Reducing your campus carbon footprint starts here

Congratulations on joining NYSERDA's Clean Green Campuses' initiative! You are now a part of a diverse and robust statewide network of New York colleges and universities that are committed to lowering their carbon footprint and growing their clean energy and sustainability efforts. As a member of Clean Green Campuses, you have unlimited access to the Clean Green Campuses team to guide you in leveraging NYSERDA's resources, so you can reach your energy goals easier and faster than ever.

Make the most of your membership

Your new membership comes with a variety of benefits, including:

- **Access to member-exclusive program offerings** through NYSERDA's [FlexTech program](#). FlexTech offers funding to support energy studies and energy planning to help your institution make informed clean energy investment decisions based on institutional priorities and goals.
- **Dedicated assistance with navigating funding opportunities.** The Clean Green Campuses team is available to assist you with navigating funding programs and identifying the most effective path for achieving your institution's carbon reduction and sustainability goals.
- **Annual workshops** that offer the opportunity to learn about new funding programs, connect with your peers, share best practices, and provide valuable feedback to shape the future of Clean Green Campuses and NYSERDA programs.
- **Engagement with your broader campus community.** Leverage Clean Green Campuses and NYSERDA opportunities to engage your campus and surrounding community in carbon reduction and sustainability efforts.
- **Knowledge sharing and promotion of campus accomplishments.** Clean Green Campuses can connect you with peer institutions to discuss carbon reduction projects. You also gain access to free assistance creating promotional materials, such as case studies and articles that highlight your campus clean energy and sustainability accomplishments.

Get started today

Several NYSERDA programs and funding opportunities are available to support your carbon reduction and sustainability efforts.
