Regional Clean Energy Hubs Program

New York State is embarking on a transition to an inclusive, clean-energy-powered economy. All residents, businesses, and communities across the State will benefit from this transition and have access to new opportunities that include clean energy careers, home improvements, even rebates for businesses and personal transportation. But there’s a lot of information out there, and people may not know where to start.

To help New Yorkers access and navigate these opportunities, NYSERDA created the Regional Clean Energy Hubs. Clean Energy Hubs connect people to the clean energy economy.

Your one-stop shop for access to clean energy opportunities

Your Hub is a team of trusted, knowledgeable, community-based organizations in and from your region of the State. Team members have experience with clean energy, energy efficiency, workforce and economic development, education, health, and housing.

Hubs provide information to individuals, small businesses, and affordable housing owners about the benefits of the clean energy economy, ways to reduce energy use and costs, and how to make more informed energy decisions.

Your Hub can:

- Describe the “clean energy economy” and what it means for communities
- Assist with accessing job training and employment in the clean energy sector
- Discuss a home energy assessment and why it would be useful
- Help someone fill out an application for a free home-energy assessment
- Show what types of energy incentives a person or business may qualify for
- Share information about heat pumps, solar, electric vehicles (EV), and how to access rebates
- Find a qualified contractor to perform clean energy upgrades
- Locate a community solar program and help residents and businesses sign up for it

And more!
