

# Convert to Natural Gas at No Cost. Get Started Right Here.

## The main benefit is simple.

Natural gas is 3–6 times cheaper than electricity, propane, or oil.

\*Heating energy is measured in British Thermal Units, or Btu

Right now, you can convert to natural gas at no cost—it is a fraction of the price of other heating fuels, it's much cleaner, and a direct line into your home means no tanks and no refilling.

National Fuel and NYSERDA's EmPower New York program are working together to offer qualified residents a free natural gas conversion. **That's a value of up to \$6,000 per household.** We know every little bit counts. And that's why we're doing everything we can to help you stretch your dollar as far as possible and lower your energy costs.

We are expanding the availability of a more affordable, cleaner, and smarter fuel source. When you convert to natural gas heating, you get a less expensive way to heat your home, and New York improves its environment.

## Four Steps to Qualify:

1. Own your home
2. Live in National Fuel's Western New York service territory
3. Currently use any fuel other than natural gas to heat your home
4. Qualify as income-eligible

## How It Works:

1. Visit [nyserderda.ny.gov/natural-gas-conversion](https://nyserderda.ny.gov/natural-gas-conversion), fill out the application, and submit it to NYSERDA.
2. NYSERDA will verify eligibility—both geographic and income.
3. Once eligibility is verified, NYSERDA will assign a Building Performance Institute accredited contractor to visit your home during a time that is convenient for you—if you are already working with EmPower New York, NYSERDA may assign the same contractor.
4. The contractor will identify elements needed for the gas conversion and submit paperwork to the program.
5. Once conversion is approved, the contractor will schedule a convenient time for you to install the new natural gas space heating system, water heating system, and gas lines (if needed).
