

Panel Discussion on Air Quality and Associated Health Effects

Panelists:

*Valerie Garcia, Shao Lin, Haluk Ozkaynak,
and Rashid Shaikh*

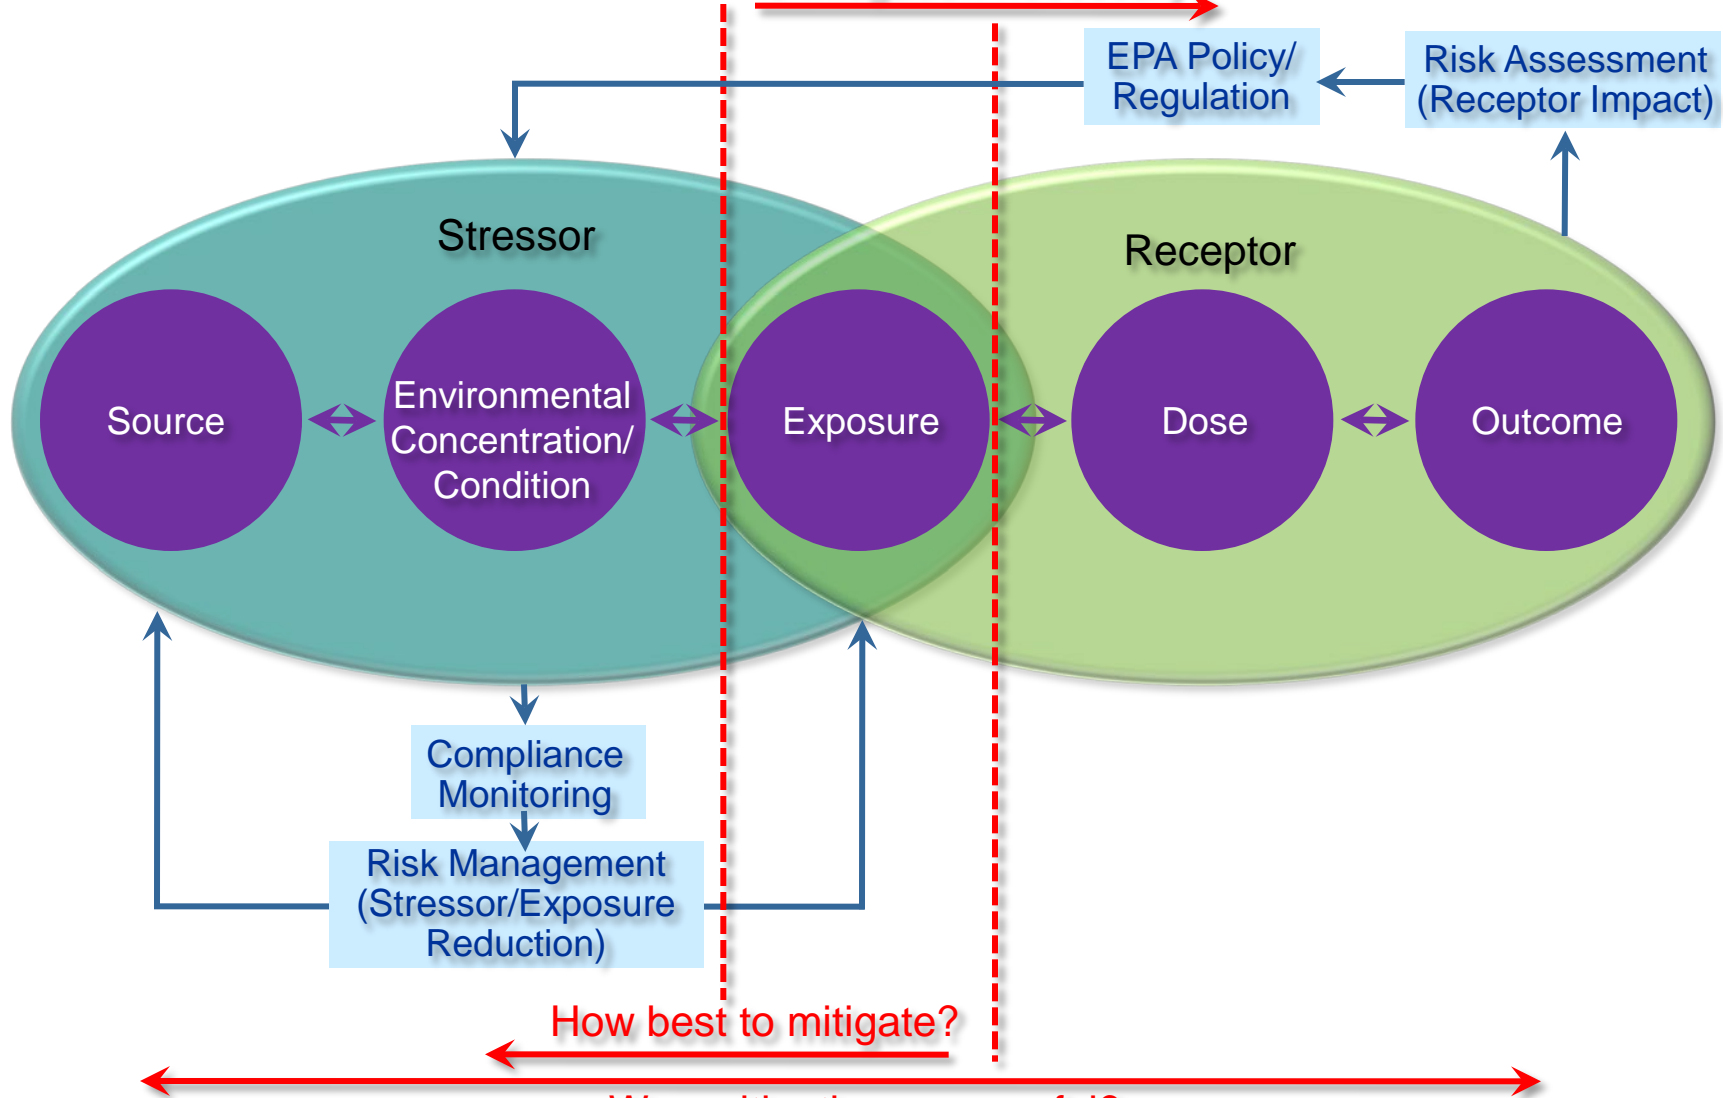

Moderator: S.T. Rao

National Exposure Research Laboratory
U.S. Environmental Protection Agency
Research Triangle Park, NC 27711, U.S.A.

Framework for Protecting Public Health and the Environment

Is mitigation necessary?

How best to mitigate?

Was mitigation successful?

Science Questions

- Is exposure different from ambient concentrations?
- What are the key drivers influencing exposure?
- How can these key drivers be integrated into air quality models?
- How do we design integrated air quality-exposure modeling systems that are practical to use in the regulatory context?
- How do we demonstrate the impact of regulations on human health within the framework of accountability?
- What are the research gaps along the source to outcome continuum?
