

NYSERDA PON 4614 Category D: Guidebooks

Recipient: Guidehouse

Awarded via PON 4614, Round #3, Category D

Anticipated Final Report Availability: April 2023

Stakeholder Engagement of Shortlisted Well-suited Candidate Host Sites:

- An ongoing NYSERDA-funded project with ICF (selected via PON 4614 Round #1) will create a series of shortlists of best-fit candidates for community heat pump systems within different building typologies, including college campuses, hospital campuses, multifamily complexes, and downtown core areas. These shortlists regarding multifamily complexes will be furnished to Guidehouse once completed.
- Guidehouse will provide outreach and coaching to the shortlisted multifamily complexes, helping the building owners/operators understand the attributes of their properties that make such sites prioritized viable candidates for district-style heat pumps and helping these stakeholders fully understand the opportunity and providing coaching to these sites, so they can develop PON 4614 Category A proposals to conduct feasibility studies.
