

# Green Jobs-Green New York Advisory Council Meeting

#### **Agenda**

| Welcome and Opening Remarks                             | Alicia Barton  |
|---|----------------|
| Community Energy Engagement Program - Contracts         | Kelly Tyler    |
| Status Update   |                |
| Workforce Development                                   | Adele Ferranti |
| Hiring Hall Working Group                               |                |
| <ul> <li>Building Operations and Maintenance</li> </ul> |                |
| Overview of LMI Market Characterization Study           | Chris Coll     |
| Residential Loan Fund Update                            | Karen Hamilton |
| Wrap-up   | Alicia Barton  |

## Community Energy Engagement Program

Contracts Status Update

#### RFP3588 – Community Energy Engagement Program

- RFP3588 sought proposals from qualified organizations to provide locally-based engagement (energy awareness and education) services to drive energy efficiency and renewable energy deployment to residential, multifamily, and small business customers, with a focus on low-tomoderate income (LMI) households and communities.
- NYSERDA originally issued this RFP in May 2017 and awarded eight of the ten Economic Development Regions through that release of the solicitation.
- NYSERDA re-issued RFP3588 with proposals due October 10, 2017 for the remaining two Economic Development Regions

#### **New Contracts Status**

- Of the eight Contracts that were awarded through the first release of RFP3588 seven are executed and beginning work on the program
- Award notifications were recently sent out for proposals received through the second release of the solicitation

#### **CEEP Contractors by Region**

| Region           | Lead Organization  |
|------------------|--|
| Capital District | Affordable Housing Partnership of the Capital Region, Inc. |
| Central NY       | Home HeadQuarters, Inc.                                    |
| Finger Lakes     | PathStone Corporation                                      |
| Long Island      | United Way of Long Island                                  |
| Mid-Hudson       | Awarded, Not Yet Executed                                  |
| Mohawk Valley    | Awarded, Not Yet Executed                                  |
| New York City    | Center for New York City Neighborhoods, Inc.               |
| North Country    | Awarded, Not Yet Executed                                  |
| Southern Tier    | Cornell Cooperative Extension of Tompkins County           |
| Western New York | People United for Sustainable Housing, Inc (PUSH)          |

## Workforce Development

### **Hiring Hall Working Group**

# A Refresher: GJGNY Workforce Training Working Group Members\*

- Adele Ferranti, NYSERDA, Convener
- Stephan Edel, Center for Working Families
- Clarke Gocker, PUSH Buffalo
- Ross Gould, Workforce Development Institute
- Dave Hepinstall, Association for Energy Affordability
- Tony Joseph, NYS Department of Labor

- Jason Kuflik, Green Street Solar
- Ellen Redmond, International Brotherhood of Electrical Workers
- Will Schweiger, Efficiency First New York
- Paul Shatsoff, PS Consulting
- Hal Smith, Halco
- Marilyn Oppedisano, National Electrical Contractors Association

#### **Primary Areas of Discussion**

The working group addressed the following opportunities and needs identified in the *GJGNY LMI Work Group Recommendations Report*:

- Role of community-based organizations in future workforce training efforts
- Opportunities to coordinate with the NYS Department of Labor (NYSDOL)
- Future directions for workforce training efforts, including career pathways, training consortia, apprenticeships, and direct entry
- Incorporating lessons learned, both from within GJGNY programs and other jurisdictions
- Labor standards

#### **Summary of Recommendations**

- 1. Provide on-the-job training incentives to mitigate business risks associated with hiring new clean energy workers
- 2. Support New York State Registered Apprenticeships in clean energy fields
- Explore innovative, employer-driven approaches to bridging the gaps between training and employment, including a hiring hall model

#### **Recommendation #3 – Hiring Halls**

Explore innovative, employer-driven approaches to bridging the gaps between training and employment, including a hiring hall model.

- Consider non-traditional ways to support disadvantaged workers, such as "hiring halls," where skilled and vetted workers are employed and insured by a host and can be hired out on an as-needed basis
  - This is one way to support "high road standards," such as family sustaining wages, fringe benefits, and overtime pay
- Work with locally-based organizations who are uniquely positioned to bridge gaps between workers and clean energy businesses seeking to hire

#### Response to #3 – Hiring Halls

NYSERDA will continue to investigate opportunities to support all career pathways opportunities to ensure that all New Yorkers have access to good paying jobs in the clean energy economy.

- NYSERDA is currently looking at market needs/barriers and options to support innovative solutions to bridging the gaps between training and job placement.
- NYSERDA will convene a group to explore what role hiring halls and preapprenticeship programs (with a pipeline to registered apprenticeships) might play in increasing clean energy employment within disadvantaged communities, with a recommendation made by the end of the year.

#### **Hiring Hall Working Group Members**

- Adele Ferranti, NYSERDA, Convener
- Clarke Gocker, PUSH Buffalo
- Rahwa Ghirmatzion, PUSH Buffalo
- Lisbeth Shepherd, Green City Force
- Mara Cerezo, Green City Force
- Sean Morrissey, YouthBuild Troy
- Aggie Lane, Urban Jobs Task Force
- Ruth Pillittere, NYS Department of Labor
- Liz Martin, NYS Department of Labor

# **Working Group Discussion and Preliminary Recommendations**

- Looking at ways NYSERDA can support a variety of models (hiring halls, apprenticeships, pre-apprenticeship programs, direct entry, YouthBuild, and social enterprise models such as AmeriCorps, etc.) as we explore how best to develop clean energy talent pipelines.
- NYSERDA should further investigate support for activities such as career awareness/exploration/preparation, professional and technical training, onboarding, bringing workers to full productivity, career advancement, and job retention. These activities should be driven by business needs with the end goal of job placement.
- Youth in NYS have a much higher unemployment rate (>10%), compared to the overall state unemployment rate of 4.6%.

#### **Discussion, Continued**

- One-on-one outreach to and relationships with both the worker and business are critical
- Need to develop industrial and commercial awareness particularly for youth
- Focus is needed on facilitating advancement to full-time, good paying jobs
- As NYSERDA gets more involved with procurement activities, such as Community Solar, consider local hiring and labor standards

#### **Next Steps**

Working Group will continue to meet regularly to share best practices and help develop talent pipeline initiatives

# **Current CEF Workforce Training Initiative: Building Operations and Maintenance**

#### **Building Operations and Maintenance (O&M)**

NYSERDA's first Workforce Development and Training investment strategy focuses on an industry partnership approach to training.

- Opportunity: 120,000 building operations and maintenance workers in the state require similar skills across sectors. There is a potential for training to reduce a building's energy use by 5-20%.
- Goal: to increase the operational efficiency of buildings by identifying common building O&M workforce needs and interventions across industry sectors; identifying worker skill gaps; informing investments in skills and talent development; supporting career pathways; and developing the training infrastructure needed to better link supply and demand in the labor market.

#### **Building O&M**

#### Activities to Date:

- Convening industry partnership group, stakeholder meetings, and extensive interviews with building owners, building managers, property management companies, and unions
- Two solicitations issued with 12 projects moving forward; third solicitation open (\$4 million), open enrollment through 1/31/18
- Two pilot projects to demonstrate business case for workforce training underway, and four additional pilots being finalized

#### **NYSERDA's Goals under PON 3715**

Support for employers and building owners with workforce development and training projects that:

- Create talent development strategies
- Improve corporate culture
- Develop the framework for on-site training
- Create training tools that support building O&M beyond classroom training opportunities

#### **Eligible Activities**

NYSERDA will support eligible projects by providing funding for activities such as:

- On-site training laboratories
- Curriculum development
- Career pathways training
- Coaching and mentorships
- Apprenticeships and internships
- Intermediaries to support talent recruitment and placement
- Training trainers
- Partnerships with manufacturers

#### **Building O&M Project Snapshot**

- 12 projects: 6 executed agreements, remainder executed by 12/31/17
- Sectors represented: health care (3 hospitals), multifamily buildings (5), education (4)
- NYSERDA Investment \$3.49 million; \$4.9 million in cost share
- Average estimated energy saving 6% for \$8.3 million in total annual savings
- 2,477 trained
- Total cost per trainee \$3,360 with NYSERDA covering \$1,400 per trainee

#### **Building O&M Example Projects**

# NYS Schools Facilities Association

Collaboration of 10 central NY school districts to provide Building Operator Certification training for 75 school facility directors and maintenance workers. In future years, train an additional 240 school staff members on timely K-12 energy management topics.

\$400,000 in NYSERDA funding \$1.0 million annual energy savings (est.)

#### The Cooper Union

Train 19 staff members (engineering, building operations, and energy efficiency) and six mechanical engineering interns.

Develop a new for-credit course on HVAC and Energy Efficient Buildings. In the future, extend training to an additional six engineers and four to six interns per year.

\$167,671 in NYSERDA funding \$75,300 million annual energy savings (est.)

# LMI Market Characterization Study

#### **LMI Market Characterization**

- What does the LMI population in NYS look like?
  - Demographics, housing characteristics, geographic distribution
- What are the underserved populations, where are they?
- What opportunities exist to improve the impact of our programs?

NEW YORK NYSERDA

#### **Market Characterization Research**

- Contract with APPRISE (population analysis and special topic reports)
- Data sourced and computed from the following data sets:
  - o 2013-2015 American Community Survey
  - American Housing Survey
  - Current Population Survey
  - Residential Energy Consumption Survey
- Population Analysis: data by income group, demographics, housing characteristics, geography
- Special Topic Reports:
  - o Income Status: documents how income status is defined and identifies income groups
  - LMI Market Segmentation: presents a market segmentation strategy and furnishes detailed profiles for important market segments
  - Household Energy Burden: provides stats on energy burden
  - Financial Capacity: documents the financial capacity of LMI households and assesses the ability of LMI households to invest in clean energy improvements

#### **Population Analysis- Sizing**

Number and Percentage of Households by Income Group, with Avg. Annual Income

| Income Group                  | Number of<br>Households | Percent of<br>Households | Average Income |
|-------------------------------|-------------------------|--------------------------|----------------|
| Very Low-Income<br>Households | 1,388,051               | 40%                      | \$12,801       |
| Low-Income Households         | 969,865                 | 28%                      | \$29,739       |
| Moderate-Income<br>Households | 1,153,239               | 33%                      | \$47,348       |
| All LMI Households            | 3,511,156               | 100%                     | \$28,827       |

#### **Population Analysis-Demographics**

#### By Household Type and Income Group

| the substitute of                 | Income Group        |                |                     |  |  |
|-----------------------------------|---------------------|----------------|---------------------|--|--|
| Household Type                    | Very Low-<br>Income | Low-<br>Income | Moderate-<br>Income |  |  |
| Elderly Couple                    | 14%                 | 22%            | 25%                 |  |  |
| Elderly Individual                | 24%                 | 25%            | 18%                 |  |  |
| Older without<br>Children (40-59) | 19%                 | 17%            | 21%                 |  |  |
| Older with<br>Children (40-59)    | 17%                 | 16%            | 14%                 |  |  |
| Younger without<br>Children (<40) | 10%                 | 9%             | 13%                 |  |  |
| Younger with<br>Children (<40)    | 17%                 | 12%            | 8%                  |  |  |
| All LMI<br>Households             | 100%                | 100%           | 100%                |  |  |

#### By Race/Ethnicity and Income Group

| Race and               | Income Group        |            |                     |  |  |
|------------------------|---------------------|------------|---------------------|--|--|
| Ethnicity              | Very Low-<br>Income | Low-Income | Moderate-<br>Income |  |  |
| White Non-<br>Hispanic | 43%                 | 56%        | 59%                 |  |  |
| Black Non-<br>Hispanic | 20%                 | 16%        | 16%                 |  |  |
| Hispanic               | 26%                 | 19%        | 17%                 |  |  |
| Asian                  | 8%                  | 6%         | 6%                  |  |  |
| Other                  | 2%                  | 2%         | 2%                  |  |  |
| All LMI<br>Households  | 100%                | 100%       | 100%                |  |  |

#### **Population Analysis- Geographic Distribution**

#### Distribution of LMI Population by Region and Housing Type

| NYS Economic<br>Development Region | Single Family | Small<br>Multifamily | Large<br>Multifamily | Mobile<br>Home | All Housing<br>Units |
|------------------------------------|---------------|----------------------|----------------------|----------------|----------------------|
| Capital District                   | 46%           | 27%                  | 21%                  | 6%             | 100%                 |
| Central New York                   | 52%           | 19%                  | 22%                  | 7%             | 100%                 |
| Finger Lakes                       | 56%           | 17%                  | 21%                  | 6%             | 100%                 |
| Long Island                        | 71%           | 12%                  | 16%                  | 1%             | 100%                 |
| Mid-Hudson                         | 42%           | 22%                  | 33%                  | 3%             | 100%                 |
| Mohawk Valley                      | 52%           | 24%                  | 13%                  | 12%            | 100%                 |
| New York City                      | 12%           | 24%                  | 64%                  | <1%            | 100%                 |
| North Country                      | 55%           | 16%                  | 13%                  | 15%            | 100%                 |
| Southern Tier                      | 52%           | 18%                  | 17%                  | 13%            | 100%                 |
| Western New York                   | 52%           | 27%                  | 16%                  | 5%             | 100%                 |
| All LMI Households                 | 34%           | 22%                  | 41%                  | 3%             | 100%                 |

# Population Analysis-Distribution by Housing Type and Ownership Status

Distribution of LMI Population by Income Grouping, Housing Type, and Ownership Status

| Hausing Unit Tong      | Very Low-Income |           | Low-Income |         | Moderate Income |         |
|------------------------|-----------------|-----------|------------|---------|-----------------|---------|
| Housing Unit Type      | Owner           | Renter    | Owner      | Renter  | Owner           | Renter  |
| Single Family Home     | 209,713         | 116,158   | 292,939    | 72,380  | 424,526         | 71,854  |
| Small Multifamily Home | 42,428          | 280,641   | 46,309     | 164,974 | 67,992          | 160,273 |
| Large Multifamily Home | 34,377          | 660,880   | 34,894     | 323,815 | 60,607          | 338,226 |
| Mobile Homes           | 26,803          | 17,051    | 25,180     | 9,374   | 22,298          | 7,463   |
| All Households         | 313,321         | 1,074,730 | 399,323    | 570,542 | 575,424         | 577,816 |

#### **Special Topic- Energy Burden**

Energy Burden by Housing Type for Households with Annual Income at or Below 100% FPL

| Housing Unit Type        | Percent of LMI<br>Households | Average Energy Bill | Average Income | Average Energy Burden |
|--------------------------|------------------------------|---------------------|----------------|-----------------------|
| Single Family            | 34%                          | \$3,500             | \$10,312       | 33.9%                 |
| Small Mulitfamily        | 29%                          | \$2,503             | \$10,865       | 23.0%                 |
| Large Multifamily        | 33%                          | \$1,588             | \$9,332        | 17.0%                 |
| Mobile Homes             | 4%                           | \$3,095             | \$10,680       | 29.0%                 |
| Income Less than Poverty | 100%                         | \$2,563             | \$10,168       | 25.2%                 |

#### **Special Topic- Energy Burden**

#### Energy Burden by Main Heating Fuel, All LMI Households

| Main Heating Fuel  | Percent of LMI<br>Households | Average Energy Bill | Average Income | Average Energy Burden |
|--------------------|------------------------------|---------------------|----------------|-----------------------|
| Natural Gas        | 65%                          | \$2,681             | \$31,117       | 8.6%                  |
| Fuel Oil           | 13%                          | \$4,477             | \$34,892       | 12.8%                 |
| Electricity        | 15%                          | \$1,857             | \$25,246       | 7.4%                  |
| Propane            | 4%                           | \$3,503             | \$29,970       | 11.7%                 |
| Wood/Coal          | 2%                           | \$3,288             | \$33,633       | 9.8%                  |
| All LMI Households | 100%                         | \$2,839             | \$30,726       | 9.2%                  |

#### **Special Topic- Financial Capacity**

#### Average Shelter Burden for New York State Households by Income Group

| Household Group    | Average Shelter Bill | Average Income | Average Shelter Burden |
|--------------------|----------------------|----------------|------------------------|
| LMI Households     | \$13,769             | \$28,923       | 47.6%                  |
| Non-LMI Households | \$22,605             | \$143,671      | 15.7%                  |

# Residential Loan Fund Update

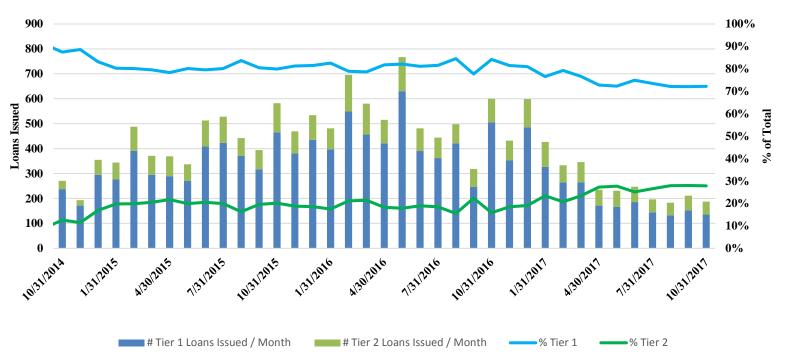

#### Green Jobs-Green New York Financing Dollar Value of Residential Loans Issued by Month (Past Three Years)

#### Green Jobs-Green New York Financing Residential Loans Issued by Tier (Past Three Years)

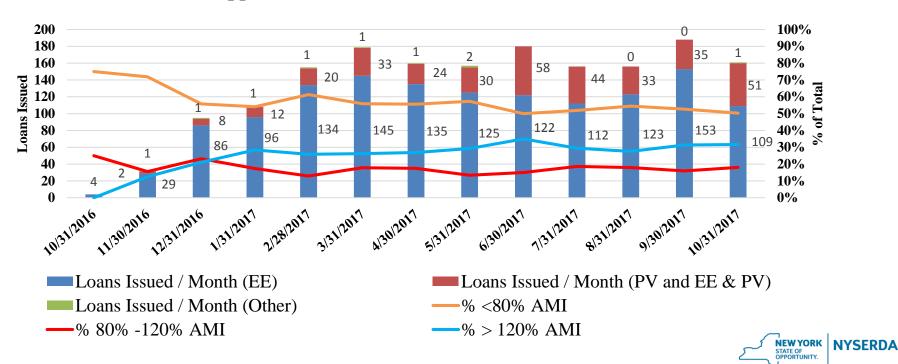

#### Regional Greenhouse Gas Initiative (RGGI) Funding Needs

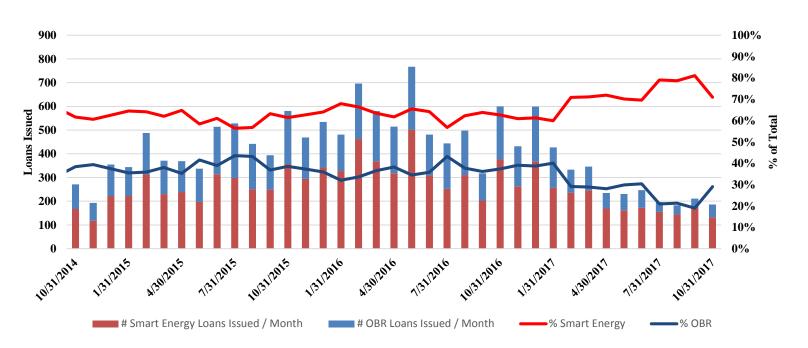

|                          | Loans Issued<br>11/1/2016 - 10/31/2017 |      | RGGI Funds | Allocation of RGGI |
|--------------------------|--|------|------------|--------------------|
| Component                | Number of Loans                        | \$M  | \$M*       | Funds              |
| Tier 1 Energy Efficiency | 1,490                                  | 13.3 | 2.7        | 14%                |
| Tier 1 PV and other      | 1,288                                  | 20.7 | 7.2        | 38%                |
| Tier 2                   | 848                                    | 9.2  | 9.2        | 48%                |
| Total                    | 3,626                                  | 43.2 | 19.1       | 100%               |

<sup>\*</sup>RGGI Funds are needed to support refinancing over-collateralization (amount not funded through bond proceeds), or to carry Tier2 loans that cannot immediately be refinanced until sufficient repayment history.

#### Green Jobs-Green New York Financing Residential Loans Issued by Income Range (Applications Submitted on 9/1/2016 or Later)

#### Green Jobs-Green New York Financing Residential Loans Issued by Type (Past Three Years)

#### **Factors That May Impact Demand for Loans in the Future**

- Addition or subtraction of third party lenders and financing products in the market
- Weather conditions
- Change in the economy
- Change in refinancing interest rates
- New Clean Energy Fund residential pilots (proposed)
  - Small scale for two-three years
  - Statewide expansion in three-four years
  - Expected to increase the number of contractors providing services
  - Expected to increase consumer demand for services
