

Award Results: Two Projects, 1,696 Megawatts

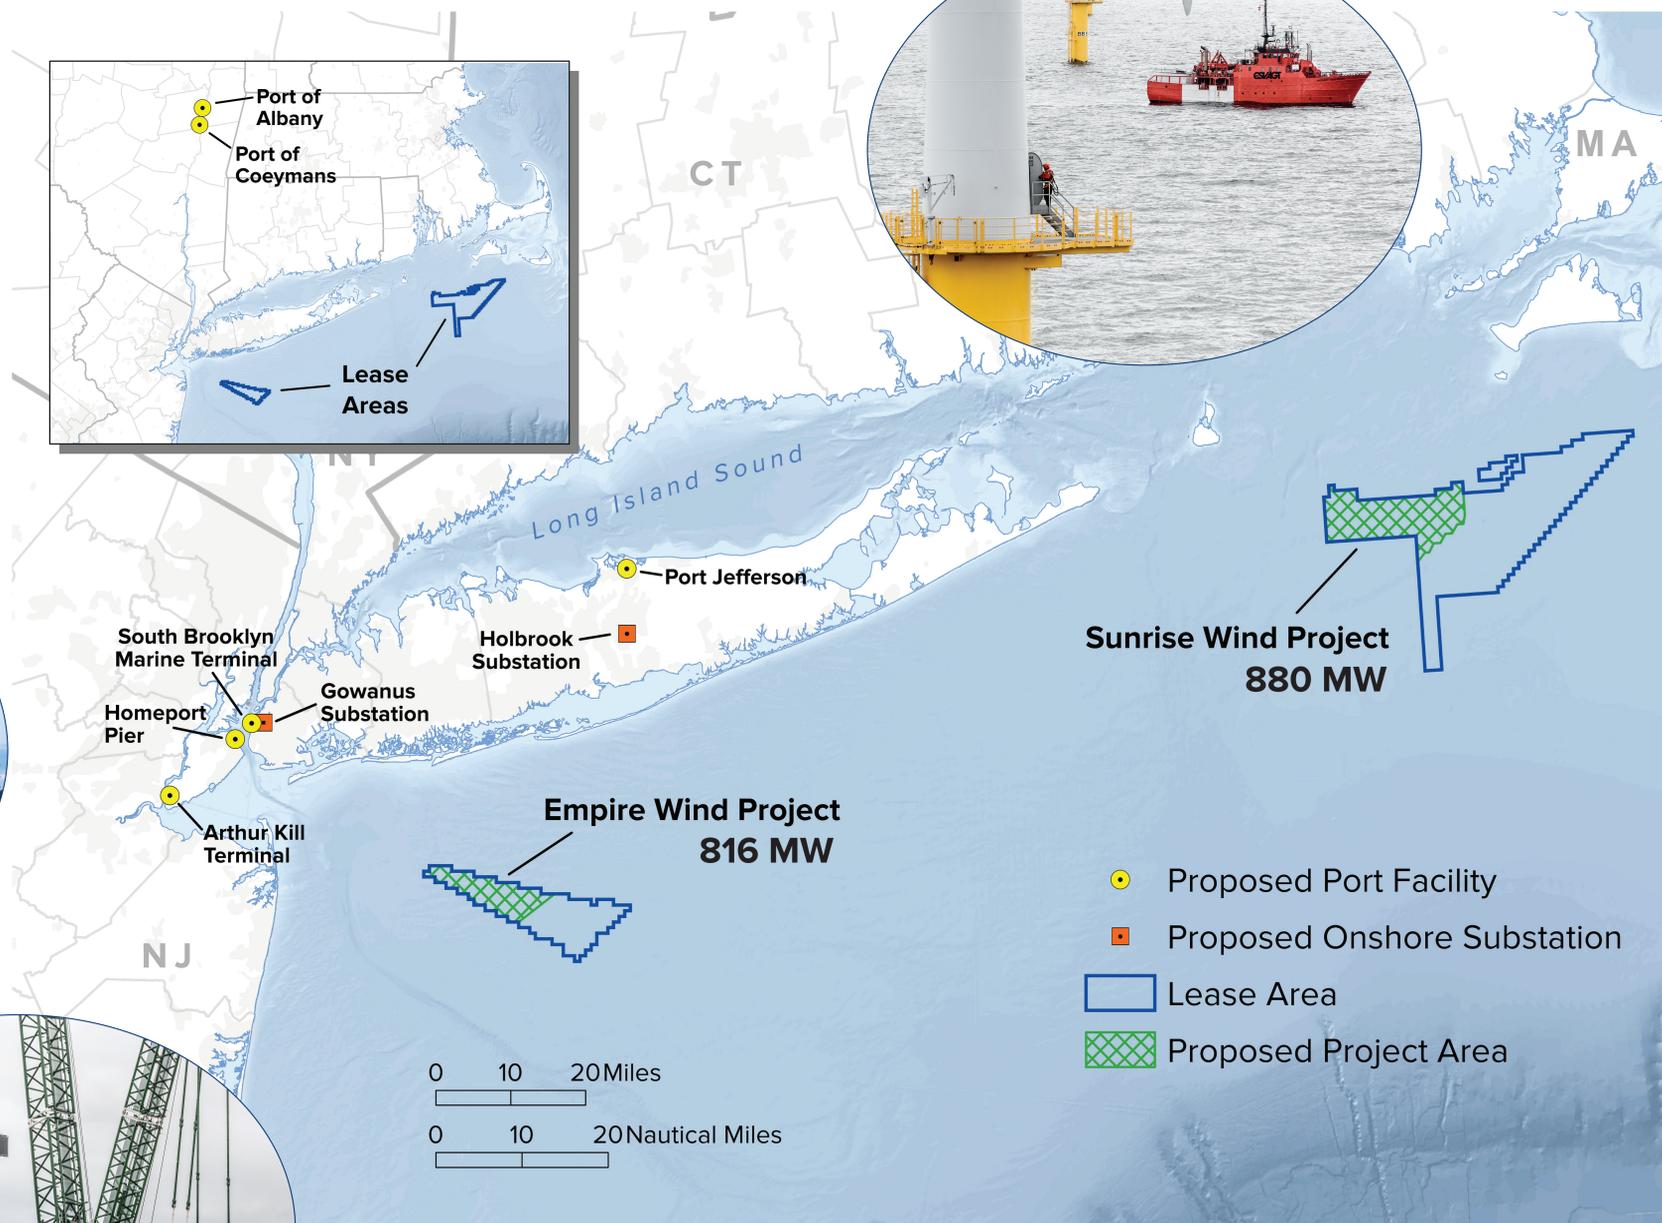

As a result of the State's inaugural solicitation for offshore wind, NYSERDA has selected two projects – Empire Wind (Equinor US Holdings, Inc.) and Sunrise Wind (Bay State Wind LLC, a joint venture of Ørsted A/S and Eversource Energy) to deliver renewable power to New York. These projects will utilize port facilities from the Capital Region to Long Island for different stages of project development.

Some manufactured components may be floated down the Hudson River to a staging facility for final assembly before installation

Supports long-term, well-paying careers for the 25-year lives of the projects

To prepare these components for installation, staging facilities serve as the final assembly point before heading out to the lease area
