money

Solar power is an option for anyone with an electric bill

A Community Solar project is a group of solar panels installed in a sunny location. Homeowners, renters, and businesses can subscribe in order to access the clean energy produced by the panels, and get credits on their electric bills.

You don't need to be a property owner or even have a rooftop to subscribe to a community solar project. You just need to have an electric bill, and a desire to save.

Why Community Solar

- No solar panels on your roof or your property
- It saves you money on your electric bill
- It's clean energy for your area
- It's good for New York, and the environment
- There are often "pay-as-you-go" options
- It allows you to choose local power

Who's it for? Everyone.

- Renters
- Homeowners
- Government buildings
- Condo dwellers
- Small businesses
- Schools
- Large businesses

How it works

1. Solar panels are installed in a sunny place in your area.
2. Subscribe to a community solar project and become a part of clean solar energy.
3. You get credited on your electric utility bill for the energy generated by the solar panels.

community-solar](https://nysenrda.ny.gov/community-solar)

The process is simple

Subscribe. By subscribing, you'll become a part of a community solar project near you, and you'll be helping to bring clean energy to your area.

Save. Energy will be delivered to you the same way it always has been, from your electric provider. You'll be credited right on your electric bill for your portion of the solar panels.

NY-Sun, a dynamic public-private partnership, will drive growth in the solar industry and make solar technology more affordable for all New Yorkers. NY-Sun brings together and expands existing programs administered by the New York State Energy Research and Development Authority (NYSERDA), Long Island Power Authority (LIPA), PSEG Long Island, and the New York Power Authority (NYPA), to ensure a coordinated, well-supported solar energy expansion plan and a transition to a sustainable, self-sufficient solar industry.

NYSERDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and support to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. NYSEDA professionals work to protect the environment and create clean energy jobs. NYSEDA has been developing partnerships to advance innovative energy solutions in New York State since 1975. To learn more about NYSEDA's programs, visit nyserdera.ny.gov or follow us on Twitter, Facebook, YouTube, or Instagram.
