

I. Affordable multifamily buildings must meet the following affordable housing definition:

Affordable housing is defined as projects in which at least 25% of the units are, or are expected to be, occupied by households earning not more than 80% of the area or State median income, whichever is higher.

Affordable housing documentation is requested at time of application and must be verified before a Purchase Order issued. There are two ways to qualify a project for affordable housing incentives:

1. Proxy: **NYSERDA** allows certain proxies to represent compliance with the above definition. *Table 1: Affordability Eligible Proxies* below lists eligible proxies and supporting documentation.
2. Rent Roll: This type of qualification may be used by projects that do not meet the proxy requirements. Twenty-five percent of the units must have a calculated household income no more than 80% of the State or area median income, whichever is higher, based on the assumption that 30% of household income is applied to housing costs (i.e., rent). Applicants must submit the annual rent, size, and occupancy for each apartment in the property. A calculation spreadsheet tool to determine Rent Roll income eligibility is available on the FlexTech Documents and Resources page, here: www.nyscrda.ny.gov/flextech-documents.

II. Participation in the Affordable Multifamily Energy Efficiency Program

Affordable projects may be eligible to participate in the Affordable Multifamily Energy Efficiency Program (AMEEP) administered by the New York State utilities.
