Reforming the Energy Vision (REV)

- distributed energy resources (DER) as a primary tool
- outcome-based ratemaking
Why REV now?

• Cost pressures
• DER advances
• Climate change
• Fuel diversity
• Information technology
Benefits of REV

• Load shaping/ system efficiency
• Distribution infrastructure
• Reliability/resilience
• Emission reductions
Low-income customers

• impact on customer bills
• resilience
• disruptive trends
• energy efficiency programs
• net metering
• non-participating customers
• EJ communities
• time-of-use rates
