the prevailing wage rate and pay or provide the prevailing supplements, including the premium rates for overtime pay, as determined by the State Labor Department in accordance with the Labor Law. Additionally, effective April 28, 2008, if this is a public work contract covered by Article 8 of the Labor Law, the Applicant understands and agrees that the filing of payrolls in a manner consistent with Subdivision 3-a of Section 220 of the Labor Law shall be a condition precedent to payment by NYSERDA of any NYSERDA-approved sums due and owing for work done upon the project.

3. **NON-COLLUSIVE BIDDING REQUIREMENT.** In accordance with Section 2878 of the Public Authorities Law, if this Agreement was awarded based upon the submission of bids, Applicant warrants, under penalty of perjury, that its bid was arrived at independently and without collusion aimed at restricting competition. Applicant further warrants that, at the time Applicant submitted its bid, an authorized and responsible person executed and delivered to NYSERDA a non-collusive bidding certification on Applicant's behalf.

4. **INTERNATIONAL BOYCOTT PROHIBITION.** If this Agreement exceeds \$5,000, the Applicant agrees, as a material condition of the Agreement, that neither the Applicant nor any substantially owned or affiliated person, firm, partnership or corporation has participated, is participating, or shall participate in an international boycott in violation of the Federal Export Administration Act of 1979 (50 USC App. Sections 2401 et seq.) or regulations thereunder. If such Applicant, or any of the aforesaid affiliates of Applicant, is convicted or is otherwise found to have violated said laws or regulations upon the final determination of the United States Commerce Department or any other appropriate agency of the United States subsequent to the Agreement's execution, such Agreement, amendment or modification thereto shall be rendered forfeit and void. The Applicant shall so notify NYSERDA within five (5) business days of such conviction, determination or disposition of appeal. (See and compare Section 220-f of the Labor Law, Section 139-h of the State Finance Law, and 2 NYCRR 105.4).

5. SET-OFF RIGHTS. NYSERDA shall have all of its common law and statutory rights of set-off. These rights shall include, but not be limited to, NYSERDA's option to withhold for the purposes of set-off any moneys due to the Applicant under this Agreement up to any amounts due and owing to NYSERDA with regard to this Agreement, any other Agreement, including any Agreement for a term commencing prior to the term of this Agreement, plus any amounts due and owing to NYSERDA for any other reason including, without limitation, tax delinquencies, fee delinquencies or monetary penalties relative thereto.

6. PROPRIETARY INFORMATION. Notwithstanding any provisions to the contrary in the Agreement, Applicant and NYSERDA acknowledge and agree that all information, in any format, submitted to NYSERDA shall be subject to and treated in accordance with the NYS Freedom of Information Law ("FOIL," Public Officers Law, Article 6). Pursuant to FOIL, NYSERDA is required to make available to the public, upon request, records or portions thereof which it possesses, unless that information is statutorily exempt from disclosure. Therefore, unless the Agreement specifically requires otherwise, Applicant should submit information to NYSERDA in a non-confidential, non-proprietary format. FOIL does provide that NYSERDA may deny access to records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." [See Public Officers Law, § 87(2)(d)]. Accordingly, if the Agreement specifically requires submission of information in a format Applicant considers a proprietary and/or confidential trade secret, Applicant shall fully identify and plainly label the information "confidential" or "proprietary" at the time of disclosure. By so marking such information, Applicant represents that the information has actual or potential specific commercial or competitive value to the competitors of Applicant. Without limitation, information will not be considered confidential or proprietary if it is or has been (i) generally known or available from other sources without obligation concerning its confidentiality; (ii) made available by the owner to others without obligation concerning its confidentiality; or (iii) already available to NYSERDA without obligation concerning its confidentiality. In the event of a FOIL request, it is NYSERDA's policy to consider records as marked above pursuant to the trade secret exemption procedure set forth in 21 New York Codes Rules & Regulations § 501.6 and any other applicable law or regulation. However, NYSERDA cannot guarantee the confidentiality of any information submitted. More information on FOIL, and the relevant statutory law and regulations, can be found at the website for the Committee on Open Government (<http://www.dos.state.ny.us/coog/foil2.html>) and NYSERDA's Regulations, Part 501 (<http://www.nyserda.ny.gov/About/New-York-State-Regulations.aspx>).

7. IDENTIFYING INFORMATION AND PRIVACY NOTIFICATION. (a) FEDERAL EMPLOYER IDENTIFICATION NUMBER and/or FEDERAL SOCIAL SECURITY NUMBER. As a condition to NYSERDA's obligation to pay any invoices submitted by Applicant pursuant to this Agreement, Applicant shall provide to NYSERDA its Federal employer identification number or Federal social security number, or both such numbers when the Applicant has both such numbers. Where the Applicant does not have such number or numbers, the Applicant must give the reason or reasons why the payee does not have such number or numbers.

(b) PRIVACY NOTIFICATION. The authority to request the above personal information from a seller of goods or services or a lessor of real or personal property, and the authority to maintain such information, is found in Section 5 of the State Tax Law. Disclosure of this information by Applicant to the State is mandatory. The principal purpose for which the information is collected is to enable the State to identify individuals, businesses and others who have been delinquent in filing tax returns or may have understated their tax liabilities and to generally identify persons affected by the taxes administered by the Commissioner of Taxation and Finance. The information will be used for tax administration purposes and for any other purpose authorized by law.

8. CONFLICTING TERMS. In the event of a conflict between the terms of the Agreement (including any and all attachments thereto and amendments thereof) and the terms of this Exhibit B, the terms of this Exhibit B shall control.

9. GOVERNING LAW. This Agreement shall be governed by the laws of the State of New York except where the Federal supremacy clause requires otherwise.

10. NO ARBITRATION. Disputes involving this Agreement, including the breach or alleged breach thereof, may not be submitted to binding arbitration (except where statutorily required) without the NYSERDA's written consent, but must, instead, be heard in a court of competent jurisdiction of the State of New York.

11. SERVICE OF PROCESS. In addition to the methods of service allowed by the State Civil Practice Law and Rules ("CPLR"), Applicant hereby consents to service of process upon it by registered or certified mail, return receipt requested. Service hereunder shall be complete upon Applicant's actual receipt of process or upon NYSERDA's receipt of the return thereof by the United States Postal Service as refused or undeliverable. Applicant must promptly notify NYSERDA, in writing, of each and every change of address to which service of process can be made. Service by NYSERDA to the last known address shall be sufficient. Applicant will have thirty (30) calendar days after service hereunder is complete in which to respond.

12. CRIMINAL ACTIVITY. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of any allegation previously unknown to it that the Applicant or any of its principals is under indictment for a felony, or has been, within five (5) years prior to submission of the Applicant's proposal to NYSERDA, convicted of a felony, under the laws of the United States or Territory of the United States, then NYSERDA may exercise its stop work right under this Agreement. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of the fact, previously unknown to it, that Applicant or any of its principals is under such indictment or has been so convicted, then NYSERDA may exercise its right to terminate this Agreement. If the Applicant knowingly withheld information about such an indictment or conviction, NYSERDA may declare the Agreement null and void and may seek legal remedies against the Applicant and its principals. The Applicant or its principals may also be subject to penalties for any violation of law which may apply in the particular circumstances. For an Applicant which is an association, partnership, corporation, or other organization, the provisions of this paragraph apply to any such indictment or conviction of the organization itself or any of its officers, partners, or directors or members of any similar governing body, as applicable.

13. PERMITS. It is the responsibility of the Applicant to acquire and maintain, at its own cost, any and all permits, licenses, easements, waivers and permissions of every nature necessary to perform the work.

14. PROHIBITION ON PURCHASE OF TROPICAL HARDWOODS. The Applicant certifies and warrants that all wood products to be used under this Agreement will be in accordance with, but not limited to, the specifications and provisions of State Finance Law Section 165 (Use of Tropical Hardwoods), which prohibits purchase and use of tropical hardwoods, unless specifically exempted by NYSERDA.

15. OMNIBUS PROCUREMENT ACT OF 1992. It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority and women-owned business enterprises as bidders, subcontractors and suppliers on its procurement contracts.

Information on the availability of New York State subcontractors and suppliers is available

from: NYS Department of Economic Development
Division for Small Business
30 South Pearl St – 7th
Floor Albany, New York
12245 Telephone: 518-
292-5220
Fax: 518-292-5884
<http://www.esd.ny.gov>

A directory of certified minority and women-owned business enterprises is available from:

NYS Department of Economic Development
Division of Minority and Women's Business
Development 30 South Pearl St – 2nd Floor
Albany, New York 12245
Telephone: 518-292-5250
Fax: 518-292-5803
<http://www.empire.state.ny.us>

The Omnibus Procurement Act of 1992 requires that by signing this Agreement, Applicants certify that whenever the total amount is greater than \$1 million:

(a) The Applicant has made reasonable efforts to encourage the participation of New York State Business Enterprises as suppliers and subcontractors, including certified minority and women-owned business enterprises, on this project, and has retained the documentation of these efforts to be provided upon request to the State;

(b) The Applicant has complied with the Federal Equal Opportunity Act of 1972 (P.L. 92-261), as amended;

(c) The Applicant agrees to make reasonable efforts to provide notification to New York State residents of employment opportunities on this project through listing any such positions with the Job Service Division of the New York State Department of Labor, or providing such notification in such manner as is consistent with existing collective bargaining contracts or agreements. The Applicant agrees to document these efforts and to provide said documentation to the State upon request; and

(d) The Applicant acknowledges notice that the State may seek to obtain offset credits from foreign countries as a result of this contract and agrees to cooperate with the State in these efforts.

16. RECIPROCITY AND SANCTIONS PROVISIONS. Bidders are hereby notified that if their principal place of business is located in a country, nation, province, state or political subdivision that penalizes New York State vendors, and if the goods or services they offer will be substantially produced or performed outside New York State, the Omnibus Procurement Act 1994 and 2000 amendments (Chapter 684 and Chapter 383, respectively) require that they be denied contracts which they would otherwise obtain. NOTE: As of May 15, 2002, the list of discriminatory jurisdictions subject to this provision includes the states of South Carolina, Alaska, West Virginia, Wyoming, Louisiana and Hawaii. Contact NYS Department of Economic Development for a current list of jurisdictions subject to this provision.

17. COMPLIANCE WITH NEW YORK STATE INFORMATION SECURITY BREACH AND NOTIFICATION ACT.

Applicant shall comply with the provisions of the New York State Information Security Breach and Notification Act (General Business Law Section 899-aa; State Technology Law Section 208).

18. PROCUREMENT LOBBYING. To the extent this Agreement is a "procurement contract" as defined by State Finance Law Sections 139-j and 139-k, by signing this Agreement the Applicant certifies and affirms that all disclosures made in accordance with State Finance Law Sections 139-j and 139-k are complete, true and accurate. In the event such certification is found to be intentionally false or intentionally incomplete, NYSEDA may terminate the agreement by providing written notification to the Applicant in accordance with the terms of the agreement.

19. COMPLIANCE WITH TAX LAW SECTION 5-a. The following provisions apply to Applicants that have entered into agreements in an amount exceeding \$100,000 for the purchase of goods and services:

- a) Before such agreement can take effect, the Applicant must have on file with the New York State Department of Taxation and Finance an Applicant Certification form (ST-220-TD).
- b) Prior to entering into such an agreement, the Applicant is required to provide NYSEDA with a completed Applicant Certification to Covered Agency form (Form ST-220-CA).
- c) Prior to any renewal period (if applicable) under the agreement, the Applicant is required to provide NYSEDA with a completed Form ST-220-CA.

Certifications referenced in paragraphs (b) and (c) above will be maintained by NYSEDA and made a part hereof and incorporated herein by reference.

NYSEDA reserves the right to terminate this agreement in the event it is found that the certification filed by the Applicant in accordance with Tax Law Section 5-a was false when made.

20. IRANIAN ENERGY SECTOR DIVESTMENT. In accordance with Section 2879-c of the Public Authorities Law, by signing this contract, each person and each person signing on behalf of any other party certifies, and in the case of a joint bid or partnership each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief that each person is not on the list created pursuant to paragraph (b) of subdivision 3 of [section 165-a of the State Finance Law](#) (See www.ogs.ny.gov/about/regs/ida.asp).

21. COMPLIANCE WITH NEW YORK STATE DIESEL EMISSION REDUCTION ACT (DERA) OF 2006. Applicant shall comply with and, if applicable to this Agreement, provide proof of compliance with the New York State Diesel Emission Reduction Act of 2006 ("DERA"), Environmental Conservation Law (ECL) Section 19-0323, and the NYS Department of Environmental Conservation (DEC) Law implementing regulations under 6 NYCRR Part 248, Use of Ultra Low Sulfur Diesel Fuel (ULSD) and Best Available Retrofit Technology ("BART"). Compliance includes, but is not limited to, the development of a heavy-duty diesel vehicle (HDDV), maintaining documentation associated with BART evaluations, submitting to and receiving DEC approval of a technology or useful-life waiver, and maintaining records where BART-applicable vehicles are primarily located or garaged. DEC regulation under 6 NYCRR Part 248, Use of Ultra Low Sulfur Diesel and Best Available Technology for Heavy Duty Vehicles can be found at: <https://www.dec.ny.gov/regs/2492.html>.

22. ADMISSIBILITY OF REPRODUCTION OF CONTRACT. Notwithstanding the best evidence rule or

any other legal principle or rule of evidence to the contrary, the Applicant acknowledges and agrees that it waives any and all objections to the admissibility into evidence at any court proceeding or to the use at any examination before trial of an electronic reproduction of this contract, regardless of whether the original of said contract is in existence.

EXHIBIT C

NYSERDA PROMPT PAYMENT POLICY STATEMENT

504.1. Purpose and Applicability. (a) The purpose of this Exhibit is to provide a description of Part 504 of NYSERDA's regulations, which consists of NYSERDA's policy for making payment promptly on amounts properly due and owing by NYSERDA under this Agreement. The section numbers used in this document correspond to the section numbers appearing in Part 504 of the regulations.¹

(b) This Exhibit applies generally to payments due and owing by the NYSERDA to the Applicant pursuant to this Agreement. However, this Exhibit does not apply to Payments due and owing when NYSERDA is exercising a Set-Off against all or part of the Payment, or if a State or Federal law, rule or regulation specifically requires otherwise.

504.2. Definitions. Capitalized terms not otherwise defined in this Exhibit shall have the same meaning as set forth earlier in this Agreement. In addition to said terms, the following terms shall have the following meanings, unless the context shall indicate another or different meaning or intent:

(a) "Date of Payment" means the date on which NYSERDA requisitions a check from its statutory fiscal agent, the Department of Taxation and Finance, to make a Payment.

(b) "Designated Payment Office" means the Office of NYSERDA's Controller, located at 17 Columbia Circle, Albany, New York 12203.

(c) "Payment" means payment properly due and owing to Applicant pursuant to Exhibit A of this Agreement.

(d) "Prompt Payment" means a Payment within the time periods applicable pursuant to Sections 504.3 through 504.5 of this Exhibit in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(e) "Payment Due Date" means the date by which the Date of Payment must occur, in accordance with the provisions of Sections 504.3 through 504.5 of this Exhibit, in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(f) "Proper Invoice" means a written request for Payment that is submitted by an Applicant setting forth the description, price or cost, and quantity of goods, property or services delivered or rendered, in such form, and supported by such other substantiating documentation, as NYSERDA may reasonably require, including but not limited to any requirements set forth in Exhibits A or B to this Agreement; and addressed to NYSERDA's Controller, marked "Attention: Accounts Payable," at the Designated Payment Office.

(g)(1) "Receipt of an Invoice" means:

(i) if the Payment is one for which an invoice is required, the later of:

(a) the date on which a Proper Invoice is actually received in the Designated Payment Office during normal business hours; or

(b) the date by which, during normal business hours, NYSERDA has actually received all the purchased goods, property or services covered by a Proper Invoice previously received in the Designated Payment Office.

(ii) if the Agreement provides that a Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice the 30th calendar day, excluding legal holidays, before the date so specified or predetermined.

(2) For purposes of this subdivision, if the Agreement requires a multifaceted, completed or working system, or delivery of no less than a specified quantity of goods, property or services and only a portion of such systems or less than the required goods, property or services are working, completed or delivered, even though the Applicant has invoiced NYSERDA for the portion working, completed or delivered, NYSERDA will not be in Receipt of an Invoice until the specified minimum amount of the systems, goods, property or services are working, completed or delivered.

(h) "Set-off" means the reduction by NYSERDA of a payment due an Applicant by an amount equal to the amount of an unpaid legally enforceable debt owed by the Applicant to NYSERDA.

¹ This is only a summary; the full text of Part 504 can be accessed at:
<http://www.nyserdanyny.gov/About/New-York-State-Regulations.aspx>

504.3. Prompt Payment Schedule. Except as otherwise provided by law or regulation or in Sections 504.4 and 504.5 of this Exhibit, the Date of Payment by NYSERDA of an amount properly due and owing under this Agreement shall be no later than thirty (30) calendar days, excluding legal holidays, after Receipt of a Proper Invoice.

504.4. Payment Procedures.

(a) Unless otherwise specified in this Agreement, a Proper Invoice submitted by the Applicant to the Designated Payment Office shall be required to initiate payment for goods, property or services. As soon as any invoice is received in the Designated Payment Office during normal business hours, such invoice shall be date-stamped. The invoice shall then promptly be reviewed by NYSERDA.

(b) NYSERDA shall notify the Applicant within fifteen (15) calendar days after Receipt of an Invoice of:

- (1) any defects in the delivered goods, property or services;
- (2) any defects in the invoice; or
- (3) suspected improprieties of any kind.

(c) The existence of any defects or suspected improprieties shall prevent the commencement of the time period specified in Section 504.3 until any such defects or improprieties are corrected or otherwise resolved.

(d) If NYSERDA fails to notify an Applicant of a defect or impropriety within the fifteen (15) calendar day period specified in subdivision (b) of this section, the sole effect shall be that the number of days allowed for Payment shall be reduced by the number of days between the 15th day and the day that notification was transmitted to the Applicant. If NYSERDA fails to provide reasonable grounds for its contention that a defect or impropriety exists, the sole effect shall be that the Payment Due Date shall be calculated using the original date of Receipt of an Invoice.

(e) In the absence of any defect or suspected impropriety, or upon satisfactory correction or resolution of a defect or suspected impropriety, NYSERDA shall make Payment, consistent with any such correction or resolution and the provisions of this Exhibit.

504.5. Exceptions and Extension of Payment Due Date. NYSERDA has determined that, notwithstanding the provisions of Sections 504.3 and 504.4 of this Exhibit, any of the following facts or circumstances, which may occur concurrently or consecutively, reasonably justify extension of the Payment Due Date:

(a) If this Agreement provides Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice, if any documentation, supporting data, performance verification, or notice specifically required by this Agreement or other State or Federal mandate has not been submitted to NYSERDA on a timely basis, then the Payment Due Date shall be extended by the number of calendar days from the date by which all such matter was to be submitted to NYSERDA and the date when NYSERDA has actually received such matter.

(b) If an inspection or testing period, performance verification, audit or other review or documentation independent of the Applicant is specifically required by this Agreement or by other State or Federal mandate, whether to be performed by or on behalf of NYSERDA or another entity, or is specifically permitted by this Agreement or by other State or Federal provision and NYSERDA or other entity with the right to do so elects to have such activity or documentation undertaken, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when any such activity or documentation has been completed, NYSERDA has actually received the results of such activity or documentation conducted by another entity, and any deficiencies identified or issues raised as a result of such activity or documentation have been corrected or otherwise resolved.

(c) If an invoice must be examined by a State or Federal agency, or by another party contributing to the funding of the Contract, prior to Payment, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when the State or Federal agency, or other contributing party to the Contract, has completed the inspection, advised NYSERDA of the results of the inspection, and any deficiencies identified or issues raised as a result of such inspection have been corrected or otherwise resolved.

(d) If appropriated funds from which Payment is to be made have not yet been appropriated or, if appropriated, not yet been made available to NYSERDA, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when such funds are made available to

NYSERDA.

504.6. Interest Eligibility and Computation. If NYSERDA fails to make Prompt Payment, NYSERDA shall pay interest to the Applicant on the Payment when such interest computed as provided herein is equal to or more than ten dollars (\$10.00). Interest shall be computed and accrue at the daily rate in effect on the Date of Payment, as set by the New York State Tax Commission for corporate taxes pursuant to Section 1096(e)(1) of the Tax Law. Interest on such a Payment shall be computed for the period beginning on the day after the Payment Due Date and ending on the Date of Payment.

504.7. Sources of Funds to Pay Interest. Any interest payable by NYSERDA pursuant to Exhibit shall be paid only from the same accounts, funds, or appropriations that are lawfully available to make the related Payment.

504.8. Incorporation of Prompt Payment Policy Statement into Contracts. The provisions of this Exhibit shall apply to all Payments as they become due and owing pursuant to the terms and conditions of this Agreement, notwithstanding that NYSERDA may subsequently amend its Prompt Payment Policy by further rulemaking.

504.9. Notice of Objection. Applicant may object to any action taken by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid by submitting a written notice of objection to NYSERDA. Such notice shall be signed and dated and concisely and clearly set forth the basis for the objection and be addressed to the Vice President, New York State Energy Research and Development Authority, at the notice address set forth in this Agreement. The Vice President of NYSERDA, or his or her designee, shall review the objection for purposes of affirming or modifying NYSERDA's action. Within fifteen (15) working days of the receipt of the objection, the Vice President, or his or her designee, shall notify the Applicant either that NYSERDA's action is affirmed or that it is modified or that, due to the complexity of the issue, additional time is needed to conduct the review; provided, however, in no event shall the extended review period exceed thirty (30) working days.

504.10. Judicial Review. Any determination made by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid is subject to judicial review in a proceeding pursuant to Article 78 of the Civil Practice Law and Rules. Such proceedings shall only be commenced upon completion of the review procedure specified in Section 504.9 of this Exhibit or any other review procedure that may be specified in this Agreement or by other law, rule, or regulation.

504.11. Court Action or Other Legal Processes.

(a) Notwithstanding any other law to the contrary, the liability of NYSERDA to make an interest payment to an Applicant pursuant to this Exhibit shall not extend beyond the date of a notice of intention to file a claim, the date of a notice of a claim, or the date commencing a legal action for the payment of such interest, whichever occurs first.

(b) With respect to the court action or other legal processes referred to in subdivision (a) of this section, any interest obligation incurred by NYSERDA after the date specified therein pursuant to any provision of law other than Public Authorities Law Section 2880 shall be determined as prescribed by such separate provision of law, shall be paid as directed by the court, and shall be paid from any source of funds available for that purpose.

*NYSERDA reserves the right to extend or
add funding at its sole discretion.*

Applications accepted continuously through November 15, 2025, by 3:00 p.m. Eastern Time (ET)* or until funds are fully committed, whichever occurs first*.

The Buildings of Excellence Early Design Support Request for Proposal (the “EDS RFP”) seeks Proposals for qualified design firms that will provide early-stage design support for new construction, adaptive reuse, and gut rehabilitation multifamily projects that will be clean and resilient, beautiful, and functional, and will provide healthy, safe, comfortable, and resilient living spaces for their occupants. Funding through the EDS RFP may be made available to projects that will achieve carbon neutral performance and will also be profitable for their developers and owners and demonstrate realistic cost reductions in the design and construction phases. The EDS RFP is part of the larger Buildings of Excellence Competition (the “Competition”). Design firm Partner Proposers (the “Partner Proposers”) to the EDS RFP must demonstrate how their design firm has engaged with prior projects or will engage with future projects to substantially reduce energy use and per capita carbon emissions, while increasing building resiliency, including passive and active survivability, successfully integrating architectural design attributes, and improving health, comfort, safety, and productivity for occupants, in a manner that can be replicated at scale. Successful Partner Proposers will become design firm Partners (the “Partners”) under the EDS RFP.

Partner Proposers must prepare Partner Proposals that will demonstrate (1) competence in clean, resilient, and carbon neutral design that is coupled with architectural design quality and innovation, (2) ability to deliver high quality and functional, clean, resilient, and carbon neutral multifamily projects at competitive costs, (3) how their projects generate interest in and demand for the design, construction, and occupation of clean, resilient, and carbon neutral buildings, and (4) their commitment to share information related to the project’s design, costs, and performance to support the decision-making processes employed to achieve the desired outcomes.

The EDS RFP will consider funding the early-stage design of projects that intend to serve all portions of the multifamily market sector, while primarily focusing on mid- to high-rise (8 stories or greater in height) multifamily buildings and for projects that involve the adaptive re-use of commercial office, institutional, or retail space to provide multifamily housing. Through the EDS RFP, Partners will prepare Project Proposals for early-stage clean, resilient, and carbon neutral design support, as well as support for initiatives focused on broad marketing and public awareness. Partners are eligible to receive up to \$1.50/square foot in direct funding, up to a per project-cap of \$150,000, for the proposed projects.

Partner and Project Proposal Submissions: Electronic submission via the NYSERDA portal is preferable. Partner Proposers may submit Word, Excel, or pdf files (file formats include the following: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 50 MB or less in file size. Proposal pdfs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the Partner Proposer’s entity name in the title of the document. NYSERDA also accepts Proposals by mail or hand delivery if electronic submission is not possible. For detailed instructions on how to submit a Proposal (electronic or paper submission), follow the [Application Instructions and Portal Training Guide](#) [PDF] located on NYSERDA’s [Current Solicitations and Funding Opportunities](#) website.

Information: The program team may periodically provide updates on this opportunity. [Fill out this form](#) to be notified of updates or informational webinars that may be scheduled. Submitting your contact information will ensure you will also be notified of when funding has been depleted or when additional funds are made available.

Contact Information: For technical questions, contact Kristin Graham (designated contact) at kristinn@nyserda.ny.gov or (518) 862-1090 ext. 3069. For contractual questions concerning this solicitation, contact Thomas Rood (designated contact) at Tom.Solicitations@nyserda.ny.gov.

No communication with NYSERDA staff intended to influence this procurement is permitted. Contacting anyone other than the designated personnel (either directly by the Partner Proposer or indirectly through a lobbyist or other person acting on the Partner Proposer’s behalf) in an attempt to influence the procurement may disqualify the Partner Proposer from consideration.

*** All Partner and Project Proposals must be received by 3 p.m. (ET) on the date noted above. Late, faxed, or emailed Proposals will not be accepted.** Incomplete Proposals may be subject to disqualification. It is the Partner Proposer's responsibility to ensure that all submission requirements have been met. Please note the following: for electronic submissions via the portal, there are required questions that need to be answered in addition to uploading attachments. Be sure to allot at least 60 minutes to enter and submit Proposals. The electronic Proposal system closes promptly, and files in process or attempted edits or submission after 3 p.m. (ET) on the date above will not be accepted.

If changes are made to this solicitation before the due date, notification specific to this solicitation will be posted on NYSERDA's [Current Solicitations and Funding Opportunities](#) website.

I. Introduction

The use of fossil fuels, such as natural gas, propane, oil, and coal, releases carbon dioxide and other emissions into the atmosphere that contribute to climate change and other environmental impacts. Climate change will put buildings, and their systems and occupants, at greater risk in the future of hazards such as flooding, sea level rise, increased temperatures, and more frequent and more extreme storm events. Eliminating the use of fossil fuels to support building operations will decrease carbon dioxide and other emissions.

NYSERDA seeks to increase the number of design firms participating in the development of aesthetically pleasing, cost-effective, clean, resilient, and carbon neutral buildings as well as increasing the proficiency among these firms in delivering clean and resilient design. By directly funding design firms, NYSERDA aims to drive market development by:

1. Increasing the design firm's capacity and expertise to complete the analyses, design, engineering, and research needed to produce cost effective, clean, resilient, and carbon neutral buildings,
2. Supporting the design community with resources and tools that will help design firms comply with upcoming policy requirements, local laws, and advancing code cycles,
3. Funding additional research, design detailing, modeling, and cost analyses on individual projects that the design firm can then apply to other projects within the firm's portfolio in a quest to make carbon neutral attributes part of the firm's general design practice. The project knowledge acquired will ideally result in a scaling up of the number of clean, resilient, and carbon neutral buildings the design firm can implement,
4. Reducing market barriers and soft costs associated with the design of new and existing clean, resilient, and carbon neutral buildings. The EDS RFP provides funding at early design phases, when energy efficient design decisions are being made, to help buy down and reduce upfront risks associated with high performance design exploration,
5. Assisting Partners in convincing more developers to successfully build clean, resilient, and carbon neutral projects. Additional design work, research, modeling, and economic analysis can produce quality, objective data, and pertinent information that, if acted on and included in the building design, could mitigate carbon impacts, provide better living conditions for occupants, and financial benefits to building owners. This information can be used to build developer confidence in clean, resilient, and carbon neutral buildings and create a lower risk for the developer to proceed with the project design, innovation, and nascent and novelty systems.

Partner Opportunity

NYSERDA first seeks Proposals for design firms to become Partners that will provide early-stage design support on projects that will be beautiful, clean, resilient, carbon neutral, and functional spaces for their occupants. Successful Partner Proposers must demonstrate how their firm:

1. Successfully designed, through the completion of construction documents, three (3) or more carbon neutral or net zero energy multifamily buildings, or mixed-use buildings that incorporate multifamily occupancy as the primary use,
 - i. An exception to the above eligibility requirements applies to design firms interested in pursuing Provisional Partner status. For this designation, design firms may apply without having any completed project work examples. Design firms will be required to provide a Letter of Intent that outlines the firm's plan to participate in the carbon neutral design space, in lieu of project work examples.
2. Possesses expertise in clean and resilient design that achieves carbon neutral performance by reducing energy use,

3. Addresses architectural design attributes, at the unit, building, site, and community level,
4. Delivers designs that encompass non-energy co-benefits for occupants, while providing exceptional comfort, health, safety, and otherwise outstanding living environments for occupants,
5. Delivers designs that reduce total carbon impacts, including reductions to embodied carbon,
6. Increases the building's and building components' resilience,
7. Addresses design strategies that can achieve reductions in overall project costs,
8. Has active engagement in the multifamily market and would likely be able to submit high impact, scalable, and highly replicable multifamily projects to the early design program during the open period.

Eligible Services for Partners

Partners will be able to submit Project Proposals to request funding to assist in designing clean, resilient, carbon neutral projects that anticipate and meet developer needs. Early design phase services that Partners can receive funding for may include, but not be limited to:

1. Complete in-depth research necessary to deliver clean, resilient, and carbon neutral performance, including but not limited to topics such as:
 - i. Electrification,
 - ii. Densification,
 - iii. Grid Interactivity
 - iv. Renewable energy systems,
 - v. Energy storage (thermal and electric),
 - vi. Energy system selection.
2. Complete additional research in one or more of the following areas:
 - i. Ensuring building, component, community, and occupant resilience, and active and passive survivability, including but not limited to topics such as strategies that are designed to be resilient for the lifespan of the strategy or system,
 - ii. Reductions to embodied carbon in building and finish materials, processes, or other design attributes,
 - iii. Purposeful use of materials that achieve carbon sequestration,
 - iv. Reductions to the total volume of refrigerants,
 - v. The use of lower Global Warming Potential (GWP) refrigerants,
 - vi. Strategies to minimize risks associated with potential refrigerant leaks,
 - vii. Health, safety, productivity, and comfort non-energy co-benefits to occupants, including but not limited to topics such as healthy indoor air quality.

3. Complete additional modeling necessary to achieve carbon neutral performance, including but not limited to:
 - i. System selection and associated energy savings over baseline,
 - ii. System selection and associated cost savings,
 - iii. Embodied carbon and refrigerant gases,
 - iv. Certifications and design elements associated with ENERGY STAR® Multifamily New Construction (ENERGY STAR MFNC), Enterprise Green Community (EGC), International Living Future Institute (ILFI) Living Building Challenge, Leadership in Energy and Environmental Design (LEED), Passive House Institute (PHI), and Passive House Institute US (Phius) standards.
4. Complete early-stage applications for third party standards and certifications, including but not limited to:
 - i. AIA 2030, ASHRAE beQ, ENERGY STAR, Fitwel, Green Globes, ILFI, LEED, RELi, and WELL Building Standards.
5. Complete additional economic analysis that will help substantively reduce the overall cost of the project, be replicated at scale, and inform design decisions including, but not limited to topics such as:
 - i. First cost expenditures,
 - ii. Return on investments,
 - iii. Total value propositions,
 - iv. Cost benefit ratios,
 - v. Operating and maintenance costs,
 - vi. Non-compliance to Local Laws and other impending policies.
6. Complete cleaning, operational, and maintenance manuals, plans, and procedures that can be used by the building owners to assist in system longevity, refrigerant management, and operational waste reduction,
7. Participate in additional meetings to facilitate an integrated design and construction project,
8. Complete a more robust promotion and publicity plan that will disseminate information to the market that will be useful to the industry and better inform the public of clean, resilient, and carbon neutral performance and projects and be aimed at increasing replicability and scalability of these projects.

Project Proposal Opportunity

The EDS RFP intends to select Project Proposals from Partners that demonstrate the greatest potential for success and replication in the market. The Partners must demonstrate that the design strategies proposed in their Project Proposals are replicable, scalable, and have the potential to achieve broad-based adoption within their own business practices and by other design teams, developers, and consumers.

Partners are encouraged to apply for early design funding to support projects that are adaptive re-use or gut rehabilitation, especially in the conversion of commercial institutional, office, and retail space to multifamily housing, as defined in Section II - Eligibility of the EDS RFP. Partners should prioritize submitting projects for early design support that are eight (8) stories or greater in height.

Partners may be eligible for an award of 100% of early-stage design support funding to support clean, resilient, carbon neutral design of up to \$1.50/square foot, up to a per project-cap of \$150,000. Funding will not be awarded for basic architectural and design services not associated with clean, resilient, and carbon neutral design.

The project funding is available to contracted projects for three years from the date of the contract. If the project is making progress and funding is still available, the project team may request an extension to the project period. The funding may be extended at NYSERDA's sole discretion.

II. Eligibility

NYSERDA, at its sole discretion, determines the eligibility of a Partner Proposer to become a Partner and for the eligibility of a Project Proposal to receive funding under the EDS RFP.

Market Sector

1. Partner Proposals

Partner Proposals will be considered based on the demonstrated experience and skills of the Partner Proposer in serving the multifamily market sector. The project work samples included as part of Partner Proposals should be for multifamily buildings located anywhere in the United States of America. Project work samples do not need to be located within New York State.

2. Project Proposals

Partners may submit Project Proposals under the EDS RFP for early-stage funding and support to achieve carbon neutral performance for new construction, adaptive reuse, or gut rehabilitation multifamily projects located anywhere in New York State, as funding allows. The proposed project site will need to be selected and identified in Project Proposals.

Project Status

1. Partner Proposals

The project work samples included as part of Partner Proposals will need to have the design completed through construction documents, at a minimum.

2. Project Proposals

Projects being proposed for the EDS RFP by a Partner must be in the programming, concept, or early schematic design phase (prior to 50% schematic design), as of the date the Proposal is submitted to NYSERDA. Mechanical, electrical, and plumbing drawings cannot be restarted to receive funding if the rest of the project is further along in the design or construction phases.

General Eligibility

1. Partner Eligibility

Partner Proposer eligibility under this solicitation will be determined by the design firm's credentials, experience, past projects, and marketing efforts. Partner Proposers must demonstrate that they can provide clean, resilient, carbon neutral design services as required by NYSERDA. Carbon neutral design

services under the EDS RFP are defined in Section III, Project Proposal description. Design firm capabilities will need to be validated by NYSERDA.

For a Partner Proposal to be deemed eligible, the design firm must provide credentials of currently employed staff members and evidence that those staff members have successfully designed carbon neutral multifamily or mixed-use projects while employed at the Partner Proposer's firm. Joint venture entities created for the sole purpose of responding to the EDS RFP will not be considered. Applicants do not need to have offices located in New York State to respond to the EDS RFP. Partner Proposers must also submit evidence of design work on a minimum of three (3) carbon neutral or net zero energy multifamily buildings, or mixed-use buildings that incorporate multifamily occupancy as the primary use. Project examples and experience may be for new construction, adaptive re-use, or gut rehabilitation projects in which design has been completed through the completion of construction documents, while construction may or may not have been completed.

Design firms interested in pursuing Provisional Partner status may be eligible for an exception to the above project work sample eligibility requirements. For this designation, design firms may apply without having any completed project work examples but must submit a Letter of Intent as outlined in the Introduction section of the EDS RFP. While Provisional Partners are limited to receiving early design support funding for one (1) project per calendar year, they can, and are encouraged to, work on additional carbon neutral multifamily design projects concurrently to the project funded through the EDS RFP. A Provisional Partner may progress to full status upon the submission of three (3) carbon neutral or net zero energy designs for multifamily buildings, or mixed-use buildings that incorporate multifamily occupancy as the primary use, as outlined within the EDS RFP.

Partners that were approved under earlier versions for the EDS RFP and continue to be in good status will remain in an active status under the current version of the EDS RFP.

2. Project Proposal Eligibility

To be eligible for early design support funding, the Partner must be a member of the project's design team and have the authority, or have been given the authority by the owner, to modify the building design. The Partner must also demonstrate that their internal and external project team, including sub-consultants, have the capabilities to perform and successfully complete the design process of the proposed project through the production of construction documents as a multidisciplinary and integrated project delivery team.

Partners under the EDS RFP may elect to submit more than one (1), but not more than four (4) clean, resilient, and carbon neutral Project Proposals, for different projects in different locations, within one (1) calendar year, to receive early design support funding. Of those four (4) Project Proposals, a maximum of two (2) Project Proposals with the same developer or owner will be eligible. Multiple, alternative Project Proposals submitted for a single project will result in the disqualification of all Project Proposals.

For a Project Proposal to be eligible for consideration to receive early design support funding, the proposed site must be identified in the Proposal, the land must be acquired for use for the project, and the project must incorporate multifamily occupancy as the primary use. This includes buildings that incorporate dwelling units, sleeping units, congregate living, or residence halls. Proposed projects may contain non-residential space; however, the non-residential space must consist of less than 50% of the occupiable square footage of the entire project. Proposed Projects are limited to buildings of at least 25,000 square feet of conditioned space. Buildings that provide student housing, including residence halls, that are owned or operated by a municipality or by New York State are not eligible to participate. Hotels, motels, or other hospitality-related buildings are not eligible to participate.

The EDS RFP is available for projects located anywhere in New York State, regardless of whether the project will be located in an investor-owned electricity distribution company service territory. Partners are encouraged to submit projects for early design support funding that are located within Downtown Revitalization Initiative (DRI) districts or [disadvantaged communities](#) (DAC) as defined by New York State.

A Project Proposal can encompass one multifamily building, or a portfolio of similar and related multifamily buildings located on the same site or on adjacent and associated sites. One- and two-family homes or townhouses as defined within Chapter 2, the Definitions Section of the International Building Code and International Residential Code, are not eligible as a standalone project or as part of a multi-building Project Proposal. Project Proposals for multiple buildings that do not meet that criterion should be submitted by the Partner as separate and unique Project Proposals.

Eligible multifamily projects are as follows:

1. New Construction: A new building, buildings, or an addition, where a licensed professional architect or engineer has prepared and certified the building design documents.
2. Adaptive Re-use or Gut Rehabilitation: Substantial renovation for one of the following types of projects where a licensed professional architect or engineer has prepared and certified the building design documents:
 - i. Change of use and reconstruction of an existing building, buildings, or space(s) within a building,
 - ii. Construction work of a nature requiring that the building, buildings, or space(s) within a building to be out of service and unoccupied for a minimum of thirty (30) days,
 - iii. Reconstruction of a vacant structure, or structures, or space(s) within a building,
 - iv. The addition to or expansion of a building, in combination with any of the above.
3. Adaptive Re-use of Commercial Office, Institutional, or Retail Buildings to Multifamily Use: The existing building must have been previously occupied and used as commercial office, institutional, or retail space.
 - i. Substantially new mechanical systems required to support occupancy as housing must be necessary, including the installation of kitchen and bathroom waste and supply piping, balanced ventilation that meets requirements for residential occupancy, and other attributes required to support conversion of existing commercial office, institutional, or retail to multifamily use.

The proposed project must demonstrate clean, resilient, and carbon neutral attributes, and meet the definition of *Carbon Neutral* as defined below.

Projects receiving early design support funding may also be eligible for and separately propose to receive project funding through forthcoming demonstration RFPs associated with the Competition, as well as some other funding opportunities offered by NYSERDA and utility service providers. Projects that have been awarded or are seeking funding for design support services from NYSERDA's PON 4614 or PON 5614 will need to clearly indicate duplicative funding is not being provided for the same scope of design work. Partners must review the rules and eligibility of all other programs, including utility programs, to determine if those funds are accessible in combination with funds offered by the EDS RFP.

Project Proposals to the EDS RFP are not eligible for award if they have already been awarded funding under previous rounds of the demonstration project Competition, and intend to seek or have already been awarded Clean Energy Initiative (CEI) funding distributed by the New York State Homes and Community Renewal (HCR), or funding distributed through the New York City Housing Preservation and Development (HPD) Future Housing Initiative or any of their sub-agencies that is provided by NYSERDA through the Clean Energy Fund and intended to support goals similar to those promoted through the EDS RFP. Project Proposals that appear to be for designs of similar building sizes, floor plan layouts, or system selections as existing projects, or for subsequent phases of existing projects using similar building sizes, floor plan layouts, and system selections are not eligible.

Carbon Neutrality and Energy Performance

The Partner must confirm that the projects submitted in both the Partner and early design support Project Proposals will be *Carbon Neutral* based on the following criteria: A project that excludes all fossil fuels from the building systems and equipment qualifies to be *Carbon Neutral*. Building systems and equipment refers to at a minimum: building heating, ventilating, and air conditioning (HVAC), domestic hot water (DHW), kitchen, laundry, and other appliances. Projects that rely on a fossil fuel-fired generator for emergency use only, or projects which are served by an off-site fossil fuel-fired central heating plant, may at NYSEERDA's sole discretion qualify as carbon neutral if fossil fuel use is excluded from all other building systems and equipment. NYSEERDA, at its sole discretion, will consider exemptions to the *Carbon Neutral* rule for process and other unregulated loads on the site on a case-by-case basis.

Additionally, the Partner must rely on one (1) of the following Standards to establish the minimum projected energy efficiency and building performance selected for the Proposed project's residential-associated space¹ will be met and that the firm's previous work sample project's residential-associated space¹ has been met. One (1) of the following Standards will need to be clearly indicated in the Partner Proposals and Project Proposals to show the building performance was met in each of the work sample projects included and to show the intended building performance for all the proposed projects. The Partner must provide documentation associated with any selected Standard as a deliverable for early design support funding.

1. Appendix G of ASHRAE Standard 90.1: Partners intending to rely on this standard to model and predict energy performance must commit to designing a project that will achieve a minimum modeled source (primary) energy savings¹ of 20% when compared with a project design that complies with the relevant Energy Conservation Construction Code of New York State (ECCC of NYS), currently the 2020 version; excluding the impacts of any proposed renewable energy generation. Energy performance must be established without the inclusion of any renewable or distributed energy generation, to confirm the energy efficiency performance threshold has been met, and then again calculated after renewable or distributed energy generation has been included in the energy model and submitted by the Partner to support evaluation of the energy efficiency of the design. Partners will apply a 2.55 source-to-site conversion factor to support the calculation of efficiency in comparison with the natural gas baseline relied on by this standard to confirm the minimum energy performance threshold will be met. Partners must commit to use of the "90.1 Section 11 and Appendix G Compliance Form" to establish simulation inputs and complete internal quality control.
 - i. Partner Proposers that have relied on this standard for previous projects included as work samples in the Partner Proposal must show documentation that this process was followed for the project, including indicating the version of the ECCC of NYS that was in place at the time of the design.
2. Projects intending to meet certification requirements as published by Phius (Passive House Institute U.S.) must identify the building(s)' modeled source (primary) energy use¹ in terms of kWh/person/year; and projects intending to meet certification requirements published by the Passive House Institute (PHI) must identify the building(s)' modeled source (primary) energy use in terms of kBtu/treated-floor-area/year. Partners committing to achieving certification to either

¹ For projects that include mixed use space, only the energy use associated with the project's residential square footage should be included when determining the modeled energy performance of the residential portion of the project. The modeled energy performance shall incorporate the square footage used for residential occupancy, inclusive of all residential-associated space such as hallways, stairwells, elevators, trash, utility and exercise rooms, entrance lobbies, as well as shared laundry facilities exclusively available to the building's residential occupants. A commitment to achieving certification to Phius Core REVIVE or EnerPHit will be accepted for adaptive re-use or gut rehabilitation projects.

passive house standard are deemed as meeting the minimum modeled source energy savings¹ requirements. Energy modeling must be completed and submitted both with and without the use of renewable or distributed energy generation to support evaluation of the efficiency of the design. Alternative energy modeling will not be expected of the Partner committing to achieving certification to either passive house standard to support their predicted energy performance.

- i. Partner Proposers that have relied on this standard for previous projects included as work samples in the Partner Proposal must show documentation that this process was followed for the project.
3. The average Energy Rating Index (ERI) for all residential dwelling units, calculated in accordance with the relevant version of the ANSI / RESNET / ICC 301 standard, entitled “Standard for the Calculation and Labeling of the Energy Performance of Dwelling and Sleeping Units Using an Energy Rating Index”, currently the 2019 version. To demonstrate the minimum energy performance¹ threshold will be met, the Partner must commit that the project will meet the relevant EPA ENERGY STAR® Multifamily New Construction Program requirements; and that the average ERI will, at minimum, achieve the U.S. Department of Energy Zero Energy Ready Home Multifamily v2 or an $ERI \leq 0.75 \times MFNC\ v1.1$ ERI Target without inclusion of renewable energy generation. The Partner must also submit any external calculations supporting the site energy (kBtu/yr) indicated in the Project Proposal, including calculations of energy use in residential-associated spaces¹, as well as the average ERI calculated with the inclusion of renewable energy generation, as applicable.
 - i. Partner Proposers that have relied on this standard for previous projects included as work samples in the Partner Proposal must show documentation that this process was followed for the project.

III. Partner Proposal and Project Proposal Requirements and Format

The EDS RFP is a two-step Proposal process. The Partner Proposer’s firm will first submit a Proposal to become a Partner. Partners approved through the EDS RFP will receive an Agreement (consistent with the Attachment A – Sample Agreement) that will remain in effect for two (2) years after the date the Partner Proposal was received by NYSERDA. The Agreement does not guarantee work or funding from NYSERDA. At the end of each contract period, each design firm Partner will be evaluated based on the performance criteria in the EDS RFP, and NYSERDA will reserve the right to extend the Agreement for an additional term. Upon qualification under the EDS RFP, Partners will then be able to submit Project Proposals for which they will perform early design support. Both the Partner Proposals and Project Proposals will be reviewed on a continuous basis, until either the EDS RFP closes or until funding has been exhausted.

Partner Proposals must be submitted by the Partner Proposer’s firm, which must be a singular entity. Once approved, Partners must submit Project Proposals.

The quality, rigor, and organization of the Partner and Project Proposals will impact their evaluation, in part as a reflection of the likelihood that a selected Partner will be successful in reaching their stated goals. Inconsistencies within proposals (e.g., descriptions, drawings, or data across all documents) may also impact evaluation.

1. Partner Proposal

The Partner Proposal structure should follow the outline listed below, and sequentially address the review criteria listed in the “Partner Review Criteria” table in Section III - Proposal Format of the EDS RFP. The Partner Proposer must identify the project work sample’s status as of the date of submission, as defined and detailed in Section II - Eligibility of the EDS RFP. The firm name, RFP number, and page number should be recorded on every page of the Partner Proposal, including attachments.

The Partner Proposer must submit the following for the Partner Proposal:

1. Executive Summary

Partner Proposers must submit a brief description (~400 words) summarizing how the proposing firm's experience, services, and skills demonstrate the design and delivery of successful clean, resilient, and carbon neutral projects. In addition, the Partner Proposal must include an abbreviated description (~100 words) for use in the presentation and promotion of selected Partners. The Executive Summary should not exceed one (1) page and include, but not be limited to:

1. Firm Information – including the company name, primary contact, location, size, overall mission, diversity equity and inclusion action policies, and market sector, specialized populations, and regions served,
2. Firm Experience and Skills – including years in practice, the number of carbon neutral, net zero energy, and Passive House projects completed across all building sectors, awards received, specialized employee skills, indication that one team member is a Licensed Professional Architect (RA) or Professional Engineer (PE), and resumes and certification copies of relevant credentials that demonstrate experience in clean energy design held by current employed staff such as Certified Passive House Designer (CPHD), LEED Accredited Professional (LEED AP) or PHIUS+ Verifier,
3. Firm Services Performed – including architectural and integrated design, planning, energy modeling, advanced clean energy consultation, carbon neutral research, designing to third party standards, and economic analysis.

2. Market Transformation Capability Summary

Partner Proposers must submit a brief description (~500 words) summarizing how the proposing firm's experience, services, and skills demonstrate how they create high impact influence through successful project marketing and promotion to educate and influence the market, disseminate information out to the market, and create market scalability and replicability. The Market Transformation Capability Summary should not exceed one (1) page and include, but not be limited to:

1. Firm Information – including the name and role of current employed staff who act in a primarily marketing or promotion capacity, position in the market and amongst peers, number of social media followers and email distribution list subscribers, and engagement and relationship with special interest stakeholder entities, other New York State Agencies, and other governmental entities at the local and state level,
2. Firm Experience and Skills – including the number of average annual presentations, speaking engagements, events and tours participated in, established relationships with media and press, and specialized outreach techniques employed based on targeted audience of other design professionals, developers, stakeholders, or tenants,
3. Firm Services Performed – including general marketing and project promotion activities such as case studies, technical articles, blog posts, website updates, social media posts, email blasts, e-newsletters, and any other way to demonstrate successful project marketing and promotion to educate and influence the market and create market replicability.

3. Carbon Neutral Project Work Samples

Partner Proposers must submit a minimum of three (3) project work samples (except for those firms interested in pursuing Provisional Partner status) for new construction or substantial renovation of multifamily or mixed-use projects in which the Partner Proposer's firm has provided design services through construction documents resulting in carbon neutral or net zero energy buildings. The Partner Proposer should provide a clear and concise description of each project work sample that should not

exceed a three (3) page format, not including project imagery. This section of the Partner Proposal should not exceed nine (9) pages of text. Supplemental documents are not included in the nine (9) page limit. Each project work sample should include:

1. Project background – including design and construction schedule, year completed, square footage, number of buildings, stories, and units, construction type and methodology, building function, and populations served,
2. Project location – including the building address and if located within a Downtown Revitalization Initiative (DRI) district, disadvantaged community (DAC) as defined by NYS, NYS Department of Environmental Conservation (DEC) Potential Environmental Justice area, Clean Energy Community (CEC), or a jurisdiction that has committed to adopting the NYS Energy Stretch Code 2020,
3. Project team – including a list of current staff member personnel, names, and roles of those who worked on the project,
4. Detailed scope of work completed – including design processes employed and a complete listing of design services provided,
5. Key architectural design attributes implemented as they relate to the aesthetics, amenities, articulation, materiality, fenestration, natural light, acoustics, functionality of the units and building, development of the project site, outdoor space, microclimate, site context, and ground level connectivity, and the project's relationship to the surrounding community such as existing character and proximity to public transit,
6. Clean, carbon neutral, and energy efficiency attributes – including carbon neutral or net zero status, documentation associated with the modeled or projected energy use, overall building performance, energy goals, energy savings measures and systems, solutions implemented, project compliance path followed and third-party certifications, renewables, fuel types, and the anticipated affects to the electrical grid,
7. Building, component, occupant, and community resiliency, and passive and active survivability attributes implemented,
8. Non-energy co-benefits implemented associated with health, comfort, safety, productivity, community connectivity, economic development, and other aspects to improve the living environments for occupants, and non-energy third-party certification, standards, or verification pursued,
9. Features related to reducing the project's embodied carbon, greenhouse gas emissions, and global warming potential,
10. Innovations including industrialization of construction, reduction in construction waste, efficient mechanical systems, and how the innovations can be scaled and interact with the electrical grid,
11. Direct and indirect replicability or scalability potential of the project to support market transformation, including any awards won, and how the project affects, benefits, and fits into the firm's business model and mission,
12. Budget, project, operation, and maintenance costs, cost effectiveness, and cost reduction strategies implemented,
13. Project renderings, photographs, and relevant architectural project drawings or design diagrams.

For design firms seeking the Provisional Partner status, a Letter of Intent prepared by the design firm will be required in lieu of project work samples. The Letter of Intent should include information on why the design firm would like to engage in clean, resilient, and carbon neutral projects and should identify barriers that have prevented the design firm from participating in this space before.

4. *Supplementary Documents*

The Partner Proposer must submit all supplementary documents listed here, as available, to support the Partner Proposal evaluation:

1. Billable Rate Schedule for Partners,
 - i. The Partner shall use the Project Personnel and Billing Rates form (found within Attachment A) to clearly indicate hourly salary rate range for each title classification proposed under the agreement with NYSERDA and other overhead multipliers you propose to use for the duration of the agreement with NYSERDA,
 - ii. Provide rate and multiplier for services to be provided from date of the Project Proposal submission. These rates shall be independent of annual rates. The multiplier rate shall include all overhead, profit, and other costs. NYSERDA reserves the right to conduct a rate comparison amongst consultants and request changes to the rate schedule as applicable,
 - iii. Please do not provide fully burdened rates in the chart.

2. *Project Proposal*

Upon receiving an executed agreement, Partners will be able to submit Project Proposals to receive funding for projects in the early design stages. The project must meet the eligibility requirements as indicated in Section II - Eligibility and the proposing Partner must be providing design services resulting in a carbon neutral or net zero energy building.

The Project Proposal structure should follow the outline listed below, and sequentially address the review criteria listed in the “Early Design Support Project Review Criteria” table in Section III – Proposal Evaluation of the EDS RFP. The Partner must identify the proposed project’s status as of the date of submission, as defined and detailed in Section II - Eligibility of the EDS RFP. The Partner’s firm name, project name, RFP number, and page number should be recorded on every page of the Project Proposal, including attachments.

Project Proposals should include a clear and concise description of the project, proposed early design stage services to be performed, and proposed project promotion, addressing each category detailed below and in the review criteria table. In order to receive funding, the proposed project must plan to be engaged in at least four (4) of the eight (8) listed Early Design Support Services options. Project Proposals should not exceed ten (10) pages, not including supplemental project documents. Project Proposals must be submitted by the Partner, who must submit the following for each Project Proposal:

1. *Proposed Project Description*

1. Project description - including project status, design and construction schedule, square footage, number of buildings, stories, and units, construction type and methodology, building function, populations served, and third-party standards designed to,
2. Project location - including the building address and if the project is located within a Downtown Revitalization Initiative (DRI) district, disadvantaged community (DAC) as defined by NYS, NYS Department of Environmental Conservation (DEC) Potential Environmental Justice area, Clean Energy Community (CEC), or a jurisdiction that has committed to adopting the NYS Energy Stretch Code 2020,

3. Project team – including a list of specific individual names and roles, the developer or owner of the project, firms acting in either a sub consultant capacity or as another partner on the project for additional design, engineering, certification, quality control, construction manager, general contracting, and an indication of whether integrated design or construction will be employed on the project,
4. Key architectural design attributes - including descriptions on aesthetics, building and unit design and functionality, amenities, articulation of public and common spaces, use of natural light, project site design, relationship to site context, acoustical quality, and innovation. Other design attributes can include, but not be limited to:
 - i. Building articulation, use of durable and high-quality materials, fenestration patterns and types, and use of efficient interior and exterior lighting,
 - ii. Specific site context considerations can include, but not be limited to, building scale, shape, massing and density, ground level connectivity, use of outdoor space, incorporating natural light and access to views in building and unit design, and controlling the associated microclimate including shadowing, wind, and snow, and incorporating native plantings,
 - iii. Relationship to the larger community can include, but not be limited to, location in a DAC, DRI, or CEC, overall community connectivity, respect of the existing community character, and site and infill development,
 - iv. Transit oriented considerations can include but are not limited to, proximity to public transportation like bus, subway, commuter and light rail lines, and rapid transit stations or commuter ferry terminals, and the inclusion of bicycle storage and vehicle charging stations,
 - v. Innovations in design can include, but not be limited to, the industrialization of construction through modular or prefabricated methodologies, reduction in construction waste, use of efficient mechanical systems, and storm water strategies,
 - vi. Consideration on how the project's overall design will be impacted by, accommodate, and integrate the energy performance, resilience, non-energy co-benefits, reductions to embodied carbon, and other strategies proposed for the project.
5. Clean building attributes and design - including carbon neutral or net zero status, how the project meets the definition of the *Carbon Neutral* definition as noted in Section II - Eligibility, project compliance path followed, overall building performance, energy goals, energy savings measures and systems, solutions implemented, renewables, fuel types, and the anticipated effects to the electrical grid,
 - i. Indication of the expected, predicted, or modeled energy use and operational energy costs of the project. Predicted impacts of the project as proposed can include CO₂/person and CO₂/SF. A description of how the energy use and operational energy cost were calculated should be provided, along with documentation associated with the modeled or projected energy use and standard selected,
 - ii. Projects proposing the use of larger commercial Variable Refrigerant Flow (VRF) air-source heat pump (ASHP) systems that require long lengths of piping and multiple in-field connections will not be eligible for funding,
6. Design strategies that increase the resilience of the building, its components, occupants, and the surrounding community. These strategies should increase the active and passive resilience of the building,
 - i. Indication and assessment of each project-specific resilience risk, both current and anticipated throughout the project's useful life (e.g., more intense heat waves and increased frequency

and severity of flooding), and detailed description of how the proposed strategy (or combination of strategies) will increase resilience of the building and its occupants by addressing that risk.

7. Strategies and attributes of any non-energy co-benefits incorporated into the proposed project's design, that increase occupant comfort, health, productivity, and safety, community connectivity, economic development, and other aspects to improve the living environments for occupants, and the associated non-energy third party certifications, standards, or verifications being pursued,
8. Strategies and features to reduce the proposed project's embodied and operational carbon in materials, construction or operational processes, or other attributes, overall reduction in the total volume refrigerants and Global Warming Potential (GWP) refrigerants and greenhouse gas emissions, increased use of systems that require few or no refrigerant piping joints to be made on the construction site, and the use of materials that achieve carbon sequestration,
9. Indication of the proposed project's innovations including industrialization of construction, reduction in construction waste, efficient mechanical systems, how the innovations can be scaled, and how the innovations interact with the electrical grid,
10. Project budget, proposed operation and maintenance costs, cost effectiveness, and cost reduction strategies implemented, including listing of any additional anticipated incentive programs,
11. Indication of the proposed project's replicability, as demonstrated by expected ease or efficiency of construction, economic viability for the market served, unique financing solutions, or other factors that would make the proposed project a model for future projects,
12. Indication of the project's direct and indirect replicability or scalability potential to support market transformation, including how this project affects, benefits, and fits into the firm's business model and mission.

2. Description of Proposed Early Design Support Services to be Performed for the Project

In order to receive funding, the proposed project must plan to be engaged in at least four (4) of the eight (8) listed Early Design Support Services options. Each project must include a Resilience, Passive and Active Survivability and Market and Promotion Plan Scope of Work Service.

1. Clean and Carbon Neutral Attributes and Energy Efficiency Scope of Services: Engage in practices associated with integrated design and construction to achieve clean, resilient, carbon neutral, and energy efficiency attributes in the proposed project. Strategies to achieve carbon neutral and net zero operational performance can include, but not be limited to:
 - i. Engage in a comprehensive study for the proposed project's strategies associated with operational energy efficiency, densification, electrification, demand flexibility, peak load reduction, and transit-oriented development,
 - ii. Engage in detailed analysis of the proposed project's energy systems, including but not limited to high performance building envelope, geothermal (ground-source or water-source) heat pump systems, energy storage (thermal and electric), on-site renewable energy systems, electrical grid interactivity and controls, on-site electric vehicle charging, battery storage, heating, cooling, domestic hot water, and ventilation components, appliances, renewable generation district, smart building controls and monitors, and other technologies,
 - iii. Engage in an exploration of integrating different building standards and the associated design strategies, including but not limited to Passive House design into the proposed project,

- iv. Engage in practices associated with integrated design and construction to define and achieve the proposed project's goals, involve key stakeholders, and establish a comprehensive and collaborative design approach,
 - v. Explore how energy efficient strategies, components, and systems will be designed to be resilient for the lifespan of the strategy or system,
 - vi. Complete modeling that is necessary to achieve carbon neutral performance, optimize energy efficiency and thermal performance, and identify opportunities for energy savings.
2. Resilience, Passive and Active Survivability Scope of Services: Conduct research to expand on strategies to increase the resilience of the building, its components, occupants, and the surrounding community. These strategies should address forward-looking climate conditions, including a wider range of operating temperatures, increased incidences of flooding on site, extended power outages, and other extreme events. Strategies to achieve resilience, passive and active survivability can include, but are not limited to:
- i. Exploration of locating the building outside of the 100- or 500- year flood plain and raising living spaces and critical system components above 500- year flood level, at a minimum,
 - ii. Exploration of creating areas of refuge within the building for occupants to shelter in place during extreme heat and cold events, power outages, or flooding, that incorporate HVAC systems that remain operable during power outages,
 - iii. Research into ensuring adequate passive survivability during extended power outages by identifying the duration the building could remain safely occupied, while maintaining safe thermal conditions, natural light, natural ventilation, and other conditions,
 - iv. Research into active resiliency strategies, such as satisfying critical loads for an extended duration using backup power or the use of energy storage solutions, potentially in combination with renewable energy generation,
 - v. Exploring community resilience-enhancing strategies, such as providing community services, connecting to district systems to ensure diversity of energy resources, and reduction of vulnerability of the area surrounding the site to extreme heat,
 - vi. Exploring strategies e that enable the building or community to adapt to, absorb or recover from events, such as mechanical systems that can accommodate future climate conditions.

For any buildings in New York City that are expected to be subject to tidal inundation by 2080 or in the 2080 future floodplain and for buildings outside of New York City that are in the 500-year flood zone or that are otherwise at risk of current or future flooding, storm water management and flood-mitigation measures should be incorporated into the design. At a minimum, critical system components must be raised above the future tidal inundation or flood elevation, depending on location, unless an alternative flood-mitigation plan to protect those critical components is proposed, and ultimately determined to be acceptable during the proposed project's review process, at NYSERDA's sole discretion.

Partners, regardless of the proposed project site location, may find the [NYC Climate Resiliency Design Guidelines](#) useful for resilience strategies and resources.

For guidance on managing future flood risk, Partners may refer to the [State Flood Risk Management Guidance and NYC Flood Hazard Mapper](#).

For guidance on climate change and building resilience, Partners may refer to the [ClimAID climate projections for New York State](#), the New York [Adapting Buildings for a Changing](#)

[Climate](#) website, and the [New York State Climate Impacts Assessment: Understanding and Preparing for Our Changing Climate](#).

3. **Quality of Non-Energy Co-Benefits Scope of Services:** Investigate additional non-energy co-benefits to be incorporated into the proposed project's design, including strategies that increase occupant comfort, health, productivity, and safety. Strategies to achieve successful integration of non-energy co-benefits include, but are not limited to:
 - i. Research into attributes related to community connectivity, economic development, sustainability, durability, and other aspects to improve the living environments for occupants,
 - ii. Research into actions to optimize indoor air quality, reduce indoor pollutants, and to safeguard against transmission of air-borne contaminants that cause allergies, asthma, and illness, such as use of Minimum Efficiency Performance Value (MERV) 13 air filters or better, and use of durable materials that limit moisture intrusion,
 - iii. Research into integrating design attributes found in non-energy third party standards and feasibility of certification, validation or verification of non-energy co-benefits through third party standard(s) that incorporate health-related co-benefits.
4. **Reduction in Embodied Carbon Scope of Services:** Conduct research to reduce embodied and operation carbon in the proposed project's design. Strategies to reduce the proposed project's overall carbon impact may include, but not be limited to:
 - i. Research into strategies that reduce embodied and operational carbon in materials and the use of materials that achieve carbon sequestration,
 - ii. Exploration into construction, operational, and waste reduction processes, or other design attributes,
 - iii. Research into overall reduction to the total volume of refrigerants and greenhouse gas emissions, the use of lower Global Warming Potential (GWP) refrigerants, and increased use of systems that require few or no refrigerant piping joints to be made on the construction site,
 - iv. Research into available modeling tools and financing options.

Partners must conform to the [NY Office of General Services GreenNY Specification: Lower Carbon Concrete](#) and [NYS Office of General Services Buy Clean Concrete Guidelines](#) when specifying concrete.

5. **Innovation and Innovative Attributes Scope of Services:** Investigate innovations that could be incorporated into the proposed project including industrialization of construction, reduction in construction waste, efficient mechanical systems, how the innovations can be scaled and replicated, and how the innovations interact with the electrical grid,
6. **Cost Reduction Strategies Scope of Services:** Complete economic analyses of cost reduction strategies that have the capacity to substantively reduce the overall cost of the proposed project, and that will likely be replicated by other projects or design teams. Strategies to reduce the proposed project's overall cost may include, but not be limited to:
 - i. Analysis of energy efficiency solutions, resiliency strategies, and other characteristics of the project that are expected to impact the total, construction, operation, and maintenance costs, including strategies that will reduce total costs, the trade-offs and avoidance of cost increases, and how the overall costs of the proposed project compare with similar projects (e.g., Low- to Moderate-Income, mixed-income, market-rate, or luxury homes) in the same basic locale,

- ii. Exploring costs associated with improvements that can be recouped in terms of shortening the timeframe of on-site construction, increasing tenant retention rates, and higher rent or sales prices,
 - iii. Completing first costs, return on investments, total value propositions, cost benefit ratios, or non-compliance with Local Laws and other impending policies,
 - iv. Analysis into why and how high-performance features of the proposed project provide both enhanced financial benefits to the owner/developer and attributes that lead to an improved or optimal living environment for the tenants (e.g., thermal comfort, indoor air and environmental qualities, improved acoustics, building resilience).
7. Third Party Certification Scope of Services: Complete additional modeling and early-stage applications for third party certifications, standards, and verifications, and ensure that the associated standard criteria are incorporated into the design of the project,
 8. Market and Promotion Plan Scope of Services: Create a marketing and promotion plan that outlines the proposed methods mechanisms to generate public interest and demand for advanced clean, resilient, and carbon neutral buildings beyond and in addition to NYSERDA's promotional activities as described in the "Collaboration with NYSERDA, Transparency, and Promotion of Projects" section of the EDS RFP. Strategies to market and promote the project may include, but not be limited to:
 - i. Producing website content, magazine and technical articles, books, blogs, case studies, social media, videos, Podcasts, presentations, and engaging in speaking engagements.

3. *Collaboration with NYSERDA, Transparency, and Promotion of Projects*

The Partner should describe in the Project Proposal how they intend to create high impact influence through successful marketing and promotion of the proposed project, including disseminating information to the market that could be useful to the industry and better inform the public about clean, resilient, carbon neutral building performance that supports the elimination or reduction in use of fossil fuels, and be aimed at increasing market replicability and scalability. Marketing information the Partners may share includes but is not limited to information about the architectural design; clean, carbon neutral, and energy efficient attributes; resilient, active, and passive survivability attributes; non-energy co-benefits; cost reduction strategies; anticipated building performance; how this project will comply with upcoming local laws, policies, and advancing code cycles; and overall lessons learned. In accordance with the Proprietary provisions located in Section VIII "General Provisions", the Partner should indicate which aspects of the proposed project information can be publicly shared by NYSERDA in its promotional activities and should stipulate if any portion or portions of the information should be reserved for NYSERDA's internal use and/or for anonymized analysis, and not publicly shared as project-specific information. The extent to which the Partner commits to sharing proposed project data, as well as the quality of the Partner's marketing plan intended to showcase the proposed project's design and carbon neutral strategies, are considered during evaluation of the project Proposal. After a Project Proposal has received funding under the EDS RFP, NYSERDA may elect to disclose unprotected information, in whole or in part, on websites, social media, in publications, in presentations, or other venues. In addition, the Partner should outline their proposed methods or mechanisms for sharing this information through their marketing plan.

Partners are expected to cooperate with NYSERDA in the development and review of marketing materials. NYSERDA credits the project name and Partner in all promotional material. Partners are expected to participate in presentations and other promotional events.

4. *Supplementary Documents*

The Partner must submit all supplementary documents listed here, as available, to support Project Proposal evaluation:

1. Scope of work budget associated with the proposed early design support services to be performed for the project.
 - i. Each scope of work item should have an associated funding amount,
 - ii. Embodied carbon investigation will be capped at 15% of the total requested funding,
 - iii. Scope of work budgets should include line items for both the partner and any design team subconsultants performing early design support services. Project developers are not eligible to receive early design support funding.
2. Personnel Resumes – one (1) page resumes that highlight recent, relevant experience of the proposed design team personnel who will be directly involved in the early design support services.
 - i. The RA or PE resume must be included. Submission of a company-wide resume representing general services to be provided by various personnel does not meet the submission requirement.
3. Architectural drawings as available, including but not limited to:
 - i. Floor and unit plans,
 - ii. Site plans,
 - iii. At least one (1) building section and elevation,
 - iv. Wall sections.
4. Project rendering(s) - at least one (1) high-quality rendering,
5. Design details as available, including but not limited to:
 - i. Addressing energy efficient design,
 - ii. Building envelope conditions,
 - iii. Building resilience strategies.
6. Project diagrams as available, including but not limited to:
 - i. Building diagram(s) showing or explaining high performance/zero emissions features, including how they will remain resilient for their lifespan,
 - ii. Building diagram(s) of quality of building characteristics and design features,
 - iii. Building and site diagrams that show the project's sustainability features,
 - iv. Site diagrams that show how the project integrates with urban features.
7. Energy modeling files and report(s) summarizing energy performance-related design strategies, if available,
8. Scorecard(s) or checklist(s) for proposed, submitted, or achieved certifications, if available.

Notes:

- 1) Submitted materials may be used for the presentation of funded projects in various forums.

- 2) Photographs and other images may be submitted as .pdf at the time of the Project Proposal but must be provided as high-resolution image files at 24 inches wide and 300 dpi for projects funded and upon request.
- 3) Updates to the initially submitted materials may be requested for projects funded under the EDS RFP.

IV. Partner Proposal and Project Proposal Evaluation

1. Partner Proposal

Partner Proposals will first be reviewed for completeness and to ensure they meet “General Eligibility” requirements as detailed in the Section II - Eligibility of the EDS RFP. Partner Proposals that do not meet the listed requirements will not be further reviewed.

The General Eligibility requirements for the Design Partner submission to be considered prior to content review include the following:

1. The project work samples identified in the design firm Partner Proposal must meet the market sectors, *Carbon Neutral-Ready* definition, and meet and provide documentation to show the minimum achieved or projected energy efficiency and building performance criteria as detailed in the Eligibility Section II of this RFP.

Following the initial completeness review, Partner Proposals will be evaluated based on their overall response and specifically based on the Categories and Category Descriptions as detailed in the “Partner Review Criteria” table.

PARTNER REVIEW CRITERIA

Category	Category Description
Design Firm Experience	This category will consider how successfully Partner Proposers have addressed summarizing how the proposing firm’s experience, services, and skills demonstrate the design and delivery of successful clean, resilient, and carbon neutral projects and meet the stated goals of the Competition.
Market Transformation Capability	This category will consider how successfully Partner Proposers have addressed summarizing how the proposing firm’s experience, services, and skills demonstrate how they create high impact influence through successful project marketing and promotion to educate and influence the market, disseminate information out to the market, and create market scalability and replicability.
Project Work Samples	This category will consider how successfully Partner Proposers have addressed summarizing three (3)* new construction or substantial renovation multifamily, and mixed-use projects, in which the Partner Proposer’s firm has provided design services resulting in carbon neutral or net zero energy buildings.

*An exception to the above project work samples’ eligibility requirements applies to design firms interested in pursuing Provisional Partner status. For this designation, design firms may apply with a Letter of Intent prepared by the design firm in lieu of project work samples.

2. Project Proposal

Project Proposals submitted by Partners will first be reviewed for completeness and to ensure they meet “General Eligibility” requirements as detailed in the Section II - Eligibility of the EDS RFP. Project Proposals that do not meet the listed requirements will not be further reviewed.

The General Eligibility requirements for the early design support Project Proposal submission to be considered prior to content review, include the following:

1. The Proposed early design support Project is located in New York State, reflects multifamily occupancy as the primary use, meets the *Carbon Neutral-Ready* definition, meets the Project

Status, and meets and will provide documentation to show the minimum projected energy efficiency and building performance criteria as detailed in the Eligibility Section II of this RFP.

Following the initial completeness review, Proposals for proposed early design support projects will be evaluated based on their overall response and specifically based on the Categories and Category Descriptions as detailed in the “Project Proposal Review Criteria” table.

PROJECT PROPOSAL REVIEW CRITERIA

Category	Category Description
<i>Project Design Category</i>	
Quality of Architectural Design	This category will consider how successfully Partners have addressed key architectural design attributes of the proposed project and how the project's overall design will be impacted by, accommodate, and integrate the energy performance, resilience, non-energy co-benefits, reductions to embodied carbon, and other strategies into the proposed project.
Clean, Carbon Neutral, and Energy Efficiency Attributes	This category will consider how successfully Partners have addressed clean, carbon neutral, and energy efficient attributes of the proposed project.
Resilience, Passive and Active Survivability	This category will consider how successfully Partners have addressed strategies that increase the resilience and passive and active resilience of the proposed building, components, and its occupants.
Quality of Non-Energy Co-Benefits	This category will consider how successfully Partners have addressed incorporating non-energy co-benefits into the proposed project design to ensure occupant comfort, health, productivity, and safety, community connectivity, economic development, sustainability, durability, and other aspects to improve the living environments for occupants.
Reduction in Embodied Carbon	This category will consider how successfully Partners have addressed incorporating features related to reducing the proposed project's embodied and operational carbon, greenhouse gas emissions, and global warming potential of refrigerants.
Innovation	This category will consider how successfully Partners have addressed incorporating innovative features and electrical grid interactivity into the proposed project.
Cost Reduction	This category will consider how successfully Partners have implemented cost reduction strategies into the proposed project.
Market Transformation Capability	This category will consider how successfully Partners have addressed the proposed project's direct and indirect replicability or scalability potential to support market transformation, including how this project affects, benefits, and fits into the firm's business model and mission.
<i>Early Design Support Scope of Services Category</i>	
Clean and Carbon Neutral Attributes, and Energy Efficiency	This category will consider how successfully Partners have addressed how they plan to engage in practices associated with integrated design and construction to achieve clean, carbon neutral, and energy efficient attributes in the proposed project.
Resilience, Passive and Active Survivability Attributes	This category will consider how successfully Partners have addressed how they plan to expand on strategies to increase the resilience of the building, its components, occupants and surround community, and increase the active and passive resilience of the building.
Quality of Non-Energy Co-Benefits	This category will consider how successfully Partners have addressed how they plan to investigate additional non-energy co-benefits to be incorporated into the proposed project to ensure occupant comfort, health, productivity, and safety, community connectivity, economic development, sustainability, durability, and other aspects to improve the living environments for occupants.

Reduction in Embodied Carbon	This category will consider how successfully Partners have addressed how they plan to investigate additional features related to reducing the proposed project's embodied and operational carbon, greenhouse gas emissions, and global warming potential impacts of refrigerants.
Innovation and Innovative Attributes	This category will consider how successfully Partners have addressed how they plan to investigate innovations and electrical grid interactivity that could be incorporated into the proposed project.
Cost Reduction Strategies	This category will consider how successfully Partners have addressed how they plan to complete additional economic analyses for the proposed project.
Third Party Certifications	This category will consider how the Partners have completed additional modeling and early-stage applications for third party certifications, standards, and verifications.
Marketing and Promotion Plan	This category will consider how successfully Partners have addressed how they plan to create high impact influence through successful marketing and promotion of the proposed project, including the sharing of information that could be useful to the industry and better inform the public of carbon neutral performance.

To receive funding, the proposed project must plan to be engaged in at least four (4) of the eight (8) listed Early Design Support Services options, inclusive of the Resilience, Passive and Active Survivability and Marketing and Promotion Plan Scopes of Work.

Program Policy Factors

NYSERDA reserves the right to accept or reject Project Proposals based on the following program policy factors:

1. The degree to which the proposed project, including proposed cost share(s), optimizes the use of available funding to achieve NYSERDA's overall programmatic and portfolio objectives, as specifically set forth in the EDS RFP.
2. Diversity of awards within multiple locations, climates, regions, or other geographically articulated criteria (for example, disadvantaged communities or Regional Economic Development Regions).
3. The degree to which there is portfolio diversity, including considerations as to funding duplicative efforts stemming from the EDS RFP itself or similar, previously funded efforts and considerations as to development stage of the cohort of proposed projects (for example, secured permits or financing, shovel-ready).

V. Funded Projects, Subsequent Submissions, and Required Updates

Partners are required to execute an agreement (see Attachment A – Sample Umbrella Agreement) with NYSERDA and deliver completed projects that meet the requirements detailed in the EDS RFP. The project deliverables and associated time and material or milestone payments will be as detailed in the EDS RFP and the agreement executed between the selected Partner and NYSERDA.

At any point during the design process, NYSERDA must be notified and provided associated details if significant deviation from the original Project Proposal is expected, including whether the project is expected to fall short of the building performance and related goals as detailed in the original Project Proposal, including the Partner's commitment to achieving the source energy savings in their original Project Proposal to NYSERDA. Projects funded through the EDS RFP must ensure that the cumulative changes during design will not increase the predicted source energy use or carbon emissions in comparison to the project as originally submitted. Continuation of any project that deviates from the original Project Proposal will be subject to NYSERDA's discretion. NYSERDA reserves the right to reduce the award amount or terminate any project should it fall below the originally committed energy performance.

Additionally, the following submissions and updates are required:

At 50% completion of schematic design:

1. Documentation associated with each of the proposed early design support services that have been performed for the project. Topics can include, but not be limited to:
 - i. Which attributes have been investigated,
 - ii. Why and how the attribute was investigated,
 - iii. Results of the investigation and how the results relate to whether the attribute will be incorporated into the proposed project,
 - iv. How the investigation affects, benefits, and fits into the Partner's business model and mission.
2. Updated project documentation, if applicable:
 - i. One-page summary of major changes from the initial Project Proposal.
 - ii. Documentation of submission to the certification(s) and standard(s) committed to by the Partner,
 - iii. Marketing and Promotion Plan,
 - iv. Drawings, renderings, or diagrams,
 - v. Energy modeling files and carbon neutral design standard documentation,
 - vi. Schedule of design and construction,
 - vii. Project cost-related documentation.

At 100% completion of schematic design:

1. Updated documentation associated with each of the proposed early design support services that have been performed for the project. Topics can include, but not be limited to:
 - i. Which attributes have been investigated,
 - ii. Why and how the attribute was investigated,
 - iii. Results of the investigation and how the results relate to whether the attribute will be incorporated into the proposed project,
 - iv. How the investigation affects, benefits, and fits into the Partner's business model and mission.
2. Updated project documentation, if applicable:
 - i. One-page summary of major changes from the 50% schematic design submission,
 - ii. Documentation of submission or updates to the submission to the certification(s) and standard(s) committed to by the Partner,
 - iii. Marketing and Promotion Plan,
 - iv. Drawings, renderings, or diagrams,

- v. Energy modeling files and carbon neutral design standard documentation,
- vi. Schedule of design and construction,
- vii. Project cost-related documentation.

At the completion of design phase (construction documents):

1. One-page summary of major changes from 100% schematic design submission,
2. Final documentation associated with each of the proposed early design support services that have been performed for the project. Topics can include, but not be limited to:
 - i. Which attributes have been investigated,
 - ii. Why and how the attribute was investigated,
 - iii. Results of the investigation and how the results relate to whether the attribute will be incorporated into the proposed project,
 - iv. How the investigation affects, benefits, and fits into the Partner's business model and mission.
3. Final, updated project documentation, if applicable:
 - i. Marketing and Promotion Plan,
 - ii. Design drawings, renderings, or diagrams (suitable for presentations),
 - iii. Energy modeling files and carbon neutral design standard documentation,
 - iv. Schedule of construction,
 - v. Project cost-related documentation,
 - vi. One-page summary of lessons learned.

VI. Schedule of Payments

	Milestone	% Of Total Award
1	50% completion of schematic design	60%
2	100% completion of schematic design	30%
3	Completion of design, construction documents	10%

NYSERDA reserves the right to negotiate type (time and materials or milestone) as well as the amount or schedule of payments for a funded project. At its sole discretion, NYSERDA may reduce or withhold payments for a project that falls short of the proposed level of performance, or that has not met this solicitation's minimum submission requirements.

VII. NYSERDA Responsibilities

NYSERDA provides funding and support to projects in accordance with the EDS RFP of the Competition, as detailed in the EDS RFP.

VIII. Partner Responsibilities

1. Partners are responsible for completing and promoting the use of effective, energy efficient products, services, and designs, as defined by the EDS RFP. The credibility of Partners and the quality of the design services they deliver are essential to NYSERDA's success.
2. Partners must update the project information that was initially provided in the Project Proposal, assist NYSERDA in promoting the project, and share information that will help the industry accelerate the design, construction, and operation of clean, resilient, high-performance buildings. All of which may be shared publicly unless otherwise noted.
3. Partners must provide updated information related to the proposed project's expected and evolving performance and cost data, throughout the course of the project design, in data collection formats requested by NYSERDA.
4. Partners must allow the proposed project to be part of NYSERDA's promotional efforts and to cooperate with NYSERDA in the creation and implementation of those efforts, including but not limited to articles, books, case studies, exhibitions, lectures, presentations, tours, social media, and other electronic marketing promotions including a Competition website. NYSERDA reserves the right to brand and market the funded projects as NYS Buildings of Excellence projects or a similar reference.
5. Partners are responsible for abiding by the Terms and Conditions in the EDS RFP.
6. If the Partner does not meet the minimum project responsibilities, their Partner status will be suspended until the project responsibilities have been met.
7. If NYSERDA identifies an instance where these rules have not been followed, the Partner is responsible for fully cooperating in any investigation of a possible violation. Failure to comply may result in the Partner losing its active status.
8. Partners are responsible for ensuring the customer agrees and authorizes their utility's sharing of the participant-customer's information and/or project-level information with New York State Department of Public Service Staff and NYSERDA, including its agents or authorized representatives, consistent with NYSERDA's New York State Public Service Commission and statutorily authorized responsibilities, including, but not limited to supporting market development initiatives, and other evaluation and measurement activities. (For clarity, the term project level includes the information based on the scope of the project, including, but not limited to, aggregated and anonymized whole building, building or subsets of the project.)
9. Partners are responsible for ensuring the participant agrees and authorizes the sharing of the participant-customer's information and/or project-level information with New York State Department of Public Service Staff and appropriate local utility, including its agents or authorized representatives, in carrying out its responsibilities under New York State Public Service Commission orders. (For clarity, the term project level includes the information based on the scope of the project, including, but not limited to, whole building, building or subsets of the project.)

Becoming a Partner is completely voluntary and NYSERDA can remove a Partner from the list at any time for any reason. NYSERDA may revoke the active status of the Partner and remove them from the website if the Partner does not meet all the Program requirements. Partners may also request to be removed from the active Partner list.

I. GENERAL CONDITIONS

Proprietary Information: Careful consideration should be given before confidential information is submitted to NYSERDA as part of the proposal. Review should include whether the information is critical for evaluation and whether general, non-confidential information, would suffice for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers

Law, Section 87(2)(d) provides for exceptions to disclosure of records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which, if disclosed, would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary and confidential trade secret information should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to excluding it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in [21 NYCRR Part 501](#). However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992: It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement agreements.

Information on the availability of New York State subcontractors and suppliers is available from the following:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from the following:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k: NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found on the [Office of General Services' website](#). Proposers are required to answer questions during proposal submission, make required certification under the State Finance Law, and disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a: NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor with a monetary value in excess of \$100,000, prior to entering an agreement with NYSERDA, to certify to the Department of Taxation and Finance (DTF) whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the DTF to collect New York State and local sales and compensating use taxes. The DTF has created [ST-220-TD](#) to allow a prospective contractor to readily make such certification. Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA that such certification with the DTF has been filed. The DTF has created a second form, [ST-220-CA](#), that must be completed by a prospective contractor and filed with NYSERDA, prior to contracting. [Guidance for contractors](#) can found on the [DTF's website](#).

Contract Award: NYSERDA anticipates making multiple awards under this solicitation. A contract may be awarded based on initial applications without discussion, or following limited discussion, or following negotiations pertaining to the statement of work. Each offer should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA uses the sample agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Attachment A–Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions generally results in a more expedited contracting process. NYSERDA expects to notify proposers in approximately 12 weeks from the proposal due date whether the proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements: NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation: This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the sample agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making the award.

Disclosure Requirement: The proposer will disclose any indictment for any alleged felony or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and will describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement. The contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net

revenues of the contractor or its subcontractors derived from the contract. NYSEDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSEDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSEDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSEDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSEDA may conduct due diligence on some or all proposals based on NYSEDA's current guidelines at the time of a review. NYSEDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSEDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSEDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSEDA's sole discretion and are final decisions. NYSEDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

**Energy Efficiency and Clean Technology Training
Program Opportunity Notice PON 3981
\$10,000,000 Available**

NYSERDA reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

Concept Papers are required as the first step in the application process. Concept Papers may be submitted until November 18, 2025. Concept Papers will be evaluated within four (4) to six (6) weeks.

Full Proposals (by invitation only): accepted in funding rounds with the following due dates:

Round 19 – July 13, 2023; Round 20 – September 14, 2023; Round 21 – November 16, 2023;
Round 22 – January 17, 2024; Round 23 – March 18, 2024; Round 24 – May 17, 2024; Round 25 –
July 17, 2024; Round 26 – September 18, 2024; Round 27 – November 18, 2024; Round 28 –
January 17, 2025; Round 29 – March 19, 2025; Round 30 – May 16, 2025; Round 31 – July 16,
2025; Round 32 – September 17, 2025; Round 33 – December 18, 2025

Due dates beyond are subject to funding availability.

PROGRAM SUMMARY

Overview

The New York State Research and Development Authority (NYSERDA) is seeking proposals for technical training and education, hands-on experience and job placement services that enable New York State to meet the objectives of the Clean Energy Fund and advance the climate equity and just transition goals of New York's Climate Leadership and Community Protection Act (Climate Act). The purpose of this solicitation is to build or expand New York State training infrastructure and capacity to strengthen the skills of existing workers and students and build a pipeline of skilled talent for the Energy Efficiency and Clean Technology (EE&CT) labor market. Projects funded through this solicitation are intended to develop and/or deliver technical clean energy and/or energy efficiency training, relevant education, and hands-on experience to ensure that both new and existing workers, apprentices, journeypersons, and students, as applicable, have the skills, experience, and qualifications required to meet industry demand.

Total funding for this solicitation is \$10 million, with up to \$1 million per project to fund training at scale. It is anticipated that approximately \$3 million of total funding will be reserved for training activities that support building electrification. Additional funds may be added at NYSERDA's discretion, if available.

Funding is available for training that advances skills in the following EE&CT areas: High-efficiency heating, ventilation, and air conditioning (HVAC) and water heating; building electrification/heat pump technologies; insulation and air sealing; high-efficiency lighting and controls; building automation and controls; smart grid and energy storage; electric vehicle charging station installation and maintenance; as well as large-scale, land-based renewable energy generation that is actively supported through NY's Clean Energy Standard.

Individuals and entities that apply for funding must be either technical high schools; community colleges; universities; trade associations; manufacturers; equipment suppliers; renewable energy project developers and owners; firms and subcontractors that support engineering, procurement, construction, operations and maintenance; renewable energy development service providers; distributors; unions; training and job placement intermediaries; community-based organizations; or non-for-profit organizations with a demonstrated track record in energy-related training, job preparedness and/or placement. Primary applicants must be registered to do business in New York State and must have a New York State office or training location. Preference will be given to projects that include or are led by certified Minority- and Women-Owned Business Enterprises (MWBs) and/or Service-Disabled and Veteran-Owned Businesses (SDVOBs).

Funds may be used for initiatives that focus on training for skills in targeted EE&CT areas and that meet business needs. It is anticipated that these initiatives will include activities such as curriculum development or modification; delivery of training (online, classroom, on-site, etc.); training labs and equipment purchases for hands-on training; hiring and training of trainers; test and certification fees; pre-apprenticeships, and apprenticeships; services to place individuals into paid internships, apprenticeships, full-time jobs, or advanced formal training, and training in languages other than English. All initiatives must include the delivery of technical training.

All training funded by NYSERDA must take place in New York State and be designed to serve New York State residents.

This solicitation will provide funding to projects that fall into one or both of the following categories:

Category 1: Training for Existing Workers and Individuals in Formal Training Programs.

Category 2: Career Pathways for New Workers/New Entrants in Clean Energy.

Proposal Submission

This solicitation employs a two-step application process consisting of a Concept Paper (required) followed by a Full Proposal (by invitation only based on favorable review of a Concept Paper).

Concept Papers are accepted on a rolling basis and will be evaluated within four (4) to six (6) weeks of receipt. Upon favorable review, select applicants will be invited to submit a Full Proposal subject to the Proposal Requirements and Evaluation Criteria outlined below.

Both Concept Papers and Full Proposals must be submitted online. For detailed instructions on how to submit a proposal including file requirements, click the link “[Application Instructions and Portal Training Guide \[PDF\]](#)” located on the [PON 3981 solicitation page](#). Should any changes be made to this solicitation, notification will be posted on the “[Funding Opportunities](#)” section of NYSERDA’s website.

Contact Information

For contractual questions regarding this solicitation, please contact Nancy Marucci at 518-862-1090 x3335 or NancySolicitations@nyserda.ny.gov.

For program questions, please contact Gwendolyn Summers or Adele Ferranti at WFinfo@nyserda.ny.gov or at (518) 862-1090 x3584 and x3206, respectively.

No communication intended to influence this procurement is permitted except by contacting the Designated Contacts above. Contacting anyone other than the Designated Contacts (either directly by the applicant or indirectly through a lobbyist or other person acting on the applicant’s behalf) in an attempt to influence the procurement: (1) may result in the applicant being deemed a non-responsible offeror, and (2) may result in the applicant not being awarded a contract.

Informational Webinar

NYSERDA will conduct an informational webinar, during which NYSERDA will review the requirements of this solicitation and answer questions. Applicants interested in attending may send an email to wfinfo@nyserda.ny.gov with the subject line “PON 3981 Informational Webinar” to request the webinar date along with information on how to participate. Questions may be submitted via the same email address prior to the webinar, or during the webinar using the web platform. Following the conclusion of the webinar, NYSERDA will post questions and responses on the NYSERDA website. All questions will be posted anonymously, and NYSERDA’s written responses will supersede any responses given during the webinar.

I. INTRODUCTION

a. Background

The New York State Energy Research and Development Authority (NYSERDA) is the leading authority responsible for advancing New York’s clean energy and climate goals. NYSERDA develops markets for clean energy, supports technology development, and provides financing to enable economic growth and reduce emissions, to the benefit of communities across the state. As part of its mission, NYSERDA has committed more than \$170 million in funding for a variety of training activities that support workers entering and working in the clean energy industry. Energy efficiency, building electrification, and large-scale renewables are among NYSERDA’s highest priorities, and many of its programs aim to eliminate barriers of marginalized communities in furtherance of the climate equity and just transition goals of New York’s Climate Act.

b. Objective

Through this funding opportunity, and in working with training providers across the State, NYSERDA seeks to create a diverse, equitable, and inclusive pipeline of skilled talent for the clean energy labor market. Projects funded through this solicitation are intended to build or expand New York State training infrastructure and capacity to develop and deliver clean energy technical training, hands-on experience, and job placement assistance to both new and existing workers, as applicable, ensuring they have the skills, experience, and qualifications required to meet industry demand. Preference will be given to projects that proactively address the equity gap in the clean energy industry by increasing access to workforce training and skills development opportunities, as well as providing experiential learning, career pathways and supportive or wrap-around services for members of Disadvantaged Communities and/or Priority Populations.

For the purposes of this solicitation, “Disadvantaged Communities” and “Priority Populations” shall meet the definitions outlined on NYSERDA’s Clean Energy Workforce Development [“Definitions”](#) webpage.

This solicitation uses a two-step application process consisting of a Concept Paper (required) followed by a Full Application (by invitation only). See **Section III – Application Process** for more information.

II. PROGRAM REQUIREMENTS

To be eligible for funding, applications must meet the following requirements:

a. Applicant and Project Eligibility Criteria

i) SBC/CEF Territories

All training initiatives funded by NYSERDA must be conducted in New York State and serve New York State residents. If training is conducted in a location outside of System Benefits Charge/Clean Energy Fund (SBC/CEF) service territory, applicants training existing workers (see Category 1 below) must prove that more than 60 percent of trainees either

reside, or serve customers, in SBC/CEF service territory. Alternatively, applicants must prove that at least 50 percent of trainees are residents of Disadvantaged Communities or Priority Populations.

Such evidence may consist of the following:

- Proof that attendees participate in a related NYSERDA or SBC utility program (e.g., via program website as a participating provider or letter from a utility).
- Written attestation that the 60 percent requirement for participants has been or will be met.
- Training rosters or other forms of documentation proving that at least 50 percent of trainees are residents of Disadvantaged Communities or Priority Populations.

The evidence must be provided at the time of application or over the course of the project period.

To learn more about the CEF and to confirm whether a training provider pays into the Fund, please consult the NYSERDA [“Funding”](#) website for more information.

ii) Training Providers

Individuals and entities (“Training Providers”) that apply for funding must be either technical high schools; community colleges; universities; trade associations; manufacturers; equipment suppliers; renewable energy project developers and owners; firms and subcontractors that support engineering, procurement, construction, operations and maintenance; renewable energy development service providers; distributors; unions; training and job placement intermediaries; community-based organizations; or non-for-profit organizations. All Training Providers must have a demonstrated track record in energy-related training, job preparedness and/or placement and hold appropriate Training Provider qualifications. The lead applicant must be registered to do business in New York State and must have a New York State office or training location.

For purposes of this solicitation, “community-based organizations” must meet the definition outlined on NYSERDA’s Clean Energy Workforce Development [“Definitions”](#) webpage.

Preference will be given to projects that include or are led by certified Minority- and Women-Owned Business Enterprises (MWBs) and/or Service-Disabled and Veteran-Owned Businesses (SDVOBs). Applicants may consist of individual entities or a team of Training Providers. Category 2 applicants are required to partner with and/or demonstrate support from energy-related industry partners or companies. Applicants interested in exploring new partnership opportunities are invited to register on NYSERDA’s [Partner Connector website](#).

iii) Technology Areas

Funding is available for training that advances skills in the following Energy Efficiency and Clean Technology (EE&CT) areas:

- High-efficiency heating, ventilation, and air conditioning (HVAC) and water heating.
- Building electrification/heat pump technologies.

- Insulation and air sealing.
- High-efficiency lighting and controls.
- Building automation and controls.
- Smart grid and energy storage.
- Electric vehicle charging station installation and maintenance.
- Large-scale, land-based renewable energy generation that is actively supported through New York’s Clean Energy Standard.

All technology areas should have measurable impacts on improving energy efficiency and reducing greenhouse gas emissions in New York State. Additional target areas related to EE&CT may be considered in the future or addressed in other solicitations if a compelling business case is presented. Skills training (i.e., welding, electrical, engineering) to ready workers for expansion into clean energy technologies with a demonstrated connection to clean energy jobs now or in the near future is also eligible for funding. Proposals that do not meet the eligible technology areas listed above may be rejected.

Offshore wind training projects are not eligible for funding under this PON. See NYSERDA’s “[Current Funding Opportunities](#)” webpage for other relevant solicitations.

iv) Categories

This solicitation will provide funding to projects that fall into **one or both** of the following categories:

Category 1: Training for Existing Workers and Individuals in Formal Training Programs. Projects include those that expand training and skills for existing workers (e.g., journey workers, contractors, technicians, sales staff) and students in formal training programs (e.g., technical high schools, higher education institutions, or union training programs).

Category 2: Career Pathways for New Workers/New Entrants in Clean Energy. Projects include those that prepare new workers for entry into New York State’s clean energy economy.

All proposed training projects, in both Category 1 and Category 2, must:

- Take place in and benefit residents of New York State.
- Be carried out by experienced and qualified Training Providers.
- Have a demonstrable connection to employer or industry needs. These connections must be documented through letters of support from relevant employers or industry players, labor market data, or other forms of credible knowledge of the sector or workforce needs. Evidence of industry demand must be provided specifically for the training under consideration.
- Include the delivery of technical training in technology areas that have measurable impacts on improving energy efficiency and reducing greenhouse gas emissions and/or prepare workers for expansion or entry into clean energy jobs in New York. Training

must further serve eligible individuals (e.g., incumbent workers, individuals in formal training programs, or new workers/new entrants to clean energy). For example, proposals to simply purchase training equipment or develop new curriculum will not be eligible for funding unless they also include the deployment of training.

- Have a thorough recruitment and screening plan to attract candidates to their program if applicable.
- Clearly describe the proposed training, including training format, dates, and locations, as well as targeted audience, industry, occupations, wages, and skills.
- Demonstrate a solid and comprehensive sustainability plan to ensure continuation of training after NYSERDA funding has been completed.
- Be completed within approximately 2 years, excluding any applicable 12-month outcome monitoring period for Category 2 projects.

Training projects under Category 2 must meet the following, additional requirements:

- Technical Training, Workforce Preparation Activities, and Wrap-around Services: A successful career pathways project will include a combination of:
 - Rigorous and high-quality clean energy education.
 - Workforce preparation activities (e.g., job readiness, coaching/mentoring, financial literacy); and
 - Wrap-around services (e.g., case management, transportation, child support services, homelessness prevention, mental health counseling, legal assistance, immigrant resources) and/or stipends to support individuals with barriers to employment. Proposals that leverage existing wrap-around services will be given preference.
- Representation: At least 50 percent of trainees must be individuals who fall within eligible categories of Priority Populations and/or individuals residing in Disadvantaged Communities.
- Industry Partnerships: The project must include partnerships, demonstrated in letters of commitment or through subcontracts or formal project commitments, with businesses to provide job interviews, hands-on training and work experience through paid internships, on-the-job training, pre-apprenticeships, apprenticeships, etc., and have clear job placement goals for all trainees. Such letters are not initially required as part of a Concept Paper but will be required as part of a Full Proposal.
- Outcome Monitoring: The project must include a plan to track and monitor the career-related achievements of program graduates for at least 12 months after training completion (“Outcome Monitoring Period”), resulting in a total project duration of approximately three (3) years. Achievements may include, but are not limited to, credentials earned, jobs obtained, additional training towards a career path, advancements, wages, and wage growth over the length of the tracking period.
- Placement: At least 80 percent of trainees must be placed into a paid internship, apprenticeship, advanced formal training, or full-time job within 6 months of training completion (i.e., within the first 6 months of the Outcome Monitoring Period). Internships and apprenticeships must be related to the proposed training and provide meaningful experience to prepare trainees for continued growth and access to jobs in the

clean energy industry. Trainees are considered individuals who complete the program. Therefore strategic recruiting and comprehensive screening are critical in Category 2 projects. If the 80 percent threshold is not met by the time this monitoring period has ended, NYSERDA payments may be prorated.

For a list of examples of successful Career Pathway projects, consult the [Example Training Projects page](#) on NYSERDA's Clean Energy Workforce Development website.

v) Training Initiatives and Activities

Initiatives and activities for which NYSERDA funding may be used include but are not limited to:

- Curriculum or certification development, modification when there is a demonstrated market gap and need.
- Training delivery (online, classroom, on-site, etc.) and certification costs.
- Equipment purchases for hands-on training.
- Hiring and training of trainers.
- Implementation of mentorships and internships. (Applicants should consider [PON 4000: Clean Energy Internship Program](#) for additional incentives for internship).
- Development of pre-apprenticeship and apprenticeship programs.
- Services to place individuals into paid internships, apprenticeships, full-time jobs, or advanced formal training.
- Training development and delivery in languages other than English.
- Marketing and outreach (up to 10% of total NYSERDA funding); and
- Reasonable in-state, necessary travel.

On a case-by-case basis, NYSERDA will also evaluate reasonable funding requests, as justified, for the following **services and activities** provided they directly support technical training and job placement goals:

- Wrap-around services such as transportation, tutoring, childcare assistance, case management, or other related services for Category 2 career pathway projects serving members of Disadvantaged Communities and/or Priority Populations.
- Development of a Learning Management Systems (LMS) to host virtual (or virtual reality) training.

b. Funding and Cost Share Requirements

NYSERDA will accept proposals requesting up to \$1 million in funding with the intent to facilitate training at scale. Additional funding may be awarded to successful projects after the original contract award up to a maximum of \$1 million if funding is available.

Based on historical data and depending on project scale and depth, the average cost per person trained on a Category 1 project has ranged from \$200-400 for webinars up to \$3,000 for multi-day, in-person training sessions. The average cost per person trained on a comprehensive

Category 2 career pathways project has been between \$5,000 and \$10,000, including wraparound services. Training projects that are selected for funding must be cost competitive with market rates and serve a commensurate number of individuals. Additionally, the costs must be reasonable and appropriate for the proposed scope of the project.

In addition to the eligible training initiatives outlined in **Section II.a.v – Training Initiatives and Activities**, NYSERDA will evaluate reasonable funding requests for the following, as justified on a case-by-case basis:

- Work site equipment (e.g., work boots or tool belts) and materials purchased for training, particularly for Category 2 career pathway projects.
- Modest training stipends, typically \$1,000-2,500 per person, depending on the length of the proposed career pathway training effort for trainees from Disadvantaged Communities and Priority Populations. Funding for stipends is based on a fixed fee as opposed to an hourly wage and is intended to offset the cost of attending training (in lieu of or in addition to wrap-around services, as justified) after all other sources for such support have been exhausted.
- Indirect costs, such as training facility or equipment rentals and utilities, provided they are reasonable and commensurate with the scope of the proposed training project.

Costs NOT eligible for funding include:

- Costs for training efforts which have already been undertaken.
- Costs for training initiatives that take place outside of New York State and/or do not benefit New York State residents.
- Costs for the development of a training proposal, training needs assessment, skills gap analysis or sustainability plan.
- Trainee labor costs (i.e., hourly wage reimbursements or subsidies) to participate in training.
- Costs funded by other state, city, or federal programs.

NYSERDA may retain up to 10 percent of project costs until project completion, as necessary, to ensure that all applicable project requirements (e.g., 80 percent placement requirement for **Category 2** projects) have been met. Any remaining payments may be prorated, as appropriate, based on the level of project completion.

Applicants must contribute a minimum cost share of 30 percent toward the total project budget, which may include “cash” or “in-kind” services. Cost sharing may be borne by the applicant, other team members, and/or other government or private sources. Cost sharing for individual tasks may vary between NYSERDA and the applicant; however, total costs must result in a NYSERDA/applicant split of no greater than 70 percent/30 percent.

The minimum cost share required for projects exclusively serving Disadvantaged Communities and/or Priority Populations is 10 percent.

The minimum cost share for qualifying union-led projects and qualifying pre-apprenticeship

programs as described below is also 10 percent. Qualifying union-led and pre-apprenticeship projects include projects that:

- Integrate clean energy training into existing New York State registered apprenticeship program(s) or journey worker training,
- Develop a new clean energy apprenticeship program registered with the New York State Department of Labor, or
- Are direct entry pre-apprenticeship workforce training programs recognized by the New York State Department of Labor that incorporate clean energy content.

Examples of eligible cost share include:

- Training fees offset by a third party.
- Contributions of direct labor (for which the laborer is paid as an employee).
- Equipment supplied by manufacturers/businesses for hands-on training.
- Indirect labor or general overhead.

Items that may be considered as cost share elements but that are NOT eligible for NYSERDA funding include reasonable costs for:

- Food and refreshments during training hours. Food and refreshments outside training hours are not eligible for NYSERDA funding or cost share.
- Computers (as well as related equipment such as servers, software, etc.) and cell phones.
- Motor vehicles and trailers.
- Costs for out-of-state travel, provided they are justified to transport subject matter experts to New York to address a specific market gap.

The project budget, including proposed cost share, must be provided **in Attachment F – Budget**.

Pay for Success Clean Energy Training

Category 2 career pathway projects that exclusively serve qualifying low-income individuals may be eligible for participation in [NYSERDA's Pay for Success Clean Energy Training Project](#) ("Pay for Success"). Funded by the U.S. Departments of Labor and the Treasury under the Social Impact Partnerships to Pay for Results Act (SIPRA), the Project aims to prepare 660+ low-income individuals for clean energy careers. Applicants whose proposals are selected for this initiative may be offered additional funding and will have the opportunity to adjust their scope, budget, and schedule accordingly. Successful Category 2 career pathway projects that were previously awarded funding but did not initially participate in Pay for Success may also be considered and allocated additional funding to participate. In such cases, the latest PON 3981 program requirements will apply.

c. Reporting and Tracking Requirements

Effective and regular communication is essential between selected Training Providers ("Contractors") and the NYSERDA Project Manager. Reporting is required for the Project Manager to measure progress and to assess whether a Contractor's invoice may be approved. Each quarter, Contractors will be required to submit a progress report based on a format provided

by the NYSERDA Project Manager, documenting training activities and key program performance metrics over the course of that time frame. Applicants whose proposals are selected for Pay for Success will be asked to provide more detailed metrics as part of their quarterly reports. Following the conclusion of training activities, Contractors are further required to file a final report summarizing training program outcomes and lessons learned over the course of the project period. Additional information will be made available as part of the contracting process.

Required reporting metrics and deliverables as well as invoicing requirements are outlined in **Attachment C – Sample Statement of Work.**

II. APPLICATION PROCESS

This solicitation employs a two-step application process consisting of a Concept Paper followed by a Full Proposal by invitation only.

A. Concept Paper

Concept Papers are a valuable tool for outlining proposals at a high level and securing letters of commitment from industry and training partners. NYSERDA uses Concept Papers as a first step in evaluating the viability of prospective workforce development and training projects (see further details in **Section IV. Proposal Evaluation** below.)

Concept Papers are accepted on a rolling basis and will be reviewed within four (4) to six (6) weeks of receipt. Upon favorable review, NYSERDA will invite select applicants to submit a Full Proposal (see details below). To submit a Concept Paper, applicants are required to complete **Attachment A – Proposal Cover Sheet** and **Attachment B – Concept Narrative** and follow the instructions for online submission. Applicants not selected to advance to the Full Proposal stage may submit a revised or separate Concept Paper in a later application round.

B. Full Proposal

Applicants invited to submit a Full Proposal will have until any remaining funding due dates to submit a Full Proposal.

A Full Proposal must consist of the following attachments:

- A. Proposal Cover Page
- B. Concept Narrative (Updated/Revised, if necessary).
- C. Scope.
- D. Metrics.
- E. Schedule.
- F. Budget.
- G. Industry Letters of Commitment/Support.

- H. Resumes of Key Personnel.
- I. Other Documentation (optional) – e.g., course outlines and syllabi for new courses, and other supporting material as deemed necessary by the applicant.

A. Proposal Cover Page

Applicants must submit an updated Proposal Cover Page with their Full Proposal.

B. Concept Narrative (Updated/Revised)

At this stage of the application process, applicants are given the opportunity to address any feedback on their Concept Paper provided by NYSERDA. Applicants are encouraged to review the checklist outlined in **Attachment A – Proposal Cover Page**, to ensure they meet all relevant proposal criteria for the respective category under which they are applying.

Preference will be given to applicants who can demonstrate the following:

- **Existing Materials/Resources:** Ability to leverage existing resources, including previous training developed by an applicant/team or training resources and tools available on the market, wrap-around services, job/internship/apprenticeship placement services, training facilities, and opportunities for hands-on application of skills on the part of learners.
- **Education/Career Pathway:** Integration into a degree, certificate, continuing education, career pathway, apprenticeship, pre-apprenticeship, or job preparedness program. Training on professional/soft skills may be combined with technical skills training to meet specific employer needs.
- **Disadvantaged Workers:** Proposals that exclusively serve to advance, place, and integrate individuals from Disadvantaged Communities and/or Priority Populations in the clean energy labor market.
- **Applicants:** Projects that include or are led by MWBEs and/or SDVOBs.
- **Training Program Scalability:** Projects that have the capacity to provide training at scale, at multiple training locations across the state, and/or to a substantial trainee audience.

C. Scope of Work (Scope)

Applicants must include a detailed Scope with their application. The Scope will describe the work to be completed in the project. Should the proposal be selected for funding, the activities outlined in this Scope will be incorporated into a Statement of Work which is the primary contractual document that identifies the project tasks and deliverables and serves as the basis for payment. A sample Statement of Work is provided for reference in **Attachment C – Sample Statement of Work**.

The Scope is an action document that delineates each step or activity in the project to

accomplish the outlined tasks. In the Scope, applicants must identify and describe each task that would be funded in whole or in part under this solicitation. Each task must include 1) the specific activities that will be completed for that task, 2) the individual or organization (e.g., Contractor or Subcontractor) that will complete each activity in a task, and 3) milestones, expected outcomes or deliverables, and reports that will be submitted to NYSERDA. NYSERDA funding awarded under this solicitation may be paid based on milestones that will be negotiated prior to contracting.

Each Scope must include tasks for the following required project components. For these tasks, language from the example Statement of Work may serve as a reference.

- Partnership / Subcontracts (if applicable to the project).
- Training Delivery (customized description of training as appropriate).
- Evaluation.
- Reporting.

All other tasks should be specific to the proposed project and clearly outline activities associated with NYSERDA funding. For example, the Scope may include tasks such as developing or modifying curriculum, purchasing training equipment, identifying and providing wrap-around services for trainees, etc. depending on the nature of the project. Applicants are encouraged to reference the sample Statement of Work for suggested deliverables and level of detail for tasks frequently included in projects funded through this solicitation. **Category 2** projects must include tasks related to job placement to demonstrate the project's approach to meeting that requirement and include activities related to outcome monitoring as required by the PON.

D. Project Metrics

Applicants are required to provide a list of training metrics. These may include “How do you define success?” “Which metrics will you use to track progress and measure project outcomes?” **Attachment D - Metrics** provides a list of sample metrics. Additional metrics may be included, as relevant, to demonstrate the anticipated impact of the proposed project. Metrics will be reported at the individual (training participant) level.

E. Training Schedule

Applicants must provide a schedule for completing tasks based on the tasks and deliverables outlined in their Scope (Attachment C). This schedule may be listed in weeks or months starting from contract execution through contract completion and should include an additional 12-month period for projects in Category 2. The schedule should consist of 12 to 24 months followed by an additional 12-month tracking period for Category 2 career pathway projects. A template is provided in **Attachment E - Schedule**.

F. Budget

Applicants must complete and submit **Attachment F – Budget** with their application, including information requested on the Budget Form and the Cost Breakdown Form.

i) Budget Form

The Budget Form outlines the budget for the proposal, including costs related to labor, direct materials (supplies, equipment, and other costs), travel, and subcontractors. The budget must be reasonable and state the portion requested from NYSERDA as well as the portion that is the applicant's responsibility (cost share).

ii) Cost Breakdown

Based on the costs calculated on the Budget Form, applicants are asked to provide a **cost breakdown by task**. The cost breakdown by task should be based on the initial budget provided in the Concept Paper and align with the tasks in the applicant's Scope.

Cost share may include cash and in-kind funds, as outlined in **Section II.b ("Funding and Cost Share Requirement")** above. Cost sharing by task may vary between the applicant and NYSERDA; however, the total cost share must meet the requirements outlined in **Section II.b ("Funding and Cost Share Requirement")**.

Proposals must provide sufficient detail in the "Supplemental Information" section of the Budget Form to justify anticipated costs. Subcontractors whose share of the project budget is \$50,000 or greater in value must complete a separate Budget Form outlining their anticipated labor costs, time, and materials.

G. Industry Letters of Commitment/Support

Depending on the project, applicants are required to submit either letters of commitment or letters of support from relevant business or industry partners.

Letters of Support serve to attest that the proposed training relates directly to businesses' future hiring needs. These letters further support the industry need/market demand outlined in the Concept Paper.

Letters of Commitment serve to reinforce industry partners' commitment to and outline their role in training projects – a requirement specifically for **Category 2**. Successful proposals should include an array of letters from employers ready to interview, hire, commit to paid internships, pre-apprenticeships, curriculum development, on-site, hands-on training, and/or other similar experiences. Letters must be custom-tailored and unique to each industry partner. Form letters that include the same language and are signed by multiple partners may be disregarded.

H. Resumes of Key Personnel

All proposals must include the resumes of key personnel expected to be involved in the project. Applicants should note any relevant credentials or certifications for instructors.

I. Other Documentation (Optional)

In addition to the above required attachments, applicants are encouraged to submit course outlines or syllabi for any courses proposed and/or any other supporting material as necessary. For large project teams an organizational chart may be helpful. Any attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence evaluation of the proposal.

b. Proposal Submission

In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), applicants will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

Both Concept Papers and Full Proposals must be submitted via the NYSERDA Portal.

Concept Papers are accepted on a rolling basis. Full Proposals must be received by 3pm Eastern time on the date noted above for each round. Applicants may submit MS Word, Excel, or PDF files. Individual files should be 100MB or less in file size. PDF proposals should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the applicant's entity name in the title of the document. If online submission is not possible, NYSERDA will also accept proposals by mail or hand- delivery.

Only one attachment may be uploaded per submission slot. Should multiple documents be required for a given slot (e.g., resumes of key personnel), they must be merged into ONE SINGLE DOCUMENT; otherwise only the last file uploaded will be transmitted to NYSERDA.

Incomplete proposals may be subject to disqualification. It is the applicant's responsibility to ensure that all pages have been included in the proposal. Applicants are advised to plan for at least 60 minutes to enter/submit proposals. The online proposal system will close promptly at 3pm Eastern Time. Files in process, attempted edits or submissions after this deadline will not be accepted. **Late, faxed, or emailed proposals will not be accepted.**

For detailed instructions on how to submit a proposal (online or paper submission), including file requirements, click the link "[Application Instructions and Portal Training Guide \[PDF\]](#)" located on the [PON 3981 solicitation page](#). Should any changes be made to this solicitation, notification will be posted on the "[Current Opportunities](#)" section of NYSERDA's website.

c. Contact Information

For contractual questions regarding this solicitation, please contact Nancy Marucci at 518-862-1090 x3335 or NancySolicitations@nyserda.ny.gov.

For program questions, please contact Gwendolyn Summers or Adele Ferranti at WFinfo@nyserda.ny.gov or at (518) 862-1090 x3584 and x3206, respectively.

No communication intended to influence this procurement is permitted except by contacting the Designated Contacts above. Contacting anyone other than the Designated Contacts (either directly by the applicant or indirectly through a lobbyist or other person acting on the applicant's behalf) in an attempt to influence the procurement: (1) may result in the applicant being deemed a non-responsible offeror, and (2) may result in the applicant not being awarded a contract.

III. PROPOSAL EVALUATION

a. Process & Timing

Concept Papers that meet solicitation requirements will be reviewed by a Scoring Committee consisting of NYSERDA staff using the Evaluation Criteria below. NYSERDA will inform each applicant of its decision regarding invitations for a Full Proposal submission following convening of the Scoring Committee. Concept Papers will be reviewed within four (4) to six (6) weeks of receipt.

Full Proposals may be submitted by invitation only and are due by any of the remaining PON 3981 funding deadlines. Upon receipt, a Scoring Committee will meet again to review and evaluate the Full Proposal based on the Evaluation Criteria below. Within approximately eight (8) weeks, NYSERDA will inform each applicant of its decision for an award.

NYSERDA may request an interview or additional information after submission of a Concept Paper and/or Full Proposal. The interview may be with the Project Manager or with all or part of the Scoring Committee.

The Scoring Committee reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to limit the number of awards per applicant. NYSERDA may also cancel the PON in part or in its entirety if deemed in its best interest.

Accepted Proposals:

Applicants receiving favorable evaluations may be asked to address specific questions or recommendations of the Scoring Committee or make modifications to the Scope, budget, or schedule before being awarded funding. Upon successful negotiation, an award under this PON will result in a contract. NYSERDA may award a contract based on applications with or without discussion. See NYSERDA's **Sample Agreement** for the full terms and conditions.

Denied Proposals:

Applicants whose proposals have been denied may request a debrief and may reapply under future rounds of this PON.

b. Evaluation Criteria

Both Concept Papers and Full Proposals are evaluated based on their quality and content as well as the requirements outlined in the PON.

For Concept Papers, 70 points is the minimum threshold of 100 possible points. For Full Proposals, 70 points is the minimum threshold out of 100 possible points.

Concept Papers

1. Applicant Qualifications

- Does the organization meet the PON's definition of an eligible training provider? How well are the applicant's qualifications and experience described? What is the applicant's past performance, especially on NYSERDA projects, if applicable?

2. Description of Training Initiative

- How comprehensive is the proposed training initiative? Does it address all applicable requirements as outlined in the Concept Paper checklist, including for the category/categories under which the Concept Paper was submitted? How detailed/convincing is the applicant's plan to sustain training post-NYSERDA funding?

3. Documentation of Market Need

- Has the applicant demonstrated a firm understanding of the skills gaps and market demand? How relevant is the proposed training in addressing the identified gaps and opportunities? Is the applicant collaborating with industry partners and, if so, are their roles clearly defined?

4. Budget

- Is the budget reasonable/competitive based on the number of trainees proposed? Does it include the required cost share percentage? More?

5. Preferred Criteria

- Does the proposal leverage existing materials or resources? Does the project integrate into a career pathway with clear goals and outcomes? Does the training exclusively serve members of Disadvantaged Communities / Priority Populations? Is the project led by or does it include MWBEs or SDVOBs? Does it enable training program scalability?

Full Proposals

1. Applicant Qualifications

- **Relevant Experience:** Does the applicant and/or any subcontractor(s) have relevant experience (including with NYSERDA) as documented in resumes of key personnel? If the applicant or subcontractor(s) are a current or past NYSERDA contractor, how did the applicant/subcontractor(s) perform?
- **Rate of Success:** What is the applicant's track record of / approach to ensuring job placements and relationships with clean energy businesses/employers? Was relevant applicant or subcontractor performance data submitted to demonstrate current or

historical programs, including scale/size, completion rates, or placement rates?

2. Comprehensiveness of Training Proposal: Approach & Management Plan

- Training Concept: How comprehensive is the proposed training initiative? Does it clearly outline goals, target audience/category, skills, occupations, and related wages? Does it adequately describe the training format, dates, times, and locations? Does it take into consideration special needs for different populations?
- Target Audience: Is the intended training audience identified? Does the proposal serve a commensurate number of individuals based on the amount of funding requested? If Category 2, are at least 50 percent (or 100 percent for reduced cost share-eligible projects) of individuals from Disadvantaged Communities or Priority Populations?
- Industry Partnerships: Does the applicant partner with businesses to meet their hiring and/or training needs? Is the role of industry partners defined? If Category 2, does the proposal include unique and custom-tailored letters of commitment from partnering organizations? If so, do the letters clearly demonstrate partners' commitment to interview, hire, offer paid internships, (pre-) apprenticeships, curriculum development, on-site or hands-on training and/or other similar experiences?
- Career Pathway: Does the proposed training result in an industry-recognized certification, credential, or degree? Does the training prepare students for more advanced courses or create a path to a job? If Category 2, does the proposal have a strategy to ensure that at least 80 percent of individuals are placed into a paid internship, apprenticeship, full-time job, or advanced formal training within 6 months of training completion? Which other services, if any, will be included as part of the career pathway program (e.g., wrap-around services or workforce preparation activities)?
- Recruitment, Screening & Tracking: Does the proposal outline a robust strategy to recruit and screen participants (including marketing, outreach, interviewing, and placement)? If Category 2, does the proposal track workers' achievements for at least 12 months once training has been completed? Is the plan adequately documented in the required schedule?
- Metrics/Project Outcomes: How comprehensive are projected training outcomes such as total number of curricula developed; total number of workers to be trained or placed into paid internships/apprenticeships/full-time jobs; and total number to continue on to advanced formal training?
- Sustainability: What are the applicant's plans for sustaining the program once NYSERDA funding is exhausted? Are the plans realistic and sufficiently documented?

3. Documentation of Market Need

- Market Analysis: Has the applicant clearly outlined the gaps and opportunities in the market to justify demand for the proposed training?
- Evidence/Data: Has the applicant provided evidence such as labor market intelligence or employer input to show the need for training? Has the applicant submitted any letters of support from businesses that can attest that proposed training relates directly to their future hiring needs?
- Proposal Relevance: Does the proposed strategy clearly address the identified skills gaps? Has the applicant adequately described the strategy for building training capacity (curriculum, trainers, equipment) in NYS that is employer-led and based on the occupational skills necessary to support business demands?

4. Scope of Work (Scope)

- Objective: Does the Scope include a detailed training objective and adequately prepare participants to enter or shift to the stated clean energy workforce?
- Content: Is the Scope thorough, specific, logical, and consistent with NYSERDA program goals and the PON's objectives? Are roles and responsibilities of subcontractor(s) clearly identified?
- Tasks and Deliverables: Does the Scope include tasks and deliverables that address all of the requirements of the solicitation and as outlined in the Concept Paper? Is enough detail provided for each task in the Scope? Are appropriate metrics built into each deliverable? Does the Scope include separate, relevant tasks for Category 1 and Category 2 training, if applicable?
- Evaluation & Reporting: Does the Scope include all applicable evaluation and reporting requirements?

5. Budget/Cost

- Documentation: Is the budget reasonable and responsive to funding requirements under the solicitation? Does the proposal include the budget and a cost breakdown by task? Does it include a separate budget form for subcontractors (whose share of the budget is \$50K or greater), if applicable? Is the information provided in the supporting schedule sufficiently detailed?
- Cost Competitiveness: Is the training cost per participant reasonable and consistent or competitive with current training opportunities on the market? Are the applicant's costs appropriate when compared to the costs of other comparable initiatives, the anticipated number of trainees, and the projected results?
- Cost Share: Is a 30% cost share (or 10% for projects exclusively serving Disadvantaged Communities and/or Priority Populations or qualifying union-led and pre-apprenticeship training programs) included and detailed? Is the applicant proposing a cost share higher than 30% (or 10%)? If so, what does the cost share entail? Does the applicant leverage any third-party funds?

6. Preferred Criteria

- Existing Materials/Resources: Does the proposal leverage existing resources, including wrap-around services, training facilities and opportunities for hands-on application of skills on the part of learners?
- Education/Career Pathway: Does the proposal integrate a degree, certificate, continuing education, career pathway, apprenticeship, pre-apprenticeship, or job preparedness program? Is training on professional/soft skills combined with technical skills training to meet specific employer needs?
- Disadvantaged Workers: Does the training initiative exclusively serve to advance, place, and integrate individuals from Disadvantaged Communities and/or Priority Populations in the clean energy labor market?
- Applicants: Does the project include or is it led by certified MWBEs and/or SDVOBs?
- Training Program Scalability: Does the project have the capacity to provide training at scale, at multiple training locations across the state (if applicable), and/or to a substantial trainee audience?

c. Program Policy Factors

Additionally, NYSERDA reserves the right to accept or reject proposals based on the following factors:

- Geographical coverage across New York State to ensure that projects selected for funding optimize the use of available funding to achieve programmatic objectives.
- The degree to which the proposed project, including proposed cost shares, optimizes the use of available funding to achieve programmatic objectives.
- Institutional diversity or partnership with minority serving institutions.
- Consideration of the impact on, and benefits to, a diversity of communities, including low-income and rural communities.
- Consideration of the impact on just transition and equity goals.
- The degree to which the applicant has the resources (human and financial) to be able to complete the project.
- The degree to which the proposed project directly addresses NYSERDA's mission and strategic goals.
- The applicant's performance on current or past NYSERDA contracts.

IV. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See [Public Officers Law, Section 89\(5\)](#) and the procedures set forth in 21 NYCRR Part 501. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found in the New York State Office of General Services' [Procurement Lobbying Law Frequently Asked Questions \(FAQs\)](#). Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form, [ST-220-TD](#), to allow a prospective contractor to readily make such certification. Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form, [ST-220-CA](#), that must be completed by a prospective contractor prior to contacting and filed with NYSERDA. See the Department's [Publication 223: Questions and Answers Concerning Tax Law Section 5-a](#) for more information.

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of at least two years, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process.

NYSERDA expects to notify proposers in approximately eight weeks from the proposal due date whether your proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or

active NYSERDA agreement.

Accessibility Requirements - If awardees from this solicitation will be posting anything on the web, or if the awardee will produce a final report that NYSERDA will post to the web, the following language must be included. NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSERDA's Accessibility Requirements](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains

unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the “Ethics Requirements”). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a “lifetime bar” from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person’s engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants’ prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA’s current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant’s proposal, including questions regarding applicant’s business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer

and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

**Clean Energy Training Services
Request for Qualifications (RFQL) 4145**

Round 1 Proposals Due: September 11, 2019 by 3:00 p.m. Eastern Time.

**Round 2 Proposal Due: Open enrollment whereby proposals can be
submitted until October 31, 2025
and are evaluated on an as-needed basis.**

Workforce development and training are essential components to a bustling 21st century economy and a cleaner, healthier New York. But today's workforce is not yet set up to meet the requirements and achieve the possibilities of the clean energy economy. With a commitment of nearly \$180 million through 2025, the New York State Energy Research and Development Authority (NYSERDA) will work to change the landscape of New York's workforce through clean energy workforce development and training. Our funding will provide opportunities for activities as diverse as:

- Training building and operations staff to properly operate and maintain building systems
- Providing on-the-job training for new clean energy workers
- Supporting internships for students looking to gain hands-on skills at a clean energy company
- Enhancing curricula to meet the demands of clean energy employers
- Establishing a talent pipeline that can reduce the business cost of hiring new workers

NYSERDA is issuing this Request for Qualifications (RFQL) to establish a pool of contractors qualified to deliver training, develop curriculum and/or training tools, and provide market expertise and/or other services related to clean energy workforce development and training. Contractors secured under this request will offer program support (some of which may be requests for services on short notice) to help ensure that New York businesses have an adequate supply of new and existing energy efficiency and clean technology workers with the necessary occupational skills, credentials, and experience to participate in the clean energy economy.

NYSERDA seeks qualified training providers, curriculum developers, and/or market and technical workforce experts in the categories below. These categories include, but are not limited to, the examples provided.

Category A: Energy Efficiency – includes lighting and controls, heating, ventilation and air conditioning (HVAC), air and ground source heat pumps, water heating, advanced building materials, building automation and controls, insulation and air sealing, and other high efficiency products and services.

Category B: Renewable Electric Power Generation – includes solar, land-based and offshore wind, low-impact hydropower, and other renewable generation technologies.

Category C: Grid Modernization and Energy Storage – includes combined heat and power, smart grid, microgrid, demand response management, and grid storage and other related areas.

Category D: Alternative Transportation – includes related infrastructure; electric, hybrid, plug-in hybrid and fuel cell/hydrogen vehicles; battery storage; and natural gas and other alternative fuel buses.

Category E: Renewable Fuels – includes biofuels such as wood pellets and ethanol.

Category F: Priority Populations – includes experience reaching underserved populations who encounter barriers to accessing training and jobs in the clean energy sector; such as but not limited to veterans, low-income individuals at or below 60% of State median income, individuals with disabilities, incumbent or unemployed fossil fuel workers, previously incarcerated individuals, 18- to 24-year-olds participating in work preparedness training programs, homeless individuals, and single parents. Experience should include providing basic employability/professional skills and technical skills necessary for clean energy jobs.

Category G: Certifications and Other Training Credentials – includes work related to developing clean energy certifications, micro-credentials, function task analyses, job task analyses, continuing education unit-bearing professional development, etc.

Category H: Other – includes marketing and outreach, and other related workforce training areas aligned with NYSERDA's Clean Energy Fund commitment to drive economic development and accelerate the use of clean energy and energy innovation.

NYSERDA anticipates: (1) making multiple awards under this RFQL; and (2) retaining contractors through 2025 for each of the categories listed above as appropriate. Qualified firms, companies, or organizations (including teaming arrangements) will be evaluated and scored against each other within each category (A-H). **Proposers may submit to one or more categories and may be selected for one, some or all they propose in.**

Note: If proposing to more than one category please do so in one proposal with all supporting attachments and upload to the NYSERDA application portal as ONE single file.

NYSERDA anticipates entering into Umbrella Agreements with the approved proposers in each category. Task Work Orders will be issued through a mini-bid process to the firms that qualify in their respective category, chosen from both the due date round and the open enrollment round. Mini-bid requests will likely include the outline of the scope and deliverables, regional considerations, and other pertinent information needed to develop a sound proposal. NYSERDA will review each mini-bid response and select a provider to implement the services requested. This solicitation will also allow for an "open enrollment" mechanism whereby potential contractors may submit additional proposals until October 31, 2025. Further information regarding the process for participation in the open enrollment mechanism is provided in this document.

Proposal Submission: Online submission is preferable. **If proposing to more than one category please do so in one proposal with all supporting attachments (e.g., resumes, Letters of Commitment, references, and Project Personnel and Rate Forms) and upload to Salesforce as ONE single file. There is only one slot for upload, if you upload files individually, you will overwrite each file.** Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "Application Instructions and Portal Training Guide [PDF]" located in the "Current Opportunities" section of NYSERDA's website <https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>.

No communication intended to influence this procurement is permitted except by contacting Beth Offenbacher or Adele Ferranti at (518) 862-1090, ext. 3603 or by email WFinfo@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Nancy Marucci at (518) 862-1090, ext. or by email NancySolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments, and you should allot at least 60 minutes to enter/submit proposals. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website <https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>.

I. Introduction

Clean energy businesses across the state have reported a shortage of qualified candidates to fill entry level and advanced positions and have cited skills gaps in trained workers as hiring requirements (credentials and experience) have changed and become more rigorous. These businesses include start-up companies looking for executives to help lead, small heating and cooling contractors looking for new technicians, and consulting firms seeking architects and engineers to design new buildings or state-of-the-art energy systems for existing buildings. Training curriculum is not keeping pace with changing business needs, and gaps are seen in both technical training and hands-on experience.

NYSERDA has been conducting research in the market to assess what actions are necessary to build a larger, better-qualified pool of workers for the growing clean energy economy. In discussions with energy businesses, several common issues were cited such as: lack of qualified candidates for open positions; skills gaps, as hiring requirements have changed and increased; and, a shortage of updated curriculum to keep pace with current business needs.

Creating a talent pipeline, a proactive approach to defining, attracting and developing the right mix of critical talent in a pool of internal and external candidates, can help support and grow businesses of all shapes and sizes throughout the supply chain. Through this funding opportunity, NYSERDA, working

with training providers across the State, will create a talent pipeline to ensure that New York State energy efficiency and clean technology businesses have an adequate supply of new and existing workers with the necessary occupational skills, credentials and experience to participate in the clean energy economy. NYSERDA also has program initiatives to support businesses hiring new workers and interns to support building a talent pipeline of energy efficiency and clean technology workers.

II. Program Requirements

A. Services Requested

As a result of this RFQL, NYSERDA expects to retain multiple qualified contractors to provide a variety of services in the categories (A-H) outlined above, including but not limited to delivering training, developing curriculum and/or training tools, and providing market expertise, outreach and/or other services as it relates to workforce development and training in the respective category. The number and type of services requested from the selected contractors will depend on the nature and complexity of the project, the contractor's expertise, NYSERDA's need for services, and performance.

Services requested include:

- **Training**

Including delivering instructor-led classroom, hands-on, interactive, hybrid/blended, computer-based/e-learning, or video training; providing coaching and mentoring; conducting workshops, etc.

Training activities can include providing training in languages other than English; technical training as part of a degree, certificate, continuing education, career pathway, apprenticeship/pre-apprenticeship, or job preparedness program; training on professional skills in combination with technical skills training to meet specific employer needs; etc. Proposers are expected to include opportunities for hands-on application of skills on the part of learners. Proposers will also be expected to utilize existing training and training facilities available in the state as much as possible to leverage funds and applicable work that has already been done.

- **Curriculum development**

Including developing new instructor-led classroom, online or hybrid/blended curriculum; modifying existing curricula; developing tools and/or materials for training; etc. Proposers will be expected to leverage existing curriculum, where possible.

- **Development of training tools**

Such as career pathway maps, general career information including training and certification opportunities, etc.

- **Other Services**

Including, but not limited to, developing credentials and micro-credentials, helping to identify worker skills needed; assessing gaps in current curricula; informing investments in skills and talent development; supporting or conducting outreach to market partners; etc.

Intended Audience

NYSERDA seeks to support a variety of strategies to expand New York State's talent pipeline for energy efficiency and clean technology workers. In general, services requested under this RFQL will support: (1) enhancing the skills of existing workers consistent with business needs; and (2) training

and providing job preparedness and placement services to new workers for new jobs identified by businesses.

For the purposes of this solicitation, “workers” are expected to include a variety of job titles, including but not limited to those individuals who design, manufacture, specify, sell, distribute, install, operate, maintain, repair, audit, and inspect energy efficiency and clean energy technologies and systems specific to the category (A-H).

Teaming Arrangements

NYSERDA encourages all firms that can demonstrate the qualifications and skill sets described within this solicitation to propose. Proposers are permitted, but not required, to team with partners (subcontractors) they consider would offer complementary expertise in the proposing category or categories (A-H).

B. Program Eligibility

This program is supported with System Benefits Charge (SBC)/Clean Energy Fund (CEF) funding. SBC/CEF service territory consists of areas with electric service provided by Central Hudson Gas and Electric Corp., Consolidated Edison Company of NY, Inc., NYS Electric and Gas Corporation, National Grid, Orange and Rockland Utilities, Inc., and Rochester Gas and Electric.

All training opportunities (with the exception of offshore wind) funded under this solicitation will be expected to occur in SBC/CEF service territories. All training must be designed to meet the needs of energy efficiency and clean energy companies within, or providing services to, the SBC/CEF territories.

Eligible contractors must demonstrate no limitation in their ability to provide services to eligible New York State residents and clean energy businesses depending on the training initiative.

C. Proposer Qualifications

All eligible contractors, regardless of the category or categories being proposed, must possess the following minimum basic qualifications:

- Credentialed and knowledgeable staff or team with documented and relevant experience in one or more of the categories (A-H)
- Experience with or a strategy for engaging business and industry partners and professional organizations in training initiatives
- Ability to deliver services requested in one or more of the categories (A-H) throughout New York State. If the proposer does not have offices and/or training sites within NYS, the proposal must include a description of the proposer's ability to economically perform work throughout the State
- Capacity to bring on additional resources as necessary to meet programmatic needs, including but not limited to geographic coverage
- Capability to quickly respond to program needs and other related services specified by NYSERDA
- Flexibility to respond to services requested

Training Provider Requirements

Training providers submitting proposals must provide evidence of applicable qualifications which may include, but not be limited to:

- Experience in integrating new material into existing curricula and/or developing new stand-alone curricula approved by the New York State Department of Education for use at post-secondary education levels
- Accreditation by the NYS Education Department and/or training program accreditation by the Interstate Renewable Energy Council (IREC), or other similar national, third-party entities
- Staff with documented experience in curricula development, delivery and maintenance, and evidence-based learning techniques
- Experience with designing and/or implementing training that leads to additional training as part of a career path, certification, degree, continuing education credits, job experience or job placement
- Ability to reach underserved populations or geographies

Training providers that meet more than one of the qualifications above (or demonstrate other qualifications) are preferred.

D. Umbrella Agreements

NYSERDA will enter into zero-dollar value Umbrella Agreements with the approved contractors in each category, enabling NYSERDA to retain their services. This Umbrella Agreement will not guarantee any specific amount of work. The amount of work assigned to each contractor will depend on NYSERDA's needs, the particular expertise of the contractor, the amount of work requested in the contractor's technical area, past performance, current workload, deadline requirements, and the ability of the contractor to provide high quality, cost-effective, and timely services. If multiple contractors are selected with overlapping areas of expertise, NYSERDA may also ask selected contractors for proposals and bids on specific assignments through mini-bid requests.

E. Task Work Order Requests & Plans

Projects will be assigned through a written Task Work Order Request and initiated through a Task Work Order Plan, which will become a binding agreement for all parties. NYSERDA Project Managers will issue a mini-bid request to all approved and relevant contractors. The respondents shall provide a detailed response to the request, including staffing, hours, budget, and scope of work.

Once a contractor has been selected for a project as per the above process, a Task Work Order Plan will be prepared by the contractor in cooperation with NYSERDA. Task Work Order Plans shall include:

- The goals and objectives of the project
- The strategy and approach outlined by tasks
- Any relevant background information
- Defined deliverables
- The project time frame
- The names and titles of individuals to work on the project
- The total not-to-exceed cost of the project, including a breakout by task and by title, hourly rate, hours, and non-labor costs
- The identification of measures to assess project success

The details of any Task Work Order Plan will be consistent with the level of complexity of the proposed project or activity. Hourly rates shall be those established in the general Umbrella Agreement. NYSERDA must review and approve all Task Work Order Plans and incorporate as a Task Work Order under the Umbrella Agreement before projects are implemented.

Depending on the nature of the work product that is developed or results from any particular Task Work Order with NYSERDA, contractors may be required to execute a non-disclosure agreement prior to engaging in the specified work effort.

F. Open Enrollment

There will be no initial cap to the number of proposers in any one of the categories (A-H). However, NYSERDA may subsequently institute a cap for any or all categories (A-H) as a means of managing the number of resultant contracts. NYSERDA anticipates the Scoring Committee to convene periodically, as frequently as monthly, but no less frequently than quarterly, to review and evaluate new proposals on a schedule depending on NYSERDA's needs and on the number of new proposals that are received. Upon appropriate notice, NYSERDA may forego or discontinue the rolling open enrollments to manage the number of resultant contracts. In deference to the established end of the contract period of December 31, 2025, the open enrollment mechanism will be active until October 31, 2025 barring an earlier discontinuance upon appropriate notice.

G. Contractor's Responsibility

When selected for a project, the selected contractor shall be required to:

- Prepare a Task Work Order Plan, with budget, for each project for review and approval by NYSERDA
- Negotiate the scope and cost of work with NYSERDA
- Provide the requested assistance within the required time frame

- Submit any deliverables to NYSERDA for review and approval as necessary
- Provide required documentation of expenditures by task, based on the Task Work Order, when seeking reimbursement from NYSERDA

H. NYSERDA's Responsibility

Project Managers will be responsible for overseeing and managing services undertaken by qualified proposers, including but not limited to reviewing, commenting and approving tasks and subsequent deliverables; coordinating with program staff and interested external stakeholders; promoting coordination among service providers qualified for each category, as appropriate; assisting in the presentation and dissemination of findings; reviewing and approving invoices promptly.

I. Compensation

Compensation will be based on the contractor's – and subcontractors, as applicable – fully-burdened hourly rates included in the proposal, plus allowable expenses. NYSERDA will negotiate each Umbrella Agreement on the basis of demonstrated competence and qualification, at fair and reasonable fees. Fees schedules shall be included in each proposal that identify rates for each member of the team by title. Please note, proposers cannot charge more than two percent overhead for work done by a subcontractor.

Budgets for all work conducted will be included in the Task Work Order and approved by NYSERDA. The Task Work Order will also place a ceiling or not-to-exceed amount for each project. Contractors who accrue billable hours beyond the ceiling in the Task Work Order, without approval in writing by NYSERDA, will do so at their own risk. **Contractors will not be compensated for time spent in the preparation of any Task Work Order Plan.** Preparation of the Task Work Order Plan is considered to be covered by the contractor's overhead expense.

III. Proposal Requirements

To be eligible for selections under this RFQL, proposers must submit a complete bid package and agree to the requirements of this RFQL. Proposers may submit to any or all categories (A-H), and each category will be evaluated and judged independently from the others. Each category is intended to create a separate pool of contractors that can meet the specified needs of the category.

If proposing to more than one category please do so in one proposal with all supporting attachments (e.g., resumes, Letters of Commitment, references, and Project Personnel and Rate Forms) and upload to the NYSERDA application portal as ONE single file. There is only one slot for upload, if you upload files individually, you will overwrite each file.

Each proposal shall contain, at minimum, the components listed below. Proposals should not be excessively long or submitted in an elaborate format that includes expensive binders or graphics. Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. Each page of the proposal should state the name of the proposer, RFQL 4145, and the page number. Proposals may be either single- or double-sided, but a page is considered one side of an 8-1/2" x 11" piece of paper. The font size shall not be smaller than 11 point.

The proposal shall be in the following format:

1. Executive Summary (1 to 2 pages)

Proposers shall submit an executive summary on company letterhead that:

- Includes the firm name, address, telephone/fax, email address, contact person, year the firm was established, and the type of firm (e.g., partnership, corporation, not-for-profit)
- **Specifies the category or categories by name and identifying letter (i.e., A-H), where services are being offered**
- Exhibits a thorough understanding of this RFQL and directly addresses NYSERDA's mission and goals
- Summarizes proposer's ability to fulfill and support the services requested in the category or categories proposed
- Identifies all collaborating entities participating in the proposal, including a brief summary of the subcontractors and the services they provide, as well as past working relationships among team members and subcontractors if applicable
- Discusses the mechanism which will guarantee the proposer's ability to deliver services in New York State in a cost-effective manner
- Is signed by a person with authority to enter into a contract with NYSERDA

2. Table of Contents (1 page)

Proposers should present a comprehensive table of contents that outlines the section and page number for each category proposed. **Proposals will be evaluated and scored separately for each category, therefore they must be organized with a separate section for each category. Each section must include responses to the items below, regardless of whether they have been presented in another section:**

- Experience performing services in the category
- Market insights in the category
- Capabilities to meet requested services in the category
- Personnel qualifications
- Cost proposal

3. Experience performing services in the category (2 to 3 pages per category being proposed; references shall be included as attachments within the proposal and are not included in this page limit)

For each proposed category, proposers shall describe the breadth and depth of their experience delivering high quality services as it relates to the needs of the category, including:

- The proposer's experience as a team/firm in service delivery, including the aggregate number of years working in the category
- The proposer's access or ownership of existing information resources (e.g., curriculum, research tools)
- The proposer's ability to accommodate various learning styles
- The proposer's ability to grant or facilitate Continuing Education Units (CEUs) and/or Professional Development Hours (PDHs)

- A brief summary of at least two and no more than three, of the proposer's projects, including the identification of efforts that made a difference and the extent of impact and influence achieved
 - Project descriptions should specify the level of involvement of the proposing firm and subcontractors and the results/deliverables of the project
 - For at least one of the projects mentioned proposers shall include an example of a recent solution or success related to the category with references (provide as attachment within the proposal), including customer contact name, email, and phone number. Success detailed could include proof of job placements or career advancements as a result of previous training programs
- If applicable and regardless of the category/categories being offered services, the proposer's experience reaching priority populations as described in Category F

4. Market insights in the category *(1 to 2 pages per category being proposed)*

For each proposed category, proposers shall describe key challenges and opportunities, both technical and market-based, facing the category in the short, medium, and long term, including:

- Similarities and differences between New York State and the market at large
- Potential solutions that could be deployed by NYSERDA through the CEF, either through individual programs or across NYSERDA's portfolio of programs
- If applicable, references to recently published abstracts from articles, white papers, or presentations from the proposer (or subcontractor) specifically addressing issues related to the category

5. Capabilities to meet requested services in the category *(1 to 2 pages per category being proposed; if applicable, Letters of Commitment shall be included as attachments within the proposal and are not included in this page limit)*

For each proposed category, proposers shall describe the specific capabilities and resources available to their firm in addressing the needs of the category, including:

- The proposer's or proposing teams' New York State offices and/or training site locations, and plans for utilizing existing training facilities and equipment for hands-on experience for trainees if applicable
- The proposer's geographic areas of coverage
- The proposer's capability to incorporate innovative methods to solve problems including unique market differentiators that the proposer can provide working in this space. For example, specialized technical and information solutions available for support, such as identification of thought leaders, critical research findings, and industry trends, and how these shall be used to inform and support the objectives of the category
- If applicable, reference to Letters of Commitment (provide as attachment within the proposal) from subcontractors

6. Personnel qualifications *(2 to 3 pages per category being proposed; resumes shall be included as attachments within the proposal and are not included in this page limit; if proposing across multiple categories, only provide resumes of key personnel once)*

For each proposed category, proposers shall identify and describe the qualifications of key staff members, teams, and subcontractors that are to be involved in providing services in the category, including:

- Key personnel's education, experience, and accreditation(s) relevant to the category as evidenced by resumes (provide as attachment within the proposal. If applicable, resumes from subcontractors should be provided)
- Potential roles (e.g., technical, operations, outreach, administrative) and responsibilities of key individuals comprising the proposing team relevant to the category, including the identification of the project manager who will serve as the single point of contact under this RFQL

7. Cost proposal (1 page per category being proposed)

For each proposed category, proposers must complete and provide a Project Personnel and Rate Form (Attachment A) and submit the name, job, title, and fully burdened hourly salary range for each individual in the proposal and all subcontractors who will perform the work under an Agreement with NYSERDA.

Proposers shall demonstrate that their pricing and hourly rates are in line with the rest of the market and consistent when compared to expertise, qualifications, etc.

NYSERDA is not requiring proposers to estimate travel or other direct costs as part of the proposals, but reasonable costs for these may be part of the Task Work Orders on an as needed basis. NYSERDA will not reimburse the purchase or rental of tools and equipment. NYSERDA envisions contracting with both individual firms and teaming or subcontracting arrangements as appropriate; however, proposers cannot charge more than two percent overhead for work done by a subcontractor.

IV. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee and scored for each category (A-H) they propose in using the Evaluation Criteria below. **The minimum threshold is 68 points out of 100 possible points per proposed category. No proposed category with a score of less than 68 will be considered for contract negotiations.** At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview. Responses to the RFQL will be reviewed and assigned scores based on the criteria highlighted below:

Total Points	Evaluation Component
15 Points	1. Responsiveness to the RFQL and capabilities to deliver services • Organization of the proposal ○ Does it follow the proposal format outlined? Is it well-written? Is it complete and address all requested information? • The degree in which: ○ the proposal demonstrates a clear understanding of the

	goals and objectives of this RFQL and directly addresses NYSERDA's mission and strategic goals ○ a complete, comprehensive, and effective response to the category needs is provided • Ability to serve New York State ○ Does the proposer have offices and/or training sites in New York State and staff able to support various regions throughout the state, or a clear plan to ensure qualified staff or services by commencement of an award? ○ Does the proposer detail their geographic area of coverage? • Adequacy/depth of organization resources to provide services requested ○ Does the proposer: ▪ demonstrate the ability to complete projects on schedule? ▪ demonstrate the capability and resources (e.g., human, financial) needed to conduct the services requested? ○ If applicable, did the proposer identify collaborating entities and demonstrate their ability to work together effectively? ○ If applicable, did the proposer provide Letters of Commitment from subcontractors?
25 Points	2. Overall relevant experience and impact • Proposer's experience in conducting and delivering similar or related services in the category ○ Does the proposer: ▪ demonstrate the ability to deliver high quality, objective, energy related services? ▪ demonstrate successful implementation of similar services? ○ The degree in which the proposer: ▪ has access or ownership of existing information resources (e.g., curriculum, research tools) ▪ has the ability to accommodate various learning styles ▪ has the ability to grant or facilitate Continuing Education Units (CEUs) and/or Professional Development Hours (PDHs) • The extent of impact and influence achieved through previous initiatives and activities ○ Does the proposer: ▪ include sample projects that illustrate the quality and relevance of their services, including examples of recent solutions and/or successes as it relates to the category? ▪ provide references that can attest to the proposer's

	ability to deliver high quality services?
10 Points	3. Market awareness/insights - The degree in which the proposer identifies: - challenges and/or barriers in the category supported by research (e.g., white papers, articles, presentations) - similarities and differences between New York State and the market at large - opportunities or value propositions that can help NYSERDA achieve success in the category and advance the goals of the State Energy Plan/Clean Energy Fund, such as reducing greenhouse gas emissions
25 Points	4. Qualifications and expertise of the personnel/team - Proposer's credentials to deliver services requested in the category - Did proposer provide resumes of all key personnel, including subcontractors, if applicable? - Do key personnel have education, experience, and accreditation(s) relevant to the services requested, as evidenced by their resume? - Identification of roles - Are the roles of the proposer's staff clearly identified, including the roles of any subcontractors if applicable? - Does the proposer show a balance of technical, operations, outreach, administrative or other expertise necessary to accomplish the objectives?
20 Points	5. Cost - The degree to which pricing and hourly rates are in line with the rest of the market - Is there consistency of rates compared to expertise, qualifications, etc.? - Are proposed escalation rates (if any) reasonable and justified? - Does the proposer provide a completed Project Personnel and Rate Form?
5 Points	6. Other considerations - Prior experience as a NYSERDA contractor, distinguished notable position in industry, or notable accomplishments on projects - Demonstration of specialized or unique capabilities - Proposer's ability to secure strong commitments from essential team members and partners, including letters of commitment (if applicable), and has demonstrated strong support from necessary stakeholders

NYSERDA reserves the right to eliminate from further consideration any proposal deemed to be substantially or materially non-responsive to the requests for information or program requirements contained herein including the degree to which:

- pricing and hourly rates are in line with the rest of the market
- the qualifications and expertise of the proposers will advance the goals of the State Energy Plan/Clean Energy Fund and accelerate transformational technology advances in areas that industry by itself is not likely to undertake because of technical and financial uncertainty
- the proposers directly address NYSERDA's mission and strategic goals
- the proposers have the resources (e.g., human, financial) to be able to complete the services requested
- the services offered by the proposers are likely to lead to increased employment and manufacturing in New York State
- there are technical, market, organizational and/or environmental risks associated with the proposers

Conflicts: The firm and any personnel of the firm must be free from any financial or similar interest in any product or service which may conflict with or appear to conflict with the objectivity of the services provided to NYSERDA. Please describe all your product, manufacturer or service-related affiliations. If any affiliations exist, you must provide a statement verifying that these affiliations do not conflict with disclosure of any affiliation can result in the termination of a contract, if awarded.

Qualified proposers shall not be precluded from bidding on the other categories described within this RFQL or on future solicitations. However, proposers should describe within their proposals how conflicts of interest, both actual and perceived, will be resolved should the proposer choose to bid on other NYSERDA solicitations.

V. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserdera.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contacting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award – NYSERDA anticipates qualifying multiple contractors under this solicitation. NYSERDA anticipates a contract duration of three years with the option to renew, unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the proposal. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions.

Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in

approximately 10 to 12 weeks from the proposal due date whether your proposal has been qualified. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements – If awardees from this solicitation will be posting anything on the web, or if the awardee will produce a final report that NYSERDA will post to the web, the following language must be included. NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSERDA's Accessibility Requirements](#).

Limitation – This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement – The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect – The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in

violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the “Ethics Requirements”). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a “lifetime bar” from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person’s engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Attachment A – Project Personnel and Rates Form
Attachment B – Sample Agreement

Flexible Technical Assistance (FlexTech) Program Opportunity Notice (PON) 4192

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Applications accepted on a first-come, first-serve basis dependent on funding availability until December 31, 2030 by 3:00 PM Eastern Time.

The NYSERDA Flexible Technical Assistance (FlexTech) Program supports New York State Commercial, Industrial, Institutional and Multifamily customers by providing a cost-share for credible, objective technical assistance services. These services encompass a wide range of activities to help customers make informed clean energy investment and sustainability decisions. Customers faced with unprecedented new challenges, opportunities and technological change can use the FlexTech Program to pinpoint which clean energy investments are right for them.

Customers have the option of selecting either a NYSERDA qualified FlexTech Consultant from the following list (<https://www.nyserda.ny.gov/Contractors/Find-a-Contractor/FlexTech-Consultants>) or an Independent Service Provider of their choosing. The service provider will identify, analyze and prioritize energy efficiency or carbon reduction recommendations. The recommendations are tailored to the customer's site and business needs. Implementation of these recommendations may lead to lower annual utility costs, reduced operation and maintenance costs, extended equipment life, and increased occupant comfort.

The primary Technical Assistance Service areas available through the Program include:

- Targeted or comprehensive technical analysis including energy studies and/or energy planning (refer to Section II)
- Investigation of Clean Heating and Cooling Systems including Air Source Heat Pumps (ASHP), Ground Source Heat Pumps (GSHP), Variable Refrigerant Flow (VRF), and Solar Heating and Cooling

Program Summary:

A one-page synopsis of the FlexTech Program is available for download: <https://www.nyserda.ny.gov/flextech-documents>

How to Apply:

A NYSERDA Portal Account is required for the Application Submission process. Applicants can follow the instructions on [FlexTech: Register for a Portal Account](#) to register for a portal account.

Applicants with existing NYSERDA Portal Accounts may apply here: <https://portal.nyserda.ny.gov>

- A Scope of Work, Schedule and Budget must be uploaded to the application; see sample templates (<https://www.nyserda.ny.gov/flextech-documents>)
- For affordable multifamily projects, affordability verification documentation must also be provided.

Program Questions:

Customers, Independent Service Providers, and FlexTech Consultants with Program questions should contact FlexTech@nyserda.ny.gov. No communication intended to influence this procurement is permitted except by contacting the Designated Contact at FlexTech@nyserda.ny.gov. All contractual questions should be directed to Thomas Rood (Tom.Solicitations@nyserda.ny.gov). Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement:

- (1) may result in a proposer being deemed a non-responsible offeror, and
- (2) may result in the proposer not being awarded a contract.

*NYSERDA reserves the right to extend and/or adjust funding to this solicitation. * All applications must be received by 3pm Eastern Time on the date noted above. Incomplete or unsigned applications will be returned. If changes are made to this solicitation, notification will be posted on NYSERDA's website at www.nyserdera.ny.gov.

I. INTRODUCTION

This solicitation is divided into the following Sections:

- Section I: Introduction
- Section II: Program Cost-share
- Section III: Eligibility
- Section IV: Program Parameters
- Section V: Program Participation
- Section VI: General Conditions
- Section VII: Attachments

PROGRAM TERMINOLOGY

Term	Definition
Applicant	A Customer or a Service Provider authorized to apply to the FlexTech Program on behalf of the Customer. Program funds will be distributed to the Applicant.
Customer	The eligible New York State Commercial, Industrial, Institutional and Multifamily entity requesting the energy analysis of their facility(ies). The entity paying for/receiving FlexTech services.
Service Provider: FlexTech Consultant (FTC)	Third-party, NYSERDA qualified firms that provide objective customized technical assistance services to inform the Customer's clean energy management and investment decisions. A list of qualified FlexTech Consultants can be found here: https://www.nyserdera.ny.gov/Contractors/Find-a-Contractor/FlexTech-Consultants
Service Provider: Independent Service Provider (ISP)	Third-party, selected by the Customer, that provides technical assistance services to inform the Customer's clean energy management and investment decisions.
Technical Assistance Services	Activities (found in Section II. Program Cost-Share) that inform a Customer's decision-making process with respect to clean energy efficiency and sustainability.
Project	The set of proposed activities and tasks to be completed as described in the Technical Assistance Services Scope of Work submitted to the Program.
Priority Districts	Priority Districts include P-12 public school districts identified using the New York State Education Department's Needs to Resource Index or districts that serve Disadvantaged Communities .

II. PROGRAM COST-SHARE

For definitions of the Technical Assistance Services listed below and further examples of eligible Projects, please refer to the FlexTech Program website. Additional templates and reference documents are also available to streamline the application process: (<https://www.nyserda.ny.gov/flextech-documents>)

Technical Assistance Services	Sector ³	Sector Cost-Share	NYSERDA Cost-Share Cap per Project
PRIMARY SERVICES: Targeted or Comprehensive Energy Study Targeted or Comprehensive RCx Study Climate Action Plan or Sustainability Plan Clean Heating and Cooling Study Thermal Energy Network Study Energy Master Planning Energy Advisor Services School Bus Fleet Electrification Plans ⁹ Upstate PHA Pathway ^{11,12} SECONDARY SERVICE¹ Investigation of renewable energy technologies Complete greenhouse gas emission inventory Installation of permanent meters or permanent sub-meters ² Grant Writing ^{2,8}	Commercial⁶	50-75%	up to \$500,000 ¹⁰ or up to 20% Annual Energy Expenditure ⁷ , whichever is less
	P-12 Schools⁴	50%-100%	
	Industrial⁵	50%-75%	
	Multifamily - Affordable	75%-100%	
	Multifamily - Market Rate	50%	

1. Secondary Services are only eligible for a NYSERDA cost-share if completed in combination with a Primary Service.

2. The following secondary services are capped at \$10,000.

3. Limited funds may be available for certain entities who do not pay into the SBC.

4. Priority Districts and non-public schools located in a Disadvantaged Community that have not previously participated in the Clean Green Schools Initiative (PON 4924) or the FlexTech Program (PON 4192) in the past two-years are eligible for up to a 100% cost-share. Priority Districts and non-public schools located in a Disadvantaged Community that have previously participated in the Clean Green Schools Initiative (PON 4924) or the FlexTech Program (PON 4192) in the past two-years are eligible for up to a 75% cost-share. All other schools are eligible for up to a 50% cost-share. Priority Districts are not required to pay into the SBC.

5. Industrial customers located in a Disadvantaged Community and/or Industrial customers investigating electrification opportunities are eligible for up to 75% funding, while funds are available.

6. Safety Net Hospitals and Hospitals located in a Disadvantaged Community that have not previously participated in the FlexTech Program (PON4192) are eligible for up to 75% cost-share, up to \$250,000, and up to 50% cost-share after that, capped at \$500,000. All other Hospitals may receive up to a 50% cost-share.

7. NYSERDA reserves the right to adjust the 20% cap on a per project basis. In addition, this cap does not apply to the School Bus Fleet Electrification Plans or customers participating in the Upstate PHA Pathway.

8. The following activity is only available for Priority Districts.

9. The following activity is only available for P-12 public schools, BOCES, or fleet operators holding a contract with a P-12 public school or BOCES. School districts, BOCES, and contracted fleet operators are eligible for funding ranging from 50%-100% depending on Priority District status, bus depot location, and study components.

10. Entities, including but not limited to, school districts, hospital networks, college campuses, large commercial real estate owners/property managers and state agencies/authorities, may be limited to no more than \$1,000,000 through the FlexTech Program over a two-year timeframe.

11. The following activity is only available for eligible affordable public housing authorities.

12. Customers (2+ units) participating in the Upstate PHA Pathway are eligible for up to 100% funding, while funds are available

Disadvantaged Community (DAC) Criteria: www.nyserda.ny.gov/ny/Disadvantaged-Communities

- P-12 Schools Cost-Share (School Buses):
 - NYSERDA supports the development of School Bus Fleet Electrification Plans for public school districts in support of New York State's transit.
 - [Priority Districts](#) are eligible for up to a 100% cost-share. All other public schools are eligible for up to a 75% cost-share.
 - Bus contractors are eligible to receive up to 100% cost-share if the depot being studied serves a Priority District, or 75% cost-share if it does not. If a bus contractor does not study all the buses in their depot, they are only eligible for a 50% cost-share regardless of the school districts served.
 - BOCES are eligible to receive up to a 100% cost-share if they study opportunity charging for visiting school districts in addition to any charging required for their own buses.
 - If the location where school buses are domiciled is located in a Disadvantaged Community, the study may also be eligible for up to 100% cost-share.
 - The Priority District list is located on the FlexTech Documents and Resources [website](#). NYSERDA reserves the right to update this list based on other low-income indicators.
- The following factors will be considered when determining whether a single entity may receive more than \$1,000,000 in a two-year time frame and/or if a portfolio of buildings will be accepted into the FlexTech program:
 - Past participation, frequency of participation, and cost share amount
 - Study type and/or measures studied
 - Ability to replicate findings from one building to another
 - Available program funds

III. ELIGIBILITY

Applications that display a potential for energy savings, carbon savings, or process improvements, as well as opportunities to consider energy efficiency given known energy use increases, will be considered for eligibility.

Eligible participants include Commercial, Industrial, Institutional and Multifamily facilities located in New York State. Most eligible participants must also pay into the System Benefits Charge (SBC) through their facility's electric utility company.

Affordable Multifamily buildings must meet the affordability criteria detailed in the Affordable Multifamily Building Verification document available at www.nyserda.ny.gov/flextech-documents.

IV. PROGRAM PARAMETERS

- A third-party technical assistance service provider is required for all projects. Customers in need of a service provider may choose from NYSERDA's FlexTech Consultant list comprising of firms who have demonstrated experience and thorough understanding of technical assistance services. Visit the website at: www.nyserda.ny.gov/FlexTech for the current listing of FlexTech Consultants.
 - Customers have the option to select their own Independent Service Provider to perform the study.
 - Independent Service Providers and FlexTech Consultants may undergo additional review before being approved to perform certain FlexTech services. Examples of such services include but are not limited to energy advisor projects, thermal energy network, and industrial and process efficiency analysis.
- Applications must provide a justification for the NYSERDA cost-share request based on site-specific facility descriptions and existing conditions, along with the potential solutions that will be investigated.

- Projects must develop an energy use baseline based on existing site information and equipment operation.
- Analysis that ensures adequate ventilation and filtration, that is compliant with applicable code requirements and building system best practices, is encouraged.
 - P-12 Priority Districts: Studies and planning services that include building envelope and/or HVAC systems are required to evaluate the impacts on infectious disease transmission related to the envelope and/or HVAC improvements and the optimal strategies for mitigating infectious disease transmission in accordance with the current [ASHRAE Epidemic Task Force Core Guidance](#) or ASHRAE Standard 241 (Control of Infectious Aerosols).
- Project deliverables shall identify and quantify estimated energy impacts including savings expected as a result of all evaluated measures.
 - Rule of thumb assumptions and percentage savings calculations are not acceptable.
 - Calculations used to quantify energy or carbon impacts must be based on site-specific existing conditions and utility data. The calculations must be deemed satisfactory by NYSERDA staff, or the project may receive a reduced cost-share or may not be reimbursed by NYSERDA.
- Projects are required to evaluate climate resiliency components including flood-protection considerations to prevent damage to and maintain operation of critical infrastructure. The project Scope of Work must include a Task for climate resiliency which adheres to the requirements provided in the FlexTech Scope of Work Template (<https://www.nyserderda.ny.gov/flextech-documents>).
- All final reports must adhere to the appropriate FlexTech Final Report Requirements: www.nyserderda.ny.gov/All-Programs/FlexTech-Program/FlexTech-Documents-and-Resources
- NYSERDA is not committed to cost-sharing a project identified in an application until a Purchase Order (PO) is issued. The commencement of work covered by the FlexTech Program by the FlexTech Consultant, the Independent Service Provider or Customer prior to the issuance of a PO is at their own risk.
- Completed FlexTech studies lacking recommended energy efficiency or process improvement opportunities or quantified energy or carbon savings may receive a reduced cost-share or may not be reimbursed by NYSERDA.
- NYSERDA reserves the right to add or modify technical assistance services areas and the associated cost-share from 0-100%. Funds may be used for technical assistance only and may not be used toward implementation, equipment purchase (except for eligible metering expenses), or any labor costs outside of the technical assistance effort. At its sole discretion, NYSERDA may limit the cost share associated with a study.
- Travel costs are limited to 3% of the total project cost.
- Unless otherwise negotiated, all work funded under this program must be completed within two (2) years of issuance of the PO.
- FlexTech provides cost-sharing for existing buildings. Facilities must be in operation for more than one year to be eligible for funding under this solicitation, with the exception of select thermal energy network studies.
- All service providers may be limited to five (5) open applications at any given time until they have demonstrated the ability to meet program requirements and produce technically sound analysis. NYSERDA reserves the right to stop accepting and/or cancel existing applications from service providers whose draft deliverables have unresolved and significant deficiencies that have not been satisfactorily addressed through multiple rounds of technical review.
- Service Providers and/or individual contributors to projects who repeatedly fail to resolve scope of work or draft report technical review comments after three (3) revisions may be subject to disciplinary action, including but not limited to:

- Service Providers and/or individuals may be limited to one (1) open application at a time until the Service Provider and/or individual can demonstrate improvement meeting the FlexTech program requirements.
- If the Service Provider and/or individual cannot demonstrate improvement to the satisfaction of NYSERDA, the Service Provider may be prohibited from participating in the FlexTech Program, the Clean Green Schools Initiative, the On-site Energy Manager Program and/or other relevant technical assistance programs.
- If the Service Provider is an approved FlexTech Consultant, that status will be reviewed and may be revoked resulting in termination of the FlexTech Umbrella Agreement.
- If a Service Provider and/or individual is prohibited from participating in the FlexTech Program, NYSERDA may also prohibit the Service Provider from acting as a Subcontractor on projects participating in other NYSERDA funding opportunities, at NYSERDA's sole discretion.

These disciplinary actions may also apply to Subcontractors involved in projects that meet the above parameters.

- The complete and required list of Tasks and Deliverables for the Upstate Public Housing Authority (PHA) Pathway can be found in The Tasks and Deliverables of Upstate PHA Pathway document on the FlexTech Documents and Resources page.
- Cost-sharing may be available to support the development of Local Law 97 decarbonization plans, until funds are exhausted. Please note, NYSERDA is not responsible for adherence to compliance requirements and/or compliance deadlines. Service Providers and Customers seeking cost-sharing for these types of studies should allow ample time for NYSERDA review and approval.
 - NYSERDA will closely monitor service providers completing Local Law 97 decarbonization plans. NYSERDA reserves the right to limit the number of applications for a service provider based the proximity to the compliance deadline(s). NYSERDA also intends to disclose the number of active and pending applications a Customer's service provider may have in this Program upon submission of an application.

The following are **ineligible** for funding:

- Work completed prior to NYSERDA's receipt of a completed application (which includes the FlexTech application, Scope of Work, schedule and budget)
- Retro commissioning (RCx) study applications **that do not include measures with quantifiable energy savings.**
 - Any activities past the functional testing and identification of deficiencies and presentation in the draft report: this includes any local law compliance, survey or post implementation deficiency verification testing.
- Technical assistance, studies or assessments whose need is not supported by existing site-specific conditions as documented in the Scope of Work.
- Commercial tenants that do not have ownership of and/or the ability to retrofit HVAC equipment in their leased space, and fit outs of commercial tenant spaces.
- Detailed engineering design
- Lighting only studies and analyses
- Power quality, power factor, and power conditioning studies
- Utility billing error analysis
- Studies that include the same or like measures more than once every three (3) years without sufficient justification

V. PROGRAM PARTICIPATION

APPLYING TO THE PROGRAM

A FlexTech Consultant, Independent Service Provider, or Customer may be the Applicant.

A NYSERDA Portal Account is required for the Application Submission process. Applicants can follow the instructions on [FlexTech: Register for a Portal Account](#) to register for a portal account.

Applicants with existing NYSERDA Portal Accounts may apply here: <https://portal.nyserda.ny.gov>

- A Scope of Work, Schedule and Budget must be uploaded to the application; see sample templates (<https://www.nyserda.ny.gov/flextech-documents>)
 - Specific electric school bus Fleet Electrification Plan (FEP) Scope of Work and Final Report requirements and templates can be found in the FEP Templates section of the NYSERDA Fleet Electrification Planning [website](#). FEP Scope of Work and Final Report requirements supersede FlexTech requirements for school bus projects.
- For affordable multifamily projects, affordability verification documentation must also be provided. Applicants should be sure to reference <https://www.nyserda.ny.gov/flextech-documents> for the most current Affordable Multifamily Building Verification documentation requirements.
- Property management and/or owner representative firms participating as the Customer or Applicant will be required to verify building owner agreement to the scope of work and budget, as well as agreement to the FlexTech Program terms and conditions.

All applications will be reviewed on a first come, first-served basis dependent on funding availability. A complete application package includes a complete Scope of Work with a detailed budget and schedule. Incomplete project application packages will be rejected.

For thermal energy network studies, multiple Customer signatures are not required on a FlexTech Application.

SCOPE OF WORK & BUDGET REQUIREMENTS

The Scope of Work is a stand-alone document describing the existing conditions of a facility and the Technical Assistance Services to be conducted.

Scopes of Work must:

- Include a list of tasks required to conduct the Project. Tasks must clearly articulate the approach to identifying energy and carbon reduction opportunities, calculation methodology for quantifying savings and the deliverables associated with the Project.
- Clearly outline where potential energy efficiency and carbon reduction opportunities exist.
- Clearly identify why a study and/or third-party service provider assistance is needed.
- Clearly identify all parties involved in the Project and their role(s) including but not limited to the service provider (prime consultant), any subcontractor(s), building owner(s) and owners' representation.
- Identify service provider and subcontractor(s) responsibilities by task.
- Include all information requested in the FlexTech Energy Study Scope of Work Guidelines template: (www.nyserda.ny.gov/flextech-documents). Following the format of the Scope of Work template is not required.

The Budget is a stand-alone document that shows the fees associated with each task listed in the Scope of Work.

Budget must:

- Align by task with the Scope of Work. Budgets must follow the Energy Study Budget Template:

(www.nyserda.ny.gov/flextech-documents)

- Be broken out by service provider (prime consultant) fees and subcontractor(s) fees.
- Include expected expenses.
- **Independent Service Provider** titles and hourly rates presented in the approved budget table must align with expected invoices in order to process cost-share payments.
- **FlexTech Consultant** titles and rates presented in the approved budget table must align with the consultant's Exhibit E Rate Schedule and invoices in order to process cost-share payments.

When reviewing and negotiating the Scope of Work and Budget, NYSERDA reserves the right to:

- Review and request additional information to support proposed staffing titles and their associated hourly rates to ensure appropriate alignment of staff to task complexity.
- Utilize comparable NYSERDA-funded studies and contracts to confirm reasonableness of hourly rates commensurate with geographic location, staff titles, and the Scope of Work tasks.

Failure to provide all required information may result in NYSERDA rejecting the Scope of Work. Final approval of a Scope of Work is subject to NYSERDA's discretion. Certain studies may undergo review by an independent panel to determine eligibility for acceptance into this solicitation.

PROJECT PAYMENTS

- **NYSERDA** will contribute its share of the total study cost, not to exceed the amount agreed upon in the Purchase Order, towards the allowable service provider fees, directly to the Applicant per the approved Scope of Work.
- **Customers** shall pay the remaining balance of the service provider fees directly to their service provider, as applicable, under the terms and conditions to be negotiated by the Customer and service provider.
- **Progress payments** are available at the discretion and approval of the NYSERDA Project Manager. Applicants must provide project progress updates to their designated NYSERDA Project Manager in accordance with the approved budget and timeline outlined in the NYSERDA approved Scope of Work. Unless otherwise negotiated in the Scope of Work, progress payments must follow the payment structure below:
 - If an Applicant is a FlexTech Consultant:
 - Applicant can invoice up to once monthly.
 - Prior to draft report submission, Applicant may invoice for up to 75% of the NYSERDA cost-share, dependent on project progress and amount concurrently invoiced to Customer.
 - If Applicant is an Independent Service Provider or Customer:
 - Prior to draft report submission, Applicant may invoice for up to 25% of the NYSERDA cost-share, dependent on project progress and amount concurrently invoiced to or paid by Customer.
 - After the draft report is submitted, Applicant may invoice for an additional 25% of the NYSERDA cost-share, not to exceed 50% of NYSERDA's total cost-share.
 - After the report is approved, Applicant may invoice for the remaining 50% of NYSERDA's cost-share.
- **Applicant invoices to NYSERDA** must be submitted to <https://services.nyserda.ny.gov/Invoices/> and meet the following requirements:
 - The invoice should be a single PDF and include the following:
 - The project's NYSERDA Purchase Order number
 - The FlexTech project name exactly as listed on the NYSERDA Purchase Order
 - The invoice number and exact invoice amount
 - Copies of third-party service provider's invoice(s), and subcontractor invoice(s) as applicable, including:

- Labor and non-labor costs
- Staff titles and hourly rates
 - If the Applicant is a Customer or Independent Service Provider, titles and hourly rates on invoices must match the titles and hourly rates in the NYSERDA approved Scope of Work and Budget.
 - If the Applicant is a FlexTech Consultant, titles, and hourly rates on invoices must match the approved rates in the executed FlexTech Consultant agreement, specifically the Exhibit E Rate Schedule.
- Dates and hours for each task.
- The amount that is being invoiced concurrently to the Customer.
- If applicable and requested by NYSERDA, a copy of the Customer's canceled check showing payment of their cost-share.

NYSERDA payments may not be released prior to Customer contribution equal to or exceeding the requested payment amount, as applicable. Payment will be based on services provided as defined in the Scope of Work and Budget and as documented by approved deliverable(s), invoices and other documentation deemed necessary by NYSERDA. NYSERDA reserves the right to limit progress payments and withhold payment in cases where program deliverables are not being met.

VI. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of the application and/or program deliverable submission. Review should include whether confidential information is critical for adhering to program requirements, and whether general, non-confidential information, may be adequate.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDARegulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
 Division for Small Business
 625 Broadway
 Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
 Minority and Women's Business Development Division
 625 Broadway

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx> . Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf> .

Contract Award - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of up to two (2) years, unless NYSERDA management determines a different structure is more efficient based upon applications received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Scope of Work. Each application should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support submissions including Scope of Work modifications or negotiations before issuing a Purchase Order. NYSERDA will use the FlexTech Program Application and Scope of Work and Budget Template (<https://www.nyserda.ny.gov/flextech-documents>) to contract successful applications. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to NYSERDA and Program terms and conditions. Applicants should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify applicants in approximately four (4) weeks from the receipt of an application whether your application has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The Applicant shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the Applicant or former officers and employees of NYSERDA, in connection with Applicant's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The Applicant must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Applicants are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with Applicants to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for Applicants' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the Applicants' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with Applicants' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

Loan Loss Reserve to Catalyze Clean Energy Financing in New York State Communities
Program Opportunity Notice (PON) 4378 – Version 4.0 (12.25.2024)

\$ 10,000,000

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Applications Accepted Starting: June 30th, 2020 at 3:00 p.m. Eastern Time*
Solicitation shall remain open until \$10,000,000 is allocated

Program Summary

The New York State Energy Research and Development Authority (NYSERDA) requests applications from entities for Loan Loss Reserve/Credit Enhancement support for financing products which support clean energy improvements in residential (1-4 unit) dwellings, small commercial (100 employees or less), not-for-profit and multifamily (5+ unit) buildings (Eligible Properties) located in New York State Communities. The Loan Loss Reserve will provide reimbursement for defined losses on individual transactions. Initial awards to qualified Applicants will be based on the Targeted Sectors, including the Building Sector and Clean Transportation sector as proposed by the applicant. Applicants need to apply separately for each proposed Sector. Maximum initial awards are as follows:

- Residential (1-4 unit) Sector: One million dollars (\$1,000,000)
- Small Commercial Sector: One Million Dollars (\$1,000,000)
- Multifamily (5+ unit) Sector: One million dollars (\$1,000,000)
- Not-for-Profit Sector: Five hundred thousand dollars (\$500,000)
- Clean Transportation: Support for Electric Vehicles including School Bus, Medium and Heavy-Duty Truck TRAC Leasing support: One million dollars (\$1,000,000)

NYSERDA will consider making additional funding available through additional solicitation rounds should there be a strong market response to this pilot solicitation.

Application Submission:

Applicants may apply by following the directions posted on the **NYSERDA New York Loan Loss Reserve Program** webpage <https://nyserda.seamlessdocs.com/f/LoanLossReserve>.

If you have any questions or concerns, please send an email to: NYSLLR@nyserda.ny.gov

No communication intended to influence this procurement is permitted except by contacting John Joshi (Designated Contact) at 1-646-873-7895, Heather Clark (Designated Contact) at 518-738-2869 or by e-mail NYLLR@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact James Cowman at (518) 518-362-0487 or JamesSolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the applicant or indirectly through a lobbyist or other person acting on the applicant's behalf) in an attempt to influence the procurement: (1) may result in an applicant being deemed a non-responsible offeror, and (2) may result in the applicant not receiving an award.

Incomplete applications may be subject to disqualification. It is the applicant’s responsibility to ensure that all pages have been included in the application. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit applications. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the “Current Opportunities” section of NYSERDA’s website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

II. Definitions

- (a) “Affordable Multifamily Buildings”: Buildings under regulatory agreement, rent-controlled, rent-stabilized or government subsidized.
- (b) “Applicant”: A Financial Institution or other entity applying for a Loan Loss Reserve award.
- (c) “Borrower”: An entity or individual who enters into an Eligible Financing Agreement with a Finance Provider for the purpose of completing a Project. The entity or individual is not required to own the Eligible Property.
- (d) “Eligible Financing Agreement”: An agreement made between a Finance Provider and a Borrower to finance a Project. The agreement must be for improvements to an existing building and may not be for the construction or purchase of a building.

The agreement must meet the definition of either an Eligible Lease, Eligible Loan, Energy Services Agreement, Eligible Savings-Based Payment Agreement, Energy Savings Portfolio Insurance Agreement, or Predevelopment Financing Agreement. The Eligible Financing Agreement must meet the requirements specified in [Section VII](#).

- (e) “Eligible Lease”: An agreement that provides the Borrower with Energy Saving Measures in exchange for payments in amounts that are due according to a schedule established in the agreement. Such payments are made to the Finance Provider or its assignee for a specified term. Title to the equipment may transfer at the beginning or end of the term.
- (f) “Eligible Loan”: An agreement that provides the Borrower with proceeds used to finance Energy Saving Measures in exchange for payments in amounts that are due according to a schedule established in the agreement. Such payments are made to the Finance Provider or its assignee for a specified term. Eligible Loans must be closed end loans; no revolving lines of credit will qualify.
- (g) “Eligible Property”: A property located in New York State that is a Target Building Sector.
- (h) “Energy Saving Measures”: Any Qualified Energy Efficiency Improvement or Renewable Energy System.
- (i) “Eligible Savings-Based Payment Agreement”: An agreement that provides the Borrower with agreed-upon energy savings from Energy Saving Measures in exchange for regular payments to the Finance Provider or the Finance Provider’s assignee. The term may be specified by a number of months or may run until payments have reached a specified amount.

The agreement must satisfy each of the following criteria:

- (1) Savings will be measured and verified no less than annually.
- (2) Total monthly energy and efficiency charges for the Borrower must be projected to be "cash flow positive," based on industry-accepted estimates, meaning- allowing for seasonal variations, the combined monthly energy expense (gas and electric) along with all projected monthly Eligible Savings-Based Payment Agreement charges is projected to be less than the Borrower's pre-project monthly energy expense;
- (3) The Borrower will share in benefits if actual savings exceed projected savings;

(4) The Borrower does not bear risk in the event that savings are less than projected.

- (j) “Energy Services Agreement”: An agreement that provides the Borrower with the use of Energy Saving Measures as well as ongoing service and maintenance of that equipment in exchange for regular payments to the Finance Provider or the Finance Provider’s assignee for a specified term. Title to the Energy Saving Measures does not transfer to the Borrower.

The agreement must include either:

- (1) A guarantee of functionality for any Energy Saving Measures and non-Energy Savings Measures; or
 - (2) A guarantee of energy savings. Equipment functionality or energy savings must be measured no less than annually.
- (k) “Energy Savings Portfolio Insurance Agreement”: A portfolio insurance policy guaranteeing that if an energy efficiency shortfall occurs on savings underwritten, the policy is triggered, paying the customer. The policy provides portfolio insurance to ESCO and Contractors that covers a comprehensive set of energy efficiency, renewable energy and distributed generation measure and a guarantee that the savings produced by the project will be sufficient to cover the cost of project financing for the life of the project. NYSERDA will offer support for underwriting additional energy savings above the savings proposed in the Investment Grade Audit Report, for an Eligible Savings-Based Payment Agreement.
- (l) “Finance Provider”: The Applicant approved for participation in the Program. Also referred to as a Contractor in the terms and conditions.
- (m) “Financial Institution”: Any insured depository institution, insured credit union, Community Development Financial Institution (CDFI), or other entity licensed by the New York State Department of Financial Services to perform lending services, or chartered or regulated by the federal government to perform lending services.
- (n) “Investment Grade Audit Report” scope of work to be implemented by the ESCO, establish guaranteed savings, develop an agreed-upon plan to measure and verify the guaranteed savings, and ensure that the agreed-upon project meets statute requirements.
- (o) “Loan Loss Reserve Award Amount”: The amount established by NYSERDA for financial assistance provided for the Loan Loss Reserve Account for the benefit of a Finance Provider, or successor servicer or assignee as may be requested and approved in writing by NYSERDA, for Eligible Financing Agreements, and as such amount may be amended in writing by NYSERDA.
- (p) “Loan Loss Reserve Account”: An account established and maintained by NYSERDA for the benefit of the Finance Provider or successor servicer to hold the Loan Loss Reserve Balance for each Target Building Sector.
- (q) “Loan Loss Reserve Balance”: The amount of Loan Loss Reserve that is available to the Finance Provider held in the Loan Loss Reserve Account, which shall equal the initial Loan Loss Reserve Award Amount plus any subsequent awards less any amounts paid to Finance Provider for losses, and any amortized reduction.

- (r) “Origination” and “Origination Date”: the date on which any Eligible Financing Agreement becomes the legally binding obligation of the Finance Provider and Borrower, all in accordance with the terms and conditions set forth herein or incorporated herein, and any law or regulation incorporated herein.
- (s) “Predevelopment Financing Agreement”: a loan or other financing agreement to cover pre-construction analysis and design for Energy Savings Measures, including but not limited to Green/Integrated Physical Needs Analysis (GPNA/IPNA), or Investment Grade Energy Audit which is used for the analysis of potential energy, water, and health performance upgrades to buildings in the Small Commercial, Multifamily, and Not-for-Profit Sectors.
- (t) “Qualifying Eligible Loss”:

The amount of any Eligible Financing Agreement, that is more than 120 days past due, calculated as follows:

- (1) for Eligible Loans the unpaid principal and remaining unpaid interest;
- (2) for Eligible Leases the sum of remaining unpaid payments;
- (3) for Energy Services Agreements: the minimum or actual, or guaranteed energy savings multiplied by
 - a) for kWh power savings the base kWh rate; or,
 - b) for thermal fuel savings the base BTU rate;
- (4) for Eligible Savings-Based Payment Agreements, the minimum of actual or guaranteed energy production multiplied by:
 - a) for kWh power production the base kWh rate; or,
 - b) for thermal fuel production the base BTU rate;
- (5) for Predevelopment Financing Agreement the unpaid principal and remaining unpaid interest
- (6) for Energy Savings Portfolio Insurance Agreement, the unpaid principal and remaining interest due to a shortfall in returned savings that were unwritten above the baseline projections of energy savings in the Investment Grade Audit Report

- (u) “Principal Amount”:

- (1) for Eligible Loans the unpaid balance as of the date of the Monthly Report;
- (2) for Eligible Leases the sum of remaining unpaid payments;
- (3) for Eligible Savings-Based Payment Agreements: the minimum actual or guaranteed energy savings multiplied by
 - a) for kWh power savings the base kWh rate; or,
 - b) for thermal fuel savings the base BTU rate;
- (4) for Energy Services Agreements: the minimum actual or guaranteed energy savings multiplied by
 - a) for kWh power savings the base kWh rate; or,
 - b) for thermal fuel savings the base BTU rate;
- (5) for Energy Savings Portfolio Insurance Agreements, the minimum of actual or guaranteed energy production above those guaranteed in the Investment Grade Audit Report multiplied by:
 - a) for kWh power production the base kWh rate; or,
 - b) for thermal fuel production the base BTU rate;
- (6) for Predevelopment Financing Agreements the unpaid balance as of the date of the

Monthly Report

- (v) “Program”: The Loan Loss Reserve/Credit Enhancement Program described in this Program Opportunity Notice.
- (w) “Project”: One or more Qualified Energy Efficiency Improvements or Renewable Energy Systems, installed at an Eligible Property financed in whole or in part under a single Eligible Financing Agreement, or predevelopment financing for Qualified Energy Efficiency Improvements or Renewable Energy Systems at an Eligible Property, including Green/Integrated Physical Needs Analysis, financed in whole or in part under a single Eligible Financing Agreement. A qualified TRAC lease or other acceptable leasing structure for Electric School Buses, Medium and Heavy-Duty Trucks and Buses.
- (x) “Qualified Energy Efficiency Improvements”: A modification to a structure that shall increase the energy efficiency and conservation of an existing structure, including but not limited to:
 - (1) Application of weather-stripping, caulking, sealant and other materials around doors, windows, and other areas of a building for the purpose of insulating or sealing openings in the building envelope and within the building to mitigate energy loss;
 - (2) Testing, repairing and replacing heating or cooling systems or components of such systems;
 - (3) Thermostat upgrades;
 - (4) Water heater repair and replacement;
 - (5) Roof, chimney, fireplace and roof vent repair as determined to be necessary to mitigate energy loss or resolve energy-system related health and safety issues;
 - (6) Repair and replacement of storm windows, permanent windows and exterior doors;
 - (7) Repair or replacement of major appliances;
 - (8) Installation of thermal solar heat or hot water systems;
 - (9) Addition of insulation to exterior walls or ceilings;
 - (10) Replacement of inefficient light bulbs and lighting fixtures and systems;
 - (11) Minor repairs that are necessary to ensure maximum efficiency from the provision of qualified energy efficiency services;
 - (12) Installation of carbon monoxide detectors and indoor environmental testing and mitigation deemed necessary as a result of the provision of other qualified energy efficiency services;
 - (13) Fuel switching to convert an electrically heated building to a more efficient heating source provided that significant energy cost-savings can be demonstrated.
 - (14) Beneficial electrification, including heat-pumps (geothermal, ASHP, Desiccant Heating and Cooling systems, and other high-efficiency beneficial electrification solutions)

Please refer to the NYSERDA document “*Loan Loss Reserve Illustrative Guidelines for Eligible Technologies*” for additional details in Attachment E.

- (y) “Renewable Energy Systems”: are technologies that generate energy from non-depletable or naturally replenishable resources. Renewable resources include solar energy, wind, the heat of the earth (geothermal), and plant materials (biomass). Renewable energy technologies produce power, heat or mechanical energy by converting those resources either to electricity or to motive power.

- (z) “Servicing”: conducting a customer service operation to on-board all Eligible Financing Agreements into the servicer’s servicing system, handling Borrower inquiries regarding Eligible Financing Agreements already under servicing, sending out regular financing billing statements, collecting and applying payments, handling requests for modifications, collections where necessary, and distributions to investors where applicable.
- (aa) “Target Building Sectors”: are (1) residential (1-4 unit) dwellings; (2) a structure used or occupied by a small business (100 employees or less); a structure used or occupied by a not-for-profit corporation; and (4) multifamily (5+ unit) buildings.
- (bb) “Target Clean Transportation Sectors”: are (1) Electric School Buses; (2) Medium Duty Electric Trucks and Buses; (3) Heavy Duty Trucks and Busses.

III. Introduction

NYSERDA is a public benefit corporation of the State of New York created under Article 8, Title 9 of the New York State Public Authorities Law. NYSERDA offers objective information and analysis; innovative programs, including energy efficiency, renewable energy, and energy research and development; technical expertise; and funding to help New Yorkers increase energy efficiency, save money, use renewable energy and reduce reliance on fossil fuels.

Building Sectors Support

The goal of this program is to increase adoption of Qualified Energy Efficiency Improvements and Renewable Energy Systems in Eligible Properties in New York State Communities by expanding access to, and terms of, clean energy financing solutions offered by qualified Financial Providers to finance these projects. NYSERDA will enter into agreements with qualified Financial Providers to provide a partial portfolio loss coverage against their qualified financing portfolios they originate for Qualified Energy Efficiency Improvements or Renewable Energy Systems in Eligible Properties in New York State Communities, providing for defined losses on individual transactions, up to a Loan Loss Reserve Award Amount. The initial Loan Loss Reserve Award Amount will be based on which Target Building Sector that the Financial Provider Applicant will provide financing for. NYSERDA reserves the right to adjust this initial award after one year; adjustments can include reduction or increase of award based on portfolio growth, performance and availability of funds; provided, no such adjustment will affect NYSERDA’s obligation to a Finance Provider with respect to outstanding Eligible Financing Agreements.

Clean Transportation Sector Support

The goal of this program is to increase adoption of Clean Transportation opportunities in the Target Clean Transportation Sectors in New York State. NYSERDA will enter into agreements with qualified Clean Transportation Providers to provide a portfolio residual value reserves (“RVR”) for coverage against their qualified financing portfolios for Target Clean Transportation Sectors, by providing RVR on individual transactions, up to a maximum Loan Loss Reserve Award Amount. The initial Loan Loss Reserve Award Amount will be subject to the maximum amount as defined under the eligible sectors. NYSERDA reserves the right to adjust this initial award after one year; adjustments can include reduction or increase of award based on portfolio growth, performance, and availability of funds; provided, no such adjustment will affect NYSERDA’s obligation to a Finance Provider with respect to outstanding Eligible Financing Agreements.

Energy Efficiency and Renewable Energy Loans (Solar) have demonstrated stable credit performance during the period NYSERDA has provided a loan program to support the deployment of energy efficiency and solar energy. Since 2010, NYSERDA has administered the Green Jobs Green New York (GJGNY) Loan Program which provides loans to finance energy efficiency improvements and the installation of renewable energy systems in residential 1-4 family buildings. Attributes and payment performance experience

on the residential GJGNY Loan Program can be found on NYSERDA's website at <https://www.nyserda.ny.gov/Researchers-and-Policymakers/Green-Jobs-Green-New-York/Data-and-Trends>. Potential applicants offering financing for the residential sector are encouraged to review this information to assist in anticipating performance results of their financing portfolios.

IV. Applicant Eligibility Requirements

By submitting an application hereunder, Applicant hereby represents to NYSERDA, as of the date of its application and on the date that it is approved as a Finance Provider: Applicant is

(i) a Financial Institution as defined herein, or (ii) a non-Financial Institution that is authorized to do business in New York State and fulfills each of the requirements set forth in [Section VI](#) hereof; and (iii); acknowledges that support available through this PON is not available for loan loss coverage for NY Green Bank capital; and (iv) the Applicant is not applying for support under this PON for any capital funded by the NY Greenbank or maybe funded by the NY Green Bank in the future..

V. Application to Participate in the Program

An Applicant seeking to become a Finance Provider must submit a complete application to NYSERDA signed by a person authorized to legally bind the Applicant including the signatory's name, title, and date. The Applicant must sign the acknowledgements, certifications, and representations of the Applicant.

All applications must include a certification that all the information provided is true and correct to the best of the signatory's knowledge.

A complete application includes the following information, disclosures, acknowledgements, certifications, and representations, and can be accessed from the following link at

<https://nyserda.seamlessdocs.com/f/LoanLossReserve>

1) Information

The Applicant must provide the following:

- a) Name, address, and website URL of the Applicant.
- b) Name, title, phone number, and e-mail address of the Program contact person for the Applicant.
- c) Type of finance entity, e.g., insured depository institution, insured credit union, Community Development Financial Institution, or other type.
- d) Name(s) of any federal government regulatory agency(ies) to which the Applicant is accountable and license number(s), if applicable.
- e) Whether the Applicant is, or is required to be, licensed by the NYS Department of Financial Services for the lending activities proposed to be carried out in the Program, and documentation of such licensure.

2) Disclosures

The Applicant must disclose the following:

- a) The name of the entity funding the Projects that are to be enrolled in the Program;
- b) The name of the finance agreement counterparty(ies) or the service agreement counterparty(ies) who will be named on the closing documentation provided to the Borrower;
- c) The assignee(s) of repayment streams, if any; and
- d) The Applicant's intent as to what it will do with the Eligible Financing Agreements, if known, (e.g. hold, sell, transfer, participate, etc.) and the identity of a purchaser, if applicable.

3) Proposed Products

- a) To participate in the Program, the Applicant must provide a description of proposed financial product(s) (Eligible Financing Agreements), including: A detailed description of the products the Applicant is proposing to offer, including, but not limited to, the type of financing product and its relationship to the categories of Eligible Financing Agreements, collateral requirements (if any), minimum and maximum financed amounts, interest rates, terms, service or maintenance charges, fees, prepayment penalties, and a description of customer eligibility and underwriting criteria.
- b) A description of the geographic area(s) in New York where the financing program(s) will be offered.
- c) An explanation of how the Loan Loss Reserve Account will be utilized to provide benefits to Borrowers compared to the Applicant's typical product offerings in one or more of the following ways:
 - Broadened approval criteria;
 - Longer terms;
 - Larger amounts available to finance;
 - Better rates; and/or
 - Other advantageous terms.

For Energy Savings Performance Insurance:

- (a) Additional available cashflow underwritten for the same measures' costs; or
- (b) Shorter debt term, based on the baseline underwritten cashflow; or
- (c) Net higher savings investment ratio based vs. original U/W cashflow without a policy;

- 4) In compliance with §139-j and §139-k of the State Finance Law (see [Section XVI](#), General Conditions below for additional information), Applicants will be required to answer questions during application submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

5) Acknowledgements of the Applicant

By submitting an application to NYSERDA to participate in the Program, the Applicant, through its authorized officer, hereby certifies to NYSERDA that the information provided in its application is true and correct as of the date hereof and on the date it is approved as a Finance Provider.

6) Representations of the Applicant

The Applicant hereby represents to NYSERDA as of the date of its application and as of the date such application is approved that:

- a) it is duly organized and validly existing under the laws of the state of its organization.
- b) it is duly qualified to do business (if applicable) and has all the necessary licensees and approvals in New York State to carry out its activities under the Program.
- c) it has the power and authority to execute and carry out the terms of the Program.
- d) it is not subject to a cease and desist order or other regulatory sanction from the appropriate federal or state regulatory body, which would impair its ability to participate in the Program.
- e) it has no proceedings or investigations pending or threatened before any court or regulatory body against the entity.
- f) it has the experience and expertise to underwrite, originate, and service financing products in accordance with all applicable regulations and laws.
- g) it has trained and qualified employees suitable for underwriting, originating, and servicing financing products, or has an agreement with a qualified firm to support this function.
- h) The person signing the application, whose name and title is printed below the signature with the

date of the signature, is authorized to legally bind the Applicant.

- i) The information submitted in the application is true and accurate to the best of the signatory's knowledge.
- j) All Applicants that are not Financial Institutions have reviewed and will comply with the additional requirements specified in [Section VI](#).

The Applicant further represents to NYSERDA, as of the date it is approved by NYSERDA to participate in the Program as a Finance Provider:

- a) It must follow all Program rules and terms and conditions set forth herein.
- b) That all Eligible Financing Agreements when made met the requirements set forth in [Section VII](#).
- c) It must permit an audit by NYSERDA of any of its records relating to the Finance Provider's financing portfolio during normal business hours on its premises and must supply such other information concerning the financing portfolio as may be reasonably requested by NYSERDA. Additionally, the Finance Provider must permit an audit of its records relating to how it is representing the Program to the public, including, but not limited to, web and print collateral, marketing scripts, and marketing materials.
- d) It agrees to provide to NYSERDA at any time financing documentation, including Borrower contract and if applicable and available any related documents used for underwriting including utility bills, energy efficiency financing disclosures, energy modeling report, energy load analysis, including the Home Energy Rating Systems reports and certificates of completion.
- e) NYSERDA and New York State have no liability to the Finance Provider under the Program except from funds deposited in the Loss Reserve Account(s) for the Finance Provider.

7) Covenants Agreed to Upon Approval by NYSERDA

The application must include the Applicant's representation, warranty, and covenant contained in this Section, signed by a person authorized to legally bind the Applicant.

Upon approval by NYSERDA to participate in the Program as a Finance Provider the Applicant:

- a) must retain all records relating to each Eligible Financing Agreement for the term of financing plus three years after the financing agreement has ended.
- b) is solely responsible for identifying and making all disclosures and providing periodic reports to its Borrower (s) as required under applicable finance laws.
- c) is solely responsible for updating NYSERDA with any changes to the company's name, contact person, loan officer/staff, type of financial institution, the counties where the Program will be available (subject to NYSERDA's approval), the names of the regulatory agency having jurisdiction over the entity, or the name of the entity's insurance company.
- d) is solely responsible for delivering to NYSERDA, no less than 15 days prior to such expiration date, certificates of insurance evidencing the renewal of such policies, and shall promptly pay all premiums thereon due.
- e) is solely responsible for updating NYSERDA (and that NYSERDA has the right to approve of) any changes to the entity financing program requirements, fees assessed against

Borrowers, the ways in which the Program will benefit Borrowers.

- f) must comply with all applicable finance laws, possess and maintain all required state and federal licenses, and remain in good standing with all governmental authorities having jurisdiction over its business.
- g) must maintain quality control and management systems to evaluate and monitor the overall quality of its loan or financing related activities including, where applicable, underwriting reviews, and consumer complaint resolution processes.

- h) must maintain a written disaster recovery plan that covers the restoration of the facilities, backup and recovery of information in electronic processing systems.
- i) must establish and maintain adequate audit and management control systems to guard against dishonest, fraudulent or negligent acts by employees and contractors involved in the Origination process.

8) Application Process

- a) Upon receipt of a completed application, NYSERDA will, within thirty business days, review and determine whether additional information is required, or whether the application is sufficient to permit the Applicant to be a Finance Provider.
- b) NYSERDA's decision regarding enrollment will be final.
- c) NYSERDA will notify the Applicant of its decision and provide an award letter if approved as a Finance Provider.

9) Changes to Product Terms

- a) If, after being approved to participate in the Program, a Finance Provider wishes to make changes to products offered that will adversely affect the benefits to Borrowers under the (as described in [Section V\(3\)](#)) the changes must be approved by NYSERDA.

10) Finance Provider Withdrawal and Termination

- a) A Finance Provider may withdraw from the Program, in whole or in part, by giving written notice to NYSERDA, signed by a person authorized to legally bind the Finance Provider in the following circumstances and subject to the following conditions:
 - a. The Finance Provider has transferred or sold all or part of the Finance Provider's Eligible Financing Agreements that are covered by the Agreement (each, a "Covered Agreement") in accordance with [Section XIV](#) hereof.
 - b. The Finance Provider releases NYSERDA from all Loss Reserve Account(s) coverage with respect to all existing Covered Agreements and shall not be eligible to submit future financings for coverage under the Program. Finance Provider will continue to report recoveries with respect to losses previously paid under the program and shall repay NYSERDA its proportionate share of any recovery.
 - c. Finance Provider will not issue any further Eligible Financing Agreements under the Program but that the Loss Reserve Account(s) will continue in existence to support all Eligible Financing Agreements that were issued prior to such notice. Finance Provider will continue to fulfill its reporting requirements to NYSERDA for the covered portfolio.
- b) For any such notice received the remaining balance in the Finance Provider's Loss Reserve Account(s) will be reverted to NYSERDA.
- c) This Agreement may be terminated by NYSERDA at any time during the term of this Agreement upon ten (10) days prior written notice to the Finance Provider upon the occurrence of any of the following:
 - i. Entry of a cease and desist order, regulatory sanction, or any other action against the Finance Provider by a regulatory agency or court with jurisdiction over the Finance Provider;
 - ii. Failure of the Finance Provider to abide by applicable finance law or the program rules

- within this PON;
 - iii. Failure of the Finance Provider to service or issue any Eligible Financing Agreements under the Program, as applicable, for a period of one year;
 - iv. Failure of the Finance Provider to report to NYSERDA pursuant to [Section XII](#) within sixty calendar days; or
 - v. Providing false or misleading information regarding the Finance Provider, or an Eligible Financing Agreement, to NYSERDA, or failure to provide NYSERDA with notice of material changes in submitted information regarding the Finance Provider.
- d) In the event of such termination, the Finance Provider must not issue any further Eligible Financing Agreements, but all previously issued Eligible Financing Agreements will continue to be covered by the Loan Loss Reserve Account until the Finance Provider is paid, claims are filed, or the Finance Provider withdraws from the Program pursuant to [Section V\(11\)\(a\)\(i\)](#).
 - e) A terminated Finance Provider must continue to report on Eligible Financing Agreements pursuant to [Section XII](#).
 - f) If a terminated Finance Provider fails to report to NYSERDA pursuant to [Section XII](#) for sixty calendar days, the remaining Loan Loss Reserve Balance in the Finance Provider's Loss Reserve Account(s) may be reverted to NYSERDA.

VI. Additional Requirements for Entities that are not Financial Institutions

If an Applicant is not a Financial Institution as described in this Agreement, in addition to the requirements set forth in [Section V](#), to be approved as a Finance Provider, Applicants must submit the following information in a format as specified by NYSERDA. Applicant represents to NYSERDA that all information provided hereunder is true and correct, to the best of Applicant's knowledge, as of the date of the application and as of the date such application is approved.

- 1) Income statements and estimated balance sheets for each of the last three years of operations. Newly formed non-profit community-based Applicants, with a services agreement with an affiliate, are exempt from this requirement.
- 2) Net Worth: The Applicant must demonstrate to NYSERDA that it has a net worth of no less than \$1 million and assets that exceed 0.5% of assets under servicing. Newly formed non-profit community-based Applicants are exempt from this requirement.
- 3) Underwriting Qualifications: Applicant must provide the following to NYSERDA:
 - a) Demonstrated experience, in writing, with underwriting financing;
 - b) Demonstrated experience, in writing, with home improvement financing and the coordination of such financing with contractors and businesses;
 - c) Written description of its underwriting process; and
 - d) Demonstrated qualifications, in writing, of the Applicant and key positions and associated job duties with regard to underwriting.
 - e) Newly formed non-profit community-based Applicants are exempt from this requirement.
- 4) Origination Qualifications: Applicant must provide the following to NYSERDA:
 - a) Demonstrated ability, in writing, to originate financing in accordance with all applicable finance laws, including related expertise and experience, trained and

qualified personnel, and suitable systems, processes, and facilities to support the business;

- b) Demonstrated experience, in writing, with equipment financing and the coordination of such financing with contractors and businesses;
- c) Sample transaction documentation.
- d) Newly formed non-profit community-based Applicants are exempt from this requirement.

5) Servicing Qualifications: If the Applicant will perform the Servicer role under the Program, it must provide the following to NYSERDA:

- a) Demonstrated capacity, in writing, for, and experience with, servicing the type of product(s) the Applicant will be providing and general customer service; and
- b) A description of key positions and associated job duties, software, and systems used by the Applicant in performing servicing of Eligible Financing Agreements.
- c) Newly formed non-profit community-based Applicants are exempt from [Section VI\(6\)\(a-b\)](#).

6) The person signing the application, whose name and title is printed below the signature with the date of the signature, is authorized to legally bind the Applicant.

VII. Eligible Financial Products

1) Disclosure

For all financial products, the Finance Provider must disclose to the Borrower either:

- a) An annual percentage rate (APR) (inclusive of any fees) as well as any advance payments which the Borrower is required to pay; or
- b) The total cost of the Project for the Borrower comprised of monthly payments multiplied by the number of months in the agreement plus any fees [(monthly payments * number of months in the agreement) + fees]. Monthly payments

should be inclusive of, but not limited to, equipment and installation repayment, and any charges for financing, services, maintenance, or oversight of equipment.

For the purposes of this Section, Eligible Savings-Based Payment Agreements will satisfy the requirements set forth in the preceding paragraph with the Finance Provider's provision of a good-faith estimate of the total cost of the project, based on industry-accepted methods and assumptions used to estimate energy savings, due to the fact that monthly payments may be variable under these agreements.

2) Other Provisions

In addition to meeting any requirements for an Eligible Lease, Eligible Loan, Energy Services Agreement, Eligible Savings-Based Payment Agreement, Energy Savings Portfolio Insurance Agreement, or Predevelopment Financing Agreement, the following provisions apply:

- a) Funds to be used for renewable energy, energy efficiency, health and safety and resiliency, with a majority of funds used for renewable energy, decarbonization and efficiency.
- b) Qualifying measures include technology, including electrical and renewable based heating and cooling systems, carbon-free transportation, including electric and hydrogen fuel cars, medium and heavy-duty trucks, and buses that support New York State's decarbonization goals.
- c) Expanded business models, including for energy services that lead to a reduction in Green House Gases, energy efficiency, energy cost savings, clean transportation,

- agriculture, or increase or support resiliency, decarbonization and sustainability
- d) The financing of new construction decarbonization projects is allowed.
- e) Interest rates, if applicable, must be fixed for Residential customers
- f) Floating interest rates, if applicable, allowed for commercial customers, subject to interest-rate caps
- g) Applicants may offer loans with dealer-point buydown, provided it results in a lower net present value (NPV) cost to the borrower based on the term of the loan.

Such determination will be made at NYSERDA's sole discretion

- h) Applicants cannot have prepayment penalties on residential offered financing products.
- i) Maximum residential interest rates shall be the ten-year Treasury plus 750 basis points.
- j) Financing products can include secured or unsecured loans as well as those listed above in the Introduction. Financing products are not limited to those listed and NYSERDA encourages Applicants to present innovative financing structures.
- k) Residential financing products to consumers with FICO® scores less than or equal to 580 shall not include debt products.
- l) Residential products for consumers with FICO® scores less than or equal to 580 shall include a performance guarantee.
- m) Residential financing products shall have a minimum term of five (5) years or greater but shall allow a Borrower the option of a shorter term if Borrower requests.
- n) Applicants can submit new innovative financing products and structures for approval. NYSERDA approval will be contingent on benefit to end users and customers.
- o) Portfolio distribution for Eligible Financing Agreement for:

(i) Residential: A minimum of 35% by dollar amount must be to residential customers with a FICO credit score = < 680 or consumers at or below 80% of AMI, or SMI, whichever is greater or Located in a DAC census tract, as defined under the final rules adopted pursuant to New York State's Climate Leadership and Community Protection Act of 2019 ("CLCPA" or "**Climate Act**").

(ii) Multifamily: A minimum of 35% by dollar amounts must be for Projects in Affordable Multifamily Buildings

- p) The maximum amount of loan loss reserve asset coverage for any Eligible Financing Agreement are as follows:

(i) Residential: Fifty thousand dollars (\$50,000)

(ii) Small Commercial: Five hundred thousand dollars (\$500,000)
Multifamily: One million dollars (\$1,000,000)

(iii) Not-for-Profit: Five hundred thousand dollars (\$500,000)

VIII. Loan Loss Reserve/Credit Enhancement

- 1) NYSERDA will provide ninety percent (90%) asset coverage for Qualifying Eligible Losses, as defined below, subject to sufficient funds in the Finance Provider's Loan Loss Reserve Balance.
- 2) Loan Loss Reserve Account shall be available for the full term of each financing originated by the Finance Provider during the term of the Eligible Financing Agreement.
- 3) For the Building Sector, the Loss Percentages shall be as follows:
 - a) Residential with applicant FICO® score less than or equal to 660: thirty five percent (35%) of the remaining Principal Amount of each such Eligible Financing Agreement.
 - b) Residential with applicant FICO® greater than 660: ten percent (10%) of the remaining Principal Amount of each such Eligible Financing Agreement.
 - c) Small Commercial: the sum of twenty percent (20%) for the first \$50,000 and five percent

- (5%) on the remaining Principal Amount of each such Eligible Financing Agreement.
 - d) Multifamily: the sum of twenty percent (20%) on first \$100,000 and five percent (5%) on the remaining Principal Amount of each such Eligible Financing Agreement.
 - e) Not-for-Profit: the sum of twenty percent (20%) on first \$100,000 and five percent (5%) on the remaining Principal Amount of each such Eligible Financing Agreement.
- 4) For the Clean Transportation Sector, the Loss Percentages, also referred to as Residual Value Reserves (“RVR”) the terms below apply. For Electric School Bus (“ESB”) TRAC leases, Medium and Heavy Duty Trucks a RVR will be provided as follows:
- a) For TRAC leases of up to five years or longer terms, subject to NYSERDA credit review, the ESB Residual value (“RV”) for the terminal lease value can range between [20% - 50%], subject to NYSERDA credit review requirements.
 - b) For TRAC leases the RVR coverage provided by NYSERDA to cover the RV downside (drop in terminal residual value) may range between [10% - 30%], subject to NYSERDA credit review requirements.
 - c) Subject to review, NYSERDA may charge the applicant firm a coverage spread of [2.5%] based on the notional RVR amount provided for RV coverage, subject to NYSERDA credit review requirements.
 - d) Subject to NYSERDA credit, policy and DAC requirements review, the applicant firm will absorb the downside variability of RV for the initial [0% - 10%], subject to NYSERDA credit review requirements.
 - e) For avoidance of doubt, NYSERDA RV coverage will only cover downside RV value - as per the RVR coverage provided, subject to a deductible and the upper limit of the RVR coverage range.

IX. Loan Loss Reserve Award

1) Additions to the Finance Provider’s Loan Loss Reserve Award Amount

NYSERDA shall have no obligation to make additional contributions to the Finance Provider’s Loan Loss Reserve Account other than the initial Loan Loss Reserve Award Amount. NYSERDA shall conduct a review of the Finance Provider’s issuance of Eligible Financing Agreements annually commencing one year from award and may, in its sole discretion and availability of funds, based on the portfolio growth, and/or performance:

- a) Increase the Loan Loss Reserve Award Amount in an amount equal to the initial Loan Loss Reserve Award Amount;
- b) Increase the Loan Loss Reserve Award Amount in an amount less than the initial Loan Loss Reserve Award Amount;
- c) Increase the Loan Loss Reserve Award Amount in an amount greater than the initial Loan Loss Reserve Award Amount to the extent the Finance Provider has provided market rationale for such award; or,
- d) Reduce the Loan Loss Reserve Award Amount if the amount of the Loan Loss Reserve Balance is below fifty percent (50%) of the initial Loan Loss Reserve Award Amount at the one-year mark. Finance Provider can request an increase to the initial Loan Loss Reserve Award Amount when eighty (80%) percent of the initial Loan Loss Reserve Award Amount

has been allocated to the Loan Loss Reserve Account, subject to availability of funds.

X. Loan Loss Reserve

1) Loan Loss Reserve Account

NYSERDA agrees to maintain available funds and establish a Loan Loss Reserve Account for each Target Building Sector on NYSERDA's balance sheet for the benefit of the Finance Provider. The Finance Provider's Loan Loss Reserve Account will be adjusted and administered as provided in this Program Opportunity Notice and shall be solely for the benefit of Finance Provider, or any assignee as may be requested and approved in writing by NYSERDA.

2) Loan Loss Reserve Balance

The Finance Provider shall report in the Monthly Report the amount of the Loan Loss Reserve Balance which shall be calculated based on the defined percentage, subject to the Target Building Sector allocation of the Loan Loss Reserve amount, of the original principal amount of the Eligible Financing Agreements originated less any reductions as set forth below. NYSERDA shall review the reported Loan Loss Reserve Balance and within fifteen

(15) days after receiving the Monthly Report notify the Finance Provider of any comments or required updates.

3) Reductions to Finance Provider's Loan Loss Reserve Balance

a) Losses paid to the Finance Provider

The Loan Loss Reserve Balance shall be reduced by any and all amounts paid by NYSERDA to the Finance Provider for Qualifying Eligible Losses pursuant to [Section XII](#).

b) Repayment

Whenever an Eligible Financing Agreement is repaid in full at maturity or upon early repayment in full, the Finance Provider shall report such repayment in the Monthly Report, with a result in reduction of the Loan Loss Reserve Balance, as described above.

XI. Administration of the Loan Loss Reserve

1) Administration

NYSERDA shall administer the Loan Loss Reserve Account in accordance with the terms of this Program Opportunity Notice. NYSERDA shall account for the Loan Loss Reserve Balance on its balance sheet and on behalf of the Finance Provider, and any successors or assignees as may be requested and approved in writing and shall maintain appropriate records. The Loan Loss Reserve Balance shall be used solely for the purposes provided in this Program Opportunity Notice. The Finance Provider shall report to NYSERDA as part of its Monthly Report the current Loan Loss Reserve Balance.

2) Payment upon Suspension of Operations

If NYSERDA suspends all business operations for a period of 180 days or more, then if NYSERDA so elects or if the Finance Provider so requests, NYSERDA will make a "Final Payment" in cash to the Finance Provider. That Final Payment will constitute a full and final satisfaction of all further obligations of NYSERDA to the Finance Provider under this Program Opportunity Notice. The "Final Payment" shall be equal to the Loan Loss Reserve Balance after all adjustments required by this Program Opportunity Notice have been made. Following the Final Payment, the Finance Provider shall continue to track the Eligible Financing Agreements and the use of the Final Payment with respect to such Eligible Financing Agreements. When the Finance Provider's last Eligible Financing Agreement has either been repaid or the Finance Provider has recovered its Qualifying Eligible Losses, then the Finance Provider shall refund to NYSERDA (or its successors or assigns) any remaining amount of the Final Payment that was not used to pay Qualifying Eligible Losses.

XII. Reporting Requirements

1) Monthly Report

Within ten business days after the end of each month, the Finance Provider shall provide to NYSERDA an itemized report as specified in Attachment D (the "Monthly Report"). The Monthly Report shall include:

a) New Eligible Financing Agreements

An itemized report of new Eligible Financing Agreements issued during that month, including the origination date, the name of the Borrower(s), amount of financing, interest rate, amount of monthly payments, term and if the Project is a Qualified Energy Efficiency Improvement or Renewable Energy System.

b) Confirmation of Eligibility

A certification by Finance Provider that to the Finance Provider's knowledge that the new financing agreements are all Eligible Financing Agreements under the criteria included in [Section VII](#).

c) Portfolio Status

A cumulative summary report for all outstanding Eligible Financing Agreements, including original balance, current balance, payments received and information about any delinquent payments.

d) Sold, Transferred or Assigned

A cumulative summary report on all Eligible Financing Agreements that were sold, transferred, or assigned to a third party, the date of such sale, transfer, or assignment, the name of the purchaser, transferee, or assignee and whether the transaction was in whole or in part.

2) Review

NYSERDA shall have the right to review documentation for any Eligible Financing Agreement included in a Monthly Report.

3) Confidentiality

NYSERDA will use information provided in each Monthly Report and other information provided by Finance Provider for program management and evaluation purposes only, and will require all staff, affiliates, agents, and designees to treat the information as confidential unless otherwise required by law. For all other uses, NYSERDA will only release information in an anonymous and aggregated form – that is, by removing all personally identifying information.

XIII. Recovery from the Loan Loss Reserve Balance

1) Loss Recovery

Finance Provider shall be entitled to payment from the Finance Provider's Loan Loss Reserve Balance for losses. The Finance Provider may claim from the Finance Provider's Loan Loss Reserve Balance as unrecovered losses ninety percent (90%) of the Qualifying Eligible Loss. As a result, the Finance Provider shall retain responsibility for ten percent (10%) of each Qualifying Eligible Loss.

2) Claim for Recovery from the Finance Provider's Loan Loss Reserve Balance

To claim a Qualifying Eligible Loss and receive reimbursement from the Loan Loss Reserve Balance, the Finance Provider shall provide to NYSERDA (a) a written schedule itemizing each Qualifying Eligible Loss claimed and certifying that it is for an Eligible Financing Agreement that is at least 120 day past due, and (b) a certification that the Finance Provider has exercised commercial reasonable efforts to obtain recovery against the Borrower in the form noted in Attachment C.

3) Loss Claim

Whenever Finance Provider makes a claim consistent with the terms of this Program Opportunity Notice for a Qualifying Eligible Loss from the Finance Provider's Loan Loss Reserve Balance as provided above, the Finance Provider shall be entitled to payment of the Qualifying Eligible Loss up to but not in excess of the amount of the Finance Provider's Loan Loss Reserve Balance at the time that such claim for an Qualifying Eligible Loss is presented to NYSERDA.

4) Timing of Payment

If the Finance Provider makes a claim consistent with the terms of this Program Opportunity Notice for a Qualifying Eligible Loss from the Finance Provider's Loan Loss Reserve Balance, NYSERDA shall make payment to the Finance Provider to the extent provided above, no later than thirty (30) days following the end of the month in which the claim is made.

5) Payments Limited to Loan Loss Reserve Balance

The aggregate liability of NYSERDA to the Finance Provider shall not under any circumstances exceed the Finance Provider's Loan Loss Reserve Balance. The Finance Provider does not have any additional recourse against NYSERDA for Qualifying Eligible Losses in excess of the Finance Provider's Loan Loss Reserve Balance at the time. The Finance Provider acknowledges and agrees that its losses on Eligible Financing Agreements may exceed the funds available in the Finance Provider's Loan Loss Reserve Balance. This Program Opportunity Notice is not a guarantee of the full amount of Eligible Financing Agreements. Except as explicitly provided in this Program Opportunity Notice, NYSERDA is under no obligation to further contribute to or supplement the Finance Provider's Loan Loss Reserve Balance.

6) Subsequent Collection Activities

The Finance Provider agrees to use its commercially reasonable efforts to collect any delinquent Eligible Financing Agreement, even after it has collected from the Finance Provider's Loan Loss Reserve Balance with respect to such Eligible Financing Agreement. For any recovery on an Eligible Financing Agreement net of expenses, the Finance Provider shall retain 10% of such net recovery and 90% of such net recovery shall be paid to NYSERDA.

XIV. Sale and Transfer of Eligible Financings

1) A Finance Provider may sell, transfer, or assign an Eligible Financing Agreement or the associated repayments of an Eligible Financing Agreement, in whole or in part, or a portfolio of Eligible Financing Agreements, in whole or in part, provided that it shall remain responsible for its obligations to NYSERDA hereunder, including applicable reporting requirements with respect to Covered Agreements. Any such sale, transfer or assignment must be reported to NYSERDA in accordance with [Section XII\(1\)\(d\)](#) and requires NYSERDA written approval. The Finance Provider must notify the buyer, transferee or assignee that the Covered Agreements are partially protected by, and are subject to the terms and conditions of, a Loan Loss Reserve from NYSERDA under the Program.

XV. Awards

Applicants that apply and meet the qualification criteria set forth in this Program Opportunity Notice shall be notified by NYSERDA of the acceptance of their application and participation in the program.

XVI. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your application. Review should include whether it is critical for evaluating the application, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information

NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the Applicant wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement agreements.

Information on the availability of New York subcontractors and suppliers is available from: Empire

State Development
Division for Small Business 625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from: Empire

State Development
Division for Small Business 625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Applicants are required to answer questions during application submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the Applicant has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contacting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making one or multiple award(s) under this solicitation. NYSERDA

anticipates a contract duration which will extend through the awardee's term of its Financing Portfolio. If terminated, any reserve funding on financings originated by awardee through the effective date of termination will remain in effect until such financings are paid in full or reported as unrecoverable losses. NYSERDA may request additional data or material to support applications. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA expects to notify Applicants in approximately four (4) weeks from the application submission whether your firm will receive an award.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing an application, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all applications received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject applications. NYSERDA reserves the right to disqualify applicants based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The applicant shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When an applicant is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the awardee may be subject to penalties for violation of any law which may apply in the particular circumstances. Applicants must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The applicant shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the applicant or former officers and employees of NYSERDA, in connection with applicant's rendering services. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The applicant must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics

Requirements”). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a “lifetime bar” from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person’s engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Low Carbon Pathways for Multifamily Buildings

Program Opportunity Notice (PON) 4701

(Up to \$33.7M available)

The New York State Energy Research and Development Authority (NYSERDA) reserves the right to extend and/or add funding to the solicitation should other program funding sources become available.

**Applications accepted on a first-come, first-serve basis dependent on funding availability until
October 31, 2025, by 3:00 PM Eastern Time.**

Program Summary: This program supports multifamily building owners and property managers prepare their buildings for the implementation of low carbon technologies and electrification. It does this by providing funding for the installation of low carbon measure package. The goal of this program is to help multifamily building owners and managers take a step-by-step approach towards achieving deep carbon reductions and electrification over time by leveraging existing capital improvement points such as equipment end of life, tenant turnover, and local law compliance. Under this solicitation, eligible building owners and property managers can apply for incentives to complete one or more low carbon or electrification measures, including building envelope improvements, appliance electrification, heating/cooling, and domestic hot water packages.

In addition, NYSERDA is launching a Multifamily Low- to Moderate-Income (LMI) Induction Stove Pilot (“the Pilot”) to install induction stoves in apartment buildings serving LMI residents. Buildings seeking to participate in the Pilot must submit an application through the Low Carbon Pathway program. Please refer to Section III.C. of this document for more information on this Pilot.

Application Submission: All application and program materials should be emailed to MFLowCarbonPathways@nyserda.ny.gov. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 25MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the applicant’s entity name in the title of the document. NYSERDA will also accept applications by mail or hand-delivery if online submission is not possible.

Program Questions: Applicants, Contractors or Consultants should contact MFLowCarbonPathways@nyserda.ny.gov with questions. No communication intended to influence this procurement is permitted except by contacting the Designated Contact at MFLowCarbonPathways@nyserda.ny.gov. All contractual questions should be directed to James Cowman at jim.solicitations@nyserda.ny.gov, (518) 862-1090 ext. 3652, or to MFLowCarbonPathways@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer’s behalf) to influence the procurement: (1) may result in a proposer being deemed a non-responsible offeror, and (2) may result in the proposer not being awarded a contract.

*** All applications must be received by 3pm Eastern Time on October 31, 2025. Late or faxed applications will not be accepted.** Incomplete applications may be subject to disqualification. It is the proposer’s responsibility to ensure that all pages have been completed/included in the application. If changes are made to this solicitation, notification will be posted on the “Current Opportunities” section of NYSERDA’s website <https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>.

I. Introduction

The Multifamily Low Carbon Pathways Program offers incentives to existing multifamily building owners and portfolio managers (Applicant) in New York State. The incentive measure packages are designed such that they can be implemented independently of each other, while taking into consideration health and safety concerns and future retrofits.

Applicants can choose to implement one or more incentive measure packages concurrently or sequentially, depending on their buildings' needs. The packages break down a whole-building retrofit into smaller measure packages that can be implemented over time, leveraging existing building capital planning cycles.

Glossary of Terms

Term	Definition
Applicant/Participant	An Applicant (sometimes referred to as a Participant) could be the owner, a developer, a management company, or other association of a building, or complex of buildings, that initiated a contract with the Service Provider to enroll their building(s) in the Low Carbon Pathway Program. The Applicant is the default payee of the Low Carbon Pathways incentives.
Applicant/Participant Representative	Representative of the Applicant who is authorized, in writing, to act on behalf of the Applicant.
Contractor/Consultant	Contractors or Consultants are vetted and approved NYSERDA FlexTech Consultants or NYSERDA Multifamily Residential Energy Pathway (MREP) Participating Contractors who will work with the Applicant to guide their project through the Program. The Service Provider is the entity responsible for submitting all documentation to the Program and confirming all program minimum requirements are met.
Project	Consists of all buildings and measures included in a Participant's approved application.

II. Program Guidelines

A. Eligibility Requirements

The eligibility requirements listed in this section are not comprehensive. Special circumstances may be reviewed on a case-by-case basis. Contact NYSERDA at MFLowCarbonPathways@nyserda.ny.gov for a review.

Eligible Buildings

- Existing New York State multifamily buildings¹ that are New York State electricity customers including but not limited to those, who pay into the System Benefits Charge (SBC)/NYSERDA Clean Energy Fund on their electric utility bill.²
- New facilities or those that have undergone substantial renovations must be in operation for more than one year prior to submission of the Program Application to be eligible for funding under this solicitation.
- Affordable projects must meet affordability criteria detailed in the [Affordable Multifamily Building Guidelines](#) in order to be eligible for affordable incentive amount.

Eligible Consultants/Contractors

Participants are required to work with a [NYSERDA FlexTech Consultant](#) or a [Multifamily Residential Energy Pathway](#) Participating Contractor.

Ineligible Project Types

The following project types are not eligible for the Program:

- New construction projects
- Substantial renovations (gut rehabs), as defined by projects with the following characteristics:
 - Change of use and reconstruction of an existing building or space within; or
 - Construction work of a nature requiring that the building or space within be out of service for at least 30 consecutive days, with the exception of garden style buildings; or
 - Reconstruction of a vacant structure or space within.
- Projects that do not meet a minimum unit occupancy rate of 50% (rounded down) for all properties within the application³.
- Projects that involve tenant displacement during construction and do not meet a minimum unit occupancy rate of 50%.
- Buildings with non-centralized heating and cooling systems that are adopting a unit-by-unit construction approach without a signed statement explaining how added utility costs to the tenants will be avoided.
- Projects that cannot commit to submitting the final milestone documentation to the program by October 31, 2027.

Additional eligibility requirements for the Multifamily LMI Induction Stove Pilot are described under section III.C. of this document.

¹ A multifamily building is defined as a building that has five or more residential units, and where the predominant building use type is for residential purposes. Buildings may contain nonresidential commercial space if that space does not consist of more than 50% of the gross heated square footage of the entire building.

² Commercial facilities, such as motels/hotels, group homes, dormitories, shelters, monasteries, nunneries, assisted living facilities, and nursing homes are not eligible for the Program.

³ An exception may be made for affordable housing on a case-by-case basis

B. Measure Package and Incentives Overview

- Participant must choose at least one of the low carbon measure packages to install as listed in *Table 1* on the next page.
- Participant can choose to install more than one measure package in a project and be eligible to receive additional corresponding incentives.
- **Required Measures:** To receive the incentives for each package, the Participant is required to install all Required Measures and follow the minimum installation standards in **Attachment A: Measure Package Requirement Details**.
- **Recommended Measures:** In addition to the Required Measures, Participant can choose to install one or more of the Recommended Measures listed within the corresponding measure package for additional bonus incentives. To receive the bonus incentive(s), a Participant is required to follow the minimum installation standards for the corresponding Recommended Measures as outlined in **Attachment A: Measure Package Requirement Details**.
- **Previously Installed Measures:** Measures installed and operating prior to entering the program cannot be incentivized retroactively. Only new measures are eligible for program incentives. Only new measures can be included in the project workscope and count towards the total project cost.

Incentive Cap⁴

- Incentives will be capped at **\$1,000,000** for each LMI project and **\$750,000** for each market rate project.
- The corporate parent entity's incentives for their portfolio are capped at \$3,000,000.
- In addition to the project and corporate parent entity incentive Caps, NYSERDA requires a minimum of a 50% cost share contribution from the Applicant towards the total costs of eligible measures for market rate projects and a minimum of a 25% cost share contribution from the Applicant towards the total costs of eligible measures for LMI projects for all applications received on or before June 30, 2025.
 - For applications received on or after July 1, 2025, the Applicant's minimum cost share contribution requirement for market rate projects will increase from 50% to 65%. There will be no changes to the cost share requirements for LMI projects.
 - For the purposes of calculating the cost share, the total project cost includes the total cost of measure (including materials and labor) as noted in their respective workscope tools and invoice documentation. Consulting fees, including construction management, and other soft costs are not included in the total project cost for the purposes of calculating the incentive cap.
- In instances where projects are layering Low Carbon Pathways incentives with additional incentives available through other offerings, Low Carbon Pathways incentives may be adjusted to ensure that the cost share requirements above are met.
 - To ensure compliance with this requirement, a copy of the executed award letter(s) from all other offerings from which the project is receiving funding must be submitted to NYSERDA before any LCP incentives will be approved and paid. Total incentive

⁴ NYSERDA incentive caps do not apply to projects participating in the Induction Stove Pilot. The Pilot will cap incentives at the total cost of the induction stove, ancillary electrical improvements, cookware and other approved but associated costs.

amounts received from other programs and NYSERDA must not exceed total project cost.

Incentive Recipient

- Applicants not participating in the Pilot can designate whether incentives should be provided to Participant, a consultant, or other entity.
- Applicants participating in the Pilot must designate the Pilot's implementation provider, the Association for Energy Affordability (AEA), as the incentive payee.

Table 1: Incentives and Requirements

Measure Package	Measure Tier ^a	Required Measure	Required Upgrade Incentives ^b	Add-On Incentives ^c
Envelope	Roof - Tier 1	U-Value Target of ≤ 0.025	\$250 per dwelling unit	Air sealing: \$50 per dwelling unit Ventilation: \$750 per dwelling unit Bonus \$250/dwelling unit if this is first package implemented and none of the other required measure packages described in this table have been implemented
	Roof - Tier 2	U-Value Target of ≤ 0.02	\$500 per dwelling unit	
	Wall - Tier 1	U-Value Target of ≤ 0.05	\$750 per dwelling unit	Air sealing: \$50 per dwelling unit Ventilation: \$750 per dwelling unit Bonus \$1,000/dwelling unit if this is first package implemented and none of the other required measure packages described in this table have been implemented
	Wall - Tier 2	U-Value Target of ≤ 0.03	\$1,500 per dwelling unit	
	Window - Tier 2	U-Value Target of ≤ 0.27	\$1,250 per dwelling unit	Air sealing: \$50 per dwelling unit Ventilation: \$750 per dwelling unit Bonus \$500/dwelling unit if this is first package implemented and none of the other required measure packages described in this table have been implemented Unit-by-unit construction option assessed on a project basis.

Appliances	Induction Stoves		\$700 per dwelling unit ⁵	Unit-by-unit construction option assessed on a project basis.
	Heat Pump Dryers	Must be ENERGY STAR	\$500 per dwelling unit	
Heating & Cooling	Partial Electrification - Tier 1		\$2,000 per dwelling unit	Air sealing: \$50 per dwelling unit Unit-by-unit construction option assessed on a project basis. Ventilation: \$750 per dwelling unit
	Full Electrification - Tier 2		\$4,000 per dwelling unit	
Domestic Hot Water	Partial Electrification - Tier 1		\$750 per dwelling unit	Unit-by-unit construction option assessed on a project basis.
	Full Electrification - Tier 2		\$1,500 per dwelling unit	

- a. Tiers 1 and 2 have different minimum U-values (a measure of insulation efficiency) for upgrade packages, with Tier 2 requiring lower U-values and greater efficiency.
- b. All required upgrades within a package must be implemented and adhere to measurement & verification and quality control protocols to receive the required upgrade incentives for that package.
- c. Add-on incentives are available when implementing recommended upgrades along with all required upgrades.

⁵ Pilot projects will receive a \$700 incentive from the LCP program, and NYSERDA will cover, in whole, the remainder of the ancillary electrical improvements, compatible cookware, and remaining stove costs from Pilot funding. Combined incentives from LCP and the Pilot will not exceed the total cost of the induction stove, ancillary electrical improvements, and compatible cookware. Refer to section III.C. for more information.

C. Project Milestones and Incentives Payment Schedule

The Applicant, or their assigned payee, will receive the eligible incentives for their project after each milestone has been approved by NYSERDA. Incentive payments at each milestone are a set percentage of the total approved incentive. The incentive schedule for each measure package is shown in *Table 2* below. For more details about the requirements of each milestone, please refer to **Attachment A: Measure Package Requirement Details**.

Table 2: Project Milestones and Incentive Payment Schedule

	Project Milestones and Incentives Payment Schedule		
Measure Packages	Pre-Construction <i>(Capped at \$75,000 for each package. Remaining incentive amount will be reallocated to later payment milestones)</i>	Partial Installation <i>(Between 30-50% of measure installation; Required for Envelope Package – Wall upgrades only; Optional for all other packages)</i>	Construction Complete
Envelope Package (roof, wall/EFIS, windows)	10%	40%	50%
Appliance Electrification Package	10%	40%	50%
Heating & Cooling Package	10%	40%	50%
DHW Package	10%	40%	50%
Induction Stove Pilot	10%	NA	90%
Bonus measures (air sealing, ventilation upgrades)	NA	NA	100%

III. Application Requirements and Program Processes

A. Application Materials

Applicants should review **Attachment D: Terms and Conditions** and submit the following documents as part of a complete application to MFLowCarbonPathways@nyserda.ny.gov:

- Attachment B: Low Carbon Pathways Application Form** – Signed document containing basic information about Applicant, Applicant's portfolio, participant eligibility, the proposed building, and proposed measure package. By signing this form, the Applicant agrees to the Terms and Conditions in **Attachment D**.
- Attachment C: Letter of Commitment** - Confirms the Applicant's commitment to consider replicating a successful project in other buildings within their portfolio or sharing project results with peers to encourage others' ability to take on similar projects.
- W-9 Form – Applicant and payee's W-9 (if the payee is not the same as the applicant)**

A consultant may assist in the completion of the documents. All applications will be reviewed on a first-come, first-served basis dependent on funding availability.

B. Project Timeline and Milestones

Table 3 below provides an overview of the project milestones for each project. Please refer to **Attachment A: Measure Package Requirement Details** for more information on deliverables required and NYSERDA reviews.

Table 3: Project Timeline and Milestone Overview

Application Submittal	Kickoff Meeting	Project Milestones ⁶		
		(1) Pre-Construction Deliverables ⁷	(2) Partial Installation Deliverables ⁸	(3) Construction Complete Deliverables
Will be reviewed on first-come, first-served basis	Scheduled upon receipt of application	Due 90 days from receipt of NYSERDA award letter	Upon installation of 30%-50% of measure package	Due 2 years from receipt of NYSERDA award letter
		NYSERDA reviews to confirm workscope eligibility	NYSERDA conducts field inspection	NYSERDA conducts final field inspection

Application Submittal:

- Applications should be submitted only when the project scope is known, and the project is ready to schedule the kickoff call.

Kickoff Meeting:

- Upon receipt of a complete application, NYSERDA will schedule a project kickoff meeting with NYSERDA, the Applicant or Applicant representative, and the Service Provider to review the scope of work and portfolio information, review roles and responsibilities, and go over milestone deliverables and due dates. After the kickoff meeting, NYSERDA will confirm eligibility, issue an award letter, and the project can proceed into pre-construction.

Quarterly Check-in Meetings

- At minimum, NYSERDA will schedule quarterly check-in calls or meetings with the Applicant or Applicant representative and the Service Provider to get a progress update and discuss any questions.

Project Milestones and Deliverables:

- Each milestone payment is associated with deliverables that will be used to ensure measures are adhering to minimum standards, as detailed in **Attachment A: Measure Package Requirement Details**. Milestone payment will be provided upon verification of associated deliverables and/or inspections.
 - Partial Installation:** NYSERDA will review the deliverables and, if necessary, schedule a

⁶ Any revisions required after NYSERDA's review of any of the milestone packages must be completed and returned to NYSERDA within 30-days from receiving review comments.

⁷ Milestone 1 must be submitted prior to construction start and any work started prior to this milestone approval proceeding at risk.

⁸ Required for wall insulation, optional for other measure packages. Please refer to **Attachment A: Measure Package Requirement Details** for more information.

site inspection. NYSERDA reserves the right to conduct a field inspection if it is deemed necessary.

- **Construction complete:** NYSERDA will review the deliverables and, if complete, schedule a site inspection. On a case-by-case basis, if the Provider submits quality inspection documentation, NYSERDA will waive the 100% field inspection and will instead conduct a desk review. The building owner can request a final field inspection if they choose.
- Deliverables will need to be submitted based on the guidance in Table 3 above. Projects that do not meet these deadlines may be terminated from the Program and unpaid incentives forfeited. Deadline extension requests must be received by NYSERDA from the Applicant, Applicant Representative, or the Service Provider a minimum of one day prior to the deadline date and must be received in writing. Extension request approvals will be provided in writing by NYSERDA.
- Participating Contractor performance is tracked to determine rate of compliance with program deadlines. NYSERDA expects projects to meet the following guidelines for deliverables. The Participating Contractor is responsible for ensuring their projects move through milestones 1, 2, and 3 in a timely manner to meet the two-year construction completion deadline.
- All Milestone 3 – Construction Complete submittals are due no later than **October 31st, 2027** to allow time for inspections, review, and subsequent approval of Milestone 3 no later than **December 31st, 2027**.

C. Additional Requirements for the LMI Multifamily Induction Stove Pilot

The Pilot supports the installation of induction stoves in apartment buildings serving Low and Moderate Income (LMI) residents. This pilot will be the first dedicated programmatic effort by the State to support cooking electrification projects in multifamily LMI housing. It is intended to generate case studies and success stories and to collect data regarding project economics, and opportunities for reducing costs of installs. The pilot will measure project duration and level of disruption to residents, technical challenges with the building stock, resident perceptions of and satisfaction with their new induction stoves, and energy cost savings.

The Pilot will be limited to serving projects in New York City and Westchester County. The Pilot implementation will be supported by the Association for Energy Affordability (AEA), a Service Provider that was competitively selected under a separate solicitation. In addition to the LCP incentives available for induction stoves, Pilot funding will be provided by NYSERDA through AEA to cover the full installed costs of induction stoves, induction-compatible cookware, and ancillary electrical improvements and other stove installation costs. NYSERDA funding, including LCP incentives and additional pilot funding, cannot exceed the installed cost of the new induction stoves, ancillary electrical improvements, other approved stove installation costs, and cookware.

Buildings seeking to participate in this Pilot must apply through the LCP program. To ensure the rapid deployment of the Pilot, the Pilot will be targeting projects that are looking to install induction stoves as a standalone measure. In their LCP application, Pilot participants must check the box indicating they are applying to the Pilot, must identify AEA as their Service Provider, and must designate AEA as the payment assignee (payee) of all incentive payments. In addition to furnishing and installing the equipment and cookware, AEA will provide trainings for residents in how to operate the new stoves.

The Pilot is limited in scale and is expected to serve no more than 400 dwelling units and no more than twenty (20) buildings. Projects that meet the eligibility requirements will be accepted on a first-come, first-served basis until funding is exhausted. NYSERDA will create a waitlist for eligible applications that

cannot be guaranteed funding at the time of application. Waitlisted projects will be informed that their application is on hold pending funding availability. If a waitlisted project's estimated incentive amount exceeds the remaining budget in the Pilot, NYSERDA may offer to serve that project contingent on the project's agreeing to pay a cost share or to reducing its scope. If that project withdraws, NYSERDA will go to the next waitlisted project.

Buildings seeking to participate in the Induction Stove Pilot must meet the following requirements:

- Must be located in New York City or Westchester County
- Must qualify as Low-to-Moderate Income housing using LCP's definition and accepted documentation.
- Must install induction stoves as a standalone measure.
- Must select the Appliance Electrification measure and the Induction Stove Pilot bonus ONLY in their LCP application.
- Must apply to replace 100% of its existing stoves with induction stoves or must request an exemption in writing. NYSERDA shall grant such exemption at its sole discretion.
- Projects with existing electric stoves will be considered on a case-by-case basis.
- Projects whose electrical scope of work requires a service upgrade from the utility will be considered on a case-by-case basis.
- Projects whose electrical upgrade cost estimate exceeds \$10,000 per unit will be considered on a case-by-case basis.

Request for Proposal (RFP) 4815 Outside Counsel Services

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Proposals for **Clean Energy Labor Law** Due: January 14, 2025 by 3:00 p.m.
Eastern Time*

Proposals for **Federal Energy Law** Due: February 26, 2025 by 3:00 p.m.
Eastern Time*

The New York State Energy Research and Development Authority (NYSERDA) invites proposals from attorneys and law firms interested in providing outside legal services related to two new categories of legal issues, Clean Energy Labor Law and Federal Energy Law, described in more detail below.

These categories supplement, and do not replace, the categories and subcategories under which proposals were solicited and awarded previously in RFP 4815. Law firms currently contracted with NYSERDA under the first issuance of RFP 4815 are welcome to apply to this RFP as well. NYSERDA reserves the right to assign work to (i) proposers previously awarded in RFP 4815 even if the work potentially overlaps with the categories below, and (ii) proposers awarded in the categories below even if the work potential overlaps with any category or subcategory previously awarded in RFP 4815. Accordingly, by participating in this RFP all proposers acknowledge that there is no guarantee that they will be awarded work even if awarded.

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls,xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](#) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

No communication intended to influence this procurement is permitted except by contacting Alex Stein (Designated Contact) at (518) 862-1090, ext. 3135 or Janice Dean (Designated Contact) at (518) 862-1090, ext. 3117. If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at nancysolicitations@nyserda.ny.gov or (518) 862-1090, ext. 3335. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist

or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

NYSERDA is a public benefit corporation of the State of New York created and operating under the provisions of Public Authorities Law, §§1850 et. seq. (the "New York State Energy Research and Development Authority Act" or "Act"). NYSERDA offers objective information and analysis; innovative programs, including energy efficiency, renewable energy, and energy research and development; technical expertise; and funding to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels.

II. Scope of Services

NYSERDA requests proposals from attorneys or law firms interested in providing outside legal services related to the following categories. As described below under Qualifications, proposers should identify the specific category(ies) for which they seek qualification.

The categories below supplement, and do not replace, the categories and subcategories under which proposals were solicited and awarded previously in RFP 4815.

(11) Clean Energy Labor Law. Labor law affecting large-scale clean energy development (including generation, storage and supply chain facilities), including but not limited to advising on matters of prevailing wage and review of project labor agreements; compliance with New York State Labor Law Section 224-d and New York State Public Service Law Section 66-R and their application in NYSERDA's contracts with clean energy generation, storage and supply chain developers; and interactions between New York and federal labor laws related to clean energy development.

(12) Federal Energy Law. Federal law applicable to New York State's actions that affect energy markets, including but not limited to the interaction of New York State's clean energy standard, bulk energy storage program and similar programs with the U.S. Federal Power Act, Federal Energy Regulatory Commission (FERC) regulations, FERC-regulated tariffs such as those issued by the New York

Independent System Operator and related legal advice regarding the structure and implementation of State clean energy programs.

Attorneys and firms selected will be expected to act as outside counsel for NYSERDA for a period of approximately two years, expiring on December 31, 2026 (i.e., at the same time as existing contracts awarded under RFP 4815 expire). It is anticipated that the initial contract period will begin on or about March 31, 2025 or sooner if contractual negotiations allow. Additionally, firms qualified in any particular programmatic or operational category may be called upon to assist with legal work outside of that particular program if a NYSERDA need arises within that firm's qualifications.

Services of attorneys and firms selected would potentially include, but need not be limited to:

- (a) Negotiating, preparing, reviewing, and delivering any documents related to bilateral or multilateral agreements between NYSERDA and third parties.
- (b) Rendering an objective opinion with respect to matters of law that arise in the administration of NYSERDA's programs.
- (c) Preparing, reviewing, or advising NYSERDA with regard to resolutions, notices, and other documents or procedures required in connection with State and local laws and procedures.
- (d) Drafting, analyzing, advising, or commenting on federal and state legislation, regulations and rules, NYSERDA guidelines, and other matters.
- (e) Participating in meetings with NYSERDA counsel and staff, NYSERDA's Members (board of directors) and other parties, as necessary or appropriate.
- (f) Providing any other legal services, advice, or opinions relating to NYSERDA's programs, as requested.

Assignment of work under this solicitation

NYSERDA may assign work up to \$50,000 to any proposer in any category. For work above \$50,000, NYSERDA may assign to the top-ranked proposer in any given category. For work assigned to the top-ranked proposer in any category, the attorney or firm retains the ability to decline the assignment for conflict of interest or limitations on resources that would prohibit the engagement, after which point NYSERDA may assign the work to the second-ranked proposer in the category or issue a mini-bid. Additionally, NYSERDA reserves the right to assign any work by mini bid.

III. Proposal Requirements

A. Qualifications

Proposer should:

1. Describe its experience in general representation of public entities, including New York State public benefit corporations or public authorities.

2. Describe any particular category above in which the proposer seeks to qualify, and describe the nature of the proposer's expertise in this area(s) of practice. Provide a brief description of services the proposer expects to provide to NYSERDA. Indicate whether the proposer is prepared to render the services enumerated in this RFP using its own resources or whether some services will be subcontracted. The description should emphasize particular services to be subcontracted, if any.
3. Be available to accommodate the legal needs of NYSERDA. Proposer must demonstrate that primary and reasonably qualified backup and support attorneys are available as needed, and that the proposer has staff capabilities to perform the work on a timely basis. Please identify the nature of resources available to support this effort (i.e., solo practitioner, small firm, large firm, subcontractor services available where necessary, etc.).
4. Provide the names of the partners, associates, and paralegals who would be assigned to NYSERDA's account and their experience in performing services similar to the services requested in this RFP. Include resumes for all employees expected to be involved on this account. Include a description of each employee's function in the firm, title, office address, and number of years of service with the firm and other relevant past experience. Describe the percentage of the firm's time commitment to this account that each person would be anticipated to provide. Describe the availability of the lead person(s) for consultation with NYSERDA, including but not limited to their ability to meet with NYSERDA staff in Albany, New York. (Resumes may be included as an appendix.)
5. Discuss fully any conflicts of interest, actual or perceived, that might arise in connection with the proposing attorney(s) or firm's involvement with NYSERDA. If conflicts do or might exist, describe how the firm would resolve them. State whether the proposing firm represents any energy utility, public authority, or independent power producer that operates in New York State. If so, state the name of each such client and the nature of representation.
6. Identify any litigation or administrative proceedings to which the proposing firm or attorney is a party and which would either materially impair the proposer's ability to perform the services enumerated herein and for which this RFP was issued or, if decided in an adverse manner, materially adversely affect the financial condition of the firm.
7. Identify the employees discussed in item 4 above that have been the subject of any investigation or disciplinary action by the New York State Commission on Ethics and Lobbying in Government (COELIG) or its predecessors, or another arm of the State. Describe briefly how any matter was resolved or whether it remains unresolved. Proposers must certify that attorneys working on this account have never been reprimanded, censured, or suspended by the Supreme Court for ethics violations.
8. Indicate the address of the office through which NYSERDA's account will be primarily serviced, and any anticipated travel or other such costs.
9. Provide any other information you believe would make the proposing law firm's representation of NYSERDA superior to other firms' representation.
10. Provide an explanation of any exceptions the proposers would request to the

Sample Agreement.

11. Provide three client references, including name, address, e-mail and telephone number.
12. Whether the proposer is a NYS-certified Minority- or Women-Owned Business Enterprise.

NYSERDA will not be assigning MWBE or SDVOB goals to the contracts resulting from this RFP. However, NYSERDA reserves the right to invoke relevant provisions of 5 NYCRR Part 143.

B. Cost

1. State the rates at which the services of assigned personnel would be provided to NYSERDA beginning in fiscal year 2024 (*i.e.* Date of Award to March 1, 2025 and for NYSERDA fiscal years (April 1 through March 31) 2025 and 2026, and how services would be billed. Increases, if any, for those years may be stated in terms of percentages above the rates for the fiscal year ending March 31, 2025, and are expected to escalate no more than 2% per year for the duration of the engagement (please see the Sample Agreement's "Rates Annual Escalation" section for more information). Include:
 - For each person whose resume is provided above, their normal hourly rate and the hourly rate at which NYSERDA would be charged.
 - For each applicable category of support staff or other assigned staff, the normal hourly rate and the hourly rate the proposer would charge NYSERDA, if billed separately.
 - Any reduced rates or fees charged other State or local governments in New York for these types of services.
 - A statement of the basis on which any other firm expenses related to services provided to NYSERDA would be billed, if other than cost.
 - A statement of any special considerations with respect to billing or payment of fees and expenses that your firm offers and that you believe would differentiate you from other proposers and make your firm's services more cost effective for NYSERDA.
 - A statement whether proposer would be willing to agree to caps on fees on an issue by issue basis.

- C. Agreement. Proposers should provide the retainer agreement their firm expects to use if selected by NYSERDA under this RFP, and should review the Sample Agreement attached hereto as Exhibit A for the inclusion of its terms in any final contract. The awarded proposer's retainer agreement will serve as the basis for negotiations between the parties and, when finalized, will be included as an Exhibit A to the final agreement (see Sample Agreement, attached hereto as Attachment A).

D. Format

Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. The proposal must be in the following format:

Proposals must provide all information requested in Section III above. The proposal should concisely present the information needed to fully address the Proposal Evaluation criteria in Section IV. Proposals that fail to follow the format guidelines provided in this section may be rejected as non-responsive. A proposer who believes proprietary information must be submitted to provide an adequate proposal must comply with the Section V instructions for submitting proprietary material. Each page of the proposal should state the name of the proposer, RFP 4815, and the page number.

IV. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below **listed in order of importance**.

- Quality and depth of the firm's expertise and its prior capability in providing service in the areas identified in the Scope of Services Section. For those firms who have worked in any capacity with NYSERDA, the quality of work on those transactions will be considered.
- Anticipated cost of services and willingness to work with NYSERDA to minimize cost.
- Experience in general representation of public entities, including New York State public benefit corporations or public authorities.
- Commitment of time and resources to this account, and amenability to, and facility for, working with NYSERDA attorneys and staff in various capacities.
- Whether the proposer is a NYS-certified minority-owned or women-owned business.
- Information provided by client references.
- Overall organization and quality of proposal, including cohesiveness, conciseness, and clarity of response.

Selection Process. A Scoring Committee comprised of internal NYSERDA staff will review and evaluate proposals. NYSERDA reserves the right to seek additional information from any proposer during scoring committee review. At NYSERDA's discretion, proposers may be requested to interview with, or provide supplemental information to, all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Top-ranked firms may also be invited to make oral presentations to the Scoring Committee or other NYSERDA staff as part of the final selection process. Proposers will be notified if they are requested to attend an interview or provide additional information.

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York

State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - - NYSERDA anticipates making multiple awards under this solicitation. NYSERDA anticipates a contract duration of between one and two years (expiring on December 31, 2026), unless NYSERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary,

or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Commission on Ethics and Lobbying in Government, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Commission on Ethics and Lobbying in Government, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Commission on Ethics and Lobbying in Government. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's

current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Attachment A – Sample Agreement including Annex A (Prompt Pay Statement) and Annex B (Terms and Conditions)

**Charge Ready NY 2.0 Equipment and Network Qualification Process
Request for Qualifications (RFQL) 5312
No funding will be awarded through this RFQL**

Applications accepted through December 31, 2026, by 3:00 PM Eastern Time*

The New York State Energy Research and Development Authority (NYSERDA) is issuing this RFQL to establish a list of Level 2 electric vehicle (EV) charging equipment (EVSE) and networks that will be eligible for incentives under the upcoming revised Charge Ready NY 2.0 Program (Program). Under the Program, interested site owners will be able to receive incentives for the installation of eligible charging equipment. Charging station vendors will submit applications to determine eligibility of one or more models of charging equipment. Charging network operators will submit applications to have information about their network, and which charging equipment it is compatible with, listed as part of program materials. Information about eligible equipment models and network solutions will be listed on the NYSERDA webpage for prospective charging station owners to view. Eligible equipment must meet the program requirements described below.

Submissions will be accepted on a rolling basis until December 31, 2026, or until the Program closes. Vendors may submit applications for as many different equipment models or network solutions as they choose.

Application Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide \[PDF\]](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx)" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

No communication intended to influence this procurement is permitted except by contacting Sophie Patka (Designated RFQL 5312 Proposal Contact) at (518) 738-2812 or by e-mail cleantrans@nyserda.ny.gov or David McCabe (Designated Project Application Contact) at (518) 738-2874 or by e-mail cleantrans@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact James Cowman (Designated Solicitation Contact) at (518) 362-0487 or jim.solicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

***All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been completed/included in the application. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit applications. The online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

NYSERDA seeks to accelerate charging station installations and adoption by offering incentives to entities that purchase and install charging stations at workplaces, multifamily buildings, and certain publicly accessible facilities. This incentive program, the Charge Ready NY 2.0 Program (Program), is planned to launch in early 2023, and will focus on the purchase and installation of AC Level 2 charging stations, which supply power to EVs at 208 to 240 Volts AC, at the above types of locations. It does not cover the purchase and installation of private home-use charging stations.

To facilitate the operation of this program and to help simplify the purchasing process for prospective station owners, NYSERDA is issuing this RFQL to establish a list of Level 2 EV charging equipment and networks that will be eligible for incentives under the Program. Charging station vendors can submit applications to determine eligibility of one or more models of charging equipment. Charging network operators can submit applications to have information about their network, and which charging equipment it is compatible with, listed as part of the program materials. Information about eligible equipment models and network solutions will be listed on the NYSERDA webpage for prospective charging station owners to view. Eligible equipment must meet the program requirements described below.

Submissions will be accepted on a rolling basis until December 31, 2025 or until the Program closes. Vendors may submit as many different equipment models or network solutions as they choose. Vendors may submit new applications or update information about existing equipment throughout the time that the Program is active, no more than once every month.

II. Program Requirements

Eligible charging equipment must meet the following requirements:

All Charging Equipment

- The equipment must be a charging system intended to provide AC power to an electric vehicle equipped with an onboard charger unit.
- The equipment must be intended to be supplied by a branch circuit of up to 600 volts.
- The equipment must have a rated power of 6.2 kW (30A) or higher per port.
- Each charger must have a minimum dedicated circuit of 30A or higher.
- The equipment must be intended for installation following the National Electric Code (ANSI/NFPA 70) and be indoor/outdoor rated.
- The equipment must be new and designed to pass inspection according to the National Electrical Code, Article 625. The equipment must be certified by a National Recognized Testing Laboratory (for example, UL category FFWA).
- Both single and dual charging stations are eligible. Single charging stations are stations that have a single charging port originating from a single pedestal, pole-mount, or wall-mount; dual charging stations are stations that have two charging ports originating from a single pedestal, pole-mount or wall-mount. For program purposes, single charging stations will be eligible for an incentive payment for one charging port and dual charging stations will be eligible for an incentive payment for two charging ports.
- All charging equipment must be networked. Charging equipment providers must list the names of any network operators that have provided network services for use on their hardware to date. Networked stations must have at least one approved charging network operator in the program to be able to receive a rebate for an installation.
- All equipment must be ISO-15118 Part 3 Hardware Ready. Charging stations at a minimum must support the following:
 - Powerline carrier (PLC) based high-level communication as specified in ISO 15118-3.
 - Secure management and storage of keys and certificates.
 - Transport Layer Security (TLS) version 1.2; additional support for TLS 1.3 or subsequent versions is recommended to prepare for future updates to the ISO 15118 standard.
 - Remotely receiving updates to activate or enable ISO 15118 use cases.

- Connecting to a backend network.
 - Selecting the appropriate communication protocol used by the vehicle.
- Equipment must use an open standard protocol as a basic framework for purposes of network interoperability and communication with back-end network services providers. The EVSE must support OCPP 1.6 or later.
 - EVSE shall support network interoperability and be certified to OCPP 1.6 or later. Proprietary network software and contracts may be used if the EVSE can switch to another OCPP-compliant network provider at the end of any contract agreement.
 - NYSERDA reserves the right to require third-party certification of OCPP compliance at a later date. If it does so and finds that EVSE are not compliant, it may remove these stations from program eligibility.
- Charging equipment must have remote diagnostics and be capable of remote start.
- Each port of eligible charging equipment must be able to simultaneously charge vehicles at a minimum of 6.2 kW.
- Conditions for Charging Management
 - Equipment Owners/Operators may conduct power sharing and/or participate in smart charge management programs so long as each charging port continues to meet an EV's demand for power of at least 6.2 kW unless the EV charging customer consents to accepting a lower power level.
- Equipment must use no more than 10 Watts of power per port when not connected to a vehicle.
- All equipment must be Energy Star certified.
- Charging equipment must be accessible to drivers regardless of membership in an Electric Vehicle Service Provider (EVSP) network. EVSPs must accept at least two forms of payment, one of which must be compatible with a credit card, and EVSPs must allow payment by members and non-members at charging station locations that require payment. A toll-free telephone number must be posted for drivers to pay by phone.
 - Examples of acceptable payment methods include a QR code, a physical credit card reader, or payment via a website.
- Charging equipment must have a display screen that can clearly display customer pricing per kW. Charging stations must clearly inform drivers of voltage and amperage capabilities of the unit. All fees associated with a charging session must be posted.
- Equipment manufacturers who utilize a kiosk for payment for charging equipment without display screens may be eligible if some combination of the kiosk and charging equipment meet all of the requirements of this RFQL.
- Charging equipment and all accessories must be backed with a warranty of 36 months or longer. The warranty period should start the day that the equipment is installed and ready for use. Proof of the warranty will be required alongside receipts of purchase for fund disbursement.
- New EVSE shall have the most current software version available at the installation date and shall be factory calibrated within original manufacturer standards.
- The original equipment manufacturer (OEM) must submit proposals for their charging equipment models on their own behalf.
- Charging equipment vendors who white-label charging stations that are manufactured by a third party are eligible to apply after the charging station's OEM has applied and been pre-approved for the corresponding model.
- White-labeled models that have not been previously approved through RFQL-5312 are ineligible for Program funding.
- Applicants must complete a Charging Equipment Qualification Worksheet (**Attachment A**), listing each separate model on its own column of the workbook.

Wired Charging Equipment

- Wired equipment must include only connectors that are SAE-J1772 standard compliant.
- Wired equipment must include a cable management system:
 - The charging equipment must include a holster or similar feature for the connector to protect the connector from the elements and help keep it off the ground.
 - Either as an integrated feature of the equipment or as an accessory, charging equipment must include a cable management system that helps keep the cable off the ground, such as a cable retraction system or cable cradle.

Eligible charging network applicants must meet the following requirements:

- Charging networks must be able to operate on one or more models of eligible charging station equipment in the program to be able to receive a rebate for an installation.
- Charging networks must allow equipment owners to set pricing for their stations and provide data to equipment owners on station electricity dispensed and number of charging events.
- Charging networks must accept at least two forms of payment, one of which must be compatible with a credit card, and EVSPs must allow payment by members and non-members at EVSE locations that require payment. A toll-free telephone number must be posted for drivers to pay by phone.

Network providers must meet [Core Registration and Session Data Collection Reference](https://github.com/AtlasPublicPolicy/charging-use-spec/blob/main/core-specification/registration-and-session-data-reference.md) data collection and access standards. These standards for the process, structure, and format for data and access for EVSEs and charging networks. These standards can be found at <https://github.com/AtlasPublicPolicy/charging-use-spec/blob/main/core-specification/registration-and-session-data-reference.md> Network providers must be able to provide this information directly to NYSERDA through password-protected access to a station management software that allows NYSERDA limited administrative access to energy use and status reports at any time of the day. All EVSE must be available through one login to one platform. Network providers must provide a log-in to their portal for NYSERDA's review before their application will be approved. Network providers must meet the minimum requirements listed below:

- **General**
 - Session data must be available via online portal and required fields exportable by a reporting entity with access to the portal.
 - Data from funded stations must be able to be downloaded as a CSV or Excel file in bulk.
- **Energy use reports**
 - Session data should conform to NYSERDA's data specification requirements above and include, at a minimum:
 - EVSE Serial Number (symbols such as dashes should be removed)
 - Session Start Date (mm/dd/yyyy)
 - Session Start Time (hh:mm:ss)
 - Session End Date (mm/dd/yyyy)
 - Session End Time (hh:mm:ss)
 - Charging Start Date (mm/dd/yyyy)
 - Charging Start Time (hh:mm:ss)
 - Charging End Date (mm/dd/yyyy)
 - Charging End Time (hh:mm:ss)
 - Session Duration (i.e., total time vehicle is plugged in; hh:mm:ss)
 - Charging Duration (i.e., total time vehicle is charging; hh:mm:ss)
 - Total Energy Provided (kWh)
 - Peak Power (kW)
 - Port Identifier, if applicable (dual port chargers)
- **Status reports**
 - Ability to view EVSE status via online portal.
 - Charging networks must provide the ability for NYSERDA to download station status reports directly from the online portal.
 - Networks will be required to provide a glossary of status terms and their definitions.
 - EVSE status data downloads must be machine-readable and include, at a minimum:
 - EVSE Serial Number (symbols such as dashes should be removed)
 - Status (e.g., available, offline, in maintenance, etc.)
 - Effective Status Date (e.g., date station went offline, became available again, etc.; mm/dd/yyyy)

- Effective Status Time (e.g., time station went offline, became available again, etc.; hh:mm:ss)
 - See **Attachment C** for a copy of Sample Energy Use and Status Reports.
- Charging networks must have remote diagnostics and be capable of remote start.
- Charging networks must be able to provide access to charging station data to NYSERDA directly through an online portal, with the equipment owner/network customer's permission. All charging station data provided to NYSERDA through these charging stations can be disseminated and utilized by NYSERDA at its own discretion. NYSERDA shall have the right to use, duplicate, or disclose the charging station data, in whole or in part, for any purpose other than resale or commercialization of the data, and to permit others to do so.
- Charging networks must provide either an OpenADR 2.0 Virtual End Node (VEN) for utility demand response integration unless the equipment is not tied to the electric grid (such as some solar PV-powered charging equipment) or have the capability for utilities to provide demand response through the networks' backend.
- Charging networks must provide a customer support service number for maintenance that is readily accessible to customers during hours of operation by a toll-free telephone number that is clearly visible and posted on or near the charging equipment to assist customers with difficulties accessing or operating the Charging network. The serial number must be visible for customers to report to customer service. **The customer support center must be accessible 24 hours a day, seven days a week.**
- Applicants must complete a Charging Network Qualification Worksheet (**Attachment B**).

Any charging equipment manufacturer or charging network provider is eligible to apply for the appropriate qualification. Charging equipment manufacturers should list authorized New York State distributors and third-party vendors of their equipment for New York State, including contact information, in **Attachment A**. Applicants should include themselves in this list if they sell their equipment directly to end users. Potential equipment purchasers will be encouraged to contact the vendors and installers listed to obtain complete quotes. NYSERDA will list these entities on its website to help direct potential purchasers to appropriate purchasing channels. If charging station equipment or networks do not meet the requirements of this RFQL, they will not be eligible for rebate incentives through the Charge Ready NY 2.0 Program. Distributors and installers do not have to be qualified through this RFQL.

III. Application Requirements

Applicants should submit completed applications according to NYSERDA's proposal submission procedures outlined on the cover page of this RFQL. The following documentation is required to be submitted as part of a complete application:

- Charging Equipment Applications:
 - Charging Equipment Qualification Worksheet (**Attachment A**)
 - Cut sheet for each model of charging equipment
 - Energy Star certification for each model of charging equipment
 - **Attachment D**
- Charging Network Applications:
 - Charging Network Qualification Worksheet (**Attachment B**)
 - **Attachment D**
- **All applications must include Attachment D:** Equipment and/or Network Service Provider Terms and Conditions form, signed by someone authorized to commit the applicant.

Vendors may include multiple models or types of equipment/networks in a single worksheet, listing each on its own column of the worksheet. Equipment applicants must also submit a cut sheet for each model of charging equipment they are applying to qualify for the Program. Applicants may also submit lists of distributors in New York State, including contact information and counties served (if applicable) for each.

Applications will be reviewed for compliance with all program requirements listed in Section II. If NYSERDA has questions about whether equipment meets a particular requirement, it will contact the applicant for more information. Equipment and networks that do not meet all requirements will not be eligible for inclusion in the Program.

Applications will be accepted and reviewed on a rolling basis. Applicants will be notified within 30 days whether their equipment or network application has been accepted, if NYSERDA requires further information, or if the application has been denied. If it denies an application, NYSERDA will indicate the requirements that were not satisfactorily met. Applicants whose equipment or network applications are denied may resubmit applications with updated information that demonstrates that the deficient requirements have been met.

Applicants wishing to update the information about qualified equipment that has previously been accepted as qualified by NYSERDA (for instance, if a new model replaces an older version) must submit a new application indicating that it is an update to a prior accepted application and must provide all required documentation for the new equipment. Information about each model may not be updated more than once every three months.

IV. GENERAL CONDITIONS

GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx> . Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their Russian business operations status. Any such business operations in Russia conducted by, or on behalf of, the vendor must be permitted under the allowable exemptions listed by the Order. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list. The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Charge Ready NY 2.0 Program

Program Opportunity Notice (PON) 5367

\$12 million is available

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Applications accepted through December 31st, 2026 by 3:00 PM Eastern Time*

The **Charge Ready NY 2.0 Program** (Program) is an incentive program designed to accelerate the adoption of zero emission vehicles by deploying level 2 electric vehicle charging equipment at workplaces and multi-unit dwellings (MUDs) in New York State. Accelerated adoption of zero emission vehicles benefits New York State by reducing harmful emissions and the transportation sector's dependence on fossil fuels. The New York State Energy Research and Development Authority (NYSERDA) developed the Program to provide incentives that reduce the cost of purchasing and installing eligible Level 2 charging equipment for use in New York State.

Incentives are available to locations that provide charging at an eligible workplace or at a MUD. Public, private and not-for-profit entities may participate in the Program. NYSEDA will provide incentives of \$3,000 per charging port installed at an eligible location, and \$4,000 per charging port if installed at an eligible location located in a Disadvantaged Community (DAC). Charging stations located at assigned parking spaces reserved for the exclusive use of an individual driver or fleet vehicle are eligible at a reduced incentive level. Incentives will be paid upon completion of the installation of the charging equipment and submission of all required documentation. Minimum and maximum charging ports per site are described in Section 3 of the Program Implementation Manual. Bonus incentives are also available as discussed in Section 7 of the Implementation Manual.

Applications are accepted on a **first-come, first-served basis until funding is expended or until the date listed above**. Program rules are available in the Implementation Manual accompanying this solicitation. **All applicants should review the [Implementation Manual \[PDF\]](#) prior to submitting an application.**

Application Submission: Online submission is preferable. Proposers may submit **Word**, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. For detailed instructions on how to submit a proposal, click the link "[Application Instructions and Portal Training Guide \[PDF\]](#)" located in the "Current Opportunities" section of NYSEDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are David McCabe (Designated Contact) at (518) 862-1090, ext. 3281 or by e-mail at cleantrans@nyserda.ny.gov or Sophie Patka (Designated Contact) at (518) 971-2397 or by e-mail at cleantrans@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Jim Cowman (Designated Contact) at (518) 862-1090, ext. 3652 or Jim.Solicitations@nyserda.ny.gov. Contacting anyone other

than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been completed/included in the application. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit applications. The online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

Charge Ready NY 2.0 (PON 5367) is an incentive program that provides \$3,000 per charging port installed at a workplace or MUD location. An additional incentive of \$1,000 per port may be awarded for eligible Level 2 charging equipment installed at a workplace or MUD location within a DAC. Entities who are responsible for maintaining the EV charging equipment (Equipment Owner) may choose to participate in a bonus program to receive additional incentives. Applicants can be the Equipment Owners or the Installers on behalf of the Equipment Owners. Full program rules and procedures, additional information about the program, and current lists of eligible EV charging equipment and network providers can be found at the [Charge Ready NY 2.0 website](#).

Additional details and all program rules are available in the Implementation Manual accompanying this solicitation. **All applicants should review the [Implementation Manual \[PDF\]](#) prior to submitting an application.** The Implementation Manual is subject to change.

General Eligibility

Equipment Owner Eligibility

To be eligible for a Program incentive payment, an Equipment Owner must meet the following conditions:

1. Be licensed to do business in New York State, including not-for-profit corporations or be a State agency or political subdivision of the State, including municipalities, school districts, and other local government entities.
2. Be an organization with an Employer Identification Number (EIN).
3. Purchase and install new Eligible Charging Equipment at a site in New York State that meets site eligibility requirements (refer to section 2.4 of the Implementation Manual).
4. Charging stations reserved for fleet vehicles will be considered assigned parking and are eligible at a reduced incentive level (refer to section 3 of the Implementation Manual).
 - The maximum fleet charging eligibility is two (2) ports per location.
 - Vehicles that use the charging stations must be part of an active fleet.
 - Vehicles must be weight class 2 or lower.

Installer Eligibility

To be eligible for a Program incentive payment, an Installer must meet the following conditions:

1. Be registered to do business in the State of New York.
2. Possess and maintains all credentials, licenses, and certifications necessary to perform all jobs associated with the installation of electric vehicle charging stations in the location where the Installer performs work.

How it Works

The Program allows Applicants to participate in one of two ways:

1. **Pre-Installation Approval:** Applicants can apply for pre-installation approval of an incentive payment. If the pre-installation approval application is granted, NYSERDA will reserve funds for the Applicant's incentive.

However, the applicant must complete their installations and submit all required documentation to NYSERDA within one-hundred eighty (180) calendar days of the pre-installation approval date. Upon approval of all documentation (refer to section 6 of the Implementation Manual), NYSERDA will issue an incentive payment directly to the Payee in the form of a paper check or by electronic payment.

2. **Post-Installation Approval:** Applicants can apply for an incentive payment after the installation is completed. The installation must be completed after the Program Effective Date. NYSERDA must receive the application within 90 days of the Installation Date. As part of their application, Applicants must submit all required documentation. Upon approval of all documentation, NYSERDA will issue an incentive payment directly to the Payee in the form of a paper check or by electronic payment.

II. Program Requirements

Project applications will be granted on a first-come, first-served basis, and will be accepted through December 31, 2026. NYSERDA reserves the right to modify the application acceptance period and extend and/or add funding to this solicitation. Contractors shall submit completed and signed Project Applications as detailed in the [Charge Ready NY 2.0 Implementation Manual \[PDF\]](#) associated with this solicitation. These and all other program documents as well as additional program rules, information, and updates are available on NYSERDA'S [Current Funding Opportunities page](#) and the [Charge Ready NY 2.0 website](#).

III. Application Requirements

To apply for **Charge Ready NY 2.0 funding**, eligible parties must complete an application and agree to abide by the terms and conditions of the Charge Ready NY 2.0 Implementation Manual. The Equipment Owner Program Requirements are defined in Section 5 of the Implementation Manual. The Required Documents necessary to submit an application as well as all documents required to receive an incentive payment are defined in Section 6 of the Implementation Manual.

To apply for **Charge Ready NY 2.0 funding**, eligible entities must submit incentive applications through NYSERDA's web portal: [Register for an account](#). The incentive application process is defined in Section 4 of the Implementation Manual that accompanies this solicitation.

IV. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development

Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

NYSERDA

**Catalyze Clean Energy Financing for Decarbonization in New York State Communities –
State Energy Finance Institution (SEFI) Support**

Program Opportunity Notice (PON) 5456

\$ 20,000,000 NYSERDA

*reserves the right to extend and/or add funding to the Solicitation
should other program funding sources become available.*

Applications Accepted on a rolling basis Starting: 9/11/2023
and will remain open until all funds are exhausted or at NYSERDA's discretion.

Program summary: New York State Energy Research and Development Authority ("NYSERDA"), invites financial entities actively working or planning to deploy capital into decarbonization projects in New York State ("NYS"), particularly those focused on the built environment and benefitting disadvantaged communities ("DAC"), to submit proposals for a direct investment in the form of subordinate debt and/or loan loss reserve ("LLR") support. NYSERDA expects to deploy up to \$20 Million of concessionary capital to eligible entities applying to, and subsequently being approved by, the LPO Title 1703 Loan Guarantee Program. NYSERDA's provision of financial support through this initiative is intended to increase access to the Title 1703 Loan Guarantee Program by entities seeking to advance decarbonization products or processes expected to advance the realization of New York greenhouse gas ("GHG") reduction and DAC benefit goals.

Individual awards under this PON can be a maximum of \$20 million as determined by NYSERDA. However, Eligible Applicants whose project(s) require an additional SEFI support capital per LPO technical review and feedback, are encouraged to consult with NY Green Bank ("NYGB") and consider applying for additional SEFI funding under NYGB's RFP1 open solicitation.

If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

No communication intended to influence this procurement is permitted except by contacting one of the Designated Contacts. If you have technical questions concerning this solicitation, contact one of the Designated Contacts: (i) SEFIfund@nyserda.ny.gov; (ii) John Joshi at (212) 971-5342, ext. 3636; (iii) Luis Aguirre-Torres at (518) 862-1090, ext. 3410. If you have contractual questions concerning this solicitation, contact James Cowman at (518) 862-1090, ext. 3652, or JamesSolicitations@nyserda.ny.gov. Please include "NYSERDA PON SEFI" in the subject line of all e-mail communications. Contacting anyone other than these Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement may result in a proposer: (1) being deemed a non-responsible offeror, and (2) not being awarded a contract.

1 Introduction

In conjunction with its efforts to reduce GHG emissions, accelerate economic growth, and improve the quality of life for all New Yorkers equitably, the New York State Energy Research and Development Authority (“NYSERDA”) may support financing solutions designed to accelerate the clean energy transition. In so doing, NYSEDA seeks opportunities to encourage and attract private capital and to leverage federal funding in an effort to maximize the value of NYS investment.

Through this PON, NYSEDA intends to provide meaningful financing support in the form of subordinate loans or credit enhancements to advance clean energy initiatives, especially those with an emphasis on decarbonizing the built environment and benefitting disadvantaged communities (“DAC”). This support is offered as a counterpart to application(s) to the U.S. Department of Energy (“DOE”) Loan Programs Office (“LPO”) for clean energy loan guarantees under the Title 1703 Program and consistent with LPO’s published State Energy Financing Institution (“SEFI”) Opportunities. Potential applicants to this PON can review the criteria for entities qualifying as a SEFI on the [LPO website](#).

NYSERDA’s provision of financial support through this initiative is intended to increase access to the Title 1703 loan guarantee program by entities seeking to support decarbonization products or processes expected to advance the realization of New York GHG reduction and DAC benefit goals. It may also lower the cost of the loan guarantee, thereby reducing a potential barrier for eligible applicants looking to scale such decarbonization services or processes, and in turn advance NYS goals more affordably.

NYSERDA invites financial companies (referred to in this document as “Applicants” or “Proposing Entities” see Section 2.1) actively working or developing plans to deploy capital into decarbonization projects in New York State (“NYS”) to submit proposals (each, a “**Proposal**”) for a direct investment in the form of subordinate debt and/or a loan loss reserve.

Under the SEFI Decarbonization Fund (“**SEFI Fund**”), NYSEDA expects to deploy up to \$20 Million of concessionary capital by making investments of subordinate debt, and/or by providing loan loss reserves to eligible Applicants (See [Section 2.1](#)), subject to structuring terms and applicable federal, state, and local regulations. Illustrative terms and conditions of loans made pursuant to this PON can be found in [Appendix 1](#).

Through this PON, NYSEDA primarily seeks to support Applicants that will provide loans or other financing for clean energy and sustainable infrastructure projects that support attainment of NYS decarbonization goals in a manner designed to reduce GHG emissions affordably while delivering benefits to DACs. Applicants will be expected to demonstrate a track record of success and ongoing capabilities, or a credible plan to develop and exhibit such capabilities, originating, underwriting, and managing the financing of projects that benefit DACs, support affordable housing, and/or decarbonize the built environment. Funding will be prioritized for programs and uses that follow a decarbonization approach expected to maintain or improve energy affordability.

This PON will remain open at NYSEDA’s discretion until all funds have been fully allocated. Responses will be evaluated on a rolling basis. See [Section 2](#) for eligibility requirements and [Section 4](#) for further detail on the proposal submission and evaluation process.

Eligible Applicants whose project(s) may require more than the \$20 million available under this PON as proposed SEFI support capital are encouraged to consider applying to NY Green Bank (“NYGB”) for additional SEFI funding under NYGB’s RFP1 open solicitation.

NYSERDA hosted a webinar for this solicitation on October 10th, 2023, at 10:00AM ET. This webinar recording is posted online for review. Please click [here](#) to view the webinar.

2 Eligibility Requirements

To be considered for an award, Applicants must meet NYSEDA minimum eligibility requirements as stated below in 2.1 and 2.2. As the intent of this PON is to leverage and complement the LPO’s Title 1703 Program, information on that topic is provided below for reference and proposers are encouraged to visit the LPO website above for further information. NYSEDA awards under this PON will be contingent on Applicants receiving approval of LPO loan guarantee and providing proof of such approval to NYSEDA. Receipt of an award or approval by LPO does not guarantee an award by NYSEDA.

A new federal authority waives the innovative technology requirement in the LPO’s Title 1703 Program for projects receiving financial support or credit enhancements from a qualifying SEFI. Previously, all projects funded under Title 1703 were required to employ technologies that were new or significantly improved compared to commercially available technologies. Now, projects that reduce greenhouse gas emissions without using an innovative technology may be eligible for loans or loan guarantees under the Title 1703 program, so long as the projects receive qualifying funding from a SEFI (e.g., state green banks, state energy offices or other qualifying state entities) and fall into one of the categories of eligible projects under the Title 1703 program. Congress enacted this change to Title 1703 in part

to provide access to debt for borrowers seeking to deploy already commercialized clean energy technologies. By providing loan guarantees to SEFI-supported projects (which can include guarantees of loans made by eligible private lenders), the LPO can now offer project financing to a wider range of borrowers under Title 1703, including small, rural, and underserved communities.

Qualifying SEFI support can take many forms. Examples of qualifying funding may include, but are not limited to:

- SEFI provides equity/subordinate portion of capital stack.
- SEFI provides loan loss reserve with respect to junior portion of capital stack.
- SEFI co-lending with LPO (Pari-passu or subordinate debt).
- SEFI provides financial backstop for specific key project elements that may be subject to regulatory or local market risk.

The Proposal must demonstrate that the Proposing Entity: a) meets the eligible applicant criteria listed in [Section 2.1](#), and b) is lending to projects that satisfy the eligible project criteria listed in [Section 2.2](#).

2.1 Eligible Applicant Criteria

Eligible Applicants must be in the process of applying to LPO for a loan guarantee supporting decarbonization work in NYS within the Target Sectors described in Section 2.2. Applicants should qualify under the LPO Title 1703 Program including financing firms and developers sponsoring decarbonization projects, as well as commercial firms and nonprofit organizations.

2.2 Eligible Project Criteria

- 1 Eligible projects must be in one or more of these target sectors: (1) Residential (1-4 unit) dwellings; (2) Commercial buildings; (3) Multifamily (5+ unit) buildings; (4) Non-profit and Municipal buildings; (5) District Thermal Energy projects; (6) Electrification of the Transportation Sector to the extent it intersects with the built environment; (7) Energy Storage; (8) Grid impact: including optimization through virtual power plants or similar technology to support decarbonization of the built environment; and (9) Other Decarbonization Projects impacting built environment and infrastructure, with an emphasis on projects benefitting DACs.
- 2 Eligible Projects must utilize an Eligible Technology (see [Appendix 2: Eligible Technologies](#))
- 3 Applicants that have projects outside NYS are eligible provided that the Eligible Projects in NYS constitute at least twenty percent (20%) of the Applicant's financing facility, or meet at least a twenty times (20x) minimum capital leverage ratio of NYSERDA's SEFI investment into the Applicant's facility.
- 4 Eligible Projects must be comprised of decarbonization interventions that are designed to maintain or reduce customer energy bills, maintain or improve building comfort, and deliver resilient, durable solutions, or otherwise contribute to GHG emissions reductions in support of NYS clean energy policies.
- 5 Eligible Applicants must demonstrate that they will have the capacity to identify and lend to Eligible Projects by having:
 - Either (i) a successful track record of delivering qualifying decarbonization Eligible Projects in communities, including DACs, and the capacity to expand on that track record through participating in Eligible Project financing; or (ii) a detailed and credible plan (consistent with the management team's experience and capabilities) to develop the capacity to participate in Eligible Project financing; and
 - Either (i) a pipeline of forward-looking opportunities for Eligible Projects in NYS, or (ii) a detailed and credible plan (consistent with the management team's experience and capabilities) to develop such a pipeline/portfolio of Eligible Projects.

3 Proposal Contents

Proposals must clearly and concisely address each of the topics of Sections 3.1 to 3.6. The failure to respond to a topic will render the Proposal incomplete and NYSERDA unable to proceed. Proposals should be thorough and provide details on the business plan and goals for deployment in NYS for decarbonization solutions. Applicants should include similar details as provided in their LPO application for business strategy.

3.1 Required Disclosures

Please provide the following information labeled "[Required Disclosures](#)":

The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe the circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

3.2 Company and Management Team Credentials

Please provide the following information labeled “Company and Management Team Credentials”:

- (a) A brief overview of the Proposing Entity.
- (b) The identities of all parties to the Proposal
 - If Proposal includes a partnership of one or more entities – provide a description of the purpose and objectives of the partnership, the roles and deliverables of each entity, and all Proposal Contents requested in Section 3 for each entity.
- (c) Resumes, bios and/or LinkedIn profiles for the Proposing Entity’s management team.
- (d) As applicable, name(s) of agency/ies by which the Proposing Entity is regulated and/or insured.
- (e) A summary of the Proposing Entity’s underwriting, origination, and servicing process and experience.
- (f) Description of the Proposing Entity’s business model/strategy (or attach a Business Plan); and,
- (g) Audited financial statements.

3.3 Portfolio

Please provide the following information labeled “Portfolio”:

- (a) Description of overall portfolio of loans/investments originated, including:
 - i. Portfolio loan loss rate over the past 1-, 3-, and 5-year periods and since inception; and
 - ii. Return on assets over past three years.
- (b) Description of the portfolio of projects that benefit DACs in NYS and elsewhere, including:
 - i. Volume and number of portfolio investments that benefit DACs;
 - ii. Description of DACs supported and benefits to DACs provided by portfolio investments; and
 - iii. DAC loan loss rate over the past 1-, 3-, and 5-year periods and since inception.
- (c) Description of experience investing in projects that reduce GHG emissions in NYS and elsewhere; and
- (d) Summaries of 2-5 relevant recent portfolio transactions. For each transaction, include:
 - i. Project scope;
 - ii. Technology type (if applicable);
 - iii. Transaction size;
 - iv. Borrower type; and
 - v. Estimated impact (potentially including GHG emission reductions and/or any of the benefits listed in [Section 3.6](#)).
- (e) If the Proposing Entity does not have an applicable portfolio history in NYS including the elements above, please provide a credible plan (consistent with the management team’s experience and capabilities) to develop such a portfolio, including DAC strategy.
- (f) If the Proposing Entity has a portfolio that extends beyond projects in NYS, provide relevant documentation substantiating how the NYS minimum project concentration has been achieved or will be achieved within one year of NYSERDA funding being awarded.

3.4 Targeted Eligible Project Deal Flow

Please provide the following information labeled “Project Deal Flow”:

- (a) Describe Eligible Project investment activity currently underway. Include:
- (b) Volume and number of Eligible Project investments currently under review for financing. Specify the percentage (by both dollar volume and transaction count) of total financeable projects that such transactions represent; If the Proposing Entity does not have any active Eligible Projects, describe plans to expand investment capacity to include Eligible Projects. Identify and describe:
 - i. Targeted origination strategy;
 - ii. Demonstrated demand for the Proposing Entity’s capital; and
 - iii. Any existing relationships that are expected to support deal flow.

3.5 Capital Needs

Please provide the following information, labeled “Capital Needs”:

- (a) Amount and source(s) of the Proposing Entity’s initial capitalization and ongoing funding/income source(s);
- (b) Value of current portfolio;
- (c) Current liquidity situation and outlook;
- (d) Current debt and equity sources and uses;
- (e) Dollar amounts of the proposed Eligible Project portfolio;
- (f) Description of how quickly the Proposing Entity anticipates committing and deploying capital; and
- (g) Description of how investments / support through this PON would enable the Proposing Entity to expand its financing with consideration to energy affordability or otherwise contribute to GHG emissions reductions in support of NYS clean energy policies, including the Climate Act, specifically in or benefiting DACs.

3.6 Impact Measurement and Reporting Capability

NYSERDA carefully evaluates the outcomes of its initiatives to assess relative impact and is required to provide transparent reporting thereof. The Proposing Entity will be required to assist with initial impact estimates and report on relevant metrics such as those listed below periodically during the term of the financing. Specific data reporting requirements will be determined prior to transaction execution.

Please provide the following information labeled “Impact Measurement and Reporting Capability”:

- (a) Types of environmental or social data that the Proposing Entity collects from its borrowers.
- (b) Impact metrics that the Proposing Entity tracks for its investments, e.g.:
 - i. Bill savings or cost reductions for residents.
 - ii. Units of housing weatherized, electrified, or otherwise decarbonized, including a breakdown of market- rate and affordable housing units.
 - iii. GHG emission reductions achieved, measured by CO2-equivalent reductions.
 - iv. Volume of DAC investments.
 - v. Local air quality improvements.
 - vi. Jobs created.
 - vii. Capital commitments and mobilizations by sector/ financed counterparty or recipient of direct project financing from the facility.
 - viii. Other
- (c) Data collection process and calculation methodologies that the Proposing Entity employs to regularly evaluate and track the metrics listed above.
- (d) Acknowledgement by the Proposing Entity that the Proposing Entity will be required to deliver the agreed upon impact data to NYSEDA within 30 days after the end of every quarter in all cases for at least the term of the financing.

4 Proposal Process and Evaluation

Proposing Entities are encouraged to contact NYSEDA before the submission of a Proposal to ensure alignment with NYSEDA’s mission, mandate, and broad investment criteria, as well as this PON’s specific eligibility criteria. To this end, please email us at SEFIfund@nyserda.ny.gov and include “SEFI Fund” in the subject line. As noted in Section 4.1 below, direct communication will be limited after a Proposal is submitted and while it is under consideration.

4.1 Proposal Submission Process

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer’s entity name in the title of the document. NYSEDA shall also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link “[Application Instructions and Portal Training Guide](#) [PDF]” located in the “Current Opportunities” section of NYSEDA’s website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

4.2 Proposal Evaluation Process

Applicants are encouraged to apply to this PON at the time they submit a Level 2 Title 1703 application. Where permitted under LPO rules and regulations, Applicants may include information from their LPO loan application in their application to this PON, to the extent the Applicant believes such inclusion would improve NYSERDA's understanding of Applicant's qualifications.

Proposals will be evaluated on a regular basis as they are received. Proposing Entities can generally expect an email response, including any next steps, if applicable, within 90 days after NYSERDA's receipt of Proposal.

Proposals will be evaluated by the Scoring Committee. Each Proposal will be reviewed to determine satisfaction of the Eligibility Requirements (Sections [2.1](#) and [2.2](#)), and the status of the Applicant's application submitted to the LPO as detailed in section 4.3.

Additional Clarification/Information may be requested if the Scoring Committee is unable to fully evaluate the Proposal with the information provided.

In consultation with NYSERDA, proposals requiring SEFI support exceeding the NYSERDA SEFI capital support under PON5456, may be able to apply for additional SEFI support from NYGB through [NYGB's RFP1](#). Such additional support will be subject to the requirements of NYGB's RFP1.

4.3 Eligible Applicant Firms Criteria¹

Applicants are expected to follow the LPO Pre-Application process for guidance regarding project eligibility, LPO application process and applicant questions. Following that review and after successfully applying to LPO's Level 1 process, the Applicant is encouraged to apply to this PON, presenting proof of having submitted an LPO Level 1 application or proof of receiving an approval to submit a Level 2 application. Additionally, Applicants that have already previously completed the Level 1 process and have submitted or will submit a Level 2 application can apply to this PON. The Applicant's final review and final approval will be subject to NYSERDA Scoring Committee review.

5 General Conditions

Costs & Expenses

Once a Proposal has been contingently awarded by NYSERDA, the proposed transaction will move into NYSERDA's Active Contingent Commitment List. Once the Applicant has received final commitment from LPO, and provided that approval to NYSERDA, then, NYSERDA and the Applicant will move to finalizing the terms and conditions of the transaction. Upon closing, Proposing Entities shall pay a closing fee and an annual administration fee as determined by NYSERDA at its discretion based on deal sector and structure. There is no Commitment Fee on any undrawn amounts available under the SEFI Fund Loan during the first 12 months following closing. However, a .50% per annum Commitment Fee shall apply to any undrawn amounts available under the SEFI Fund investment during the remainder of the Availability Period.

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>

However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from: Empire State

Development
Division for Small Business 625
Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division 625
Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSEERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSEERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSEERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEERDA, the prospective contractor must also certify to NYSEERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSEERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSEERDA expects to deploy up to \$20 Million of concessionary capital starting in [Month], 2023, until fully allocated. NYSEERDA anticipates a contract duration of 5 years, unless NYSEERDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Statement of Work. Each application should be submitted using the most favorable cost and technical terms. NYSEERDA may request additional data or material to support applications. NYSEERDA will use the Sample Agreement to contract successful proposals. NYSEERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSEERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSEERDA expects to notify Applicants within 90 days from the receipt of an application whether your application has been selected to receive an award. NYSEERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSEERDA agreement.

Accessibility Requirements - If awardees from this solicitation will be posting anything on the web, or if the awardee will produce a final report that NYSEERDA will post to the web, the following language must be included. NYSEERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSEERDA's Accessibility Requirements on the [Doing Business with NYSEERDA page](#) or download [NYSEERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSEERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSEERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEERDA's best interest. NYSEERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSEERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

1. Appendix 1: Summary of Indicative Terms and Conditions
2. Appendix 2: Eligible Technologies

Appendix 1: Summary of Indicative Terms and Conditions

This is merely an example and not the terms included in the final documents for NYSERDA's SEFI Fund investment facility, which may differ substantially from the terms set forth herein based on due diligence, credit considerations, prevailing market conditions, and other factors.

*This summary of terms and conditions (the "**Term Sheet**") summarizes the principal terms and conditions of potential SEFI Fund investments to be made available by New York State Energy Research and Development Authority ("**NYSERDA**") to entities that meet the criteria of an eligible Applicant as defined in [Section 2.1](#) (any such entity, a "**Borrower**"). The Term Sheet does not constitute an offer, commitment, or agreement by NYSERDA to enter into any loan facility or other investment with any party. The closing of a SEFI Fund investment facility described herein shall be subject to, without limitation, the completion of satisfactory due diligence by NYSERDA, the execution of definitive documents satisfactory to NYSERDA, final credit approval by NYSERDA, and the Applicants receipt of approval of LPO financing. Receipt of an award or approval by LPO does not guarantee an award by NYSERDA.*

I. Transaction; Financing Parties	
SEFI Fund Loan	Subordinate debt facility for eligible Uses of Proceeds (as defined below) on terms that are satisfactory to the Investor. Loan Loss Reserves on terms that are satisfactory to the Investor
Investor	NYSERDA
Borrower	Eligible lenders as described in the PON
II. Principal Financing Terms	
SEFI Fund Loan Sizing	- Maximum: A maximum of \$20 million as determined by NYSERDA , subject to structuring terms and LPO regulations in the PON - Additional SEFI funds may be available from NYGreen Bank and applied for under its RFP 1 open solicitation.
Use of Proceeds	The Borrower shall use proceeds solely to finance loans made by the Borrower to Eligible Projects ("Eligible Loans"). "Eligible Projects" are defined as projects that meet the following requirements: 1. Support decarbonization of the built environment, including energy efficiency and/or electrification with an emphasis on energy affordability; energy storage; district thermal networks; grid impact solutions; clean transportation, including electrification and EV infrastructure; and/or other decarbonization approaches. 2. Contribute to greenhouse gas emissions reductions. 3. An acceptable percentage of projects to benefit DACs (as further described under "DAC Benefits" below), in compliance with LPO regulations and NYSERDA guidance. 4. A minimum of NYS concentration as detailed in section 2.2.2and 5. Must use an Eligible Technology (see Appendix 2: Eligible Technologies)

DAC Benefits	Through this PON, NYSERDA primarily seeks to support Applicants that will provide loans or other financing for clean energy and sustainable infrastructure projects that support attainment of NYS decarbonization goals in a manner designed to reduce GHG emissions affordably while delivering benefits to DACs. Applicants will be expected to demonstrate a track record of success and ongoing capabilities, or a credible plan to develop and exhibit such capabilities, originating, underwriting, and managing the financing of projects that benefit DACs, support affordable housing, and/or decarbonize the built environment. Funding will be prioritized for programs and uses that follow a decarbonization approach expected to maintain or improve energy affordability. Eligible Projects are deemed to provide demonstrable DAC Benefits, verifiable by NYSERDA and/or a third-party review, if they satisfy one or more of the following requirements: 1. Alignment with LPO DAC and NYSERDA DAC requirements as determined in consultation with NYSERDA in collaboration with NYSERDA. 2. Located in a DAC census tract, as defined under the final rules adopted pursuant to New York State's Climate Leadership and Community Protection Act of 2019 ("CLCPA" or "Climate Act"). 3. Not located in a DAC census tract but: a. Project involves a residential building where at least 50% of the housing units are restricted upon initial occupancy to households making 80% AMI or less via a regulatory agreement with a public agency; or b. Project involves a building that has a demonstrable impact on households making 80% AMI or less. or a vulnerable population (e.g., a facility that predominantly serves such households such as a Federally Qualified Health Center or a multi-service center operated by a non-profit organization).
Program Benefits to end users based on SEFI Investment	• Broadened approval criteria. • Minimum/Maximum loan terms for end-user customers, subject to NYSERDA policy and criteria as determined by the scoring committee. • Larger amounts available to finance. • Better rates; and/or • Other advantageous terms. For Energy Savings Performance Insurance: • Additional available cashflow underwritten for the same measures costs. • Shorter debt term, based on the baseline underwritten cashflow; or • Net higher savings investment ratio based vs. original U/W cashflow without a policy.
Advances	• Subject to portfolio ramp of Eligible Projects. • Borrower must certify that advances are for Eligible Projects and provide basic portfolio information. • After giving effect to the advance, an acceptable % of cumulative SEFI Fund advances must be allocated to Eligible Projects located in DAC census tracts as defined in item 1 of DAC Benefits, in compliance with LPO regulations and NYSERDA guidance.
Availability Period	Subject to LPO regulations and available funding, 5 years after the closing date.
Term / Maturity Date	For debt investment, one month beyond the maturity of the LPO Debt For Loan Loss Reserves, final maturity of the underlying assets, subject to reduction based upon the then-current amortized remaining balance of the covered tranche in the capital stack
Interest Rate	For the subordinate debt tranche {Projected coupon Market rate bp above the senior LPO debt} % per annum fixed interest rate on monthly average balance, payable quarterly in arrears
Amortization	There will be no scheduled amortization and no prepayment penalty for prepaying the SEFI Fund investment at any time.

Reporting Requirements	- Financial Reporting - Quarterly: - Summary report on the performance of the Borrower's Eligible Loan portfolio - Individual non-performing loan report on any non-performing Eligible Loans or Eligible Loans on Borrower's watch list, each prepared in accordance with the Borrower's portfolio, credit and risk management policies and procedures including standard rating policy. - Covenant compliance reports for other senior lenders. - Impact Reporting - Annual impact reporting on Eligible Projects funded in part with SEFI Fund advances. - Prompt delivery of notices of default, material litigation, and material adverse changes
Fees	- Commitment Fee: - None during the first 12 months of the Availability Period 0.50% per annum on any undrawn amounts available under the SEFI Fund investment during the remainder of the Availability Period NYSERDA may at its discretion charge additional fees based on deal sector and structure. Those fees may include, but are not limited to: - Administration & Maintenance Fee: annually will be based on deal size and structure and negotiated in the contracting phase. - Advisor fees: Payable directly to NYSERDA advisors starting at due diligence based on deal size and complexity. The applicant is responsible for accrued third-party fees regardless of whether the deal reaches financial close with NYSERDA. - Closing fee to cover legal expenses.
III. Other Terms	

Conditions Precedent	Usual and customary for facilities of this type, or as deemed necessary or appropriate by the Investor.
Representations and Warranties	Usual and customary for facilities of this type, or as deemed necessary or appropriate by the Investor (subject to exceptions and materiality thresholds acceptable to the Investor).
Affirmative and Negative Covenants	Usual and customary for facilities of this type, or as deemed necessary or appropriate by the Investor (subject to exceptions and materiality thresholds acceptable to the Investor), including without limitation: - Investor's right to inspect books and records of the Borrower and meet with the Borrower's senior management upon reasonable notice. - Maintenance of a Net Asset Ratio or similar liquidity covenant to be determined
Events of Default	Usual and customary for facilities of this type, or as deemed necessary or appropriate by the Investor (subject to exceptions and materiality thresholds acceptable to the Investor), including any cross-defaults required by LPO or other senior debt providers.
Cure Period	- Interest & Fees payment defaults: 3 business day cure period - All other financial covenant defaults: 15 calendar day cure period - All other covenant defaults: 30 calendar day cure period

Confidentiality	Usual and customary for facilities of this type, subject to (a) the Investor's public disclosure obligations under the New York State Freedom of Information Law, and (b) the Investor's right to publicly disclose a general transaction description and aggregated or anonymized data.
Expenses	Each party will be responsible for its own closing costs and expenses.

Appendix 2: Eligible Technologies²

1. Building Decarbonization and Supporting Measures, examples including but not limited to:
 - a. Heating and Cooling Load Reduction – also see “Qualified Energy Efficiency Improvements” below:
 - b. Weatherization
 - c. Windows/doors
 - d. Heat/energy recovery ventilation.
2. Clean Heating Technologies⁴
 - a. Air Source Heat Pumps
 - b. Water Source Heat Pumps
 - c. Ground Source Heat Pumps
 - d. District thermal interconnection
 - e. Support decarbonization of the built environment, including energy efficiency and/or electrification with an emphasis on energy affordability; energy storage; district thermal networks; grid impact solutions; clean transportation, including electrification and EV infrastructure; and/or other decarbonization approaches.
 - f. Contribute to greenhouse gas emissions reductions.
3. Electric Vehicle Infrastructure (including charging stations)
4. Thermal and Electric Energy Storage; “Energy Storage”, including thermal storage, is the capture of energy produced at one time for use at a later time to reduce imbalances between energy demand and energy production. A device that stores energy is generally called an accumulator, thermal sink, or battery.
5. On-site Solar serving customer load when combined with one or more of the above listed Eligible Technologies.
6. “Qualified Energy Efficiency Improvements”: A modification to a structure that shall increase the energy efficiency and conservation of an existing structure, including but not limited to:
 - I. Application of weather-stripping, caulking, sealant and other materials around doors, windows, and other areas of a building for the purpose of insulating or sealing openings in the building envelope and within the building to mitigate energy loss.
 - II. Testing, repairing, and replacing heating or cooling systems or components of such systems.
 - III. Thermostat upgrades.
 - IV. Water heater repair and replacement.
 - V. Roof, chimney, fireplace, and roof vent repair as determined to be necessary to mitigate energy loss or resolve energy system-related health and safety issues.
 - VI. Repair and replacement of storm windows, permanent windows, and exterior doors.
 - VII. Repair or replacement of major appliances.
 - VIII. Installation of thermal solar heat or hot water systems.
 - IX. Addition of insulation to exterior walls or ceilings.
 - X. Replacement of inefficient light bulbs and lighting fixtures and systems.
 - XI. Minor repairs that are necessary to ensure maximum efficiency from the provision of qualified energy efficiency services.
 - XII. Installation of carbon monoxide detectors and indoor environmental testing and mitigation deemed necessary because of the provision of other qualified energy efficiency services.
 - XIII. Conversion of an electrical resistance-heated building to a more efficient electrical heating source provided that significant energy cost-savings can be demonstrated.
 - XIV. Beneficial electrification, including heat-pumps (geothermal, ASHP, Desiccant Heating and Cooling systems, and other high-efficiency beneficial electrification solutions)

NYSERDA will consider other technologies that reduce greenhouse emissions, beyond those listed above. Eligible products and financing structures are not limited to those listed and NYSERDA encourages Applicants to present innovative financing

structures. The Scoring Committee will assess whether a given technology is supporting New York State climate policy goals.>50 post project completion.

² *Eligibility under LPO's Title 17 Program is subject to LPO regulations*

⁴ Multifamily buildings with 5 or more units must obtain an EPA ENERGY STAR Score >50 prior to installing heating and cooling electrification to ensure comfortable heat pump operation or be coupled with building envelope improvements (e.g., weatherization, insulation, windows, etc.) that would reasonably be expected to result in an EPA ENERGY STAR Score >50 post project completion.

NYSERDA

New York School Bus Incentive Program

Program Opportunity Notice (PON) 5552

\$500 million is available

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Applications accepted through December 31st, 2035 by 3:00 PM Eastern Time*

NYSERDA has established this NY School Bus Incentive Program (NYSBIP) to achieve State requirements enacted in 2022 state budget legislation that all school buses be zero-emission buses by 2035, and to assist school districts in meeting the zero-emission bus timelines.

NYSBIP is a voucher incentive program which will accelerate the deployment of zero-emission school buses and charging infrastructures throughout New York State. Eligible recipients of funding include New York public school districts (K-12) and third party bus operators under contract with public schools. Applications, however, are submitted by pre-approved school bus dealers or original equipment operators (OEMs). Eligible zero-emission school buses include both electric school buses and hydrogen fuel cell school buses (collectively referred to as ESBs). School Bus Voucher Applications and Charging Voucher Applications are being accepted on a **first-come, first-served basis until funding is expended and the level of funding provided is based on the number of buses a school district or bus operator has purchased or is currently purchasing**. A summary of the program appears here. Additional details and all program rules are available in the Implementation Manual accompanying this solicitation. **All applicants should review the [Implementation Manual](#) prior to submitting an application.**

Amounts are variable and are established in the Implementation Manual, and are awarded per bus to cover hardware, customer-side electrical site upgrades, installation costs, and battery storage. Districts designated as [priority districts](#) can receive an additional adder per bus. Priority districts are defined as high-need school districts by the New York State Education Department or those that serve [disadvantaged communities](#) as defined by the New York State Climate Justice Working Group.

Application Submission: Online submission is preferable. Proposers may submit **Word**, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide \[PDF\]](#)" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are: Adam Lomasney (Designated Contact) at (518) 862-1090, ext. 3017 or by e-mail at schoolbus@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Jim Cowman (Designated Contact) at (518) 862-1090, ext. 3652 or Jim.Solicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting

on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All applications must be received by 3pm Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been completed/included in the application. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit applications. The online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSEDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

The New York School Bus Incentive Program (NYSBIP) is a voucher incentive program which accelerates the deployment of zero-emission school buses throughout New York State by providing incentives for vehicle purchases and charging infrastructure. Zero-emission school buses include both electric school buses and hydrogen fuel cell school buses (collectively referred to as ESBs). Incentives for electric school buses are provided at the point-of-sale, in order to reduce upfront cost. Charging infrastructure, including electric chargers are accessible as a rebate that is reimbursable directly to public school districts.

In the budget passed by the New York State Legislature and signed by Governor Hochul in 2022, the State established a deadline for the transition to zero-emission buses. Specifically, all school buses in the State must be zero-emission buses by 2035. In 2022, voters across NYS overwhelmingly voted for the Clean Air, Clean Water and Green Jobs Environmental Bond Act (Bond Act) which includes \$500M to support the transition to zero-emission school buses. NYSEDA has established the New York School Bus Incentive Program (NYSBIP) to achieve these State public purposes and assist school districts in meeting the zero-emission bus timelines.

A summary of the program appears here. Additional details and all program rules are available in the Implementation Manual accompanying this solicitation. **All applicants should review the [Implementation Manual](#) prior to submitting an application.** The Implementation Manual is subject to change.

General Eligibility

School buses and Charging Infrastructure that serve public school districts are the sole focus of NYSEDA. Eligible school buses include Type A through Type D ESBs that are used for regular pupil transportation. Shuttle vans, trucks, SUVs, and cars that are used for pupil transportation are not currently eligible. NYSEDA is available to all public school districts regardless of need-status or Disadvantaged Community (DAC) status. Different voucher amounts apply for Priority Districts and non-Priority Districts. Eligibility is determined by the entity and school bus.

Eligible Purchasers

In terms of ownership, the following Fleets may apply to NYSEDA:

- New York State public school districts or other public entities that provide K-12 pupil transportation services in New York State; or,
- Third-Party Operators under contract with a New York State public school district.

For the purposes of Program eligibility, 'under contract' shall mean an existing service contract between the school district and the Third-Party Operator, or a signed letter of intent detailing the proposed relationship, is in place. A Voucher Application may be submitted and approved when a school district and Third-Party Operator have a signed letter of intent or an executed contract, but the service contract must be fully executed before Voucher

Redemption (refer to Implementation Manual section 9 for School Bus Voucher Redemption and section 11 for Charging Voucher Redemption).

Vouchers will be awarded on a first-come, first-served basis up to the Vehicle Caps in Implementation Manual section 2.5.

Priority School District Priority school districts are ones that:

- Are identified as High-Need/Resource Capacity districts in the Need/Resource Capacity Categories, AND/OR
- Are school districts in which over 40% of the total district population lives within a DAC.

Additionally, Purchasers who will domicile the ESB(s) in an existing bus depot or storage facility in a [Disadvantaged Community](#) may qualify for a Priority District Bonus.

For clarity, these districts are identified on the downloadable [Priority Districts List](#).

How it Works

The NYSBIP is an incentive program that provides grants to a school district or group of school districts to offset all or a portion of the purchase price of Electric School Buses (ESBs) and/or associated Charging Infrastructure to be used to service the students of those school districts. In the case where a school district contracts with a Third-Party Operator to provide school bus services, the grant to the school district may be applied to make a one-time payment for a portion of the purchase price of Bus(es) and/or associated Charging Infrastructure that are purchased by the operator and will serve the students of that school district.

NYSBIP provides two voucher incentives: the School Bus Voucher and the Charging Voucher. It is important to note that two voucher applications are required to reserve incentive funds for both School Buses and Charging Infrastructure. **Please see the accompanying [Implementation Manual](#) for the level of incentives available.**

The School Bus Voucher incentive works as follows: a Purchaser agrees to purchase an Eligible ESB from a Dealer qualified to sell that ESB through NYSBIP. The Dealer then deducts the value of the School Bus Voucher from the total sale price. Once the Dealer has supplied all required documentation to verify all steps of the School Bus Voucher process, and scrappage (if applicable), is complete, NYSERDA reimburses the Dealer for the full School Bus Voucher amount. By providing the School Bus Voucher to the Purchaser at the point of purchase in the form of a discount off the total purchase price, NYSBIP makes ESB acquisitions easier, less expensive, and helping to distribute the benefits of ESB deployment within New York State. To receive a Charging Voucher, a Purchaser will submit a Charging Voucher Application. To qualify Purchasers must demonstrate initiation of an ESB purchase either through NYSBIP or with other funds (e.g. EPA Clean School Bus Program, self-funded). Purchasers will upload basic information about the Chargers they select to the application on or within thirty (30) days of submitting a Charging Voucher Application. Once the application is approved, a Purchaser performs any Charging Infrastructure upgrades associated with the Chargers. After Installation, the Purchaser supplies all required documentation to verify all steps of the Charging Voucher process is completed to NYSERDA. NYSERDA then reimburses the Purchaser for costs covered by NYSBIP up to 100% of the Charging Voucher amount.

The Implementation Manual outlines the process, requirements, rules, and funding parameters of NYSBIP to provide School Districts and other members of the public with information on how to participate. NYSERDA may make changes to the Implementation Manual at any time. NYSBIP participants are bound by the version of Implementation Manual in effect at the time their voucher application is submitted. In other words, voucher applications, voucher redemption protocols, and all other program elements associated with those vouchers must follow the directions outlined in the most recent version of the Implementation Manual posted on the NYSBIP website at the time of voucher submittal. The most recent Implementation Manual, as well as all required forms and agreements, can be found on the Current Funding Opportunities page and the NYSBIP website. Notice of all

changes will be provided to participants via their designated email addresses, as identified in the voucher application.

II. Program Requirements

Project applications will be granted on a first-come, first-served basis, and will be accepted through December 31, 2035. NYSEDA reserves the right to modify the application acceptance period and extend and/or add funding to this solicitation. Contractors shall submit completed and signed Project Applications as detailed in the [NYSEBIP Implementation Manual \[PDF\]](#) associated with this solicitation. These and all other program documents as well as additional program rules, information, and updates are available on NYSEDA'S [Current Funding Opportunities page](#) and the [NY School Bus Incentive Program website.](#)

Eligible Costs for Buses and Chargers

School Buses: Applicants purchasing an ESB must do so from a Dealer approved to participate in NYSEBIP. The ESB to be purchased must travel at least 5,000 miles per year for the 5 years of required reporting to NYSEBIP. Repowered School Buses may be eligible for funding if the school bus has an expected operational lifespan after repowering of at least five (5) years. For the purposes of Repowered School Buses, the entire cost of the repower is considered the incremental cost. NYSEBIP funding may not be used to pay for the purchase or installation of fuel-fired heaters, although these may be installed at Purchaser's cost.

School bus chargers: The Charging Voucher funding can be used to reimburse Eligible Charging Costs, including Level 2 or direct current "fast charging" (DCFC) stations and the equipment and installation costs associated with installing them, after all other incentives are accounted for and after the application has been determined to meet all NYSEBIP criteria. Purchasers may use this funding to install Charging Ports up to the number of ESBs being purchased, or one more than the number of ESBs if the number is odd and the Purchaser is installing dual port charging stations. Charging Ports can be any combination of Level 2 and DCFC stations; for example, if a Purchaser buys five (5) ESBs, they may purchase and install up to five (5) single port Level 2 Chargers, three (3) dual port Level 2 Chargers (totaling six Charging Ports), one (1) single port DCFC Charger and one (1) dual port Level 2 Charger, etc.

Once a Charging Voucher is approved, the Purchaser may claim reimbursement for the Eligible Charging Costs up to the incentive amount shown in the Implementation Manual at the time of the Charging Voucher Application submission.

III. Application Requirements

To apply for **NYSEBIP school bus vehicle funding**, eligible parties must complete a Project Application and agree to abide by the terms and conditions of the NYSEBIP Implementation Manual. Only school bus dealers approved through NYSEDA as part of this program and original equipment manufacturers (OEMs) may submit applications on behalf of school districts or third-party school bus providers. Eligible entities must submit online through the [NYSEDA School Bus Portal](#)

To apply for **School Bus charger funding**, eligible entities must submit through the [NYSEBIP Charging Voucher Portal](#) a signed Project Application package to NYSEDA as detailed in the Program Manual that accompanies this solicitation.

IV. GENERAL CONDITIONS

GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSEDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media

content. For more information, see NYSERDA's Accessibility Requirements on the [Doing Business with NYSERDA page](#) or download [NYSERDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

**Climate Justice Fellowship Plus
Program Opportunity Notice (PON) 5566
\$2,200,000**

NYSERDA reserves the right to extend and/or add funding to the Solicitation should other program funding sources become available.

Applications accepted on a rolling basis until
December 12, 2025, by 3:00 p.m. EST.

I. Summary

New York State is leading the charge in promoting environmental and climate justice to ensure an equitable clean energy transition for all communities — especially for those disproportionately burdened by environmental health hazards. A key element of climate justice is ensuring the green jobs of the future are available to all New Yorkers and meet their communities' needs. The New York State Energy Research and Development Authority (NYSERDA) is seeking to employ workers in climate justice jobs in the New York City boroughs of the Bronx and Queens at eligible entities within or looking to participate in the clean energy economy. NYSERDA, with support from U.S. Representative Alexandria Ocasio-Cortez, of New York's 14th congressional district, is pleased to announce the Climate Justice Fellowship Plus Program is now available and is fully funded by the U.S. Department of Labor. The Climate Justice Fellowship Plus Program (CJF Plus) is a \$3 million pilot program to advance climate justice in the Bronx and Queens.

The CJF Plus Program will provide wage subsidies for eligible entities to hire individuals for 15-months climate justice fellowships. The Program will also provide supportive services and/or professional development to Fellows throughout their employment.

In this solicitation, NYSERDA is seeking applications to fund professional development training and mentoring for 15-month, full-time fellowships, to work within entities that advance climate justice and/or clean energy priorities in the New York City boroughs of the Bronx and Queens. It is expected that Fellows will assist with community engagement activities (e.g., plan, policy, or project), support clean energy/climate justice project development, and implementation, facilitate or build upon partnerships, or engage in other projects related to advancing climate justice and/or clean energy priorities in the Bronx and Queens.

For eligible employers, NYSERDA will offer wage subsidies capped at \$73,125 for the duration of the fellowship. Fellowships must be full-time. Employers may, and are encouraged to, pay their Fellows in excess of \$30 per hour.

Applications from eligible employers will be accepted on a continuous first-come, first-served basis until the solicitation due date. Total available funding allocated to this program may be adjusted based on demand and availability of additional funds.

Employers must first apply to confirm their eligibility for the program, then identify Fellows and request approval in a separate, second step. See “Terms and Definitions” below for a definition of an eligible employer. NYSERDA, in partnership with NYSDOL will determine eligible and approved employers who have applied to participate in the program. Eligible, approved employers will then be invited by NYSERDA to identify Fellows or be provided access to select them from NYSERDA’s Fellow directory and submit Fellowship applications. After a brief review and approval period, Fellows may begin work.

Please note that, although the Climate Justice Fellowship Plus (PON 5566) Program is similar to the Climate Justice Fellowship Program (PON 4772), there are a few exceptions. Please read carefully as program details differ.

Informational Webinar

NYSERDA will conduct an informational webinar, during which NYSERDA will review the requirements of this solicitation and answer questions. Applicants interested in learning more and attending the webinar may send an email to CJFplus@nyserda.ny.gov with the subject line “PON 5566 Climate Justice Fellowship Plus Webinar” to request webinar date and information on how to participate. Questions may be submitted via the same email address prior to the webinar, or during the webinar using the web platform. Following the conclusion of the webinar, NYSERDA will post questions and responses on the NYSERDA website. All questions will be posted anonymously, and NYSERDA’s written responses will supersede any responses given during the webinar.

Contact Information

No communication intended to influence this procurement is permitted. Allowed communications and questions should only be directed to CJFplus@nyserda.ny.gov. For contractual questions concerning this solicitation, please contact Nancy Marucci at (518) 862- 1090, ext. 3335 or by email NancySolicitations@nyserda.ny.gov.

For program questions please contact Jillian Palmer at (518) 862-1090 Gwendolyn Summers at (518) 862-1090. Contacting anyone other than the Designated Contacts (either directly by the applicant or indirectly through a lobbyist or other person acting on the applicant’s behalf) in an attempt to influence the procurement: (1) may result in an applicant being deemed a non-responsible offeror, and (2) may result in the applicant not being awarded a contract.

Terms and Definitions

Climate Justice: The promotion of individual and collective capacity to prepare for, respond to, and recover from climate events as well as the fair treatment, meaningful involvement, and the absence of discrimination in the creation of policies, programs, and projects that both address the disparate impacts of climate change and the transition to a net zero emissions economy.

Eligible Employer: A non-profit organization, municipality, public library, public college, public university, or private non-profit university at the time of application located in or serving the Bronx or Queens. Additional details are described in Section III. Employer Eligibility, Requirements, and Expectations.

Employer: An employer that has successfully complied with eligibility requirements outlined in Section III. Employer Eligibility, Requirements, and Expectations.

Professional Development: The process of gaining new skills through continuing education and career training after entering the workforce.¹

Supportive Services: Services that are necessary to enable an individual to mitigate barriers to employment. These may include access to and subsidies for transportation and childcare, immigration/legal services, mental health counseling, care coordination, and more.

II. Program Details

The CJF Plus Program has a mandatory salary for participating employers. Employers are required to offer Fellows a minimum of \$30 per hour, totaling \$73,125 for 15 months.

NYSERDA will provide up to \$5,000 for professional development activities and supportive services to bridge a specified gap in social services provided by other state and federal programs. NYSERDA has partnered with BronxWorks, a community-based organization that will support Fellows throughout the duration of the Fellowship program. BronxWorks will provide case management services to Fellows as well as supportive services or referrals to supportive services to reduce barriers to employment. Upon completion of the 15-month Fellowship, up to \$3,500 of unutilized funding for supportive services and professional development may be requested by the Employer to administer to the Fellow as a retention bonus per the approval of the NYSERDA Project Manager.

The Employer is prohibited from reaching out to BronxWorks regarding their Fellow's supportive service activities.

Cohort Services: NYSERDA has partnered with a contractor to provide additional professional

¹ Harvard Business Review. Why is Professional Development Important?

development services to the Fellows in each cohort. Cohort Services include: (1) virtual peer groups in which Fellows can discuss topics such as challenges and successes, (2) mentorship opportunities with industry leaders, (3) access to a virtual Climate Leadership Certificate Course, (4) Skills Labs to hone specific climate justice- and clean energy-related skills determined based on needs, and (5) access to a Climate Leadership Network (CLN), an online community for climate-focused organizations with a presence in New York State. All services will begin at regularly scheduled intervals (e.g., quarterly) for each new cohort of Fellows and will be provided for twelve (12) months.

Employers are required to allow Fellows to participate in meetings with BronxWorks on a quarterly basis and Cohort Services during working hours without the need to makeup time and without financial penalty. Additionally, Fellows may be asked to participate in surveys and focus groups per the request of NYSERDA. These activities shall also be completed by the Fellows during working hours without the need to makeup time and/or financial penalty.

NYSERDA will accept applications from eligible entities interested in Fellows on a continuous rolling basis until the deadline or until funds are expended, whichever comes first. NYSERDA may also, at its own discretion, extend, suspend or permanently close the application process for any other reason.

Alignment with Other NYSERDA Programs

Participants in [NYSERDA's Clean Energy Internship Program](#) who meet the Fellowship criteria may consider converting to the CJF Plus Fellowship following their internship, if they were not already hired as a standard employee by that organization.

Individuals who are enrolled as a Fellow and/or have completed a Climate Justice Fellowship (PON 4772) are ineligible to participate in the Climate Justice Fellowship Plus Program (PON 5566). Individuals hired through the Climate Justice Fellowship Plus Program (PON 5566) are ineligible to participate in the Climate Justice Fellowship Program (PON 4772).

III. Employer Eligibility, Requirements, and Expectations

Employer Eligibility

To qualify as an Eligible employer, the organization must:

- Be a non-profit organization, municipality, public library, public college, public university, or private non-profit university at the time of application and be located in or serving the Bronx or Queens.
- Have at least one physical business address in New York State, serving or located in the Bronx and/or Queens, with the legal authority to hire employees and conduct business in New York State and where the Fellowship will be hosted with the space and equipment needed to support the work of the Fellow.
- Agree to the NYSERDA Terms and Conditions (Sample Agreement).
- Attest to compliance with all applicable labor laws, and not have failed to file any applicable local, state or federal tax returns, nor failed to pay New York State Unemployment Insurance.

- *Note: NYSERDA reserves the right to request that the New York State Department of Labor (NYSDOL) conduct a due diligence and employer eligibility search to confirm this information. The NYSDOL due diligence review process will include a review of the organization's Unemployment Insurance records; Worker Adjustment and Retraining Notification (WARN) notices; ongoing investigations with NYSDOL's Public Works, Labor Standards and/or Safety and Health Divisions; registration with the NYS Department of State's Division of Corporations; Workers Compensation Insurance and Disability Insurance coverage; federal Occupational Safety and Health Administration (OSHA) records; and contracts/agreements from NYSDOL received during the past three years.*

Requirements of Eligible Employers

By Completing the Application Steps, the Employer commits to:

1. Providing the minimum required wage of \$30 per hour, totaling \$73,125 for 15 months.
2. Offering health benefits (e.g., medical, dental, and vision) at no cost or at a reasonable cost² for Fellows and their family members.
 - While health benefits must be offered to the Fellow, the Fellow may decline health benefits if already covered under an existing policy.
 - The employer must describe the comprehensive employee health benefits offered, including costs, even if the Fellow declines the health benefits. Employers are encouraged to include additional employee benefits (e.g., life insurance, retirement plan, student loan assistance, etc.) in their cost share.
3. Offering a minimum of 12.5 days of paid vacation or sick time. Employers must also offer federal holidays.³
 - Paid time off is included in NYSERDA's milestone payments to the employer.
 - Employers are encouraged to provide additional paid vacation and sick time for Fellows as part of their cost share.
4. Considering offering performance bonuses, using its own funds, as merited.
5. Committing to hiring and providing professional development training/mentoring for a 15-month, full-time⁴ Fellow, to an individual from the 14th Congressional District, who advances climate justice and/or clean energy priorities in the Bronx and Queens.
6. Having at least two (2) full-time employees or the equivalent of two (2) full-time employees, not including the Fellow. Principals of corporations and owners of an organization such as sole proprietors or partners are not considered to be employees for this eligibility requirement. If the Employer has no employees or if the workers are independent contractors, subcontractors or contract employees, then the organization shall not be eligible.
7. Ensuring that no existing worker is displaced by the Fellow, including a partial displacement such as a reduction in hours, wages, or employment benefits.

² Reasonable cost for the purposes of the Climate Justice Fellowship Plus Program is if the Fellow's share of the monthly premium in the lowest-cost plan offered by the employer is less than 9.02% of the Fellow's household income.

³ Federal Holidays are those established by Federal law (6 U.S.C 6103). Please see the U.S. Office of Personnel Management for a comprehensive list of federal holidays. As of November 2024, these include: New Year's Day; Birthday of Martin Luther King, Jr., Washington's Birthday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day.

⁴ Full-time is defined as 35 - 40 hours (as per the organization's regular commitment) per week for 15 consecutive months.

8. Guaranteeing that the Fellow does not work on other NYSERDA funded projects, with the exception of the NY Clean Transportation Prizes program. However, the Employer is required to meet with the NYSERDA Project Manager to ensure NYSERDA program funds are not duplicated.
9. Complying with New York State labor law and federal law for the protection of employees.
10. Matching Fellows with internal senior mentor(s). In the first three (3) months of the Fellowship, the Fellow should work with supervisors to identify at least one (1) senior professional within the host organization who can provide additional internal guidance and development. Where possible, this individual should be outside of the chain of command of the Fellow.
11. Matching Fellows with external mentor(s). Where possible, the Employer should work to connect the Fellow with professionals external to their organization, and who have overlapping professional and/or personal goals and interests. Note that some external mentorship will also be provided by a NYSERDA contractor.

Application Steps: Eligible Employers

1. Review Employer eligibility requirements.
2. Submit Application. Eligible Employers should use the [“Apply Online”](#) link on the funding page.
 - Based on the information provided, NYSERDA will determine if the organization is eligible for the program.
3. Submitted applications undergo an employer eligibility review with NYSDOL and internal NYSERDA review and approval process.
 - After 12 months, employers may be required to submit updated documentation to NYSERDA to verify continued eligibility for the program.
4. NYSERDA will notify applicants by email whether or not they are verified as eligible to participate.
5. If verified as eligible to participate, the Employer is granted access to a directory of Fellowship candidates who have applied to the program.
 - Alternatively, the Employer may select its own Fellow(s), who then complete(s) the directory application to submit the required information.
 - Fellows may use the [“Join Directory”](#) link on the program page to submit their application either before or after they connect with the employer.
6. Once a Fellow is identified, the Employer submits a Fellowship application for review and approval via email to the cifplus@nyserda.ny.gov mailbox.
 - The Fellowship application should only be submitted upon verification that the Employer and the Fellow have been confirmed eligible.
 - The earlier application steps help establish eligibility only and the Employer and Fellow cannot officially join the program until the Fellowship application is approved.

Eligible Employers seeking to hire more than one (1) Fellow must submit one (1) application per Fellow and undergo additional review by NYSERDA. Multiple Fellows per employer may be approved based on factors such as, but not limited to, the following:

- i. Funding available
- ii. Size of organization (e.g., number of employees)
- iii. Ability of Employer to demonstrate adequate supervision and mentoring and meaningful work for additional Fellow(s).
- iv. Extent of Employer's financial sustainability to maintain employment for participants at or above the wage upon conclusion of the Program.

If a Fellow does not complete their 15-month employment period, Employers may submit a new Fellow for approval any time before the final submission deadline for rolling applications, pending available funding and a case-by-case review of the application.

Additionally, NYSERDA reserves the right to accept, reject, or request additional information on prospective Employers' experience in serving the Bronx and/or Queens.

IV. Fellow Eligibility Requirements:

To be considered eligible for the Climate Justice Fellowship Plus program as a Fellow, an individual must at the time of program entry:

- Be a resident of New York's 14th Congressional District, which spans parts of the Bronx and Queens.
- Be a member of a priority population (see **Priority Population List for the Program**).
- Commit to working in the Bronx and/or Queens full-time for the entire 15-month Fellowship.
 - *Note: For the purposes of this solicitation, when feasible, in-person work that prioritizes the health and safety of individuals is preferred. However, remote work arrangements will also be considered for funding. If approved, all remote work must take place in New York State.*
 - *Note: Fellowships are intended for individuals not enrolled in school or coursework. However part-time coursework or schooling that does not exceed 6 credit hours or 6 to 8 hours per week may be allowable and will be considered on a case-by-case basis.*
- Commit to the goal of assisting the Employer in advancing climate justice and/or clean energy priorities for the Bronx and Queens.
- Be a new hire defined as (1) an individual who has no previous employment (paid or unpaid) with the Employer; furloughed employee; contractor and (2) may be new to the climate justice and/or clean energy field more broadly.
- Not be a relative of the owners, principals, hiring managers, or existing employees of the business or organization.
 - *Note: "Relative" shall include the following relationships established by blood, marriage, or legal action: spouse, mother, father, son, daughter, sister, brother, mother-in-law, father-in-law, sister-in-law, brother-in-law, son-in-law, daughter-*

in-law, stepparent, stepchild, aunt, uncle, nephew, niece, grandparent, grandchild, or cousin. The term also includes domestic partners (a person with whom the employee's life is interdependent and who shares a common residence) and a daughter or son of an employee's domestic partner.

NYSERDA maintains a directory of individuals who meet the qualifications to participate as Fellows in this program. Fellows may use the ["Join Directory"](#) link on the program page to submit their application either before or after they connect with the Employer. Employers are granted access to this directory of Fellowship candidates upon completion of their own program eligibility verification. Alternatively, eligible Employers may propose a person for the Fellowship who is not in the directory. That person is required to join the directory as part of the fellow eligibility process.

Priority Population List for the Program

- Displaced homemakers
 - A homemaker is an individual who provides unpaid services to family members in the home while reliant on income of a family member.
- Low-income individuals (whose household's total income is below or at 60% of the State Median Income, or whose household has been determined eligible for or is receiving assistance through the Home Energy Assistance Program (HEAP), Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), or other human service benefit programs).
- Indians, Alaska Natives, and Native Hawaiians. "Indian" is a member of a federally recognized Indian tribe.
- Individuals with disabilities (includes individuals who are in receipt of Social Security Disability Insurance).
- Older individuals (age 55 and older).
- Previously incarcerated individuals.
- Individuals experiencing homelessness.
- Individuals who have aged out of the foster care system.
- Individuals who are:
 - English language learners are individuals who have limited ability in reading, writing, speaking, or comprehending the English language.
 - Individuals who have low levels of literacy (an individual is unable to compute or solve problems, or read, write, or speak English at a level necessary to function on the job, or in the individual's family, or in society); and
 - Individuals facing substantial cultural barriers.
- Eligible migrant and seasonal farmworkers. Individuals who have been primarily employed in agricultural or fish farming labor that is characterized by chronic unemployment or underemployment.
- Individuals within two years of exhausting lifetime TANF eligibility.
- Single parents (including single pregnant persons).
- Long-term unemployed individuals (unemployed for 27 or more consecutive weeks).
- 16- to 24-year-olds who are enrolled in or have completed a comprehensive work

preparedness training program such as those offered by Boards of Cooperative Education Services (BOCES), technical high schools, Conservation Corps, YouthBuild, and AmeriCorps. The training program must include a combination of rigorous clean energy education with hands-on technical training. Eligibility of work preparedness programs under this category will be considered on a case-by-case basis; and

- Incumbent or unemployed fossil fuel workers.

Anticipated Timeline

Eligible Employers should plan to apply to the program first and allow approximately [4-8] weeks to confirm eligibility. Fellows and Fellowship applications are approved in a step that takes approximately [3 – 4] additional weeks. This timeline may be extended if incomplete materials are submitted, or additional information is needed from the Employer or the Fellow. Fellows should plan to work full-time throughout the 15- month Fellowship.

IV. Administering the Fellowship Program

Steps at a Glance

1. Following an executed Agreement with NYSERDA, the fellow may begin work.
2. Provide an overview of services to its Fellows by close of business of the Fellow's first day.
3. The Employer must work with the Fellow to complete and submit a Fellowship Plan (see Attachment B: Fellowship Plan, Section III).
4. The Fellow will have a preliminary meeting with BronxWorks within the first 30 days of employment. The Fellow will be required to meet with BronxWorks on a quarterly basis to support their success in the Fellowship.
5. Per the discretion of a NYSERDA contractor, Fellows will commence with professional development Cohort Services offered by a NYSERDA contractor.
 - NYSERDA contractor servicing continues throughout the 12-month employment period.
6. The Fellow completes the 15-month Fellowship.

A successful Fellowship program will be one that supports the Fellow's growth and opportunity to further explore a particular field of work. A Fellowship can be designed to support a range of activities including study in a specific field, innovative activities, research to advance work on a particular issue, developing a new community-based organization or initiative, or training and reflection. All entities must provide a brief description of the climate justice role and/or activities that the Fellow will be expected to complete. A detailed Fellowship plan will be submitted as one of the initial contract milestones using a template supplied by the NYSERDA Project Manager.

Fellowship Plan

The Employer and Fellow must submit a mutually agreed upon Fellowship plan for the full employment period (See Attachment B). Fellowship Plans must:

- Advance climate justice and/or clean energy priorities in the Bronx or Queens and fall within the eligible project focus areas including but not limited to energy (e.g., benchmarking), retrofits, analysis (e.g., audits), policy (e.g., LEED assessment), outreach and events, inventory, social justice, etc.
- Include a general outline of the types of climate justice and/or clean energy activities the Fellow will undertake over the 15 month period.
- Have an initial high-level idea of the theme and shape of the final deliverable or capstone project the Fellow will produce upon completion of the program with the understanding that this may change once the Fellow is onboarded and will require final review and approval by a NYSERDA Project Manager. Examples of a final deliverable or capstone project include but are not limited to:
 - Conducting energy benchmarking/disclosure requirements that protect and empower tenants with information about the energy use intensity and affordability of their housing stock.
 - Developing a comprehensive strategy to encourage investment by anchor institutions to equitably address climate change and local community wealth building.
 - Delivering energy efficiency education and resources to community members through a series of workshops, tabling events, and media.
 - Analyzing specific clean energy curriculum and exploring avenues to incorporate community voice in curriculum and programs.
 - Supporting and strengthening grassroots community-based collaboration with sector-based employment partners.
 - Developing and/or implementing strengths-based community climate change/resilience planning strategies, policies, and projects.
 - Facilitating partnership building and supporting clean energy organizations' use of technology to address identified needs relative to the disproportionate impacts of climate change.

Payments

Payments from NYSERDA will be made to the Employer only and will be made on a milestone basis. The materials submitted for each milestone payment will include monthly reports of Fellow activities, invoice cover sheets and supporting documentation in the form of paystubs, demonstrating hours worked, wages and benefits paid, etc.

NYSERDA will not reimburse for wages covered by any federal or state loan or grant program.

Reporting

An Employer must agree to the following terms and conditions regarding reporting. Specifically, the employer agrees to:

- Submit monthly milestone reports including a summary of Fellow activities, invoice cover sheet, and pay stubs.
- Keep records of Fellow progress and evaluation according to the Fellowship plan and make these records available to NYSERDA upon request.
- Acknowledge that failure to maintain the required Fellowship records will result in disallowance of Fellowship funds.

- Acknowledge that on-site and / or remote fiscal and programmatic monitoring of contract activities may take place at regular intervals during the contract by either NYSERDA or NYSDOL staff. Requested records must be made available to representatives during these monitoring visits.
- Notify NYSERDA in writing if any Fellow is terminated or resigns. This notification must be made within two weeks of the change in employment status.

NYSERDA reserves the right to terminate Employers from the Program who receive valid complaints or other serious charges from Fellows, employees or new hires.

V. Application Considerations

Applications that meet solicitation requirements will be reviewed and evaluated by the NYSERDA and NYSDOL team. NYSERDA will notify each applicant whether or not the application was approved. NYSERDA reserves the right to require an interview or request additional information from applicants before the final contract award decision. NYSERDA also reserves the right to eliminate from further consideration any application deemed to be substantially or materially non-responsive to the requirements of this PON or the requests for information contained herein.

Additionally, NYSERDA reserves the right to accept or reject applications based on factors including, but not limited to the following:

- Geographical coverage in the Bronx or Queens.
- Institutional diversity or partnership with minority serving institutions.
- Consideration of the impact on, and benefits to, a diversity of communities, including low-income communities.
- The degree to which the applicant has the resources (human and financial) to be able to support the Fellow(s).
- Diversity of awards, including multiple locations, distribution across entity types, and program structures.
- The degree to which the proposed Fellowship directly addresses NYSERDA's mission and strategic goals.
- Past performance under prior NYSERDA agreements.

Offering employment following the Fellowship is encouraged, but not required.

Should any changes be made to this solicitation, notification will be posted on the "[Funding Opportunities](#)" section of NYSERDA's website.

General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your application. Review should include whether it is critical for evaluating an application, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the applicant wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Applicants are required to answer questions during application submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the applicant has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSEDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSEDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEDA, the prospective contractor must also certify to NYSEDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSEDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSEDA anticipates making multiple awards under this solicitation. NYSEDA anticipates a contract duration of 15 months with a 3-month grace period for a total of 18 months unless NYSEDA management determines a different structure is more efficient based upon applications received. A contract may be awarded based on initial applications without discussion, or following limited discussion or negotiations pertaining to the Fellowship Application. Each application should be submitted using the most favorable cost and technical terms. NYSEDA may request additional data or material to support applications. NYSEDA will use the Sample Agreement to contract with successful applicants. NYSEDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. Applicants should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSEDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSEDA agreement.

Accessibility Requirements - NYSEDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSEDA's Accessibility Requirements](#).

Limitation - This solicitation does not commit NYSEDA to award a contract, pay any costs incurred in preparing an application, or to procure or contract for services or supplies. NYSEDA reserves the right to accept or reject any or all applications received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEDA's best interest. NYSEDA reserves the right to reject applications based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSEDA reserves the right to disqualify applicants based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The applicant shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When an applicant is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Applicants must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The applicant shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the applicant or former officers and employees of NYSERDA, in connection with applicant's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The applicant must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Applicants are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSEDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSEDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSEDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence and Employer Eligibility – NYSEDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess an application relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in an application. NYSEDA may conduct due diligence on some or all applications based on NYSEDA's current guidelines at the time of a review. NYSEDA staff may follow up with applicants to request additional information or clarification regarding the application, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the application. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any application raised by NYSEDA staff. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with an application; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for applicant's business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of an application, or the prospects for commercial success of the applicant's business (whether directly related to, or unrelated to the specific elements in an application). Due diligence may include discussions with applicant's former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSEDA personnel or contractors and prior to finalization of a contract award, any information gleaned in diligence may be used to determine approval of an application or apply a program policy factor.

Home Electrification and Appliance Rebates (HEAR) Appliance Upgrade Program - Application for Retailer and Contractor Enrollment

Program Opportunity Notice (PON) 5859

Applications accepted through December 31, 2026, by 3:00 PM Eastern Time*

I. INTRODUCTION

The U.S. Department of Energy (DOE) has introduced the Home Electrification and Appliance Rebates (HEAR) program using funding from the Inflation Reduction Act (IRA). The IRA established population-based formula grant funding to be provided to State Energy Offices to develop and implement programs under administrative rules established by DOE. NYSERDA recently received approval from the DOE to administer an Appliance Upgrade Program (Program) under HEAR that will provide rebates to New Yorkers for a pre-defined list of measures supporting energy efficiency and electrification improvements (Qualified Electrification Projects, QEP). NYSERDA is offering these prescriptive rebates for households below 150% AMI (State's Area Median Income). The formula grant amount to NYS is \$158.4 Million through 2031, with a portion of the total formula grant used for the Program.

Through the Program, NYSERDA intends to offer rebates for QEPs for the purchase and installation of ENERGY STAR® heat pump clothes dryers, including all-in-one washers-dryers with a heat pump dryer, and electrical wiring and service panel upgrades necessary for such appliance installations to Customers in New York State. NYSERDA intends to expand the available measures to include induction stoves/cooktops/ranges and will update this PON once they are available. Program Participants include Customers as well as Participating Contractors and Regional Clean Energy Hub (Hub) representatives applying on their behalf. Through this PON, NYSERDA seeks to develop a network of Participating Retailers and Contractors for the Program. Future revisions of this solicitation will also include additional detail on the rebate offerings for Program Participants and will include a link to the Program Manual as well as a website.

The requirements, conditions, and procedures of the Program are subject to DOE approval. NYSERDA reserves the right to make changes to the Program, including changes to the rebate and incentive offerings, , including but not limited to amount, timing, recipient, structure, rebate and incentive caps and total budget available. Any changes to the Program will be done via a modification to the Program Manual with notice provided to Program Participants. NYSERDA will make reasonable efforts not to decrease the rebate and incentive levels. If it becomes necessary to change the rebate and incentive offerings, NYSERDA will attempt to give reasonable notice to Program Participants, including Participating Retailer and Contractors. Program changes will be posted on the NYSERDA website, under PON 5859 and can be found at the following web page:
<https://www.nyserdanys.gov/Funding-Opportunities/Current-Funding-Opportunities>.

II. PROGRAM DESCRIPTION

Program Participants will be authorized for the coupon reservation of Appliance and Participating Contractor Installation Coupons (Installation Coupons) after their income and measure eligibility is acquired, reviewed, and approved by NYSERDA's Implementation Contractor (IC). Customers, Participating Contractors, and Regional Clean Energy Hub representatives will have the ability to apply and reserve coupon(s) for Customers as Program Participants. Income-eligible New York State residents will be eligible for rebates as outlined in the Program Manual (Attachment A).

Per Section I, through this PON, NYSERDA seeks to develop a network of Participating Retailers and Contractors for participation in the Program. The Program will use a "non-connected" pathway where Participating Retailers and Contractors will perform program tasks through a NYSERDA-built system in Salesforce, known as the MyEnergy Portal.

This PON will be updated if NYSERDA establishes a "connected" Participating Retailer path (built with application programming interfaces (APIs)) with the DOE.

Participating Retailers will create and upload batches of coupons for Program Participants to reserve in the MyEnergy Portal (through the application process), as noted above. Please refer to the Program Manual (Attachment A) for additional information on the coupon process and criteria.

Participating Contractors will receive and redeem Installation Coupons in the MyEnergy Portal to provide Customers with their eligible rebates for appliance installation, electrical wiring and/or panel upgrades. Participating Contractors will also submit Quality Install (QI) documentation in the MyEnergy Portal for all Program work and installations to receive Installation Coupon reimbursement and Participating Contractor Incentives.

The Implementation Contractor (IC) will manage the payment process once all the necessary documentation is received from the Participating Retailer and Contractor and approved; the IC will ensure a timely project review.

III. RETAILER APPLICATION REQUIREMENTS

Interested retailers should refer to section 5 of the Program Manual (Attachment A) for details on how to enroll in the program and enrollment requirements. The retailer steps to enrollment include the following:

- Fill-out and submit the Retailer Application
- Submitting a Certificate of Insurance (COI)
- Signing and submitting the Retailer Participation Agreement
- Developing batches of randomized alphanumeric coupons (minimum of 25 coupons) that can be used at retailer locations or online website
- .

IV. CONTRACTOR APPLICATION REQUIREMENTS

Contractors may apply for enrollment as a Participating Contractor in the following categories: appliance installer, electrician (licensed and unlicensed), and licensed plumber. Contractors may apply for enrollment in more than one category if they meet the Program requirements outlined in the Program Manual. Interested contractors should refer to section 6 of the Program Manual for details on how to enroll in the Program and enrollment requirements. All interested contractors must submit a signed Contractor Application, which includes a signed Contractor Participation Agreement, Certificate of Insurance (COI), (2) customer references (new contractors only); and (3) trade-specific requirements

V. QUALIFICATION PROCESS

NYSERDA's Retailer and Contractor Recruitment Consultant (Recruitment Consultant) is responsible for developing and maintaining the list of Participating Retailers and Contractors as well as reviewing the submissions through this PON, and add those who qualify to the public-facing list on the NYSERDA website. They will review

the retailer and contractor submissions through this PON, and add those who qualify to the public-facing list on the NYSEERDA website. Participating Retailers and Contractors will receive training and support from the Recruitment Consultant on the MyEnergy Portal and the overall non-connected process, with NYSEERDA and/or the Recruitment Consultant providing the training materials. The Recruitment Consultant will work with NYSEERDA to ensure that Participating Retailers adhere to the requirement outlined in their Participation Agreement.

Participating Retailers will be removed from the Participating Retailer list if they fail to comply with the terms outlined in the Participation Agreement such as:

- Applying appliance coupons to ineligible products (e.g., non-ENERGY STAR® certified)
-
- Failure to apply the correct coupon amount at the point-of-sale to a program participant's appliance purchase
 - Transactions where the Participating Retailer applies rebate amounts that are in excess of the customer's eligible amount indicated on the Coupon will not be reimbursed by NYSEERDA.

Participating Contractors will be removed from the Participating Contractor list if they fail to comply with the terms outlined in the Participation Agreement such as, but not limited to:

- Submitting fraudulent QI documentation
- Poor QI issues that are not corrected after NYSEERDA's Quality Assurance inspection

VI. APPLICATION SUBMISSION

Participating Retailers

Interested retailers must complete the Seamless form titled [HEAR Appliance Upgrade Program Participating Retailer Application \(Application\)](#).

One application shall be submitted for each retail company, not one per retailer location; enrollment as Participating Retailers is done on a per company, not per location, basis. Retailers that submit the Application are not bound to any terms and conditions. Enrollment for full participation requires the retailer to sign the Retailer Participation Agreement (Agreement) included herein as Attachment B. .

Participating Contractors

Interested contractors must complete the application titled "Contractor Application" found [here](#) and sign the Contractor Participation Agreement within the Application. Contractors who are qualified to participate in other NYSEERDA programs do not need to provide the two customer references in the Application. This section is only required for contractors new to NYSEERDA.

Retailers that currently employ any of the above Participating Contractor categories must also apply for enrollment as a Participating Contractor in order to be eligible to receive Customer rebates and incentives. Retailers who only provide installations through a third party do not need to apply as a Participating Contractor, but they are strongly encouraged to work with Participating Contractors who can perform Program installations.

Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Department's Designated Contacts for this Procurement are Ryan Moore, Senior Project Manager at (518) 738-2850, Nicole Munz, Project Manager at (518) 946-1844 or Chris Corcoran, Assistant Director (for technical questions). Email contact regarding technical questions is only permitted through IRAretail@nyserda.ny.gov. If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 362-0489 or NancySolicitations@nyserda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

VII. * Faxed, or emailed proposals will not be accepted. Incomplete proposals (e.g., missing application) may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been completed/included in the application. The online application system closes promptly at 3pm, files in process or attempted edits or submission after 3pm Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes.

The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/-/media/Project/Nyserda/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its

subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEDA, the prospective contractor must also certify to NYSEDA whether it has filed such certification with the Department. The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSEDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Accessibility Requirements - NYSEDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see NYSEDA's Accessibility Requirements on the [Doing Business with NYSEDA page](#) or download [NYSEDA's Accessibility Requirements \[PDF\]](#).

Limitation - This solicitation does not commit NYSEDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSEDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEDA's best interest. NYSEDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSEDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information and the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSEDA after the award of a contract, NYSEDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Hydrogen Fuel Cell-Based Firm Capacity and Industrial Application Design
Program Opportunity Notice (PON) 5944
Up to \$3.7 million Available

*All, some, or none, of the available funds may be awarded.
NYSERDA reserves the right to extend and/or add funding to the
solicitation should other program funding sources become available.*

Proposals Due: October 6th, 2025, by 3:00 PM Eastern Time

The New York State Energy Research and Development Authority (NYSERDA) announces the availability of up to \$3.7 M to support hydrogen fuel cell-based firm capacity design for dispatchable zero-emission peaking power plants or industrial applications in New York State. The solicitation's objective is to determine the most viable technologies and help future investment and evaluation in this area.

This solicitation includes the following two categories. Each proposal should select one category based on the application that the proposals focuses on:

- Category A** – Firm Capacity
- Category B** – Industrial Application

The table below shows the two phases with required cost share, period of performance, and expected funding.

Project Phase	Minimum Proposer or External Cost Share (non-NYSERDA funding) *	NYSERDA Funding per Award	Anticipated Period of Performance (months)	Anticipated Number of Awards
Phase 1: Initial Scoping	25% of total project phase cost	Up to \$250,000	6 months	2~4 awards
Phase 2: Feasibility Study and Preliminary Design	25% of total project phase cost	TBD	12- 24 Months	1~2 awards

*The cost share percentage is based on total project cost (NYSERDA share + proposer/external cost share), not solely NYSERDA's contribution.

Project Structure

NYSERDA anticipates issuing two-phase contracts with a maximum, “not-to-exceed” amount for the first phase and the second phase of project funding only being awarded on a contingent basis as described below. NYSERDA reserves the right not to move forward with the second phase of an award, dependent on the Go/No-Go decision at the end of Phase 1 and availability of funding. Proposers must include the full scope of both phases of the project in their proposal.

The Phase 1 outcomes of each project will be evaluated to determine if Phase 2 of the project will continue to be funded. Phase 1 evaluations will occur on a rolling basis as each awarded contract’s Phase 1 is completed. The figure below shows the expected schedule and phase-gate structure for projects awarded under this solicitation.

Figure 1: Schedule and Phase-Gate Structure for PON 5944

Project Teaming Arrangement

At a minimum, a project team should consist of the following:

- Engineering, Procurement, and Construction (EPC) firm,
- an operator or owner for a peaking power plant or industrial facility in New York State,
- a hydrogen fuel supplier or producer, and
- original equipment manufacturer(s) for major equipment.

Applicants should succinctly describe the role, qualifications, experience, and capabilities of the proposed project team partners to execute the project plan successfully. Strong preference will be given to applicant teams that include Engineering, Procurement, and Construction (EPC) firm(s) with experience in deploying hydrogen-based power generation or industrial projects.

Hydrogen Partners List

Proposers wishing to find and collaborate with colleagues to perform research and submit proposals with may use the Advanced Fuels and Thermal Energy Innovation program’s partnering platform, [the Hydrogen Partners List](#).

The platform is intended to help potential proposers find other teams with complementary capabilities when submitting proposals to NYSERDA Program Opportunity Notices issued by the Hydrogen and Clean Fuels Program. Submitting teaming information is completely optional, and not required. By enabling and publishing the teaming partner list, NYSERDA is not endorsing, sponsoring, or otherwise evaluating the qualifications of the individuals and organizations.

Proposal Submission

Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

Questions? Potential responders are advised that under New York State Finance Law Section 139-j, communication on procurements can be made only to designated contact persons. The Designated Contacts for this Procurement are:

- No communication intended to influence this procurement is permitted except by contacting Eliseo Curcio (Designated Contact) by e-mail at PON5944@nyserda.ny.gov (for technical questions).
- If you have contractual questions concerning this solicitation, contact Nancy Marucci (Designated Contact) at (518) 862-1090, ext. 3335 or nancysolicitations@nyserda.ny.gov.

Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals.

The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted.

If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nyserda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. Introduction

A. Climate Act and Clean Hydrogen

As the U.S. energy landscape undergoes a historic transformation, New York State is committed to putting forward policies and programs that send a strong signal that public-private partnerships can catalyze economic growth and advance the State's energy transition. This commitment has accelerated the growth of renewable energy and widespread electrification while ensuring innovation and technology are advancing along with manufacturing competitiveness and supply chain security.

B. NYSERDA Clean Hydrogen Efforts

New York has undertaken several key efforts to assess potential roles for clean hydrogen. In April 2025, NYSERDA released its [New York State Hydrogen Assessment](#)¹, a comprehensive analysis of hydrogen's potential role to decarbonize hard-to-electrify sectors and includes analysis to evaluate the feasibility, costs, and deployment opportunities for hydrogen, employing techno-economic optimization modeling and total cost of ownership analysis.

NYSERDA has also convened a series of meetings, listening sessions, and direct discussions with individuals and groups across the stakeholder landscape to better understand diverse perspectives on clean hydrogen in New York and to prioritize investment focus areas. Through its solicitation efforts in clean hydrogen, NYSERDA has awarded up to \$11.3 million for fifteen clean hydrogen innovation projects to date. More information about NYSERDA's efforts in clean hydrogen can be found at <https://www.nyserda.ny.gov/hydrogen>.

In December 2024, the Department of Public Service filed the 2026-2030 draft proposal for innovation and research, which includes investment in hydrogen resources and infrastructure.²

C. Federal Clean Hydrogen Programs and Policy

The federal government also recognizes the importance of hydrogen as a potential carbon-free energy carrier that can enable a clean electric grid. As outlined in the DOE Clean Hydrogen Commercial Liftoff report, the U.S. clean hydrogen market is poised for rapid growth, accelerated by DOE Hydrogen Hub funding, DOE's Hydrogen Shot, and decarbonization goals across the public and private sectors.³ The DOE Hydrogen Commercial Liftoff report also highlights hydrogen's potential in decarbonizing the demand gap in a fully decarbonized grid by providing long-duration and seasonal storage, as well as peak shaving.

In January 2025, the US Department of Treasury and Internal Revenue Service (IRS) issued final rules for the 45V Clean Hydrogen Production Tax Credit (PTC) enacted by the Inflation Reduction Act of 2022, which

¹ <https://prod-cm.nyserda.ny.gov/-/media/Project/Nyserda/Files/Publications/Energy-Analysis/NY-Hydrogen-Assessment-complete-acc.pdf>

² <https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId=%7BE0ECC98F-0000-CD18-A8C4-B019EB4E767E%7D>

³ U.S. Department of Energy. "Pathways to Commercial Liftoff: Clean Hydrogen" March 2023. <https://liftoff.energy.gov/wp-content/uploads/2023/05/20230523-Pathways-to-Commercial-Liftoff-Clean-Hydrogen.pdf>

will help to greatly reduce the cost of clean hydrogen. Under the PTC, clean hydrogen producers are eligible for up to \$3 in tax credits (adjusted for inflation) per kg of hydrogen produced with greenhouse gas emissions less than 0.35 kg CO₂e/ kg H₂ and adjusted down for higher CO₂e/kg H₂ emission tiers.⁴

In 2024, the U.S. Department of Energy (DOE) Hydrogen and Fuel Cell Technologies Office (HFTO) in partnership with the National Renewable Energy Laboratory (NREL) announced a request for proposals to support projects to reduce the capital costs of durable and high-performing fuel cells and water electrolyzer materials.⁵

II. Background

A. Growing Firm Capacity Demand in New York State

As New York moves to decarbonize its grid in accordance with the targets mandated in the CLCPA and outlined in the Scoping Plan, electrification of large parts of the State's economy and the growing proportion of renewably produced electricity on the grid will result in imbalances of electricity supply and demand on intra-day, inter-day, and seasonal timescales.^{6,7} The ability of renewable production resources like solar and wind to meet this shift in demand on intra- and inter-day timescales will depend heavily on the deployment of short duration energy storage up to 8 hours provided by batteries.

To manage seasonal imbalances on much longer timescales than 8 hours between predicted peak renewable production in the spring, summer, and fall with increased electricity demand in the winter, a zero-carbon, firm dispatchable resource of at least 17 GW would be needed by 2040.⁸ This resource could take the form of hydrogen, which could be produced via electrolysis powered during periods of peak renewable electricity generation in the spring through autumn and dispatched during the winter for periods of up to 100 hours in order to ensure grid reliability and stability (See Figure 2).⁹ Furthermore, most of such demand will be concentrated in downstate and urban areas while more renewable electricity is expected to be available in upstate.¹⁰

B. Peaker Power Plants in New York State Today

The US Government Accountability Office defined peaker power plants as power plants that have a capacity factor of 15 percent or less; and have a nameplate capacity of greater than 10 MW of electricity.¹¹ Across New York State, 62 fossil fuel-fired peak demand power generation units (peakers) with a combined nameplate capacity of greater than 12 GWs, are used to meet peak system capacity requirements including gas turbines and aging steam turbines. Of these peaker power plants in New York State, 88% have a nameplate capacity of 40 MW or greater and approximately 41 plants use natural gas as a primary fuel source in gas turbines.¹² A map of their locations across the state is shown in Figure 3. In its fleet of peaker units, New York State has approximately 4.5 GW of active fossil-fired simple cycle combustion turbines (SCCTs), located almost entirely in New York City, Long Island, and the Lower Hudson Valley. Many of these SCCTs have low utilization, generating electricity less than 5-10% of the year, and are approaching an average age of 50 years.¹³

¹³ New York State Department of Public Service, (December 28, 2022) "New York's 6 GW Energy Storage Roadmap: Policy Options for Continued Growth in Energy Storage", CASE 18-E-0130, pp.23-24.

Figure 3. Map of Fossil Fuel Fired Peaker Plants in New York State

In December 2019, the New York State Department of Environmental Conservation (DEC) issued requirements to reduce emissions of nitrogen oxides from peaking generation units (referred to as the “Peaker Rule”). The Peaker Rule, which phases in compliance obligations between 2023 and 2025, will affect approximately 3,300 MW of SCCTs located mainly in the lower Hudson Valley, New York City, and Long Island. In addition, NYPA is required to publish a plan by May 2025 to phase out the production of electricity from its 7 small natural gas plants in New York City and Long Island totaling 517 MW by December 31, 2030, unless those plants are determined to be necessary for electric system reliability, or emergency power service.¹⁴

The New York Independent System Operator (NYISO) in its annual “Gold Book” report estimates peaking power demand increases of 3.7% in winter months and 0.7% in summer months over the next 30 years.¹⁵ The combination of New York’s aging infrastructure, increased peaking power demands, near-term peaker plant emission reduction targets, and ambitious, longer-term carbon-free electricity goals provides an opportunity to replace these inefficient, high-emitting peaker units with new technologies.

C. Hydrogen to Decarbonize Industrial Applications

Industrial manufacturing process such as glass, cement, paper industries currently use fossil fuels to generate heat and electricity. Both the DOE commercial liftoff report¹⁶ and NYSERDA hydrogen assessment report mentioned hydrogen as potential decarbonization solution for the industrial applications.

¹⁴ NYISO 2023-2032 Comprehensive Reliability Plan. https://www.nyiso.com/documents/20142/40459480/05a_2023-2032_CRP_OC_101123.pdf/39982b1d-e84c-9971-3feb-8f97a01f8db6

D. Data centers are expected to grow significantly as artificial intelligence (AI) technologies become widely adopted. Data centers may quickly create the new demand for clean electricity in the next decade. Hydrogen-Based Power Generation Technology

Existing gas turbine sites could be retrofitted to combust a natural gas/hydrogen blend or pure hydrogen, or new hydrogen combustion turbine could be deployed. In this solicitation, however, generating power using combustion turbine is not considered.

Hydrogen fuel cells can generate electricity through an electrochemical reaction combining hydrogen and oxygen with only water and heat as the byproducts. The process has no carbon emission and no NOx emissions.

As of August 2024, New York State has approximately 22 operating fuel cell electric power generators across 15 facilities with about 58 megawatts (MW) of total nameplate electric generation capacity located mainly in the lower Hudson Valley, New York City, and Long Island.¹⁷ The majority of these fuel cells in operation use natural gas as their primary fuel source and the largest of these generators has a power generation capacity of 6 MW.

Fuel cell systems can generate electricity at efficiencies up to 60 percent, which is higher than conventional gas turbine power plants that typically generate electricity at efficiencies of around 35 percent.¹⁸ In addition to greater conversion efficiencies, fuel cells also offer greater potential for emissions reductions in disadvantaged communities. However, for fuel cells to become commercially competitive to turbine-based technologies, more research and development is required to demonstrate a competitive levelized cost of electricity, reduce capital costs, extend durability, improve efficiency, and improve fuel flexibility.¹⁹

Other hydrogen-capable technologies include linear generators, which offers the benefit of fuel flexibility. The same equipment can use any clean fuels (e.g. hydrogen, natural gas, biogas, ammonia).

E. Hydrogen production

Hydrogen can be produced somewhere else and distributed to the power plant site. Hydrogen can also be produced onsite with the power generation equipment. There are various clean hydrogen production methods, as shown below.

- Hydrogen can be produced from water and electricity using electrolysis. The only product of this process are hydrogen and oxygen. Electricity used for this process can come from renewables, nuclear reactors, or from the grid.
- Hydrogen can also be derived thermally from fossil or biomass using steam methane reforming (SMR), methane pyrolysis, or thermally from water using thermolysis. Some of these processes result in CO₂ emissions but can be integrated with carbon capture to reduce emissions. Methane

¹⁷ www.eia.gov/state/print.php?sid=NY

¹⁸ U.S. Energy Information Administration, "Preliminary Monthly Electric Generator Inventory", April 24, 2024. [Preliminary Monthly Electric Generator Inventory](#).

¹⁹ [Achieving fuel flexibility and high efficiency in diesel engines through multiple injection strategies - ScienceDirect](#)

pyrolysis involves thermal decomposition process, in which methane is heated at high temperature in the absence of oxygen. The process generates hydrogen and solid carbon, without carbon dioxide or NO_x. Generating hydrogen onsite using this method can leverage existing gas pipeline infrastructure.

- Hydrogen may also be found underground in naturally occurring reservoirs.

F. Hydrogen Distribution

Efficient distribution of hydrogen in large volumes to consumers is one of the largest challenges to overcome with implementing hydrogen-based power generation solutions. Bulk volumes of hydrogen today are either transported as a liquid in cryogenic liquid tankers via road, rail, or ship or as a gas via pipelines or compressed gas tube trailers.²⁰

Despite its associated high initial capital costs, there are approximately 1,600 miles of hydrogen pipelines operating in the United States today.²¹ Owned by merchant hydrogen producers, these pipelines are deployed in regions with substantial demand (hundreds of tons per day) that is expected to remain stable for decades. In New York State, Linde, Inc. operates a small hydrogen pipeline in Niagara County that transports low pressure hydrogen gas.²² Cryogenic liquid tankers and gas tube trailers are deployed in regions where demand is at a smaller scale, infrequent, or still emerging.

Ongoing research and demonstrations of other hydrogen delivery methods such as supply via chemical carriers (e.g., ammonia, or other Liquid Organic Hydrogen Carriers) are underway, but more research is needed to prove their reliability and effectiveness in bulk applications.²³ Continued research, development, and demonstration (RD&D) is still needed to reduce capital costs, reduce variable costs, and improve the reliability, efficiency, and safety of supplying hydrogen at scale especially into urban areas where zero-emission power generation needs are highest.

G. Onsite Hydrogen Storage

Onsite hydrogen storage also poses a challenge for hydrogen-based technologies in the power generation sector. Sites must have sufficient supply of hydrogen readily available to quickly ramp up and maintain power generation to meet grid demands.

Hydrogen storage options primarily in use today are physical-based storage options which include gaseous storage tanks, insulated liquid tanks, and underground geologic storage. Gaseous storage tanks are volume limited because of the low density of hydrogen gas and tend to operate at higher pressures, which can pose a safety risk for operation in urban areas. Cryogenic liquid storage tanks are the most common way to store large quantities of hydrogen at industrial sites, but require expensive, super-insulated low-pressure vessels.

²⁰ Seyed Ehsan Hosseini, "Chapter 5 - Hydrogen storage and delivery challenges", Fundamentals of Hydrogen Production and Utilization in Fuel Cell Systems, Elsevier, 2023, Pages 237-254.

²¹ US Department of Energy, HFCO, "Hydrogen Pipelines". <https://www.energy.gov/eere/fuelcells/hydrogen-pipelines>

²² "Pipeline Safety Info for Linde Niagara Falls Pipeline," Linde 2024. www.pipelinesafetyinfo.com/user/file/New%20York/Linde.pdf

²³ US Department of Energy, HFCO, "Hydrogen Delivery". <https://www.energy.gov/eere/fuelcells/hydrogen-delivery>

Regardless of the quality of the insulation used in the vessels, some heat will reach the tank over time and cause the liquid hydrogen to boil and vent, which limits the ability to store hydrogen long term as a cryogenic liquid. Underground geologic storage options allow for large volumes of hydrogen to be stored at lower pressures for long periods but are limited to areas with specific geological characteristics. Options for underground geologic storage for hydrogen include storage in salt caverns, depleted gas wells, and aquifer structures, or in specially engineered rock caverns. Geologic bulk storage is common practice within the gas industry and in the United States alone there are three hydrogen salt caverns in operation which store a total of 332 GWh of hydrogen gas.²⁴

Other hydrogen storage technologies are under development but require more research to prove their effectiveness at scale, for example, material-based solutions including using sorbents (adsorbents or absorbents), chemical carriers (ammonia, methanol, etc.), or metal hydride options to store hydrogen.²⁵ Material-based solutions can typically be operated at lower pressures than their physical-based counterparts, which can be attractive for sites located in high-density areas with a lower tolerance for safety risks.

III. Program Requirements

A. Requirements

The following requirements apply to both Phase 1 and Phase 2 designs.

i. Hydrogen-based Design Requirements:

1. Hydrogen fuel cell-based solution for peaking power plant with a nameplate generation capacity of at least 10 MW, and can operate at a capacity factor ranging from 2% to 15% in a year.
2. Hydrogen fuel cell-based solution to generate energy for industrial applications and has a minimum nameplate generation capacity of 1MW. Industrial applications include those using fuels to generate heat for the manufacturing process, such as glass, cement, paper or metal, as well as those using fuels to generate electricity for industrial purposes, such as data centers.
3. This solicitation focuses on using fuel cells for firm capacity or industrial applications. Generating power with combustion turbines are not qualified in this solicitation.
4. Blending hydrogen with other fuels is allowed at the initial stage, but the proposal should explain how the selected technology will reach the goal of using 100% emission free clean hydrogen at the site by 2040.
5. Supplying hydrogen to the proposed project site(s) needs to be considered in the design. This includes either generating hydrogen onsite or transporting hydrogen to the site through different options, such as pipelines, barge, rail, truck, etc.
6. Operational requirement: the hydrogen peaking power plant design should be based on dispatch requirement per existing plant operation, or anticipated future grid need for the selected site.

²⁴ Gregoire Hevin, "Underground Storage of Hydrogen in Salt Caverns," Presentation. Nov. 2019. <https://energnet.eu/wp-content/uploads/2021/02/3-Hevin-Underground-Storage-H2-in-Salt.pdf>

²⁵ US Department of Energy, HFCTO. "Hydrogen Storage". <https://www.energy.gov/eere/fuelcells/hydrogen-storage>

Hydrogen facility for industrial application must be designed to meet the respective application requirement at the site.

7. The hydrogen supply and onsite storage should be able to support the expected operational requirement of the power plant or industrial application for the selected site.
8. Emission requirement should be based on DEC guidelines.

ii. Site Selection Requirements

The scope of work for Phase 1 includes selecting a site for the plant (see more details about the scope of work in Section III.B). Proposers are encouraged to choose sites based on the following criteria:

- Sites that can maximize transferability of the study to other peaking power plants or industrial applications in NY.
- Sites that have high likelihood to success in potential future deployment. For example, sites that can secure necessary hydrogen supply delivered to the site without dependence on the uncertainty of pipeline availability and sites that have enough space available for onsite hydrogen storage to support required operation.
- Sites that can leverage existing facilities (e.g. existing interconnection switch yard, faster permit, brown field instead of green field).
- Sites that are critical to support grid reliability and stability based on analysis.
- Sites with supportive local communities.

Additionally, the site needs to pay into the Clean Energy Fund (<https://www.nyserda.ny.gov/About/Funding>) through the electric System Benefits Charge (SBC), unless significant statewide benefits are demonstrated.

iii. Required Equipment Scope for Engineering Design

The following equipment should be included in both Phase 1 and Phase 2 designs:

- Core equipment for power generation for peaking power plant or industrial applications using fuel cell;
- Balance of plant equipment including but not limited to electrical and control system, water, and discharge system;
- Grid interconnection equipment if any modification or new build is necessary to support the anticipated peaking power plant operation with hydrogen;
- Equipment to transport hydrogen to the site or produce hydrogen onsite to support expected volume for power generation; and
- Equipment for onsite hydrogen storage as needed for the plant operation.

Entities not based in or operating in New York can also apply, but with specific requirements: Non-New York-based entities are eligible to apply as a prime recipient or subrecipient if the demonstration site is in New York State. NOTE: All Demonstrations must take place (1) within

New York State, and (2) at a site that pays into the Clean Energy Fund (<https://www.nyserda.ny.gov/About/Funding>) through the electric System Benefits Charge (SBC), unless significant statewide benefits are demonstrated.

B. Scope of Work

The scope of work for both Phase 1 and Phase 2 are described below. Proposals should include information related to the proposed scope of work for both phases in the required proposal attachments. For a list of the required proposal attachments, see Section IV.A Required Proposal Attachments.

i. Phase 1 – Scope of Work

During Phase 1, proposers are expected to complete the Phase 1 analysis, which includes evaluation of different options, completion of high-level designs, initial cost analysis, and identification of the best option for further analysis in Phase 2. The scope of work for Phase 1 should include but not be limited to:

- Site Selection: Identifying target site(s) for this analysis, either for dispatchable peaking power plants or industrial applications ; see Section III.A.ii. for requirements on site selection.
- Identify possible options for the different equipment; see Section III.A.iii. for the equipment scope required for engineering design. For example, hydrogen transportation methods may include pipeline, barge, truck, rail, etc. and it may be transported and delivered to the site in compressed gaseous, liquid, ammonia, or liquid organic hydrogen carrier.
- For each option:
 - 1) Conduct a review of similar applications and arrangements used worldwide to understand best practice and its operational experience. Specify when, where, which project, and what level (as a small-scale pilot or a full-scale commercial operation) that the option has been used (by the proposal team or by others).
 - 2) Evaluate Technology Readiness Level (TRL) and Commercial Readiness Level (CRL) for each option.
 - 3) Provide descriptions, high level functional specifications, illustrations, drawings, and diagrams.
 - 4) Include end-to-end supply chain, equipment, and process (e.g. purification, drying, compression, etc.) necessary to support this option.
 - 5) Identify any existing facilities that might be reused or retrofitted (e.g. storage facilities, ports, railroad sidings, interconnection switchyard, etc.).
 - 6) Estimate initial CAPital EXpenditure (CAPEX) and OPerational EXpenditure (OPEX) assessments and Levelized Cost of Hydrogen (LCOH) based on 20 years and 40 years of operating lives. Include quotes for key equipment and long lead items.
 - 7) For peaking power plant designs, estimate cost of electricity in \$/MWh. For industrial applications, estimate cost of energy generated from the fuel-cell based design. Cost calculation in this phase should be within +/- 50% and based on the anticipated operation at the selected site.
 - 8) Identify any key issues, risks, or potential “showstoppers” associated with this option, such as technical challenges, codes and standards, policy, etc.
 - 9) Compare advantages and disadvantages of each option.

- Based on the Phase 1 analysis and comparison of different options, the proposer should recommend which option is the most practical and worthy to move to Phase 2 design. For the selected option to proceed into Phase 2, the proposer should:
 - 1) Recommend any changes necessary to laws, policies, codes and standards, or other regulation limits relevant to this option for future potential deployment.
 - 2) Develop a community and stakeholder engagement plan.
 - 3) Develop a conceptual site layout and equipment arrangement.
 - 4) Create a preliminary timeline to execute the project to provide an indication of the overall length of time required to implement this option.
 - 5) For peaking power generation, evaluate its grid firming capabilities, including:
 - Ability to provide long term energy storage capacity,
 - Ability to contribute to inertia or maximization of inertia,
 - Ability to provide primary frequency response (PFR),
 - Ability to provide enhanced short circuit contributions and grid strengthening, capability (e.g., generator design optimized to maximize short circuit contribution),
 - Ability to ramp up and down in a short amount of time, and
 - Ability for quick startup and multiple start.
 - 6) For hydrogen facility to support industrial applications, evaluate its capabilities for the specific application, such as reliability, efficiency, etc.

Go/No-Go Decision

At the end of the Phase 1, NYSERDA will conduct a Go/No-Go review for each project. This will occur on a rolling basis as each project completes its Phase 1 scope of work. Funding beyond the Go/No-Go decision point (continuation funding) is contingent upon NYSERDA's Go/No-Go decision and availability of NYSERDA funds. Due to the availability of funding and program considerations, only a portion of the recipients may be selected to receive funding for Phase 2.

During the Go/No-Go review at the end of the Phase 1, NYSERDA will evaluate project performance based on all Phase 1 required scope of work (see above), project schedule adherence, and overall contribution to the program goals and objectives. This will include but not be limited to:

- Degree to which the Phase 1 design package presents a comprehensive evaluation of various technical options.
- The technical readiness level and commercial readiness level of the selected technical option from Phase 1.
- Availability of supply chain and supporting OEMs to provide information necessary in Phase 2.
- Degree to which the community of the selected site will support the technology.
- Degree to which Phase 2 of the selected project will be applicable or partially applicable to provide potential decarbonization solutions for other power generation assets or industrial applications in New York.

ii. Phase 2 – Scope of Work

During Phase 2, proposers are expected to progress the project design and conduct a more detailed assessment of the option identified in Phase 1 to confirm its feasibility. Scope of work for Phase 2 includes but is not limited to:

- Produce schematic drawings for the option selected from Phase 1, including key equipment, processes and systems required, as defined in Section III.A.iii. Equipment Scope for Engineering Design.
- Create design drawings including Detailed Process Flow Diagrams (PFDs), Process and Instrumentation Diagrams (P&IDs), electrical and instrumentation systems design including preliminary Electrical Load Summary (ELS) and Single Line Diagram (SLD), preliminary piping layout.
- Confirm utility and services required to support each option (e.g. electrical load, volume, flow and pressure of the fuel supply, water supply) can be met at the site.
- Specify what upgrades are necessary to the existing facility, if applicable.
- Update Capital Expenditure (CAPEX) and Operational Expenditure (OPEX) assessments and Levelized Cost of Hydrogen (LCOH) based on 20 years and 40 years of operating lives. Include quotes for key equipment and long lead items.
- For peaking power plant designs, update cost of electricity (\$/MWh) from the power plant based on the anticipated operation at the selected site. For industrial applications, estimate cost of energy generated from the fuel-cell based design. Cost calculation in this phase should be within +/- 30%.
- Develop a more detailed site layout for the power plant, including all systems listed in III.A.iii. Equipment Scope for Engineering Design.
- Conduct initial safety, permitting, and codes review of the proposed site layout; include considerations for National Fire Protection Association (NFPA) Fire Code; identify possible safety issues and impacts on the local community; engage relevant authorities, such as DEC, FDNY, and US Coast Guard. Specify key issues and possible mitigation measures.
- Conduct initial community and stakeholder engagement based on the plan developed in Phase 1. Identify potential local community acceptance issues and possible mitigation plan.
- Produce preliminary Project Execution Plan (PEP), including time for permits and long lead items.
- Update evaluation of grid firming capability or capabilities for the specific industrial application.

C. Cost Sharing

The proposal must show non-NYSERDA cost share funding of at least 25% of the total cost of the project. Scoring preference will be given to proposals that best leverage NYSEDA funding by providing greater amounts of non-NYSERDA cost share funding (see IV. Proposal Evaluation). Cost sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered "cash" contributions. Unpaid labor, indirect labor, or other general overhead may be considered "in-kind" contributions. Total non-NYSERDA cost share is the sum of cash and in-kind contributions from non-

NYSERDA sources. NYSERDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred.

Cost share must be verifiable upon submission of the application. Applicants are required to provide written assurance of their proposed cost share contributions in their applications. Upon selection for award negotiations, applicants may be required to provide additional information and documentation regarding their cost share contributions. Cost share contributions must be specified in the Attachment C1 – Milestone Payment Schedule and the Attachment C2 – Budget Form.

Cost share commitments cannot be dependent on some future event, such as receiving a grant, obtaining a loan, monetizing tax incentives, or securing an investor. If funds from a federal source are being proposed as cost share, the applicant must provide a commitment letter from the federal agency as part of the application that specifically commits those funds and identifies the statutory authority that allows those funds to be used for the project scope being proposed.

The applicant is ultimately and legally responsible for providing the entire amount of cost share required, if an award is made, even if the cost share is being provided by a Subcontractor or Subrecipient. The Recipient is solely responsible for managing cost share contributions by the Project Team and enforcing cost share obligations assumed by Project Team members in subawards or related agreements. If the funding agreement is terminated prior to the end of the project period, the Recipient is required to contribute at least the cost share percentage of total expenditures incurred through the date of termination.

The applicant must submit Letters of Commitment from the applicant, all teaming entities, and all cost share providers. If applicable, the letter must state that the party is committed to providing a specific dollar amount or value of in-kind contributions allocated to cost sharing. The following information for each party contributing to cost sharing should be identified: (1) the name of the organization; (2) the proposed dollar amount to be provided; and (3) the proposed cost.

IV. Proposal Requirements

A. Required Proposal Attachments

To submit a Proposal, the proposer must submit all attachments listed below. The goal should be to concisely present the information needed to fully address the proposal evaluation criteria (in Section V.A.i.).

Required Attachments for the Proposal:

- ☐ Attachment A – Proposal Narrative Template
- ☐ Attachment B – Statement of Work Template
- ☐ Attachment C1 - Milestone Payment Schedule
- ☐ Attachment C2 – Budget Form
- ☐ Attachment D – Executive Summary Slide Template
- ☐ Project List – A list of relevant projects that the proposal team has completed in the past.

- ☐ Letter(s) of Commitment from the applicant, all teaming entities, and all cost share providers
- ☐ Resumes/CVs
- ☐ Indirect Cost Rate Supporting Documentation

As part of the proposal package, **applicants must provide a separate tab in Attachment C2 for each Subrecipient that is expected to perform work estimated to be more than \$250,000.** If the total project cost for a vendor is over \$250,000, a budgetary quote from the vendor will be required upon selection for contract negotiation by NYSERDA.

Proposers must carefully review the required attachments to ensure that all required sections are completed. Failure to do so may result in the proposal being rejected as non-responsive. It is the proposer's responsibility to ensure that all pages have been included in the proposal and that they have been timely submitted before the proposal due date.

Proposals that exceed the page limits or fail to follow the format guidelines will be rejected as non-responsive. Proposals deemed non-responsive will not be eligible for awards. If you believe proprietary information must be submitted to provide an adequate proposal, you must comply with the Section VI instructions for submitting proprietary material. Each page of the proposal should state the name of the proposer, the PON number (PON 5944), and the page number.

Proposals determined to be compliant with application procedures and responsive to the solicitation will be subject to review by a scoring committee comprised of internal and external technical experts in accordance with Section V. Proposal Evaluation. Only the most technically meritorious proposals will be awarded an invitation from NYSERDA to enter into an agreement. Proposals not meriting an award for contracting may be debriefed as requested.

B. Compliance with New York State Finance Law

In compliance with §139-j and §139-k of the State Finance Law (see Section VI, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

V. Proposal Evaluation

A. Proposal Evaluation

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below **listed in order of importance.** At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposal. Proposers will be notified if they are requested to attend an interview.

i. Evaluation Criteria

Team Experience and Capabilities

- The proposed team structure includes the minimum required team partners: an Engineering Procurement and Construction (EPC) firm, the operator or owner of either a peaking power plant or an industrial facility in New York State, a hydrogen fuel supplier, and an original equipment manufacturer.
- The proposed team has demonstrated experience in hydrogen technologies for similar applications in the past, and in managing projects of similar size, scope, and complexity. A list of relevant projects that the proposal team has completed is included in the proposal.
- The proposed team has the necessary expertise and resources to carry out the proposed work, including members with industry and business experience as well as technical skill.
- The proposal provides letters of commitment from the applicant, all teaming entities, and all cost share providers that the team will need to provide data, equipment, support, facilities, or cost share.
- The proposed team structure includes additional team partners beyond the minimum required to support the project such as financial partner(s), environmental consultant(s), Community Engagement consultant(s), etc.
- The proposal clearly demonstrates the team structure and staff roles and responsibilities.
- The proposal includes resumes of key individuals.

Project Benefits and Value

- The proposed project will evaluate hydrogen fuel cell-based power generation technologies with peaking operating cycles or industrial applications in New York State.
- Learnings from the proposed project has broad replication potential to reduce emissions and provide clean energy in New York.
- The proposed project has potential to greatly benefit low-income or historically disadvantaged communities.
- The proposer provides private and/or other sources of cost share funding for the project (with letters of commitment), with greater amounts of non-NYSERDA cost share considered more favorably.
- Cost share included in the proposal is verifiable.
- The project cost is justified and reasonable with respect to the level of effort proposed, the expected benefits, and the potential market or deployment opportunity.

Project Plan, Scope, Risks, and Challenges

- Technical and programmatic risks are clearly understood and fully disclosed, with well-considered mitigation plans that have a high probability of ensuring project success.
- The proposal includes sufficient details in Attachment B – Statement of Work. The tasks are clearly defined, with fully developed tasks, subtasks, milestones, and deliverables that will enable effective project execution. The proposed tasks and deliverables align with requirements described in Section III.A. Requirements.
- The proposal demonstrates adequacy, reasonableness, and soundness of the project schedule as detailed in the proposed Statement of Work and Milestone Based Payment Schedule.
- The proposal demonstrates reasonableness of budget and spend plan as detailed in the submitted milestone-based payment schedule (Attachment C1) and budget form (Attachment C2).

- The proposal demonstrates adequacy of proposed project management systems including the ability to track scope, cost, and schedule progress and changes.
- The proposer included information on measurement, evaluation, and validation measures (e.g., GHG reduction, system reliability, solution performance to key expectations, etc.) and a qualified independent evaluator.

Innovation, State of the Art, and Technical Merit

- The proposer has demonstrated insightful understanding of the fundamental scientific principles and the current state-of-the-art relative to hydrogen-based power generation technologies.
- The proposed project specifically and convincingly demonstrates how the applicant will successfully complete the proposed scope of work and move the technology to future commercial deployment.
- The proposal identifies buy-in from needed stakeholders to ensure success of the project.
- The proposed project technologies are technically sound, feasible, innovative, and will make significant progress toward solving the identified problem.

ii. Program Policy Factors

NYSERDA reserves the right to accept or reject proposals based on the following program policy factor(s):

- The consideration of the impact on, and benefits to, a diversity of communities/locations, including low-income and rural communities, partnerships with minority serving and/or owned businesses.
- Whether the proposed project will accelerate technology advances in areas that industry is not likely to undertake.
- The degree to which the proposal expands the portfolio of technical areas and project types both within this program and within NYSERDA's portfolio.
- The degree to which the proposal aligns with the latest NYSERDA strategy and policy in clean hydrogen.

VI. General Conditions

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/>

</media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSEDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law Sections 139-j and 139-k - NYSEDA is required to comply with State Finance Law Sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under Section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSEDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSEDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSEDA, the prospective contractor must also certify to NYSEDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSEDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSEDA anticipates making multiple awards under this solicitation. NYSEDA anticipates a contract duration of up to three years, unless NYSEDA management determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSEDA

may request additional data or material to support applications. NYSEDA will use Attachment F, Sample Agreement, to contract successful proposals. NYSEDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSEDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSEDA expects to notify proposers in approximately twelve weeks from the proposal due date whether your proposal has been selected to receive an award. NYSEDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSEDA agreement.

Accessibility Requirements - NYSEDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSEDA's Accessibility Requirements](#).

Limitation - This solicitation does not commit NYSEDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSEDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSEDA's best interest. NYSEDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of Attachment F, Sample Agreement. NYSEDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSEDA after the award of a contract, NYSEDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSEDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSEDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary

action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the "Ethics Requirements"). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a "lifetime bar" from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person's engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants' prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA's current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant's proposal, including questions regarding applicant's business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants' target market and any other related or possibly competitive

technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers' business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers' business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers' former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal or apply a program policy factor.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionsearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

VII. Attachments

Required Attachments for the Proposal:

- ☐ Attachment A – Proposal Narrative Template
- ☐ Attachment B – Statement of Work Template
- ☐ Attachment C1 - Milestone Payment Schedule
- ☐ Attachment C2 – Budget Form
- ☐ Attachment D – Executive Summary Slide Template
- ☐ Project List – A list of relevant projects that the proposal team has completed in the past.
- ☐ Letter(s) of Commitment from the applicant, all teaming entities, and all cost share providers
- ☐ Resumes/CVs
- ☐ Indirect Cost Rate Supporting Documentation

For Reference Only (Does not need to be Submitted):

- Attachment E – Sample Agreement
- Attachment F – Metrics Form

NYSERDA

ENERGY STORAGE TECHNOLOGY AND PRODUCT DEVELOPMENT

PROGRAM OPPORTUNITY NOTICE (PON) 5984

UP TO \$10.85 MILLION AVAILABLE

*All, some, or none, of the available funds may be awarded
NYSERDA reserves the right to extend and/or add funding to the
Solicitation should other program funding sources become available.*

Proposals Due: August 11, 2025, by 3:00 PM Eastern Time

The New York State Energy Research and Development Authority (NYSERDA) announces the availability of up to \$10.85 million in funds to support innovative and under-utilized energy storage solutions, devices, software, controls, and other complimentary technologies that decrease energy storage total hardware and installation costs, improve performance, and demonstrate integration with the grid. Eligible solutions must enable the capture of electrical or thermal energy (from the grid, thermal generation project site, or directly from renewables) store that energy, and then return electricity back to the grid, or to a project site. Submissions must demonstrate significant statewide public benefits and quantify all energy, environmental and/or economic impacts. PON 5984 will be issued with one (1) due date (August 11, 2025) seeking innovative Advanced, Next-Generation Batteries (All Durations) and long duration energy storage (LDES) (10+ to 100+ hour) solutions within the following focus areas:

1. Electrochemical (LDES)
 - a. Electrochemical Energy Storage including Flow Batteries and Innovative Advanced Battery Solutions.
2. Mechanical (LDES)
 - a. Innovative Pumped Hydro and Compressed Air/Gas Solutions
 - b. Mechanical/Gravity Energy Storage
 - c. Geomechanical Energy Storage
3. Thermal (LDES)
 - a. Pumped Heat Electrical Energy Storage
 - b. Thermophotovoltaic (TPV) Storage
 - c. Innovative Liquid or Solid Storage Medium (e.g., water, sand, molten salts, rocks)
4. Advanced, Next-Generation Batteries (All Durations) including, but not limited to:
 - a. Solid State Batteries
 - b. Sodium Ion Batteries
 - c. Lithium Sulfur Batteries
 - d. Metal Air Batteries

Proposals to each focus area will be accepted until August 11, 2025, at 3 PM Eastern Time.

NYSERDA is accepting Full Proposals in the following categories:

Category	Maximum NYSERDA Funding Per Award	Maximum Total NYSERDA Cost Share
Category A: Product Development	\$2,000,000	50% of total project cost

Category B: Demonstration and Pilot Projects	No Limit	50% of total project cost

Proposal Submission: Online submission is preferable. Proposers may submit Word, Excel, or PDF files (file formats include: csv, doc, docx, gif, jpeg, jpg, pdf, png, ppt, pptx, pps, ppsx, tif, txt, xls, xlsx, and zip). Individual files should be 100MB or less in file size. Proposal PDFs should be searchable and should be created by direct conversion from MS Word, or other conversion utility. Files should not be scanned. For ease of identification, all electronic files must be named using the proposer's entity name in the title of the document. NYSERDA will also accept proposals by mail or hand-delivery if online submission is not possible. For detailed instructions on how to submit a proposal (online or paper submission), click the link "[Application Instructions and Portal Training Guide](https://www.nysерda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx) [PDF]" located in the "Current Opportunities" section of NYSERDA's website (<https://www.nysерda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

No communication intended to influence this procurement is permitted except by emailing pon5984@nysерda.ny.gov or by contacting Megan Cassingham, 518-862-1090 ext.: 3146. If you have contractual questions concerning this solicitation, contact Nancy Marucci, (518) 862-1090 ext.: 3335 or by email nancysolicitations@nysерda.ny.gov. Contacting anyone other than the Designated Contacts (either directly by the proposer or indirectly through a lobbyist or other person acting on the proposer's behalf) in an attempt to influence the procurement: (1) may result in a proposer being deemed a non-responsible offerer, and (2) may result in the proposer not being awarded a contract.

*** All proposals must be received by 3 p.m. Eastern Time on the date noted above. Late, faxed, or emailed proposals will not be accepted.** Incomplete proposals may be subject to disqualification. It is the proposer's responsibility to ensure that all pages have been included in the proposal. Please note: for online submission, there are required questions that you will have to answer in addition to uploading attachments and you should allot at least 60 minutes to enter/submit proposals. The online proposal system closes promptly at 3 p.m. Eastern Time, files in process or attempted edits or submission after 3 p.m. Eastern Time on the date above, will not be accepted. If changes are made to this solicitation, notification will be posted on the "Current Opportunities" section of NYSERDA's website (<https://www.nysерda.ny.gov/Funding-Opportunities/Current-Funding-Opportunities.aspx>).

I. INTRODUCTION

NYSERDA seeks to stimulate and grow long duration energy storage solutions in electrical, mechanical, chemical, and thermal to electric energy storage innovation portfolios as well as the innovation portfolios focusing on advanced, next generation battery technologies of all durations in NY State. Despite advances in these storage technologies, and ever-increasing numbers of deployments, several technological optimization opportunities still exist including initial pilots and demonstrations, hardware cost reductions, enhanced system performance (efficiency, life cycle and thermal stability), and demonstration of effective integration with the grid. Improving and optimizing these areas will accelerate growth of electrical energy storage deployments.

As New York's electrification of transportation and buildings applications increases, electrical energy storage solutions will become critical in meeting times of reduced renewable generation.

electric energy storage solutions can reduce the intermittency of solar and wind energy, helping these resources to be flexible assets deployed when needed. electric energy storage is also needed to avoid the need for new electric system infrastructure, increase system efficiency and resiliency, and reduce requirements for fossil fuel plants to meet periods of peak electric demand or reduced renewable generation. Technology innovations in electric energy storage solutions will accelerate their market adoption, effectively integrate large scale solar PV and wind power with the grid and will have a large impact on greenhouse gas reduction, improve grid resiliency, and contribute to New York's renewable generation objectives.

II. PROGRAM REQUIREMENTS

This solicitation is focused on advancing, developing, and field testing those electric, chemical, mechanical, and thermal to electric storage technologies that will address cost, performance, and grid integration challenges in NY State. Innovative advanced, next-generation batteries of all durations and long duration energy storage technologies (LDES) with durations of 10+ to 100+ hours which are yet to be commercialized will be considered in this PON. Energy Storage Solutions, which deliver a minimum of 10 hours duration at rated power capacity for LDES, of interest for PON 5984 include, but are not limited to:

1. Electrochemical (LDES)
 - a. Electrochemical Energy Storage including Flow Batteries and Innovative Advanced Battery Solutions
2. Mechanical (LDES)
 - a. Innovative Pumped Hydro and Compressed Air/Gas Solutions
 - b. Mechanical/Gravity Energy Storage
 - c. Geomechanical Energy Storage
3. Thermal (LDES)
 - a. Pumped Heat Electrical Energy Storage
 - b. Thermophotovoltaic (TPV) Storage
 - c. Innovative Liquid or Solid Storage Medium (e.g., water, sand, molten salts, rocks)
4. Advanced, Next Generation Batteries (All Durations) including, but not limited to:
 - a. Solid State Batteries
 - b. Sodium Ion Batteries
 - c. Lithium Sulfur Batteries
 - d. Metal Air Batteries

Eligible storage solutions must enable the capture of electrical or thermal energy (from the grid, thermal generation project site, or directly from renewables) store that energy, and then return electricity back to the grid or to a project site. **Projects seeking to deploy two (2) five-hour duration systems to meet the 10-hour minimum duration requirement will be deemed ineligible for the LDES categories.**

PON 5984: Energy Storage Technology & Product Development seeks to support the transition away from fossil fuel generated peaker plants, which are disproportionately sited in or near disadvantaged communities and are potential sources of particulate matter and other airborne pollutants. The PON supports development of energy storage solutions paired with renewable energy generation in disadvantaged communities, resulting in reduced emissions and improved health outcomes for residents. Demonstration projects are also expected to improve resiliency and grid reliability in disadvantaged, remote, indigenous, and rural communities, lessening climate related impacts and grid constraints.

III. PROPOSAL REQUIREMENTS

Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective response will not influence the evaluation of the proposal. To submit a Proposal, complete the Proposal Narrative form-fillable document (Attachment A).

Proposers must carefully review the Proposal Narrative to ensure that all required sections are completed. Failure to do so may result in the proposal being rejected as non-responsive.

Note: The proposer's goal should be to concisely present the information needed to fully address the scoring criteria (see Section VI). Proposals that grossly exceed the word limits or fail to follow the format guidelines may be rejected as non-responsive. Proposals deemed non-responsive will not be eligible for awards. If you believe proprietary information must be submitted to provide an adequate proposal, you must comply with the Section V instructions for submitting proprietary material. Unnecessary attachments beyond those sufficient to present a complete, comprehensive, and effective proposal may reduce, rather than increase, a

proposal's standing per the scoring criteria. Each page of the proposal should state the name of the proposer, the PON number (PON 5984), and the page number.

Proposals determined to be compliant with application procedures and responsive to the solicitation will be subject to review by a scoring committee comprising NYSERDA and external technical experts in accordance with Section IV, Proposal Evaluation. Only the most technically meritorious Proposals will be awarded an invitation from NYSERDA to enter into an agreement. Proposals not meriting an award for contracting may be debriefed as requested.

In compliance with §139-j and §139-k of the State Finance Law (see Section V, General Conditions below for additional information), proposers will be required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility.

Cost Sharing - The proposal should show non-NYSERDA funding of at least 50% of the total cost of the project. Cost sharing can be from the proposer, other team members, and other government or private sources. Contributions of direct labor (for which the laborer is paid as an employee) and purchased materials may be considered "cash" contributions. Unpaid labor, indirect labor, or other general overhead may be considered "in-kind" contributions. NYSEDA will not pay for efforts which have already been undertaken. The proposer or proposing team cannot claim as cost-share any expenses that have already been incurred.

A payment based on the final deliverable will be reserved until project completion. If awarded, NYSEDA may choose to negotiate the amount of such payment.

Recoupment - For any new projects exceeding \$100,000 in NYSEDA funding that involve product development, including business development, NYSEDA will require a royalty based on sales and/or licensing of the new product developed (Please see Attachment F, Sample Agreement for specific recoupment obligations). Recoupment is not required for demonstration projects. Please see the definitions below to determine if your project will be subject to recoupment. Please note that NYSEDA will make final determinations as to whether proposals fit within the demonstration or product development categories.

- **Product Development:** efforts to bring a new or improved product to market including business case development, product design, scale, and field testing, but not including earlier stage technical feasibility or proof of concept development. Technologies with a Technology Readiness Level (TRL) exceeding 3 are to be considered Product Development (see Attachment C for additional guidance on TRLs). Field testing or pilot deployments of a non-commercial, non-warranted technology are considered Product Development.
- **Demonstration:** a project intended to increase sales or usage of a commercialized product already in the marketplace, with results used to generate objective performance information for customers or policymakers. At this stage, the product is available for commercial sale and warranted. While incremental improvements may be incorporated based on the demonstration results, the final product design is essentially complete. Note: pilot deployments or other field demonstrations that will inform additional product development will be considered as a Product Development project and therefore subject to recoupment.

Projects where NYSEDA's share of funding is \$100,000 or less will generally not require recoupment. Please note: NYSEDA may decline to contract with awardees that are delinquent with respect to recoupment payments or sales reporting for any previous NYSEDA agreement.

Annual Metrics Reports – If awarded, the proposer will be required to submit to NYSEDA's Project Manager on an annual basis, a prepared analysis and summary of metrics addressing the anticipated energy, environmental and economic benefits that are realized by the project. All estimates shall reference credible sources and estimating procedures, and all assumptions shall be documented. Reporting shall commence the

first calendar year after the contract is executed. Reports shall be submitted by January 31st for the previous calendar years' activities (i.e. reporting period). The Contractor shall provide metrics in accordance with a web-based form, which will be distributed by NYSERDA. Please see Attachments E, E1 and E2): Sample Metrics Reporting Guides for the metrics that you will be expected to provide and the reporting duration. NYSERDA may decline to contract with awardees that are delinquent with respect to metrics reporting for any previous or active NYSERDA agreement.

Resubmission of Proposals that are not selected in an earlier round may be resubmitted only one more time, with changes after a debriefing of the strengths and weaknesses from the first proposal. This resubmittal may occur in a subsequent round of this solicitation that remains open to Full Proposals.

PROJECT CATEGORIES

Two (2) categories will be considered for funding. Proposers must select only one (1) funding category per proposal, which must be indicated in the proposal. Proposals that do not identify a funding category or include multiple funding categories may not be reviewed by NYSERDA.

Category A – Product Development

Development of eligible technologies leading to the commercialization of products in New York State. Category A projects requesting over \$250,000 must be phased with go/no-go milestones. NYSERDA will provide up to 50% of the total project cost.

Category B – Demonstration Projects

Innovative demonstrations of under-utilized eligible technologies that are near the commercial stage, demonstrate application opportunities, and lead to increased use of the technology in New York State. Category B projects requesting over \$250,000 must be phased with go/no-go milestones. NYSERDA will provide up to 50% of the total project cost. NOTE: All Demonstrations must take place (1) within New York State, and (2) at a site that pays into the Clean Energy Fund (<https://www.nyserda.ny.gov/About/Funding>) through the electric System Benefits Charge (SBC).

NOTE: NYSERDA reserves the right to negotiate the project category, scope of work, budget, and funding levels on all awarded projects. Efforts requesting more than \$250,000 from NYSERDA shall be funded in phases separated by go/no-go milestones.

IV. PROPOSAL EVALUATION

Proposals that meet solicitation requirements will be reviewed by a Scoring Committee using the Evaluation Criteria below. At NYSERDA's discretion, proposers may be requested to interview with all or part of the Scoring Committee to address any potential questions or clarifications outlined in the proposals. Proposers will be notified if they are requested to attend an interview.

Proposals will be reviewed by a Scoring Committee and will be scored and ranked according to the following criteria. After the submissions are reviewed, NYSERDA will issue a letter to each proposer indicating its Full Proposal evaluation results. Proposers receiving favorable evaluations will be invited to enter contract negotiations with NYSERDA. The proposer will be required to submit a detailed Statement of Work, Budget, and Schedule, and may also be asked to address specific contingencies and recommendations of the Scoring Committee before contract award.

PROPOSAL SCORING CRITERIA:

Proposed Solution/Value

- How significant is the problem or opportunity to New York State?
- Is the proposed work technically feasible, innovative, and superior to alternatives?
- Are the commercialization tasks likely to be effective in advancing the technology to market?
- Does the proposal address an eligible technology?
- How well does the proposed solution address the problem or opportunity?
- Are fundamental scientific principles well understood and clearly presented?
- How appropriate are the cost, technical, performance and commercialization goals for the proposed technology or product?
- Does the proposer exhibit an understanding of the state-of-the-art, competing products and alternative designs?
- If the proposed work is a follow-on project to a previously funded NYSERDA project, what was the outcome of the earlier project?
- Is the proposed project addressing a current challenge or opportunity that is not being addressed adequately by current industry practices and/or federal and/or other state research priorities and funding?
- Does the proposed solution have a high potential for commercialization, addressing demonstrated customer needs and significant markets?
- Does the proposed project demonstrate an effective strategy and strong potential for the project to lead to future use of the technology in New York?
- Does the proposed technology address market needs?
- Is the overall project cost justified and reasonable based on the level of effort proposed and the expected outcome and benefits?
- How significant is the potential market opportunity relative to the project cost?
- How appropriate are the proposer's co-funding contributions (sources and amounts) with respect to the degree of risk, potential to benefit from the work, and financial status of the organization?
- How firm are the commitments and support from essential participants, co-funders, and related businesses and other organizations?
- Are the overhead rates reasonable and supported with appropriate documentation?
- Are equipment, facility, material, and travel costs based on reasonable estimates?
- Are the labor rates reflective of the industry?

Category B - Demonstration Projects:

- How significant is the demonstration opportunity to New York State?
- Is the proposed demonstration innovative and is it appropriate that the proposed demonstration be funded under this program as opposed to a NYSERDA program that provides incentives to install certified, commercially ready technologies?
- Is the proposed demonstration well-conceived, technically feasible, and superior to alternatives?
- What is the level of commitment of a New York State site?
- Does the proposal include a New York State demonstration site?
- Does the proposed technology have commercial applications at other New York State sites?
- Is an appropriate performance monitoring and data analysis effort included in the proposal?
- If the proposed work is follow-on to a previously funded NYSERDA project, what was the outcome of the earlier project?

Project Benefits

- To what extent does the project support the Climate Leadership and Community Protection Act

(CLCPA) goals, grid flexibility and modernization in general, the Clean Energy Standard, and the Clean Energy Fund goals in New York State?

- To what extent will there be economic benefits in New York State in the form of subsequent commercial activity and economic growth?
- How well are the potential benefits to New York State quantified?
- How likely is it that the projected benefits will be realized?
- Does the proposed project have favorable energy, efficiency, environmental and/or economic impacts in New York State? How significant are these impacts?
- Are the technical risks identified, appropriately addressed, and balanced by project benefits?
- Does the proposal address an innovative technology that improves performance, quality, or reliability / resiliency of the electric power system?

Business/Commercialization Plan

- Is the proposed product or concept likely to be successful?
- Are there sufficient markets or needs for the concept/technology?
- How significant is the commercial potential of this technology?
- How widely deployed can the technology be, both in New York and globally?
- Are the business and commercialization or replication plans appropriate for the type of project and stage of development?
- How significant are the barriers to market entry?
- Does the proposer demonstrate a clear understanding of the steps required to overcome these barriers?
- Have customers been identified and consulted regarding the value of the technology or solution?"
- Is the value proposition of the technology well matched to the expressed needs of the customer segments being targeted?
- Does the proposal identify competing and alternate solutions, and clearly show why this product or concept is superior to, price competitive with, or provides value compared to alternative products or solutions?
- If follow-on financial resources are necessary, are plans to raise necessary financial resources likely to be successful?
- How well are the project tasks directed at identifying and fulfilling customer requirements? How far will execution of the work plan take the product to full commercialization?
- Would achievement of technical and business goals position the company to raise capital or realize revenue from the product before NYSERDA funding is exhausted?

Project Plan, Risks and Challenges - Statement of Work and Schedule

- How appropriate are the technical, performance and commercialization goals for the proposed project?
- Do the proposed technical and performance goals adequately allow for measurement and verification of the success of the proposed project?
- Does the proposed strategy in the Statement of Work include technical and business development tasks and are those tasks likely to achieve the technical, performance and commercialization goals?
- Does the Statement of Work include an economic analysis of the technology based on performance measurements?
- Is the Statement of Work well organized, complete, and appropriate for the technical, performance and commercialization goals identified?
- How realistic is the schedule for achieving the goals of the proposed project?
- Is the proposed level of effort reasonable to complete the proposed project?
- Are the proposed milestones and tasks reasonable and complete in details?

- Are project risks and challenges identified with appropriate mitigation plans?
- Are the appropriate letters of support and/or commitments included in the proposal?

Category B - Demonstration projects:

- Are the data acquisition, monitoring, and reporting plans reasonable and do they meet the requirements of Attachment A Section V, ADDITIONAL PROGRAM REQUIREMENTS FOR CATEGORY B DEMONSTRATION PROJECTS ONLY?
- Are the benefits tracking plan reasonable and does it meet the requirements in Attachment A Section V, ADDITIONAL PROGRAM REQUIREMENTS FOR CATEGORY B DEMONSTRATION PROJECTS ONLY?
- If monitoring baseline utility system operation is necessary to document system benefits, does the Statement of Work include a provision to adequately gather baseline utility operational data?

Project Team/Support

- Has the proposer provided evidence of being qualified to perform the proposed work based on the qualifications of the organization(s) and the involved individual(s)?
- Were resumes of key individuals included in the proposal?
- To what degree does the proposer and team have the necessary technical and business background and experience?
- Has the proposer provided evidence of good past performance on other relevant projects?
- Is the proposing team appropriately organized?
- Are staff allocations and responsibilities reasonable?
- Applicant has enabled the resources (human, financial and physical) to be able to complete the project?

Other Program Policy Factors – In addition to considering how project Full Proposals satisfy the Scoring Criteria listed above, NYSERDA reserves the right to make funding decisions based on other Program Policy Factors, including but not limited to:

1. Whether the proposed project will accelerate technology advances in areas that industry by itself is not likely to undertake.
2. The degree to which the proposed project optimizes the use of available funding to achieve programmatic objectives.
3. The degree to which the proposal expands the technical portfolio of the program.
4. The degree to which the proposed project has leveraged award funds to expand their project scope and value attained with non-award resources.
5. Past performance of the proposer on other projects with NYSERDA.
6. The past performance of the proposer on other technical and business endeavors, including NYSERDA and DOE, ARPA-E, NSF, (if the performance history is available).
7. The degree to which NYSERDA ongoing funding, (incl. cost shares), will make a difference in the technology impact, acceleration of transformational advances and project success.
8. The consideration of the impact on, and benefits to, a diversity of communities/locations, including low-income and rural communities, partnerships with minority serving and/or owned businesses.

V. GENERAL CONDITIONS

Proprietary Information - Careful consideration should be given before confidential information is submitted to NYSERDA as part of your proposal. Review should include whether it is critical for evaluating a proposal, and whether general, non-confidential information, may be adequate for review purposes. The NYS Freedom of Information Law, Public Officers law, Article 6, provides for public access to information NYSERDA possesses. Public Officers Law, Section 87(2)(d) provides for exceptions to disclosure for records or portions thereof that

"are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." Information submitted to NYSERDA that the proposer wishes to have treated as proprietary, and confidential trade secret information, should be identified and labeled "Confidential" or "Proprietary" on each page at the time of disclosure. This information should include a written request to except it from disclosure, including a written statement of the reasons why the information should be excepted. See Public Officers Law, Section 89(5) and the procedures set forth in 21 NYCRR Part 501 <https://www.nyserda.ny.gov/About/-/media/Files/About/Contact/NYSERDA-Regulations.ashx>. However, NYSERDA cannot guarantee the confidentiality of any information submitted.

Omnibus Procurement Act of 1992 - It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority- and women-owned business enterprises, as bidders, subcontractors, and suppliers on its procurement Agreements.

Information on the availability of New York subcontractors and suppliers is available from:

Empire State Development
Division for Small Business
625 Broadway
Albany, NY 12207

A directory of certified minority- and women-owned business enterprises is available from:

Empire State Development
Minority and Women's Business Development Division
625 Broadway
Albany, NY 12207

State Finance Law sections 139-j and 139-k - NYSERDA is required to comply with State Finance Law sections 139-j and 139-k. These provisions contain procurement lobbying requirements which can be found at <https://online.ogs.ny.gov/legal/lobbyinglawfaq/default.aspx>. Proposers are required to answer questions during proposal submission, which will include making required certification under the State Finance Law and to disclose any Prior Findings of Non-Responsibility (this includes a disclosure statement regarding whether the proposer has been found non-responsible under section 139-j of the State Finance Law within the previous four years).

Tax Law Section 5-a - NYSERDA is required to comply with the provisions of Tax Law Section 5-a, which requires a prospective contractor, prior to entering an agreement with NYSERDA having a value in excess of \$100,000, to certify to the Department of Taxation and Finance (the "Department") whether the contractor, its affiliates, its subcontractors and the affiliates of its subcontractors have registered with the Department to collect New York State and local sales and compensating use taxes. The Department has created a form to allow a prospective contractor to readily make such certification. See, ST-220-TD (available at http://www.tax.ny.gov/pdf/current_forms/st/st220td_fill_in.pdf). Prior to contracting with NYSERDA, the prospective contractor must also certify to NYSERDA whether it has filed such certification with the Department.

The Department has created a second form that must be completed by a prospective contractor prior to contracting and filed with NYSERDA. See, ST-220-CA (available at http://www.tax.ny.gov/pdf/current_forms/st/st220ca_fill_in.pdf). The Department has developed guidance for contractors which is available at <http://www.tax.ny.gov/pdf/publications/sales/pub223.pdf>.

Contract Award - NYSERDA anticipates making multiple milestone-based payment awards under this solicitation. NYSERDA anticipates a contract duration of up to three (3) years, unless NYSERDA management

determines a different structure is more efficient based upon proposals received. A contract may be awarded based on initial applications without discussion or following limited discussion or negotiations pertaining to the Statement of Work. Each proposal should be submitted using the most favorable cost and technical terms. NYSERDA may request additional data or material to support applications. NYSERDA will use the Sample Agreement to contract successful proposals. NYSERDA may at its discretion elect to extend and/or add funds to any project funded through this solicitation. NYSERDA reserves the right to limit any negotiations to exceptions to standard terms and conditions in the Sample Agreement to those specifically identified in the checklist questions. Proposers should keep in mind that acceptance of all standard terms and conditions will generally result in a more expedited contracting process. NYSERDA expects to notify proposers in approximately 8 weeks from the proposal due date whether your proposal has been selected to receive an award. NYSERDA may decline to contract with awardees that are delinquent with respect to any obligation under any previous or active NYSERDA agreement.

Accessibility Requirements - NYSERDA requires contractors producing content intended to be posted to the Web to adhere to New York State's Accessibility Policy. This includes, but is not limited to, deliverables such as: documents (PDF, Microsoft Word, Microsoft Excel, etc.), audio (.mp3, .wav, etc.), video (.mp4, .mpg, .avi, etc.), graphics (.jpg, .png, etc.), web pages (.html, .aspx, etc.), and other multimedia and streaming media content. For more information, see [NYSERDA's Accessibility Requirements](#).

Limitation - This solicitation does not commit NYSERDA to award a contract, pay any costs incurred in preparing a proposal, or to procure or contract for services or supplies. NYSERDA reserves the right to accept or reject any or all proposals received, to negotiate with all qualified sources, or to cancel in part or in its entirety the solicitation when it is in NYSERDA's best interest. NYSERDA reserves the right to reject proposals based on the nature and number of any exceptions taken to the standard terms and conditions of the Sample Agreement. NYSERDA reserves the right to disqualify proposers based upon the results of a background check into publicly available information or the presence of a material possibility of any reputational or legal risk in making of the award.

Disclosure Requirement - The proposer shall disclose any indictment for any alleged felony, or any conviction for a felony within the past five years, under the laws of the United States or any state or territory of the United States and shall describe circumstances for each. When a proposer is an association, partnership, corporation, or other organization, this disclosure requirement includes the organization and its officers, partners, and directors or members of any similarly governing body. If an indictment or conviction should come to the attention of NYSERDA after the award of a contract, NYSERDA may exercise its stop-work right pending further investigation or terminate the agreement; the contractor may be subject to penalties for violation of any law which may apply in the particular circumstances. Proposers must also disclose if they have ever been debarred or suspended by any agency of the U.S. Government or the New York State Department of Labor.

Vendor Assurance of No Conflict of Interest or Detrimental Effect - The proposer shall disclose any existing or contemplated relationship with any other person or entity, including any known relationships with any member, shareholders of 5% or more, parent, subsidiary, or affiliated firm, which would constitute an actual or potential conflict of interest or appearance of impropriety, relating to other clients/customers of the proposer or former officers and employees of NYSERDA, in connection with proposer's rendering services as proposed. If a conflict does or might exist, please describe how your company would eliminate or prevent it. Indicate what procedures will be followed to detect, notify NYSERDA of, and resolve any such conflicts.

The proposer must disclose whether it, or any of its members, or, to the best of its knowledge, shareholders of 5% or more, parents, affiliates, or subsidiaries, have been the subject of any investigation or disciplinary action by the New York State Commission on Public Integrity or its predecessor State entities (collectively, "Commission"), and if so, a brief description must be included indicating how any matter before the Commission was resolved or whether it remains unresolved.

Public Officers Law – For any resulting awards, the Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the State to perform services in violation of the provisions of the New York Public Officers Law, other laws applicable to the service of State employees, and the rules, regulations, opinions, guidelines or policies promulgated or issued by the New York State Joint Commission on Public Ethics, or its predecessors (collectively, the “Ethics Requirements”). Proposers are reminded of the following Public Officers Law provision: contractors, consultants, vendors, and subcontractors may hire former NYSERDA employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of NYSERDA may neither appear nor practice before NYSERDA, nor receive compensation for services rendered on a matter before NYSERDA, for a period of two years following their separation from NYSERDA service. In addition, former NYSERDA employees are subject to a “lifetime bar” from appearing before any state agency or authority or receiving compensation for services regarding any transaction in which they personally participated, or which was under their active consideration during their tenure with NYSERDA.

Any awardee will be required to certify that all of its employees, as well as employees of any subcontractor, whose subcontract is valued at \$100,000 or more who are former employees of the State and who are assigned to perform services under the resulting contract, shall be assigned in accordance with all Ethics Requirements. During the term of any agreement, no person who is employed by the contractor or its subcontractors and who is disqualified from providing services under the contract pursuant to any Ethics Requirements may share in any net revenues of the contractor or its subcontractors derived from the contract. NYSERDA may request that contractors provide it with whatever information the State deems appropriate about each such person’s engagement, work cooperatively with the State to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the State, instruct any such person to seek the opinion of the New York State Joint Commission on Public Ethics. NYSERDA shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed would be in conflict with any of the Ethics Requirements. NYSERDA shall have the right to terminate any contract at any time if any work performed is in conflict with any of the Ethics Requirements.

Due Diligence – NYSERDA, at its discretion, may conduct broad due diligence to validate any or all elements of an application and to assess applicants’ prospects of success, including gathering information to assess a proposal relative to any of the topics listed in evaluation criteria, whether or not such topic is explicitly addressed in a proposal. NYSERDA may conduct due diligence on some or all proposals based on NYSERDA’s current guidelines at the time of a review. NYSERDA staff may follow up with proposers to request additional information or clarification regarding applicant’s proposal, including questions regarding applicant’s business prospects and resources, whether or not those questions are specifically related to the elements of the proposal. Additionally, customized due diligence may be conducted by internal or external staff or contractors based on questions on any proposal raised by NYSERDA staff and/or the Scoring Committee. Due diligence may include (but is not limited to): interviews of independent references and background checks of team members; assessment of prior business experience of any team member associated with a proposal; research on intellectual property claims; customer and partner reference checks; market research on the applicants’ target market and any other related or possibly competitive technology or market area; research to validate any assumptions on current or future revenues, costs, capital needs, and financing prospects for proposers’ business, including similar (or unrelated) technologies, processes, or competitive solutions; or any other research that could reasonably inform the evaluation of a proposal, or the prospects for commercial success of the proposers’ business (whether directly related to, or unrelated to the specific elements in a proposal). Due diligence may include discussions with proposers’ former and current business partners, employees, investors, customers, and competitors. Due diligence may be conducted by NYSERDA personnel or contractors including members of the scoring committee, before, during, or after a scoring process, and prior to finalization of a contract award, any information gleaned in diligence may be used to score or re-score a proposal.

EO 16 Protocols – Pursuant to Executive Order No. 16 issued on March 17, 2022, all vendors responding to bids or contracting with New York State must certify, using the form provided as part of this solicitation, their

status with regard to conducting business operations in Russia, and that any such business operations in Russia conducted on behalf of the vendor are determined to be permitted under any of the allowable exemptions. The term vendor is intended to encompass bidders prior to contract award, contractors who have received a contract award, contract assignees, or contractors for whom an extension to an existing contract is being pursued. Exemption decisions are in NYSERDA's sole discretion and are final decisions. NYSERDA reserves the right to solicit additional materials or information regarding the responses or materials provided by a vendor.

Pursuant to Executive Order No. 16, all vendors will be vetted to ensure that they are not on the federal sanctions list at <https://sanctionssearch.ofac.treas.gov/>. There is no waiver or exemption process for vendors appearing on the federal sanctions list.

The Executive Order remains in effect while sanctions imposed by the federal government are in effect. Accordingly, vendors who may be excluded from award because of current business operations in Russia are nevertheless encouraged to respond to solicitations to preserve their contracting opportunities in case sanctions are lifted during a solicitation, or after award in the case of some solicitations.

Recoupment - For any new product research and/or development, NYSERDA will generally require a royalty based on sales of the new product developed. NYSERDA's standard royalty terms are 1% of sales/ten percent (10%) of all license revenue accruing to the Contractor for products produced (for a period of fifteen years or until the Contractor pays NYSERDA an amount equal to the amount of funds paid by NYSERDA to the Contractor, whichever comes first).
