

## Energy Project Implementation

### What is Energy Project Implementation?

The New York Power Authority (NYPA) is the nation’s largest state public power organization, producing clean and low cost electricity. In addition, it provides energy services to eligible government and non-profit entities. Our Energy Project Implementation team focuses on managing the design, bidding, and building of energy projects across the State. We serve as a trusted energy partner in all of our services, offering impartial and expert strategies to simplify the procurement process, ensure on-time results, and achieve cost savings and environmental improvements for our customers. NYPA has a proven track record of project implementation success: completing 2,164 energy projects at 5,653 buildings and facilities throughout New York.

**NYPA’s services can be provided in any combination to meet specific customer needs:**

• Site Identification, Screening, and Auditing	• Financing
• Design	• Incentive Acquisition Assistance
• Construction Management	• Advisory Services
• Commissioning	• Retrocommissioning

### Our Value Proposition

Customers utilizing NYPA’s Energy Project Implementation services can expect the following benefits:

#### SIMPLICITY

NYPA connects our customers to a vast network of proven and pre-vetted energy service companies through a simple and streamlined procurement process. NYPA’s own team of skilled engineers and project managers augment all vendor work.

#### PROJECT MANAGEMENT

NYPA’s seasoned team of project managers supervises all aspects of project construction and implementation. We are committed to ensuring that projects are completed efficiently and effectively. Our strict project oversight and trusted third party approach delivers unmatched protection.

#### SAVINGS

NYPA continuously searches for opportunities to achieve customer savings. Our energy improvement projects have saved customers approximately \$183 million each year and has resulted in significant air quality improvements for all New Yorkers.

Energy Project Implementation is a Customer Energy Solutions (CES) program. In an effort to better provide energy services and programs, NYPA established a CES team committed to delivering results, value, and satisfaction for customers. The mission of CES is simple: serve as a trusted advisor for customers as they navigate the energy marketplace.
